### Objectives

**Investment objective** To increase the value of your investment over time and to outperform the eurozone government bond markets.

**Benchmark(s)** JP Morgan EMU Government Bond Index® (total return). The benchmark does not take into account ESG criteria. For designing the portfolio, measuring performance and calculating performance fee.

**Investment policies** The fund mainly invests in investment grade government bonds denominated in euro. The fund generally favours direct investment but may at times invest through derivatives.

Specifically, the fund normally invests at least 70% of total net assets in debt and debt-related instruments, including money market instruments, denominated in euro.

The fund may invest in the following asset classes up to the percentages of total net assets indicated:

- deposits in any currency: 20%
- units of UCITS and other UCIs: 10%

The fund does not invest in asset-backed securities or mortgagebacked securities, but may be indirectly exposed to them (maximum 10% of total net assets).

**Strategy** In actively managing the fund, the investment manager uses macroeconomic and market analysis to determine the overall duration and the country and corporate bond exposure. The investment manager then focuses on analysis of issuers and securities to overweight those securities

that appear to offer return for their risk level (top-down and bottom-up approach). The fund's exposure to securities, and thus its performance, are likely to differ moderately from those of the benchmark.

**Distribution Policy** This Unit Class is not distributing dividends. Income from investments is reinvested.
