## What is this product?

### Type

This product is a Class of Unit of the sub-fund Bond EUR Medium Term LTE (the "Fund") which is part of Eurizon Fund, an open-ended common fund in transferable securities ("FCP") qualifying as a UCITS.

### Term

There is no maturity date for this product. The product could be unilaterally closed or merged following notice to investors in the conditions led down in the Prospectus.

### Objectives

**Investment objective** To increase the value of your investment over time and to achieve a total return that is in line with that of medium term eurozone government bond markets (as measured by the benchmark).

**Benchmark(s)** JP Morgan EMU Government Bond 3-5 years Index® (total return). For designing the portfolio and measuring performance.

**Investment policies** The fund mainly invests in government bonds denominated in euro. The fund generally favours direct investment but may at times invest through derivatives.

Specifically, the fund normally invests at least 80% of total net assets in debt and debt-related instruments, including money market instruments, denominated in EUR. The credit rating and duration of securities are usually consistent with those of the benchmark.

The fund may invest in the following asset classes up to the percentages of total net assets indicated:

- corporate debt instruments: 20%

The fund does not invest in asset-backed securities or contingent convertible bonds (coco bonds), but may be indirectly exposed to them (maximum 10% of total net assets).

Non-EUR investments are hedged to EUR.

**Derivatives and techniques** The fund may use derivatives for reducing risks (hedging) and costs, and to gain additional investment exposure.

**Strategy** In actively managing the fund, the investment manager invests similarly to the benchmark while seeking to enhance returns. Using analysis of market valuations and sector trends as well as statistical models of macroeconomic and microeconomic variables, the investment manager over- or underweights certain securities, while aiming to keep performance within a defined range of the index (limited tracking error approach) and risk exposure within pre-defined

limits. The fund's exposure to securities, and thus its performance, are likely to closely resemble those of the benchmark.

**Distribution Policy** This Unit Class is not distributing dividends. Income from investments is reinvested.

**Other information** The fund promotes (E) environmental and/or (S) social characteristics and invests in assets following good governance (G) practices in accordance with article 8 of the Sustainable Finance Disclosure Regulation ("SFDR"). For more information, see "SFDR Pre-contractual disclosures" attached to the Prospectus.
