WHAT IS THIS PRODUCT?

Type

Sub-fund of an open-ended investment fund (SICAV)

This document describes the R-co Thematic Silver Plus sub-fund of the SICAV, which may include other types of shares distributed in your Member State.

Term

The intended term of the fund is 99 years.

However, the sub-fund will be wound up automatically if the shareholders redeem all of the shares. Furthermore, the SICAV's Board of Directors may, at any time and for any reason, request the extension, early dissolution or liquidation of the SICAV at an extraordinary general meeting.

Objectives

The sub-fund comes under the "European Union Equities" category. Its investment objective, over the recommended investment horizon of five (5) years or more, is to outperform the benchmark (Dow Jones Eurostoxx with net dividends reinvested) by implementing discretionary management. The sub-fund's composition may deviate significantly from that of the benchmark.

The management strategy focuses on identifying and monitoring a number of economic, geopolitical and financial factors on a monthly basis, and tracking how they are expected to affect the market behaviour of large and small/mid-caps.

The sub-fund's strategy is discretionary and the allocation is as follows:

- between 75% and 100% on one or more equity markets irrespective of industry or capitalisation. At least 80% of the sub-fund's equity allocation will be invested on regulated equity markets in eurozone countries, and up to 20% in shares issued in non-eurozone countries, including a maximum of 10% in shares issued in countries that do not belong to the European Union (including non-OECD countries and emerging markets). The sector breakdown of issuers is not predetermined but will depend on market opportunities. Foreign exchange risk may not exceed 20% of net assets for a eurozone investor, with a maximum of 10% for currencies outside the European Union. The weighting of large caps is always between 40% and 80% of the sub-fund's net assets, and that of small caps (including micro caps) and mid caps between 20% and 60%.

- between 0% and 25% of net assets in debt securities and money market instruments. The sub-fund will invest in negotiable debt securities, including short-term negotiable securities and Euro Commercial Paper, denominated in euro, of all maturities, at fixed or variable rates, with any rating (including up to 10% in high-yield securities), as well as in products with no rating from the rating agencies.

- between 0% and 10% in units or shares of other UCITS or French or European AIFs or investment funds incorporated under foreign law that meet the four criteria set out in article R. 214-13 of the French Monetary and Financial Code.

To achieve the investment objective, the portfolio manager may take positions on regulated, organised or over-the-counter markets for the purpose of hedging and/or exposing the portfolio. To achieve this objective, the sub-fund may invest for exposure to and/or hedging of the equity and foreign exchange risk.

Overexposure is not sought; total exposure (equities and derivatives) will therefore not exceed 100% of the sub-fund's net assets. The portfolio's overall exposure to foreign exchange risk, including exposure resulting from the use of derivatives, will not exceed 20% of the sub-fund's net assets.

Valuation frequency: Daily. Centralisation of subscription/redemption (S/R) orders: at 12.00 pm every day with Rothschild Martin Maurel for bearer shares recorded at Euroclear, and with IZNES for pure registered shares already recorded or to be recorded on IZNES's shared electronic record system (DEEP). Order execution: next NAV (unknown price). Settlement date of S/R orders: NAV + 2 business days. This is an accumulation share class.

The positive contribution of environmental, social and governance (ESG) criteria may be taken into consideration in investment decisions, although it is unlikely to be the decisive factor.

Intended retail investor

The sub-fund is intended for investors who are primarily seeking exposure to eurozone equity markets.

Not available to US Persons.

Recommendation: this fund may not be suitable for investors planning to withdraw their money within five years of investing.

Practical information

The custodian of the UCITS is Rothschild & Co Martin Maurel trading under the name Rothschild Martin Maurel.

The prospectus of the UCITS and the latest annual and interim documents are available in French and will be sent out free of charge within eight business days of a simple written request being sent to the following address:

Rothschild & Co Asset Management - Service Commercial, 29 avenue de Messine, 75008 Paris.

The net asset value is published on the management company's website: <https://am.priips.rothschildandco.com>.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for five years. The actual risk can vary significantly if you cash in at an early stage and you may get

back less.

We have classified this product as 4 out of 7, which is a medium risk class and mainly reflects its positioning on the eurozone equity market. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

This product does not include any protection from future market performance nor any capital guarantee, so you could lose some or all of your investment.

Other materially relevant risks not taken into account by the indicator:

- **Liquidity risk:** Risk associated with low liquidity in underlying markets, which makes them vulnerable to substantial buy/sell flows.
- **Impact of techniques such as using derivatives:** The use of derivatives may amplify the effect of market movements on the portfolio.

For more information on risks, please refer to the fund prospectus.

Performance scenarios

The figures shown include all the costs of the product itself, as well as all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over at least the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between December 2021 and December 2023. The moderate scenario occurred for an investment between March 2017 and March 2022. The favourable scenario occurred for an investment between October 2016 and October 2021.

WHAT HAPPENS IF ROTHSCHILD & CO ASSET MANAGEMENT IS UNABLE TO PAY OUT?

The fund is a co-ownership of financial instruments and deposits separate from the portfolio management company. In the event of this company's insolvency, fund assets held with the custodian will not be affected. In the event of the custodian's insolvency, the risk of financial loss on the fund is mitigated by the legal segregation of the custodian's assets from those of the fund.

Investment in a fund is not guaranteed and is not covered by any national compensation scheme.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and the return on the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

Investment: €10,000		
Scenarios		
Total costs	If you exit after 1 year	If you exit after 5 years
	€605	€1,954
Impact of annual costs*	6.14%	3.18%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at end of the recommended holding period, your average return per year is projected to be 10.02% before costs and 6.84% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	4.00% of the amount that you pay in when entering the investment. This is the maximum amount that you will pay. The person selling you the product will inform you of the actual charge.	€400
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	€0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.52% of the value of your investment per year. This is an estimate based on actual costs over the last year.	€146
Transaction costs	0.62% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	€59
Incidental costs taken under specific conditions		
Performance-related fees	There is no performance-related fee for this product.	€0
