■ Drittes Quartal 2023

Im dritten Quartal verzeichnete die US-Wirtschaft eine gute Leistung, während das Klima in der Eurozone und in China weiterhin enttäuschend war. In den meisten Ländern ging die Inflation weiter zurück, war aber nach Ansicht der Zentralbanken weiterhin zu hoch. In den hoch entwickelten Volkswirtschaften setzten die großen Zentralbanken die Leitzinserhöhungen fort, allerdings langsamer als in den vorangegangenen Quartalen. In den Schwellenländern begannen einige Zentralbanken allerdings damit, ihre Zinsen zu senken. Auf den Anleihemärkten stiegen die Renditen und Aktien gaben nach.

USA

Die US-Wirtschaft erwies sich trotz eines deutlichen Zinsanstiegs stärker als erwartet. Viele Beobachter setzten ihre Rezessionsprognosen herab oder schwächten sie ab. Die Ursachen für diese gute Widerstandsfähigkeit waren unter anderem hohe Rücklagen privater Haushalte und öffentliche Maßnahmen zur Förderung von Investitionen. Ein Blick auf die Zahlen für August und September bestätigte dann auch, dass das BIP im zweiten Quartal mit einer annualisierten Rate von 2.1% weiterhin stark zulegte. Auch die ISM-Indikatoren für September signalisierten eine robuste Aktivität im Dienstleistungssektor und eine Abschwächung des Rückgangs in der Industrie. Es wurden zahlreiche Arbeitsplätze geschaffen, wenn auch nur langsam, und die Arbeitslosenquote stieg leicht an (3.8% im August gegenüber 3.6% im Juni). Der allgemeine Inflationsindex beschleunigte sich erneut (3.7% im August gegenüber 3.0% im Juni). Dies ist vor allem zurückzuführen auf höhere Kraftstoffpreise. Der zugrunde liegende Index verlangsamte sich hingegen weiter (4.3% im August gegenüber 4.8% im Juni). Die Fed erhöhte die Leitzinsen im Juli um 25 Basispunkte (und stützte damit ihren Bereich von 5.25 bis 5.50%), beließ sie aber im September unverändert und ließ die Möglichkeit für weitere Zinserhöhungen offen.

Eurozone

Die Eurozone verzeichnete eine enttäuschende Wirtschaftskonjunktur. Im zweiten Quartal stagnierten die Wachstumszahlen nahezu - das BIP stieg um 0.1% - nachdem bereits im ersten Quartal Stillstand herrschte. Die am stärksten von Dienstleistungen abhängigen Länder (Frankreich und Spanien) behielten ihr leicht positives Tempo bei, Länder mit bedeutenderen Industrie-sektoren hatten aber fast gar kein Wachstum (Deutschland) oder ein negatives Wachstum (Italien). Die Konjunkturmfragen für das dritte Quartal (insbesondere die Einkaufsmanager-Indizes) zeigten, dass die bereits in der Industrie beobachtete Verschlechterung tendenziell auf den Dienstleistungssektor übergriff. Aber trotz gewisser Anzeichen einer Verlangsamung gab es einen stabilen Arbeitsmarkt mit einer Arbeitslosenquote von 6.4% im August, der niedrigste Stand seit Gründung der Eurozone. Die Inflation war insgesamt rückläufig. Im September stieg die allgemeine 12-Monats-Rate wieder auf 4.3% (gegenüber 5.5% im Juni), während der zugrunde liegende Index bei 4.5% lag (gegenüber 5.5%). Im Juli erhöhte die Europäische Zentralbank ihre Leitzinsen um 25 Basispunkte und im September erneut, so dass der Einlagensatz nun bei 4.00% lag. Sie hielt sich jedoch damit zurück, darauf hinzuweisen, dass es wahrscheinlich weitere Erhöhungen geben wird, und bekräftigte ihr Vertrauen in das derzeitige Zinsniveau, um die Inflation weiter zu senken.

Schwellenmärkte

Die Daten aus China für das dritte Quartal zeigten weiterhin eine Schwäche im Immobiliensektor und in anderen Sektoren, während Immobilienentwickler mit Schuldenproblemen zu kämpfen hatten. Die im August herausgegebenen Daten übertrafen jedoch die Erwartungen und deuteten darauf hin, dass der Tiefpunkt im dritten Quartal erreicht wurde. Doch trotz der vorhergesagten allmählichen zyklischen Erholung erlebt China seit mehreren Jahren einen lang anhaltenden Abschwung. Diese Verlangsamung ist und bleibt hauptsächlich auf den Immobiliensektor zurückzuführen. Die staatlichen Behörden reagierten mit einer Reihe politischer Maßnahmen, die jedoch nicht ausreichten, um das Wachstum rasch anzukurbeln. Priorität hat weiterhin der langfristige Übergang zu einem weniger wohnungs- und exportintensiven Wachstumsmodell. Die meisten Schwellenländer haben nach wie vor eine schwache gesamtwirtschaftliche Dynamik, auch wenn die Richtung nach oben geht. Die Ausfuhren scheinen tatsächlich ihren Tiefpunkt erreicht zu haben. Wegen nachlassender Basiseffekte, dem Anstieg der Lebensmittel- und Energiepreise und des Drucks auf die Devisenmärkte verlangsamte sich jedoch der Prozess des Inflationsrückgangs und belastete die Kaufkraft der Haushalte. Doch abgesehen von einigen Ausnahmefällen (z. B. Türkei, Russland und Thailand) starteten die Zentralbanken eine geldpolitische Lockerung mit Zinssenkungen und setzten sie fort. Nach den Äußerungen der Fed und der Möglichkeit eines länger anhaltenden Zinshochs gaben viele jedoch vorsichtigere Prognosen ab. Weitere wichtige Ereignisse in diesem Quartal waren die sechs neuen potenziellen BRICS-Mitglieder (Argentinien, Ägypten, Iran, Äthiopien, Saudi-Arabien und die Vereinigten Arabischen Emirate) und die Aufnahme Indiens in den EMGBI-Index.

Aktien

Aktien entwickelten sich im dritten Quartal zurückhaltend. Trotz der guten Ergebnisse der Unternehmen führte der aggressive Ton der Zentralbanken zu einem starken Anstieg langfristiger Zinssätze, was wiederum eine Korrektur an den Aktienmärkten auslöste. In den USA stieg der 10-Jahres-Satz in diesem Quartal um nahezu 75 Bp. Der MSCI World AC sank um 2.9%. Auf regionaler Ebene schnitten die USA (-3.4%) schlechter ab als Europa (-2.5%). In der Eurozone (-4.6%) schnitt Italien (+0.6%) weitaus besser ab als seine Nachbarländer. Die übrigen Mitgliedstaaten sind in diesem Quartal im Minus, wobei Portugal (-6.1%) und die Niederlande (-11.5%) die Schlusslichter bilden. Außerhalb der Eurozone legte der britische Markt um 1.3% zu. Schweden (-5.1%) und die Schweiz (-3.3%) beendeten das Quartal im negativen Bereich. Japan (+0.8% in lokaler Währung) profitiert weiterhin von der Abwertung des Yen und der Widerstandsfähigkeit der japanischen Wirtschaft. Der MSCI Emerging Markets Index schließlich verlor 2.2%. Dies ist zurückzuführen auf das unterdurchschnittliche Abschneiden des chinesischen Markts, der um 3% nachgab. In Europa liegt der Energiesektor mit einem Plus von 14.1% an der Spitze, gefolgt vom Immobiliensektor mit einem Plus von 7.9% und dem Bankensektor mit einem Plus von 4.1%. Zyklische Konsumgüter und Informationstechnologie waren in diesem Quartal mit einem Rückgang von 11.5% bzw. 10.7% die größten Verlierer. So genannte Value-Aktien (plus 1.8%) entwickelten sich besser als Wachstumsaktien (minus 6.5%).

Zinssätze

Anleiherenditen stiegen im dritten Quartal deutlich. Die Rendite 10-jähriger deutscher Bundesanleihen stieg um mehr als 42 Basispunkte auf 2.81%. Die Rendite 10-jähriger US-Anleihen stieg um 76 Basispunkte und lag zum Quartalsende bei 4.57%. Anleiherenditen kehren zurück auf das Niveau von vor der Finanzkrise. Dies deutet auf einen Wandel der makrofinanziellen Rahmenbedingungen hin. Die Widerstandsfähigkeit der US-Wirtschaft überraschte die Beobachter. Das Wachstum bleibt solide und die Wahrscheinlichkeit einer sanften Landung steigt. Die Fed erhöhte ihre Leitzinsen auf 5.5%. Der geldpolitische Straffungszyklus wird voraussichtlich enden, aber Jerome Powell (Vorsitzender der Federal Reserve) deutete an, dass die Leitzinsen wahrscheinlich noch längere Zeit hoch bleiben werden. Die EZB wiederum steht vor dem Dilemma einer hohen Inflation bei sich rasch verschlechternden Wachstumsaussichten in der Eurozone. Sie erhöhte die Einlagenzinsen auf 4% und wird sie nun voraussichtlich auch längere Zeit unverändert lassen. Der Kampf um die Senkung der Inflation zurück auf die angestrebten 2% wird sich in die Länge ziehen und es erforderlich machen, eine restriktive Geldpolitik beizubehalten.

■ Viertes Quartal 2023

Die Wirtschaftskonjunktur blieb im vierten Quartal robust, auch wenn sie sich in den USA verlangsamte und in der Eurozone enttäuschte. In den meisten Schwellenländern verlangsamte sich das Wachstum, blieb dabei aber stark. In den meisten Ländern war die Inflation weiter rückläufig. Die US-Notenbank und die Europäische Zentralbank deuteten an, dass sie sich dem Ende des Zyklus der Leitzinserhöhungen nähern, während mehrere Zentralbanken in Schwellenländern ihre Zinssätze senkten. Die Renditen auf Anleihemärkten stiegen im Oktober und die Aktienkurse sanken. Im November und Dezember kehrte sich dieser Trend jedoch um, so dass die Anleiherenditen zum Jahresende niedriger waren als zu Beginn des Quartals, während die Aktienkurse deutlich stiegen und mehrere Indizes sogar neue Höchststände erreichten.

USA

Die US-amerikanische Wirtschaft zeigte sich zwar weiterhin überraschend widerstandsfähig gegenüber dem starken Anstieg der Zinssätze, der Trend ging jedoch weiterhin in Richtung einer Verlangsamung. Die im vierten Quartal veröffentlichten Wachstumszahlen für das dritte Quartal zeigten deutlich eine nicht nachlassende Aktivität (Wachstum des annualisierten BIP von 4.9% laut der Überprüfung im Dezember). Die jüngsten Arbeitsmarktzahlen haben jedoch gezeigt, dass ihnen allmählich die Puste ausgeht. So stabilisierte sich die Arbeitslosenquote trotz der Schaffung von nach wie vor reichlich Arbeitsplätzen (im vierten Quartal durchschnittlich fast 180.000 pro Monat) im Dezember bei 3.7%, während sie im April mit 3.4% ihren Tiefpunkt erreicht hatte. Andere monatliche Zahlen wie etwa Einzelhandelsumsätze, Aufträge für langlebige Güter und die Industrieproduktion deuten darauf hin, dass das Wachstum im vierten Quartal wahrscheinlich deutlich schwächer ausfallen würde als im dritten Quartal. Andererseits ging die Inflation deutlich zurück, obwohl sie über dem 2%-Ziel der Fed lag. Im November stieg der allgemeine Preisindex über zwölf Monate um nur 3.1%, verglichen mit 3.7% im August. Und der zugrunde liegende Index stieg um 4.0%, verglichen mit 4.3%. Die Federal Reserve änderte ihre Leitzinsen nach der Anhebung im Juli nicht. Sie wies darauf hin, dass sie mit dem derzeitigen Niveau zufrieden sei und dass das Tempo einer künftigen Senkung noch diskutiert werde.

Eurozone

Die Konjunktur in der Eurozone verlief nach wie vor ausgesprochen schleppend und steigende Zinssätze verstärkten zunehmend die spezifischen Schwierigkeiten des Industriesektors. Ende November zeigte die Überprüfung der BIP-Zahlen für das dritte Quartal einen sehr leichten Rückgang um 0.1% für die ganze Region, darunter mäßige Rückgänge in Frankreich und Deutschland, ein geringfügiger Anstieg in Italien und ein etwas stärkerer Anstieg in Spanien. Der Einbruch war Bestandteil der seit Jahresbeginn zu beobachtenden gleichsam Stagnation. Die Zahlen zu Beginn des vierten Quartals zeigten keine bemerkenswerte Verbesserung. Der Arbeitsmarkt ist jedoch immer noch in relativ guter Verfassung: Die Arbeitslosenquote lag im Oktober bei 6.5% und damit auf dem niedrigsten Stand seit der Gründung der Eurozone. Gute Nachrichten gab es bezüglich der Inflation: Das Tempo des Anstiegs des allgemeinen Preisindex verlangsamte sich und erreichte im Dezember 2.9% über zwölf Monate (nach 4.4% im September), und der zugrunde liegende Index verlangsamte sich auf 3.4% (zuvor 4.5%). Die Europäische Zentralbank änderte ihre Leitzinsen nach der Anhebung im September nicht. Nach der Sitzung des geldpolitischen Ausschusses im Dezember zeigte er sich erneut zuversichtlich, dass das derzeitige Zinsniveau eine weitere Senkung der Inflation ermöglichen würde, und wies darauf hin, dass jede Diskussion über mögliche Zinssenkungen verfrüht sei.

Schwellenmärkte

Vor dem Hintergrund eines sehr uneinheitlichen Aufschwungs war China auch im vierten Quartal bei der Entwicklung seiner Wirtschaftspolitik vorsichtig. Es kam zu einer Intensivierung öffentlicher Ausgaben für Infrastruktur, aber der Konsum verlangsamte sich, und die Inflation pendelte sich im negativen Bereich ein. In Brasilien verlangsamte sich der Inflationsanstieg weiter, während sich in Indien der Konsum robuster erwies als Investitionen. In Schwellenländern verlangsamte sich die Binnennachfrage insgesamt und die Inflation ging weiter zurück, wobei sie in den meisten Fällen unter den Zahlen der Zentralbanken blieb. Die Zentralbanken setzten ihre Zinssenkungen fort. Die brasilianische Zentralbank machte den Anfang mit mehreren Senkungen um 50 Basispunkte, während die chilenische Zentralbank ihr Tempo mit Senkungen um 75 Basispunkte beschleunigte. Andere schlossen sich an, beispielsweise die Zentralbanken von Kolumbien und der Tschechischen Republik. Die scheinbar restriktivere Haltung der US-Notenbank verringerte den Druck auf die Wechselkurse, der zuvor die indonesische Zentralbank zu Zinserhöhungen und die chilenische Zentralbank zu einer Verlangsamung ihrer Zinssenkungen veranlasst hatte. In Argentinien schließlich begann der neue Präsident Milei sein Amt mit einer Abwertung des Peso um 50% und einem ehrgeizigen Plan zur Liberalisierung der Wirtschaft.

Aktien

Die Aktienmärkte fielen im Oktober, erholten sich aber kräftig wegen des Rückgangs langfristiger Zinsen. Der MSCI World AC stieg im Laufe des Quartals um 9%. Auf regionaler Ebene schnitten die USA (plus 11.5%) schlechter ab als Europa (plus 5.3%). Innerhalb der Eurozone (plus 7.5%) übertrafen die Niederlande (plus 14.8%) und Portugal (plus 10.2%) ihre Nachbarländer. Die übrigen Mitgliedstaaten waren in diesem Quartal im grünen Bereich, wobei Frankreich (plus 5.6%) und Spanien (plus 6.7%) die Schlusslichter bildeten. Außerhalb der Eurozone setzte sich der schwedische Markt an die Spitze des Feldes (plus 12.2%), gefolgt vom britischen Markt (plus 1.6%) und der Schweiz (plus 1.3%). Japan (+2.1% in lokaler Währung) profitiert weiterhin von der Abwertung des Yen und der Widerstandsfähigkeit der japanischen Wirtschaft. Der MSCI Emerging Markets Index schließlich legte 5.2% zu, trotz des unterdurchschnittlichen Abschneidens des chinesischen Markts, der um 5% nachgab. Auf europäischer Sektorebene schnitten Value-Werte (plus 3.4%) schlechter ab als Wachstumswerte (plus 7.2%). An der Spitze standen der Immobiliensektor (plus 22.6%) und der zinsempfindliche IT-Sektor (plus 18.3%). Der Energiesektor (minus 2.6%) und der Sektor für Basiskonsumgüter waren die einzigen, die das Quartal negativ beendeten.

Zinssätze

Die Zinsmärkte waren gekennzeichnet durch einen starken Rückgang der Zinssätze über die gesamte Kurve hinweg. Der Zinssatz für US-Staatsanleihen mit zehnjähriger Laufzeit lag zum Jahresende bei fast 3.8% und deutsche Bundesanleihen mit zehnjähriger Laufzeit lagen bei rund 2%. Der Markt geht auch davon aus, dass die Fed und die EZB im März eine Zinssenkungsrunde einleiten werden. Dieser rasche Rückgang der Zinssätze lässt sich folgendermaßen erklären: 1) in den Industrieländern ging die Inflation stärker zurück als erwartet; 2) der Tonfall der Fed änderte sich, sie kehrte nun zurück zu den wichtigen Punkten ihrer beiden Aufgaben Inflation und Beschäftigung. Die Fed sieht sich bestätigt durch den Rückgang der Inflation, die Mitglieder des Offenmarktausschusses (FOMC) achten nun sehr auf die Auswirkungen steigender Zinsen auf das Wachstum, um eine übermäßige Verlangsamung der Aktivität zu vermeiden. Daher will die Fed die Wirtschaft nicht länger als nötig bremsen. 3) das Wirtschaftswachstum sorgte in der Eurozone weiterhin für negative Überraschungen. Der Arbeitsmarkt in der Eurozone ist jedoch sehr solide. Die Märkte erwarten nun, dass die Inflation rasch zurückgeht auf 2%, ohne dass es zu einer Rezession kommt.

■ **Erstes Quartal 2024**

Die Vereinigten Staaten verzeichneten im ersten Quartal 2024 weiterhin eine starke Wirtschaftskonjunktur. Von Europa kann man dies nicht sagen, im Vergleich zum letzten Quartal 2023 verbesserte sie sich jedoch leicht. Auch Schwellenländer entwickelten sich tendenziell etwas besser. Die Inflation ging weiter zurück, wenn auch nur langsam. Sowohl die US-Notenbank als auch die Europäische Zentralbank (EZB) deuteten an, dass sie noch etwas warten werden, bis sie ihre Zinssätze senken. Die Renditen an den Anleihemärkten zogen wieder an, während Aktien die Ende 2023 vorhandene gute Dynamik fortsetzten.

USA

Die US-Wirtschaft zeigte weiterhin eine bemerkenswerte Stärke, obwohl viele Beobachter davon ausgingen, dass die Leitzinserhöhungen der Jahre 2022 und 2023 zu einer Rezession führen würden. Ende März ergab eine dritte offizielle Schätzung des BIP für das vierte Quartal 2023 ein annualisiertes Wachstum von 3.4%. Was nun die jüngeren Daten betrifft, so haben die Arbeitsmarktzahlen gezeigt, dass im Januar und Februar netto mehr als 500,000 Arbeitsplätze geschaffen wurden. Dies ist ein stark beschleunigtes Tempo im Vergleich zum vierten Quartal. Die Indikatoren für das Geschäftsklima in der Industrie deuteten wiederum auf einen langsameren Rückgang in den ersten beiden Monaten des Quartals, während sich der Dienstleistungssektor weiter verbesserte. Die Inflation ging weiter zurück, wenn auch nur langsam. Im Februar lag der allgemeine Verbraucherpreisindex über zwölf Monate bei 3.2%, nachdem er im Dezember 3.4% betragen hatte. Der zugrunde liegende Index lag bei 3.8%, gegenüber 3.9% zuvor. Zu Beginn des Quartals versuchte die Federal Reserve die Markterwartungen zu beruhigen mit ihrer Botschaft einer Senkung der Leitzinsen im ersten Quartal. Sie wies darauf hin, dass der nächste Schritt höchstwahrscheinlich eine Senkung sein werde. Sie werde aber erst nach weiteren Anzeichen einer dauerhaften Verlangsamung der Inflation erfolgen.

Eurozone

Nach einer nahezu stagnierenden Entwicklung während des gesamten Jahres 2023 gab es im ersten Quartal einige schwache Anzeichen einer Verbesserung. Im vierten Quartal hatten die Zahlen des BIP einen Wachstumsstillstand zu verzeichnen. In Deutschland waren sie leicht negativ, in Italien und Frankreich leicht positiv und in Spanien eher positiv. Im März stiegen die Einkaufsmanager-Indizes jedoch auf ein Niveau, das auf eine Ausweitung der Aktivität im Dienstleistungssektor hindeutete und in der Industrie gab es einen weniger starken Rückgang als Ende 2023. Andere Indikatoren, etwa der deutsche IFO-Geschäftsklimaindex, meldeten ebenfalls eine ganz leichte Verbesserung. Auch der Arbeitsmarkt widersetzte sich weiter den trüben Wirtschaftsaussichten. Die Arbeitslosenquote blieb im Februar bei 6.5% und damit auf dem niedrigsten Stand seit der Gründung der Eurozone. Die Inflation verlangsamte sich weiter: Der zwölfmonatige Verbraucherpreisindex sank im Februar auf 2.6% (von 2.9% im Dezember), und der Basisindex fiel von 3.4% auf 3.1%. Wie die US-Notenbank versuchte auch die EZB, die Erwartungen einer schnellen Senkung der Leitzinsen zu zerstreuen. Die Botschaft der Sitzung des geldpolitischen Ausschusses vom 7. März wurde weithin interpretiert als Hinweis auf eine erste Senkung im Juni.

Schwellenmärkte

Der Wirtschaftsaufschwung in China war moderat und der Deflationsdruck hält an. Die chinesischen Behörden zogen es vor, die Zinssätze zu senken, anstatt mit haushaltspolitischen Mitteln auf den Schuldenabbau der lokalen Behörden hinzuwirken. Seit Jahresbeginn verbesserte sich das Wachstum in Schwellenländern, auch wenn es in Mittel- und Osteuropa im negativen Bereich blieb. Im Januar ging die Inflation in den meisten Ländern stark zurück. Im Februar gab es jedoch einige positive Überraschungen und auch Bedenken hinsichtlich der Erwartungen. Die Währungen der Schwellenländer waren äußerst volatil, da die zukünftige Geldpolitik der USA weiterhin unklar blieb, und auch Aktien blieben nicht verschont. Die meisten Zentralbanken hatten begonnen, ihre Geldpolitik zu lockern. Sie reagierten erneut rasch, indem sie im März keine Zinssenkungen vornahmen bzw. die Zinssätze unverändert ließen. Die Stimmung der Anleger wird weiterhin stark beeinträchtigt durch den geopolitischen Kontext und besondere Sorgen bereiten mögliche Folgen für die weltweite Inflation.

Die Zahlen in diesem Bericht beziehen sich auf die Vergangenheit und lassen nicht unbedingt auf die zukünftige Wertentwicklung schließen.

Zinssätze

Die Zinsen sind nach wie vor hoch, bei weiterhin hoher Volatilität. Die Rendite deutscher Bundesanleihen mit zehnjähriger Laufzeit lag über 2.3% und die US-amerikanischer Staatsanleihen mit zehnjähriger Laufzeit bei 4.3%. Zwei Faktoren treiben die Märkte nach wie vor an: die Entwicklung der Inflation und die Aussagen der Zentralbanker. Die Märkte sind sehr zuversichtlich, dass die EZB die Zinsen im Juni senken wird. Auf ihrer letzten Ausschusssitzung ließ die EZB tatsächlich die Tür offen für eine Zinssenkung im Juni. Christine Lagarde mahnte jedoch bei der Geldpolitik erneut zu Geduld. Beim Tempo des Desinflationsprozesses bleibt die EZB vorsichtig, insbesondere im Dienstleistungssektor, und wird weiterhin die Entwicklung des Arbeitsmarktes beobachten, der sich als sehr widerstandsfähig erwiesen hat. Auf der anderen Seite sind die Märkte nicht mehr so sicher, ob die Fed die Zinsen im Juni senken wird. Die Fed hat es nicht eilig, die Zinsen zu senken. Sie geht davon aus, dass das zugrunde liegende Wirtschaftswachstum eher wieder anziehen und stärker sein wird als im Dezember. Trotz der jüngsten Beschleunigung der Inflation haben sich die Aussagen der Fed nicht geändert. Sie hält daran fest, dass „die Inflation auf einem manchmal steinigem Weg allmählich in Richtung 2% sinkt“.

Aktien

Riskante Anlagen begannen das Jahr im grünen Bereich. Anleger schenken dem Szenario der „sanften Landung“ Glauben, was zu einem Anstieg der Aktienmärkte führte. Gute Quartalsergebnisse der Unternehmen stützen die Aktienmärkte in diesem Quartal ebenfalls. Globale Aktien profitierten von diesem Anstoßeffekt - der MSCI ACWI stieg um 9.1%. Die USA legten um 10% zu und übertrafen damit Europa mit einem Plus von 7.6%. Die Märkte der Eurozone schnitten mit einem Plus von 9.9% besser ab. Den wichtigsten Beitrag leisteten dabei die Niederlande (plus 17.9%) und Italien (plus 15.7%). Außerhalb der Eurozone entwickelte sich der britische Markt in diesem Quartal weniger gut und legte nur 2.9% zu. Unter den Industrieländern beeindruckte in diesem Quartal der japanische Markt mit einem Anstieg von 18.3%. Der MSCI Emerging Markets Index schließlich machte Fortschritte (plus 4.0%), angetrieben vom überdurchschnittlichen Ergebnis des chinesischen Markts mit einem Anstieg um 16.9%. Auf europäischer Sektorebene schnitten so genannte zyklische Werte (plus 10.4%) besser ab als defensive Werte (plus 2.9%). An der Spitze standen die Bereiche Technologie (plus 17.9%), zyklische Konsumgüter (plus 12.3%) und Versicherungen (plus 11.9%). Die Hauptleidtragenden waren in diesem Quartal Versorgungsunternehmen (-5.6%) und der Immobiliensektor (-1.4%). Wachstumsaktien (plus 10.7%) entwickelten sich besser als Value-Aktien (plus 4.4%).

■ Zweites Quartal 2024

Auf den beiden Seiten des Atlantiks tendierten die Wirtschaftsdaten unterschiedlich. In den USA kam es zu einer leichten Abschwächung der Wirtschaftskonjunktur nach einer zuvor starken Dynamik, und die Inflation ging wieder nach unten. In der Eurozone verbesserte sich das Geschäftsklima nach mehreren schwierigen Quartalen, und die Inflation beschleunigte sich wieder leicht nach mehreren Monaten des Rückgangs. Die EZB leitete am 6. Juni eine erste Zinssenkung ein, während die Fed keine genauen Aussagen dazu machte, wann sie den ersten Schritt tun würde. Die Anleihemärkte entwickelten sich negativ und blieben volatil, insbesondere in Europa, während Aktien weiter zulegten.

USA

Nach mehreren Quartalen, in denen sich die US-Wirtschaft gut behauptet hat, waren im zweiten Quartal erste Anzeichen von Schwäche zu erkennen. Die Zahlen in den USA belegten weiterhin eine starke Aktivität (der ISM-Index für das verarbeitende Gewerbe kehrte zum ersten Mal seit November 2022 zurück in den positiven Bereich, und die Einzelhandelsumsätze stiegen). Dennoch gab es im ersten Quartal erste Anzeichen von Schwäche beim Wachstum des BIP, das unter den Erwartungen lag. Die im Mai veröffentlichten US-Indikatoren deuteten größtenteils auf eine moderate Verlangsamung der Wirtschaftskonjunktur, wobei die ISM-Indizes der Industrie wieder leicht rückläufig waren. Dieser Trend bestätigte sich im Juni. Anders sah es im Dienstleistungssektor aus, wo sich die Aussichten verbesserten. Auch der Arbeitsmarkt entwickelte sich widersprüchlich: Bei der Schaffung von Arbeitsplätzen wurden zwar gute Fortschritte erzielt, die Arbeitslosenquote stieg jedoch auf 4%. Enttäuschende Einzelhandelsumsätze bestätigten allerdings die Verschlechterung der Konsumaussichten und deuteten voraus auf ein schwaches Wachstum im zweiten Quartal.

Der Abwärtstrend der Inflation schien zu Beginn des Quartals zum Stillstand gekommen zu sein. Dies bestätigte sich schließlich durch die Inflation bei persönlichen Konsumausgaben (die bevorzugte Messgröße der Federal Reserve) mit einer annualisierten Rate von 2.6%. Der Inflationsdruck beschränkte sich jedoch auf den Dienstleistungssektor. Vor diesem Hintergrund verzichtete die Federal Reserve darauf, einen Zeitplan für Zinssenkungen bekannt zu geben. Sie wies darauf hin, dass sie zunächst weitere Anzeichen für eine Desinflation benötigt. Die Vertreter der Fed erhöhten ihre Inflationsprognosen für 2024 leicht und verschoben die zeitliche Abfolge der Leitzinssenkungen ohne Änderung der Gesamthöhe von -250 Basispunkten bis Ende 2026. Ende Juni schienen mehrere Fed-Direktoren nicht bereit zu einer Unterstützung von Zinssenkungen vor Jahresende.

Europa

Im zweiten Quartal überraschte Europa angenehm mit einer Verbesserung der Wirtschaftslage. Die Eurozone verzeichnete immer noch schwache absolute Zahlen. Im April war man aber angesichts der pessimistischen Erwartungen deutlich positiv überrascht. Die wichtigsten Konjunkturindikatoren (Sentix, ZEW und Einkaufsmanagerindex) signalisierten insgesamt eine leichte Verbesserung der Aktivität, obwohl die Lage im verarbeitenden Gewerbe nach wie vor angespannt war. Im Juni bestätigte sich eine leichte Erholung der Volkswirtschaften mit beträchtlichen Besserungsaussichten. Für das zweite Quartal erwartete man daher eine moderate Ausweitung.

Insgesamt ist der Inflationstrend in der Eurozone rückläufig. Im Dienstleistungssektor, der Hauptantriebsfaktor der Inflation ist, hält er sich jedoch in Grenzen. Die Inflationsstatistiken für Mai brachten einen Anstieg auf 2.6% im Jahresvergleich, gegenüber 2.4% im April, und einen erneuten annualisierten Rückgang auf 2.5% im Juni. Dies ist hauptsächlich zurückzuführen auf die Inflation im Dienstleistungssektor, die nur allmählich zurückgehen dürfte. Die jährliche Basisinflationsrate ohne Berücksichtigung der volatilen Lebensmittel- und Energiepreise lag im April bei 2.7% und im Juni bei 2.9% und damit über den Markterwartungen. In den großen Volkswirtschaften sank die (auf EU-Ebene harmonisierte) Inflation in Deutschland (2.5%), Frankreich (2.5%) und Spanien (3.5%). In Italien stieg sie hingegen (0.9%).

Trotz der volatilen Inflation und der wieder anziehenden Konjunktur senkte die EZB am 6. Juni erstmals seit fast fünf Jahren ihre Leitzinsen um 25 Basispunkte. Der Einlagensatz sank damit im Einklang mit den Markterwartungen von 4% auf 3.75%. Christine Lagarde äußerte sich jedoch nicht zu künftigen Zinssenkungen. Die vorübergehende Divergenz zwischen der Fed und der EZB wirkte sich nur in begrenztem Maße auf den Euro aus. Dieser fiel gegenüber dem US-Dollar von 1.09 auf 1.07.

Im Vereinigten Königreich lag die Inflation wieder bei 2%. Im Vorfeld der dortigen Wahlen am 4. Juni beließ die Bank of England ihre Zinssätze dennoch bei 5.25%. Dies sorgte für Ungewissheit hinsichtlich der zukünftigen Entwicklung.

Asien

Die japanischen Inflationsdaten für Mai waren niedriger als übereinstimmend erwartet, und die Wachstumsstatistiken für das erste Quartal wurden gesenkt. Die Inflation (ohne Energie und Frischwaren) lag bei 2.1% im Jahresvergleich und damit unter den prognostizierten 2.2%. Die Inflation kehrte etwas schneller als erwartet zurück zum Zielwert der Bank of Japan (BoJ). Logischerweise geht der Markt von einer Beibehaltung der kurzfristigen Zinssätze durch die BoJ aus. Dies führt zu einem weiteren Rückgang des Yen (am Ende des Quartals überschritt das Verhältnis USD/JPY die Marke von 160).

Der chinesische Immobilienmarkt kann sich nicht stabilisieren und verzeichnet einen anhaltenden Mengen- und Preisrückgang. Die von der chinesischen Regierung angekündigten jüngsten Maßnahmen deuten auf eine Trendwende dieser Situation, die Konsum und Beschäftigung seit mehreren Quartalen belastet. Mit dem Übergang von technischen Maßnahmen mit geringer Wirkung zu einer engagierteren Politik gegenüber dem Bausektor wollen die chinesischen Behörden bekräftigen, dass sie gewillt sind, das Wachstumsziel von 5% in diesem Jahr zu erreichen. In einem angespannten geopolitischen Umfeld wird China von seinen Handelspartnern in vielen Sektoren unlauterer Wettbewerb vorgeworfen. Dies führt zu einer Erhöhung der US-Zölle und möglicherweise zu einem ähnlichen Schritt der EU. Das größte Risiko bleibt jedoch die schwache Binnennachfrage. Die Indikatoren des Einkaufsmanagerindex bestätigten dies im Juni.

Schwellenmärkte

In den Schwellenländern ist die allgemeine Inflation scheinbar unter Kontrolle. Dennoch richten sich alle Augen auf die US-Notenbank. Diese senkt die Zinsen voraussichtlich erst in der zweiten Hälfte des Jahres 2024. Von ihr hängen aber wiederum die Entscheidungen der Zentralbanken der Schwellenländer ab. Die Zentralbanken von Malaysia und Mexiko, die South Africa Reserve Bank (SARB), die Polnische Nationalbank (NB) und die Türkische Zentralbank (TCMB) ließen ihre Zinssätze unverändert. Die Tschechische Nationalbank (CNB) und die Ungarische Nationalbank (NBH) hingegen senkten ihre Zinssätze um 50 Basispunkte und die Bulgarische Zentralbank (BCB) sowie die Peruanische Zentralbank (BCRP) senkten ihre Zinssätze um 25 Basispunkte. Wegen ihrer Präferenz für Währungsstabilität sieht sich die People's Bank of China nach wie vor dazu genötigt, die Zinssätze konstant zu halten.

Am 4. Juni gab Indien die Ergebnisse seiner Parlamentswahlen bekannt. Die nationale demokratische Allianz unter Führung der Bharatiya Janta Party (BJP) wurde mit äußerst knapper Mehrheit wiedergewählt. Dennoch erhielt Modi die Unterstützung seiner Verbündeten in der Koalition. Dies ermöglichte ihm, zum dritten Mal in Folge eine Regierung zu bilden. Nach dem guten Abschneiden indischer Aktien über mehrere Quartale hinweg werden die Anleger darauf achten, ob bei den ehrgeizigen Wirtschaftsreformen und den öffentlichen Finanzen Fortschritte erzielt werden.

Zinssätze

Nach dem Ende des Inflationsrückgangs in hoch entwickelten Volkswirtschaften, der immer noch unruhigen US-Wirtschaft und dem Anziehen europäischer Volkswirtschaften blieben die Anleihemärkte weiterhin volatil. Die Rendite US-amerikanischer Anleihen mit zehnjähriger Laufzeit näherte sich 4.5%, während die Zinsen bei zweijährigen Laufzeiten weiterhin in der Nähe von 5% lagen. In Europa lag die Rendite deutscher Anleihen mit zehnjähriger Laufzeit bei über 2.6% und die französischer Staatsanleihen (OAT) bei über 3%. Die Zinsdifferenzen zwischen den wichtigsten europäischen Staatsanleihen blieben stabil. In Frankreich ist allerdings eine ungünstige Entwicklung festzustellen, nachdem Standard & Poor's sein Rating herabstufte und nach der Niederlage der Bewegung des Präsidenten bei den Europawahlen die Auflösung der Nationalversammlung angekündigt wurde.

In den USA erweist sich die Inflation seit Jahresbeginn entgegen der Erwartungen als hartnäckig und die US-Notenbank spricht nun davon, „es nicht eilig zu haben, die Zinsen zu senken“. Auf den Anleihemärkten sorgte dies für Volatilität. Im Gegensatz dazu scheint die Inflation in Europa inzwischen mehr oder weniger unter Kontrolle zu sein, und die EZB leitete eine erste Zinssenkung ein. Dank robuster Wirtschaftskonjunktur, starker Bilanzen und erwarteter Zinssenkungen durch die Zentralbanken entwickeln sich die Kreditmärkte positiv.

Aktien

Im April wurden in den USA Inflationsdaten veröffentlicht, bei denen viele befürchteten, dass sie zu einer erneuten Zinserhöhung der Fed führen würden. Danach erholten sich die Aktienmärkte im Laufe des Quartals aber dank der Veröffentlichung beruhigender Ergebnisse für das erste Quartal.

Der MSCI World Index stieg um 2.6%, je nach Region allerdings mit äußerst unterschiedlichen Ergebnissen. Der US-Markt legte um 4.1% zu. Damit übertraf er in Dollar gerechnet Europa (plus 1.65%) und Japan (minus 2.5%) deutlich. Der französische Markt wurde beeinträchtigt durch die politischen Geschehnisse im Land und fiel im Juni um rund 6%.

Der S&P500 (TR) Index stieg im zweiten Quartal um 4.3% und alleine im Juni um 3.6%. Das Quartal startete nicht gut. Im April kam es nach einer Reihe von Meldungen mit einer höher als erwarteten Inflation zu einem Rückschlag. Dies trieb die Zinsen in die Höhe und schürte Befürchtungen hinsichtlich einer erneuten Zinserhöhung durch die Fed. Später zerstreuten sich die Inflationsängste und der Aktienmarkt erreichte neue Höchststände.

Bei der Dynamik der Aktienmärkte ist eine Veränderung festzustellen. Es gibt eine geringere Konzentration auf sehr große US-Aktien (die Glorreichen Sieben) und eine überdurchschnittlich gute Entwicklung in Europa in bestimmten Phasen. Anleger sind dabei auf der Suche nach Sektoren oder Regionen, die weniger teuer sind als die Vereinigten Staaten. Die politische Unsicherheit in Frankreich nach der Auflösung der Nationalversammlung führte jedoch dazu, dass sich außereuropäische Anleger zurückzogen. Die große Überraschung war aber die Erholung des chinesischen Markts (plus 5.4%) nach der Ankündigung der chinesischen Regierung, den Immobiliensektor stärker zu unterstützen, und trotz der Gewinnmitnahmen im Juni. Trotz des Anstiegs langfristiger Zinssätze entwickeln sich Wachstumswerte weiterhin deutlich besser als das Value-Segment, auch wenn wir in der ersten Quartalshälfte ein erneutes Interesse an verbilligten Sektoren und die Erholung europäischen Bankaktien feststellen konnten.

2 GRUNDSÄTZE DER RECHNUNGSLEGUNG

■ DARSTELLUNG DES GESCHÄFTSBERICHTS

Die Geschäftsberichte des Fonds wurden in Übereinstimmung mit den geltenden Bestimmungen über OGA in Luxemburg erstellt.

Der Abschluss wird auf der Grundlage des letzten während des Geschäftszeitraums berechneten Nettoinventarwerts („NIW“) dargestellt. In Übereinstimmung mit dem Prospekt vom April 2024 und der Ergänzung vom Mai 2024 wurden die NIW unter Verwendung der letzten Marktwerte und Wechselkurse berechnet, die zum Zeitpunkt der Berechnung bekannt waren, d. h.:

- Für alle Teilfonds (außer Amundi Funds Equity MENA): offizieller NIW vom 28. Juni 2024;
- Für Amundi Funds Equity MENA: offizieller NIW vom 27. Juni 2024.

Im Jahresbericht zum 30. Juni 2024 werden die während dieses Jahres zusammengelegten oder aufgelösten Teilfonds in der Ertrags- und Aufwandsrechnung und Änderungen des Nettovermögens separat dargestellt und sind in den konsolidierten Zahlen enthalten.

Mit Ausnahme des Teilfonds Global Macro Bonds & Currencies Low Vol wurde der Geschäftsbericht des Fonds und der jeweiligen Teilfonds nach dem Grundsatz der Unternehmensfortführung erstellt.

Ziel des Amundi Funds Protect 90 ist es, Ihnen innerhalb eines Zeitraums von drei Jahren die Möglichkeit zu bieten, an der Entwicklung der Finanzmärkte teilzuhaben und zugleich einen Teil ihrer Anlage dauerhaft abzusichern. Laut Prospekt soll der Teilfonds vor allem sicherstellen, dass sein Aktienkurs nicht unter 90 % des höchsten Nettoinventarwerts fällt, der seit dem letzten Geschäftstag des vorangegangenen Monats April erreicht wurde.

- **Querbeteiligungen von Teilfonds** - Zum 30. Juni 2024 besitzen die Teilfonds Anlagen anderer Teilfonds der SICAV im Wert von EUR 809,545,087.52. Dies entspricht 1.06% des gesamten Nettoinventarwerts. Daher beliefe sich der gesamte zusammengefasste NIW ohne diese Anlagen in anderen Teilfonds zum Jahresende auf EUR 75,735,141,619.48.
- **Wertpapierportfolio** - Der Wert der börsennotierten oder auf einem regulierten Markt gehandelten Wertpapiere wird zum letzten bekannten Börsenkurs ermittelt. Falls dieser Kurs nicht repräsentativ ist oder die Wertpapiere nicht börsennotiert sind, wird er zum vorsichtig und in gutem Glauben vom Verwaltungsrat geschätzten Veräußerungswert bewertet.
- **Umwandlung der in Fremdwährung lautenden Posten** - Die Geschäftsberichte des Fonds lauten auf Euro (EUR). Daher wird das in anderen Währungen lautende Nettovermögen jedes Teilfonds zu dem am Abschlussstag des Geschäftsjahres gültigen Wechselkurs in EUR umgerechnet und konsolidiert. Aktiengeschäfte und Käufe von Aktien aus Portfolios in anderen Währungen werden in der Währung des Teilfonds zu dem am Tag der Transaktion oder des Erwerbs gültigen Wechselkurs umgerechnet. Der Börsenwert des Wertpapierbestandes sowie die übrigen Vermögenswerte und Verbindlichkeiten in anderen Währungen werden zu dem am Abschlussstag des Geschäftsjahrs gültigen Wechselkurs in die Währung umgerechnet, auf welche der Teilfonds lautet. Währungsdifferenzen aus diesen Umtauschtransaktionen werden in der Aufwands- und Ertragsrechnung für das Nettovermögen in der Rubrik „Neubewertung des konsolidierten Nettovermögens“ festgehalten.
- **Kapitalrendite** - Die Dividenden werden an dem Tag als Ertrag verrechnet, an dem sie erklärt wurden, soweit der Fonds über diesbezügliche Informationen verfügt. Zinsen werden auf Tagesbasis verrechnet.
- **Aufteilung der Kosten und Aufwendungen** - Jeder Teilfonds wird mit den Kosten oder Aufwendungen belastet, die ihm jeweils zuzurechnen sind. Die Kosten und Aufwendungen, die keinem Teilfonds im Besonderen zugerechnet werden können, werden auf angemessene Weise zwischen den Teilfonds entsprechend deren jeweiligem Nettovermögen aufgeteilt.
- **Pensionsgeschäfte** - Pensionsgeschäfte (Repos) entsprechen Geschäften mit Anleihen, die durch Vermögenswerte gedeckt sind. Diese sind im Wertpapierbestand des Teilfonds vertreten, der weiterhin dem Marktrisiko ausgesetzt ist. Reverse Pensionsgeschäfte entsprechen gedeckten Darlehen. In diesem Fall ist der Teilfonds keinem Risiko einer Minderung des Vermögenswertes ausgesetzt. Pensionsgeschäfte und Reverse Pensionsgeschäfte werden als Geschäfte mit Anleihen und Darlehen in Höhe der eingegangenen und/oder ausgezahlten liquiden Mittel betrachtet.
- **Termingeschäfte oder Futures** - Nicht fällige Termingeschäfte werden zu ihrem letzten, am Bewertungstag oder Stichtag bekannten Kurs bewertet. Die daraus entstandenen, nicht realisierten Gewinne oder Verluste werden in den Veränderungen des Nettovermögens verbucht. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus Termingeschäften werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Termingeschäftartige Optionen** - Termingeschäftartige Optionen werden zum verfügbaren offiziellen Börsenpreis bewertet. Ersteinschusszahlungen werden bei Abschluss des Kontrakts in bar bezahlt. Der Teilfonds zahlt oder erhält regelmäßig nachfolgende positive oder negative Barmittelflüsse, die Schwankungsmargen genannt werden. Sie basieren auf Änderungen des Marktwerts termingeschäftartiger Optionen. Bei Abschluss des Kontrakts verzeichnet der betroffene Teilfonds einen realisierten Gewinn bzw. Verlust in Höhe der Differenz zwischen den Erlösen (bzw. den Kosten) aus dem Abschluss- und dem Eröffnungsgeschäft. Nicht realisierten Nettogewinne oder -verluste aus termingeschäftartigen Optionen werden in der Aufwands- und Ertragsrechnung verbucht. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus termingeschäftartigen Optionen werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Devisentermingeschäfte** - Nicht fällige Devisentermingeschäfte werden zu den am Bewertungstag oder Stichtag gültigen Kursen bewertet. Daraus entstandene, nicht realisierte Gewinne oder Verluste werden in den Veränderungen des Nettovermögens verbucht. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus Devisentermingeschäften werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Bewertung von Optionen und Swaptions** - Für Optionen, die an einer Aktienbörse oder einem anderen regulierten, regelmäßig betriebenen, anerkannten und öffentlichen Markt gehandelt werden, gilt, dass sie mit ihren Schlusskursen am Bewertungstag veranschlagt werden. Außerbörslich gehandelte Optionen werden basierend auf den in den Kontrakten festgeschriebenen Elementen nach dem aktuellen Marktpreis bewertet. Sind die letzten verfügbaren Kurse börsennotierter Optionen oder die ermittelten Kurse außerbörslich gehandelter Optionen nicht repräsentativ, so beruht die Bewertung auf dem möglichen Realisierungswert, den der Verwaltungsrat der SICAV umsichtig und in gutem Glauben schätzt. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus außerbörslich gehandelten Optionen und Swaptions werden in der Aufwands- und Ertragsrechnung und den Veränderungen des Nettovermögens verbucht.
- **Swaps** - Der Fonds ist berechtigt, Varianzswaps, Credit Default Swaps, Total Return Swaps, Inflationsswaps, Asset Swaps, Zinsswaps oder Währungsswaps einzugehen. Diese Swaps werden zum Marktwert basierend auf den in den Kontrakten festgeschriebenen Bewertungselementen festgehalten. Der nicht realisierte Nettogewinn ist in der Nettovermögensaufstellung im Posten „Nicht realisierter Nettogewinn aus Swapgeschäften und CFD“ enthalten. Der nicht realisierte Nettoverlust ist in der Nettovermögensaufstellung im Posten „Nicht realisierter Nettoverlust aus Swapgeschäften und CFD“ enthalten. Realisierte Nettogewinne/(-verluste) bzw. Veränderungen nicht realisierter Nettogewinne/(-verluste) aus Swaps werden in der Aufwands- und Ertragsrechnung und in den Veränderungen des Nettovermögens verbucht.
- **Geldmarktinstrumente** - Der Geldmarkt ist ein Finanzinstrument mit hoher Liquidität und sehr kurzen Laufzeiten. Teilnehmer nutzen ihn für kurzfristige Leihgeschäfte als Leihnehmer und Leihgeber. Die Laufzeiten bewegen sich in der Regel zwischen einem Tag und knapp einem Jahr. Der Wertzuwachs (die Differenz zwischen Kosten und amortisiertem Wert) von Geldmarktinstrumenten des Wertpapierbestands zum Jahresende wird in der Aufwands- und Ertragsrechnung für das Nettovermögen unter „Veränderung des nicht realisierten Nettogewinns / (-verlusts) aus Wertpapiieranlagen und Verbindlichkeiten aus reversen Pensionsgeschäften“ ausgewiesen. Sollten die Instrumente verkauft oder rückerstattet worden sein, so wird dieses Ergebnis in der Aufwands- und Ertragsrechnung für das Nettovermögen als „realisierter Nettogewinn/(-verlust) aus verkauften Wertpapieren“ berücksichtigt.
- **Wertpapiere der Kategorie „To Be Announced“ (TBAs)** - Der Begriff TBA-Positionen verweist auf die übliche Handelspraxis auf dem Markt für hypothekenbesicherte Wertpapiere, bei denen ein Wertpapier zu einem späteren Zeitpunkt zu einem festen Preis aus einem Hypothekenpool (z. B. Ginnie Mae, Fannie Mae oder Freddie Mac) gekauft wird. Zum Zeitpunkt des Kaufs ist nicht genau bekannt, um welches Wertpapier es sich handelt, im Wesentlichen verfügt es jedoch über die genannten Merkmale. Auch wenn der Preis zum Zeitpunkt des Kaufs festgelegt wurde, steht der Marktwert noch nicht fest. TBA-Positionen werden im Wertpapierbestand aufgeführt. Der Kauf derartiger Positionen wurde noch nicht abgeschlossen und in den Veränderungen des Nettovermögens wird der entsprechende Betrag der bei Abschluss der Transaktion fälligen Zahlung unter „Verbindlichkeiten aus Kauf von Wertpapieren“ aufgeführt. Realisierte Nettogewinne/ (-verluste) aus TBAs und Änderungen nicht realisierter Gewinne/Verluste werden in der Aufwands- und Ertragsrechnung unter der Überschrift

„Realisierter Nettogewinn/ (-verlust) aus verkauften Wertpapieren“ und „Veränderung des nicht realisierten Nettogewinns / (-verlusts) aus Wertpapieranlagen und aus Verbindlichkeiten aus reversen Pensionsgeschäften“ aufgeführt. MBS-/ABS-Risiko Hypothekenbesicherte und forderungsbesicherte Wertpapiere (MBS und ABS) haben normalerweise ein Vorauszahlungs- und Verlängerungsrisiko und können ein überdurchschnittliches Liquiditäts-, Kredit- und Zinsrisiko haben.

- **Realisierter Nettogewinn/(-verlust) aus verkauften Wertpapieren** - Der „Realisierte Nettogewinn/(-verlust) aus verkauften Wertpapieren“ in der Aufwands- und Ertragsrechnung für das Nettovermögen spiegelt die Differenz zwischen den Kosten und Erträgen der Wertpapiere wider, einschließlich der markt- und währungsbedingten Auswirkungen.
- **Transaktionskosten** - Die Transaktionskosten beinhalten Maklergebühren und Gebühren der Depotstelle für Transaktionen mit Wertpapieren und Derivaten. Die Transaktionsgebühren sind nicht in den Kosten der gehandelten Wertpapiere und Derivate enthalten. Alle diese Gebühren werden in der Aufwands- und Ertragsrechnung für das Nettovermögen unter der Rubrik „Transaktionsgebühren für Makler“ aufgeführt. Siehe Anmerkung 23 zur Annahme und Übermittlung von Auftragsgebühren.
- **Differenzkontrakte (CFD)** - An jedem Bewertungstag wird der Preisunterschied zwischen der Anfangsnotierung und dem aktuellen Marktpreis des dem CFD zugrunde liegenden Wertpapiers bzw. Index als Marktwert (nicht realisierter Gewinn oder Verlust) festgehalten; wenn der Teilfonds ein Abschlussgeschäft tätigt, wird die Differenz zwischen dem Nominalwert des Eröffnungs- und Abschlussgeschäfts des zugrunde liegenden Wertpapiers in der Aufwands und Ertragsrechnung für das Nettovermögen unter den Rubriken Realisierter Nettogewinn/(-verlust) aus Swaps und CFD als realisierter Gewinn oder Verlust festgehalten. Ersteinschusszahlungen können bei Abschluss des CFD in bar erfolgen. Der Teilfonds zahlt oder erhält regelmäßig nachfolgende Zahlungen, die Schwankungsmargen genannt werden. Sie basieren auf Änderungen des Marktwerts offener CFD-Kontrakte.
- **Wertpapierbeleihungen** - Bei Transaktionen mit Wertpapierbeleihungen überträgt ein Verleiher Wertpapiere oder Instrumente an einen Entleiher und der Entleiher verpflichtet sich dazu, zu einem zukünftigen Zeitpunkt oder auf Bitte des Verleihers gleichwertige Wertpapiere oder Instrumente zurückzugeben. Der Entleiher muss eine Sicherheit als Garantie bereitstellen, die sich über die Leihfrist erstreckt und mindestens gleichwertig ist mit der allgemeinen Bewertung der verliehenen Wertpapiere zuzüglich dem Wert von Sicherheitsabschlägen, die angesichts der Qualität der Sicherheit als angemessen erachtet werden.

Die erfolgsabhängige Gebühr wird für jede Anteilklasse separat berechnet. Sie fällt für jede Anteilklasse täglich an, und wird jährlich für jede Anteilklasse abgezogen und gezahlt. Die erfolgsabhängige

Gebühr wird berechnet durch den Vergleich des NIW der jeweiligen Anteilklasse des Teilfonds mit der Wertentwicklung des Referenzwerts.

Weitere Angaben zum verwendeten Mechanismus finden Sie auf der Website www.amundi.lu/Amundi-Funds

Die Teilfonds und die Anteilklassen, bei denen eine erfolgsabhängige Gebühr anfällt, sind auf der Website www.amundi.lu/Amundi-Funds aufgeführt.

Bitte beachten Sie, dass für alle in Hongkong genehmigten Teilfonds eine erfolgsabhängige Gebühr gilt.

Der Vorteil des Satzes der „Taxe d'Abonnement“ von 0.01% p. a. kommt denjenigen Anteilseignern zugute, die auf Grundlage der luxemburgischen gesetzlichen, aufsichtsrechtlichen und steuerlichen Vorschriften für die Anteilsklassenkategorie H, die Anteilsklassenkategorie I, die Anteilsklassenkategorie J, die Anteilsklassenkategorie M, die Anteilsklassenkategorie O, die Anteilsklassenkategorie OR die Anteilsklassenkategorie SE, die Anteilsklassenkategorie X und die Anteilsklassenkategorie Z zugelassen sind, soweit dies dem Fonds zum Zeitpunkt der Zulassung eines Anlegers für diese Anteilsklasse bekannt ist.

Es kann diesbezüglich jedoch keine Gewähr für die Vergangenheit und die Zukunft gegeben werden. Diese Beurteilung hängt von den jeweiligen Auslegungen des Status eines in Frage kommenden Anlegers in der Anteilsklassenkategorie H, der Anteilsklassenkategorie I, der Anteilsklassenkategorie J, der Anteilsklassenkategorie M, der Anteilsklassenkategorie O, der OR, der Anteilsklassenkategorie SE, der Anteilsklassenkategorie X und der Anteilsklassenkategorie Z ab, die durch die jeweils zuständigen Behörden erfolgen. Jede von den Behörden vorgenommene Neufestsetzung des Status von Anlegern kann dazu führen, dass die gesamte Anteilsklasse dem jährlichen Satz der „Taxe d'Abonnement“ von 0.05% unterworfen wird.

CREDIT DEFAULT SWAPS

Der Fonds hat sogenannte „Credit Default Swap“-Kontrakte abgeschlossen. Damit wird das Kreditrisiko festverzinslicher Instrumente zwischen den Parteien übertragen. Die Rendite aus den festverzinslichen Papieren, die gegen die aus Kreditereignissen eines Indexes oder einer Anleihe erzielten Erträge ausgetauscht werden, werden bei jeder Berechnung des Nettovermögenswertes berechnet und verbucht.
