| CN Shares                 | Up to 3%                    | None                                    | 0.45%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.45%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.45%              |
| Z Shares                  | None                        | None                                    | Up to 0.45%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Equity Alpha

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide.

'Alpha' funds invest in companies in which the Investment Manager has a high conviction that the current share price does not reflect the future prospects for that business.

The Investment Manager seeks to identify companies which it believes will deliver future earnings growth above the level expected by the market typically on a three to five year horizon (we term this as 'a positive growth gap').

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment

Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Alpha Equity Fund".

The Fund bears in its name the word "Alpha", which means that the Investment Manager adopts an active management strategy, by aggressively positioning the portfolio according to prevailing market conditions. This could be on the basis of particular sectors, themes or styles, or on a selected number of investments which the Investment Manager believes have the potential to provide enhanced returns relative to the market.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                                              |

| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.65%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.65%              |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Equity Impact

## Investment Objective

The Fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide, including emerging markets, whose activities the Investment Manager considers create positive social or environmental impact and which the Investment Manager deems to be sustainable investments.

## Investment Policy

The Fund is actively managed and invests its assets in (i) sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term, and (ii) investments that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager will select companies from a universe of eligible companies that have been determined as meeting the Investment Manager's impact criteria. The impact criteria include an assessment of a company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company's impact via its proprietary impact investment management framework and tools (including an impact scorecard).

The Fund is part of Schroders' Impact Driven strategies. As such, it applies highly selective investment criteria and its investment process is aligned with the Operating Principles for Impact Management which means that an assessment of impact is embedded in the steps of the investment process. All sustainable investments in the Fund are subject to this framework.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to seek to improve sustainability practices and enhance social and environmental impacts generated by underlying investee companies. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>.

The Fund invests at least two-thirds of its assets in equity and equity related securities of companies worldwide, including emerging markets. The Fund typically holds 40 – 80 companies.

The Fund may invest up to 15% of its assets in emerging markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against its comparator benchmark being the MSCI AC World index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets.

The Fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark does not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has the objective of sustainable investment (within the meaning of Article 9 SFDR). A Fund with this objective may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.70%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.85%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.85%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.25%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Equity Yield

## Investment Objective

The Fund aims to provide income and capital growth in excess of the MSCI World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide.

The Fund will invest in a diversified portfolio of equity and equity related securities whose dividend yield in aggregate is greater than the average market yield. Equities with below average dividend yield may be included in the portfolio when the Investment Manager considers that they have the potential to pay above average yield in future.

The Fund will not be managed for yield alone: total return (dividend yield plus capital growth) will be equally important.

The Fund may invest directly in China H-Shares and may invest up to 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net TR) index and compared against the MSCI World Value (Net TR) index and the Morningstar Global Income Equity Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark and the MSCI World Value (Net TR) index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment

Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark or the MSCI World Value (Net TR) index. The Investment Manager will invest in companies or sectors not included in the target benchmark or the MSCI World Value (Net TR) index in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. Any comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|
| Fund Currency                                                          | USD                                           |
| Investment Manager                                                     | Schroder Investment Management Limited        |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day          |
| Dealing Frequency                                                      | Daily on Dealing Day                          |

| Redemption Charge     | None |
| PEA / PIR Eligibility | No   |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.50%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.50%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Gold

## Investment Objective

The Fund aims to provide capital growth in excess of the FTSE Gold Mines UCITS capped index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies in the gold industry.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide involved in the gold industry. It will also invest up to 40% of its assets in gold and other precious metals through eligible assets (as described under the definition of "Alternative Asset Classes" in Appendix III of this Prospectus, which includes notably commodities but excluding Alternative Investment Funds) and gold and other precious metals transferable securities.

The Fund may hold up to 40% of its assets in cash and Money Market Investments. The Fund will not be exposed to any physical commodities directly, nor enter into any contracts relating to physical commodities.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds and warrants (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the FTSE Gold Mines UCITS capped index. The Fund's investment universe is

expected to overlap to a limited extent with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                               |

| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global High Yield

## Investment Objective

The Fund aims to provide income and capital growth in excess of the Bloomberg Global HYxCMBSxEMG index USD Hedged 2% cap after fees have been deducted over a three to five year period by investing in below investment grade fixed and floating rate securities issued worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in fixed and floating rate securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). The securities may be denominated in various currencies and issued by governments, government agencies, supra-nationals and companies worldwide.

The Fund may invest up to 15% of its assets in contingent convertible bonds.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. The Fund may use leverage.

The Fund maintains a higher overall sustainability score than the Bloomberg Global HYxCMBSxEMG index USD Hedged 2% cap, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Bloomberg Global HYxCMBSxEMG index USD Hedged 2% cap and compared against the Morningstar Global High Yield Category. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The Bloomberg Global HYxCMBSxEMG index USD Hedged 2% cap measures the market of non-investment grade, fixed-rate, taxable corporate bonds. The index follows the same rules as the uncapped index but limits the exposure of each issuer to 2% of the total market value and redistributes any excess market value index-wide on a pro-rata basis.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Relative Value-at-Risk (VaR)

### VaR Benchmark

Bloomberg Global High Yield ex CMBS ex EMG 2% Cap Index USD hedged. This USD hedged index provides a broad-based measure of the global non-investment grade debt market, caps issuers at 2% and excludes emerging markets as well as CMBS.

### Expected Leverage

100% of the total net assets

The expected level of leverage may be higher when volatility decreases sustainably, when interest rates are expected to change or when credit spreads are expected to widen or tighten.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the relative VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the relative VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of

certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## Fund Characteristics

|                                                                        |                                                   |

| CX Shares                 | Up to 1%                    | None                                    | 0.60%                    |
| D Shares                  | None                        | 1.00%                                   | 1.00%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.30%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.50%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Inflation Linked Bond

## Investment Objective

The Fund aims to provide capital growth and income in excess of the ICE BofA Global Governments Inflation-Linked EUR Hedged index after fees have been deducted over a three to five year period by investing in inflation-linked fixed income securities.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in inflation-linked fixed income securities with an investment grade or, directly or indirectly (including via credit default swaps and credit default swap indices), with a sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds) issued by governments, government agencies, supra-nationals and companies worldwide.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the ICE BofA Global Governments Inflation-Linked EUR Hedged index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the ICE BofA Global Governments Inflation-Linked EUR Hedged index. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. However, the Fund will likely reflect certain features of the target benchmark namely credit quality and duration, as well as currency exposure. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Mainstream Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Relative Value-at-Risk (VaR)

### VaR Benchmark

ICE BofA Global Governments Inflation-Linked EUR Hedged index. This EUR hedged index tracks the performance of investment grade inflation-linked sovereign debt publicly issued and denominated in the issuer's own domestic market and currency.

### Expected Leverage

300% of the total net assets

The expected level of leverage may be higher when volatility decreases sustainably, when interest rates are expected to change or when credit spreads are expected to widen or tighten.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the relative VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the relative VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## Fund Characteristics

|                                                                        |                                               |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 3%                    | None                                    | 0.75%                    |
| AX Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| A1 Shares                 | Up to 2%                    | 0.50%                                   | 0.75%                    |
| B Shares                  | None                        | 0.50%                                   | 0.75%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| CN Shares                 | Up to 3%                    | None                                    | 0.375%                   |
| CX Shares                 | Up to 1%                    | None                                    | 0.375%                   |
| D Shares                  | None                        | 1.00%                                   | 0.75%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.25%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.50%              |
| Z Shares                  | None                        | None                                    | Up to 0.50%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Innovation

## Investment Objective

The Fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide which benefit from disruptive innovation.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide.

Disruptive innovation typically means innovation (whether due to technology or otherwise) which changes a particular industry by creating new markets, products or service models. Disruptive innovation can be observed in many industries such as e-commerce, media & communications and banking & payments. The Investment Manager believes that companies benefitting from disruptive innovation, either as the disruptor or otherwise, can experience a rapid acceleration in, and durability of, growth. The Investment Manager seeks to invest in companies benefiting from disruptive innovation before this is fully reflected in market expectations.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI AC World (Net TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the MSCI AC World (Net TR) index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to overlap materially with the components of the

comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as a "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

## Profile of the Typical Investor

The Fund may be suitable for investors who are more concerned with maximising long term returns that minimising possible short term losses.

| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Multi-Asset Balanced

## Investment Objective

The Fund aims to provide capital growth and income over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide.

## Investment Policy

The Fund is actively managed and invests directly or indirectly through derivatives in equity and equity-related securities, fixed income securities and Alternative Asset Classes (subject to any restrictions in Appendix I).

Fixed income securities include fixed or floating rate securities such as government bonds, corporate bonds, emerging market debt, directly or indirectly (including via credit default swaps and credit default swap indices) in sub-investment grade (fixed and floating rate) securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies), convertible bonds and inflation linked bonds.

The Fund may invest up to 20% of its assets indirectly in commodities. The exposure to Alternative Asset Classes is taken through eligible assets as described in Appendix III of this Prospectus.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk, mitigating losses in falling markets or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, total return swaps and contracts for difference will be used on a continuous basis to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund may (exceptionally) hold up to 100% of its assets in cash and Money Market Investments. This will be limited to a maximum of six months (otherwise the Fund will be liquidated). During this period, the Fund will not fall within the scope of MMFR. The Fund may invest up to 10% of its assets in open-ended Investment Funds.

The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the Morningstar EUR Cautious Allocation – Global Category. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Multi-Asset Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Long and short positions gained through index, bond and equity total return swaps may increase exposure to credit-related risks.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

Risks related to emerging markets investments can be found under "Emerging and Less Developed Markets Securities Risk" in Appendix II of this Prospectus.

## Profile of the Typical Investor

The Fund is a medium risk vehicle that will be suitable for Investors who are seeking long term growth potential through investment in a diversified portfolio offering exposure to a range of asset classes.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 4%                    | None                                    | 1.25%                    |
| AX Shares                 | Up to 4%                    | None                                    | 1.25%                    |
| A1 Shares                 | Up to 3%                    | 0.50%                                   | 1.25%                    |
| B Shares                  | None                        | 0.60%                                   | 1.25%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.60%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.60%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.60%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.30%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.60%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Multi-Asset Income

## Investment Objective

The Fund aims to deliver income and capital growth by investing in a diversified range of assets and markets worldwide.

## Investment Policy

The Fund is actively managed and invests directly, or indirectly through derivatives, in equity and equity-related securities, fixed income securities and Alternative Asset Classes (subject to any restrictions provided in Appendix I).

The Fund may invest:

- up to 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in below investment grade (fixed and floating rate) securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities.
- in excess of 50% of its assets in emerging market debt (fixed and floating rate) securities.
- up to 20% of its assets in asset-backed securities and mortgage-backed securities.

The Fund may also invest up to 15% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The exposure to Alternative Asset Classes is taken through eligible assets as described in Appendix III of this Prospectus.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices.

The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher. The Fund may invest up to 10% of its assets in open-ended Investment Funds. The Fund may invest in Money Market Investments and hold cash.

The Fund maintains a higher overall sustainability score than 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD) based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund does not have a target benchmark. The Fund's performance and volatility should be compared against 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD). The comparator benchmark is included for performance and volatility comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to have limited overlap with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for volatility purposes given the Fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Multi-Asset Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

A detailed description of the risks linked to asset-backed securities and mortgage-backed securities can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

Risks related to emerging markets investments can be found under "Emerging and Less Developed Markets Securities Risk" in Appendix II of this Prospectus.

## Profile of the Typical Investor

The Fund will be suitable for Investors who desire a sustainable level of income with some capital growth, offered through investment in a range of asset classes.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Recovery

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies worldwide that have suffered a severe set back in either share price or profitability.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equities of companies worldwide.

The Fund may invest directly in China H-Shares and may invest up to 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund invests at least 35% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective(s).

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (TR) index and compared against the MSCI World Value (Net TR) index and the Morningstar Global Large-Cap Value Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark and the MSCI World Value (Net TR) index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark or the MSCI World Value (Net TR) index. The Investment Manager will invest in companies or sectors not included in the target benchmark or the MSCI World Value (Net TR) index in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. Any comparator benchmark has been selected because the

Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The portfolio will exhibit a strongly contrarian investment style and look to take maximum advantage of behavioural biases in global investment markets, and will likely exhibit higher investment volatility than global equity market indices. However, a recovery style is believed to exhibit a lower than average investment risk due to the supportive valuations of the stocks in the portfolio.

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                               |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.50%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.50%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.65%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Smaller Companies

## Investment Objective

The Fund aims to provide capital growth in excess of the S&P Developed Small Cap (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of small-sized companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of small-sized companies worldwide. Small-sized companies are companies which, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of global equity markets.

The Fund may also invest directly in China H-Shares and may invest less than \*30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

**\*As of 10 September 2026, this will change to 20%.**

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the S&P Developed Small Cap (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the S&P Developed Small Cap (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Fund Characteristics

|                    |                                        |
|--------------------|----------------------------------------|
| Fund Currency      | USD                                    |
| Investment Manager | Schroder Investment Management Limited |

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

|                                                                        |                                               |

| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Sustainable Food and Water

## Investment Objective

The Fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide which help the transition towards the sustainable provision of food and water and which the Investment Manager deems to be sustainable investments.

## Investment Policy

The Fund is actively managed and invests its assets in (i) sustainable investments, which are investments that the Investment Manager expects to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food security, food production, processing, packaging and distribution, food and water retail and recycling, and (ii) investments that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund invests at least two-thirds of its assets in a concentrated range of equity and equity related securities of companies worldwide. The Fund typically holds 35 – 60 companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the MSCI AC World (Net TR) index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as a "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The Fund has the objective of sustainable investment (within the meaning of Article 9 SFDR). A Fund with this objective may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long-term returns than minimising possible short term losses.

| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Sustainable Growth

## Investment Objective

The Fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide.

The Fund typically holds fewer than 50 companies.

The Fund maintains a higher overall sustainability score than MSCI AC World (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>. The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the MSCI AC World (Net TR) index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected

to overlap materially with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                               |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.30%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.30%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.30%                    |
| B Shares                  | None                        | 0.60%                                   | 1.30%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.65%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | None                        | 1.00%                                   | 1.30%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.65%              |
| Z Shares                  | None                        | None                                    | Up to 0.65%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Sustainable Value

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies worldwide which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two thirds of its assets in equity and equity related securities of companies worldwide.

The Fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the Investment Manager believes are significantly undervalued relative to their long-term earnings potential.

The Fund maintains a higher overall sustainability score than MSCI World (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Fund may invest in companies that the Investment Manager believes will improve their sustainability practices within a reasonable timeframe, typically up to three years.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may invest directly in China H-Shares and may invest up to 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to re restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI World (Net TR) index and compared against the MSCI World Value (Net TR) index. The Fund's investment universe is expected to overlap to a limited extent with the components of the target and comparator benchmarks. The comparator

benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target or comparator benchmarks. The Investment Manager will invest in companies or sectors not included in the target or comparator benchmarks in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not

reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| B Shares              | None                        | 0.60%                                   | 1.50%                    |
| C Shares              | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares             | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares             | Up to 1%                    | None                                    | 0.75%                    |
| D Shares              | None                        | 1.00%                                   | 1.50%                    |
| E Shares              | Up to 1%                    | None                                    | 0.375%                   |
| IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| IZ Shares             | None                        | None                                    | Up to 0.65%              |
| Z Shares              | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Target Return

## Investment Objective

The Fund aims to provide capital growth and income of ICE BofA 3 Month US Treasury Bill Index +5% per annum before fees have been deducted\* over rolling three year periods by investing in a broad range of asset classes worldwide. There is no guarantee that the objective will be attained and your capital is at risk.

\*For the target return after fees for each Share Class please visit the Schroder webpage: <https://www.schroders.com/en-lu/lu/individual/funds-and-strategies/fund-administration/performance-targets-after-fees/>

## Investment Policy

The Fund is actively managed and invests directly or indirectly (through open-ended Investment Funds and derivatives) in equities and equity related securities, fixed and floating rate securities (issued by governments, government agencies, supra-nationals and companies), mortgage-backed and asset-backed securities, convertible bonds, currencies and Alternative Asset Classes (as defined in Appendix III of this Prospectus) such as real estate, infrastructure and commodity related transferable securities (subject to any restrictions provided in Appendix I). The Fund may invest up to 10% of its assets indirectly in commodities.

The Fund may hold up to 40% of its assets in open-ended Investment Funds. However as the Fund grows the Investment Manager expects the Fund to hold less than 10% in open-ended Investment Funds.

The Fund may invest directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The Fund intends to use derivatives (including total return swaps) with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 40% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher. The Fund may also invest in Money Market Investments and hold cash.

The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US

Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD), based on the Investment Manager's rating system.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to achieve a return of ICE BofA 3 Month US Treasury Bill Index + 5% before fees have been deducted. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

Risks related to emerging markets investments can be found under "Emerging and Less Developed Markets Securities Risk" in Appendix II of this Prospectus.

## Further Information

The Fund is categorised as "Multi-Asset Fund". The Fund may invest more than 10% of its assets in Investment Funds.

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Profile of the Typical Investor

The Fund is a medium risk vehicle that will be suitable for Investors who are seeking long term growth potential through investment in a diversified portfolio offering exposure to a range of asset classes.

## Fund Characteristics

|                                                                        |                                                  |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 4%                    | None                                    | 1.25%                    |
| AX Shares                 | Up to 4%                    | None                                    | 1.25%                    |
| A1 Shares                 | Up to 3%                    | 0.50%                                   | 1.25%                    |
| B Shares                  | None                        | 0.60%                                   | 1.25%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.625%                   |
| CN Shares                 | Up to 3%                    | None                                    | 0.625%                   |
| CX Shares                 | Up to 1%                    | None                                    | 0.625%                   |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.3125%                  |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.625%             |
| Z Shares                  | None                        | None                                    | Up to 0.625%             |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Greater China

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI Golden Dragon (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of People's Republic of China, Hong Kong SAR and Taiwan companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies in People's Republic of China, Hong Kong SAR and Taiwan.

The Fund may invest directly in China H-Shares and may invest less than 50% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor (QFI) Scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI Golden Dragon (Net TR) index and compared against the Morningstar Greater China Equity Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                                                                        |                                                    |
|------------------------------------------------------------------------|----------------------------------------------------|
| Fund Currency                                                          | USD                                                |
| Investment Manager                                                     | Schroder Investment Management (Hong Kong) Limited |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day               |
| Dealing Frequency                                                      | Daily on Dealing Day                               |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day      |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The Fund may invest in mainland China through QFI schemes or Regulated Markets. Investors should note that the QFI status may be suspended or revoked and that this may adversely affect the Fund's performance by requiring the Fund to dispose of its securities holdings. Please refer to Appendix II for more information of the risks regarding QFI status and QFI quota.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

|                       |      |
|-----------------------|------|
| Performance Fee       | None |
| Redemption Charge     | None |
| PEA / PIR Eligibility | No   |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.50%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.50%                    |

| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Healthcare Innovation

## Investment Objective

The Fund aims to provide capital growth by investing in equity and equity related securities of healthcare and medical related companies worldwide which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide, which are engaged in healthcare provision, medical services and related products.

The Fund invests at least 80% of its assets in sustainable investments, which are investments in companies that contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Fund may invest in companies that the Investment Manager believes will improve their sustainability practices within a reasonable timeframe, typically up to two years.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against its comparator benchmarks, being the MSCI AC World (Net TR) index and the MSCI AC World Health Care Daily (Net TR) Index. The

comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to overlap to a limited extent with the components of the MSCI AC World (Net TR) index and materially with the components of the MSCI AC World Health Care Daily (Net TR) Index. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmarks. The Investment Manager will invest in companies or sectors not included in the comparator benchmarks. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The comparator benchmarks have been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Hong Kong Dollar Bond

## Investment Objective

The Fund aims to provide total returns over a three to five year period by investing in fixed and floating rate securities denominated in HKD.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in HKD issued by governments, government agencies, supra-nationals and companies worldwide and derivatives related to the above instruments.

The Fund may invest in securities with an investment grade or sub-investment grade credit rating and aims to achieve an average credit quality equivalent to investment grade (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The Fund may invest in up to 30% of its assets in mainland China through the Qualified Foreign Investor ("QFI") scheme or Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be assessed against its objective of providing income and growth over a three to five year period by investing in fixed and floating rate securities denominated in HKD.

## Further Information

The Fund is categorised as "Mainstream Bond Fund".

## Risk Considerations

### Specific Risk Considerations

The Fund may invest in mainland China through QFI schemes or Regulated Markets (including the CIBM via Bond Connect or CIBM Direct). Investors should note that the QFI status may be suspended or revoked and that this may adversely affect the Fund's performance by requiring the Fund to dispose of its securities holdings. Please refer to Appendix II for more information of the risks regarding QFI status, QFI quota, the CIBM and Bond Connect.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## Fund Characteristics

|                                                                        |                                                |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 3%                    | None                                    | 0.75%                    |
| AX Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| A1 Shares                 | Up to 2%                    | 0.50%                                   | 0.75%                    |
| B Shares                  | None                        | 0.50%                                   | 0.75%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.50%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.50%                    |
| D Shares                  | None                        | 1.00%                                   | 0.75%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.25%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.50%              |
| Z Shares                  | None                        | None                                    | Up to 0.50%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Hong Kong Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the FTSE MPF Hong Kong Index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies listed on the Hong Kong Stock Exchange.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies listed on the Hong Kong Stock Exchange.

The Fund may invest directly in China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;

the Qualified Foreign Investor ("QFI") Scheme; and  
shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the FTSE MPF Hong Kong Index and compared against the Morningstar Hong Kong Equity Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                                                                        |                                                    |
|------------------------------------------------------------------------|----------------------------------------------------|
| Fund Currency                                                          | HKD                                                |
| Investment Manager                                                     | Schroder Investment Management (Hong Kong) Limited |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day               |
| Dealing Frequency                                                      | Daily on Dealing Day                               |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day      |
| Performance Fee                                                        | None                                               |
| Redemption Charge                                                      | None                                               |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The Fund may invest in mainland China through QFI schemes or Regulated Markets. Investors should note that the QFI status may be suspended or revoked and that this may adversely affect the Fund's performance by requiring the Fund to dispose of its securities holdings. Please refer to Appendix II for more information of the risks regarding QFI status and QFI quota.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Indian Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI India (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Indian companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Indian companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI India (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI India (Net TR) index and compared against the Morningstar India Equity Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in

relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Indian Opportunities

## Investment Objective

The Fund aims to provide capital growth in excess of MSCI India (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Indian companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Indian companies or companies which have their principal business activities in India.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI India (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI India (Net TR) index and compared against the Morningstar India Equity Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in

relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Inflation Plus

## Investment Objective

The Fund aims to provide capital growth above inflation (as measured by the Eurozone Harmonized Consumer Price Index) after fees have been deducted over rolling three to five year periods by investing in a broad range of asset classes worldwide. There is no guarantee that the objective will be attained and your capital is at risk.

## Investment Policy

The Fund is actively managed and may invest worldwide in commodities, equity and equity related securities of companies, fixed and floating rate securities and other Alternative Asset Classes in any currency, either directly or indirectly through open-ended Investment Funds and Exchange Traded Funds (subject to any restrictions provided in Appendix I).

The Fund may invest up to 50% of its assets indirectly in commodities. The exposure to commodities and other Alternative Asset Classes will be taken through eligible assets as described under the definition of "Alternative Asset Classes" in Appendix III of this Prospectus.

The Fund may invest in excess of 50% of its assets, directly or indirectly (including via credit default swaps and credit default swap indices) in fixed and floating rate securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The Fund may exceptionally invest up to 100% of its assets in cash and Money Market Investments. This will be limited to a maximum of six months (otherwise the Fund will be liquidated). During this period, the Fund will not fall within the scope of MMFR.

The Fund may use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective

and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a continuous basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 75% and is expected to remain within the range of 0% to 25% of the Net Asset Value. In certain circumstances this proportion may be higher.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the Eurozone Harmonized Consumer Price Index. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of a benchmark.

The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

## Further Information

The Fund is categorised as "Multi-Asset Fund". The Fund may invest in another fund that charges a performance fee.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund will be suitable for investors who seek real value (a positive rate of return after inflation) offered through investment in a range of asset classes.

## Fund Characteristics

|                                                                        |                                               |

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Italian Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the FTSE Italia All-Share (TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Italian companies.

## Investment Policy

The Fund is actively managed and invests at least 70% of its assets in a concentrated range (typically fewer than 50 companies) of equity and equity related securities of Italian companies. The Fund invests at least 25% of these assets (which corresponds to 17.5% of the Fund's assets) in equity and equity related securities of Italian companies that are not included in FTSE MIB index or other equivalent indices and at least 5% of these assets (which corresponds to 3.5% of the Fund's assets) in equity and equity related securities of Italian companies that are not included in the FTSE MIB and FTSE MID CAP indexes or other equivalent indices.

The Fund may invest up to 10% of its assets in securities issued by, or entered into with, the same company or companies belonging to the same group.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the FTSE Italia All-Share (TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the FTSE Italia All-Share (TR) index and compared against the Morningstar Italy Equity Category. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the target benchmark. The Investment Manager will

invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Mainstream Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing 70% of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and/or redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The Fund is an eligible investment suitable to be held within an Italian "Piano Individuale di Risparmio a lungo termine" (PIR) under the law 232/2016 and the law 157/2019 and subsequent amendments.

<sup>3</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>4</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Japan DGF<sup>1</sup>

## Investment Objective

The Fund aims to provide capital growth of 3-month TIBOR (Tokyo interbank interest rates) +4% per annum before fees have been deducted\* by investing in a diversified range of assets and markets worldwide. The Fund aims to provide a volatility (a measure of how much the returns of a fund varies over a year) of 5-7% per annum.

\*For the target return after fees for each Share Class please visit the Schroder webpage: <https://www.schroders.com/en-lu/lu/individual/funds-and-strategies/fund-administration/performance-targets-after-fees/>

## Investment Policy

The Fund is actively managed and invests directly in equity and equity related securities, fixed and floating rate securities, Money Market Investments and/or currencies, or indirectly through open-ended Investment Funds and Exchange Traded Funds worldwide (subject to any restrictions provided in Appendix I). Fixed and floating rate securities may also include directly or indirectly (including via credit default swaps and credit default swap indices) sub-investment grade securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The Fund has a maximum exposure of 30% to equities and at least 70% of its assets denominated in or hedged back into Japanese yen at all times. The Fund may invest indirectly in real estate and up to 20% of its assets indirectly in commodities through transferable securities (including REITs), derivatives (including total return swaps), open-ended Investment Funds, Exchange Traded Funds and Investment Trusts which invest in such asset classes.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and

rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 40% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher. The Fund may invest in Money Market Investments and hold cash.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to achieve 3-month TIBOR (Tokyo interbank interest rates) +4% per annum, and its volatility objective of 5-7% per annum. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of a benchmark.

The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

## Further Information

The Fund is categorised as "Multi-Asset Fund". The Fund may invest more than 10% of its assets in Investment Funds. The Fund may invest in another fund that charges a performance fee.

## Risk Considerations

### Specific Risk Considerations

Long and short positions gained through index, bond and equity total return swaps may increase exposure to credit-related risks.

## Profile of the Typical Investor

The Fund will be suitable for Investors who are more concerned with maximising long-term returns than minimising possible short-term losses.

# Schroder International Selection Fund Japanese Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the Tokyo Stock Price Index Net TR after fees have been deducted over a three to five year period by investing in equity and equity related securities of Japanese companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Japanese companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Tokyo Stock Price Index Net TR, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Tokyo Stock Price Index Net TR. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

| Fund Currency                                                          | JPY                                            |
| Investment Manager                                                     | Schroder Investment Management (Japan) Limited |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day           |
| Dealing Frequency                                                      | Daily on Dealing Day                           |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day  |
| Performance Fee                                                        | None                                           |
| Redemption Charge                                                      | None                                           |
| PEA / PIR Eligibility                                                  | No                                             |

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Mainstream Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.25%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.25%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.25%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Japanese Opportunities

## Investment Objective

The Fund aims to provide capital growth in excess of the Tokyo Stock Price Index Net TR after fees have been deducted over a three to five year period by investing in equity and equity related securities of Japanese companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Japanese companies.

The Fund seeks to identify and invest in undervalued stocks by estimating their fair value based on predicted returns over the medium to long term.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Tokyo Stock Price Index Net TR, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Tokyo Stock Price Index Net TR. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                                                                        |                                                |
|------------------------------------------------------------------------|------------------------------------------------|
| Fund Currency                                                          | JPY                                            |
| Investment Manager                                                     | Schroder Investment Management (Japan) Limited |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day           |
| Dealing Frequency                                                      | Daily on Dealing Day                           |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day  |
| Performance Fee                                                        | None                                           |
| Redemption Charge                                                      | None                                           |
| PEA / PIR Eligibility                                                  | No                                             |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.50%                    |

| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 1.00%                    |
| CN Shares                 | Up to 3%                    | None                                    | 1.00%                    |
| CX Shares                 | Up to 1%                    | None                                    | 1.00%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Japanese Smaller Companies

## Investment Objective

The Fund aims to provide capital growth in excess of the Russell Nomura Small Cap (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of small-sized Japanese companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of small-sized Japanese companies. These are companies which, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of the Japanese equities market.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Russell Nomura Small Cap (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 1.00%                    |
| CN Shares                 | Up to 3%                    | None                                    | 1.00%                    |
| CX Shares                 | Up to 1%                    | None                                    | 1.00%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Latin American

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI Emerging Markets Latin America 10/40 (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Latin American companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Latin American companies.

The Fund typically holds 40-70 companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI Emerging Markets Latin America 10/40 (Net TR) index. The Fund's investment universe is expected to overlap materially, directly or indirectly, with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may

deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

Risks related to emerging markets investments can be found under "Emerging and Less Developed Markets Securities Risk" in Appendix II of this Prospectus.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|

## General Share Class Features

| Share Classes | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares      | Up to 5%                    | None                                    | 1.50%                    |
| AX Shares     | Up to 5%                    | None                                    | 1.50%                    |
| A1 Shares     | Up to 4%                    | 0.50%                                   | 1.50%                    |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 1.00%                    |
| CN Shares                 | Up to 3%                    | None                                    | 1.00%                    |
| CX Shares                 | Up to 1%                    | None                                    | 1.00%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Multi-Asset Growth and Income

## Investment Objective

The Fund aims to provide capital growth and income over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide.

## Investment Policy

The Fund is actively managed and invests directly, or indirectly through derivatives, in equity and equity-related securities, fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide in various currencies and Alternative Asset Classes (subject to any restrictions provided in Appendix I).

The Fund may invest:

- up to 50% directly or indirectly (including via credit default swaps and credit default swap indices) in sub-investment grade securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).
- up to 20% of its assets in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The Fund may invest directly in China H-Shares and may invest less than 15% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext. The Fund may also invest up to 10% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The exposure to Alternative Asset Classes is taken through eligible assets as described in Appendix III of this Prospectus.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross

exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund may invest in Money Market Investments and hold cash. The Fund may invest up to 10% of its assets in open-ended Investment Funds.

The Fund maintains a higher overall sustainability score than 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% FTSE Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD), based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund does not have a target benchmark. The Fund's performance and volatility should be compared against 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% FTSE Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD). The comparator benchmark is only included for performance and risk comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to have limited overlap with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Multi-Asset Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with

an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

Long and short positions gained through index, bond and equity total return swaps may increase exposure to credit-related risks.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not

reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

A detailed description of the risks linked to asset-backed securities and mortgage-backed securities can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

## Profile of the Typical Investor

The Fund is a medium risk vehicle that will be suitable for Investors who are seeking long term growth potential and income through investment in a diversified portfolio offering exposure to a range of asset classes.

| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Nordic Micro Cap

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI Nordic Micro Cap (Net TR) index after fees have been deducted over a five to seven year period by investing in equity or equity related securities of micro-sized Nordic companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of micro-sized Nordic companies. These are companies which, at the time of purchase, are considered to be in the bottom 10% by market capitalisation of the Nordic equities market. The Fund may invest up to 10% of its assets in eligible unlisted transferable securities.

Portfolio construction is based on fundamental research, with a bias towards investing in companies that the investment manager considers are well-managed, entrepreneurial businesses that can grow in the long term.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI Nordic Micro Cap (Net TR) index and compared against the Morningstar Nordic Small/Mid-Cap Equity Category. The Fund's investment universe is not expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in

companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.75%                    |
| B Shares                  | None                        | 0.60%                                   | 1.75%                    |
| C Shares                  | Up to 1%                    | None                                    | 1.00%                    |
| CN Shares                 | Up to 3%                    | None                                    | 1.00%                    |
| CX Shares                 | Up to 1%                    | None                                    | 1.00%                    |
| D Shares                  | None                        | 1.00%                                   | 1.00%                    |
| E Shares                  | None                        | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1.00%              |
| Z Shares                  | None                        | None                                    | Up to 1.00%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Nordic Smaller Companies

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI Nordic Smaller Companies (Net TR) index after fees have been deducted over a three to five year period by investing in equity or equity related securities of small-sized Nordic companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of small-sized Nordic companies. These are companies which, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of the Nordic equities market.

Portfolio construction is based on fundamental research, with a bias towards investing in companies that the Investment Manager considers are well-managed, entrepreneurial businesses that can grow in the long term.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI Nordic Smaller Companies (Net TR) index and compared against the Morningstar Nordic Small/Mid-Cap Equity Category. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                      |                                                               |
|----------------------|---------------------------------------------------------------|
| Fund Currency        | EUR                                                           |
| Investment Manager   | Schroder Investment Management (Europe) S.A. – Finnish Branch |
| Dealing Cut-off Time | 13.00 Luxembourg time on Dealing Day                          |
| Dealing Frequency    | Daily on Dealing Day                                          |

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. <sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund QEP Global Active Value

## Investment Objective

The Fund aims to provide capital growth and income in excess of the MSCI AC World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity-related securities of companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equity and equity-related securities of companies worldwide.

The Fund focuses on companies that have certain “Value” characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the Investment Manager believes have been undervalued by the market.

The Fund may invest directly in China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund’s performance should be assessed against its target benchmark, being to exceed the MSCI AC World (Net TR) index and compared against the MSCI AC World Value (Net TR) index and the MSCI World (Net TR) index. The Fund’s investment universe is expected to overlap materially with the components of the target and comparator benchmarks. The comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment Manager invests the Fund’s assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund’s portfolio and performance may deviate from the target or comparator benchmarks. The Investment Manager will invest in companies or sectors not included in the target or comparator benchmarks in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|
| Fund Currency                                                          | USD                                           |
| Investment Manager                                                     | Schroder Investment Management Limited        |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day          |
| Dealing Frequency                                                      | Daily on Dealing Day                          |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. Any comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund’s investment objective and policy.

## Further Information

The Fund is categorised as “Quantitative Equity Fund”. QEP stands for Quantitative Equity Products.

The Investment Manager of the Fund undertakes the hedging of the Shares of the hedged Share Classes by considering the relevant proportionate underlying currency exposures of the Fund. Performance of these hedged Share Classes may therefore vary significantly from equivalent Share Classes in the Fund Currency.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund’s investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

|                       |      |

| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | N/A                         | N/A                                     | N/A                      |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.65%              |
| Z Shares                  | None                        | None                                    | Up to 0.65%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund QEP Global Core

## Investment Objective

The Fund aims to provide capital growth and income in excess of the MSCI World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity-related securities of companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equity and equity-related securities of companies worldwide.

The Fund's weight in a single country, region or sector will typically be within 3% of the target index whilst the weight of each security will typically be within 0.75% of the benchmark.

The Fund focuses on companies that have certain "Value" and/or "Quality" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the Investment Manager believes have been undervalued by the market. Quality is assessed by looking at indicators such as a company's profitability, stability, financial strength, governance and structural growth.

The Fund may invest directly in China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than MSCI World (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its constraining benchmark, being the MSCI World (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the constraining benchmark. The Investment Manager will use discretion to vary the weightings in the benchmark's securities.

The constraining benchmark has been selected because the Investment Manager is constrained by reference to the value, price or components of that benchmark as stated in the investment objective and policy. The benchmark(s)

does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

Where a Fund states that it will typically be within a certain percentage of specific weightings (e.g. sector or security) of a particular benchmark, the Investment Manager does not actively take the Fund outside of such a percentage and if the Fund moves passively outside of a percentage the Investment Manager looks to bring the Fund back in line with the percentage at the next appropriate occasion, provided the Investment Manager believes this to be in the best interests of investors.

## Further Information

The Fund is categorised as "Quantitative Equity Fund". QEP stands for Quantitative Equity Products.

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

## General Share Class Features

| Share Classes             | Initial Charge <sup>3</sup> | Annual Distribution Charge <sup>4</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 0.55%                    |
| AX Shares                 | Up to 5%                    | None                                    | 0.55%                    |
| A1 Shares                 | Up to 5%                    | 0.50%                                   | 0.55%                    |
| B Shares                  | N/A                         | N/A                                     | N/A                      |
| C Shares                  | Up to 1%                    | None                                    | 0.275%                   |
| CN Shares                 | Up to 3%                    | None                                    | 0.275%                   |
| CX Shares                 | Up to 1%                    | None                                    | 0.275%                   |
| D Shares                  | N/A                         | N/A                                     | N/A                      |
| E Shares                  | N/A                         | N/A                                     | N/A                      |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.275%             |
| P Shares                  | None                        | None                                    | 0.10%                    |
| Z Shares                  | None                        | None                                    | Up to 0.275%             |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> In relation to currency hedged Share Classes, currency hedged versions of the above mentioned benchmarks (including currency equivalent cash benchmarks) are used for performance fee calculation purposes.

<sup>3</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>4</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund QEP Global ESG<sup>1</sup>

## Investment Objective

The Fund aims to provide capital growth and income in excess of the MSCI AC World ex. Fossil Fuels (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity-related securities of companies worldwide which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equity and equity-related securities of companies worldwide.

The Fund focuses on companies that have certain "Value" and/or "Quality" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the Investment Manager believes have been undervalued by the market. Quality is assessed by looking at indicators such as a company's profitability, stability, financial strength and governance.

The Fund may invest directly in China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund maintains a higher overall sustainability score than MSCI AC World ex. Fossil Fuels (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI AC World ex. Fossil Fuels (Net TR) index and compared against the MSCI World (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the target and comparator benchmarks. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target or comparator benchmarks. The Investment Manager will invest in companies or sectors not included in the target or comparator benchmarks in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Quantitative Equity Fund". QEP stands for Quantitative Equity Products.

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

<sup>1</sup> ESG means Environmental, Social and Governance

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not

reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

| Share Classes             | Initial Charge <sup>3</sup> | Annual Distribution Charge <sup>4</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.25%                    |
| AX Shares                 | N/A                         | N/A                                     | N/A                      |
| A1 Shares                 | N/A                         | N/A                                     | N/A                      |
| B Shares                  | N/A                         | N/A                                     | N/A                      |
| C Shares                  | Up to 1%                    | None                                    | 0.65%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | N/A                         | N/A                                     | N/A                      |
| E Shares                  | N/A                         | N/A                                     | N/A                      |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.65%              |
| Z Shares                  | None                        | None                                    | Up to 0.65%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>3</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>4</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund QEP Global Quality

## Investment Objective

The Fund aims to provide capital growth and income in excess of the MSCI AC World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity-related securities of companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equity and equity-related securities of companies worldwide.

The Fund focuses on companies that have certain "Quality" characteristics. Quality is assessed by looking at indicators such as a company's profitability, stability, financial strength, governance and structural growth.

The Fund may invest directly in China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than MSCI AC World (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI AC World (Net TR) index and compared against the MSCI World (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the target and comparator benchmarks. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target or comparator benchmarks. The Investment Manager will invest in companies or sectors not included in the target or comparator benchmarks in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Fund Characteristics

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Quantitative Equity Fund". QEP stands for Quantitative Equity Products.

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

| B Shares                  | None                        | 0.60%                                   | 1.25%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.65%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | N/A                         | N/A                                     | N/A                      |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.65%              |
| Z Shares                  | None                        | None                                    | Up to 0.65%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Robotics and Automation

## Investment Objective

The Fund aims to provide capital growth by investing in equity and equity related securities of companies worldwide which the Investment Manager believes will benefit from the latest industrial innovation techniques.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide.

Robotics and automation are key elements of the latest industrial innovation techniques to address the market needs and supply chain challenges of manufacturing and related sectors such as distribution, logistics and transportation. The Investment Manager seeks to invest in companies that it believes will enjoy superior growth through their exposure to these innovations.

The Fund may invest directly in China H-Shares and may invest less than 10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI AC World (Net TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the MSCI AC World (Net TR) index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

## Fund Characteristics

|                      |                                        |
|----------------------|----------------------------------------|
| Fund Currency        | USD                                    |
| Investment Manager   | Schroder Investment Management Limited |
| Dealing Cut-off Time | 13.00 Luxembourg time on Dealing Day   |

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as a "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long-term returns than minimising possible short term losses.

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|

| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Securitised Credit

## Investment Objective

The Fund aims to provide income and capital growth in excess of ICE BofA AA-BBB ABS Index, before fees have been deducted\* over a three to five year period by investing in securitised assets issued by entities worldwide.

\*For the target return after fees for each Share Class please visit the Schroder webpage: <https://www.schroders.com/en-lu/lu/individual/funds-and-strategies/fund-administration/performance-targets-after-fees/>

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securitised investments including but not limited to asset-backed securities (ABS), residential mortgage-backed securities (MBS) and commercial mortgage-backed securities (CMBS). The Fund may also invest up to 49% of its assets in collateralised loan obligations (CLOs).

The Fund may invest up to 100% of its assets in ABS, MBS and CMBS issued worldwide with an investment grade and sub-investment grade credit rating (as measured Standard & Poor's or any equivalent grade of other credit rating agencies for rated securities and implied Schroders ratings for non-rated securities). Underlying assets of the asset-backed securities may include credit card receivables, personal loans, auto loans, transportation finance and small business loans.

The Fund may invest up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities with a sub-investment grade credit rating (as measured Standard & Poor's or any equivalent grade of other credit rating agencies for rated securities and implied Schroders ratings for non-rated securities).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Investment Manager assesses the sustainability credentials of potential investments using a proprietary tool. The Fund only invests in assets deemed above a minimum threshold based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark of ICE BofA AA-BBB ABS Index and compared against the Bloomberg Barclays 1-5yr Global Credit index (Hedged to USD) and ICE BofA 3 Month US Treasury Bill Index +2%. The comparator benchmarks are

only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. Whilst the Fund's investments are generally expected to deviate significantly from the components of the target benchmark and the Bloomberg Barclays 1-5yr Global Credit index (Hedged to USD), dependent on the Investment Manager's views, the Fund's investments may overlap with them. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark and the Bloomberg Barclays 1-5yr Global Credit index (Hedged to USD). The Investment Manager will invest in companies or sectors not included in the target benchmark and the Bloomberg Barclays 1-5yr Global Credit index (Hedged to USD).

The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective. The comparator benchmarks have been selected because the Investment Manager believes that the benchmarks are a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Relative Value-at-Risk (VaR)

### VaR Benchmark

ICE BofA AA-BBB ABS Index. This index tracks the performance of US dollar denominated investment grade (AA-BBB) fixed rate asset backed securities publicly issued in the US domestic market.

### Expected Leverage

200% of the total net assets. The expected level of leverage may be higher when volatility decreases sustainably, when interest rates are expected to change or when credit spreads are expected to widen or tighten.

This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the relative VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the relative VaR approach please see Appendix I. In addition to this regulatory restriction,

Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund

may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

### Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 3%                    | None                                    | 0.70%                    |
| AX Shares                 | Up to 3%                    | None                                    | 0.70%                    |
| A1 Shares                 | Up to 2%                    | 0.50%                                   | 0.70%                    |
| B Shares                  | N/A                         | N/A                                     | N/A                      |
| C Shares                  | Up to 1%                    | None                                    | 0.35%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.35%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.35%                    |
| D Shares                  | N/A                         | N/A                                     | N/A                      |
| E Shares                  | Up to 1%                    | None                                    | 0.20%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.35%              |
| Z Shares                  | None                        | None                                    | Up to 0.35%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Strategic Bond

## Investment Objective

The Fund aims to provide capital growth and income in excess of the ICE BofA 3 month US Treasury Bill Index over a three to five year period after fees have been deducted by investing in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities in various currencies issued by governments, government agencies, supra-nationals and companies worldwide.

The Fund may invest:

- up to 10% of its assets in contingent convertible bonds;
- up to 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities with a non-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies); and
- up to 100% of its assets in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The Fund may invest up to 15% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the ICE BofA 3 Month US Treasury Bill Index and compared against the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the target benchmark.

The Fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the target or comparator benchmarks in order to take advantage of specific investment opportunities.

The target benchmark has been selected because the target return of the Fund is to deliver the return of that benchmark as stated in the investment objective. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Absolute Value-at-Risk (VaR)

### Expected Leverage

900% of the total net assets

In order to implement an efficiently diversified set of strategies (such as country, yield curve, credit and currency strategies) and to achieve a risk target that is consistent with the Fund's risk profile, the Fund will use derivatives that may generate a higher level of leverage.

Although the Fund uses derivatives for investment purposes, which can increase the Fund's level of risk, it also uses derivatives within a portfolio construction process that is focused on diversifying strategies and managing risk correlation, which can contribute to reducing the Fund's level of risk. In general the Fund uses derivatives for investment purposes and managing risk correlation, in equal measure.

Some of the strategies will rely on instruments that require a substantial level of gross leverage to generate a limited amount of risk, such as short-dated interest rate contracts. Also, derivatives used within the long and short strategies may generate a high level of gross leverage but a reduced level of net leverage.

The expected level of leverage may be higher when volatility decreases sustainably, when interest rates are expected to change or when credit spreads are expected to widen or tighten.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the absolute VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the absolute VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

### Specific Risk Considerations

The Fund uses significant leverage through financial derivative instruments, which will magnify both gains and losses on its investments and result in greater fluctuations of its Net Asset Value. This significantly increases the risk of the Fund compared to an unleveraged fund. Leverage occurs when the overall economic exposure of the Fund exceeds its amount of assets invested.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

### Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

| A Shares      | Up to 3%                    | None                                    | 1.00%                    |
| AX Shares     | Up to 3%                    | None                                    | 1.00%                    |
| A1 Shares     | Up to 2%                    | 0.50%                                   | 1.00%                    |
| B Shares      | None                        | 0.50%                                   | 1.00%                    |
| C Shares      | Up to 1%                    | None                                    | 0.60%                    |
| CN Shares     | Up to 3%                    | None                                    | 0.60%                    |
| CX Shares     | Up to 1%                    | None                                    | 0.60%                    |
| D Shares      | None                        | 1.00%                                   | 1.00%                    |
| E Shares      | Up to 1%                    | None                                    | 0.30%                    |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.60%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Strategic Credit

## Investment Objective

The Fund aims to provide capital growth and income in excess of ICE BofA Sterling 3-Month Government Bill Index after fees have been deducted over a three to five year period by investing in fixed and floating rate securities issued by companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide.

The Fund may invest up to 100% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities with a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The Fund may also seek up to 25% exposure to convertible bonds and bonds with warrants. The exposure to convertible bonds includes up to 15% in contingent convertible bonds.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives. The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a positive absolute sustainability score, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed ICE BofA Sterling 3-Month Government Bill Index. The Investment Manager invests on a discretionary basis and is not limited to investing in accordance with the composition of a benchmark.

The target benchmark has been selected because the target return of the Fund is to deliver or exceed the return of that benchmark as stated in the investment objective.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Absolute Value-at-Risk (VaR)

### Expected Leverage

150% of the total net assets

The expected level of leverage may be higher when there is unusually high or low volatility.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the absolute VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the absolute VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

### Specific Risk Considerations

The Fund will make use of credit derivative instruments to seek exposure to global credit markets. This may lead to a higher volatility in the price of the Shares and may imply increased counterparty risk.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|
| Fund Currency                                                          | GBP                                           |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 3%                    | None                                    | 1.00%                    |
| AX Shares                 | Up to 3%                    | None                                    | 1.00%                    |
| A1 Shares                 | Up to 2%                    | 0.50%                                   | 1.00%                    |
| B Shares                  | None                        | 0.50%                                   | 1.00%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.60%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.60%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.60%                    |
| D Shares                  | None                        | 1.00%                                   | 1.00%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.30%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.60%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Sustainable Asian Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI AC Asia Pacific ex Japan (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Asia Pacific markets companies (excluding Japan) which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies in Asia Pacific markets (excluding Japan) or companies which derive a significant proportion of their revenues or profits from the Asia Pacific region.

The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may invest directly in China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor (QFI) Scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI AC Asia Pacific ex Japan (Net TR) index and compared against the Morningstar Asia Pacific ex Japan Category. The Fund's

investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable

investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund QEP Emerging Markets Core

## Investment Objective

The Fund aims to provide capital growth and income in excess of the MSCI Emerging Markets 10/40 (NDR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies in emerging market countries.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in a diversified portfolio of equity and equity-related securities of companies in emerging market countries.

The Fund focuses on companies that have certain "Value" and/or "Quality" characteristics. Value is assessed by looking at indicators such as cash flows, dividends and earnings to identify securities which the Investment Manager believes have been undervalued by the market. Quality is assessed by looking at indicators such as a company's profitability, stability, financial strength, governance and structural growth.

The Fund may invest directly in China H-Shares and may invest less than 20% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (NDR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the MSCI Emerging Markets 10/40 (NDR) index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as a "Quantitative Equity Fund". QEP stands for Quantitative Equity Products.

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are securities trading and clearing linked programmes developed by The Stock Exchange of Hong Kong Limited, Shanghai/Shenzhen Stock Exchanges, Hong Kong Securities Clearing Company Limited and China Securities Depository and Clearing Corporation Limited, with an aim to achieve mutual stock market access between the PRC (excluding Hong Kong, Macau and Taiwan) and Hong Kong. A detailed description of the programmes as well as risks linked thereto can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

Risks related to emerging markets investments can be found under "Emerging and Less Developed Markets Securities Risk" in Appendix II of this Prospectus.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.50%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.50%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.50%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Sustainable EURO Credit

## Investment Objective

The Fund aims to provide capital growth and income in excess of the ICE BofA Euro Corporate index after fees have been deducted over a three to five year period by investing in fixed and floating rate securities denominated in Euro issued by companies worldwide, which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in or hedged to Euro issued by companies and other non-sovereign bond issuers, governments, government agencies and supra-nationals worldwide.

In security analysis, the Fund compares issuers in the context of their sector and country peers.

The Fund maintains a higher overall sustainability score than ICE BofA Euro Corporate index, based on the Investment Manager's rating system.

The Fund invests at least 10% of its assets in green, social and/or sustainable bonds.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may invest:

- up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in sovereign government bonds;
- up to 20% of its assets in asset-backed securities and mortgage-backed securities; and
- up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be compared against its target benchmark being to exceed the ICE BofA Euro Corporate Index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

A detailed description of the risks linked to contingent convertible bonds, below-investment grade securities, asset-backed securities and mortgage-backed securities can be found in Appendix II of this Prospectus.

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Global Credit Income Short Duration

## Investment Objective

The Fund aims to provide capital growth and income by investing in fixed and floating rate securities issued by governments and companies worldwide. The Fund aims to reduce interest rate risk (as defined by duration) by focussing on fixed and floating rate securities with a duration of less than four years.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate investment grade and high yield securities issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries. The Fund's strategy will have an overall duration of less than four years but this does not preclude the Fund from investing in securities with a duration above four years. The Investment Manager believes the short duration strategy should limit the overall level of interest rate risk.

The Fund may invest:

- in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schrodgers ratings for non-rated bonds);
- up to 40% of its assets in asset-backed securities and mortgage-backed securities (including in agency mortgage-backed securities and with a maximum of 20% of the Fund's assets in non-agency mortgage-backed securities and in asset-backed securities);
- up to 15% of its assets in convertible bonds (including contingent convertible bonds); and
- up to 10% of its assets in open-ended Investment Funds.

The Investment Manager also aims to mitigate losses by diversifying the Fund's asset allocation away from areas of the market identified as having a high risk of material negative return or principal risk.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund maintains a higher overall sustainability score than Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. The Fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against 3 month EURIBOR (or alternative reference rate) and Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment Manager invests the Fund's assets. In relation to the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged index, the Fund's investment universe is expected to overlap to a limited extent with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged index. The Investment Manager will invest in companies or sectors not included in the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged index. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

Any comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

Schrodgers is in the process of assessing the potential alternatives to EURIBOR and will notify investors of any decision to move away from EURIBOR in due course.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Absolute Value at Risk (VaR)

### Expected Leverage

300% of the total net assets

The expected level of leverage may be higher when there is unusually high or low volatility.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the absolute VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial

instrument as further described in the MIFID Directive. For further details on the absolute VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

Risks related to emerging markets investments can be found under “Emerging and Less Developed Markets Securities Risk” in Appendix II of this Prospectus.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

### Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking income, combined with capital growth opportunities in the relative stability of the debt markets over the long term.

| CX Shares                 | Up to 1%                    | None                                    | 0.40%                    |
| D Shares                  | None                        | 1.00%                                   | 1.00%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.275%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.40%              |
| Z Shares                  | None                        | None                                    | Up to 0.40%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

# Schroder International Selection Fund Global Equity Income Plus

## Investment Objective

The Fund aims to provide an annual yield in excess of the MSCI All Country World (Net TR) Index and capital growth by investing in equity and equity related securities of companies worldwide.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies worldwide. To enhance the dividend yield of the Fund, the Investment Manager will, sell short dated call options over individual securities held by the Fund. This may at times adversely affect the capital growth of the Fund.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund maintains a higher overall sustainability score than the MSCI All Country World (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to provide an income in excess of MSCI All Country World (Net TR) Index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|
| Fund Currency                                                          | USD                                           |
| Investment Manager                                                     | Schroder Investment Management Limited        |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day          |
| Dealing Frequency                                                      | Daily on Dealing Day                          |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day |
| Performance Fee                                                        | None                                          |
| Redemption Charge                                                      | None                                          |

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

This Fund makes use of derivatives in a way that is fundamental to its investment objective. This may result in periods where the Fund underperforms a similar portfolio with no derivative exposure.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

|                       |    |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.30%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.30%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.30%                    |
| B Shares                  | None                        | 0.60%                                   | 1.30%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.65%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.65%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.65%                    |
| D Shares                  | None                        | 1.00%                                   | 1.30%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.65%              |
| Z Shares                  | None                        | None                                    | Up to 0.65%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Sustainable Global Multi Credit

## Investment Objective

The Fund aims to provide capital growth in excess of the Bloomberg Multiverse (TR) ex Treasury A+ to B- USD Hedged index after fees have been deducted over a three to five year period by investing in fixed and floating rate securities which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in investment grade and sub-investment grade fixed and floating rate securities (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries.

The Fund maintains a higher overall sustainability score than Bloomberg Multiverse (TR) ex Treasury A+ to B- index, USD Hedged, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may invest:

- in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in asset-backed and mortgage-backed securities; and
- up to 15% of its assets in contingent convertible bonds and convertible bonds (of which up to 10% may be invested in convertible bonds).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives. The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Bloomberg Multiverse (TR) ex Treasury A+ to B- index, USD Hedged. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.

The index is a customised benchmark which has been selected as it provides a more accurate investment universe against which to compare performance. This is a focussed credit fund so the index excludes Treasuries, which tend to be included in broad market indices. The benchmark includes corporate bonds rated A+ to B- as we also excluded securities rated AAA, AA and CCC and below. The index is hedged, but on an unhedged basis local currencies are excluded. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Absolute Value-at-Risk (VaR)

### Expected Leverage

500% of the total net assets

The expected level of leverage may be higher when there is unusually high or low volatility.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the absolute VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the absolute VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

## Specific Risk Considerations

The Fund will make use of credit derivative instruments to seek exposure to global credit markets. This may lead to a higher volatility in the price of the Shares and may imply increased counterparty risk.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

Risks related to emerging markets investments can be found under "Emerging and Less Developed Markets Securities Risk" in Appendix II of this Prospectus.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

| B Shares                  | None                        | 0.30%                                   | 1.20%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.60%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.60%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.60%                    |
| D Shares                  | None                        | 1.00%                                   | 1.20%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.30%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.60%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

# Schroder International Selection Fund Sustainable Multi-Factor Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the MSCI AC World (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity-related securities of companies worldwide which meet the Investment Managers sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two thirds of its assets in equity and equity-related securities of companies worldwide that meet the Investment Manager's sustainability criteria and which also focus on a range of equity factors (also commonly known as investment styles). Companies will be simultaneously assessed on these equity factors using a fully integrated systematic, bottom-up investment approach.

Relevant equity factors may include the following:

- Low volatility – involves evaluating indicators such as share price movement and historical performance to determine those securities that the Investment Manager believes will experience smaller price movements than the global equity markets on average.
- Momentum – involves evaluating trends in stocks, sectors or countries within the relevant equity market.
- Quality – involves evaluating indicators such as a company's profitability, stability and financial strength.
- Value – involves evaluating indicators such as cash flows, dividends and earnings to identify securities that the Investment Manager believes have been undervalued by the market.
- Sustainability – involves evaluating challenges and opportunities companies face from social, environmental and governance considerations.

The Fund follows a systematic approach, which scores all companies in a broad universe, including the MSCI AC World (Net TR) index, against the above equity factors to create a broadly diversified portfolio. The systematic process seeks to maximise the Fund's expected exposure to the aggregated score against the equity factors, subject to consideration of active risk and transaction costs, while applying additional controls to manage concentration risk across securities, sectors and industries, and unexpected bias towards or away from the benchmark. The Investment Manager reviews the systematic output on regular basis and adjusts to ensure that the desired risk characteristics have been delivered and that the portfolio is appropriate against the equity factors.

The Fund maintains a higher overall sustainability score than the MSCI AC World (Net TR) index, based on the Investment Manager's rating system. It also maintains a carbon intensity at least 50% lower than the MSCI AC World (Net TR) index, based on the Weighted Average Carbon Intensity (WACI).

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Fund may invest in companies that the Investment Manager believes will improve their sustainability practices.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the MSCI AC World (Net TR) index and compared against the MSCI ACWI ex Fossil Fuels index. The Fund's investment universe is expected to overlap materially with the components of the target and comparator benchmarks. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target and comparator benchmarks. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager will invest in companies or sectors not included in the target or comparator benchmarks in order to take advantage of specific investment opportunities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some

companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

### Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

| B Shares                  | N/A                         | N/A                                     | N/A                      |
| C Shares                  | Up to 1%                    | None                                    | 0.20%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.20%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.20%                    |
| D Shares                  | N/A                         | N/A                                     | N/A                      |
| E Shares                  | Up to 1%                    | None                                    | 0.10%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.20%              |
| Z Shares                  | N/A                         | N/A                                     | N/A                      |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Sustainable US Dollar High Yield

## Investment Objective

The Fund aims to provide capital growth and income in excess of the Bloomberg US High Yield Index after fees have been deducted over a three to five year period by investing in below investment grade fixed and floating rate securities denominated in USD, or other currencies hedged to USD, issued by companies worldwide, which meet the Investment Manager's sustainability criteria.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in fixed and floating rate securities that have a below investment grade credit rating (as measured by Standard and Poor's or any equivalent of other credit rating agencies) issued by governments, government agencies, supra-nationals and companies worldwide denominated in USD, or other currencies hedged to USD, including emerging market countries.

The Fund maintains a higher overall sustainability score than Bloomberg US High Yield Index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to challenge identified areas of weakness on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund may invest:

- up to 20% of its assets in convertible bonds including up to 15% of its assets in contingent convertible bonds;
- up to 20% of its assets in emerging markets countries; and
- up to 10% of its assets in asset-backed securities and mortgage-backed securities.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Bloomberg US High Yield index and compared against the Morningstar USD High Yield Bond Category and the Bloomberg US High Yield ex-Energy Index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark and to a limited extent with the components of the Bloomberg US High Yield ex-Energy Index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark and the Bloomberg US High Yield ex-Energy Index. The Investment Manager will invest in companies or sectors not included in the target benchmark and Bloomberg US High Yield ex-Energy Index in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Manager believes that the benchmarks are a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

A detailed description of the risks linked to contingent convertible bonds, below-investment grade securities, asset-backed securities and mortgage-backed securities can be found in Appendix II of this Prospectus.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable

investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

Risks related to emerging markets investments can be found under “Emerging and Less Developed Markets Securities Risk” in Appendix II of this Prospectus.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## Fund Characteristics

|                                                           |                                                   |
|-----------------------------------------------------------|---------------------------------------------------|
| Fund Currency                                             | USD                                               |

| AX Shares                 | Up to 3%                    | None                                    | 1.20%                    |
| A1 Shares                 | Up to 2%                    | 0.50%                                   | 1.20%                    |
| B Shares                  | None                        | 0.60%                                   | 1.20%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.60%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.60%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.60%                    |
| D Shares                  | None                        | None                                    | 1.20%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.30%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.50%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors’ discretion.

<sup>1</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors’ discretion.

<sup>2</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Swiss Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the Swiss Performance Index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Swiss companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Swiss companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a positive absolute sustainability score, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Swiss Performance Index and compared against the Swiss Leaders Index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in

relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Mainstream Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

## Fund Characteristics

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.25%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.25%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.50%                    |
| B Shares                  | None                        | 0.60%                                   | 1.25%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.75%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.75%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund Swiss Small & Mid Cap Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the Swiss Performance Index Extra after fees have been deducted over a three to five year period by investing in equity and equity related securities of small and mid-sized Swiss companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of small and mid-sized Swiss companies. These are companies which, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of the Swiss equities market.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a positive absolute sustainability score, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Swiss Performance Index Extra and compared against the Morningstar Switzerland Small/Mid Cap Equity Category. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                                                                        |                                                 |
|------------------------------------------------------------------------|-------------------------------------------------|
| Fund Currency                                                          | CHF                                             |
| Investment Manager                                                     | Schroder Investment Management (Switzerland) AG |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day            |
| Dealing Frequency                                                      | Daily on Dealing Day                            |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day   |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

|                       |      |

# Schroder International Selection Fund Taiwanese Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the TAIEX Total Return index after fees have been deducted over a three to five year period by investing in equity and equity related securities of Taiwanese companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in the equity and equity related securities of Taiwanese companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the TAIEX Total Return index and compared against the Morningstar Taiwan Equity Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may

deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund UK Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the FTSE All Share Total Return index after fees have been deducted over a three to five year period by investing in equity and equity related securities of UK companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of UK companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the FTSE All Share Total Return index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the FTSE All Share Total Return Index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|
| Fund Currency                                                          | GBP                                           |
| Investment Manager                                                     | Schroder Investment Management Limited        |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day          |
| Dealing Frequency                                                      | Daily on Dealing Day                          |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day |
| Performance Fee                                                        | None                                          |
| Redemption Charge                                                      | None                                          |
| PEA / PIR Eligibility                                                  | No                                            |

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Mainstream Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 1.10%                    |
| AX Shares                 | Up to 5%                    | None                                    | 1.10%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 1.10%                    |
| B Shares                  | None                        | 0.60%                                   | 1.10%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.60%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.60%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.60%                    |
| D Shares                  | None                        | 1.00%                                   | 1.10%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.30%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.60%              |
| Z Shares                  | None                        | None                                    | Up to 0.60%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund US Equity Enhanced Income

## Investment Objective

The Fund aims to deliver an income of 5% per year by investing in equities or equity related securities of large-sized US companies. This is not guaranteed and could change depending on market conditions.

## Investment Policy

The Fund is actively managed and invests at least two thirds of its assets in equity and equity related securities of large-sized US companies which, at the time of purchase, are in the top 500 companies by market capitalisation of the US equities market. The Fund's equity portfolio is constructed using a risk-based index replication-style strategy, that looks to provide exposure representative of the S&P 500 (Net TR) index. To enhance the yield of the Fund, the Investment Manager selectively sells short-dated call options over individual securities held by the Fund, portfolios of securities or indices, generating extra income by agreeing strike prices above which potential capital growth is sold.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against the income target of 5% per year, and compared against the S&P 500 (Net TR) Index, which is a constraining benchmark, and the Morningstar US Equity Income Category. The Fund's investment universe is expected to overlap materially with the components of the S&P 500 (Net TR) Index.

## Fund Characteristics

|                                                                        |                                               |
|------------------------------------------------------------------------|-----------------------------------------------|
| Fund Currency                                                          | USD                                           |
| Investment Manager                                                     | Schroder Investment Management Limited        |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day          |
| Dealing Frequency                                                      | Daily on Dealing Day                          |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day |
| Performance Fee                                                        | None                                          |
| Redemption Charge                                                      | None                                          |
| PEA / PIR Eligibility                                                  | No                                            |

The Investment Manager will use discretion to vary the weightings in the benchmark's securities. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

The income target has been selected because the Investment Manager deploys strategies that aim to deliver the level of income stated in the investment objective. The constraining benchmark has been selected because the Investment Manager is constrained by reference to the value, price or components of that benchmark. The Morningstar US Equity Income Category has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

## Risk Considerations

### Specific Risk Considerations

This Fund makes use of derivatives in a way that is fundamental to its investment objective. It is expected that the strategy will typically underperform a similar portfolio with no derivatives overlay in periods when the underlying stock prices are rising, and outperform when the underlying stock prices are falling.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 5%                    | None                                    | 0.58%                    |
| AX Shares                 | Up to 5%                    | None                                    | 0.58%                    |
| A1 Shares                 | Up to 4%                    | 0.50%                                   | 0.58%                    |
| B Shares                  | None                        | 0.60%                                   | 0.58%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.29%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.29%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.29%                    |
| D Shares                  | None                        | 1.00%                                   | 0.29%                    |
| E Shares                  | N/A                         | N/A                                     | N/A                      |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.29%              |
| Z Shares                  | None                        | None                                    | Up to 0.29%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund US Dollar Bond

## Investment Objective

The Fund aims to provide income and capital growth in excess of the Bloomberg US Aggregate Bond (TR) index after fees have been deducted over a three to five year period by investing in fixed and floating rate securities denominated in USD.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities, including asset-backed securities and mortgage-backed securities, denominated in USD, issued by governments, government agencies and companies worldwide.

The Fund invests in the full credit spectrum of fixed income investments. The Fund may invest:

- up to 40% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds); and
- up to 70% of its assets in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. The Fund may use leverage.

The Fund maintains a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Bloomberg US Aggregate Bond (TR) index and compared against the Morningstar USD Diversified Bond Category. The Fund's investment universe is expected to overlap to a limited extent with the components of the target benchmark. However, the Fund will likely reflect certain features of the target benchmark (namely currency exposure). The comparator benchmark is only included for performance comparison purposes and does not determine how the

Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Mainstream Bond Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Risk Management Method

Relative Value-at-Risk (VaR)

### VaR Benchmark

Bloomberg US Aggregate Bond Index. This index measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS and CMBS.

### Expected Leverage

200% of the total net assets

The expected level of leverage may be higher when volatility decreases sustainably, when interest rates are expected to change or when credit spreads are expected to widen or tighten.

### This Fund is not a leveraged financial instrument

The Fund utilises financial derivative instruments for investment purposes and the global exposure is monitored under the relative VaR approach in line with UCITS Risk Measurement Rules. Whilst these instruments generate leverage, the Fund itself is not a leveraged financial instrument as further described in the MIFID Directive. For further details on the relative VaR approach please see Appendix 1. In addition to this regulatory restriction, Schroders implements internal controls on global exposure to constrain and/or highlight global exposure as appropriate.

## Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking to combine capital growth opportunities with income in the relative stability of the debt markets over the long term.

## Fund Characteristics

|                                                                        |                                                   |
|------------------------------------------------------------------------|---------------------------------------------------|
| Fund Currency                                                          | USD                                               |

## General Share Class Features

| Share Classes             | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares                  | Up to 3%                    | None                                    | 0.75%                    |
| AX Shares                 | Up to 3%                    | None                                    | 0.75%                    |
| A1 Shares                 | Up to 2%                    | 0.50%                                   | 0.75%                    |
| B Shares                  | None                        | 0.50%                                   | 0.75%                    |
| C Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| CN Shares                 | Up to 3%                    | None                                    | 0.50%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.50%                    |
| D Shares                  | None                        | 1.00%                                   | 0.75%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.25%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.50%              |
| Z Shares                  | None                        | None                                    | Up to 0.50%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund US Large Cap

## Investment Objective

The Fund aims to provide capital growth in excess of the Standard & Poor's 500 (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of large-sized US companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in the equity and equity related securities of large-sized US companies. Large-sized companies are companies which, at the time of purchase, are considered to be in the top 85% by market capitalisation of the US equities market.

The Fund may invest in the equity securities of non-US companies provided they are listed on one of the major North American stock exchanges.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Standard & Poor's 500 (Net TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark, being to exceed the Standard & Poor's 500 (Net TR) index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

## Fund Characteristics

|                                                                        |                                                              |
|------------------------------------------------------------------------|--------------------------------------------------------------|
| Fund Currency                                                          | USD                                                          |
| Investment Manager                                                     | Schroder Investment Management (Europe) S.A. – German Branch |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day                         |
| Dealing Frequency                                                      | Daily on Dealing Day                                         |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 3 Business Days from the relevant Dealing Day                |
| Performance Fee                                                        | None                                                         |

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Mainstream Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are seeking long term growth potential offered through investment in equities.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

|                       |      |

| CX Shares                 | Up to 1%                    | None                                    | 0.55%                    |
| D Shares                  | None                        | 1.00%                                   | 1.25%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.375%                   |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.75%              |
| Z Shares                  | None                        | None                                    | Up to 0.75%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund US Small & Mid-Cap Equity

## Investment Objective

The Fund aims to provide capital growth in excess of the Russell 2500 Lagged (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of small and mid-sized US companies.

## Investment Policy

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of small and mid-sized US companies. These are companies which, at the time of purchase, are considered to be in the bottom 40% by market capitalisation of the US equities market.

The Fund invests in a broad range of small and mid-sized US companies. The investment approach focuses on three types of US companies: companies that the Investment Manager believes demonstrate strong growth trends and improving levels of cash; companies which the Investment Manager believes generate dependable earnings and revenues; and companies that the Investment Manager believes are undergoing positive change that is not being recognised by the market. By doing so, the Investment Manager believes that we can reduce overall risk and improve returns for our investors over the medium to long term.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Russell 2500 Lagged (Net TR) index and compared against the Morningstar US Mid-Cap Equity Category and the S&P Mid Cap 400 Lagged (Net TR) Index. The Fund's investment universe is expected to overlap materially with the components of the target benchmark and the S&P Mid Cap 400 Lagged (Net TR) Index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target

benchmark or the S&P Mid Cap 400 Lagged (Net TR) Index. The Investment Manager will invest in companies or sectors not included in the target benchmark or the S&P Mid Cap 400 Lagged (Net TR) Index in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmarks have been selected because the Investment Manager believes that each benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR). A Fund with these characteristics may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund US Smaller Companies Impact

## Investment Objective

The Fund aims to provide capital growth in excess of the Russell 2000 Lagged (Net TR) index after fees have been deducted over a three to five year period by investing in equity and equity related securities of small-sized US companies whose activities the Investment Manager considers create positive social or environmental impact and which the Investment Manager deems to be sustainable investments.

## Investment Policy

The Fund is actively managed and invests its assets in (i) sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term, and (ii) investments that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager will select companies from a universe of eligible companies that have been determined as meeting the Investment Manager's impact criteria. The impact criteria include an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company's impact via its proprietary impact investment management framework and tools (including an impact scorecard).

The Fund is part of Schroders' Impact Driven strategies. As such, it applies highly selective investment criteria and its investment process is aligned with the Operating Principles for Impact Management which means that an assessment of impact is embedded in the steps of the investment process. All sustainable investments in the Fund are subject to this framework.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to seek to improve sustainability practices and enhance social and environmental impacts generated by underlying investee companies. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>.

The Fund invests at least two-thirds of its assets in a concentrated range of equity and equity related securities of small-sized US companies. These are companies which, at the time of purchase, are considered to be in the bottom 30% by market capitalisation of the US equities market. The Fund typically holds 40 – 60 companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

## Benchmark

The Fund's performance should be assessed against its target benchmark being to exceed the Russell 2000 Lagged (Net TR) index and compared against the Morningstar US Small-Cap Equity Category. The Fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the target benchmark. The Investment Manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities.

The target benchmark has been selected because it is representative of the type of investments in which the Fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the Fund aims to provide. The comparator benchmark has been selected because the Investment Manager believes that it is a suitable comparison for performance purposes given the Fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the Fund.

## Further Information

The Fund is categorised as "Specialist Equity Fund".

More information relating to the environmental and social characteristics or sustainable investment objective (as applicable) of the Fund is provided in Appendix IV in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

## Risk Considerations

### Specific Risk Considerations

The Fund has the objective of sustainable investment (within the meaning of Article 9 SFDR). A Fund with this objective may have limited exposure to some companies, industries or sectors as a result and the Fund may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the Investment Manager. As Investors may differ in their views of what constitutes sustainable investing, the Fund may also invest in companies that do not reflect the beliefs and values of any particular Investor. Please refer to Appendix II for more details on sustainability risks.

The reference in the Investment Policy to a fund investing two-thirds of its assets in a certain way applies in normal market conditions. See paragraph (A) at the start of this Appendix for further information.

The level of distribution costs in certain jurisdictions may impact the ability of the Investment Manager to meet the Fund's investment objective across all Share Classes after fees have been deducted.

## Profile of the Typical Investor

The Fund may be suitable for Investors who are more concerned with maximising long term returns than minimising possible short term losses.

## Fund Characteristics

|                                                                        |                                                   |

| CN Shares                 | Up to 3%                    | None                                    | 0.85%                    |
| CX Shares                 | Up to 1%                    | None                                    | 0.85%                    |
| D Shares                  | None                        | 1.00%                                   | 1.50%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.50%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 1%                 |
| Z Shares                  | None                        | None                                    | Up to 1%                 |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>1</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>2</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

## Specific investment objectives and investment policies of the Money Market Funds

This section contains additional information applicable to the Funds which qualify as Money Market Funds. The general provisions of the Prospectus also apply to the Money Market Funds, unless otherwise provided below.

# Schroder International Selection Fund EURO Liquidity

This Fund qualifies as a Standard Variable Net Asset Value Money Market Fund in accordance with the provisions of the MMFR.

## Investment Objective

The Fund aims to provide income by investing in Money Market Instruments denominated in Euro. The Fund is designed to provide liquidity and aims to preserve the value of the investment in falling markets. The preservation of value or provision of liquidity cannot be guaranteed.

## Investment Policy

The Fund is actively managed and invests in Money Market Instruments (at least rated investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies in addition to receiving a favourable assessment of their credit quality pursuant to the Management Company's internal credit quality assessment procedure) that are denominated in Euro and issued by government, government agencies and companies worldwide provided that (i) at the time of acquisition, the residual maturity of all such securities held in the portfolio does not exceed 12 months, taking into account any financial instruments connected therewith, or (ii) the terms and conditions governing those securities provide that the applicable interest rate is adjusted at least annually on the basis of market conditions and the residual maturity of all such securities does not exceed 2 years.

The Fund may use derivatives with the aim of hedging currency and interest rate risk. The Fund may also hold cash and make deposits with a credit institution.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the FTSE EUR 1m Eurodeposit LC (TR) index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Profile of the Typical Investor

The Fund invests in fixed income securities which are near to maturity. It is designed to be a short term investment for investors who seek to limit losses in falling markets. It is not designed to be a long term investment. For full details of the risks applicable to investing in the Fund, please refer to Appendix II, "Risks of Investment".

## Fund Characteristics

|                                                                        |                                              |
|------------------------------------------------------------------------|----------------------------------------------|
| Fund Currency                                                          | EUR                                          |
| Investment Manager                                                     | Schroder Investment Management Limited       |
| Dealing Cut-off Time                                                   | 13.00 Luxembourg time on Dealing Day         |
| Dealing Frequency                                                      | Daily on Dealing Day                         |
| Settlement Period of Subscription and Redemption Proceeds <sup>1</sup> | 1 Business Day from the relevant Dealing Day |
| Performance Fee                                                        | None                                         |
| Redemption Charge                                                      | None                                         |
| PEA / PIR Eligibility                                                  | No                                           |

## General Share Class Features

| Share Classes | Initial Charge <sup>2</sup> | Annual Distribution Charge <sup>3</sup> | Annual Management Charge |

<sup>3</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Schroder International Selection Fund US Dollar Liquidity

This Fund qualifies as a Standard Variable Net Asset Value Money Market Fund in accordance with the provisions of the MMFR.

## Investment Objective

The Fund aims to provide income by investing in Money Market Instruments denominated in US Dollar. The Fund is designed to provide liquidity and aims to preserve the value of the investment in falling markets. The preservation of value or provision of liquidity cannot be guaranteed.

## Investment Policy

The Fund is actively managed and invests in Money Market Instruments (rated at least investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies in addition to receiving a favourable assessment of their credit quality pursuant to the Management Company's internal credit quality assessment procedure) that are denominated in US Dollar and issued by government, government agencies and companies worldwide provided that (i) at the time of acquisition, the residual maturity of all such securities held in the portfolio does not exceed 12 months, taking into account any financial instruments connected therewith, or (ii) the terms and conditions governing those securities provide that the

applicable interest rate is adjusted at least annually on the basis of market conditions and the residual maturity of all such securities does not exceed 2 years.

The Fund may use derivatives with the aim of hedging currency and interest rate risk. The Fund may also hold cash and make deposits with a credit institution.

## Benchmark

The Fund does not have a target benchmark. The Fund's performance should be compared against the ICE BofA US Treasury Bill (0-3m) index. The comparator benchmark is only included for performance comparison purposes and does not determine how the Investment Manager invests the Fund's assets. The Fund's investment universe is expected to overlap materially with the components of the comparator benchmark. The Investment Manager invests on a discretionary basis and there are no restrictions on the extent to which the Fund's portfolio and performance may deviate from the comparator benchmark. The Investment Manager will invest in companies or sectors not included in the comparator benchmark.

The comparator benchmark has been selected because the Investment Manager believes that the benchmark is a suitable comparison for performance purposes given the Fund's investment objective and policy.

## Fund Characteristics

|                                                                        |                                                   |

## General Share Class Features

| Share Classes | Initial Charge <sup>3</sup> | Annual Distribution Charge <sup>4</sup> | Annual Management Charge |
|---------------|-----------------------------|-----------------------------------------|--------------------------|
| A Shares      | None                        | None                                    | 0.20%                    |
| AX Shares     | None                        | None                                    | 0.20%                    |
| A1 Shares     | None                        | None                                    | 0.20%                    |
| B Shares      | None                        | None                                    | 0.20%                    |
| C Shares      | None                        | None                                    | 0.20%                    |
| CN Shares     | Up to 3%                    | None                                    | 0.20%                    |
| CX Shares     | Up to 1%                    | None                                    | 0.20%                    |

<sup>1</sup> The currency exchange service as described in Section 2 will not be available for this Fund

<sup>2</sup> Different subscription and redemption procedures may apply if applications are made through Distributors.

<sup>3</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>4</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

| Share Classes             | Initial Charge <sup>3</sup> | Annual Distribution Charge <sup>4</sup> | Annual Management Charge |
|---------------------------|-----------------------------|-----------------------------------------|--------------------------|
| D Shares                  | None                        | 1.00%                                   | 0.20%                    |
| E Shares                  | Up to 1%                    | None                                    | 0.10%                    |
| IZ, IA, IB, IC, ID Shares | None                        | None                                    | Up to 0.20%              |
| Z Shares                  | None                        | None                                    | Up to 0.20%              |

Annual Distribution Charge and Annual Management Charge percentages are stated as an annual charge with reference to the Net Asset Value of the Fund or the Net Asset Value per Share, as may be appropriate.

A share class hedging charge of up to 0.03% will be borne by the currency hedged Share Classes.

Not all Share Classes listed are available for subscription at the time of issue of this Prospectus. The Funds may also launch Bespoke Share Classes that are described under Appendix III at the Directors' discretion.

<sup>3</sup> The initial charge is applied against the total amount invested. The Management Company and Distributors are entitled to the initial charge, which can be partly or fully waived at the Directors' discretion.

<sup>4</sup> Annual Distribution Charges in respect of A1 and D Shares are paid at such intervals as may be agreed from time to time between the Management Company and those Distributors that are appointed specifically for the purpose of distributing such Shares. Annual Distribution Charges in respect of B Shares are payable quarterly.

# Additional Information for Money Market Funds

## Additional information to Shareholders

Shareholders' attention is drawn to the fact that:

- Money Market Funds are not a guaranteed investment;
- an investment in a Money Market Fund is different from an investment in deposits as the principal invested in a Money Market Fund is capable of fluctuation;
- the Company does not rely on external support for guaranteeing the liquidity of the Funds which qualify as Money Market Funds or stabilising the Net Asset Value per Share of those Funds; and
- the risk of loss of the principal is borne by the Shareholders.

In addition to the information made available to Shareholders in accordance with the main part of the Prospectus, the following information will be available at the registered office of the Company and on the webpage of the Management Company ([www.schroders.com](http://www.schroders.com)) on a weekly basis:

- the maturity breakdown of the portfolio of the relevant Fund;
- the credit profile of the relevant Fund;
- the Weighted Average Maturity and the Weighted Average Life of the relevant Fund;
- details of the 10 largest holdings in the Fund, including the name, country, maturity and asset type, the counterparty in the case of repurchase and reverse repurchase agreements (if applicable);
- the total value of the relevant Fund; and
- the net yield of the relevant Fund.

In addition, the Net Asset Value per Share of the Share Classes of the Funds shall be made available on the abovementioned webpage on a daily basis.

## Specific provisions relating to the calculation of the Net Asset Value per Share of Funds qualifying as Money Market Funds

The Net Asset Value per Share shall be rounded to the nearest basis point or its equivalent when the Net Asset Value is published in a currency unit.

By derogation to the section 2.4. "Calculation of Net Asset Value" above, the assets of Funds qualifying as Money Market Funds will be valued using the following valuation principles:

- (A) Liquid assets and Money Market Instruments will be valued at Mark-to-Market or Mark-to-Model where the use of Mark-to-Market is not possible or the market data is not of sufficient quality;
- (B) Shares or units of Money Market Funds shall be valued at their last available net asset value as reported by such money market funds;

- (C) The value of any cash on hand or on deposit and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid, and not yet received shall be deemed to be the full amount thereof, unless, however, the same is unlikely to be paid or received in full, in which case the value thereof shall be determined conservatively by using Mark-to-Model;
- (D) Any assets or liabilities in currencies other than the Fund Currency (as defined in this Appendix ) will be converted using the relevant spot rate quoted by a bank or other recognised financial institution

The assets of Funds qualifying as Money Market Funds shall be valued on at least a daily basis.

The Net Asset Value per Share shall be calculated as the difference between the sum of all assets of the Fund and the sum of all liabilities of the Fund valued in accordance with Mark-to-Market or Mark-to-Model, or both, divided by the number of outstanding Shares of the Fund.

Shares of a Fund shall be issued or redeemed at a price that is equal to the relevant Net Asset Value per Share calculated on the Dealing Day (plus any applicable initial charge or less any applicable redemption charge).

## Investment restrictions and portfolio rules

### Specific investment restrictions

The Directors have adopted the following restrictions in relation to the investments of the Funds qualifying as Standard Variable Net Asset Value Money Market Funds. These restrictions and policies may be amended from time to time by the Directors should they deem it to be in the best interest of the Company. In this case, the Prospectus will be updated.

- (A) Each Fund may exclusively invest in the following eligible assets:
  - (1) Money Market Instruments that fulfil all of the following requirements:
    - (i) It falls within the following categories:
      - (a) Money Market Instruments admitted to or dealt in on a Regulated Market, admitted to official listing on a stock exchange; and/or
      - (b) Money Market Instruments other than those dealt in on a Regulated Market, if the issuer or the issuer of such instruments are themselves regulated for the purpose of protecting investors and savings, and provided that such instruments are:
        - (i) issued or guaranteed by a central, regional or local authority or by a central bank of an EU Member State, the European Central Bank, the EU or the European Investment Bank, a non-EU Member State or, in case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more EU Member States belong; or
        - (ii) issued by an undertaking, any securities of which are dealt in on Regulated Markets referred to in (1) (i) (a) above; or

- (iii) issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by EU law, or by an establishment which is subject to and complies with prudential rules considered by the CSSF to be at least as stringent as those laid down by EU law; or
  - (iv) issued by other bodies belonging to the categories approved by the CSSF provided that investments in such instruments are subject to investor protection equivalent to that laid down in (i), (ii) and (iii) above and provided that the issuer is a company whose capital and reserves amount to at least EUR 10,000,000 and which presents and publishes its annual accounts in accordance with Directive 2013/34/EU, is an entity which, within a group of companies which includes one or several listed companies, is dedicated to the financing of the group or is an entity which is dedicated to the financing of securitisation vehicles which benefit from a banking liquidity line.
- (II) it displays one of the following alternative characteristics:
- (a) it has a legal maturity at issuance of 397 days or less;
  - (b) it has a residual maturity of 397 days or less;
  - (c) it has a residual maturity until the legal redemption date of less than or equal to 2 years provided that the time remaining to the next interest rate reset date is 397 days or less. For that purpose, floating-rate Money Market Instruments and fixed-rate Money Market Instruments hedged by a swap arrangement shall be reset to a money market rate or index.
- (III) the issuer of the Money Market Instrument and the quality of the Money Market Instrument have received a favourable assessment pursuant to the internal credit quality assessment procedure established by the Management Company;
- This requirement shall not apply to Money Market Instruments issued or guaranteed by the EU, a central authority or central bank of an EU Member State, the European Central Bank, the European Investment Bank, the European Stability Mechanism or the European Financial Stability Facility.
- (IV) where the Funds invest in a securitisation or ABCP, it is subject to the requirements laid down in (A) (2) below.
- (2) (I) Eligible securitisations and ABCPs provided that the securitisation or ABCP is sufficiently liquid, has received a favourable assessment pursuant to the internal credit quality assessment procedure established by the Management Company, and is any of the following:
- (a) a securitisation referred to in Article 13 of Commission Delegated Regulation (EU) 2015/61<sup>5</sup>;
  - (b) an ABCP issued by an ABCP programme which:
    - (i) is fully supported by a regulated credit institution that covers all liquidity, credit and material dilution risks, as well as ongoing transaction costs and ongoing programme-wide costs related to the ABCP, if necessary to guarantee the investor the full payment of any amount under the ABCP;
    - (ii) is not a re-securitisation and the exposures underlying the securitisation at the level of each ABCP transaction do not include any securitisation position;
    - (iii) does not include a synthetic securitisation as defined in point (11) of Article 242 of Regulation (EU) No 575/2013<sup>6</sup>;
  - (c) a simple, transparent and standardised (STS) securitisation, as determined in accordance with the criteria and conditions laid down in Articles 20, 21 and 22 of Regulation (EU) 2017/2402 of the European Parliament and of the Council, or an STS ABCP as determined in accordance with the criteria and conditions laid down in Articles 24, 25 and 26 of that Regulation.
- (II) The Fund may invest in the securitisations or ABCPs provided any of the following conditions is fulfilled, as applicable:
- (a) The legal maturity at issuance or residual maturity of the securitisations and ABCPs referred to in (I) (a) (b) and (c) above is two years or less and the time remaining until the next interest rate reset date is 397 days or less;
  - (b) The securitisations referred to in points (I) (a) and (c) above are amortising instruments and have a WAL of two years or less.
- (3) Deposits with credit institutions provided that all of the following conditions are fulfilled:
- (I) the deposit is repayable on demand or is able to be withdrawn at any time;
  - (II) the deposit matures in no more than 12 months;

<sup>5</sup> Commission Delegated Regulation (EU) 2015/61 of 10 October 2014 to supplement Regulation (EU) No 575/2013 of the European Parliament and the Council with regard to liquidity coverage requirement for Credit Institutions.

<sup>6</sup> Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012.

- (III) the credit institution has its registered office in a EU Member State or, where the credit institution has its registered office in a third country, it is subject to prudential rules considered equivalent to those laid down in EU Law in accordance with the procedure laid down in Article 107(4) of Regulation (EU) No 575/2013.
- (4) Repurchase agreements provided that all the following conditions are fulfilled:
- (I) It is used on a temporary basis, for no more than seven working days, only for liquidity management purposes and not for investment purposes other than as referred to in point (III) below.
  - (II) The counterparty receiving assets transferred by the relevant Fund as collateral under the repurchase agreement is prohibited from selling, investing, pledging or otherwise transferring those assets without the prior consent of the Company;
  - (III) The cash received by the relevant Fund as part of the repurchase agreement is able to be:
    - (a) placed on deposits in accordance with (3) above; or
    - (b) invested in liquid transferable securities or Money Market Instruments other than those referred to in (A) (1) above provided that those assets comply with one of the following conditions:
      - (i) they are issued or guaranteed by the Union, a central authority or central bank of a Member State of the EU, the European Central Bank, the European Investment Bank, the European Stability Mechanism or the European Financial Stability Facility provided that a favourable assessment has been received pursuant to the internal credit rating assessment procedure established by the Management Company;
      - (ii) they are issued or guaranteed by a central authority or central bank of a non-EU Member State, provided that a favourable assessment has been received pursuant to the internal credit rating assessment procedure of the Management Company.
- Cash received by the relevant Fund as part of the repurchase agreement shall not otherwise be invested in other assets, transferred or otherwise reused.
- (IV) Cash received by the relevant Fund as part of the repurchase agreement that is not centrally cleared through a CCP authorised in accordance with Article 14 of EMIR or recognised in accordance with Article 25 of EMIR does not exceed 10% of its assets.
- (V) Cash received by the relevant Fund as part of the repurchase agreement that is centrally cleared through a CCP authorised in accordance with Article 14 of EMIR or recognised in accordance with Article 25 of EMIR does not exceed 15% of its assets.
- (VI) The Company has the right to terminate the agreement at any time upon giving prior notice of no more than two working days.
- (5) Reverse repurchase agreements provided that all of the following conditions are fulfilled:
- (I) the Fund has the right to terminate the agreement at any time upon giving prior notice of no more than two working days;
  - (II) the assets received by the Fund as part of a reverse repurchase agreement shall:
    - (a) be Money Market Instruments that fulfil the requirements set out in (A) (1) above
    - (b) not include securitisations and ABCPs;
    - (c) have a market value which is at all times at least equal to the cash paid out;
    - (d) not be sold, reinvested, pledged or otherwise transferred;
    - (e) be sufficiently diversified with a maximum exposure to a given issuer of 15% of the Fund's Net Asset Value except where those assets take the form of Money Market Instruments that fulfil the requirements of (C) (1) (VIII) below.
    - (f) be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty;
- By way of derogation from (a) above, the Fund may receive as part of a reverse repurchase agreement liquid transferable securities or Money Market Instruments other than those referred to in (A) (1) above provided that those assets comply with one of the following conditions:
- (i) they are issued or guaranteed by the Union, a central authority or central bank of a Member State of the EU, the European Central Bank, the European Investment Bank, the European Stability Mechanism or the European Financial Stability Facility provided that a favourable assessment has been received pursuant to the internal credit rating assessment procedure established by the Management Company;
  - (ii) they are issued or guaranteed by a central authority or central bank of a non-EU Member State, provided that a favourable assessment has been received pursuant to the internal credit rating assessment procedure of the Management Company;

The assets received as part of a reverse repurchase agreement in accordance with the above shall fulfil the diversification requirements described under (C) (1) (VIII).

- (III) The Company shall ensure that it is able to recall the full amount of cash at any time on either an accrued basis or a Mark-to-Market basis. When the cash is recallable at any time on a Mark-to-Market basis, the Mark-to-Market value of the reverse repurchase agreement shall be used for the calculation of the Net Asset Value per Share of the relevant Fund.
- (6) Units or shares of any other standard or short-term Money Market Fund ("targeted MMF") provided that all of the following conditions are fulfilled:
  - (I) no more than 10 % of the assets of the targeted MMF are able, according to its fund rules or instruments of incorporation, to be invested in aggregate in units or shares of targeted MMFs.
  - (II) the targeted MMF does not hold units or shares of the acquiring Fund.
  - (III) the targeted MMF is authorised under the MMF Regulation.
- (7) Financial derivative instruments provided that they are dealt in on a stock exchange or a Regulated Market or OTC provided that all of the following conditions are fulfilled:
  - (I) the underlying of the financial derivative instrument consists of interest rates, foreign exchange rates, currencies or indices representing one of those categories;
  - (II) the financial derivative instrument serves only the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the Fund;
  - (III) the counterparties to OTC derivative transactions are institutions subject to prudential regulation and supervision and belonging to the categories approved by the CSSF;
  - (IV) the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.
- (B) The Company may hold ancillary liquid assets in accordance with Article 41(2) of the Law.
- (C) (1) (I) The Company will invest no more than 5% of the assets of any Fund in Money Market Instruments, securitisations and ABCPs issued by the same body.

The Company may not invest more than 10% of the assets of such Fund in deposits made with the same credit institution, unless the structure of the Luxembourg banking sector is such that there are insufficient viable credit institutions to meet that diversification requirement and it is not economically feasible for the Fund to make

deposits in another Member State of the EU, in which case up to 15 % of its assets may be deposited with the same credit institution.

- (II) By way of derogation from (C) (1) (I) above, a Fund may invest up to 10% of its assets in Money Market Instruments, securitisations and ABCPs issued by the same body provided that the total value of such Money Market Instruments, securitisations and ABCPs held by the relevant Fund in each issuing body in which it invests more than 5 % of its assets does not exceed 40 % of the value of its assets.
- (III) The aggregate of all of a Fund's exposures to securitisations and ABCPs shall not exceed 20% of its assets, whereby up to 15% of that Fund's assets may be invested in securitisations and ABCPs that do not comply with the criteria for the identification of STS securitisations and ABCPs.
- (IV) The aggregate risk exposure to the same counterparty of a Fund stemming from derivative transactions which fulfil the conditions set out in (A) (7) above and which are not centrally cleared through a CCP authorised in accordance with Article 14 of EMIR or recognised in accordance with Article 25 of EMIR shall not exceed 5% of the assets of the relevant Fund.
- (V) The aggregate amount of cash provided to the same counterparty of the Company acting on behalf of a Fund in reverse repurchase agreements that are not centrally cleared through a CCP authorised in accordance with Article 14 of EMIR or recognised in accordance with Article 25 of EMIR shall not exceed 15 % of the assets of that Fund.
- (VI) Where a reverse repurchase agreement is centrally cleared through a CCP authorised in accordance with Article 14 of EMIR or recognised in accordance with Article 25 of EMIR, the cash provided by a Fund as part of each reverse repurchase agreement shall not exceed 15% of the assets of that Fund.
- (VII) Notwithstanding the individual limits laid down in paragraphs (C) (1) (I) and (IV), the Company shall not combine, where to do so would result in an investment of more than 15 % of a Fund's assets in a single body, any of the following:
  - (a) investments in Money Market Instruments, securitisations and ABCPs issued by that body, and/or
  - (b) deposits made with that body, and/or
  - (c) financial derivative instruments that are not centrally cleared through a CCP authorised in accordance with Article 14 of EMIR or recognised in accordance with Article 25 of EMIR, giving counterparty risk exposure to that body.
- (VIII) The limit of 15% laid down in (C) (1) (VI) above would be increased to a maximum of 20% in Money Market Instruments, deposits and derivative transactions of that single body to

the extent the structure of the Luxembourg financial market would be such that there are insufficient viable financial institutions to meet that diversification requirement and it is not economically feasible for the Company to use financial institutions in other Member States of the EU.

(IX) **Notwithstanding the provisions outlined in (C) (1) (I), the Company is authorised to invest more than 5% and up to 100% of the assets of any Fund, in accordance with the principle of risk spreading, in Money Market Instruments issued or guaranteed separately or jointly by the EU, the national, regional and local administrations of the Member States of the EU or their central banks, the European Central Bank, the European Investment Bank, the European Investment Fund, the European Stability Mechanism, the European Financial Stability Facility, a central authority or central bank of a member state of the OECD, Group of Twenty or Singapore, the International Monetary Fund, the International Bank for Reconstruction and Development, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Bank for International Settlements, or any other relevant international financial institution or organisation to which one or more Member States of the EU belong, provided that such Fund must hold Money Market Instruments from at least six different issues by the issuer and that the Fund limits the investments in Money Market Instruments from the same issue to a maximum of 30% of the assets of such Fund.**

(X) The limit laid down in the first paragraph of (C) (1) (I) may be of a maximum of 10% for certain bonds when they are issued by a single credit institution which has its registered office in a Member State of the EU and is subject by law, to special public supervision designed to protect bondholders. In particular, sums deriving from the issue of these bonds must be invested in accordance with the law in assets which, during the whole period of validity of the bonds, are capable of covering claims attached to the bonds and which, in case of failure of the issuer, would be used on a priority basis for the repayment of the principal and payment of accrued interest.

(XI) If a Fund invests more than 5% of its assets in the bonds referred to in the above paragraph and issued by a single issuer, the total value of such investments shall not exceed 40% of the value of the assets of the Fund.

(XII) Notwithstanding the individual limits laid down in (C) (1) (I) the Fund may invest no more than 20 % of its assets in bonds issued by a single credit institution where the requirements set out in point (f) of Article 10(1) or point (c) of Article 11(1) of Delegated Regulation (EU) 2015/ 61 are met, including any possible investment in assets referred to in (C) (1) (IX) and (X) above.

Where a Fund invests more than 5 % of its assets in the bonds referred to in the above paragraph issued by a single issuer, the total value of those investments shall not exceed 60 % of the value of the assets of the relevant Fund, including any possible investment in assets referred to in (C) (1) (IX) and (X) above, respecting the limits set out therein.

Companies which are part of the same group for the purposes of the establishment of consolidated accounts, as defined in accordance with Directive 2013/34/EU or in accordance with recognised international accounting rules, are regarded as a single body for the purpose of calculating the limits contained in section (C) (1) (I) to (VII).

(D) (1) The Company may not acquire on behalf of any Fund more than 10% of Money Market Instruments, securitisations and ABCPs issued by a single body.

(2) Paragraph (D)(1) above is waived as regards Money Market Instruments issued or guaranteed by the EU, national, regional and local administrations of the Member States of the EU or their central banks, the European Central Bank, the European Investment Bank, the European Investment Fund, the European Stability Mechanism, the European Financial Stability Facility, a central authority or central bank of a third country, the International Monetary Fund, the International Bank for Reconstruction and Development, the Council of Europe Development Bank, the European Bank for Reconstruction and Development, the Bank for International Settlements, or any other relevant international financial institution or organisation to which one or more Member States of the EU belong.

(E) (1) Unless explicitly otherwise mentioned in its investment policy, a Fund may not invest more than 10% of its assets in units or shares of targeted MMFs as defined under paragraph (A) (6).

(2) A Fund may acquire units or shares of another targeted MMF provided that it represents no more than 5% of a Fund's assets.

(3) Any Fund which is allowed to derogate from item (E) (1) above may not invest in aggregate more than 17.5% of its assets in units or shares of other targeted MMFs.

(4) By derogation to (2) and (3) above, any Fund may either:

(I) be a feeder MMF investing at least 85% of its assets in one other single targeted MMF UCITS in accordance with Article 58 of the UCITS Directive; or

(II) invest up to 20% of its assets in another single targeted MMF with a maximum of 30% in aggregate of its assets in targeted MMFs which are not UCITS in accordance with Article 55 of the UCITS Directive,

provided that the following conditions are met:

- (a) the relevant Fund is marketed solely through an employee savings scheme governed by national law and which has only natural persons as investors;
  - (b) the employee savings scheme referred to above only allows investors to redeem their investment subject to restrictive redemption terms which are laid down in national law, whereby redemptions may only take place in certain circumstances that are not linked to market developments.
- (5) Where the target MMF is managed, whether directly or under a delegation, by the Management Company or by any other company to which the Management Company is linked by common management or control, or by a substantial direct or indirect holding, the Management Company or that other company, is prohibited from charging subscription or redemption fees on account of the investment by the acquiring Fund in the units or shares of the targeted MMF.

In respect of a Fund's investments of more than 10% of its assets in the target MMF, (i) if the target MMF is linked to the Management Company as described in the preceding paragraph, there shall be no Annual Management Charge charged to that portion of the assets of the relevant Fund and (ii) in the other cases, the maximum level of Annual Management Charges that may be charged both to the Fund itself and to the target MMF will not exceed 1%. The Company will indicate in its annual report the total Annual Management Charges charged both to the relevant Fund and to the target MMF in which such Fund has invested during the relevant period.

- (6) The underlying investments held by the targeted MMF in which a Fund invests do not have to be considered for the purpose of the investment restrictions set forth under (C) (1) (I) above.
- (7) Any Fund may act as a master fund for other funds.

Notwithstanding the foregoing, a Fund may subscribe, acquire and/or hold securities to be issued or issued by one or more Fund(s) qualifying as Money Market Funds without the Company being subject to the requirements of the Law of 10 August 1915 on commercial companies, as amended, with respect to the subscription, acquisition and/or the holding by a company of its own shares, under the condition however that:

- (I) the target Money Market Fund does not, in turn, invest in the relevant Fund invested in this target Money Market Fund; and
- (II) no more than 10% of the assets that the target Money Market Funds whose acquisition is contemplated may be invested in units of other Money Market Funds; and
- (III) voting rights, if any, attaching to the shares of the target Money Market Fund are suspended for as long as they are held by the Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and

- (IV) in any event, for as long as these securities are held by the Fund, their value will not be taken into consideration for the calculation of the net assets of the Fund for the purposes of verifying the minimum threshold of the net assets imposed by the Luxembourg Law.

(F) In addition the Company will not:

- (1) invest in assets other than those referred to under (A) and (B) above;
- (2) short sale Money Market Instruments, securitisations, ABCPs and units or shares of other Money Market Funds ;
- (3) take direct or indirect exposure to equity or commodities, including via derivatives, certificates representing them, indices based on them, or any other means or instrument that would give an exposure to them.
- (4) enter into securities lending agreements or securities borrowing agreements, or any other agreement that would encumber the assets of the Fund.
- (5) borrowing and lending cash.

(G) The Company will in addition comply with such further restrictions as may be required by the regulatory authorities in which the Shares are marketed.

#### Portfolio rules

Standard Variable Net Asset Value Money Market Funds shall also comply on an ongoing basis with all of the following requirements:

- (A) its portfolio is to have at all times a Weighted Average Maturity of no more than 6 months;
- (B) its portfolio is to have at all times a Weighted Average Life of no more than 12 months, subject to the provisions of the MMFR;
- (C) at least 7.5 % of its assets are to be comprised of daily maturing assets, reverse repurchase agreements (if any) which can be terminated by giving prior notice of one working day or cash which can be withdrawn by giving prior notice of one working day. A Fund is not to acquire any asset other than a daily maturing asset when such acquisition would result in that Fund investing less than 7.5 % of its assets in daily maturing assets;
- (D) at least 15 % of its assets are to be comprised of weekly maturing assets, reverse repurchase agreements (if any) which can be terminated by giving prior notice of five working days or cash which can be withdrawn by giving prior notice of five working days. A Fund is not to acquire any asset other than a weekly maturing asset when such acquisition would result in that Fund investing less than 15 % of its assets in weekly maturing assets. Money Market Instruments or units or shares of other Money Market Funds may be included within the weekly maturing assets limit up to 7.5% of its assets provided they are able to be redeemed and settled within five working days.

If the abovementioned limits are exceeded for reasons beyond the control of the Company or as a result of the exercise of subscription or redemption rights, the Company

shall adopt as a priority objective the correction of that situation, taking due account of the interest of its Shareholders.

### Repurchase and reverse repurchase agreements

The Company will comply with the Regulations and in particular the MMFR, the CSSF circular 14/592 relating to ESMA guidelines on ETFs and other UCITS issues and Regulation (EU) 2015/2365 of 25 November 2015 on transparency of securities financing transactions and of reuse.

### Internal Credit Quality Assessment Procedure

In accordance with the MMFR, and relevant delegated acts supplementing the MMFR, the Management Company has established, implemented and consistently applies a customized internal credit quality assessment procedure based on prudent, systematic and continuous assessment methodologies for systematically determining the credit quality of the instruments held in the portfolio of the Funds that qualify as Money Market Funds within the meaning of the MMFR.

An effective process has been established by the Management Company to ensure that relevant information on the issuer and the instrument's characteristics are obtained and kept up-to-date. This information includes, but is not limited to, detail on each issuer's financial accounts, business profile, and the quality of management in addition to industry and market trends.

Determination of credit risk of an issuer or guarantor will be made based on an independent analysis of the issuer's or guarantor's ability to repay its debt obligations which uses a mixture of quantitative and qualitative information. The persons in charge of the implementation of internal credit quality assessment procedure constitute a team of credit analysts under the responsibility of the Management Company. The determination of credit risk shall include the following elements, where applicable:

- Financial condition and analysis of recent financial statements;
- Assessment of the issuer's liquidity profile including sources of liquidity;
- Ability to react to future market-wide and issuer- or guarantor-specific events, including the ability to repay in a highly adverse situation;
- Strength of the issuer's or guarantor within the economy and relative to economic trends and competitive position;
- Credit quality direction (which is an absolute view of how an issuer's credit quality is expected to evolve in the market);
- Sector rankings (they are made on a relative risk basis, linking a credit quality direction with an analyst's view of what is forecast to happen to an issue in the market);
- The rating and outlook provided by external credit rating agencies.

In order to quantify the credit risk of an issuer or guarantor and the relative risk of default of an issuer or guarantor and of an instrument, the following quantitative criteria will be used in the credit quality assessment methodology:

- Bond pricing information, including credit spreads and pricing of comparable fixed income instruments and related securities;
- Pricing of money market instruments relevant to the issuer or guarantor, instrument or industry sector;
- Credit default-swap pricing information, including credit default-swap spreads for comparable instruments;
- Default statistics relating to the issuer or guarantor, instrument, or industry sector;
- Financial indices relevant to the geographic location, industry sector or asset class of the issuer or instrument;
- Financial information relating to the issuer or guarantor, including profitability ratios, interest coverage leverage metrics, pricing of new issues including the existence of more junior securities.

Specific criteria for the qualitative assessment of the issuer or guarantor and of an instrument as designated by the Management Company will include:

- (A) Credit Assessment of the issuer or guarantor of the instrument
  - (1) The financial condition of the issuer
    - (I) Analysis of the sovereign including explicit and contingent liabilities, the size of foreign exchange reserves and any foreign exchange liabilities etc.
    - (II) Analysis of the industry and market in which the issuer operates, and its position within it.
  - (2) The financial condition of the guarantor
  - (3) The condition of government support
    - (I) The level of government ownership or the point at which intervention will take place
    - (II) Debt protection or business/financial support
    - (III) National policy and the level of economic/systematic importance
- (B) The liquidity of the instrument
  - (1) The amount of the issue outstanding
  - (2) The instruments liquidity as measured by both internal and external liquidity risk applications
- (C) The issuer's rating from external credit rating agencies
  - (1) External credit ratings are not relied upon, but are used as an initial threshold for suitability using a minimum rating by internationally recognized statistical rating organizations determined by the Management Company.

There will be no mechanistic over-reliance on external ratings given, amongst other factors, the external rating is not forward-looking in nature. Independent, fundamental analysis will therefore be undertaken in order to come to an informed view.

The qualitative and quantitative inputs on which the credit quality assessment methodology is based will be of a reliable nature and well-documented.

Based on the analysis completed, a global favorable or unfavorable assessment on the issuer and on the instrument will be delivered. Unfavorable assessments result automatically in the impossibility of a transaction. Favorable assessments permit the issuer's inclusion on the approved list of issuers, making transactions possible but do not systematically end with a transaction. Each approved issuer is assigned a maximum maturity for which its issues can be held.

The credit quality of individual issuers is reviewed and updated on a continuous basis. Proactive monitoring of public information that may impact an issuer's credit quality is key part of the dynamic research process.

In case an issuer's credit quality declines the instruments of which are held in the portfolio of a Fund, the issuer may be designated "do not roll". In these instances, the instruments are either (i) sold or (ii) allowed to expire. In this latter case, the assessment of the credit quality of the instrument must remain favorable and further issues of the same issuer will

not be purchased until such a point it recovers a credit quality sufficient to conclude to a favorable assessment of the instruments it issues.

The credit quality assessment methodologies are reviewed at least on annual basis by the Management Company and more often if necessary.

In case there is a material change, within the meaning of the MMFR, that could have an impact on the existing assessment of an instrument or on the credit quality methodologies, a new credit quality assessment will be performed and/or credit quality methodologies will be updated.

Stress scenario analysis is performed at both an individual issuer and a total portfolio level. In the case of individual issuers, stress scenario analysis forms an integral part of the credit research process. It is performed in order to test the robustness of the assumptions used in the credit research process and to ensure that individual issuers are suitably resilient under potentially challenging conditions. Key factors involved in historical scenarios are used to inform forward-looking assumptions of potential future scenarios. Stress scenario analysis is performed on-desk by a dedicated team of credit analysts using proprietary systems, and is performed as frequently as may be necessary.

# Appendix IV

## Pre-contractual Disclosures

Information relating to the environmental and social characteristics or sustainable investment objectives of the Funds is provided in the following Appendix in accordance with SFDR and Commission Delegated Regulation (EU) 2022/1288.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund AAA Flexible ABS**

**Legal entity identifier:** **636700GQ961ANWAO0935**

## Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                   |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund only invests in assets deemed above a minimum threshold based on the Investment Manager's rating system.

Securities are ranked across Environmental, Social and Governance factors using a scorecard system and are awarded points on a 100-point /100 percent scale. These scores are then translated into a scoring system of 1-star – 5-stars, with a score of 5-stars deemed the highest. The Investment Manager ensures that at least 80% of the assets in the Fund are ranked in the top 3 Sustainability categories (3, 4, 5-stars) and will invest 100% of its assets in those ranked 2-stars or higher.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager uses different sustainability indicators to score each investment in the Fund dependent on the specific asset-type, e.g. whether the underlying secured assets are mortgages or commercial real estate or another asset type. Indicators are typically either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators include but are not limited to environmental metrics such as environmental transition risk or physical risk, social indicators such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles. Compliance with the minimum required score is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

### ● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes

☒ No, due to the nature of the Fund’s assets, the Investment Manager is not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only apply to investments in companies, sovereign debt and real estate.

However, the Investment Manager does consider adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensures that investments are aligned with the UN Principles for Responsible Investment (“PRI”). All investments must be compliant with industry standards, be fair, and be fit-for purpose
- The Investment Manager’s rating system takes into account adverse impacts on society such as the asset footprint on the environment or impact on climate change
- Investments that cannot meet minimum standards related to social, environmental or governance concerns are excluded from the portfolio. The list of excluded sectors is reviewed, updated and published quarterly.

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least 80% of its assets in (i) AAA rated fixed and floating rate asset-backed securities (ABS) issued worldwide or (ii) fixed or floating rate securities issued by the governments of the US or UK, including government-guaranteed agency mortgage-backed securities.

The Fund allocates flexibly across ABS investments, which may include residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), collateralised loan obligations (CLOs) and credit risk transfer securities (CRTs). Other underlying assets of the ABS may also include, but are not limited to, credit card receivables, personal loans, auto loans, transportation finance and small business loans.

The Fund may invest up to 100% of its assets in CLOs.

The Fund will only invest in assets rated AA- or higher (as measured by Standard & Poor’s or any equivalent grade of other credit rating agencies for rated securities and implied Schroders ratings for non-rated securities).

The Fund may also invest its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market instruments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Investment Manager assesses the sustainability credentials of potential investments using a proprietary tool. The Fund only invests in assets deemed above a minimum threshold based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. The strategy aims to identify securities offering good or improving sustainability characteristics and credentials. The Investment Manager seeks to avoid, penalize or exclude collateral, structures or agents that impose a high cost on the environment and society, or those that lack acceptable governance.

This involves:

- The exclusion of sectors, assets or collateral, that the Investment Manager deems impose material uncompensated costs to the environment and those that impose unjustifiable social costs
- The inclusion of securities that evidence improvements to existing assets, lending conditions or governance based on the Investment Manager's rating methodology.

Securities are ranked across Environmental, Social and Governance factors using a scorecard system and are awarded points on a 100-point /100 percent scale. These scores are then translated into a scoring system of 1star -5stars, with a score of 5-stars deemed the highest.

The Investment Manager ensures that at least 80% of the assets in the Fund are ranked in the top 3 Sustainability categories (3, 4, 5-stars) and will invest 100% of its assets in those ranked 2-stars or higher.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools, surveys, ESG questionnaires, public information, securitization filings and third-party research.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- At least 80% of the assets in the Fund are ranked in the top 3 Sustainability categories (3, 4, 5-stars) and will invest 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system.
- The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

Due to the nature of the Fund's assets, the good governance principles of A) sound management structures, B) employee relations, C) remuneration of staff and D) tax compliance are not directly or fully applicable.

As part of our good governance framework, the Investment Manager ensures that the special purpose vehicles (SPVs – the structure holding the assets) are set up in jurisdictions which have well-established corporate legal frameworks and sound corporate governance and are supervised by local law, policies and regulations. One of the many characteristics of securitisation is that as a separate SPV, or pool of assets, the securitisation is not generally a managed "going concern" corporation. We assess the fiduciary behaviour of parties to the structure, such as servicers, collateral managers and trustees, and practices that mitigate risk, align interest and avoid conflict.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics. This means investments that are ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. The minimum proportion stated in #1 applies in normal market conditions.

**#2 Other** includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes any investments that are not aligned with the environmental or social characteristics as they are not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) or other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

### ● *How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of Sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable for the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What is the minimum share of socially sustainable investments?

This question is not applicable for the Fund.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that are not aligned with the environmental or social characteristics as they are not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) or other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund only invests in assets deemed above a minimum threshold based on the Investment Manager's rating system.

Securities are ranked across Environmental, Social and Governance factors using a scorecard system and are awarded points on a 100-point /100 percent scale. These scores are then translated into a scoring system of 1-star – 5-stars, with a score of 5-stars deemed the highest. The Investment Manager ensures that at least 80% of the assets in the Fund are ranked in the top 3 Sustainability categories (3, 4, 5-stars) and will invest 100% of its assets in those ranked 2-stars or higher.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager uses different sustainability indicators to score each investment in the Fund dependent on the specific asset-type, e.g. whether the underlying secured assets are mortgages or commercial real estate or another asset type. Indicators are typically either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators include but are not limited to environmental metrics such as environmental transition risk or physical risk, social indicators such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles. Compliance with the minimum required score is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

### What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☐ Yes

☒ No, due to the nature of the Fund’s assets, the Investment Manager is not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only apply to investments in companies, sovereign debt and real estate.

However, the Investment Manager does consider adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensures that investments are aligned with the UN Principles for Responsible Investment (“PRI”). All investments must be compliant with industry standards, be fair, and be fit-for purpose
- The Investment Manager’s rating system takes into account adverse impacts on society such as the asset footprint on the environment or impact on climate change
- Investments that cannot meet minimum standards related to social, environmental or governance concerns are excluded from the portfolio. The list of excluded sectors is reviewed, updated and published quarterly.

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securitised investments including, but not limited to, asset-backed securities (ABS), agency and non-agency residential mortgage-backed securities (MBS) including forward-settling securities such as to be announced (TBA) trades, commercial mortgage-backed securities (CMBS), credit risk transfer securities (CRTs) and up to 49% of its assets in collateralised loan obligations (CLOs). Underlying assets of the asset-backed securities may include credit card receivables, personal loans, auto loans, transportation finance and small business loans.

The Fund may also invest in fixed and floating rate securities issued by governments, government agencies, supranationals and companies worldwide.

The Fund’s strategy will have an overall duration of between zero and four years, but this does not preclude the Fund from investing in securities with a duration above four years.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fund may invest up to 100% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in fixed and floating rate investments issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated securities and implied Schroders ratings for non-rated securities).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps on a continuous basis. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 30% of the Net Asset Value. In certain circumstances this may be higher.

The Investment Manager assesses the sustainability credentials of potential investments using a proprietary tool. The Fund only invests in assets deemed above a minimum threshold based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The strategy aims to identify securities offering good or improving sustainability characteristics and credentials.

The Investment Manager seeks to avoid, penalize or exclude collateral, structures or agents that impose a high cost on the environment and society, or those that lack acceptable governance.

This involves:

- The exclusion of sectors, assets or collateral, that the Investment Manager deems impose material uncompensated costs to the environment and those that impose unjustifiable social costs
- The inclusion of securities that evidence improvements to existing assets, lending conditions or governance based on the Investment Manager's rating methodology.

Securities are ranked across Environmental, Social and Governance factors using a scorecard system and are awarded points on a 100-point /100 percent scale. These scores are then translated into a scoring system of 1star -5stars, with a score of 5-stars deemed the highest.

The Investment Manager ensures that at least 80% of the assets in the Fund are ranked in the top 3 Sustainability categories (3, 4, 5-stars) and will invest 100% of its assets in those ranked 2-stars or higher.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools, surveys, ESG questionnaires, public information, securitization filings and third-party research.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- At least 80% of the assets in the Fund are ranked in the top 3 Sustainability categories (3, 4, 5-stars) and will invest 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system.
- The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

### ● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

### ● **What is the policy to assess good governance practices of the investee companies?**

Due to the nature of the Fund's assets, the good governance principles of A) sound management structures, B) employee relations, C) remuneration of staff and D) tax compliance are not directly or fully applicable.

As part of our good governance framework, the Investment Manager ensures that the special purpose vehicles (SPVs – the structure holding the assets) are set up in jurisdictions which have well-established corporate legal frameworks and sound corporate governance and are supervised by local law, policies and regulations. One of the many characteristics of securitisation is that as a separate SPV, or pool of assets,

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

the securitisation is not generally a managed “going concern” corporation. We assess the fiduciary behaviour of parties to the structure, such as servicers, collateral managers and trustees, and practices that mitigate risk, align interest and avoid conflict.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund’s investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund’s assets used to attain the environmental or social characteristics. This means investments that are ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria. The minimum proportion stated in #1 applies in normal market conditions.

**#2 Other** includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes any investments that are not aligned with the environmental or social characteristics as they are not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) or other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

### ● *How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### ● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### ● What is the minimum share of investments in transitional and enabling activities?

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**What is the minimum share of Sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

This question is not applicable for the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

This question is not applicable for the Fund.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

#2 Other includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that are not aligned with the environmental or social characteristics as they are not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) or other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the JP Morgan Asia Credit index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the JP Morgan Asia Credit index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the JP Morgan Asia Credit index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether the asset is classified as a green, social and / or sustainable bond. Compliance

with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list norms considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

- PAIs are considered as part of pre-investment through the application of exclusions. These include:
- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
  - Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive

areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders' proprietary tools incorporate several PAIs as a component of its scoring methodology. For example, within Schroders' proprietary tool, PAIs related to carbon footprint and greenhouse gas emissions (PAIs 1, 2, 3, 4, 5 and 15) and PAI 7 (Activities negatively affecting biodiversity-sensitive areas) are included in assessing an issuer's overall environmental score, while PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) are included in assessing an issuer's overall social score.

The combination of the Investment Manager's fundamental and quantitative analysis helps to provide a comprehensive view on ESG factors on a country, sector and issuer level.

That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held in the Fund, with a primary focus on corporate engagements relating to PAIs 1, 2, 3, 4, 5, 12, 13 and 15. For each issuer, the Investment Manager assesses and identifies the most relevant topics for engagement based on Schroders' proprietary tools, data from external data providers, and in-house analysis.

We also aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2, 15).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in various currencies and issued by companies, governments, government agencies and supranationals in Asia. For the purposes of this Fund, Asia includes the following west Asian countries: Bahrain, Israel, Lebanon, Oman, Qatar, Saudi Arabia, Turkey and United Arab Emirates.

The Fund may invest:

- up to 20% of its assets in asset-backed securities and mortgage-backed securities; and
- up to 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in sub-investment grade securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for nonrated bonds).

The Fund may invest up to 20% of its assets in mainland China through the Qualified Foreign Investor ("QFI") scheme or Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund intends to use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the JP Morgan Asia Credit index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- the exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.

– the inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

– 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

– 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the JP Morgan Asia Credit index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply certain other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars. Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**What is the asset allocation planned for this financial product?**

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the JP Morgan Asia Credit index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments, is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- **How does the designated index differ from a relevant broad market index?**

This question is not applicable for the Fund.

- **Where can the methodology used for the calculation of the designated index be found?**

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Asian Dividend Maximiser**

**Legal entity identifier:** **5493008UI8R6FCP1MG15**

## Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                                       |

| <input type="checkbox"/> It will make a minimum of <b>sustainable investments with a social objective ___%</b>           | <input checked="" type="checkbox"/> with a social objective                                                                                                                                                                                           |
|                                                                                                                          | <input type="checkbox"/> It promotes E/S characteristics, but <b>will not make any sustainable investments</b>                                                                                                                                        |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good Governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions.

Further information on all of the Fund's exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).

- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we may engage with issuers on net zero carbon emissions targets related to PAI 1,2,3, and board gender diversity related to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two thirds of its assets (excluding cash) in equities or equity related securities of Asia-Pacific companies (excluding Japan), which are selected for their income and capital growth potential.

To enhance the yield of the Fund, the Investment Manager selectively sells short dated call options over individual securities held by the Fund, generating extra income by agreeing strike prices above which potential capital growth is sold.

The Fund may invest directly in China H-Shares and may invest up to \*10% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

**\*As of 10 September 2026, this will change to 20%.**

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage, <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Companies in the investment universe are assessed on their governance, environmental and social profile. The Investment Manager performs due diligence on potential holdings and this can include meetings with company management. The Investment Manager aims to identify the impact a business has on society whilst assessing relationships with key stakeholders such as employees, suppliers and regulators. This research is supported by quantitative analysis gained from Schroders' proprietary sustainability tools which are key inputs to assessing how existing and potential investments are meeting the Fund's sustainability criteria.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

– 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

– 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability -Related Disclosures" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). However, the Fund's use of covered call options for income generation purposes do not contribute towards the Fund's sustainability score.

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Asian Equity Yield**

**Legal entity identifier:** **HW8T20METRZQAOYP1066**

## Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                                       |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/> The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. .
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).

- Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom-up stock analysis at a company level. The Asian Equities investment team uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schrodgers PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Asia Pacific companies (excluding Japan).

The Fund invests in the equities of companies in the Asia Pacific (excluding Japan) region that pay dividends now but also retain enough cash to reinvest back into the company to generate future growth.

The Fund may invest directly in China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor ("QFI") scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash. The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

In the selection and assessment of potential investment opportunities and holdings, companies are assessed on a proprietary stakeholder-based approach against criteria including, but not limited to (1) good governance practices; (2) impact on the environment and local communities; and (3) fair and equitable treatment of employees, suppliers and customers. Information and insights derived from Schrodgers' proprietary sustainability tools are utilised in this assessment and due diligence process.

The Investment Manager's proprietary analysis and ongoing engagement with these companies may also help it derive a reasonable level of conviction that concrete steps will be or are being taken to transition out of business segments or practices that have not met the sustainability criteria or improve on their relevant areas of weakness. The Investment Manager may consider these companies eligible for investment ahead of seeing changes in the company's ratings and rankings across both internal and external evaluation metrics.

The primary sources of information used to perform the analysis include the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,
- is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply certain other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Asian Local Currency Bond**

**Legal entity identifier:** **549300KCHS5SNB1JYW85**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the iBoxx Asian Local Currency Bond index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the iBoxx Asian Local Currency Bond index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the iBoxx Asian Local Currency Bond index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders' proprietary tools incorporate several PAIs as a component of its scoring methodology. For example, within Schroders' proprietary tool, PAIs related to carbon footprint and greenhouse gas emissions (PAIs 1, 2, 3, 4, 5 and 15) and PAI 7 (Activities negatively affecting biodiversity-sensitive areas) are included in assessing an issuer's overall environmental score, while PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) are included in assessing an issuer's overall social score.

The combination of the Investment Manager's fundamental and quantitative analysis helps to provide a comprehensive view on ESG factors on a country, sector and issuer level.

That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held in the Fund, with a primary focus on corporate engagements relating to PAIs 1, 2, 3, 4, 5, 12, 13 and 15. For each issuer, the Investment Manager assesses and identifies the most relevant topics for engagement based on Schroders' proprietary tools, data from external data providers, and in-house analysis.

We also aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2, 15).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in fixed income securities with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds) denominated in local currencies issued by government, government agencies and companies in Asia (excluding Japan) and derivatives related to the above instruments. For the purposes of this Fund, Asia includes the following west Asian countries: Bahrain, Israel, Lebanon, Oman, Qatar, Saudi Arabia, Turkey and United Arab Emirates.

The Fund may invest directly in mainland China through (i) QFI schemes or QFII related schemes supervised by the China Securities Regulatory Commission provided investment restriction is complied with and/or they qualify as Investment Funds and (ii) Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

Investments in mainland China Regulated Markets and interbank bond markets may also be performed indirectly through notes, certificates or other instruments (which qualify as transferable securities and do not embed a derivative element), open-ended Investment Funds and eligible derivative transactions.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund intends to use derivatives (including total return swaps and long and short currency forwards) with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps on a temporary basis in market conditions including but not limited to periods of slow economic growth and falling interest

rates, and where the Investment Manager's view is that sovereign spread premiums will compress. The gross exposure of total return swaps will not exceed 20% and is expected to remain within the range of 0% to 5% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund maintains a higher overall sustainability score than the iBoxx Asian Local Currency Bond index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- the exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- the inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation. The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,
- is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the iBoxx Asian Local Currency Bond index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the iBoxx Asian Local Currency Bond index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments, is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- **How does the designated index differ from a relevant broad market index?**

This question is not applicable for the Fund.

- **Where can the methodology used for the calculation of the designated index be found?**

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Asian Opportunities**

**Legal entity identifier:** **YV2UILN4DUFWUTDZHO58**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_%**

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective \_\_\_%**

☒ ☐ **No**

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of **25.00%** of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia ex Japan (Net TR) Index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).

- Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom-up stock analysis at a company level. The Asian Equities investment team uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schrodgers PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schrodgers.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of Asian companies (excluding Japan). The Fund may invest directly in China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor ("QFI") scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

In the selection and assessment of potential investment opportunities and holdings, companies are assessed on a proprietary stakeholder-based approach against criteria including, but not limited to (1) good governance practices; (2) impact on the environment and local communities; and (3) fair and equitable treatment of employees, suppliers and customers. Information and insights derived from Schrodgers' proprietary sustainability tools are utilised in this assessment and due diligence process.

The Investment Manager's proprietary analysis and ongoing engagement with these companies may also help it derive a reasonable level of conviction that concrete steps will be or are being taken to transition out of business segments or practices that have not met the sustainability criteria or improve on their relevant areas of weakness. The Investment Manager may consider these companies eligible for investment ahead of seeing changes in the company's ratings and rankings across both internal and external evaluation metrics.

The primary sources of information used to perform the analysis include the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

– 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

– 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

### What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Asian Total Return**

**Legal entity identifier:** **A3HSL7JNL11S4BK1H669**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroder' proprietary tool compared against the weighted average sustainability score of the MSCI AC Asia Pacific ex Japan (Net TR) index in Schroder' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference (i) to the sustainability score of each asset in Schroder' proprietary tool and/ or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance

with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroder's proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/ or social benefits such as greater water access or fair pay and reducing environmental, and/ or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroder's proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNG) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).

- Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom-up stock analysis at a company level. The Asian Equities investment team uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schrodgers PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schrodgers.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in Asia Pacific equity and equity related securities.

The Fund may invest directly in China H-Shares and may invest less than 30% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor ("QF") scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. The Fund may buy or sell equity index futures and buy and sell index options on indices or individual stocks. To obtain exposure to equity indices and individual stocks, the Fund may also enter into contracts for difference where the underlying investments are not delivered and settlement is made in cash. Contracts for difference may be used to gain long and short exposure or to hedge exposure on equity and equity related securities. The gross exposure of contracts for difference will not exceed 10% and is expected to remain within the range of 0% to 10% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

In the selection and assessment of potential investment opportunities and holdings, companies are assessed on a proprietary stakeholder-based approach against criteria including, but not limited to (1) good governance practices; (2) impact on the environment and local communities; and (3) fair and equitable treatment of employees, suppliers and customers. Information and insights derived from Schrodgers' proprietary sustainability tools are utilised in this assessment and due diligence process.

The Investment Manager's proprietary analysis and ongoing engagement with these companies may also help it derive a reasonable level of conviction that concrete steps will be or are being taken to transition out of business segments or practices that have not met the sustainability criteria or improve on their relevant areas of weakness. The Investment Manager may consider these companies eligible for investment ahead of seeing changes in the company's ratings and rankings across both internal and external evaluation metrics.

The primary sources of information used to perform the analysis include the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

### ● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

### ● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

**Good governance**  
practices include  
sound management  
structures, employee

**Asset allocation**  
describes the share of  
investments in  
specific assets.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund’s investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund’s assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) index, and so the Fund’s investments that are scored by Schroders’ proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund’s sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tool and so do not contribute towards the Fund’s sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund uses derivatives extensively to implement its investment strategy. Short positions contribute to the Fund's overall sustainability score. Short positions with negative scores contribute positively towards the aggregate score, while short positions with positive scores detract from the aggregate score. Equity and index derivatives are scored in the same way as physical holdings, on a look-through basis, and also contribute to the Fund's overall sustainability score. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

## **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

This question is not applicable for the Fund.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNG) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability Related Disclosures" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and

compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

- Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tool provides a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 are specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data is very limited so it is not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators are monitored via Schroders PAI dashboard. We review the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in a range of equity and equity related securities of Brazilian, Indian and Chinese companies.

The Fund may invest directly in China H-Shares and may invest less than 20% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The Investment Manager performs due diligence on potential holdings, including meetings with management, and assesses the company's governance, environmental and social profile across a range of factors. This process is supported by quantitative analysis provided by Schroders' proprietary sustainability tools, which are key inputs to assess how existing and potential investments for the portfolio are meeting the Fund's sustainability criteria. In some cases, companies which fall below the sustainability criteria may still be eligible for investment if, as a result of proprietary analysis and ongoing engagement with management, the Investment Manager believes the company will meet its sustainability criteria within a realistic time horizon.

For a company to be eligible to be held in the Fund, it is expected to show a commitment to its stakeholders, including customers, employees, suppliers, shareholders and regulators. The Fund selects companies whose businesses demonstrate good governance and aim to treat stakeholders equitably.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data and reports.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund BlueOrchard Emerging Markets Climate Bond**

**Legal entity identifier:** **5493007XCI1VSIJ1FK02**

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good Governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?                                                                 |                                                                                                                                                                                                                                   |

## What is the sustainable investment objective of this financial product?

The Fund's sustainable investment objective is to invest its assets in securities issued by governments and companies worldwide, including emerging market countries, that contribute towards the UN SDG of taking action to combat climate change. The Fund may also invest in investments that the Investment Manager deems to be neutral under its sustainability criteria, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager will select sustainable investments from a universe that have been determined as meeting the Investment Manager's impact criteria. The impact criteria include an assessment of the investment's contribution to the UN SDG of taking action to combat climate change alongside the Investment Manager's assessment of impact via its proprietary scorecard. The investment process is aligned with the Operating Principles for Impact Management.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

At the date of this Prospectus, it is not yet possible to commit to the Fund maintaining a minimum alignment with the Taxonomy, as the Investment Manager is currently not in a position to accurately determine to what extent the Fund's investments are in taxonomy-aligned environmentally sustainable activities. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio. However, it is expected that the Fund invests in companies and economic activities that contribute to the environmental objectives of climate change mitigation and climate change adaptation within the meaning of the Taxonomy.

In future it is therefore expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

The Investment Manager is responsible for determining whether an investment meets the criteria of a sustainable investment. The Investment Manager considers the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental objective, and specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. The output of the Investment Strategy outlined below is the production of the list of investments that meet the selection criteria, this represents the investment universe. Compliance with the minimum percentage in sustainable investments is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

The Investment Manager uses different sustainability indicators to measure the impact contribution. In particular, the Investment Manager uses a proprietary sustainability tool to verify that every bond included in the investment universe has satisfactory ESG and impact scores and is aligned to the Fund's investment objective of combatting climate change. There is a detailed impact assessment of every company and/or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a bond is expected to have. The Investment Manager considers different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment includes tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's or the bond's positive contribution over time via an annual review. Examples of the indicators include, but are not limited to, CO2 emissions reduction, MW of renewable energy capacity or of energy saved, MWh of renewable energy generated, m3 of water savings, m2 of total floor area of buildings achieving green certification or km of clean transportation infrastructure built or improved.

Once these steps have been completed, the bond's or company's impact scorecard and the company's ESG scorecard (as applicable) are validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

● ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund does not directly invest in the sectors included in BlueOrchard's Public Asset Exclusion List: [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.

2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for

Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

- Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process. PAIs are included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess and approve issuers for the strategy's sustainable investment universe. PAIs 1-14 are included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and will guide the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAI 1, 2, 12, 13:

We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and board gender diversity or unadjusted gender pay gap, which relate to PAI 12 and 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests its assets in (i) sustainable investments, which are investments that are expected to contribute towards combating climate change ; and (ii) investments that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager will select sustainable investments from a universe that have been determined as meeting the Investment Manager's impact criteria. The impact criteria include an assessment of an investment's contribution to the UN SDG of taking action to combat climate change alongside the Investment Manager's assessment of impact and ESG via its proprietary impact investment management framework and tools (including impact and ESG scorecards).

The Fund is part of Schroders' Impact Driven strategies. As such, it applies highly selective investment criteria and its investment process is aligned with the Operating Principles for Impact Management which means that an assessment of impact is embedded in the steps of the investment process. All sustainable investments in the Fund are subject to this framework.

The Fund does not directly invest in the sectors included in BlueOrchard's Public Assets Exclusion List, [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to seek to improve sustainability practices and enhance social and environmental impacts generated by underlying investee companies. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund invests at least two-thirds of its assets in fixed and floating rate securities denominated in various currencies and issued by governments, government agencies, supranationals and companies worldwide, including emerging market countries. The Fund will increase its exposure to emerging markets over time. At the Fund's launch, the exposure to emerging markets will be at least of 50% of its net assets and this exposure will increase progressively with the intention to reach at least 67% of its net assets after three years.

The Fund may invest up to 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The Fund may also invest up to one third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Investment Manager applies sustainability criteria when selecting investments for the Fund.

Investments are composed of bonds where the issuer's products and services, business activities or use of proceeds for a purpose bond contribute positively to at least one of the UN SDGs taking action to combat climate change, including SDG 7, 11 and 13. In order to identify bonds with a direct link to a UN SDG, the Investment Manager applies a two step approach:

- The first considers the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental objective.
- The second is a detailed ESG and impact assessment of the company and/or bond (as applicable) via the completion of proprietary impact and ESG scorecards. The Investment Manager considers a range of ESG criteria and different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment typically includes Key Performance Indicators (KPIs) that are used to track the company's or the bond's positive contribution over time

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The impact and ESG scorecards are validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

Due to the nature of its investments, and in particular the need for currency hedging, the Fund may also hold a portion of investments that the Investment Manager deems to be neutral under its sustainability criteria. These may include (but are not limited to) derivatives for hedging purposes, cash and Money Market Investments.

The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria. As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

For the purposes of this test, the potential investment universe is the core universe of issuers that the Investment Manager may select for the Fund prior to the application of sustainability criteria, in accordance with the other limitations of the Investment Objective and Policy. This universe is comprised of fixed and floating rate securities denominated in various currencies and issued by companies worldwide, including emerging market countries. The universe (for the purpose of this test only) does not include fixed or floating rate securities issued by public or quasi-public issuers.

### ● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The following binding elements are applied throughout the investment process:

- The Fund is actively managed and invests at least 80% of its assets in sustainable investments, that contribute towards combatting climate change.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal, especially companies that generate revenues from tobacco production or any other part of the tobacco value chain (suppliers, distributors, licensors), and companies that generate revenues from thermal coal mining and coal fired power generation. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. The Fund does not invest in the sectors included in BlueOrchard's Public Asset Exclusion List.

[https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

- The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.
- The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria.
- As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

### ● **What is the policy to assess good governance practices of the investee companies?**

The Investment Manager's proprietary framework includes an assessment of the good governance practices of each investment, including on factors such as a company's code of conduct and ESG incident screening. The good governance score represents at least 33% of the proprietary framework ESG scorecard's score and comprises topics such as business integrity, compliance with local regulation, corporate governance accountability or transparency and disclosure maturity.

Post-investment, changes to these factors will be monitored, assessed and where appropriate engaged with. Where potential issues arise, the performance of an issuer is below expected, or when the reported data is incomplete to reach a conclusion, the Investment Manager will engage with the issuer to evaluate the performance. The Investment Manager will encourage investee companies to improve their good governance practices and disclosure as well as their end contribution to the social and climate related transformation.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation and the minimum share of sustainable investments?

The planned composition of the Fund's investments that are used to meet its sustainable investment objective are summarised below.

The Fund invests at least 80% of its assets in sustainable investments, which means included in **#1 Sustainable** are investments in securities issued by governments and companies worldwide, including emerging market countries, that contribute towards the UN SDG of taking action to combat climate change. The minimum proportion stated applies in normal market conditions.

**#2 Not sustainable** includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

### ● *How does the use of derivatives attain the sustainable investment objective?*

This question is not applicable for the Fund.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is no minimum extent to which the Fund's sustainable investments with an environmental objective are aligned with the Taxonomy. Consequently, taxonomy alignment of this Fund's investments has not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

At the date of this prospectus, it is not yet possible to commit to the Fund maintaining a minimum alignment with the Taxonomy, as the Investment Manager is currently not in a position to accurately determine to what extent the Fund's investments are in taxonomy-aligned environmentally sustainable activities. However, it is expected that the Fund invests in companies and economic activities that contribute to the environmental objectives of climate change mitigation and climate change adaptation within the meaning of the Taxonomy.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is 80%, which is the same amount as the Fund’s minimum share of sustainable investments. As stated above this Prospectus will be updated once it is possible in the Investment Manager’s opinion to accurately disclose to what extent the Fund’s sustainable investments with an environmental objective are aligned with the EU Taxonomy.

### What is the minimum share of sustainable investments with a social objective?

This question is not applicable for the Fund

### What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Not Sustainable** includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

### Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- *How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?*

This question is not applicable for the Fund.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***  
This question is not applicable for the Fund.
- ***How does the designated index differ from a relevant broad market index?***  
This question is not applicable for the Fund.
- ***Where can the methodology used for the calculation of the designated index be found?***  
This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund BlueOrchard Emerging Markets Impact Bond**

**Legal entity identifier:** **5493002UVX4QP10MYB39**

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good Governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?    |                                                                                                                   |                                                   |                                                                                                                                                                                                          |

|                                                                         | in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                   | <input type="checkbox"/>                          | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy                                                                          |
| <input checked="" type="checkbox"/>                                     | It will make a minimum of <b>sustainable investments with a social objective 50.00%</b>                           | <input type="checkbox"/>                          | with a social objective                                                                                                                                                                                  |
|                                                                         |                                                                                                                   | <input type="checkbox"/>                          | It promotes E/S characteristics, but <b>will not make any sustainable investments</b>                                                                                                                    |

The Fund commits to invest at least 80% of its assets in sustainable investments. Within this overall commitment, there is a minimum commitment to invest at least 5% of its assets in sustainable investments with an environmental objective and at least 50% of its assets in sustainable investments with a social objective.

## What is the sustainable investment objective of this financial product?

The Fund's sustainable investment objective is to invest its assets in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs by contributing positively towards social development and environmental themes. The Fund may also invest in investments that the Investment Manager deems to be neutral under its sustainability criteria, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Fund will invest in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as fixed and floating rate securities related to sustainable infrastructure projects and clean energy initiatives. Such issuers may be involved in activities such as micro, small, and medium enterprise (MSME) lending, affordable housing, affordable education, health, agriculture, clean energy, improvements in energy efficiency, renewable energy, green energy products and humanitarian relief activities, among others.

The Fund will help to advance one or more of the UN SDGs, including but not limited to: the end of poverty in all its forms; the provision of access to affordable, reliable, sustainable and modern energy; the provision of inclusive and sustainable economic growth, employment and decent work for all; the building of resilient infrastructure, promotion of sustainable infrastructure and fostering of innovation; and the reduction of inequality within and among countries.

The Investment Manager will select sustainable investments from a universe that have been determined as meeting the Investment Manager's impact criteria. The impact criteria include an assessment of the investment's contribution to the UN SDGs alongside the Investment Manager's assessment of impact via its proprietary scorecard. The investment process is aligned with the Operating Principles for Impact Management. No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

The Investment Manager is responsible for determining whether an investment meets the criteria of a sustainable investment. The Investment Manager considers the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective (as applicable). The output of the Investment Strategy outlined below is the production of the list of investments that meet the selection criteria, this represents the investment universe. Compliance with the minimum percentage in sustainable investments is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

The Investment Manager uses different sustainability indicators to measure the impact contribution. In particular, the Investment Manager uses a proprietary sustainability tool to analyse how the use of proceeds of social and sustainability bonds are contributing to job creation and how many jobs are created or maintained as a result of the bond's proceeds. There is a detailed impact assessment of every company and/or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a bond is expected to have. The Investment Manager considers different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment includes tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's or the bond's positive contribution over time via an annual review. Examples of the indicators include, but are not limited to, number of job opportunities created and maintained, number of beneficiaries reached (students, hospital patients), number of households reached (new water and sanitation connection, access to telecommunication network, affordable housing loans), number of micro/small/medium enterprises supported, CO2 emissions reduction, MWh of renewable energy generated, m3 of water savings or km of clean transportation infrastructure built or improved.

Once these steps have been completed, the bond's or the company's impact scorecard and the company's ESG scorecard (as applicable) are validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

More details on how the Investment Manager ensures that investments are made with the objective to generate a positive social or environmental impact alongside a financial return within the Fund are available at <https://www.schroders.com/en/global/individual/impact-investing/>

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund does not directly invest in the sectors included in BlueOrchard's Public Asset Exclusion List [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to

● **How have the indicators for adverse impacts on sustainability factors been taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages,

where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
    - **PAI 8** (Emissions to water)
    - **PAI 9** (Hazardous waste and radioactive waste ratio)
    - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
    - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
    - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
  - Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)
- Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process. PAIs are included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess and approve issuers for the strategy's sustainable investment universe. PAIs 1-14 are included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and will guide the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAI 1, 2, 12, 13:

We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and board gender diversity or unadjusted gender pay gap, which relate to PAI 12 and 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests its assets in (i) sustainable investments, which are investments that contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs by contributing positively towards social development and environmental themes, and (ii) investments that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager will select sustainable investments from a universe that have been determined as meeting the Investment Manager's impact criteria. The impact criteria include an assessment of an investment's contribution to the UN SDGs alongside the Investment Manager's assessment of impact and ESG via its proprietary impact investment management framework and tools (including impact and ESG scorecards).

The Fund is part of Schroders' Impact Driven strategies. As such, it applies highly selective investment criteria and its investment process is aligned with the Operating Principles for Impact Management which means that an assessment of impact is embedded in the steps of the investment process. All sustainable investments in the Fund are subject to this framework.

The Fund will invest in fixed and floating rate securities issued by governments, government agencies, supranationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as fixed and floating rate securities related to sustainable infrastructure projects and clean energy initiatives. Such issuers may be involved in activities such as micro, small, and medium enterprise (MSME) lending, affordable housing, affordable education, health, agriculture, clean energy, improvements in energy efficiency, renewable energy, green energy products and humanitarian relief activities, among others.

The Fund will help to advance one or more of the UN SDGs, including but not limited to: the end of poverty in all its forms; the provision of access to affordable, reliable, sustainable and modern energy; the provision of inclusive and sustainable economic growth, employment and decent work for all; the building of resilient infrastructure, promotion of sustainable infrastructure and fostering of innovation; and the reduction of inequality within and among countries.

The Fund does not directly invest in the sectors included in the below BlueOrchard Public Asset Exclusion List. [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund to seek to improve sustainability practices and enhance social and environmental impacts generated by underlying investee companies. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund invests at least two-thirds of its assets in fixed and floating rate securities denominated in various currencies and issued by governments, government agencies, supranationals and companies of emerging market countries.

The Fund may invest up to 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The Fund may also invest up to one third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The investment strategy of the Fund and the use of derivatives may lead to situations where it is considered appropriate that prudent levels of cash and Money Market Investments will be maintained, which may be substantial or even represent (exceptionally) 100% of the Fund's assets. This will be limited to a maximum of six months (otherwise the Fund will be liquidated). During this period, the Fund will not fall within the scope of MMFR. The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Investment Manager applies sustainability criteria when selecting investments for the Fund.

Investments are composed of bonds where the issuer's products and services, business activities or use of proceeds for a purpose bond contribute positively to at least one of the UN SDGs. In order to identify bond with a direct link to a UN SDG, the Investment Manager applies a two step approach:

- The first considers the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental or social objective (as applicable).
- The second is a detailed ESG and impact assessment of the company and/or bond (as applicable) via the completion of proprietary impact and ESG scorecards. The Investment Manager considers a range of ESG criteria and different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment typically includes Key Performance Indicators (KPIs) that are used to track the company's or the bond's positive contribution over time.

The impact and ESG scorecards are validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

Through this assessment, the Investment Manager selects bonds that it deems eligible in accordance with the Fund's investment objective and policy.

Due to the nature of its investments, and in particular the need for currency hedging, the Fund may also hold a portion of investments that the Investment Manager deems to be neutral under its sustainability criteria. These may include (but are not limited to) derivatives for hedging purposes, cash and Money Market Investments.

The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria. As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

For the purposes of this test, the potential investment universe is the core universe of issuers that the Investment Manager may select for the Fund prior to the application of sustainability criteria, in accordance with the other limitations of the Investment Objective and Policy. This universe is comprised of fixed and floating rate securities denominated in various currencies and issued by companies worldwide, including emerging market countries. The universe (for the purpose of this test only) does not include fixed or floating rate securities issued by public or quasi-public issuers.

### ● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The following binding elements are applied throughout the investment process:

- The Fund is actively managed and invests at least 80% of its assets in sustainable investments that contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs by contributing positively towards social development and environmental themes.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal, especially companies that generate revenues from tobacco production or any other part of the tobacco value chain (suppliers, distributors, licensors),

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

and companies that generate revenues from thermal coal mining and coal fired power generation. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Details of the revenue thresholds together with certain other exclusions the Fund applies are listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>. Further, the Fund does not directly invest in the sectors included in BlueOrchard Public Asset Exclusion List.

[https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

- The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.
- The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria.
- As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

### ● **What is the policy to assess good governance practices of the investee companies?**

The Investment Manager's proprietary framework includes an assessment of the good governance practices of each investment, including on factors such as a company's code of conduct and ESG incident screening. The good governance score represents at least 33% of the proprietary framework ESG scorecard's score and comprises topics such as business integrity, compliance with local regulation, corporate governance accountability or transparency and disclosure maturity.

Post-investment, changes to these factors will be monitored, assessed and where appropriate engaged with. Where potential issues arise, the performance of an issuer is below expected, or when the reported data is incomplete to reach a conclusion, the Investment Manager will engage with the issuer to evaluate the performance. The Investment Manager will encourage investee companies to improve their good governance practices and disclosure as well as their end contribution to the social and climate related transformation.

**Asset allocation** describes the share of investments in specific assets.

## **What is the asset allocation and the minimum share of sustainable investments?**

The planned composition of the Fund's investments that are used to meet its sustainable investment objective are summarised below. The Fund invests at least 80% of its assets in sustainable investments, which means included in **#1 Sustainable** are investments in securities issued by governments, government agencies, supranationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes. Within this overall commitment of 80%, there is a minimum commitment to invest at least 5% of its assets in sustainable investments with an environmental objective and at least 50% of its assets in sustainable investments with a social objective. The minimum proportions stated apply in normal market conditions.

**#2 Not sustainable** includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

● **How does the use of derivatives attain the sustainable investment objective?**

This question is not applicable for the Fund

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the EU Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 5% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of sustainable investments with a social objective?

The Fund commits to invest at least 50% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Not Sustainable includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

## Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- *How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Carbon Neutral Credit**

**As of 10 September 2026 the Fund's name will change to Schroder International Selection Fund Global Climate Transition Credit**

**Legal entity identifier:** **54930083X6X1LLU8U819**

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good Governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. For the time being, it does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?                                                                 |                                                                                                                                                                                                                                   |

## What is the sustainable investment objective of this financial product?

The Fund's sustainable investment objective is to aim to achieve aggregate carbon neutrality within its investment portfolio by investing its assets in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view will contribute towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) having Science Based Targets initiative (SBTi) decarbonisation targets; (iv) otherwise demonstrating a contribution to the reduction of carbon emissions (and companies within (iv) may include those that provide products or services which enable decarbonisation). The Fund may also invest in investments that the Investment Manager deems to be neutral under its sustainability criteria, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Aggregate carbon neutrality means achieving net zero carbon emissions intensity by balancing investments in (i) issuers that generate carbon emissions, but that have stated goals to reduce such emissions with (ii) issuers that contribute to reducing carbon emissions.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming. The Investment Manager seeks to ensure the objective of reducing carbon emissions is attained on an ongoing basis by investing in issuers as described in (i) – (iv) above. Companies from sectors with heavy scope 3 emissions are also required to have scope 3 emissions reduction targets or a commitment to reduce scope 3 emissions.

The Investment Manager periodically assesses whether an issuer's carbon reduction pathway is consistent with the criteria through which it earlier qualified for investment by the Fund and seeks to identify cases where it might deviate. The Investment Manager also seeks to identify situations where an issuer's emissions reduction targets did not keep pace with the emissions reduction trajectory for that sector and reviews any major changes in the emissions profile of an issuer, for example due to mergers or acquisitions. These considerations may lead to divestment by the Investment Manager.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

At the date of this Prospectus, it is not yet possible to commit to the Fund maintaining a minimum alignment with the Taxonomy, as the Investment Manager is currently not in a position to accurately determine to what extent the Fund's investments are in taxonomy-aligned environmentally sustainable activities. Taxonomy

alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio. However it is expected that the Fund invests in companies and economic activities that contribute to the environmental objectives of climate change mitigation and climate change adaptation within the meaning of the Taxonomy.

In future it is therefore expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

**As of 10 September 2026 the answer to this question will change to:**

The Fund aims to achieve income and capital growth by investing in at least 80% of its assets in fixed and floating rate securities issued by companies, governments, government agencies, and supra-nationals worldwide that in the Investment Manager's view contribute to global climate transition objectives, advance climate mitigation and adaptation efforts, or provide climate or nature solutions. The Fund may also invest in investments that the Investment Manager deems to be neutral under its sustainability criteria, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager employs a proprietary screening methodology, utilising in-house tools, research and external data sources (such as CDP, MSCI, ENCORE and Bloomberg), to identify sustainable investments that support global climate goals and the transition to a low-carbon economy. Investments must demonstrate a clear and measurable transition or enabling pathway, or contribute meaningfully to climate, environmental, or social improvements. Eligible issuers may include those reducing their own emissions, enabling others to reduce emissions, or those supporting climate adaptation or advancing nature or other environmental objectives. Investments are identified based on at least one of the following criteria:

- Issuers with credible transition plans addressing one or more sustainability factors
- Issuers with science-based targets or nature-related targets
- Issuers that provide climate solutions, nature solutions, or enabling activities
- Issuers contributing to climate change mitigation, resilience or adaptation
- Issuers focused on mitigating negative impacts on nature and biodiversity
- Issuers with partially or fully Taxonomy-eligible or Taxonomy-aligned economic activities or capital expenditure
- Green, social, or sustainable bonds financing environmental and social (including, but not limited to, just transition) projects

The Investment Manager periodically assesses whether an issuer's commitment to supporting global climate goals and the transition to a low-carbon economy is consistent with the criteria through which it earlier qualified for investment by the Fund and seeks to identify cases where it might deviate. These considerations may lead to divestment by the Investment Manager.

The Fund invests at least 5% of its assets in sustainable investments with an environmental objective that are aligned with the Taxonomy, including, but not limited to, climate change mitigation, climate change adaptation, the transition to a circular economy, and the protection and restoration of biodiversity and ecosystems.

● **What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?**

The Investment Manager is responsible for determining whether an investment meets the criteria of a sustainable investment. The Investment Manager uses specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective (as applicable). The output of the Investment Strategy outlined below is the production of the list of investments that meet the selection criteria, this represents the investment universe. Compliance with the minimum percentage in sustainable investments is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

The Investment Manager uses different sustainability indicators to measure the impact contribution at an investee company level. Examples of the indicators include, but are not limited to, achieved carbon emission reductions (Scope 1 and Scope 2) and/or absolute level of carbon intensity, decarbonization plans, and avoided emissions per company achieved through climate solutions initiatives.

**As of 10 September 2026 the above paragraph will change to:**

The Investment Manager uses a range of sustainability indicators to assess the contribution to an environmental objective at the investee company and issuer level, including credible transition plans, science-based targets, avoided emissions resulting from climate solution initiatives, and the extent of Taxonomy-aligned economic activities. Examples of the indicators include, but are not limited to: portfolio-level Paris alignment, carbon intensity, investments in green, social, and sustainable bonds, and investments aligned with the Taxonomy.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

● **How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. - The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● **How have the indicators for adverse impacts on sustainability factors been taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.

2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))

- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as a Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, one or more of PAIs 1, 2, 3, 5, and 6 are included. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint. Issuers identified as laggards may be selected for engagement. Among others, the Investment Manager may engage with selected issuers on topics such as reducing direct and indirect carbon footprint (related to PAIs 1, 2 and 3 covering GHG emissions). Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests its assets in (a) sustainable investments which are investments that in the Investment Manager's view will contribute towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions by or equivalent 2030; (iii) having Science Based Targets initiative (SBTi) decarbonisation targets; (iv) otherwise demonstrating a contribution to the reduction of carbon emissions; and (b) investments

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

***As of 10 September 2026 the above paragraph will change to:***

The Fund is actively managed and invests its assets in (a) sustainable investments, which are investments that in the Investment Manager's view contribute to global climate transition objectives, advance climate mitigation and adaptation efforts, or provide climate or nature solutions, and (b) investments that the Investment Manager deems to be neutral under its sustainability criteria such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The fund invests at least 20% of its assets in green, social, or sustainable bonds.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager may also engage with companies held by the Fund or from the investible universe to gain insights or request improvement on sustainability issues. More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund invests at least two-thirds of its assets in fixed and floating rate securities issued by companies, governments, government agencies and supra-nationals worldwide, including emerging market countries.

The Fund may invest:

- up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);

- up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds.

The Investment Manager believes that over the long term, companies that manage the risks and invest in the opportunities arising from climate change better than peers will not only experience fewer penalties, but capture financial and non-financial rewards by various stakeholders.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming.

***As of 10 September 2026 the above paragraph will no longer apply.***

The Investment Manager applies sustainability criteria when selecting investments for the Fund.

Issuers are assessed using a methodology that identifies companies that in the Investment Manager's view will contribute towards the objective of carbon emission reduction.

This methodology is data-driven, sourced from established environmental initiatives and data sources such as the CDP and the Science Based Targets initiative (SBTi), MSCI and other credible external and proprietary data sources.

The Investment Manager then screens the resulting universe for issuers it deems to have harmful and controversial practices defined by a specific list of exclusion criteria. The Investment Manager also conducts its own due diligence to identify issuers that do no significant harm to environmental or social objectives. Schroders' proprietary sustainability tools and external sustainability ratings are utilised to identify issuers with good governance.

The Investment Manager may also engage with companies to encourage carbon emission intensity reduction. This identifies new investment opportunities, and monitors whether a company's carbon intensity reduction plan is progressing.

Due to the nature of its investments, and in particular the need for currency hedging, the Fund may also hold a portion of investments that the Investment Manager deems to be neutral under its sustainability criteria. These may include (but are not limited to) derivatives for hedging purposes, cash and Money Market Investments.

The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria. As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

For the purposes of this test, the potential investment universe is the core universe of issuers that the Investment Manager may select for the Fund prior to the application of sustainability criteria, in accordance with the other limitations of the Investment Objective and Policy. This universe is comprised of fixed and floating rate securities denominated in various currencies and issued by companies worldwide, including emerging market countries. The universe (for the purpose of this test only) does not include fixed or floating rate securities issued by public or quasi-public issuers.

**As of 10 September 2026 the above seven paragraphs will change to:**

Issuers are assessed using a methodology that identifies issuers that in the Investment Manager's view contribute to global climate transition objectives, advance climate mitigation and adaptation efforts, or provide climate or nature solutions. This methodology is data-driven, sourced from established environmental initiatives and data sources such as the Carbon Disclosure Project (CDP), the Science Based Targets initiative (SBTi), MSCI, ENCORE, and Bloomberg, among other credible external and proprietary data sources and research.

The Investment Manager then screens the resulting universe for issuers it deems to have harmful and controversial practices defined by a specific list of exclusion criteria.

The Investment Manager may also engage with companies to encourage transition towards a more sustainable economy, and other environmental and social objectives. Through this process, the Investment Manager can identify potential investment opportunities and evaluate progress.

The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria. As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

For the purposes of this test, the potential investment universe is the core universe of issuers that the Investment Manager may select for the Fund prior to the application of sustainability criteria, in accordance with the other limitations of the Investment Objective and Policy. This universe is comprised of fixed and floating rate securities denominated in various currencies and issued by companies worldwide, including emerging market countries. The universe (for the purpose of this test only) does not include fixed or floating rate securities issued by public or quasi-public issuers.

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

The following binding elements are applied throughout the investment process:

- The Fund is actively managed and invests at least 80% of its assets in sustainable investments, which are investments that in the Investment Manager's view will contribute towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) having Science Based Targets initiative (SBTi) decarbonisation targets; and/ or (iv) otherwise demonstrating a contribution to the reduction of carbon emissions.

**As of 10 September 2026 the above paragraph will change to:**

The Fund is actively managed and invests at least 80% of its assets in sustainable investments, which are investments that in the Investment Manager's view contribute to global climate transition objectives, advance climate mitigation and adaptation efforts, or provide climate or nature solutions.

- The Fund commits to invest at least 20% of its assets in green, social, or sustainable bonds.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal, especially companies that generate revenues from tobacco production or from the tobacco value chain (such as suppliers, distributors, retailers and licensors) and companies that generate revenues from thermal coal mining and coal fired power generation. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Details of the revenue thresholds together with certain other exclusions the Fund applies are listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the Investment Manager's rating criteria.
- The Investment Manager ensures that at least 90% of the portion of the Fund's Net Asset Value composed of investments in companies is rated against the sustainability criteria.
- As a result of the application of sustainability criteria, at least 20% of the Fund's potential investment universe is excluded from the selection of investments.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation and the minimum share of sustainable investments?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its sustainable investment objective are summarised below. The Fund invests at least 80% of its assets in sustainable investments, which means included in **#1 Sustainable** are investments in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view will contribute towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) having Science Based Targets initiative (SBTi) decarbonisation targets; and/ or (iv) otherwise demonstrating a contribution to the reduction of carbon emissions. The minimum proportion stated applies in normal market conditions.

**As of 10 September 2026 the above paragraph will change to:**

The planned composition of the Fund's investments that are used to meet its sustainable investment objective are summarised below. The Fund invests at least 80% of its assets in sustainable investments, which means included in **#1 Sustainable** are investments in fixed and floating rate securities issued by companies, governments, government agencies and supra-nationals worldwide that in the Investment Manager's view contribute to global climate transition objectives, advance climate mitigation and adaptation efforts, or provide climate or nature solutions. The minimum proportion stated applies in normal market conditions.

**#2 Not sustainable** includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

\*\* As of 10 September 2026 this will change to 5.00%

\* As of 10 September 2026 this will change to 75.00%

### ● How does the use of derivatives attain the sustainable investment objective?

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainable investment objective.

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is no minimum extent to which the Fund's sustainable investments with an environmental objective are aligned with the Taxonomy. Consequently, taxonomy alignment of this Fund's investments has not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

At the date of this prospectus, it is not yet possible to commit to the Fund maintaining a minimum alignment with the Taxonomy, as the Investment Manager is currently not in a position to accurately determine to what extent the Fund's investments are in taxonomy-aligned environmentally sustainable activities. However it is expected that the Fund invests in companies and economic activities that contribute to the environmental objectives of climate change mitigation and climate change adaptation within the meaning of the Taxonomy.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### **As of 10 September 2026 the answer to this question will change to:**

The Fund invests at least 5% of its assets in sustainable investments with an environmental objective that are aligned with the Taxonomy, including, but not limited to, climate change mitigation, climate change adaptation, the transition to a circular economy, and the protection and restoration of biodiversity and ecosystems. These investments include fixed and floating rate securities issued by companies, governments, government agencies and supra-nationals worldwide.

In respect of investee companies that are non-financial undertakings, the degree to which investments are in environmentally sustainable economic activities is measured primarily by reference to the turnover of the investee companies. Turnover reflects the current proportion of revenues derived from environmentally sustainable economic activities and therefore provides an objective measure of a company's existing sustainable economic output. In addition, given the characteristics of the Fund, the degree to which investments are in environmentally sustainable economic activities may also be assessed by reference to capital expenditure (CapEx) or operating expenditure (OpEx), where appropriate. This reflects the Fund's focus on forward-looking transition characteristics and the financing of activities that are expected to become Taxonomy-aligned over time. For example, use-of-proceeds bonds typically finance capital expenditure; therefore, CapEx may be considered an appropriate measure when assessing the Taxonomy alignment of such investments. The use of CapEx or OpEx is considered appropriate because these metrics capture financial commitments to environmentally sustainable economic activities that may not yet be reflected in current turnover.

Where information on the degree to which investments are in environmentally sustainable economic activities is not readily available through public disclosures by investee companies, the Investment Manager will seek to obtain equivalent information directly from investee companies or from third-party providers. In such cases, reasonable estimates may be used.

The Fund may also invest in assets that are not Taxonomy-aligned. This may be because certain investments do not contribute to, or do not report sufficient data to demonstrate contribution to, an environmentally sustainable objective under the Taxonomy, and because the Fund invests on a global basis. The Investment Manager also undertakes additional environmental analysis as part of the investment process.

The Fund will ensure that at least 5% of its investments are Taxonomy-aligned, regardless of the proportion of sovereign bonds within the Fund's portfolio. However, some of these investments may include sovereign bonds, to the extent that they are use-of-proceeds bonds and the Investment Manager has assessed them as contributing to environmentally sustainable economic activities.

Compliance of these investments with the requirements laid down in the Taxonomy will not be subject to an assurance provided by one or more auditors or a review by one or more third parties.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No\*

**\* As of 10 September 2026 the answer to this question will change to "yes" in respect of "in nuclear energy"**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

As of 10 September 2026 the above charts will change to:

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**As of 10 September 2026 the answer to this question will change to:**

The aggregate minimum share of investments in transitional and enabling activities is 1%.

emission levels corresponding to the best performance.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is 80%, which is the same amount as the Fund’s minimum share of sustainable investments. As stated above this Prospectus will be updated once it is possible in the Investment Manager’s opinion to accurately disclose to what extent the Fund’s sustainable investments with an environmental objective are aligned with the EU Taxonomy.

**As of 10 September 2026 the answer to this question will change to:**

The minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy is 75%.

However, it is important to note that a lack of reported alignment does not necessarily mean the absence of environmentally sustainable activities. Some companies may in fact conduct taxonomy eligible activities but do not yet disclose taxonomy data under the EU’s reporting requirements. As a result, the proportion of investments associated with taxonomy eligible activities may be higher than what may be reported.

are environmentally sustainable investments that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### What is the minimum share of sustainable investments with a social objective?

This question is not applicable for the Fund.

### What investments are included under “#2 Not sustainable”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Not Sustainable includes investments that are treated as neutral for sustainability purposes, such as cash and Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards are applied where relevant to Money Market Investments and derivatives used with the aim of reducing risk (hedging) by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

### Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

- **How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?**

This question is not applicable for the Fund.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***  
This question is not applicable for the Fund.
- ***How does the designated index differ from a relevant broad market index?***  
This question is not applicable for the Fund.
- ***Where can the methodology used for the calculation of the designated index be found?***  
This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund China A All Cap**

**Legal entity identifier:** **5493000BXUD89QY9M71**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                                       |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI China A Onshore (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI China A Onshore (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI China A Onshore (Net TR) index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).

- Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom-up stock analysis at a company level. The Asian Equities investment team uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schrodgers PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in a concentrated range of equity and equity related securities of Chinese companies listed and traded on Chinese stock exchanges such as Shenzhen or Shanghai Stock Exchanges (China A-Shares). The Fund typically holds 30 – 50 companies.

The Fund may invest in a broad range of companies regardless of market capitalisations.

The Fund may invest up to 100% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor ("QFI") scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may invest up to 10% of its assets in offshore listed Chinese companies and up to 10% of its assets in the offshore listing of dual-listed Chinese A-Share companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI China A Onshore (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

In the selection and assessment of potential investment opportunities and holdings, companies are assessed on a stakeholder-based approach against criteria including, but not limited to (1) good governance practices; (2) impact on the environment and local communities; and (3) fair and equitable treatment of employees, suppliers and customers. Information and insights derived from Schrodgers' proprietary sustainability tools are utilised in this assessment and due diligence process.

The Investment Manager's proprietary analysis and ongoing engagement with companies may also help it derive a reasonable level of conviction that concrete steps will be or are being taken to transition out of business segments or practices that have not met the sustainability criteria or to improve on their relevant areas of weakness. The Investment Manager may consider these companies eligible for investment ahead of seeing changes in the company's ratings and rankings across both internal and external evaluation metrics.

The primary sources of information used to perform the analysis include the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,
- is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI China A Onshore (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

- What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund’s investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund’s assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI China A Onshore (Net TR) index, and so the Fund’s investments that are scored by Schroders’ proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund’s sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tool and so do not contribute towards the Fund’s sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

This question is not applicable for the Fund.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund China Local Currency Bond**

**Legal entity identifier:** **HPREJ5FHRTOCLC11ND15**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input type="radio"/> Yes                                                                                                                                                                                                                                                                                                                                                                                                                                             | <input checked="" type="radio"/> <input type="radio"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the iBoxx ALBI China Onshore index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the iBoxx ALBI China Onshore index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the iBoxx ALBI China Onshore index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

### What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons))
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

Compliance with these thresholds is monitored via the Investment Manager’s portfolio compliance framework. Integration in issuer analysis / investment process

PAIs are also considered through integration in the investment process as Schroders’ proprietary tools incorporate several PAIs as a component of its scoring methodology. For example, within a Schroders’ proprietary tool, PAIs related to carbon footprint and greenhouse gas emissions (PAIs 1, 2, 3, 4, 5 and 15) and PAI 7 (Activities negatively affecting biodiversity-sensitive areas) are included in assessing an issuer’s overall environmental score, while PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) are included in assessing an issuer’s overall social score.

The combination of the Investment Manager’s fundamental and quantitative analysis helps to provide a comprehensive view on ESG factors on a country, sector and issuer level.

That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to

active ownership.

The Investment Manager may engage with selected issuers held in the Fund, with a primary focus on corporate engagements relating to PAIs 1, 2, 3, 4, 5, 12, 13 and 15. For each issuer, the Investment Manager assesses and identifies the most relevant topics for engagement based on Schroders' proprietary tools, data from external data providers, and in-house analysis.

We also aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2, 15).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities, convertible bonds and Money Market Investments denominated or hedged back to onshore RMB (CNY).

These instruments may be issued outside or inside of mainland China by governments, government agencies, supra-nationals and companies which may or may not be established or incorporated in mainland China across sectors and credit quality. The Fund may also invest in fixed income securities denominated in offshore RMB (CNH).

The Fund may invest up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The Fund may invest in instruments traded on the RMB Bond market in Hong Kong and in instruments denominated in RMB traded on other Regulated Markets.

The Fund may invest up to 100% of its assets directly in mainland China through (i) QFI schemes or QFII related schemes supervised by the China Securities Regulatory Commission provided investment restriction is complied with and/or they qualify as Investment Funds and (ii) Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

Investments in mainland China Regulated Markets and interbank bond markets may also be performed indirectly through notes, certificates or other instruments (which qualify as transferable securities and do not embed a derivative element), open-ended Investment Funds and eligible financial derivative instruments.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the iBoxx ALBI China Onshore index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- the exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- the inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,
- is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the iBoxx ALBI China Onshore index based on the Investment Manager’s rating criteria.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprise Schroders’ ‘global norms’ breach list. Further, the Fund may apply other exclusions as listed under “Sustainability-Related Disclosure” on the Fund’s webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager’s rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## **What is the asset allocation planned for this financial product?**

The planned composition of the Fund’s investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund’s assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the iBoxx ALBI China Onshore index, and so the Fund’s investments that are scored by Schroders’ proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund’s sustainability score (whether such individual investment has a positive or a negative score). The minimum proportion stated in #1 applies in normal market conditions. The actual proportion is expected to be higher.

**#2 Other** includes cash, which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately

disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:  
☐ In fossil gas ☐ In nuclear energy  
☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable for the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What is the minimum share of socially sustainable investments?

This question is not applicable for the Fund.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash, which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund China Opportunities**

**Legal entity identifier:** **CON8ADEN6LBWQO6J6710**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI China (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI China (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI China (Net TR) index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment (i) demonstrates a net positive across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNG) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).

- Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom-up stock analysis at a company level. The Asian Equities investment team uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schrodgers PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schrodgers.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two thirds of its assets in equity and equity-related securities of Chinese companies.

The Fund may invest directly in China H-Shares and may invest less than 50% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through:

- Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect;
- the Qualified Foreign Investor (QFI) Scheme;
- shares listed on the STAR Board and the ChiNext; and
- Regulated Markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI China (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

In the selection and assessment of potential investment opportunities and holdings, companies are assessed on a proprietary stakeholder-based approach against criteria including, but not limited to (1) good governance practices; (2) impact on the environment and local communities; and (3) fair and equitable treatment of employees, suppliers and customers. Information and insights derived from Schrodgers' proprietary sustainability tools are utilised in this assessment and due diligence process.

The Investment Manager's proprietary analysis and ongoing engagement with these companies may also help it derive a reasonable level of conviction that concrete steps will be or are being taken to transition out of business segments or practices that have not met the sustainability criteria or improve on their relevant areas of weakness. The Investment Manager may consider these companies eligible for investment ahead of seeing changes in the company's ratings and rankings across both internal and external evaluation metrics.

The primary sources of information used to perform the analysis include the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI China (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI China (Net TR) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with The EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Dynamic Income**

**Legal entity identifier:** **6367003LO6P8ZSCB6R06**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| <p><b>Sustainable investment</b> means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p>                                                                                                                                                                                                   | <p><b>Does this financial product have a sustainable investment objective?</b></p> <p> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b> <input checked="" type="radio"/> <input type="checkbox"/> <b>No</b> </p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <p>The <b>EU Taxonomy</b> is a classification system laid down in Regulation (EU) 2020/852, establishing a list of <b>environmentally sustainable economic activities</b>. ## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) do not take into account the environmental and social characteristics promoted by the Fund. The blend will evolve over time in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the blend of the named benchmarks by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the blend of the named benchmarks that reflects the Fund's asset allocation. Both scores are based on month-end data over the previous six month period. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions,

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is monitored daily via our automated compliance controls.

The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/ or social benefits such as greater water access or fair pay and reducing environmental, and/ or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/ or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

1. Quantitative: this includes indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.

2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Fund allocates its assets across multiple underlying strategies. Some PAIs are considered at the Fund level, whilst other PAIs are considered at the level of the underlying strategies by the relevant investment manager where applicable.

Some PAIs are considered as part of pre-investment through the application of exclusions applied at the Fund level. These include:

- Controversial weapons (PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

Where appropriate PAIs are also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considers PAIs in the following way:

- Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 (Greenhouse gas emissions) are included. In assessing an issuer's overall social score, PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) are included.

The investment team monitors all PAI indicators via Schroders' PAI dashboard.

Other PAIs are considered via active ownership, which where relevant is performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs are considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests directly or indirectly through derivatives in equity and equity-related securities, fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide including emerging markets in various currencies and Alternative Asset Classes (subject to any restrictions provided in Appendix I).

The Fund may invest:

- up to 40% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in sub-investment grade securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities.
- up to 30% of its assets in emerging markets.
- up to 20% of its assets in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).
- Up to 15% of its assets in Alternative Asset Classes

Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The Fund may invest directly in China H-Shares and may invest less than 15% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext. The Fund may also invest up to 10% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The exposure to Alternative Asset Classes is taken through eligible assets as described in Appendix III of this Prospectus.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund may invest in Money Market Investments and hold cash. The Fund may invest up to 10% of its assets in open-ended Investment Funds.

The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD), based on the Investment Manager's rating system.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. The investable universe is assessed using a number of proprietary tools, as well as external rating services.

The Investment Manager will assess companies against a variety of environmental, social and governance metrics, taking into account issues such as climate change, environmental performance, labour standards and board composition. The Investment Manager will decide whether an investment is eligible for inclusion taking into account the overall ESG score. The multi-asset nature of the Fund means that the Investment Manager will analyse the ESG scores across asset classes as an input into the asset allocation of the Fund. The Investment Manager may select investments, which it deems to contribute to one or more environmental or social objectives, provided that they do no significant harm to any other environmental or social objectives.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en/lu/private-investor/strategic-capabilities/sustainability/disclosures>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD), based on the Investment Manager's rating system.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.

- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD), and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives such as equity index futures may be used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives may therefore be used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately

disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:  
☐ In fossil gas ☐ In nuclear energy  
☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with The EU Taxonomy?

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tools and so do not contribute towards the Fund's sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Dynamic Opportunities**

**Legal entity identifier:** **5493002E4JUCFUL6QF10**

## Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                                       |

|                                                                                                                          | <input type="checkbox"/> It promotes E/S characteristics, but <b>will not make any sustainable investments</b>                                                                                                                                        |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system.

The component benchmarks (which are each respectively a broad market index) do not take into account the environmental and social characteristics promoted by the Fund.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the blend of the named benchmarks by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the blend of the named benchmarks that reflects the Fund's asset allocation. . Both

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

scores are based on month-end data over the previous six-month period. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/or (ii) whether the asset is classified as a green, social and/or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
    - **PAI 8** (Emissions to water)
    - **PAI 9** (Hazardous waste and radioactive waste ratio)
    - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
    - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
    - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
  - Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Fund allocates its assets across multiple underlying strategies. Some PAIs are considered at the Fund level, whilst other PAIs are considered at the level of the underlying strategies by the relevant investment manager where applicable.

Some PAIs are considered as part of pre-investment through the application of exclusions applied at the Fund level. These include:

- Controversial weapons (PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

Where appropriate PAIs are also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considers PAIs in the following way:

- Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 are included. In assessing an issuer's overall social score, PAIs 12 and 13 are included.

The investment team monitors all PAI indicators via Schroders' PAI dashboard.

Other PAIs are considered via active ownership, which where relevant is performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs are considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests directly, or indirectly through derivatives, in equity and equity-related securities, fixed income securities and Alternative Asset Classes (subject to any restrictions provided in Appendix I).

Fixed income securities include fixed or floating rate securities such as government bonds, corporate bonds, emerging market debt, directly or indirectly (including via credit default swaps and credit default swap indices) in sub-investment grade (fixed and floating rate) securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies), convertible bonds and inflation linked bonds.

The Fund may invest up to 20% of its assets indirectly in commodities. The exposure to Alternative Asset Classes is taken through eligible assets as described in Appendix III of this Prospectus.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk, mitigating losses in falling markets or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, total return swaps and contracts for difference will be used on a continuous basis to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fund may (exceptionally) hold up to 100% of its assets in cash and Money Market Investments. This will be limited to a maximum of six months (otherwise the Fund will be liquidated). During this period, the Fund will not fall within the scope of MMFR. The Fund may invest up to 10% of its assets in open-ended Investment Funds.

The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. The investable universe is assessed using a number of proprietary tools, as well as external rating services.

The Investment Manager will assess companies against a variety of environmental, social and governance metrics, taking into account issues such as climate change, environmental performance, labour standards and board composition. The Investment Manager will decide whether an investment is eligible for inclusion taking into account the overall ESG score. The multi-asset nature of the Fund means that the Investment Manager will analyse the ESG scores across asset classes as an input into the asset allocation of the Fund.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

90% of the portion of the NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

75% of the portion of the NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than a bespoke asset-weighted blend\* of the of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR) based on the Investment Manager's rating criteria.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

- The Investment Manager ensures that at least:

90% of the portion of the NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

75% of the portion of the NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries, is rated against the sustainability criteria.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable to the Fund.

- **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than a bespoke asset-weighted blend\* of the of MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), Thomson Reuters Global Convertible Bonds Index (hedged to EUR), and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

\*The blend will evolve over time in line with the actual asset allocation of the Fund.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's

management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives such as equity index futures may be used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives may therefore be used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

☒ No

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### ● What is the minimum share of investments in transitional and enabling activities?

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Europe**

**Legal entity identifier:** **84NPEABGB2F20908EG57**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR), based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR) by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI EFM Europe + CIS (E+C) Index (Net TR) in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders.

Compliance with this is monitored daily via our automated compliance controls.

The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - PAI 7 (Activities negatively affecting biodiversity-sensitive areas)
  - PAI 8 (Emissions to water)
  - PAI 9 (Hazardous waste and radioactive waste ratio)
  - PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
  - Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
  - Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).
- Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, one of Schroders proprietary tools is the main repository for the team's ESG analysis. The tool provides a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from traditional and alternative data sources that assess a company's performance in specific areas.

PAIs 1,2,3 (Greenhouse gas emissions), 9 (Hazardous waste and radioactive waste ratio) and 13 (Board gender diversity) are specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 (Emissions to water) and 12 (Unadjusted gender pay gap) the availability of data is very limited, so this is monitored at the overall portfolio level.

All PAI indicators are monitored via Schroders PAI dashboard. We review the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3) and procuring renewable energy (PAI 5). Further topics of engagement may include board gender diversity, which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies in emerging markets.

The Fund is actively managed and invests at least two-thirds of its assets in a concentrated portfolio of equity and equity related securities of Central and Eastern European companies, including the markets of the former Soviet Union and the Mediterranean emerging markets. The Fund may also invest in equity and equity related securities of North African and Middle Eastern companies.

The Fund typically holds 30-50 companies.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR), based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The Investment Manager performs due diligence on potential holdings, including meetings with management, and assesses the company's governance, environmental and social profile across a range of factors. This process is supported by quantitative analysis provided by Schroders' proprietary sustainability tools, which are key inputs to assess how existing and potential investments for the portfolio are meeting the Fund's sustainability criteria.

In some cases, companies which fall below the sustainability criteria may still be eligible for investment if, as a result of proprietary analysis and ongoing engagement with management, the Investment Manager believes the company will meet its sustainability criteria within a realistic time horizon.

For a company to be eligible to be held in the Fund, it is expected to show a commitment to its stakeholders, including customers, employees, suppliers, shareholders and regulators. The Fund selects companies whose businesses demonstrate good governance and aim to treat stakeholders equitably.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data and reports.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

90% of the portion of the NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

75% of the portion of the NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

- **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below. The Fund will not include or consider the Russian equities and equity related securities within the X9 and Y9 share classes in relation to the promotion of its environmental and/or social characteristics.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR), and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

This question is not applicable for the Fund.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Market Bond**

**Legal entity identifier:** **3NX0X12IEEAKV8XWQF13**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

☒ ☐ **Yes**

- ☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_\_%**
- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of **sustainable investments with a social objective \_\_\_%**

☒ ☐ **No**

- ☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of \_\_\_% of sustainable investments
- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective
- ☒ It promotes E/S characteristics, but **will not make any sustainable investments**

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the JP Morgan Emerging Market Blend Equal Weighted index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the JP Morgan Emerging Market Blend Equal Weighted index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the JP Morgan Emerging Market Blend Equal Weighted index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

### ● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager’s portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders’ proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer’s overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2), procuring renewable energy (PAI 5).

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers, but nonetheless we aim to engage with sovereign and supranational issuers on a periodic basis, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The

Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in various currencies and issued by governments, government agencies, supra-nationals and companies from the emerging markets.

The Fund may invest:

- up to 20% of its assets in asset-backed securities and mortgage-backed securities; and
- in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fund may invest up to 10% of its assets in mainland China through the Qualified Foreign Investor ("QFI") scheme or Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund intends to use derivatives (including total return swaps) with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis including but not limited to periods of rising inflation or increases in interest rates. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on fixed and floating rate securities. The gross exposure of total return swaps and contracts for difference will not exceed 5% and is expected to remain within the range of 0% to 5% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund maintains a higher overall sustainability score than the JP Morgan Emerging Market Blend Equal Weighted index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed throughout both sovereign and credit allocation decisions.

In assessing sustainability factors for sovereign issuers, the Investment Manager considers that countries with stable and non-corrupt governments are likely to be more willing and able to service their debts, while political considerations, including the impact of social and governance factors, can influence a country's inflation and currency profile and thus have a material impact on the real value of debt. Environmental impacts – which can be more pertinent over a longer-term horizon – are also incorporated. Countries are appraised for ESG factors during both the fundamental and quantitative stages of the process. The Investment Manager's approach includes the use of Schroders' proprietary sustainability tools to rank countries by measuring their performance against multiple sustainability related indicators.

Corporate issuers are also assessed across a range of environmental, social and governance factors. The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. Issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct will generally be excluded.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the JP Morgan Emerging Market Blend Equal Weighted Index based on the Investment Manager's rating criteria.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the JP Morgan Emerging Market Blend Equal Weighted index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable for the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What is the minimum share of socially sustainable investments?

This question is not applicable for the Fund.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets**

**Legal entity identifier:** **BDU06UKEHWLI0JDDWF68**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                             |                                                                                                                                 |                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Sustainable investment</b> means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p> | <p><b>Does this financial product have a sustainable investment objective?</b></p>                                              |                                                                                                                                                                                                                                                              |
|                                                                                                                                                                                                                                                                                                             | <p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b></p>                    | <p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b></p>                                                                                                                                                  |
|                                                                                                                                                                                                                                                                                                             | <p><input type="checkbox"/> It will make a minimum of <b>sustainable investments with an environmental objective: __%</b></p>   | <p><input checked="" type="checkbox"/> It <b>promotes Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it will have a minimum proportion of <b>25.00%</b> of sustainable investments</p> |
|                                                                                                                                                                                                                                                                                                             | <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p>        | <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p>                                                                                                     |
|                                                                                                                                                                                                                                                                                                             | <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> | <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p>                                                                                   |
|                                                                                                                                                                                                                                                                                                             | <p><input type="checkbox"/> It will make a minimum of <b>sustainable investments with a social objective __%</b></p>            | <p><input checked="" type="checkbox"/> with a social objective</p>                                                                                                                                                                                           |
|                                                                                                                                                                                                                                                                                                             |                                                                                                                                 | <p><input type="checkbox"/> It promotes E/S characteristics, but <b>will not make any sustainable investments</b></p>                                                                                                                                        |

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI Emerging Markets (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets (Net TR) index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders.

Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and

compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tool provides a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 are specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data is very limited so it is not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators are monitored via Schroders PAI dashboard. We review the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies in emerging markets.

The Fund may invest directly in China H-Shares and may invest less than 20% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The Investment Manager performs due diligence on potential holdings, including meetings with management, and assesses the company's governance, environmental and social profile across a range of factors. This process is supported by quantitative analysis provided by Schroders' proprietary sustainability tools, which are key inputs to assess how existing and potential investments for the portfolio are meeting the Fund's sustainability criteria. In some cases, companies which fall below the sustainability criteria may still be eligible for investment if, as a result of proprietary analysis and ongoing engagement with management, the Investment Manager believes the company will meet its sustainability criteria within a realistic time horizon.

For a company to be eligible to be held in the Fund, it is expected to show a commitment to its stakeholders, including customers, employees, suppliers, shareholders and regulators. The Fund selects companies whose businesses demonstrate good governance and aim to treat stakeholders equitably.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data and reports.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets ex China**

**Legal entity identifier:** **636700J6JW0DW2LOUW56**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets ex China 10/40 (Net TR) index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>

The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.

The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosures" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant, investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
    - **PAI 8** (Emissions to water)
    - **PAI 9** (Hazardous waste and radioactive waste ratio)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack

of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tool provides a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 are specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data is very limited so it is not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators are monitored via Schroders PAI dashboard. We review the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies in emerging markets.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage, accessed via <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The Investment Manager performs due diligence on potential holdings, including meetings with management, and assesses the company's governance, environmental and social profile across a range of factors. This process is supported by quantitative analysis provided by Schroders' proprietary sustainability tools, which are key inputs to assess how existing and potential investments for the portfolio are meeting the Fund's sustainability criteria. In some cases, companies which fall below the sustainability criteria may still be eligible for investment if, as a result of proprietary analysis and ongoing engagement with management, the Investment Manager believes the company will meet its sustainability criteria within a realistic time horizon.

For a company to be eligible to be held in the Fund, it is expected to show a commitment to its stakeholders, including customers, employees, suppliers, shareholders and regulators. The Fund selects companies whose businesses demonstrate good governance and aim to treat stakeholders equitably.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data and reports.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage:

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of investments in equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of investments in equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability -Related Disclosures" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.
- The Investment Manager ensures that at least:
  - 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries, is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What is the minimum share of socially sustainable investments?**

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

**What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?**

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets Debt Total Return**

**Legal entity identifier:** **TLC5LFN105XXSK6FZ338**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input type="radio"/> Yes                                                                                                                                                                                                                                                                                                                       | <input checked="" type="radio"/> <input type="radio"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

### ● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement.

PAIs are considered as part of pre-investment through the application of exclusions. These include: Schroders firmwide exclusions regarding:

- Controversial weapons: PAI 14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

Compliance with these thresholds is monitored via the Investment Manager’s portfolio compliance framework. PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as currently there is limited PAI data available. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

However, as part of the investment process, a Schroders’ proprietary tool is used which incorporates some of the PAIs as part of its scoring methodology. The combination of the Investment Manager’s fundamental and quantitative analysis helps to provide a comprehensive view on ESG factors at a regional and country level. This pertains to PAIs related to greenhouse gas emissions (PAIs 1, 2, 3, 4, 5 and 15), PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water) and PAI 9 (Hazardous waste and radioactive waste ratio).

PAIs are also considered post-investment through engagement. The Investment Manager may engage with selected issuers held in the Fund, with a primary focus on sovereign engagements relating to PAIs 1, 2, 3, 4, 5, 7, 8, 9 and 15. The Investment Manager uses a Schroders’ proprietary tool and data from external data providers in order to identify, assess and monitor environmental topics for engagement. Further topics for engagement may

include a government's social agenda, social inequality and education spending which relate to PAI 12 (Unadjusted gender pay gap), PAI 13 (Board gender diversity) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be (as applicable) in the Fund's annual report.

☐ No

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities, currencies and Money Market Investments in emerging markets. The fixed and floating rate securities are issued by governments, government agencies, supra-nationals and companies. The Fund may also hold cash.

In exceptional circumstances during periods of high market volatility, the Fund may hold up to 40% of its assets in deposits and Money Market Investments in developed markets. In such instances, the two-thirds referenced above will be measured against the Fund's assets excluding deposits and Money Market Investments in developed markets.

The Fund may invest in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in fixed and floating rate securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The Fund may invest up to 15% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds and warrants.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed across both sovereign markets and credit allocation decisions.

The Investment Manager assesses sovereign issuers across a range of environmental, social and governance factors, via the use of Schroders' proprietary sustainability tools which ranks countries by measuring their performance against multiple sustainability-related indicators. In addition, the Investment Manager conducts qualitative analysis, which includes the use of information published by sovereigns and third party data, on ESG factors at a regional and country level to further enhance oversight and understanding. Countries that score below a predetermined threshold, determined by Schroders' proprietary sustainability tools and the analysis undertaken by the Investment Manager, will generally be excluded.

Corporate issuers are also assessed across a range of environmental, social and governance factors. The primary sources of information used to perform corporate analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the issuers, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries, is rated against the sustainability criteria.

For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index based on the Investment Manager's rating criteria.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable for the Fund.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

This question is not applicable for the Fund.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets Equity Alpha**

**Legal entity identifier:** **549300QYA30ZZ7L4GT17**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

| <input checked="" type="radio"/> <input type="radio"/> | Yes                                                                                                                                                                                                                                                                                                                                                            | <input checked="" type="radio"/> <input type="radio"/> | No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool. The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective(s).

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Emerging Markets (Net TR) index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/oursustainable-investment-policies-disclosures-voting-reports/group-exclusions/>

The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.

The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosures" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant, investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
    - **PAI 8** (Emissions to water)
    - **PAI 9** (Hazardous waste and radioactive waste ratio)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack

of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tool provides a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1,2,3,9,13 are specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data is very limited so it is not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level.

All PAI indicators are monitored via Schroders PAI dashboard. We review the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs. For example, we aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2,3), procuring renewable energy (PAI 5) and further topics of engagement may include board gender diversity which relates to PAI 13.

Where issuers are flagged on lack of data availability on PAIs, the Investment Manager may engage with issuers where the primary focus is to increase reporting, quality and availability of PAI data.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in equity and equity related securities of companies in emerging and frontier market countries worldwide.

'Alpha' funds invest in companies in which the Investment Manager has a high conviction that the current share price does not reflect the future prospects for that business.

The Fund may invest directly in China H-Shares and may invest less than 20% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash (subject to the restrictions provided in Appendix I).

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The Investment Manager performs due diligence on potential holdings, including meetings with management, and assesses the company's governance, environmental and social profile across a range of factors. This process is supported by quantitative analysis provided by Schroders' proprietary sustainability tools, which are key inputs to assess how existing and potential investments for the portfolio are meeting the Fund's sustainability criteria. In some cases, companies which fall below the sustainability criteria may still be eligible for investment if, as a result of proprietary analysis and ongoing engagement with management, the Investment Manager believes the company will meet its sustainability criteria within a realistic time horizon.

For a company to be eligible to be held in the Fund, it is expected to show a commitment to its stakeholders, including customers, employees, suppliers, shareholders and regulators. The Fund selects companies whose businesses demonstrate good governance and aim to treat stakeholders equitably.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data and reports.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability -Related Disclosures" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.
- The Investment Manager ensures that at least:
  - 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries, is rated against the sustainability criteria.

### ● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

### ● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

**Good governance** practices include sound management structures, employee

**Asset allocation**  
describes the share of  
investments in  
specific assets.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund’s investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund’s assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI Emerging Markets 10/40 (Net TR) index, and so the Fund’s investments that are scored by Schroders’ proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund’s sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as measured by Schroders’ proprietary tool and/or (ii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tool and so do not contribute towards the Fund’s sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets Hard Currency**

**Legal entity identifier:** **BQ06LZ4B1MG3TDTW7G43**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input checked="" type="radio"/> Yes                                                                                                                                                                                                                                                                                                                                                                                                                                  | <input checked="" type="radio"/> <input type="radio"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the JP Morgan EMBI Global Diversified index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the JP Morgan EMBI Global Diversified index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the JP Morgan EMBI Global Diversified index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

### What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager’s portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders’ proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer’s overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2), procuring renewable energy (PAI 5).

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers, but nonetheless we aim to engage with sovereign and supranational issuers on a periodic basis, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The

Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## What investment strategy does this financial product follow?

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in hard currencies and issued by governments, government agencies, supra-nationals and companies from the emerging markets. Hard currency denominated securities refers to securities denominated in US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc.

The Fund may invest:

- up to 20% of its assets in asset-backed securities and mortgage-backed securities;
- in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for nonrated bonds); and
- up to 20% of its assets in securities issued by companies.

The Fund may invest in mainland China through the Qualified Foreign Investor ("QFI") scheme or Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to periods of rising inflation or increases in interest rates.

Contracts for difference and total return swaps are intended to be used to gain long and short exposure on fixed and floating rate securities. The gross exposure of total return swaps and contracts for difference will not exceed 10% and is expected to remain within the range of 0% to 5% of the Net Asset Value. In certain circumstances this proportion may be higher.

The Fund maintains a higher overall sustainability score than the JP Morgan EMBI Global Diversified index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed throughout both sovereign and credit allocation decisions.

In assessing sustainability factors for sovereign issuers, the Investment Manager considers that countries with stable and non-corrupt governments are likely to be more willing and able to service their debts, while political considerations, including the impact of social and governance factors, can influence a country's inflation and currency profile and thus have a material impact on the real value of debt. Environmental impacts – which can be more pertinent over a longer-term horizon – are also incorporated. Countries are appraised for ESG factors during both the fundamental and quantitative stages of the process. The Investment Manager's approach includes the use of Schroders' proprietary sustainability tools to rank countries by measuring their performance against multiple sustainability related indicators.

Corporate issuers are also assessed across a range of environmental, social and governance factors. The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. Issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct will generally be excluded. The primary sources of information used to perform this analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. For corporate issuers, the Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the JP Morgan EMBI Global Diversified index based on the Investment Manager's rating criteria.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage [https://www.schroders.com/en-lu/lu/individual/fund-centre\\_](https://www.schroders.com/en-lu/lu/individual/fund-centre_).
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the **JP Morgan EMBI Global Diversified** index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

## ● How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

## To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable for the Fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What is the minimum share of socially sustainable investments?

This question is not applicable for the Fund.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- **How does the designated index differ from a relevant broad market index?**  
This question is not applicable for the Fund.
- **Where can the methodology used for the calculation of the designated index be found?**  
This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets Local Currency Bond**

**Legal entity identifier:** **549300V3X0D0HRKP2Z47**

## Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                           |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the JP Morgan GBI-EM Global Diversified index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

### ● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

This question is not applicable for the Fund.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for the Fund.

- **How have the indicators for adverse impacts on sustainability factors been taken into account?**

This question is not applicable for the Fund.

- **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for the Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement.

PAIs are considered as part of pre-investment through the application of exclusions. These include: Schroders firmwide exclusions regarding:

- Controversial weapons: PAI 14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

Compliance with these thresholds is monitored via the Investment Manager’s portfolio compliance framework. PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as currently there is limited PAI data available. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs.

However, as part of the investment process, a Schroders’ proprietary tool is used which incorporates some of the PAIs as part of its scoring methodology. The combination of the Investment Manager’s fundamental and quantitative analysis helps to provide a comprehensive view on ESG factors at a regional and country level. This pertains to PAIs related to greenhouse gas emissions (PAIs 1, 2, 3, 4, 5 and 15), PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water) and PAI 9 (Hazardous waste and radioactive waste ratio).

PAIs are also considered post-investment through engagement. The Investment Manager may engage with selected issuers held in the Fund, with a primary focus on sovereign engagements relating to PAIs 1, 2, 3, 4, 5, 7, 8, 9 and 15. The Investment Manager uses a Schroders’ proprietary tool and data from external data providers in order to identify, assess and monitor environmental topics for engagement. Further topics for engagement may

include a government's social agenda, social inequality and education spending which relate to PAI 12 (Unadjusted gender pay gap), PAI 13 (Board gender diversity) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in local currencies issued by governments, government agencies, supra-nationals and companies in emerging markets.

The Fund may invest in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in fixed and floating rate securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for nonrated bonds).

The Fund may invest up to 15% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed across both sovereign markets and credit allocation decisions.

The Investment Manager assesses sovereign issuers across a range of environmental, social and governance factors, via the use of Schroders' proprietary sustainability tools which rank countries by measuring their performance against multiple sustainability-related indicators. In addition, the

Investment Manager conducts qualitative analysis, which includes the use of information published by sovereigns and third party data, on ESG factors at a regional and country level to further enhance oversight and understanding. Countries that score below a predetermined threshold, determined by Schroders' proprietary sustainability tools and the analysis undertaken by the Investment Manager, will generally be excluded.

Corporate issuers are also assessed across a range of environmental, social and governance factors. The primary sources of information used to perform corporate analysis are Schroders' proprietary sustainability tools, the Investment Manager's research, third-party analysis, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the issuers, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified index based on the Investment Manager's rating criteria.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

This question is not applicable for the Fund.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

This question is not applicable for the Fund.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund Emerging Markets Multi-Asset**

**Legal entity identifier:** **549300J365DGAM4OUL36**

## Environmental and/or social characteristics

| <p><b>Sustainable investment</b> means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.</p>                                                             | Does this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index-- EM Local (USD), 16.7% JPM CEMB Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index-- EM Local (USD), 16.7% JPM CEMB Index (USD) by reference to the weighted average sustainability score of the Fund in Schroder's proprietary tool compared against the weighted average sustainability score of the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index-- EM Local (USD), 16.7% JPM CEMB Index (USD) in Schroder's proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroder's proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/ or social benefits such as greater water access or fair pay and reducing environmental, and/ or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroder's proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/ or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Fund allocates its assets across multiple underlying strategies. Some PAIs are considered at the Fund level, whilst other PAIs are considered at the level of the underlying strategies by the relevant investment manager where applicable.

Some PAIs are considered as part of pre-investment through the application of exclusions applied at the Fund level. These include:

- Controversial weapons (PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) - applied to long exposures.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

Where appropriate PAIs are also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the Asian equity strategy uses a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators may be further reviewed via the Schroders PAI dashboard.

Other PAIs are considered via active ownership, which where relevant is performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs are considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets directly in equity and equity related securities, fixed income securities and Alternative Asset Classes of emerging markets countries worldwide or companies which derive a significant proportion of their revenues or profits from emerging markets countries worldwide.

The Fund may actively allocate its assets in Money Market Investments and currencies especially to mitigate losses in falling markets.

The Fund may invest:

- in excess of 50% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in below investment grade (fixed and floating rate) securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities;
- in excess of 50% of its assets in emerging market debt (fixed and floating rate) securities;
- up to 20% of its assets in asset backed securities and mortgage-backed securities;
- up to 10% of its assets in Alternative Asset Classes indirectly through Exchange Traded Funds, REITs or open-ended Investment Funds; and
- up to 10% of its assets in open-ended Investment Funds.

The Fund may invest directly in China H-Shares and may invest less than 25% of its assets (on a net basis) directly or indirectly (for example via participatory notes) in China A-Shares through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect and shares listed on the STAR Board and the ChiNext. The Fund may also invest up to 15% of its assets in mainland China through Regulated Markets (including the CIBM via Bond Connect or CIBM Direct).

The Fund intends to use derivatives (including total return swaps), long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently. Where the Fund uses total return swaps and contracts for difference, the underlying consists of instruments in which the Fund may invest according to its Investment Objective and Investment Policy. In particular, the aim is to use total return swaps and contracts for difference on a temporary basis in market conditions including but not limited to during periods of expanding global economic growth and rising inflation or elevated geopolitical risk, or when credit spreads are expected to widen such during periods of falling economic growth, rising interest rates or elevated geopolitical

risk. Contracts for difference and total return swaps are intended to be used to gain long and short exposure on equity and equity related securities, fixed and floating rate securities and commodity indices. The gross exposure of total return swaps and contracts for difference will not exceed 30% and is expected to remain within the range of 0% to 20% of the Net Asset Value. In certain circumstances this proportion may be higher. The Fund may hold cash.

The Fund maintains a higher overall sustainability score than 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD), based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. The investable universe is assessed using a number of proprietary tools, as well as external rating services.

The Investment Manager will assess companies against a variety of environmental, social and governance metrics, taking into account issues such as climate change, environmental performance, labour standards and board composition. The Investment Manager will decide whether an investment is eligible for inclusion taking into account the overall ESG score. The multi-asset nature of the Fund means that the Investment Manager will analyse the ESG scores across asset classes as an input into the asset allocation of the Fund. The Investment Manager may select investments, which it deems to contribute to one or more environmental or social objectives, provided that they do no significant harm to any other environmental or social objectives.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
  - 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,
- is rated against the sustainability criteria.

For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD) based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD), and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Derivatives such as equity index futures may be used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives may therefore be used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Bond**

**Legal entity identifier:** **61XW5S6PT0DGAORX3X38**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>                                                        | <input checked="" type="radio"/> <input type="radio"/> <b>No</b>                                                                                                                                                                                      |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the Bloomberg EURO Aggregate index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg EURO Aggregate index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg EURO Aggregate index in Schroders' proprietary tool over the previous six-month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay, and reducing environmental and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders' PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below. PAIs are considered as part of pre-investment through the application of exclusions. These include Schroders firmwide corporate exclusions regarding:

- Controversial weapons: PAI 14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process. All PAI indicators are monitored via Schroders PAI dashboard.

Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing a corporate issuer's overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included, for example. The attractiveness of a particular sovereign issuer as an investment for the portfolio is based on its ability to pay its bondholders over the long term, so as part of our process we consider the materiality of PAIs 15 (GHG intensity) and 16 (investee countries subject to social violations) as to whether we should regard these as areas of potential concern.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4, for example. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and procuring renewable energy (PAI 5).

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers, but nonetheless we aim to engage with sovereign and supranational issuers on a periodic basis, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in Euro issued by governments, government agencies, supra-nationals and companies worldwide.

The Fund may invest up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds). The Fund may invest up to 10% of its assets in contingent convertible bonds.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Bloomberg EURO Aggregate index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed – across both sovereign markets and credit allocation decisions – in tandem with macroeconomic factors throughout the Investment Manager's top-down thematic investment process.

In assessing sustainability factors for sovereign issuers, the Investment Manager considers that countries with stable and non-corrupt governments are likely to be more willing and able to service their debts, while political considerations, including the impact of social and governance factors, can influence a country's inflation and currency profile and thus have a material impact on the real value of debt. Environmental impacts – which can be more pertinent over a longer-term horizon – are also incorporated. The Investment Manager's approach includes the use of Schroders' proprietary sustainability tools to rank countries by measuring their performance against multiple sustainability related indicators.

Credit selection decisions are delegated to the Investment Manager's specialist credit investment teams, who aim to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The primary sources of information used to perform this analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. For corporate issuers, the Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the Bloomberg EURO Aggregate index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>. The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

- **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the Bloomberg EURO Aggregate index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

### ● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- **How does the designated index differ from a relevant broad market index?**

This question is not applicable for the Fund.

- **Where can the methodology used for the calculation of the designated index be found?**

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Corporate Bond**

**Legal entity identifier:** **4EKHGX69UZIZADPEK36**

## Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the ICE BofA Euro Corporate index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Euro Corporate index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Euro Corporate index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and procuring renewable energy (PAI 5).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in or hedged to Euro issued by companies and other non-sovereign bond issuers, governments, government agencies, supra-nationals and companies worldwide.

The Fund may invest:

- up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in sovereign government bonds;
- up to 20% of its assets in asset-backed securities and mortgage-backed securities; and
- up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the ICE BofA Euro Corporate index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
- 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the ICE BofA Euro Corporate index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
  - 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,
- is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the ICE BofA Euro Corporate index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

## **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund’s portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Credit Conviction**

**Legal entity identifier:** **549300JL34Z2HKTT336**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?                                                     |                                                                                                                                                                                                                                                       |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the iBoxx EUR Corporates BBB (TR) index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below. PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and procuring renewable energy (PAI 5).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in Euro issued by governments, government agencies, supra-nationals and companies, worldwide.

The Fund may invest:

- up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in sovereign government bonds;
- up to 20% of its assets in asset-backed securities and mortgage-backed securities; and
- up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds.

The Fund may also invest up one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
  - 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,
- is rated against the sustainability criteria.

For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
  - 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,
- is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Credit Conviction Short Duration**

**Legal entity identifier:** **549300GRJ5K0KUG41F58**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate total return index, based on the Investment Manager's rating criteria. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate total return index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA 1-5 Year BBB Euro Corporate total return index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/oursustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and procuring renewable energy (PAI 5).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets, long (directly or indirectly through derivatives) or short (through derivatives), in fixed and floating rate securities denominated in Euro issued by governments, government agencies, supra-nationals and companies worldwide.

The Fund may invest:

- up to 30% of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in sovereign government bonds;
- up to 40% of its assets in asset-backed securities and mortgage-backed securities; and
- up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds.

The Fund may invest in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives. The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate total return index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
  - 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,
- is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate total return index, based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
  - 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,
- is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Asset allocation** describes the share of investments in specific assets.

**What is the asset allocation planned for this financial product?**

The planned composition of the Fund’s investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund’s assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate total return index, and so the Fund’s investments that are scored by Schroders’ proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund’s sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders’ proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders’ proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders’ proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both “costs” and “benefits”.

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tool and so do not contribute towards the Fund’s sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Equity**

**Legal entity identifier:** **3YYOQS43D8251JTKU860**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Does this financial product have a sustainable investment objective?**

| <input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>                                                                                                                                                                                                                                                                                                                                                                                                                                              | <input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI European Monetary Union (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI European Monetary Union (Net TR) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI European Monetary Union (Net TR) index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
    - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- **PAI 8** (Emissions to water)
- **PAI 9** (Hazardous waste and radioactive waste ratio)
- **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
- **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
- **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes. The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance

mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs are considered. These are considered alongside PAIs from Schroders' proprietary tool which incorporates several PAIs as a component of its scoring methodology.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Engagements may cover a range of topics, including human rights in the consumer staples sector and climate and net zero commitments. These engagements relate to PAIs 16 (Social Violations) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least 75% of its assets in equity and equity related securities of companies that are incorporated in the European Economic Area. The Fund invests at least two-thirds of its assets in equity and equity related securities of companies in countries whose currency is the Euro.

The Fund may also invest up one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives with the aim of reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than MSCI European Monetary Union (Net TR) index, based on the Investment Manager's rating system.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

Companies in the investment universe are assessed on their governance, environmental and social profile, across a range of factors. This analysis is supported by quantitative analysis gained from Schroders in-house ESG data tools. The Investment Manager assesses a company's environment and social impact, as well as governance practices, using proprietary sustainability tools. In addition, the Investment Manager also performs its own research and analysis before deciding whether a company is eligible for inclusion in the Fund, based on its overall sustainability profile. Proprietary tools will be key inputs to measure how companies in the portfolio are meeting the sustainability credentials outlined above.

The sources of information used to perform the analysis include information provided by the companies, such as company sustainability reports and other relevant company material, as well as Schroders' proprietary sustainability tools and third-party data.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage <https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries, is rated against the sustainability criteria.

For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the MSCI European Monetary Union (Net TR) index based on the Investment Manager's rating criteria.
- The Fund invests at least 25% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>. The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 70%. The Fund commits to maintain a higher overall sustainability score than the MSCI European Monetary Union (Net TR) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 is the minimum proportion of assets that are invested in sustainable investments, as indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 25% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. A sustainable investment is classified as having an

environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

#1 The minimum proportion stated applies in normal market conditions.

### ● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds\***

**2. Taxonomy-alignment of investments excluding sovereign bonds\***

This graph represents x% of the total investments<sup>2</sup>.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes investments that are not scored by Schroders' proprietary sustainability tools and so do not contribute towards the Fund's sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## **Where can I find more product specific information online?**

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Government Bond**

**Legal entity identifier:** **GQO6F0370CMTJBILPZ30**

## Environmental and/or social characteristics

| Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.                                                                     | Does this financial product have a sustainable investment objective?                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                                                                                                                                                                                                   | <input checked="" type="radio"/> <input type="checkbox"/> <b>Yes</b>                                                                                                                                                                              | <input type="radio"/> <input checked="" type="checkbox"/> <b>No</b>                                                                                                                                                                                                                                                          |
| The <b>EU Taxonomy</b> is a classification system laid down in Regulation (EU) 2020/852, establishing a list of <b>environmentally sustainable economic activities</b> . That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not. | <input type="checkbox"/> It will make a minimum of <b>sustainable investments with an environmental objective: ___%</b>                                                                                                                           | <input checked="" type="checkbox"/> It <b>promotes Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it will have a minimum proportion of <b>10.00%</b> of sustainable investments                                                                        |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the ICE BofA Euro Government index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Euro Government index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Euro Government index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders' PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. The nature of this Fund is such that it does not meaningfully invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds. Nonetheless, those formally applied include Schroders firmwide corporate exclusions regarding:

- Controversial weapons: PAI 14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process. All PAI indicators are monitored via Schroders PAI dashboard.

Schroders' proprietary tool incorporates PAIs as a component of its scoring methodology. The attractiveness of a particular sovereign issuer as an investment for the portfolio is based on its ability to pay its bondholders over the long term, so as part of our process we consider the materiality of PAIs 15 (GHG intensity) and 16 (investee countries subject to social violations) as to whether we should regard these as areas of potential concern.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund does not meaningfully invest), but nonetheless we aim to engage with sovereign and supranational issuers on a periodic basis, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities with an investment grade or, directly or indirectly (including via credit default swaps and credit default swap indices), with a sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds) issued by governments of countries whose currency is the Euro.

**As of 10 September 2026 the above paragraph will change to:**

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities with an investment grade or, directly or indirectly (including via credit default swaps and credit default swap indices), with a sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds) issued or guaranteed by European governments, agencies or supra-national institutions of European countries denominated in, or hedged to Euro.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the ICE BofA Euro Government index based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed – across both sovereign markets and credit allocation decisions – in tandem with macroeconomic factors throughout the Investment Manager’s top-down thematic investment process.

In assessing sustainability factors for sovereign issuers, the Investment Manager considers that countries with stable and non-corrupt governments are likely to be more willing and able to service their debts, while political considerations, including the impact of social and governance factors, can influence a country’s inflation and currency profile and thus have a material impact on the real value of debt. Environmental impacts – which can be more pertinent over a longer-term horizon – are also incorporated. The Investment Manager’s approach includes the use of Schroders’ proprietary sustainability tools to rank countries by measuring their performance against multiple sustainability related indicators.

Credit selection decisions are delegated to the Investment Manager’s specialist credit investment teams, who aim to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The primary sources of information used to perform this analysis are the Investment Manager’s proprietary tools and research, third-party research, NGO reports and expert networks. For corporate issuers, the Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager’s approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager’s rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

## ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the ICE BofA Euro Government index based on the Investment Manager’s rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprise Schroders’ ‘global norms’ breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders’ ‘global norms’ breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under “Sustainability-Related Disclosure” on the Fund’s webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager’s rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund’s NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and

- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

● **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the ICE BofA Euro Government index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tools and so do not contribute towards the Fund's sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

This question is not applicable for the Fund.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

This question is not applicable for the Fund.

- **How does the designated index differ from a relevant broad market index?**

This question is not applicable for the Fund.

- **Where can the methodology used for the calculation of the designated index be found?**

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO High Yield**

**Legal entity identifier:** **FDQ3U0BX0ZTSLH0GBR19**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Does this financial product have a sustainable investment objective?                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="radio"/> <input type="radio"/> Yes                                                                                                                                                                                                                                                                                                                                                | <input checked="" type="radio"/> <input type="radio"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <input type="checkbox"/> It will make a minimum of <b>sustainable investments with an environmental objective: ___%</b> <div> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy               <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy             </div> | <input checked="" type="checkbox"/> It <b>promotes Environmental/Social (E/S) characteristics</b> and while it does not have as its objective a sustainable investment, it will have a minimum proportion of <b>10.00%</b> of sustainable investments <div> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy               <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy               <input checked="" type="checkbox"/> with a social objective             </div> |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability criteria than the ICE BofA Euro High Yield Constrained index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the ICE BofA Euro High Yield Constrained index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the ICE BofA Euro High Yield Constrained index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework. PAIs are also considered through integration in the investment process as Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2), procuring renewable energy (PAI 5).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate securities denominated in EUR issued by governments, government agencies, supra-nationals and companies worldwide. The Fund also invests at least two-thirds of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in sub investment grade fixed and floating rate securities (being securities with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The Fund may invest up to 15% of its assets in contingent convertible bonds.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may also invest in derivatives to create long and short exposure to the underlying assets of these derivatives.

The Fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the ICE BofA Euro High Yield Constrained index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund.

The strategy aims to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to their industry peers.

The Investment Manager may also engage with companies to encourage transparency, the transition to a circular economy with lower carbon emissions intensity and responsible social behaviour that promotes sustainable growth and alpha generation.

The primary sources of information used to perform the analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. The Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with an investment grade credit rating; sovereign debt issued by developed countries; and equities issued by large companies domiciled in developed countries; and
  - 75% of the portion of the Fund's NAV composed of fixed or floating rate securities and money market instruments with a high yield credit rating; sovereign debt issued by emerging countries equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies,
- is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the ICE BofA Euro High Yield Constrained index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This question is not applicable for the Fund.

● ***What is the policy to assess good governance practices of the investee companies?***

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

## What is the asset allocation planned for this financial product?

**Asset allocation** describes the share of investments in specific assets.

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the ICE BofA Euro High Yield Constrained index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders' proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

## **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?*

This question is not applicable for the Fund.

- *How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?*

This question is not applicable for the Fund.

- *How does the designated index differ from a relevant broad market index?*

This question is not applicable for the Fund.

- *Where can the methodology used for the calculation of the designated index be found?*

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund EURO Short Term Bond**

**Legal entity identifier:** **LKIIDMHWJTJNCPJTJ3M14**

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Does this financial product have a sustainable investment objective?

| <input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>                                                        | <input checked="" type="radio"/> <input type="radio"/> <b>No</b>                                                                                                                                                                                      |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invests at least 10% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or social objective (s).

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the Bloomberg Euro Aggregate (1-3 Y) index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

The Investment Manager monitors compliance with the characteristic to invest at least 10% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and/ or (ii) whether the asset is classified as a green, social and/ or sustainable bond and / or (iii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is

monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/or (ii) is classified as a green, social and/or sustainable bond using a third-party data source and/or (iii) contributes to an environmental and/or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health. The environmental or social objectives of green, social and/or sustainable bonds may include, but are not limited to, climate change mitigation, renewable energy initiatives, natural resource conservation, access to finance and affordable housing projects.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies on Schroders' 'global norms' breach list cannot be categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considers the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list is informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes.

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators are considered via the application of exclusions, some are considered via the investment process (where data is available via Schroders' PAI dashboard and via other external data sources) and some are considered via engagement. Further details are provided below.

PAIs are considered as part of pre-investment through the application of exclusions. These include Schroders firmwide corporate exclusions regarding:

- Controversial weapons: PAI 14 Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

Compliance with these thresholds is monitored via the Investment Manager's portfolio compliance framework.

PAIs are also considered through integration in the investment process. All PAI indicators are monitored via Schroders PAI dashboard.

Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing a corporate issuer's overall environmental score PAI 1, 2, 3, 4, 5, and 6 are included, for example.

The attractiveness of a particular sovereign issuer as an investment for the portfolio is based on its ability to pay its bondholders over the long term, so as part of our process we consider the materiality of PAIs 15 (GHG intensity) and 16 (investee countries subject to social violations) as to whether we should regard these as areas of potential concern.

PAIs are also considered post-investment through engagement where the Investment Manager engages in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

The Investment Manager may engage with selected issuers held by the Fund on PAIs 1, 2, 3 and 4, for example. We aim to engage with several issuers on net zero carbon emissions targets (PAI 1,2) and procuring renewable energy (PAI 5). There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers, but nonetheless we aim to engage with sovereign and supranational issuers on a periodic basis, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves. The Management Company's statement on principal adverse impacts on sustainability factors is available at <https://api.schroders.com/document-store/id/ffcb39bb-96cb-4e56-9461-deba9a493e85>. The Fund level information is disclosed or will be disclosed (as applicable) in the Fund's annual report.

☐ No

## What investment strategy does this financial product follow?

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

The sustainable investment strategy used by the Investment Manager is as follows:

The Fund is actively managed and invests at least two-thirds of its assets directly or indirectly (including via credit default swaps and credit default swap indices) in short term fixed and floating rate securities with an investment grade or sub-investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds) denominated in Euro, issued by governments, government agencies, supra-nationals and companies worldwide.

The average duration of the securities held by the Fund does not exceed 3 years and the effective maturity of any such security does not exceed 5 years.

The Fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, Investment Funds, warrants and Money Market Investments, and hold cash.

The Fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the Fund more efficiently.

The Fund maintains a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) index, based on the Investment Manager's rating criteria.

The Fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>

The Investment Manager applies governance and sustainability criteria when selecting investments for the Fund. Sustainability factors are assessed – across both sovereign markets and credit allocation decisions – in tandem with macroeconomic factors throughout the Investment Manager's top-down thematic investment process.

In assessing sustainability factors for sovereign issuers, the Investment Manager considers that countries with stable and non-corrupt governments are likely to be more willing and able to service their debts, while political considerations, including the impact of social and governance factors, can influence a country's inflation and currency profile and thus have a material impact on the real value of debt. Environmental impacts – which can be more pertinent over a longer-term horizon – are also incorporated. The Investment Manager's approach includes the use of Schroders' proprietary sustainability tools to rank countries by measuring their performance against multiple sustainability related indicators.

Credit selection decisions are delegated to the Investment Manager's specialist credit investment teams, who aim to identify issuers demonstrating good or improving sustainability credentials, and those that impose a high cost on the environment and society. This involves:

- The exclusion of issuers with certain exposure to specific activities that the Investment Manager considers environmentally destructive or socially damaging, violate human rights and/ or have demonstrated gross misconduct.
- The inclusion of issuers that the Investment Manager considers are well placed to deliver stable and improving sustainability trajectories relative to industry peers.

The primary sources of information used to perform this analysis are the Investment Manager's proprietary tools and research, third-party research, NGO reports and expert networks. For corporate issuers, the Investment Manager also performs its own analysis of publicly available information provided by the companies, including information provided in company sustainability reports and other relevant company material.

More details on the Investment Manager's approach to sustainability and its engagement with companies are available on the webpage

<https://www.schroders.com/en-lu/lu/individual/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/disclosures-and-statements/>

The Fund maintains a higher overall sustainability score than its investment universe, based on the Investment Manager's rating system.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria. For the purposes of this test, small companies are those with market capitalisation below €5 billion, medium companies are those between €5 billion and €10 billion and large companies are those above €10 billion.

### ● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The following binding elements are applied throughout the investment process:

- The Fund maintains a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) index based on the Investment Manager's rating criteria.
- The Fund invests at least 10% of its assets in sustainable investments and such investments do not cause significant environmental or social harm.
- Exclusions are applied to direct investments in companies. The Fund applies certain exclusions relating to international conventions on cluster munitions, antipersonnel mines, and chemical and biological weapons. The Fund also excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal. The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment. Further, the Fund may apply other exclusions as listed under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>
- The Fund invests in companies that have good governance practices, as determined by the Investment Manager's rating criteria.

The Investment Manager ensures that at least:

- 90% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in developed countries; fixed or floating rate securities and money market instruments with an investment grade credit rating; and sovereign debt issued by developed countries; and
- 75% of the portion of the Fund's NAV composed of equities issued by large companies domiciled in emerging countries; equities issued by small and medium companies; fixed or floating rate securities and money market instruments with a high yield credit rating; and sovereign debt issued by emerging countries,

is rated against the sustainability criteria.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

This question is not applicable for the Fund.

- **What is the policy to assess good governance practices of the investee companies?**

In order to assess good governance practices, a central Good Governance Test is applied. This test is based on a data-driven quantitative framework, which uses a scorecard to assess companies across the categories of sound management structures, employee relations, remuneration of staff, and tax compliance. Schroders has defined a number of criteria across these pillars.

Compliance with the test is monitored centrally and companies which do not pass this test cannot be held by the Fund, unless the Investment Manager has agreed that the issuer demonstrates good governance based on additional insights beyond that quantitative analysis.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

The planned composition of the Fund's investments that are used to meet its environmental or social characteristics are summarised below.

**#1 Aligned with E/S characteristics** includes the minimum proportion of the Fund's assets used to attain the environmental or social characteristics, which is equal to 60%. The Fund commits to maintain a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) index, and so the Fund's investments that are scored by Schroders' proprietary sustainability tool are included within the minimum proportion stated in #1 on the basis that they will contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score). Also included within #1 are any green, social or sustainable bonds that are not scored by Schroders' proprietary sustainability tool. The minimum proportion of assets that are invested in sustainable investments is indicated in #1A. The minimum proportions stated apply in normal market conditions. The actual proportion stated in #1 is expected to be higher.

The Fund will invest at least 10% of its assets in sustainable investments. Each sustainable investment (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) is classified as a green, social and/ or sustainable bond using a third-party data source and/ or (iii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. With the exception of any green or social bonds, which will be classified as having an environmental or social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

**#2 Other** includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders' proprietary sustainability tool and so do not contribute towards the Fund's sustainability score. As #1 states a minimum proportion that is in practice expected to be higher, the proportion stated in #2 is expected to be lower.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders' credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders' proprietary tool would lead to further analysis and potential exclusion by Schroders' credit risk team.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#1 The minimum proportion stated applies in normal market conditions.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Single name credit default swaps are used as a proxy for direct investments which would otherwise be held by the Fund in line with its sustainability criteria. Such derivatives are therefore used to attain the Fund's sustainability score in Schroders proprietary tool which is one of the binding elements of the Fund. The Fund may use other derivatives that are scored in Schroders' proprietary tool to meet the environmental and/or social characteristics promoted by the Fund, as such derivatives would contribute to the Fund's sustainability score (whether such individual investment has a positive or a negative score).

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

There is no minimum extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective are aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

In future it is expected that the Fund will assess and report on the extent to which its underlying investments are in economic activities that qualify as environmentally sustainable under the Taxonomy, along with information relating to the proportion of enabling and transitional activities. This Prospectus will be updated once it is possible in the Investment Manager's opinion to accurately disclose to what extent the Fund's investments are in Taxonomy-aligned environmentally sustainable activities, including the proportions of investments in enabling and transitional activities selected for the Fund.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What is the minimum share of investments in transitional and enabling activities?**  
As per the above, at the date of this Prospectus the share of investments by the Fund in transitional and enabling activities is currently deemed to constitute 0% of the Fund's portfolio.

**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**  
The Fund commits to invest at least 1% of its assets in sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

<sup>2</sup> As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## What is the minimum share of socially sustainable investments?

The Fund commits to invest at least 1% of its assets in sustainable investments with a social objective.

## What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

#2 Other includes cash which is treated as neutral for sustainability purposes. #2 also includes other investments that are not scored by Schroders’ proprietary sustainability tools and so do not contribute towards the Fund’s sustainability score.

Minimum safeguards are applied where relevant to Money Market Investments and other investments by restricting (as appropriate) investments in counterparties where there are ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties are reviewed by Schroders’ credit risk team and approval of a new counterparty is based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring is performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges. Any significant deterioration in the profile of the counterparty in Schroders’ proprietary tool would lead to further analysis and potential exclusion by Schroders’ credit risk team.

## Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

This question is not applicable for the Fund.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

This question is not applicable for the Fund.

- ***How does the designated index differ from a relevant broad market index?***

This question is not applicable for the Fund.

- ***Where can the methodology used for the calculation of the designated index be found?***

This question is not applicable for the Fund.

## Where can I find more product specific information online?

More product-specific information can be found on the webpage: <https://www.schroders.com/en-lu/lu/individual/fund-centre>

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** **Schroder International Selection Fund European Dividend Maximiser**

**Legal entity identifier:** **5G167LY8W47ZFOL7Z717**

## Environmental and/or social characteristics

|                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## What environmental and/or social characteristics are promoted by this financial product?

The Fund maintains a higher overall sustainability score than the MSCI Europe (Net TR) Index, based on the Investment Manager's rating system. It also maintains a carbon intensity below that of the MSCI Europe (Net TR) Index, based on the Weighted Average Carbon Intensity (WACI). This benchmark (which is a broad market index) does not take into account the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The carbon intensity is a measure of the portfolio's exposure to carbon-intensive companies. It is expressed as the carbon emissions per million dollars of revenue and displayed as metric tons CO<sub>2</sub>e / \$M revenue. The carbon intensity is measured using data from a third party provider. Where a data point is not available, the provider may make use of estimated data.

The Fund invests at least 25% of its assets in sustainable investments, which are investments that the Investment Manager expects to contribute towards the advancement of one or more environmental and/or objective(s).

### ● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager monitors compliance with the characteristic to maintain a higher overall sustainability score than the MSCI Europe (Net TR) Index by reference to the weighted average sustainability score of the Fund in Schroders' proprietary tool compared against the weighted average sustainability score of the MSCI Europe (Net TR) Index in Schroders' proprietary tool over the previous six month period, based on month-end data. The overall sustainability score aggregates the effect of sustainability indicators including but not limited to greenhouse gas emissions, water usage, and salaries compared to the living wage.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager monitors compliance with the characteristic to invest at least 25% of its assets in sustainable investments by reference to (i) the sustainability score of each asset in Schroders' proprietary tool and / or (ii) whether an asset is deemed sustainable on an exceptional basis by Schroders. Compliance with this is monitored daily via our automated compliance controls. The Fund also applies certain exclusions, with which the Investment Manager monitors compliance on an ongoing basis via its portfolio compliance framework.

The Investment Manager monitors compliance with the characteristic to maintain a carbon intensity below that of the MSCI Europe (Net TR) Index, by reference to the Weighted Average Carbon Intensity (WACI) in metric tons CO<sub>2</sub>e / \$M revenue based on quarterly holdings using data from a third party provider.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

In respect of the proportion of the Fund's portfolio that is invested in sustainable investments, each sustainable investment either (i) demonstrates a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and/ or (ii) contributes to an environmental and/ or a social objective such that it is deemed sustainable on an exceptional basis by Schroders. The environmental or social objectives of the sustainable investments that the Fund partially intends to make may include, but are not limited to, increasing environmental and/or social benefits such as greater water access or fair pay and reducing environmental, and/or social costs such as carbon emissions or food waste. For example, greater water access as measured by Schroders' proprietary tool are the estimated societal benefits of the provision of clean drinking water to human health.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/global/individual/about-us/what-we-do/sustainable-investing/our-sustainable-investment-policies-disclosures-voting-reports/group-exclusions/>
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above.

Further information on all of the Fund's investment exclusions is to be found under "Sustainability Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

● ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involves a quantitative and a qualitative assessment. Where it is not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engages, where relevant. Investee companies deemed not to satisfy the quantitative thresholds would generally be excluded, unless on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach includes:

1. **Quantitative:** this includes indicators where specific thresholds have been established:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Via the application of exclusions. This approach is relevant to **PAI 4** (Exposure to companies active in the fossil fuel sector), **PAI 5** (Share of non-renewable energy consumption and production) and **PAI 14** (Exposure to controversial weapons). Further, the following PAIs are assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring):
  - **PAI 7** (Activities negatively affecting biodiversity-sensitive areas)
  - **PAI 8** (Emissions to water)
  - **PAI 9** (Hazardous waste and radioactive waste ratio)
  - **PAI 10** (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises)
  - **PAI 11** (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises)
  - **PAI 14** in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Via the application of an alert system flag if the relevant indicator(s) exceeds a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, **PAI 1** (GHG emissions), **PAI 2** (Carbon footprint) and **Voluntary PAI 4 in Table 2** (Investing in companies without carbon emission reduction initiatives). **PAI 3** (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for **PAI 6** (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for **PAI 15** (GHG intensity). **PAI 16** (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that is/are deemed not to satisfy the quantitative thresholds is/are flagged to the Investment Manager for consideration, whose response may involve selling the holdings(s) or maintaining the position if on a case-by-case basis the data is deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm are excluded from the Fund.
- 2. **Qualitative:** This includes PAI indicators where Schroders' believes that the data available does not enable us to make a quantitative determination regarding whether significant harm is done so as to warrant excluding an investment. In such cases, the Investment Manager engages wherever possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as **PAI 12** (Unadjusted gender pay gap) and **PAI 13** (Board gender diversity), where we engage and may use our voting rights where we consider appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

● **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**
