## What is this product?

### Type

This product is an investment fund.

### Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

### Objectives

Responsible Profile 5 belongs to the category of Profile Funds.

The Fund seeks to increase the value of its assets over the long term by implementing a high risk allocation strategy on various asset classes, either directly or indirectly (in derivatives on this type of asset and through Funds). Emphasis is placed on international diversification of investments.

Selection of investments will rely on a combination of financial criteria, as well as Environmental, Social & Governance criteria.

The sub-fund promotes environmental and social characteristics and qualifies as an investment product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector. The portfolio will be composed of issuers that are leading in ESG best-practice or attractive due to their progression in ESG best-practice.

The fund manager uses the ESG risk ratings provided by Sustainalytics and the exclusions are filtered using the product involvement screening tool provided by Sustainalytics.

The ESG risk scores should cover at least 70% of investments (cash and derivatives instruments are not covered by the ESG analysis). In compliance with the UN PRI principles, the sub-fund excludes direct investments in securities issued by companies involved in highly controversial activities (such as weapons, tobacco production, adult entertainment, GMOs, Thermal coal...) and companies under a non-compliant status regarding the UN Global Compact 10 principles.

The Fund will implement a tactical allocation around the following strategic allocation:

- Equities: 75%
- Bonds: 15%

- Short-term debt securities: 10%

The Fund may not invest in defaulted assets but may invest in Distressed Assets up to 10% of the Fund's net assets.

The Fund may also use derivatives on this type of asset for investment and hedging purposes.

After hedging, the exposure to currencies other than the euro may be minimised.

This Fund is actively managed and is compared to the 75% \* (50% MSCI Europe TR Net + 40% MSCI World ex Europe TR Net + 10% MSCI EM TR Net) + 5% Bloomberg Barclays Euro Aggregate TR Index 1-10 Year + 5% Bloomberg Barclays Global High Yield Corporate EUR Hedged + 2,5% JP Morgan EMBI Global Composite EUR Hedged + 2,5% JP Morgan CEMBI Broad Diversified Composite EUR Hedged + 10% Euribor 1 month Capitalized for performance and risk level indicator purposes. However, the reference to this index does not constitute any objective or limitation in the management and composition of the portfolio and the Fund does not restrain its universe to the index components. The index does not evaluate or include its constituents on the basis of environmental and/or social characteristics and is therefore not aligned with the ESG characteristics promoted by the sub-fund.

Therefore returns may deviate materially from the performance of the reference index.

The base currency of the Fund is EUR.

Income is systematically reinvested.

Investors are able to redeem on a daily basis (on Luxembourg bank business days).

## What are the risks and what could I get in return?

### Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.**

The stress scenario shows what you might get back in extreme market circumstances.

**Unfavourable:** this type of scenario occurred for an investment between 2015 and 2020.

**Moderate:** this type of scenario occurred for an investment between 2014 and 2019.

**Favourable:** this type of scenario occurred for an investment between 2016 and 2021.

## What happens if ABN AMRO Funds Responsible Profile 5 is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
<b>Total Costs</b>	<b>130 EUR</b>	<b>836 EUR</b>
<b>Annual cost impact*</b>	<b>1.3%</b>	<b>1.4%</b>

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.0% before costs and 4.6% after costs.

## Composition of costs
