¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
ASML HOLDING NV	Tecnología de la información	Semiconductores y equipos de semiconductores	Países Bajos	2.80%
ALLIANZ SE-REG	Finanzas	Seguros	Alemania	2.50%
NOVARTIS AG-REG	Asistencia sanitaria	Productos farmacéuticos Biotecnología y ciencias de la salud	Suiza	2.06%
ROCHE HLDG AG-GENUSS	Asistencia sanitaria	Productos farmacéuticos Biotecnología y ciencias de la salud	Suiza	2.04%
SAP SE / XETRA	Tecnología de la información	Software y servicios	Alemania	2.01%
NOVO NORDISK A/S-B	Asistencia sanitaria	Productos farmacéuticos Biotecnología y ciencias de la salud	Dinamarca	1.85%
NESTLE SA-REG	Consumo básico	Alimentos, bebidas y tabaco	Suiza	1.75%
ZURICH INSURANCE GROUP AG	Finanzas	Seguros	Suiza	1.71%
BANCO SANTANDER SA MADRID	Finanzas	Entidades bancarias	España	1.50%

Otros	Otros	0.00%
Efectivo	Efectivo	0.88%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.68% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 99.7% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.19% y la cuota de inversión en actividades habilitadoras era del 2.60%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.08%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 59.10% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.37%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL EQUITY CONSERVATIVE

Identificador de la entidad jurídica:
529900QOYD9Y5ZBAUZ70

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 42.07% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI World Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.082 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.185 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.021 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.179 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
NOVARTIS AG-REG	Asistencia sanitaria	Productos farmacéuticos Biotecnología y ciencias de la salud	Suiza	1.98%
JOHNSON & JOHNSON	Asistencia sanitaria	Productos farmacéuticos Biotecnología y ciencias de la salud	Estados Unidos	1.91%

<i>Otros</i>	<i>Otros</i>	0.00%
<i>Efectivo</i>	<i>Efectivo</i>	-0.76%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.25% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 99.3% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.11% y la cuota de inversión en actividades habilitadoras era del 1.78%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.87%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **26.50%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la

mía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 14.32%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL EQUITY DYNAMIC MULTI FACTORS

Identificador de la entidad jurídica:
549300YXILW3O14Y0587

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

Realizó inversiones sostenibles con un objetivo medioambiental: _____

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social: _____

No

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de **39.92%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero **no realizó inversiones sostenibles**

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI World (dividend reinvested) Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.076 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.185 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.079 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.179 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
NVIDIA CORP	Tecnología de la información	Semiconductores y equipos de semiconductores	Estados Unidos	5.83%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.42% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 100.0% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.07% y la cuota de inversión en actividades habilitadoras era del 0.43%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.17%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **28.15%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 11.34%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EUROPEAN CONVERTIBLE BOND

Identificador de la entidad jurídica:
529900644PSS3LALW918

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ ☐ Sí	☒ ☐ ☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 61.00% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **REFINITIV EUROPEAN CONVERTIBLE HEDGED (EUR) INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.774 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.768 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.037 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.675 (C).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 5.55% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 100.0% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.47% y la cuota de inversión en actividades habilitadoras era del 4.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **45.17%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 10.28%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto:
Amundi Funds Montpensier Global Convertible Bond

Identificador de la entidad jurídica:
529900LZ9GLOP969J692

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____% del patrimonio neto de los fondos	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 35.7% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____% del patrimonio neto del fondo	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

Una empresa es identificada como sostenible por el gestor de activos, aplicando la metodología descrita en la Política ESG disponible en el sitio web montpensier.com.

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El fondo integra factores de sostenibilidad en su proceso de inversión, como se indica más detalladamente a continuación y en el capítulo "Estrategia de inversión" del Folleto. El fondo tiene en cuenta los criterios ESG para unificar el rendimiento financiero y el deseo de influir positivamente, cuando sea posible, en el emisor en términos de desempeño ESG, animando a las empresas a mejorar la integración de los criterios ESG en sus actividades y valorando las mejores prácticas.

La sociedad gestora aplicó la política descrita en el Documento Precontractual para productos financieros Artículo 8, apartados 1, 2 y 2 bis, del Reglamento (UE) 2019/2088 y Artículo 6, párrafo primero, del Reglamento (UE) 2020/852.

36.84% de la cartera invertida, excluidos el efectivo y los equivalentes de efectivo y cualquier organismo de inversión colectiva (lo que supone el 35.66% del patrimonio neto del fondo), está compuesto por inversiones sostenibles.

La intensidad media ponderada de carbono y la huella de carbono de la cartera son significativamente inferiores a las de su índice.

Las proporciones son similares cuando se añade el Alcance 3 Anterior: la intensidad de carbono y la huella de carbono de la cartera son significativamente inferiores a las del índice. Como recordatorio, el Alcance 3 de Nivel 1 solía tener en cuenta las emisiones de los proveedores directos del producto final, mientras que el Alcance 3 Anterior tiene un alcance más amplio, que tiene en cuenta las emisiones vinculadas al transporte y la distribución de los productos adquiridos por la empresa entre sus proveedores de Nivel 1 y sus operaciones, además de otros servicios como la logística de entrada, la logística de salida, el transporte y la distribución entre los centros de la empresa.

● ¿Cómo se comportaron los indicadores de sostenibilidad?

Los siguientes indicadores se utilizan para demostrar que el Subfondo ha promovido características medioambientales y/o sociales:

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Porcentaje de inversiones conformes con la política de exclusión de Montpensier Arbevel: 100%.
Porcentaje de inversiones con una calificación B o superior (en una escala de CCC a AAA): 100%.
Porcentaje de inversiones implicadas en una controversia "Roja" según MSCI: 0%.
Porcentaje de inversiones sujetas a la metodología Montpensier Arbevel Industry Contributor, incluido un análisis cualitativo de las mejores de su categoría: 100%.

Independencia del Consejo: Ponderación de las empresas en cartera identificadas con una mayoría de consejeros independientes de empleados, accionistas mayoritarios y gobiernos.

Remuneración vinculada a objetivos ESG: Ponderación de las empresas en cartera identificadas que han integrado criterios ESG en la remuneración de los ejecutivos. Esta variable se basa en los informes publicados por las empresas. Se centra estrictamente en si estos elementos se incluyen o no en los componentes de la remuneración variable, y no tiene en cuenta su eficacia.

Cumplimiento del Pacto Mundial: Ponderación de las empresas en cartera identificadas como conformes con los principios del Pacto Mundial de Naciones Unidas.

¿...y en comparación con periodos anteriores?

Ver más arriba.

¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero realizó parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

El objetivo de las inversiones sostenibles realizadas parcialmente por el subfondo era la contribución y la alineación con un Objetivo de Desarrollo Sostenible de las Naciones Unidas.

La metodología de Montpensier Arbevel para identificar inversiones sostenibles se basa en los siguientes componentes:

- Evaluar la contribución a un objetivo de sostenibilidad, que se basa en un enfoque basado en el mejor esfuerzo, con el fin de identificar la implicación de las empresas, sobre la base de criterios E y/o S, así como un enfoque basado en los Objetivos de Desarrollo Sostenible (ODS) y una exposición de las actividades sostenibles, determinadas mediante una definición interna de "actividades definidas como sostenibles";
- Evaluar el cumplimiento de los principios de buen gobierno, basándonos en nuestro análisis de la alineación de intereses entre la dirección, los accionistas y las partes interesadas en general;
- Evaluar el principio de "No causar un perjuicio significativo" (DNSH), que se basa en exclusiones sectoriales, en las Principales Incidencias Adversas (PIA) y en el seguimiento de las controversias, incluido en términos de gobierno corporativo.

Recomendamos que consulte también el Folleto y el Documento precontractual SFDR anexo al folleto del OIC, disponibles en la página web de la sociedad gestora.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?

La evaluación del principio "No causar daños significativos" (DNSH) se basa en:

- Nuestro Análisis ISR Paso 1: la exclusión de empresas implicadas en actividades controvertidas: fabricación de armas, minería del carbón, tabaco, entretenimiento para adultos, juegos de azar, OMG y aceite de palma.
- Paso 2, a saber, la exclusión de las empresas calificadas con "CCC" o "Red Controversy Vigilance" por MSCI ESG Research;
- Tener en cuenta las PIA en un enfoque cualitativo en el análisis ISR de los valores. Los indicadores relativos a las principales incidencias adversas de las decisiones de inversión sobre los factores de sostenibilidad figuran en el apéndice.

Además, se considera que las empresas con un impacto medioambiental o social negativo en la MIA, o en los pilares E y S, incumplen el principio DNSH.

Puede consultar también el Folleto y el Documento precontractual SFDR anexo al folleto del OIC, disponibles en la página web de la sociedad gestora.

¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:

Excluimos de nuestro universo de inversión a las empresas que no están alineadas con determinadas normas y convenciones internacionales, en particular el Pacto Mundial de Naciones Unidas (UNG), las Líneas Directrices de la OCDE para Empresas Multinacionales, la Organización Internacional del Trabajo (OIT) y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos (UNGPNHR).

Las empresas que son objeto de una controversia de color "Rojo" quedan excluidas del universo de inversión. Entre estas controversias de color "Rojo" están las empresas que no se ajustan al Pacto Mundial de Naciones Unidas (Derechos Humanos, Derechos Laborales, Medio Ambiente y Corrupción).

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

Tenemos en cuenta los principales indicadores de impactos negativos en la política de exclusiones sectoriales y normativas, el análisis de las prácticas de buen gobierno (utilizando el sistema interno Montpensier Governance Flag - MGF), el análisis cualitativo propio de la contribución de las empresas a las transiciones medioambiental y de solidaridad (Montpensier Impact Assessment – MIA, Montpensier Industry Contributor – MIC), y/o en el análisis de las actividades ecológicas que determina la contribución a uno o más Objetivos de Desarrollo Sostenible (ODS) de la ONU.

La pertinencia y la cobertura de estos indicadores en el análisis varían en función del sector, la industria y la región en la que opera cada empresa.

Los indicadores relativos a las principales incidencias adversas de las decisiones de inversión sobre los factores de sostenibilidad figuran en el apéndice.

La información relativa a los objetivos medioambientales, sociales y de gobierno corporativo (ESG) puede consultarse en el sitio web de la sociedad gestora: <https://www.montpensier-arbevel.com/sites/default/files/public/documents/politique-esg.pdf>

El principio de "No causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la Unión Europea sobre actividades económicas sostenibles desde el punto de vista medioambiental.

Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la Unión Europea para las actividades económicas sostenibles desde el punto de vista medioambiental.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es:

Mayores inversiones	Sector	% de activos	País
Ping An Insurance - 0.875% - 07/2029	Seguros	2.37%	China
Uber Technologies Inc - 0.875% - 12/2028	Productos y servicios de consumo	2.27%	Estados Unidos
Schneider Electric - 1.97% - 11/2030	Bienes y servicios industriales	1.97%	Francia
Anta Sports Products - 0% - 12/2029	Productos y servicios de consumo	1.66%	Islas Caimán
Vinci - 0.7% - 02/2030	Construcción y materiales	1.66%	Francia
Trip.com - 0.75% - 06/2029	Viajes y ocio	1.62%	Islas Caimán
Coinbase Global Inc - 0.25% - 04/2030	Servicios financieros	1.56%	Estados Unidos
Legrand - 1.5% - 06/2033	Bienes y servicios industriales	1.56%	Francia
Microstrategy Inc - 0% - 12/2029	Tecnología	1.50%	Estados Unidos
Live Nation Entertainment - 2.875% - 01/2030	Viajes y ocio	1.46%	Estados Unidos

Eni - 2.95% - 09/2030	Energía	1.31%	Italia
Citigroup (Airbus) - 0.8% - 05/2030	Bienes y servicios industriales	1.29%	Países Bajos
LEG Immobilien - 1% - 09/2030	Inmobiliario	1.28%	Alemania
Microstrategy Inc - 0% - 03/2030	Tecnología	1.21%	Estados Unidos
Ponderación total de las 15 primeras posiciones frente al patrimonio neto del fondo a 30/06/25		24.1%	

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

La base para calcular los porcentajes que se mencionan a continuación es el patrimonio neto del fondo.

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría N.º 1 Alineado con las características E/S abarca:

- La subcategoría N.º 1A Sostenible abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría N.º 1B Otras características E/S abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

¿En qué sectores económicos se realizaron las inversiones?

Clasificación industrial de referencia (ICB) - 19 sectores

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los datos relativos a la participación de las empresas en actividades relacionadas con el gas fósil y/o la energía nuclear, de acuerdo con la Taxonomía, se determinan teniendo en cuenta únicamente los datos publicados por las empresas.

Aún no se dispone de datos sobre la participación de las empresas en actividades relacionadas con el gas fósil y/o la energía nuclear que cumplan la Taxonomía.

A título informativo, los valores identificados como implicados en energía fósil y/o nuclear representan el 10.62% de la cartera, es decir, el 7.87% de la cartera para los valores que obtienen parte de sus ventas de la energía nuclear, y el 3.87% para los valores implicados en energía fósil.

¹ Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio refleja la "ecologización" de las empresas participadas en la actualidad.
- las inversiones en inmovilizado (CapEx) muestran las inversiones ecológicas realizadas por las empresas participadas, relevantes para la transición a una economía verde.
- los gastos de explotación (OpEx) reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

*A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública. El volumen de negocio lo estima MSCI ESG Research según la metodología descrita a continuación. Los datos de Inversión en inmovilizado y Gastos de explotación solo tienen en cuenta los datos publicados por las empresas.

El porcentaje de alineación con la Taxonomía indicado más arriba representa la contribución de la cartera en media ponderada a la alineación con la Taxonomía de la UE (basada en el volumen de negocio, capex u opex) de todas las inversiones sostenibles, ya tengan un objetivo medioambiental o social.

Alineación con la Taxonomía de la UE

La alineación con la Taxonomía de la UE la estima MSCI ESG Research, a partir del porcentaje máximo de las ventas de una empresa derivado de productos y servicios que abordan objetivos medioambientales, sobre la base del marco MSCI Sustainable Impact Metrics.

El porcentaje de ventas generado por productos y servicios que cumplen objetivos medioambientales se reduce a 0 para las empresas que no cumplen los criterios de "No causar un perjuicio significativo" y "Salvaguardias sociales mínimas" de la Taxonomía de la UE.

Lo mismo se aplica a las empresas cuyos ingresos proceden en un 5% o más del suministro, distribución o venta al por menor de productos del tabaco, y a las empresas implicadas en armas controvertidas.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

El fondo carece de porcentaje mínimo de inversión en actividades de transición o habilitadoras.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

	30/06/25	28/06/24	30/06/23
Alineación con la Taxonomía de la UE	% Activos gestionados	% Activos gestionados	% Activos gestionados
Amundi Funds Montpensier Global Convertible	6.1%	8.4%	9.5%

El porcentaje indicado más arriba representa la contribución de la cartera a la alineación con la Taxonomía de la UE (basada en el volumen de negocio) de todas las inversiones sostenibles, ya tengan un objetivo medioambiental o social.

 son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

En la fecha de este informe, el 9.4% del patrimonio neto estaba asignado a inversiones sostenibles con un objetivo medioambiental, mientras que el 3.2% del patrimonio neto no estaba alineado con la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

En la fecha de este informe, el 26.3% del patrimonio neto estaba asignado a inversiones sostenibles con un objetivo social.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El efectivo, los equivalentes de efectivo y cualesquiera fondos o derivados de cobertura representan el 3.2% del patrimonio neto del fondo, y no ofrecen salvaguardias mínimas medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

La sociedad gestora ha aplicado la política descrita en el documento de información precontractual para productos financieros al que se alude en Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y Artículo 6, párrafo primero, del Reglamento (UE) 2020/852.

La política de implicación de los accionistas de Montpensier Arbevel consta de una política de voto y una política de implicación.

El ejercicio de los derechos de voto es un elemento importante del diálogo con los emisores. Fomenta las mejores prácticas de gobierno corporativo y promueve la ética profesional. Montpensier Arbevel considera que el ejercicio de los derechos de voto forma parte integrante del proceso de gestión de las inversiones y debe llevarse a cabo velando siempre por los intereses de sus clientes. La política de derechos de voto de Montpensier Arbevel tiene por objeto promover la valoración a largo plazo de las inversiones de sus fondos.

Para ejercer los derechos de voto vinculados a los títulos que posee el fondo, los gestores del fondo se remiten a los principios relativos a las recomendaciones de gobierno corporativo publicadas por ISS Governance, en su Política de Sostenibilidad. ISS abarca todas las empresas incluidas en las carteras de los fondos gestionados por Montpensier Arbevel.

Las normas de cumplimiento exigen que los gestores de carteras desempeñen sus funciones de forma independiente, en particular con respecto a los emisores, y en interés exclusivo de los partícipes/accionistas. Los gestores de carteras prestan especial atención a las resoluciones que puedan perjudicar los intereses de los partícipes/accionistas.

La política de voto completa, así como el último informe sobre el ejercicio de los derechos de voto, están disponibles en nuestro sitio web.

Montpensier Arbevel complementa su política de voto con una política de implicación.

Se anima a los equipos de gestión del fondo a que planteen cualquier inquietud a las empresas durante las reuniones, especialmente cuando las cuestiones ESG parezcan insuficientemente contempladas, con el fin de animar a estas empresas a mejorar sus prácticas en cuestiones medioambientales, sociales y de gobierno corporativo, todos ellos factores de crecimiento sostenible.

Los gestores del fondo, con la ayuda de analistas de ISR, establecerán una relación positiva y constructiva a medio y largo plazo con las empresas en cartera.

Esta relación es polifacética:

✓ Contactos con la empresa;

✓ Comunicar a la empresa la intención de voto de los gestores del fondo antes de la Junta General.

Además de las iniciativas de implicación directa que solemos llevar a cabo directamente con las Pequeñas y Medianas Empresas, Montpensier Arbevel también participa en acciones de implicación agrupadas puestas en marcha por ISS como parte de su programa ESG de ISS, especialmente para empresas más grandes.

Este diálogo se lleva a cabo con el objetivo de:

- ✓ Animar a las empresas a establecer un compromiso ESG;
- ✓ Animar a las empresas a comunicar sus prácticas ESG.

La política de implicación completa, así como el último informe de implicación, están disponibles en nuestro sitio web. El último informe de compromiso está disponible en: https://www.montpensier-arbevel.com/sites/default/files/public/documents/engagement_rapport.pdf

¿Cómo se comportó este producto financiero en comparación con el índice de referencia sostenible?

Los índices de referencia son índices para medir si el producto financiero alcanza el objetivo sostenible.

El fondo no utiliza un índice de referencia sostenible. Sus resultados en materia de sostenibilidad se comparan con los de su índice de referencia: Refinitiv Global Conv Focus EUR

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

N/A

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

N/A

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

N/A

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Véanse más arriba los indicadores de desempeño del fondo y su índice de referencia con respecto a los indicadores de sostenibilidad.

Principales incidencias adversas de las decisiones de inversión sobre los factores de sostenibilidad

Amundi Funds Montpensier Global Convertible

Los indicadores relativos a las principales incidencias adversas sobre los factores de sostenibilidad abarcan un periodo de referencia comprendido entre el 1 de enero de 2024 y el 31 de diciembre de 2024. De conformidad con el artículo 6 del Reglamento Delegado 2022/1288, la incidencia corresponde a la media de las incidencias a 31 de marzo, 30 de junio, 30 de septiembre y 31 de diciembre del periodo. Los cálculos se realizaron con base en las carteras al final del trimestre y los datos disponibles a 31 de diciembre.

Descripción de las principales incidencias adversas sobre los factores de sostenibilidad
[Información prevista en el artículo 6 del Reglamento Delegado (UE) 2022/1288]

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS EURO AGGREGATE BOND

Identificador de la entidad jurídica: 529900DJK6EP37QSNF19

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

Realizó inversiones sostenibles con un objetivo medioambiental: _____

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social: _____

No

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de **45.05%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero **no realizó inversiones sostenibles**

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **5% JP MORGAN EMBI GLOBAL+ 85% BLOOMBERG EURO AGGREGATE + 10% ICE + BOFA GLOBAL HIGH YIELD Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

1306

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.035 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.952 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.036 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.930 (C).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.72% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 54.3% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.33% y la cuota de inversión en actividades habilitadoras era del 0.40%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.43%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 35.61% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.73%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EURO CORPORATE BOND SELECT

Identificador de la entidad jurídica:
EJCJD2QBJY0UVP7HMP10

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 54.16% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG EURO AGGREGATE CORPORATE (E) (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.768 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.564 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.030 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.537 (C).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
BTF 06/08/25 14W	Bonos del Tesoro	Bonos del Tesoro	Francia	4.85%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 54.16% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

• ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Empresas	Banca	43.68%
Finanzas	Fondos de inversión colectiva	9.54%
Empresas	Consumo discrecional	6.33%
Empresas	Comunicación	5.58%
Bonos del Tesoro	Bonos del Tesoro	4.85%
Empresas	Seguros	4.49%
Empresas	Electricidad	3.90%
Empresas	Otras empresas financieras	3.51%
Empresas	Transporte	3.37%
Empresas	Energía	3.35%

Empresas	Inmobiliario (REIT)	2.60%
Empresas	Tecnología	1.18%
Empresas	Gas natural	1.10%
Empresas	Industria básica	1.04%
Empresas	Consumo básico	1.03%
Empresas	Bienes de equipo	0.70%
Empresas	INTERMEDIACIÓN	0.38%
Otros	Otros	0.22%
Empresas	Otros suministros públicos	0.14%
Empresas	Otros sectores industriales	0.13%
Forex	Forex	0.13%
Efectivo	Efectivo	2.73%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 4.52% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 93.0% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.78% y la cuota de inversión en actividades habilitadoras era del 0.94%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.91%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 45.20% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.43%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EURO GOVERNMENT BOND RESPONSIBLE

Identificador de la entidad jurídica:
529900SX4UQ95340NW59

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí	☒ ☐ X No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 34.25% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve características medioambientales y/o sociales e invierte al menos el 30% del patrimonio neto en bonos Verdes, Sociales y de Sostenibilidad (GSS) que cumplan los criterios y directrices de los Principios de Bonos Verdes (GBP), los Principios de Bonos Sociales (SBP) o las Directrices de Bonos de Sostenibilidad (SBG), publicados por ICMA. Además, se excluyen los emisores con una calificación ESG de F o G.

El Subfondo ha sido gestionado de forma activa con referencia al índice JP Morgan EMU Government Bond Investment Grade durante el periodo de inversión recomendado y trata de superar dicho índice (tras las comisiones aplicables). El Subfondo estuvo expuesto principalmente a los emisores del Índice de referencia; sin embargo, la gestión del Subfondo es discrecional y estuvo expuesto a emisores no incluidos en el Índice de referencia. El Subfondo controló la exposición al riesgo en relación con el Índice de Referencia, aunque se preveía que el grado de desviación del Índice de Referencia sería significativo.

¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.319 (C)**.
- La calificación ESG media ponderada del índice de referencia es **1.304 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
OAT I 0.1% 03/28 OATI	Bonos del Tesoro	Bonos del Tesoro	Francia	10.44%
DBR 2.3% 02/33 G	Bonos del Tesoro	Bonos del Tesoro	Alemania	6.28%
SPAIN 1.25% 10/30	Bonos del Tesoro	Bonos del Tesoro	España	3.75%
BTPS 2.7% 10/30 5Y	Bonos del Tesoro	Bonos del Tesoro	Italia	3.44%
DBR 0% 08/31 G	Bonos del Tesoro	Bonos del Tesoro	Alemania	3.22%
BTPS 4% 10/31 8Y	Bonos del Tesoro	Bonos del Tesoro	Italia	2.44%
BTPS 3.15% 11/31 7Y	Bonos del Tesoro	Bonos del Tesoro	Italia	2.41%
SPAIN 1.4% 04/28	Bonos del Tesoro	Bonos del Tesoro	España	2.26%
OAT % 11/30 OAT	Bonos del Tesoro	Bonos del Tesoro	Francia	2.14%
DBR IE 0.5% 4/30 DBRI	Bonos del Tesoro	Bonos del Tesoro	Alemania	2.06%
SPAIN 1% 07/42	Bonos del Tesoro	Bonos del Tesoro	España	1.92%
BELGIUM 3% 06/34	Bonos del Tesoro	Bonos del Tesoro	Bélgica	1.61%

NEDERLD 0.5% 01/40	Bonos del Tesoro	Bonos del Tesoro	Países Bajos	1.49%
DBR IE 0.1% 04/33 DBRI	Bonos del Tesoro	Bonos del Tesoro	Alemania	1.42%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 34.25% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	82.48%
Sector público	Supranacional	5.68%
Sector público	Agencias	4.35%
Sector público	Deuda pública	2.85%
Finanzas	Fondos de inversión colectiva	2.04%
Sector público	Autoridades locales	1.63%
Empresas	Banca	1.55%

Empresas	INTERMEDIACIÓN	0.43%
Otros	Otros	0.05%
Forex	Forex	0.04%
Efectivo	Efectivo	-1.10%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.17% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 0.1% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

• ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

• ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Este es el primer informe periódico del SFDR elaborado para este subfondo.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 30.21% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.86%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS STRATEGIC BOND

Identificador de la entidad jurídica: 5493009E9QZ9NKKWE632

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

Realizó inversiones sostenibles con un objetivo medioambiental: _____

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social: _____

X

No

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 30.09% de inversiones sostenibles

X

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

X

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

X

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promovió las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la del universo de inversión.

Para determinar la puntuación ESG del Subfondo y del universo de inversión, el desempeño ESG se evalúa comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características ESG: medioambiental, social y de gobierno corporativo.

No se ha designado ningún Índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.
- Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.160 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.151 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AMU PLAN-EM GR ONE-SEN USDC	Finanzas	Fondos de inversión colectiva	Luxemburgo	3.65%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 30.09% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Empresas	Banca	11.98%
Empresas	Consumo discrecional	10.21%
Finanzas	Fondos de inversión colectiva	9.30%
Empresas	Comunicación	9.15%
Empresas	Consumo básico	8.31%
Empresas	Otras empresas financieras	6.51%
Empresas	Energía	5.40%
Empresas	Transporte	5.06%

<i>Empresas</i>	<i>Electricidad</i>	4.69%
<i>Empresas</i>	<i>Tecnología</i>	4.47%
<i>Empresas</i>	<i>Bienes de equipo</i>	4.44%
<i>Empresas</i>	<i>Empresas financieras</i>	3.27%

<i>Finanzas</i>	<i>Servicios financieros</i>	0.00%
<i>Sector público</i>	<i>Autoridades locales</i>	0.00%
<i>Efectivo</i>	<i>Efectivo</i>	1.24%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades **alineadas con la Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.92% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	96.36%	96.58%	97.21%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.03%	0.01%
■ Alineado con la Taxonomía: Nuclear	0.22%	0.35%	0.39%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	3.42%	3.04%	2.38%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	96.35%	96.57%	97.21%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.03%	0.01%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.21%	0.22%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	3.65%	3.19%	2.56%

Este gráfico representa el 92.2% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.14% y la cuota de inversión en actividades habilitadoras era del 0.52%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.55%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **17.53%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 11.64%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS EURO HIGH YIELD BOND

Identificador de la entidad jurídica: E1BBUNTIB1P10L18SD26

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>40.87%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ML European Curr H YLD BB-B Rated Constrained Hed Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.356 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.252 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.487 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.315 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

Mayores inversiones	Sector	Subsector	País	% de activos

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.82% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	91.39%	90.96%	93.48%
■ Alineado con la Taxonomía: Gas fósil	0.03%	0.10%	0.03%
■ Alineado con la Taxonomía: Nuclear	2.07%	1.66%	1.51%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	6.50%	7.28%	4.97%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	94.44%	93.86%	95.60%
■ Alineado con la Taxonomía: Gas fósil	0.03%	0.11%	0.03%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.15%	0.13%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	5.53%	5.87%	4.23%

Este gráfico representa el 94.7% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

• **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 1.39% y la cuota de inversión en actividades habilitadoras era del 1.44%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

• **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.69%.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **27.6%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.98%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EURO HIGH YIELD SHORT TERM BOND

Identificador de la entidad jurídica:
529900Q3IK91XCA88E07

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí	☒ ☐ X No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 39.82% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **Merril Lynch Euro High Yield 1-3 Non Fin, BB-B, Constrained Index**.

Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

No se ha designado ningún índice de referencia ESG.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.392 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.280 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.567 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.309 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
LORCAT 4% 09/27 REGS	Empresas	Comunicación	España	2.51%
EOFP 2.75% 02/27	Empresas	Consumo discrecional	Francia	2.05%
SHAEFF 4.25% 04/28	Empresas	Consumo discrecional	Alemania	1.71%

<i>Forex</i>	<i>Forex</i>	<i>0.05%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>0.06%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las **actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las **actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.86% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 1.28% y la cuota de inversión en actividades habilitadoras era del 1.77%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.79%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 25.06% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 11.90%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EURO SUBORDINATED BOND RESPONSIBLE

Identificador de la entidad jurídica:
2221006F1314ERENWD22

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 69.13% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG EURO AGGREGATE CORPORATE INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

- ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.979 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.564 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.097 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.537 (C).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

Mayores inversiones	Sector	Subsector	País	% de activos

Bonos del Tesoro	Bonos del Tesoro	0.00%
Efectivo	Efectivo	-2.52%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 4.88% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

• ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 1.46% y la cuota de inversión en actividades habilitadoras era del 1.08%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.28%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 61.02% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.23%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>37.66%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ÍNDICE ICE BOFA GLOBAL HIGH YIELD HEDGED (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.178 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.333 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.371 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.303 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
KW 4.75% 02/30	Empresas	Otras empresas financieras	Estados Unidos	1.86%
UWMLLC 5.75% 06/27 144A	Empresas	Empresas financieras	Estados Unidos	1.62%
MHED 8% 08/29 144A	Empresas	Comunicación	Estados Unidos	1.44%
PFSI 7.875% 12/29 144A	Empresas	Empresas financieras	Estados Unidos	1.40%
RWNYNY 7.25% 10/29 144A	Empresas	Consumo discrecional	Estados Unidos	1.38%
UNSEAM 7.875% 02/31 144A	Empresas	Consumo discrecional	Estados Unidos	1.34%
NEXIIM 2.125% 04/29	Empresas	Tecnología	Italia	1.34%
GALCLD 8.75% 09/27 144A	Empresas	Empresas financieras	Islas Caimán	1.32%
CSTM 3.125% 07/29 144A	Empresas	Industria básica	Francia	1.32%
PRSESE 6.25% 01/28 144A	Empresas	Consumo discrecional	Estados Unidos	1.28%
CDE 5.125% 02/29 144A	Empresas	Industria básica	Estados Unidos	1.19%
NLSN 9.29% 04/29 144A	Empresas	Tecnología	Estados Unidos	1.16%
BZH 7.25% 10/29	Empresas	Consumo discrecional	Estados Unidos	1.16%
TMHC 5.875% 06/27 144A	Empresas	Consumo discrecional	Estados Unidos	1.16%
TUICRU 6.25% 04/29 REGS	Empresas	Consumo discrecional	Alemania	1.13%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 37.66% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Empresas	Consumo discrecional	21.61%
Empresas	Industria básica	12.44%
Empresas	Consumo básico	12.17%
Empresas	Comunicación	9.71%
Empresas	Empresas financieras	8.13%
Empresas	Bienes de equipo	7.93%
Empresas	Banca	7.76%
Empresas	Tecnología	5.31%
Empresas	Transporte	5.16%

Empresas	Otras empresas financieras	2.45%
Empresas	Otros sectores industriales	1.77%
Bonos del Tesoro	Bonos del Tesoro	1.06%
Empresas	Electricidad	1.01%
Otros	Otros	0.96%
Empresas	INTERMEDIACIÓN	0.50%
Sector público	Deuda pública	0.29%
Servicios de comunicación	Medios de comunicación y entretenimiento	0.02%
Finanzas	Servicios financieros	0.00%
Forex	Forex	-0.14%
Efectivo	Efectivo	1.85%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.08% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 98.6% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

- ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 0.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.01%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 30.53% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía E, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 7.05%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL SUBORDINATED BOND

Identificador de la entidad jurídica:
549300YM7XSURJOGN349

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>45.33%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **37.5% ICE BofA ML Global Hybrid Non-Financial Corporate Index (hedged to EUR); 30% ICE BofA ML Contingent Capital Index (hedged to EUR); 15% ICE BofA ML Perpetual Preferred Securities Index (hedged to EUR); 17.5% ICE BofA ML Global Hybrid Non-Financial High Yield (hedged to EUR) Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.591 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.425 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.560 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.42 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 45.33% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Empresas	Banca	46.42%
Empresas	Seguros	11.23%
Empresas	Energía	7.68%
Empresas	Electricidad	6.65%

Empresas	Inmobiliario (REIT)	0.85%
Forex	Forex	0.58%
Empresas	Comunicación	0.55%
Empresas	Bienes de equipo	0.53%
Otros	Otros	-0.15%
Efectivo	Efectivo	3.44%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.26% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 1.32% y la cuota de inversión en actividades habilitadoras era del 0.48%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.21%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 38.40% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.67%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
PIONEER GLOBAL HIGH YIELD BOND

Identificador de la entidad jurídica:
5493001ZUQBYXT5ICJ95

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 15.59% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión BLOOMBERG GLOBAL HIGH YIELD. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo. El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.078 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.276 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.102 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.259 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.02% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	99.83%	99.77%	99.98%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.00%	0.00%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.02%	0.02%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	0.17%	0.21%	0.00%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	99.82%	99.76%	99.97%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.00%	0.00%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.02%	0.02%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	0.18%	0.22%	0.00%

Este gráfico representa el 95.4% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **10.60%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.97%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/88 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 20.32% de inversiones sostenibles ☐ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA US HIGH YIELD INDEX (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.251 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.462 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.238 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.457 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos
SOLEIN 9.75% 11/28 144A	Empresas	Industria básica	Estados Unidos	1.34%
TRN 7.75% 07/28 144A	Empresas	Bienes de equipo	Estados Unidos	1.23%
MAGLLC 4.875% 05/29 144A	Empresas	Consumo discrecional	Estados Unidos	1.20%

Empresas	Electricidad	4.28%
Empresas	Tecnología	2.04%

Empresas	Banca	1.85%
Empresas	Otros sectores industriales	1.26%
Empresas	Otras empresas financieras	0.66%
Empresas	Gas natural	0.61%
Empresas	INTERMEDIACIÓN	0.56%
Empresas	Seguros	0.30%
Forex	Forex	0.19%
Servicios de comunicación	Medios de comunicación y entretenimiento	0.02%
Otros	Otros	-0.74%
Efectivo	Efectivo	3.83%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

Durante el periodo de referencia, el fondo invirtió un 0.0% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 100.0% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 14.36% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.96%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 37.70% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD INDEX** . Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.874 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.445 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.942 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.488 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 37.70% en inversiones relacionadas con la sostenibilidad.

- ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	42.71%
Empresas	Banca	22.68%
Titulizado	MBS de agencias	8.82%
Finanzas	Fondos de inversión colectiva	5.74%
Empresas	Seguros	4.40%
Sector público	Deuda pública	2.54%
Empresas	Electricidad	2.39%
Empresas	Consumo discrecional	2.18%
Empresas	Comunicación	2.04%
Sector público	Autoridades locales	1.60%
Sector público	Agencias	1.42%
Empresas	Energía	1.30%
Empresas	Consumo básico	0.98%
Empresas	Tecnología	0.96%
Sector público	Supranacional	0.71%
Empresas	INTERMEDIACIÓN	0.61%
Empresas	Gas natural	0.55%
Titulizado	Activos hipotecarios	0.39%
Empresas	Transporte	0.29%
Empresas	Industria básica	0.25%
Otros	Otros	0.21%
Empresas	Empresas financieras	0.07%
Empresas	Bienes de equipo	0.00%
Forex	Forex	-0.84%
Efectivo	Efectivo	-1.99%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.67% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 38.7% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.08% y la cuota de inversión en actividades habilitadoras era del 0.18%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.06%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **30.89%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.15%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL GOVERNMENT BOND

Identificador de la entidad jurídica:
529900LNWLLVPZNRX63

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 38.22% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve características medioambientales y/o sociales e invierte al menos el 30% del patrimonio neto en bonos Verdes, Sociales y de Sostenibilidad (GSS) que cumplan los criterios y directrices de los Principios de Bonos Verdes (GBP), los Principios de Bonos Sociales (SBP) o las Directrices de Bonos de Sostenibilidad (SBG), publicados por ICMA. Además, se excluyen los emisores con una calificación ESG de F o G.

El Subfondo se gestiona de forma activa con referencia al Índice J.P. Morgan Government Bond Global All Maturities Unhedged in USD (el "Índice de referencia") durante el periodo de inversión recomendado y trata de obtener una rentabilidad superior al mismo (tras las comisiones aplicables). El Subfondo está expuesto principalmente a los emisores del Índice de referencia; sin embargo, la gestión del Subfondo es discrecional y estará expuesto a emisores no incluidos en el Índice de referencia. El Subfondo controla la exposición al riesgo en relación con el Índice de Referencia, aunque se prevé que el grado de desviación del Índice de Referencia sea significativo.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class".

Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

Para obtener más información, consulte el apartado Inversión sostenible del Folleto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.080 (C)**.
- La calificación ESG media ponderada del índice de referencia es **1.083 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 38.22% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

• ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	63.31%
Empresas	Banca	14.16%
Finanzas	Fondos de inversión colectiva	8.59%
Sector público	Agencias	3.97%
Sector público	Deuda pública	2.99%
Empresas	Seguros	2.25%
Sector público	Supranacional	1.08%

Empresas	Gas natural	0.94%
Empresas	Energía	0.88%
Empresas	Comunicación	0.59%
Otros	Otros	0.02%
Forex	Forex	-1.36%
Efectivo	Efectivo	2.59%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las **actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las **actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.89% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 27.5% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

- ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.03% y la cuota de inversión en actividades habilitadoras era del 0.11%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Este es el primer informe periódico del SFDR elaborado para este subfondo.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 32.29% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.04%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL CORPORATE BOND

Identificador de la entidad jurídica:
XJOH2VT7DMIW80J7DZ04

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>49.69%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.414 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.042 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.358 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.007 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.93% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 96.1% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

• **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.26% y la cuota de inversión en actividades habilitadoras era del 0.41%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

• **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.07%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **43.66%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.10%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los **índices de referencia** son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL CORPORATE BOND SELECT

Identificador de la entidad jurídica:
2138002V2U9FP8L55Z17

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 63.63% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.692 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.042 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.617 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.007 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AMGN 2.45% 02/30	Empresas	Consumo básico	Estados Unidos	1.91%
VMW 3.9% 8/27	Empresas	Tecnología	Estados Unidos	1.56%
SWEDA 4.875% 10/30	Empresas	Banca	Suecia	1.45%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.33% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.24% y la cuota de inversión en actividades habilitadoras era del 1.23%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.75%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **57.60%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.70%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL HIGH YIELD BOND

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 16.41% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ÍNDICE ICE BOFA GLOBAL HIGH YIELD HEDGED (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.148 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.333 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.090 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.303 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Efectivo	Efectivo	2.78%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las **actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las **actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.03% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 11.50% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.88%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL +10% ICE BOFA GLOBAL HIGH YIELD composite index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.864 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.444 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.853 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.487 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos
UK TSY 0.875% 07/33	Bonos del Tesoro	Bonos del Tesoro	Reino Unido	3.49%
US TSY 1.125% 02/28	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	2.98%
US TSY 0.625% 11/27	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	2.81%
NZGB 3% 04/29 0429	Bonos del Tesoro	Bonos del Tesoro	Nueva Zelanda	2.50%

BRAZIL NTN-F 10% 01/27	Bonos del Tesoro	Bonos del Tesoro	Brasil	2.48%
JGB 0.1% 11/25 454	Bonos del Tesoro	Bonos del Tesoro	Japón	2.32%

MQGAU 5.391% 12/26 REGS	Empresas	Banca	Australia	1.29%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 48.83% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- **¿En qué sectores económicos se realizaron las inversiones?**

Sector	Subsector	% de activos
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	<i>27.93%</i>
<i>Empresas</i>	<i>Banca</i>	<i>25.73%</i>
<i>Sector público</i>	<i>Deuda pública</i>	<i>9.09%</i>
<i>Empresas</i>	<i>Electricidad</i>	<i>8.57%</i>
<i>Empresas</i>	<i>Consumo discrecional</i>	<i>5.60%</i>
<i>Empresas</i>	<i>Seguros</i>	<i>4.81%</i>
<i>Sector público</i>	<i>Autoridades locales</i>	<i>3.68%</i>
<i>Empresas</i>	<i>Comunicación</i>	<i>2.20%</i>
<i>Empresas</i>	<i>Energía</i>	<i>2.14%</i>

<i>Otros</i>	<i>Otros</i>	<i>0.09%</i>
<i>Forex</i>	<i>Forex</i>	<i>-1.62%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>2.14%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 7.96% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 39.2% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.42% y la cuota de inversión en actividades habilitadoras era del 0.29%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.23%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **33.47%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

- **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 7.41%.

- **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

- **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL BOND FLEXIBLE

Identificador de la entidad jurídica:
222100PZ5D2ORNFR7S72

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 13.71% de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **40% JP MORGAN GLOBAL GOVERNMENT BOND INDEX BROAD + 10% BLOOMBERG GLOBAL AGGREGATE GOVERNMENT RELATED + 10% BLOOMBERG GLOBAL AGGREGATE CORPORATE + 20% BLOOMBERG GLOBAL HIGH YIELD HEDGED + 20% JP MORGAN EMERGING MARKET BOND composite index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.674 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AMUNDI OBL INT FLEXIBLE-OR (D)	Finanzas	Fondos de inversión colectiva	Francia	100.62%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 13.71% en inversiones relacionadas con la sostenibilidad.

- ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Finanzas	Fondos de inversión colectiva	100.62%
Efectivo	Efectivo	-0.62%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.03% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 20.8% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 0.06%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **11.45%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.22%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
MULTI SECTOR CREDIT

Identificador de la entidad jurídica:
222100C0Q8DZ0ONZYS48

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 34.80% de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.512 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.506 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.53% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	97.42%	95.94%	97.02%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.11%	0.05%
■ Alineado con la Taxonomía: Nuclear	0.32%	0.44%	0.31%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	2.26%	3.51%	2.62%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	97.53%	96.01%	96.95%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.13%	0.05%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.24%	0.20%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	2.47%	3.63%	2.79%

Este gráfico representa el 88.1% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.41% y la cuota de inversión en actividades habilitadoras era del 0.43%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.02%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **30.66%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.61%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
GLOBAL CORPORATE BOND CLIMATE

Identificador de la entidad jurídica:
213800ZDJ7583Z2H5G06

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 66.74% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una

calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
 - Exclusiones legales sobre armas controvertidas
 - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles;
 - Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco; (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web www.amundi.fr)
2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares
3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores
4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

Durante el ejercicio, el producto promovió continuamente las características medioambientales con el objetivo de reducir su intensidad de carbono alineando la intensidad de su huella de carbono con la de su Índice de referencia **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX (OFFICIAL)**.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.591 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.189 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

El indicador de sostenibilidad utilizado es la intensidad de la huella de carbono de la cartera, que se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice de referencia. En consecuencia, los títulos con una huella ecológica relativamente baja tenían más probabilidades de ser seleccionados en la cartera que los títulos con una huella ecológica relativamente alta.

- La intensidad media ponderada de la huella de carbono de la cartera es de **88.81**
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de **95.99**

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.537 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.172 (D). Al final del periodo anterior, la media ponderada de intensidad de carbono de la cartera era de 82.17 y el índice de referencia de intensidad media ponderada de carbono era de 99.19.

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

• ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas

del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 66.74% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
<i>Empresas</i>	<i>Banca</i>	35.37%
<i>Empresas</i>	<i>Consumo básico</i>	14.80%
<i>Empresas</i>	<i>Comunicación</i>	13.04%

<i>Forex</i>	<i>Forex</i>	0.00%
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	0.00%
<i>Efectivo</i>	<i>Efectivo</i>	1.23%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.53% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	95.56%	94.51%	96.21%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.07%	0.02%
■ Alineado con la Taxonomía: Nuclear	0.62%	1.04%	0.66%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	3.80%	4.38%	3.11%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	96.59%	95.46%	96.92%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.08%	0.02%
■ Alineado con la Taxonomía: Nuclear	0.13%	0.69%	0.39%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	3.27%	3.78%	2.66%

Este gráfico representa el 98.1% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

• **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.22% y la cuota de inversión en actividades habilitadoras era del 0.81%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

• **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.63%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **61.41%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.80%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice Solactive Paris Aligned Global Corporate USD Hedged. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 88.81
- La intensidad media ponderada de la huella de carbono del índice de referencia es de 95.99

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

- La calificación ESG media ponderada de la cartera es 0.591 (C).
- La calificación ESG media ponderada del universo de inversión ESG es 0.189 (D).

- La intensidad media ponderada de la huella de carbono de la cartera es de 88.81
- La intensidad media ponderada de la huella de carbono del índice de referencia es de 95.99

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice Solactive Paris Aligned Global Corporate USD Hedged. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 88.81
- La intensidad media ponderada de la huella de carbono del índice de referencia es de 95.99

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 37.51% de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la del universo de inversión.

Para determinar la puntuación ESG del Subfondo y del universo de inversión, el desempeño ESG se evalúa comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características ESG: medioambiental, social y de gobierno corporativo.

No se ha designado ningún Índice de referencia ESG.

- ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.241 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.232 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

- **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AIF - EMG MKT SOVEREIGN BD - H	Finanzas	Fondos de inversión colectiva	Luxemburgo	7.13%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.98% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	93.11%	92.35%	96.60%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.03%	0.00%
■ Alineado con la Taxonomía: Nuclear	1.27%	1.15%	0.35%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	5.62%	6.48%	3.05%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	94.60%	93.51%	96.74%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.03%	0.00%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.25%	0.09%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	5.40%	6.21%	3.16%

Este gráfico representa el 90.3% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.31% y la cuota de inversión en actividades habilitadoras era del 2.23%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.23%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **24.2%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 11.50%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 39.54% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la del universo de inversión.

Para determinar la puntuación ESG del Subfondo y del universo de inversión, el desempeño ESG se evalúa comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características ESG: medioambiental, social y de gobierno corporativo.

No se ha designado ningún Índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.256 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.221 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el

marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen las

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.29% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	92.01%	91.08%	95.02%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.04%	0.00%
■ Alineado con la Taxonomía: Nuclear	1.44%	1.41%	0.41%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	6.54%	7.48%	4.57%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	93.43%	92.14%	94.86%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.04%	0.01%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.41%	0.18%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	6.56%	7.41%	4.96%

Este gráfico representa el 88.2% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.30% y la cuota de inversión en actividades habilitadoras era del 2.54%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.11%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **26.45%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.80%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS
STRATEGIC INCOME

Identificador de la entidad jurídica:

Objetivo de inversión sostenible

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 15.19% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
☐ Realizó inversiones sostenibles con un objetivo social: _____	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG US UNIVERSAL (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.270 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.232 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.461 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.356 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
TBIP USA 29/07/25	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	4.55%
US TSY 3.75% 08/26	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.88%
US TSY 2.25% 02/52	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.20%
US TSY 4% 02/30	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.19%

<i>Efectivo</i>	<i>Efectivo</i>	-0.86%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.16% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.08%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **12.96%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.08%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS US CORPORATE BOND CLIMATE

Identificador de la entidad jurídica: 213800VWP1P2KAFPEU55

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 25.71% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

Durante el ejercicio, el producto promovió continuamente las características medioambientales con el objetivo de reducir su intensidad de carbono alineando la intensidad de su huella de carbono con la de su Índice de referencia **MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND Index**.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.113 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.111 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

El indicador de sostenibilidad utilizado es la intensidad de la huella de carbono de la cartera, que se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice de referencia. En consecuencia, los títulos con una huella ecológica relativamente baja tenían más probabilidades de ser seleccionados en la cartera que los títulos con una huella ecológica relativamente alta.

- La intensidad media ponderada de la huella de carbono de la cartera es de **49.58**
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de **140.83**

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.188 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.097 (D). Al final del periodo anterior, la media ponderada de intensidad de carbono de la cartera era de 42.30 y el índice de referencia de intensidad media ponderada de carbono era de 77.40.

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

– **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
DAIL VAR PERP 144A	Empresas	Seguros	Japón	2.52%
JPM VAR 07/35	Empresas	Banca	Estados Unidos	2.42%
CCDJ 5.7% 03/28 144A	Empresas	Banca	Canadá	1.81%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 25.71% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

• ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Empresas	Banca	37.77%
Empresas	Seguros	13.96%
Empresas	Consumo discrecional	11.64%
Empresas	Bienes de equipo	7.54%
Empresas	Consumo básico	6.73%
Empresas	Tecnología	6.18%
Empresas	Empresas financieras	2.29%
Empresas	INTERMEDIACIÓN	1.94%
Empresas	Transporte	1.89%

Empresas	Inmobiliario (REIT)	1.26%
Empresas	Electricidad	1.20%
Sector público	Deuda pública	0.93%
Empresas	Comunicación	0.90%
Bonos del Tesoro	Bonos del Tesoro	0.77%
Empresas	Energía	0.72%
Empresas	Industria básica	0.72%
Forex	Forex	0.01%
Efectivo	Efectivo	4.12%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.28% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:
- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.13% y la cuota de inversión en actividades habilitadoras era del 0.36%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 21.15% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.28%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice MSCI USD IG Climate Paris Aligned Corp Bond. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 49.58
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 140.83

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

- La calificación ESG media ponderada de la cartera es 0.113 (D).
- La calificación ESG media ponderada del universo de inversión ESG es -0.111 (D).
- La intensidad media ponderada de la huella de carbono de la cartera es de 49.58
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 140.83

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el índice MSCI USD IG Climate Paris Aligned Corporate Bond. La intensidad de la huella de carbono de la cartera se calcula como una media de la cartera ponderada por activos y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 49.58
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 140.83

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS US BOND

Identificador de la entidad jurídica: 5493005LBJJ6BWRENA39

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>9.84%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG US AGGREGATE**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.455 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.289 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.511 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.464 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
TBIP USA 24/07/25	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	7.12%
US TSY 3.125% 05/48	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	5.08%
TBIP USA 29/07/25	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	4.74%
G2SF 6 7/25	Titulizado	MBS de agencias	Estados Unidos	4.08%

TBIP USA 05/08/25	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.18%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 9.84% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

• ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Titulizado	MBS de agencias	30.40%
Bonos del Tesoro	Bonos del Tesoro	28.13%
Empresas	Banca	11.42%
Empresas	Consumo discrecional	6.21%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.13% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.08% y la cuota de inversión en actividades habilitadoras era del 0.14%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **7.40%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.31%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS US CORPORATE BOND SELECT

Identificador de la entidad jurídica: 222100LE431F865A4S54

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 20.93% de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG US CORPORATE INVESTMENT GRADE (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.112 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.286 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.122 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.307 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 20.93% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

<i>Sector</i>	<i>Subsector</i>	<i>% de activos</i>
<i>Empresas</i>	<i>Banca</i>	<i>28.66%</i>
<i>Empresas</i>	<i>Consumo discrecional</i>	<i>11.89%</i>
<i>Empresas</i>	<i>Seguros</i>	<i>11.63%</i>
<i>Empresas</i>	<i>Electricidad</i>	<i>9.76%</i>
<i>Empresas</i>	<i>Energía</i>	<i>8.02%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.39% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.20% y la cuota de inversión en actividades habilitadoras era del 0.45%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **15.44%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.10%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS US SHORT TERM BOND

Identificador de la entidad jurídica: 549300QBCEQZSOFGDW23

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>15.70%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión ICE BOFA 0-1 YEAR US CORPORATE INDEX (ESG). Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.192 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.184 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.386 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.215 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 15.70% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
<i>Empresas</i>	<i>Banca</i>	20.32%
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	14.88%
<i>Titulizado</i>	<i>ABS</i>	12.84%

<i>Efectivo</i>	<i>Efectivo</i>	<i>-0.33%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.13% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.09%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **13.59%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.99%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los **índices de referencia** son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS ASIA BOND INCOME RESPONSIBLE

Identificador de la entidad jurídica: 213800UVZ2BRX4N1ZK70

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 41.08% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **90% JPM Asia Credit Index + 10% Markit iBoxx ALBI (USD Unhedged) Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.293 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.224 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.319 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.281 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
TBIP USA 19/08/25	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	3.89%
SANLTD 5.4% 08/28	Empresas	Consumo discrecional	Islas Caimán	2.71%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.02% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.06%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.05%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **30.63%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 10.43%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS CHINA RMB AGGREGATE BOND

Identificador de la entidad jurídica: 213800R541S7BYLJK77

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>5.11%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☐ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☐ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG CHINA AGGREGATE (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.239 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.285 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Este es el primer informe periódico del SFDR elaborado para este subfondo.

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
CGB 2.11% 08/34 INBK	Bonos del Tesoro	Bonos del Tesoro	China	12.31%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 5.11% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	39.02%
Empresas	Banca	38.97%
Empresas	Energía	5.67%
Sector público	Deuda pública	3.12%
Empresas	Industria básica	2.41%
Forex	Forex	0.03%
Otros	Otros	0.02%
Efectivo	Efectivo	10.76%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades **alineadas con la Taxonomía** se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

Durante el periodo de referencia, el fondo invirtió un 0.0% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

- ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **5.11%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

Este producto no se comprometió a realizar inversiones sostenibles desde el punto de vista social durante el periodo.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EMERGING MARKETS BLENDED BOND

Identificador de la entidad jurídica:
222100ABBJBM1BE8222

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>9.47%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión JP MORGAN EMBI GLOBAL DIVERSIFIED (HEDGED TO EUR) INDEX. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.041 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.127 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.110 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.153 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos

<i>Titulizado</i>	<i>Activos hipotecarios</i>	<i>0.16%</i>
<i>Empresas</i>	<i>Otros sectores industriales</i>	<i>0.14%</i>
<i>Empresas</i>	<i>Gas natural</i>	<i>0.08%</i>
<i>Otros</i>	<i>Otros</i>	<i>0.05%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>0.35%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.24% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 0.05%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.02%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **7.90%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.34%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EMERGING MARKETS BOND

Identificador de la entidad jurídica:
549300KZW6KQ7WLJO866

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>11.14%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **50% JP Morgan EMBI Global Diversified Index + 50% JP Morgan CEMBI Global Diversified Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.147 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.156 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.018 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.155 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.05% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.06%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.01%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **10.42%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 0.67%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EMERGING MARKETS CORPORATE BOND

Identificador de la entidad jurídica:
529900YJOJ3E3FRQQ325

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>28.68%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **JP MORGAN CEMBI BROAD DIVERSIFIED (OFFICIAL)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.123 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.187 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.003 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.157 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
A-F EMERG MARKETS GREEN BD - SE USD	Finanzas	Fondos de inversión colectiva	Luxemburgo	4.30%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 28.68% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

• ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Empresas	Banca	19.30%
Empresas	Energía	14.97%
Empresas	Industria básica	11.31%
Empresas	Electricidad	11.11%
Finanzas	Fondos de inversión colectiva	8.17%
Empresas	Consumo discrecional	6.03%
Empresas	Comunicación	6.01%

<i>Efectivo</i>	<i>Efectivo</i>	<i>0.95%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.10% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.07% y la cuota de inversión en actividades habilitadoras era del 0.02%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.04%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **24.39%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

- **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.19%.

- **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

- **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS EMERGING MARKETS CORPORATE HIGH YIELD BOND

Identificador de la entidad jurídica: 5493006QGDCMTW9Y1N50

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>22.11%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD INDEX. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo. El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.092 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.214 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.039 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.133 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
A-F ASIA BD INC RESPONSIBLE-Z USD-C	Finanzas	Fondos de inversión colectiva	Luxemburgo	1.66%
VEDLN 10.875% 09/29 REGS	Empresas	Industria básica	Reino Unido	1.61%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.24% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

• **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.36%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

• **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **16.37%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.50%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EMERGING MARKETS GREEN BOND

Identificador de la entidad jurídica:
2138001AOC3QUTY9SA42

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ ☐ Sí	☒ ☐ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>70.21%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión JP MORGAN EM CREDIT GREEN BOND DIVERSIFIED INDEX (HEDGED TO USD). Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

El subfondo mantuvo la parte comprometida de su asignación invertida en el uso de bonos verdes.

El objetivo de los bonos verdes es financiar proyectos que generen un impacto positivo y cuantificable en el medio ambiente. El indicador clave que mide el impacto de los bonos verdes es "Toneladas evitadas de emisiones de CO2 por millón de EUR invertidos en un año". Más allá del análisis financiero cuantitativo y cualitativo de los bonos susceptibles de componer la cartera, el proceso de selección incluye una evaluación de la estrategia ESG a nivel del emisor y una evaluación de los bonos verdes tras varios puntos de análisis:

1. Amundi ha desarrollado un sistema propio de puntuación ESG basado en una escala de siete letras, que van de la A a la G, donde la A es la mejor calificación y la G, la peor. Cualquier emisor con una calificación G- queda excluido de todas las carteras de gestión activa de Amundi. Llevamos a cabo la verificación de la calificación ESG del emisor y comprobamos la conformidad de la calificación con los criterios del fondo correspondiente. Como se ha indicado anteriormente, los emisores con una calificación G en la escala de calificación ESG de Amundi no son aptos para la inversión. Si hay puntos débiles, el equipo de Análisis ESG buscará con más detalle cualquier controversia sobre el pilar correspondiente (E, S y G).
2. Evaluación de los bonos verdes en términos de: (i) análisis del proyecto, mediante el análisis de la ubicación geográfica de los activos, la actuación sobre los activos, la evaluación de cualquier impacto adicional del proyecto ecológico en el medio ambiente, la biodiversidad, las comunidades locales u otros aspectos sociales (no causar un perjuicio significativo), la alineación con las normas del sector (por ejemplo, la alineación con los Principios de Bonos Verdes de la Asociación Internacional de Mercados de Capitales, la Iniciativa de Bonos Climáticos, la Taxonomía de la UE). (ii) análisis del emisor a nivel de estrategia global ESG y de controversias, (iii) justificación de la financiación verde (tipo de proyectos financiados, asignación de activos verdes, tipo de instrumentos que financian proyectos verdes) y (iv) transparencia (informe sobre bonos verdes, existencia de opiniones de segundas partes)
3. Supervisión continua (inversión a posteriori), que incluye la revisión periódica de la asignación y el informe de impacto del bono verde, las controversias en las que está involucrado el emisor y su estrategia medioambiental.

Por último, todos los Bonos Verdes seleccionados deberán cumplir los criterios y directrices de los Principios de los Bonos Verdes publicados por la Asociación Internacional de Mercados de Capitales. Visite la Política de Inversión Responsable de Amundi para obtener más información al respecto.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.239 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.097 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

Al final del periodo, la cartera posee un **87.20%** de bonos verdes.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.131 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.006 (D). Al final del periodo anterior, la cartera poseía un 89.04% de bonos verdes.

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

En cuanto a los instrumentos de deuda verdes, sociales y sostenibles ("GSS"), según la definición de la Asociación Internacional de Mercados de Capitales ("ICMA"), y estructurados de acuerdo con sus principios o directrices contribuyen por su diseño a un objetivo medioambiental o social se considera que superan la Prueba de Contribución descrita anteriormente, siempre que:

- En su caso, los emisores operan en una actividad que es compatible con la sostenibilidad a largo plazo y los objetivos de desarrollo
- Los instrumentos de GSS han sido analizados por los analistas ESG de Amundi y cumplen con los requisitos de GSS de Amundi (incluida el argumento de la financiación, el desempeño ESG del emisor, el análisis del proyecto y la transparencia).

• **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos
AMU PLAN-EM GR ONE-SEN USDC	Finanzas	Fondos de inversión colectiva	Luxemburgo	5.66%

<i>Sector público</i>	<i>Agencias</i>	<i>0.17%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>0.28%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.82% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.25%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **68.39%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

- **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

Este producto no se comprometió a realizar inversiones sostenibles desde el punto de vista social durante el periodo.

- **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

- **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EMERGING MARKETS HARD CURRENCY BOND

Identificador de la entidad jurídica:
549300CF4H3SXCNRP626

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>8.98%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión JP MORGAN EMBI GLOBAL DIVERSIFIED (HEDGED TO EUR). Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.027 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.127 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.119 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.153 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
A-F EMERGING MKT CORP BD - Z-USD	Finanzas	Fondos de inversión colectiva	Luxemburgo	4.66%

Efectivo	Efectivo	0.25%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.08% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.02%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 7.72% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.18%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
EMERGING MARKETS LOCAL CURRENCY BOND

Identificador de la entidad jurídica:
549300JJ3276S8R63L30

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>7.74%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **80% JPM GBI EM GLOBAL DIVERSIFIED Index + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.336 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.182 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.328 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.186 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 7.74% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

<i>Sector</i>	<i>Subsector</i>	<i>% de activos</i>
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	<i>81.98%</i>
<i>Sector público</i>	<i>Supranacional</i>	<i>8.05%</i>

<i>Otros</i>	<i>Otros</i>	<i>-0.04%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>2.86%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.03% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **6.04%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.67%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 17.24% de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.225 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.245 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.019 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.201 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AIF - EMG MKT SOVEREIGN BD - S	Finanzas	Fondos de inversión colectiva	Luxemburgo	6.08%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.26% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.26%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.08%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **13.42%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.56%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>30.89%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **50% MSCI Emerging Markets Index, 30% J.P. Morgan EMBI Global Diversified Composite and 20% J.P. Morgan CEMBI Broad Diversified Composite..** Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
- El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.192 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.083 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.150 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.126 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
ISHSIV-MSCI INDIA UCITS ETF(LSE)	Finanzas	Fondos de inversión colectiva	Irlanda	5.29%
TAIWAN SEMICONDUCTOR MANUFAC	Tecnología de la información	Semiconductores y equipos de semiconductores	Taiwán	3.15%
Amundi MSCI China A II ETF	Finanzas	Fondos de inversión colectiva	Luxemburgo	2.44%
AMUNDI PHYSICAL GOLD ETC	Finanzas	Fondos de inversión colectiva	Irlanda	2.20%
TENCENT HOLDINGS LTD	Servicios de comunicación	Medios de comunicación y entretenimiento	Islas Caimán	1.54%
DB X-TR MSCI KOREA	Finanzas	Fondos de inversión colectiva	Luxemburgo	1.18%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.01% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.01%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **23.75%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 7.13%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS EURO
MULTI-ASSET TARGET INCOME

Identificador de la entidad jurídica:
549300MRV3FILX0BHB52

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>33.34%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.674 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.674 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AMND GOLD LBMA ETC(PAR)	Finanzas	Fondos de inversión colectiva	Irlanda	4.55%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.47% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.40% y la cuota de inversión en actividades habilitadoras era del 1.38%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.62%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **25.15%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.71%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS GLOBAL MULTI-ASSET

Identificador de la entidad jurídica: 549300OD7WDES3BYBD54

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>37.45%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.255 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.312 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
A-F ABS RETURN MULTI-STRAT-I EUR	Finanzas	Fondos de inversión colectiva	Luxemburgo	2.14%
NVIDIA CORP	Tecnología de la información	Semiconductores y equipos de semiconductores	Estados Unidos	1.92%
US TSY 4% 02/34	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.91%
MICROSOFT CORP	Tecnología de la información	Software y servicios	Estados Unidos	1.90%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.20% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

Este gráfico representa el 84.4% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.35% y la cuota de inversión en actividades habilitadoras era del 0.78%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.37%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **28.82%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 7.43%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS GLOBAL MULTI-ASSET CONSERVATIVE

Identificador de la entidad jurídica: 549300B1RON20X3Z5K83

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>34.82%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.481 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.633 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.37% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.44% y la cuota de inversión en actividades habilitadoras era del 0.83%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.37%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **27.79%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.66%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS GLOBAL MULTI-ASSET TARGET INCOME

Identificador de la entidad jurídica: 549300MJSB1OV3IZ3T98

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>23.49%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la del universo de inversión. Para determinar la puntuación ESG del Subfondo y del universo de inversión, el desempeño ESG se evalúa comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características ESG: medioambiental, social y de gobierno corporativo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.
Al cierre del periodo:
 - La calificación ESG media ponderada de la cartera es **0.418 (D)**.
 - La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.506 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.43% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.28% y la cuota de inversión en actividades habilitadoras era del 0.52%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.46%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **18.40%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

- **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.66%.

- **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

- **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
INCOME OPPORTUNITIES

Identificador de la entidad jurídica:
549300ILVTGROHRV6666

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>28.60%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.035 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.280 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
ABN AMRO BANK NV-CVA	Finanzas	Entidades bancarias	Países Bajos	2.83%
US TSY 4% 07/30	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	2.40%
PFIZER INC	Asistencia sanitaria	Productos farmacéuticos Biotecnología y ciencias de la salud	Estados Unidos	2.32%
BANK OF AMERICA CORP	Finanzas	Entidades bancarias	Estados Unidos	2.29%
US TSY 4% 02/30	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	2.00%
EVERSOURCE ENERGY	Suministros públicos	Suministro eléctrico	Estados Unidos	1.93%
SHELL PLC EUR	Energía	Petróleo, gas y combustibles	Reino Unido	1.86%
KB FINANCIAL GROUP INC	Finanzas	Entidades bancarias	Corea	1.80%
HANA FINANCIAL HLDG	Finanzas	Entidades bancarias	Corea	1.66%
BANK OF IRELAND GROUP PLC	Finanzas	Entidades bancarias	Irlanda	1.63%
INTL BUSINESS MACHINES CORP	Tecnología de la información	Software y servicios	Estados Unidos	1.48%
CISCO SYSTEMS INC	Tecnología de la información	Equipo tecnológico y hardware	Estados Unidos	1.47%
STATE STREET CORP	Finanzas	Servicios financieros	Estados Unidos	1.43%
HENSOLDT AG	Industria	Bienes de capital	Alemania	1.31%
WF - AMD 15.48% 06/24/2026	Otros	Otros	Estados Unidos	1.03%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 28.60% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Otros	Otros	21.60%
Titulizado	MBS de agencias	16.88%
Finanzas	Entidades bancarias	13.83%
Bonos del Tesoro	Bonos del Tesoro	7.75%
Finanzas	Servicios financieros	3.60%
Energía	Petróleo, gas y combustibles	3.50%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.52% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.10% y la cuota de inversión en actividades habilitadoras era del 0.09%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.01%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 24.76% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.32%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
MULTI-ASSET REAL RETURN

Identificador de la entidad jurídica:
222100UNVFMGHI5DQJ57

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 45.53% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **Euro HICP ex Tobacco**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.777 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.769 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 45.53% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	21.16%
Empresas	Banca	18.65%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.50% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.33% y la cuota de inversión en actividades habilitadoras era del 0.82%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.06%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **37.31%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.72%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

☐ Realizó inversiones sostenibles con un objetivo social : _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI Daily Net Total Return World Euro Index (30%) Bloomberg EuroAgg Total Return Index Value Unhedged EUR Index (70%) Index**. Para determinar la puntuación ESG del Producto y el índice, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El índice es un índice de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
 - Exclusiones legales sobre armas controvertidas
 - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles;
 - The sectoral exclusions of the Amundi group on Coal and Tobacco; (details of this policy are available in Amundi's Responsible Investment Policy available on the website www.amundi.fr)
 - El Subfondo aplicó criterios de exclusión complementarios y específicos a empresas y emisores públicos en función de actividades controvertidas (incluidas armas controvertidas, armas nucleares y otras armas, tabaco, carbón, petróleo y gas, generación de electricidad mediante carbón o energía nuclear o petróleo o gas, licores fuertes, juegos de azar, ingeniería genética, peletería y pornografía) y comportamientos controvertidos (incluidos trabajo infantil, trabajo y derechos humanos, comportamiento perjudicial para el medio ambiente, corrupción, fraude, pena de muerte, energía nuclear).
2. No se ha invertido en emisores con calificación E, F o G. En el caso de los emisores cuya calificación se ha rebajado a E, F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares
3. No se ha invertido en emisores con calificación F o G en uno o más de los tres indicadores: Transición Energética y Ecológica, Cadena de Suministro Socialmente Responsable y Estrategia Corporativa ESG.
4. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del Índice de referencia del fondo tras eliminar el 20% de los peores emisores (*norma aplicable hasta finales de diciembre de 2024, fecha a partir de la cual el umbral se eleva al 25%*)
5. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

- Compromiso de mejora de las Principales Incidencias Adversas frente al universo (índice de referencia): Intensidad de carbono y ausencia de política de derechos humanos:

- Compromiso de mejorar la calificación ESG e indicadores ESG adicionales (Transición Energética y Ecológica, también conocida como TEE, Cadena de Suministro Socialmente Responsable, Estrategia Corporativa ESG, Política de Derechos Humanos con referencia al Pacto Mundial de las Naciones Unidas):

** El Índice de referencia se refiere al siguiente índice de referencia [30% MSCI World + 70% Bloomberg Euro Aggregate].

- Compromiso de mejora de las Principales Incidencias Adversas frente al universo (índice de referencia): Intensidad de carbono y ausencia de política de derechos humanos:

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del índice del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.128 (C)**.
- La calificación ESG media ponderada de la cartera es **0.711 (C)**

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.

- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.104 (C) y la calificación ESG media ponderada del Índice de referencia era de 0.718 (C).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

• **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
BTPS 4% 04/35 13Y	Bonos del Tesoro	Bonos del Tesoro	Italia	2.57%
SPAIN 1% 07/42	Bonos del Tesoro	Bonos del Tesoro	España	2.24%
IRELAND 3% 10/43	Bonos del Tesoro	Bonos del Tesoro	Irlanda	2.10%
NEDERLD 0.5% 01/40	Bonos del Tesoro	Bonos del Tesoro	Países Bajos	2.05%
AUSTRIA 2.9% 05/29	Bonos del Tesoro	Bonos del Tesoro	Austria	1.97%
BNG 0.125% 04/33 EMTN	Empresas	Banca	Países Bajos	1.91%
SPAIN 4.20% 01/37	Bonos del Tesoro	Bonos del Tesoro	España	1.90%
MICROSOFT CORP	Tecnología de la información	Software y servicios	Estados Unidos	1.89%
NVIDIA CORP	Tecnología de la información	Semiconductores y equipos de semiconductores	Estados Unidos	1.67%
SPGB IE 0.7% 11/33 SPGBE	Bonos del Tesoro	Bonos del Tesoro	España	1.65%
SFILFR 0.25% 12/31 EMTN	Sector público	Agencias	Francia	1.62%
AUSTRIA 2.4% 05/34	Bonos del Tesoro	Bonos del Tesoro	Austria	1.55%
IRELAND 1,35% 03/31	Bonos del Tesoro	Bonos del Tesoro	Irlanda	1.44%
LIN 0.25% 05/27	Empresas	Industria básica	Países Bajos	1.34%
BTPS 4% 10/31 8Y	Bonos del Tesoro	Bonos del Tesoro	Italia	1.33%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 72.93% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	24.98%
Empresas	Banca	18.06%
Titulizado	Activos hipotecarios	6.76%
Sector público	Agencias	5.48%
Tecnología de la información	Software y servicios	3.70%
Tecnología de la información	Semiconductores y equipos de semiconductores	3.29%
Finanzas	Entidades bancarias	2.45%
Empresas	Bienes de equipo	2.42%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.08% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☐

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.08% y la cuota de inversión en actividades habilitadoras era del 1.11%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.04%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **63.92%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.94%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los **índices de referencia** son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
MULTI-ASSET CLIMATE

Identificador de la entidad jurídica:

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>62.01%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **5% MSCI USD HY CORPORATE BOND INDEX + 50% MSCI ACWI + 5% MSCI EUR HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 25% MSCI EUR IG CORPORATE BOND INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Durante el ejercicio, el producto promovió continuamente las características medioambientales con el objetivo de reducir su intensidad de carbono alineando la intensidad de su huella de carbono con la de su Índice de referencia **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es 0.521 (C).
- La calificación ESG media ponderada del universo de inversión ESG es -0.003 (D).

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: mide el funcionamiento de un emisor en dos conceptos distintos: la estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

El indicador de sostenibilidad utilizado es la intensidad de la huella de carbono de la cartera, que se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice de referencia. En consecuencia, los títulos con una huella ecológica relativamente baja tenían más probabilidades de ser seleccionados en la cartera que los títulos con una huella ecológica relativamente alta.

- La intensidad media ponderada de la huella de carbono de la cartera es de 90.77
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 161.27

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.519 (C) y la calificación ESG media ponderada del universo de inversión ESG era de -0.012 (D). Al final del periodo anterior, la media ponderada de intensidad de carbono de la cartera era de 93.73 y el índice de referencia de intensidad media ponderada de carbono era de 110.21.

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
NVIDIA CORP	Tecnología de la información	Semiconductores y equipos de semiconductores	Estados Unidos	2.13%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.87% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.20% y la cuota de inversión en actividades habilitadoras era del 0.95%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.68%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **47.86%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 10.28%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

El objetivo de inversión sostenible se alcanza alineando los objetivos de reducción de la huella de carbono del fondo con 50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX (ESG). La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 90.77
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 161.27

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

El índice utilizado es un "índice de referencia de transición climática" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

- La calificación ESG media ponderada de la cartera es 0.521 (C).
- La calificación ESG media ponderada del universo de inversión ESG es -0.003 (D).
- La intensidad media ponderada de la huella de carbono de la cartera es de 90.77
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 161.27

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

El objetivo de inversión sostenible se alcanza alineando los objetivos de reducción de la huella de carbono del fondo con 50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX (ESG). La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 90.77
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 161.27

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

El índice utilizado es un "índice de referencia de transición climática" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS PIONEER FLEXIBLE OPPORTUNITIES

Identificador de la entidad jurídica: 5493000SYHI3US1RDZ90

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>39.33%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **U.S. CPI Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.601 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.509 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
POSTE ITALIANE SPA	Finanzas	Seguros	Italia	4.63%
BAWAG GROUP AG	Finanzas	Entidades bancarias	Austria	4.14%
INTL BUSINESS MACHINES CORP	Tecnología de la información	Software y servicios	Estados Unidos	3.94%
CURTISS-WRIGHT	Industria	Bienes de capital	Estados Unidos	3.72%
PALO ALTO NETWORKS INC	Tecnología de la información	Software y servicios	Estados Unidos	3.58%
AXA SA	Finanzas	Seguros	Francia	3.46%
NEWMONT CORP	Materiales	Metales y minería	Estados Unidos	3.45%
IBERDROLA SA	Suministros públicos	Suministro eléctrico	España	3.42%
SWISS LIFE HOLD AG	Finanzas	Seguros	Suiza	3.33%
CRH PLC UK	Materiales	Materiales de construcción	Irlanda	3.27%
DBS GROUP HOLDINGS LTD	Finanzas	Entidades bancarias	Singapur	3.03%
SUMITOMO MITSUI FINAN	Finanzas	Entidades bancarias	Japón	2.88%
CISCO SYSTEMS INC	Tecnología de la información	Equipo tecnológico y hardware	Estados Unidos	2.80%
EVERSOURCE ENERGY	Suministros públicos	Suministro eléctrico	Estados Unidos	2.50%
AVIVA PLC	Finanzas	Seguros	Reino Unido	2.46%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 39.33% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

• ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Finanzas	Entidades bancarias	19.67%
Finanzas	Seguros	19.17%
Tecnología de la información	Software y servicios	7.52%
Suministros públicos	Suministro eléctrico	7.19%
Industria	Bienes de capital	6.58%
Finanzas	Servicios financieros	3.84%
Materiales	Metales y minería	3.45%
Materiales	Materiales de construcción	3.27%
Industria	Servicios comerciales y	3.23%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.03% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒ Sí:

☒ En gas fósil

☒ En energía nuclear

☐ No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 91.5% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.42% y la cuota de inversión en actividades habilitadoras era del 1.63%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.35%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **27.78%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 8.52%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS REAL ASSETS TARGET INCOME

Identificador de la entidad jurídica: 549300B49TP3UV3FOI07

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>23.64%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOXX EURO CORPORATE NON FINANCIALS + 5% BLOOMBERG COMMODITY INDEX USD TR + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 10% MSCI World Index / Food Beverage & Tobacco -IG + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI World Index / Materials -SEC + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% ICE BOFA GLOBAL INFLATION- LINKED GOVERNMENT INDEX + 5% MSCI World Index / Utilities -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI World Index / Energy -SEC (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

• **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.419 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.025 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.533 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.045 (C).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
US TSY 6.75% 08/26	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	6.88%
BTPS 5% 09/40	Bonos del Tesoro	Bonos del Tesoro	Italia	4.06%
AMUNDI PHYSICAL GOLD ETC	Finanzas	Fondos de inversión colectiva	Irlanda	3.77%
AMUNDI GOLD STOCK-AED	Finanzas	Fondos de inversión colectiva	Austria	3.32%
INVESCO MORN* US ENRGY INFRA MLP ETF(LSE	Finanzas	Fondos de inversión colectiva	Irlanda	3.08%
DBR 6.50% 04/07/2027	Bonos del Tesoro	Bonos del Tesoro	Alemania	2.74%
US TII 3.875% 04/29	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.75%
US TII 3.375% 04/32	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.57%
A-F EMERGING MKT CORP BD-Z USD QD	Finanzas	Fondos de inversión colectiva	Luxemburgo	1.44%
EXXON MOBIL CORP	Energía	Petróleo, gas y combustibles	Estados Unidos	1.38%
ISHARES CHINA TECH USD ACC	Finanzas	Fondos de inversión colectiva	Irlanda	1.17%
US TSY 4.125% 11/32	Bonos del Tesoro	Bonos del Tesoro	Estados Unidos	1.05%
UNION PACIFIC CORP	Industria	Transporte	Estados Unidos	0.89%
LINDE PLC	Materiales	Productos químicos	Irlanda	0.83%
EQUINIX INC	Inmobiliario	REIT	Estados Unidos	0.82%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 23.64% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Bonos del Tesoro	Bonos del Tesoro	19.42%
Finanzas	Fondos de inversión colectiva	13.11%
Inmobiliario	REIT	8.40%
Energía	Petróleo, gas y combustibles	6.15%
Materiales	Productos químicos	5.90%
Industria	Transporte	4.73%
Materiales	Metales y minería	3.99%
Sector público	Deuda pública	3.16%
Empresas	Banca	2.86%

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.50% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.17% y la cuota de inversión en actividades habilitadoras era del 0.44%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.01%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **16.67%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.48%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS EURO BOND INCOME

Identificador de la entidad jurídica: 2221009D0WCSI3Q32Q11

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 47.40% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **60% Bloomberg Euro Aggregate Corporate +40% ICE BofA European Currency High Yield Constrained Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.730 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.435 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.561 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.000 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 47.40% en inversiones relacionadas con la sostenibilidad.

¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
<i>Empresas</i>	<i>Banca</i>	<i>29.14%</i>

<i>Efectivo</i>	<i>Efectivo</i>	<i>0.47%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.87% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.55% y la cuota de inversión en actividades habilitadoras era del 0.57%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.96%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **39.4%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

- **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.50%.

- **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

- **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
ABSOLUTE RETURN MULTI-STRATEGY

Identificador de la entidad jurídica:
549300G94XO1UF8XMQ66

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☐ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____ ☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>35.95%</u> de inversiones sostenibles ☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE ☒ con un objetivo social ☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.525 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.466 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.64% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: - el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.30% y la cuota de inversión en actividades habilitadoras era del 0.79%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.22%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 29.47% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.84%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS ABSOLUTE RETURN GLOBAL OPPORTUNITIES BOND

Identificador de la entidad jurídica: 549300BBK38MPT8QZI59

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>46.79%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG GLOBAL AGGREGATE (ESG)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.795 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.619 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.876 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.699 (C).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 46.79% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- **¿En qué sectores económicos se realizaron las inversiones?**

Sector	Subsector	% de activos
<i>Empresas</i>	<i>Banca</i>	38.83%
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	22.70%

<i>Empresas</i>	<i>Energía</i>	1.27%
<i>Empresas</i>	<i>INTERMEDIACIÓN</i>	1.07%
<i>Empresas</i>	<i>Consumo básico</i>	0.53%
<i>Forex</i>	<i>Forex</i>	0.01%
<i>Otros</i>	<i>Otros</i>	-0.23%
<i>Efectivo</i>	<i>Efectivo</i>	3.87%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.79% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	96.13%	94.76%	95.70%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.09%	0.04%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.32%	0.22%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	3.87%	4.83%	4.04%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	95.51%	93.67%	95.09%
■ Alineado con la Taxonomía: Gas fósil	0.00%	0.13%	0.06%
■ Alineado con la Taxonomía: Nuclear	0.00%	0.48%	0.32%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	4.49%	5.71%	4.52%

Este gráfico representa el 67.0% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.38% y la cuota de inversión en actividades habilitadoras era del 0.29%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.22%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **39.81%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.19%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS
MULTI STRATEGY GROWTH

Identificador de la entidad jurídica:

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>30.54%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la del universo de inversión. Para determinar la puntuación ESG del Subfondo y del universo de inversión, el desempeño ESG se evalúa comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características ESG: medioambiental, social y de gobierno corporativo. No se ha designado ningún Índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.
Al cierre del periodo:
 - La calificación ESG media ponderada de la cartera es **0.437 (D)**.
 - La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

- ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.386 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

- ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

Mayores inversiones	Sector	Subsector	País	% de activos

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades **alineadas con la Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 2.30% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 86.6% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.45% y la cuota de inversión en actividades habilitadoras era del 0.94%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.15%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **22.64%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.60%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>43.88%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **90% Bloomberg Global Aggregate + 10% JPM EMBI Global Diversified Index**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
- Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.107 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.545 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.067 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos
AMUNDI FUNDS GLOBAL SHORT TERM BOND Z	Finanzas	Fondos de inversión colectiva	Luxemburgo	6.17%

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 43.88% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

<i>Sector</i>	<i>Subsector</i>	<i>% de activos</i>
<i>Empresas</i>	<i>Banca</i>	<i>40.72%</i>
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	<i>9.68%</i>
<i>Finanzas</i>	<i>Fondos de inversión colectiva</i>	<i>8.91%</i>
<i>Sector público</i>	<i>Agencias</i>	<i>7.72%</i>
<i>Sector público</i>	<i>Deuda pública</i>	<i>7.28%</i>
<i>Sector público</i>	<i>Supranacional</i>	<i>4.48%</i>
<i>Empresas</i>	<i>Consumo discrecional</i>	<i>2.85%</i>
<i>Empresas</i>	<i>Seguros</i>	<i>2.66%</i>
<i>Empresas</i>	<i>Transporte</i>	<i>2.57%</i>
<i>Titulizado</i>	<i>Activos hipotecarios</i>	<i>1.54%</i>
<i>Empresas</i>	<i>Comunicación</i>	<i>1.17%</i>
<i>Otros</i>	<i>Otros</i>	<i>0.00%</i>
<i>Forex</i>	<i>Forex</i>	<i>-0.99%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>11.42%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades **alineadas con la Taxonomía** se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los **gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.82% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.22% y la cuota de inversión en actividades habilitadoras era del 0.32%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.05%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **40.16%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

- **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.90%.

- **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

- **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS PROTECT 90

Identificador de la entidad jurídica: 22210055YWH87PNEL252

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>39.32%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

El Subfondo promueve las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la del universo de inversión.

Para determinar la puntuación ESG del Subfondo y del universo de inversión, el desempeño ESG se evalúa comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características ESG: medioambiental, social y de gobierno corporativo.

No se ha designado ningún Índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.589 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.648 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2025**

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 39.32% en inversiones relacionadas con la sostenibilidad.

- ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

- ¿En qué sectores económicos se realizaron las inversiones?

Sector	Subsector	% de activos
Finanzas	Fondos de inversión colectiva	98.58%
Otros	Otros	0.15%
Forex	Forex	0.04%
Bonos del Tesoro	Bonos del Tesoro	0.00%
Efectivo	Efectivo	1.23%

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades **alineadas con la Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado** (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación** (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.85% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

Sí:

En gas fósil

En energía nuclear

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

1. Alineación con la Taxonomía de las inversiones incluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	98.31%	97.26%	97.49%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.03%	0.01%
■ Alineado con la Taxonomía: Nuclear	0.08%	0.37%	0.24%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	1.61%	2.34%	2.25%

2. Alineación con la Taxonomía de las inversiones, excluida la deuda pública*

	Gastos de explotación	Inversiones en inmovilizado	Volumen de negocio
■ No alineado con la Taxonomía	97.84%	96.42%	96.45%
■ Alineado con la Taxonomía: Gas fósil	0.01%	0.04%	0.01%
■ Alineado con la Taxonomía: Nuclear	0.01%	0.46%	0.29%
■ Alineado con la Taxonomía [sin gas ni energía nuclear]	2.14%	3.08%	2.95%

Este gráfico representa el 72.2% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.13% y la cuota de inversión en actividades habilitadoras era del 0.69%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.36%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **31.23%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.25%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS CASH EUR

Identificador de la entidad jurídica:
5299002SSK89DA5VPJ96

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 64.50% de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

Una **inversión sostenible** es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Los **indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.993 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.098 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.849 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.051 (D).

• **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

El fondo invirtió el 64.50% en inversiones relacionadas con la sostenibilidad.

• ¿Cuál era la asignación de activos?

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

La asignación de activos describe la proporción de inversiones en activos específicos.

- **¿En qué sectores económicos se realizaron las inversiones?**

Sector	Subsector	% de activos
<i>Empresas</i>	<i>Banca</i>	<i>57.57%</i>
<i>Bonos del Tesoro</i>	<i>Bonos del Tesoro</i>	<i>17.87%</i>
<i>Otros</i>	<i>Otros</i>	<i>8.72%</i>
<i>Titulizado</i>	<i>Activos hipotecarios</i>	<i>3.86%</i>

<i>Empresas</i>	<i>Transporte</i>	<i>0.04%</i>
<i>Efectivo</i>	<i>Efectivo</i>	<i>-8.63%</i>

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.71% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

- **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.14% y la cuota de inversión en actividades habilitadoras era del 0.53%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.63%.

 son inversiones sostenibles con un objetivo medioambiental que **no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **59.53%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.27%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Nombre del producto: AMUNDI FUNDS CASH USD

Identificador de la entidad jurídica: 529900YRTK94MJYXUO62

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?	
☒ Sí	☒ No
☐ Realizó inversiones sostenibles con un objetivo medioambiental: _____	☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>48.76%</u> de inversiones sostenibles
☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE	☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE
☐ Realizó inversiones sostenibles con un objetivo social: _____	☒ con un objetivo social
	☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX (ESG). Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- ¿Cómo se comportaron los indicadores de sostenibilidad?
Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.
El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.585 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.098 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

• ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.736 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.051 (D).

• ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Desde el 01/07/2024 hasta el 30/06/2025

Mayores inversiones	Sector	Subsector	País	% de activos

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.84% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE. La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☒

Sí:

☒

En gas fósil

☒

En energía nuclear

☐

No

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

Este gráfico representa el 91.9% del total de las inversiones.

* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

- ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2025, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.04% y la cuota de inversión en actividades habilitadoras era del 0.45%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.39%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 44.42% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.50%.

¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.
