## What is this product?

### Type:

This product is a type of collective investment scheme, specifically, a sub-fund of an Irish authorised undertaking for collective investment in transferable securities (or "UCITS") constituted as an investment company under Irish company law. Your investment will take the form of shares in the Fund.

### Term:

The Fund, unless dissolved pursuant to any specific cause set forth in a mandatory law or in accordance with the prospectus of the Fund, is established for an unlimited duration.

### Objectives:

The objective of the Fund is to achieve income and capital growth.

The Fund aims to achieve its objective by investing primarily (at least 70% of its assets) worldwide in bonds and debt instruments including mortgage and asset back securities (a financial security backed by loans, leases and other assets) denominated in various currencies and listed, traded or dealt on a regulated market in the OECD.

At least two thirds of the total assets will be invested in debt instruments worldwide. The Fund may invest up to one third of its assets in bank deposits or convertible bonds (being a type of bond which can be converted to common stock or cash) and bonds with warrants attached (warrants being a form of debenture which gives the right but not the obligation to buy and sell a security before a certain date at a certain price) or money market instruments.

The Fund may invest up to 25% of its assets in convertible bonds (being a type of bond which can be converted to common stock or cash) and bonds with warrants attached (warrants being a form of debenture which gives the right but not the obligation to buy and sell a security before a certain date at a certain price).

The Fund mainly invests in bonds issued by companies, governments and their agencies. Most bond holdings will have an investment grade rating but the Fund may invest up to 30% of its assets in non-investment grade issues.

The Fund is broadly diversified across countries, industry sectors and with varying maturities (defined holding term for a bond).

The Fund may gain market exposure indirectly through the use of specialist financial techniques (known as derivatives). Derivatives may be used to manage the Fund's exposures to risk, or to manage the Fund more efficiently.

The Fund aims to reduce its carbon exposure relative to the Index. This is primarily achieved using an exclusions policy, whereby, the Fund excludes from investment companies that derive more than 10 per cent. of their revenue from coal (with certain exceptions).

Russell Investments may employ a variety of management styles. This may

include delegating investments to money managers or managing strategies in-house.

The Fund is actively managed with reference to the Bloomberg Global Aggregate Credit Index (USD) - Total Returns (the "Index").

The Fund's performance will be measured against the Index which it seeks to outperform by 0.75% over the medium to long term. Russell Investments and/or the money managers may manage a portion of the Fund with reference to an index which is not the Index. Any such indexes used will be relevant to each Russell Investments and/or money manager strategy and may be used as the basis for portfolio constraints or for performance measurement purposes. Any such constraints are not expected to materially constrain the relevant portfolio from being managed on a fully discretionary basis.

As your shares are in Euro and the Fund is in US Dollars, fluctuating currency exchange rates may affect the value of your investment. Income of the Fund will be declared as a dividend and then re-invested to increase the value of your investment.

You may sell your shares in the Fund on any day on which banks are normally open for business in Ireland. For further information please refer to the "Repurchases of Shares" section of the prospectus.

The Fund may be terminated at the discretion of the directors of the Company, provided that a minimum of twenty-one days' written notice has been provided to Shareholders. The Fund may also be terminated by the Shareholders in the Fund, if voted for by at least 75% of the Shareholders in the Fund.

The Fund's depository is State Street Custodial Services (Ireland) Limited (the "Depository").

The share price is published on each business day and is available online at [www.bloomberg.com](http://www.bloomberg.com).

Further information about the Fund, copies of the English, German, French and Italian prospectus and the latest annual and semi-annual reports in English may be obtained free of charge by writing to Russell Investments, Rex House, 10 Regent Street, London SW1Y 4PE, England. They are also available online at <https://microsite.fundassist.com/RussellEMEA/Home/RegulatorView>.

### Intended retail investor:

The Fund is designed primarily for investors seeking to generate income and capital growth. It should form part of a broader portfolio of investments but may also be suitable as a significant component of an investor's overall portfolio. The Fund is intended for investors with a medium to long term investment horizon and with a preference towards the promotion of environmental characteristics. Investors in the Fund should be prepared to take on a relatively high level of risk of loss to their original capital. For a basic investor, the Fund should be purchased with advice or on an execution only basis.

## What are the risks and what could I get in return?

### Risk Indicator

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level and poor market conditions are unlikely to impact the value of your investment.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

The summary risk indicator only takes market and credit risk into account. For a full list of the risks materially relevant to the Fund, please see the Prospectus at: <https://microsite.fundassist.com/RussellEMEA/Home/RegulatorView>.

This product does not include any protection from future market performance so you could lose some or all of your investment, however, your liability will be limited to the amount invested and you will not be liable for any additional financial commitments beyond the amount you have invested.
