## 2. Principales normas de contabilidad

Los Estados financieros se elaboran de conformidad con los principios contables generalmente aceptados en Luxemburgo relativos a los organismos de inversión colectiva.

**Cálculo del valor liquidativo**. El valor liquidativo por acción de cada clase de acciones se calcula determinando en primer lugar la proporción del patrimonio neto del subfondo pertinente atribuible a cada clase de acciones. Cada uno de estos importes se dividirá entre el número de acciones de la clase pertinente pendientes al cierre de la sesión de negociación. El valor liquidativo de cada clase se determina en la divisa principal de negociación de la clase respectiva.

**Valoración de títulos.** Las inversiones en instrumentos financieros cotizados en cualquier mercado de valores se valorarán con arreglo al último precio disponible en el momento de la valoración en el principal mercado de valores en el que cotice dicho título. Los instrumentos financieros negociados

en cualquier mercado extrabursátil, los valores mobiliarios de deuda a corto plazo y los instrumentos del mercado monetario que no coticen en bolsas o mercados regulados se valorarán al último precio disponible en el momento en el que se realice la valoración. El valor de los Fondos de liquidez y los instrumentos del mercado monetario se determina según el precio de mercado o del modelo cuando no pueda utilizarse el del mercado o cuando los datos del mercado no tengan la calidad suficiente. Todos los demás activos los valoran los Administradores de la Sociedad aplicando el principio de prudencia y de buena fe, basándose en su precio de venta previsible. Las participaciones propiedad de la Sociedad cotizan en un mercado regulado, excepto cuando se indique lo contrario en la Lista de inversiones de un subfondo.

**Política de ajuste del precio**. Se ha adoptado e implantado una política de ajuste del precio destinada a proteger los intereses de los Accionistas de la Sociedad. El propósito de la política de ajuste del precio es asignar los costes asociados a las grandes entradas y salidas a los inversores que realizan operaciones ese día, protegiendo así al Accionista a largo plazo de los peores efectos de la dilución. Este propósito se consigue mediante el ajuste del precio de la clase de acciones al que se efectúan las operaciones en un subfondo. De este modo, el precio de las clases de acciones se puede ajustar al alza o a la baja dependiendo del nivel y del tipo de operaciones de los inversores ese día en concreto en un subfondo. De esta forma, los Accionistas existentes y restantes no sufren un nivel de dilución inadecuado. La Sociedad solo aplicará un ajuste en el precio cuando existan flujos netos significativos que puedan tener una repercusión importante en los Accionistas restantes. El ajuste estará basado en los costes de operación normales de los activos correspondientes en los que invierte cada subfondo, sin superar el 2% del precio. El Consejo podrá decidir incrementar este límite de ajuste en circunstancias excepcionales para proteger los intereses de los Accionistas. Una vez efectuado un ajuste en el precio de la clase de acciones, dicho precio será el precio oficial de esa clase de acciones para todas las operaciones de ese día. A 30 de abril de2026, se han realizado ajustes de precio en los siguientes subfondos:

**Política de ajustes del valor razonable**. Podrán efectuarse ajustes al valor razonable para proteger los intereses de los Accionistas de la Sociedad contra las prácticas de sincronización de las operaciones con la marcha de los mercados (*market timing*). En consecuencia, si un subfondo invierte en mercados que están cerrados en el momento de valoración del subfondo, los Administradores, sin perjuicio de las disposiciones recogidas anteriormente en valoración de los títulos, podrán permitir que los valores incluidos en una cartera en particular se ajusten para reflejar con mayor exactitud el valor razonable de las inversiones del subfondo en el momento de valoración.

**Depósitos bancarios y efectivo en bancos e intermediarios**. Todos los depósitos bancarios y el efectivo en bancos e intermediarios se contabilizan a su valor nominal.

**Operaciones de títulos de inversión**. Las operaciones de títulos de inversión se contabilizan en la fecha de compra o venta de los títulos. El cálculo del coste de venta de los títulos se realiza con arreglo al coste medio.

**Futuros**. Los futuros se contabilizan en la fecha de apertura o de cierre del contrato. Los pagos posteriores son realizados o recibidos por el subfondo cada día, dependiendo de las fluctuaciones diarias del valor del índice o el título asociado, que se registran a efectos de la presentación de información financiera como ganancias o pérdidas no materializadas por la cartera. Las ganancias o pérdidas no realizadas derivadas de futuros se incluyen en el Estado del patrimonio neto y en la Lista de inversiones. Las ganancias y pérdidas materializadas se basan en el método de "primera entrada, primera salida". Todas las pérdidas y ganancias en futuros se publican en el Estado de operaciones y variaciones del patrimonio neto.

**Contratos de cambio de divisas a plazo**. Los contratos de cambio de divisas a plazo se valoran con arreglo a los tipos de cambio a plazo vigentes en la fecha de cierre y aplicables durante el periodo restante hasta la fecha de vencimiento. Las ganancias y las pérdidas no realizadas derivadas de contratos de cambio de divisas a plazo se incluyen en el Estado del patrimonio neto y en la Lista de inversiones. Todos los contratos a plazo, incluyendo aquellos utilizados para la cobertura de clases de Acciones, se incluyen en la Lista de inversiones. Todas las pérdidas y ganancias en contratos a plazo se publican en el Estado de operaciones y variaciones del patrimonio neto.

**Contratos de opciones**. Las opciones adquiridas se registran como inversiones a su valor de mercado realizable; las opciones suscritas o vendidas se registran como pasivo en base al coste al cierre de la posición. Las opciones adquiridas y suscritas se incluyen en el Estado del patrimonio neto y en la Lista de inversiones. Cuando el ejercicio de una opción ofrece una liquidación al contado, la diferencia entre la prima y el producto de la

liquidación se contabiliza como beneficio o pérdida realizado(a). Cuando caduca una opción, las primas se contabilizan como beneficio realizado para opciones suscritas o como pérdida realizada para opciones adquiridas. Todas las pérdidas y ganancias en opciones se publican en el Estado de operaciones y variaciones del patrimonio neto.

**Tipo de interés, inflación e indexados a un día.** El interés exigible y pagadero por contratos de swaps (o permutas financieras) de tipos de interés, inflación, rentabilidad total e indexados a un día se devenga a diario y los futuros compromisos en virtud del swap se valoran de acuerdo con los tipos de mercado. Los contratos de tipos de interés e inflación se incluyen en el Estado del patrimonio neto y la Lista de inversiones. Todas las ganancias y las pérdidas en el valor de los swaps de tipos de interés, inflación, indexados a un día y rentabilidad total aparecen reseñadas en el Estado de operaciones y de variación del patrimonio neto. Los ingresos por cobrar/por pagar por los swaps de tipos de interés e inflación se incluyen en ingresos o gastos sobre la base del devengo y se reflejan en el Estado de operaciones y variaciones del patrimonio neto como "Ingresos por cobrar/por pagar por los swaps".

**Swaps de incumplimiento crediticio.** Las primas abonadas y recibidas por contratos de swaps de incumplimiento crediticio para comprar o vender protección frente a problemas de crédito se devengan a diario y se reflejan como ingresos netos. Los compromisos futuros en virtud del swap se valoran a precio de mercado. Los contratos de swaps de incumplimiento crediticio se incluyen en el Estado del patrimonio neto y la Lista de inversiones. Todas las ganancias y las pérdidas en el valor de los swaps de incumplimiento crediticio aparecen reseñadas en el Estado de operaciones y variaciones del patrimonio neto.

**Contratos por diferencias.** Los contratos por diferencias son contratos celebrados entre un intermediario y la Sociedad en virtud de los cuales las partes acuerdan realizarse pagos mutuos con el fin de reproducir las consecuencias económicas derivadas de la tenencia de una posición larga o corta en el valor subyacente. Los contratos por diferencias también reflejan las medidas empresariales adoptadas. Los dividendos recibidos o pagados por contratos por diferencias figuran netos en el Estado de operaciones y variaciones del patrimonio neto, dentro del apartado "Ingresos por derivados" o "Gastos por derivados". Cuando se cierra un contrato, la Sociedad registra una ganancia o una pérdida realizada equivalente a la diferencia entre el valor del contrato en el momento en el que se firmó y el valor en el momento en el que se cerró. La valoración de los contratos por diferencias se basa en el valor subyacente y se declara en el Estado del patrimonio neto y en la Lista de inversiones. Los costes financieros pagados al intermediario por mantener el valor subyacente se incluyen en el apartado de Costes financieros de contratos por diferencias en el Estado de operaciones y variaciones del patrimonio neto. Todas las pérdidas y ganancias en contratos por diferencias se publican en el Estado de operaciones y variaciones del patrimonio neto.

**Pagarés vinculados a renta variable**. Los pagarés vinculados a renta variable se someten a valoración diaria en base al precio de los títulos asociados y se reseñan en el Estado del patrimonio neto y en la Lista de inversiones al precio de mercado. El cupón o los cupones intermedios y el pago final al vencimiento se calculan mediante el cambio de valor de los títulos asociados. Los ingresos por intereses o "resultados positivos" obtenidos y los beneficios o pérdidas se establecen en el Estado de operaciones y variaciones del patrimonio neto.

**Cambio de divisas.** Los Administradores deciden la divisa de denominación de cada subfondo. Los activos y pasivos a 30 de abril de 2026 se han convertido aplicando los tipos de cambio vigentes en esa fecha. Todas las operaciones denominadas en divisas extranjeras durante el ejercicio se convierten a la divisa de denominación del subfondo aplicando el tipo de cambio vigente el día de la operación.

**Bonos en depósito fiduciario**. Los bonos incluidos en la Lista de Inversiones pueden utilizarse como garantía subsidiaria contra riesgos derivados abiertos. En tal caso, los bonos serán custodiados para evitar su negociación. La siguiente tabla detalla las cantidades de bonos en depósito fiduciario por subfondo:

**Operaciones de acciones de los fondos.** El precio de emisión y de reembolso por Acción de cada subfondo es el valor liquidativo por Acción el día de la operación, sujeto a la política de ajuste del precio.

**Coste de constitución.** Todos los costes de constitución relativos al lanzamiento de la Sociedad se han amortizado. Los costes ocasionados por el lanzamiento de nuevos subfondos se imputarán a los gastos de operación actuales.

**Ingresos**. Los dividendos de los títulos de renta variable se reconocen cuando el título cotiza ex dividendo. El interés se contabiliza utilizando el principio de devengo.

**Información sobre el cupón cero**. Los bonos de cupón cero y los instrumentos del mercado monetario de cupón cero se indican en la Lista de inversiones a una tasa que refleja la rentabilidad real.

**Cuentas consolidadas**. Los Estados financieros consolidados se han presentado en USD, que es la moneda designada por la Sociedad, y representan los Estados financieros totales de los diferentes subfondos. Los subfondos expresados en divisas distintas a USD se han convertido de acuerdo con los tipos de cambio vigentes al final del ejercicio.

## 3. Cogestión de activos

Con objeto de una gestión eficaz, cuando las normas de inversión de los subfondos así lo permitan, el Consejo de Administración podrá decidir la cogestión de los activos de determinados subfondos de la cartera de Fidelity Funds. En dichos casos, los activos de diferentes subfondos se gestionarán en común. La técnica de cogestión puede dar lugar a la aparición de fracciones, cuyo valor está basado en el valor de mercado de los instrumentos financieros asociados de la cartera de los subfondos cogestionados al final del ejercicio y se incluye en el precio total de mercado de la cartera. Dada la irrelevancia de estos importes, se han incluido en "Fracciones" en la Lista de Inversiones.

## 4. Comisiones de gestión de inversiones y otras operaciones con el Gestor de Inversiones o sus filiales

En virtud del Contrato de Gestión de Inversiones modificado y actualizado el 9 de julio de 2020, FFML tiene derecho a una comisión mensual de gestión y a una comisión de asignación de activos devengadas a diario y basadas en la media del patrimonio neto total de cada subfondo, a los tipos anuales que se indican a continuación:

### Comisiones de rentabilidad

El Gestor de Inversiones tiene derecho a percibir una comisión de rentabilidad anual, que se calcula en función del patrimonio neto de las clases de Acciones de los fondos con índices de efectivo como Índices del Mercado y está sujeta a una Cota máxima ajustada a la rentabilidad del Índice del Mercado correspondiente. El empleo de una Cota máxima resulta apropiado por tratarse de un método de cálculo de la comisión de rentabilidad de una clase de acciones que pretende lograr una rentabilidad absoluta anual. El objeto del uso de la cota máxima es asegurar que los inversores no paguen una comisión de rentabilidad hasta que no se haya recuperado cualquier pérdida anterior. No existe ningún mecanismo para reducir la Cota máxima.

La base para el cálculo de las comisiones de rentabilidad se explica de forma detallada en el Folleto informativo, que deben leer todos los inversores antes de invertir. Las comisiones de rentabilidad, las tasas críticas de rentabilidad y el índice de referencia de cada subfondo son los siguientes:

| Nombre del subfondo | Comisión de rentabilidad | Tasa crítica de rentabilidad | Índice de referencia |
|---|---|---|---|
| Absolute Return Global Equity Fund | 15% | N/A | Secured Overnight Financing Rate |
| Absolute Return Multi Strategy Fund | 10% | N/A | Secured Overnight Financing Rate |

El subfondo Absolute Return Global Equity Fund pagó comisiones de rentabilidad por importe de 137.586 USD durante el ejercicio finalizado el 30 de abril de 2026.

La siguiente tabla muestra las comisiones de rentabilidad de cada clase de acciones para el ejercicio:

|---|---|---|---|---|
| Absolute Return Global Equity Fund | Acciones A-PF-ACC (USD) | USD | 11.587 | 0,02 |
| Absolute Return Global Equity Fund | Acciones A-PF-ACC (EUR) (cubiertas EUR/USD) | EUR | 43 | 0,00 |

| Absolute Return Global Equity Fund | Acciones Y-PF-ACC (EUR) (cubiertas EUR/USD) | EUR | 51.606 | 0,03 |

Los porcentajes de activos bajo gestión mencionados anteriormente se calculan en función de los activos bajo gestión de cada clase de acciones al cierre del ejercicio.

Las comisiones de rentabilidad que se presentan incluyen el impacto de mecanismos como el ajuste de las suscripciones y la cristalización en el reembolso, tal y como se describe en el Folleto informativo. Estos mecanismos pueden dar lugar a inconsistencias en el efecto de la comisión de rentabilidad observado en las distintas clases de acciones.

Durante el ejercicio cerrado el 30 de abril de 2026, ninguna de las clases de acciones de Absolute Return Multi Strategy Fund pagó comisiones de rentabilidad.

## 9. Compensación

Se aplican acuerdos de compensación de ingresos a todas las clases de acciones (de acumulación y de distribución) de todos los subfondos. Para la distribución de acciones, estos acuerdos tienen por objeto que los beneficios por acción distribuidos en relación con un periodo de distribución no se vean afectados por los cambios en el número de acciones emitidas durante ese periodo. El cálculo de la compensación se basa en la renta neta de la inversión. Todos los importes de compensación se desglosan en el Estado de operaciones y variaciones del patrimonio neto.
