■ T3 2024

El tercer trimestre cerró con un marcado descenso de la inflación, señales de desaceleración económica y cambios en las políticas monetarias de los bancos centrales. La economía estadounidense, que había sorprendido por su resiliencia durante varios trimestres, empezó a mostrar indicios de debilidad. El mercado ha descontado el riesgo de recesión. Europa, especialmente Alemania, empezó a decepcionar con una falta de dinamismo que se tradujo en un crecimiento muy lento. Los mercados financieros, pese a la elevada volatilidad de agosto, se recuperaron al final del trimestre, impulsados por las expectativas de una bajada de los tipos de interés y el plan de recuperación de la economía china. Este trimestre también ha estado marcado por la incertidumbre política, sobre todo las próximas elecciones estadounidenses, el conflicto en curso en Ucrania y el riesgo de una guerra total en Oriente Medio. El oro alcanzó máximos históricos, por encima de 2600 dólares la onza.

Estados Unidos

La economía estadounidense mostró signos de desaceleración y la inflación siguió bajando. El índice de precios al consumo (IPC) bajó del 3% en junio al 2.5% en agosto sobre una base anual, y la medida de inflación PCE utilizada por la Reserva Federal (Fed) cayó al 2.2% (2.7% para el índice subyacente). Las previsiones apuntan a una vuelta al objetivo del 2% en 2025. El principal cambio vino del mercado laboral, con cifras de desempleo peores de lo previsto en agosto e indicios de fragilidad persistentes en septiembre. La creación de empleo se ralentizó, mientras que las solicitudes de subsidio por desempleo aumentaron ligeramente, lo cual generó incertidumbre sobre la fortaleza de la economía estadounidense. Por otra parte, el sector manufacturero siguió contrayéndose, con una caída del índice ISM hasta 47.2 en agosto, lo que supone el quinto mes consecutivo de contracción de la actividad. El consumo de los hogares también mostró signos de ralentización, sobre todo debido a la caída de la confianza de los consumidores, afectada por el temor a un empeoramiento del mercado laboral.

La tendencia a la baja de la inflación, unida al deterioro del mercado laboral, convenció a la Reserva Federal para cambiar de rumbo. Su presidente, Jerome Powell, preparó al público para ello en el Simposio de Jackson Hole. En septiembre, la Reserva Federal recortó sus tipos de interés de referencia 50 puntos básicos, del 5.25% al 4.75%, confirmando así su intención de respaldar la economía y garantizar el pleno empleo.

Las elecciones estadounidenses del 5 de noviembre añaden una dosis de incertidumbre. Kamala Harris ha superado con éxito la transición como sucesora de Joe Biden. Ha dado un nuevo impulso a la campaña demócrata y ahora compite codo con codo con Donald Trump. El expresidente ha sido víctima de dos intentos de asesinato, lo que ha exacerbado las tensiones en un país ya profundamente dividido. Las propuestas de los candidatos, sobre todo en materia de fiscalidad, regulación económica y políticas medioambientales, son objeto de un atento escrutinio por parte de los inversores. Las políticas medioambientales propuestas por Harris, y la promesa de Trump de recortes de impuestos, podrían influir poderosamente en la trayectoria económica del país.

Zona euro

En Europa, el tercer trimestre fue testigo de la consolidación de la recuperación iniciada en primavera. Sin embargo, el crecimiento continúa siendo modesto. El PIB de la zona euro solo avanzó un 0.6% en agosto, con importantes divergencias entre las principales economías. Encuestas de previsión como el PMI del HCOB (Banco Comercial de Hamburgo) apuntan ahora a una contracción de la actividad con un giro negativo en servicios. Alemania, la mayor economía de la eurozona, sigue mostrando indicios de debilidad, con un crecimiento cercano a cero y un sector industrial aletargado. El Bundesbank cree que la economía está cerca de la recesión. El PMI manufacturero alemán siguió cayendo en agosto, de 42.4 a 40.3 puntos. El panorama es más positivo en Francia y España, donde el consumo interno ha mantenido un crecimiento sostenido, sobre todo en los sectores del turismo y el consumo (ayudado por el "efecto Olimpiadas" en el caso de Francia).

La inflación de la zona euro prosiguió su tendencia a la baja, con una tasa media del 2.2% en agosto, frente al 2.6% de julio. La inflación subyacente se mantiene estable en el 2.8% y el sector servicios continúa siendo la principal fuente de presiones inflacionistas, mientras que los productos manufacturados y la energía contribuyen al descenso. A finales de septiembre, la cifra de inflación de Francia se situó muy por debajo de las expectativas, en el 1.5% anual, frente al 2% previsto por los economistas (la medida europea).

En este contexto de débil crecimiento y caída continuada de la inflación, el Banco Central Europeo (BCE) volvió a recortar sus tipos de interés de referencia en septiembre, reduciendo el tipo de los depósitos del 3.75% al 3.5%. Sin embargo, Christine Lagarde advirtió de que el alcance de futuras rebajas dependería de la evolución de la inflación y de la dinámica salarial.

Mercados emergentes

En China, los datos no cumplieron las expectativas en el tercer trimestre, con un crecimiento de la producción industrial del 4.5% en lugar del 4.7% previsto en agosto, y unas ventas minoristas decepcionantes. El mercado inmobiliario sigue siendo el principal problema, con una caída de los precios y un descenso del volumen de operaciones. Esta situación está lastrando el consumo y el empleo. En un intento por reactivar la deprimida demanda interna, Pekín anunció a finales de septiembre varias medidas contundentes para estimular el crédito hipotecario, el consumo y apoyar el mercado bursátil chino.

En la India, la actividad se mantiene dinámica, con un crecimiento del 6.7% entre abril y junio y una trayectoria prevista superior al 6% este año, pero inferior a la del año anterior. Las reformas económicas y la demanda interna respaldan esta dinámica, aunque persisten las presiones inflacionistas, sobre todo en el sector alimentario. Los demás mercados emergentes registraron resultados dispares, sobre todo en Latinoamérica, donde la inflación sigue siendo un quebradero de cabeza. En Brasil, el banco central quiere endurecer las condiciones financieras, en contra de lo aconsejado por el Gobierno.

Renta fija

El tercer trimestre de 2024 marcó un punto de inflexión para los mercados de renta fija con el inicio del ciclo de bajada de tipos de los bancos centrales. En Estados Unidos, los rendimientos de los bonos cayeron: el tipo a 10 años subió inicialmente al 4.5% para luego volver a caer directamente a alrededor del 3.75%. Los rendimientos de los bonos del Tesoro a 2 años, más sensibles a las decisiones de la Fed, pasaron del 4.8% al 3.6% entre junio y septiembre. Este movimiento se ha acelerado ante los decepcionantes datos de empleo y la reaparición del riesgo de recesión, y el mercado descuenta más recortes de tipos de la Fed. Así pues, asistimos a una inclinación de las curvas de rendimientos estadounidenses a medida que la Fed reduce su balance y el mercado anticipa rebajas en sus tipos de referencia.

En Europa, los recortes de tipos han sido menos agresivos, pero la tendencia sigue siendo la misma. El tipo alemán a 10 años retrocedió hasta rondar el 2.1%, al que se unió el rendimiento a 2 años, mientras que el tipo francés se situó por debajo del 3%, penalizado por la rebaja de la calificación crediticia del país, un notable deterioro del déficit para 2024 que se acerca al 6.3% del PIB y una notable incertidumbre sobre el presupuesto en ausencia de un gobierno mayoritario. Los diferenciales de tipos entre los países europeos se mantuvieron relativamente estables, pero el diferencial Francia-Alemania subió a unos 80 puntos básicos. Los mercados de crédito siguen siendo volátiles, pero los resultados han sido positivos. Los inversores prestan especial atención a la calidad de los balances y a la evolución de los márgenes, en un entorno económico actualmente más incierto.

Renta variable

En los mercados bursátiles, el trimestre se caracterizó por una mayor volatilidad, sobre todo en el sector tecnológico. A principios de agosto se produjo una breve corrección tras la inesperada subida de tipos del Banco de Japón y las decepcionantes estadísticas de desempleo estadounidenses. El sector de semiconductores también sufrió una severa corrección tras los decepcionantes resultados percibidos por Nvidia en agosto, uno de los puntales del sector. Además, surgen dudas sobre la rentabilidad de las inversiones masivas en IA. Pero el S&P 500 (en USD) prosigue su avance, apuntalado por los sectores de salud y consumo básico (+20% desde principios de año). Estamos asistiendo a un reequilibrio del rendimiento entre sectores y estilos.

En Europa, el Euro Stoxx 50 experimentó una fuerte subida, gracias a un marcado repunte de los títulos de artículos de lujo, impulsados al final del trimestre por el plan de recuperación de la economía china, que sugiere mejores datos en términos de consumo. El sector bancario prosiguió su crecimiento durante el trimestre en un contexto de inclinación de las curvas de rendimientos. El CAC 40 se recupera ligeramente al final del periodo, animado por el sector del lujo. El Dax 30 alemán y el FTSE 100 británico cerraron el periodo al alza.

En Japón, los índices bursátiles, lastrados por la rápida revalorización del yen y el minicrash bursátil de principios de agosto, tras la subida de tipos por sorpresa del Banco de Japón, cerraron el periodo marcadamente a la baja. Tras meses de malos resultados y con los índices en su nivel más bajo de los últimos 5 años, las acciones chinas repuntaron con mucha fuerza a finales de septiembre, anotándose un 20% en pocas sesiones, tras los anuncios del banco central y las medidas de

apoyo al mercado. Por su parte, la India sigue batiendo récords, con una importante subida del NIFTY 50, el principal índice bursátil indio, que se anotó un 7.5% en el trimestre.

■ T4 2024

El cuarto trimestre de 2024 estuvo marcado por la victoria republicana de Donald Trump en EE. UU. y el crecimiento continuado del país. Este impulso contrasta con la debilidad de Europa y China. Los bancos centrales prosiguieron con sus ciclos de reducción de tipos, al tiempo que se mantenían vigilantes ante el riesgo de un rebrote de la inflación. Los riesgos geopolíticos siguen muy presentes. En general, los mercados financieros han mantenido su tendencia positiva y, en última instancia, 2024 será un buen año para los inversores.

Macroeconomía

EE.UU.: cambio político y resiliencia económica

La economía estadounidense volvió a dar muestras de resiliencia en el cuarto trimestre, aunque persisten ciertas debilidades. El crecimiento del PIB repuntó un 2.8% en el tercer trimestre, confirmando así su tendencia positiva para 2024. Los indicadores adelantados, como el índice ISM manufacturero, se mantuvieron en terreno de contracción en noviembre (48.4), lo que refleja la falta de dinamismo de la industria, aunque mejoraron en diciembre (49.3). Sin embargo, el sector servicios, que había resistido bien hasta entonces, muestra signos de debilidad. El índice ISM de servicios se situó en 52.1 en noviembre, por debajo de los 56 registrados en octubre, lo que supuso una decepción para un consenso de 55.5. El consumo, motor clave de la economía, mantiene su solidez gracias a la estabilidad de los ingresos de los hogares, si bien se enfrenta a persistentes presiones inflacionistas. La confianza de los consumidores sigue siendo alta, como muestra el índice de confianza de los consumidores de Michigan, que subió 2.8 puntos en diciembre con respecto a noviembre. En el mercado laboral, la creación de empleo superó con creces las expectativas, alcanzando los 227,000 puestos de trabajo en noviembre, demostró una notable resistencia y contribuyó a las positivas perspectivas de los consumidores. Sin embargo, la tasa de desempleo aumentó ligeramente, hasta el 4.2% (un 0.1% más en el periodo), aunque sigue bajo control.

El índice de precios al consumo dejó de bajar a finales de año, subiendo al 2.6% en octubre y al 2.7% en diciembre, y las presiones subyacentes siguen siendo elevadas. Pero la Reserva Federal continuó con su política de reducción gradual de los tipos, y recortó su tipo de referencia 0.5 puntos porcentuales, hasta el 4.5%, durante el trimestre. La Fed ya no considera que el mercado laboral sea un factor inflacionista y que la contribución de la vivienda es un efecto retardado que se desvanecerá. Pero conserva la prudencia, ya que su barómetro favorito de la inflación, el índice PCE subyacente, se mantiene en el 2.8%. La Fed busca volver a la neutralidad mientras vigila el riesgo de un retorno de la inflación con la implantación de políticas aduaneras y de inmigración por parte de la nueva Administración Trump.

Europa: débil crecimiento e inestabilidad política

Europa sigue moviéndose en un entorno económico sombrío, marcado por el debilitamiento de la demanda externa, las crecientes tensiones comerciales, las divergencias económicas internas y una relativa inestabilidad política. El dinamismo del crecimiento mejoró con la publicación del PIB de la zona euro del tercer trimestre, que confirmó un aumento del 0.9% interanual. El mercado laboral siguió mejorando, con una tasa de desempleo en la Eurozona del 6.3%. Los indicadores adelantados (HCOB) del sector manufacturero de la zona euro siguieron contraídos y se situaron por debajo de las expectativas en su publicación de finales de año. También decepcionaron los servicios, que se encaminan hacia una desaceleración a corto plazo. Alemania sigue en recesión por segundo año consecutivo, con una contracción del PIB del 0.3% interanual en el tercer trimestre. El sector industrial, pilar de la economía alemana, se enfrenta a la atonía de la demanda, agravada por las tensiones comerciales con China y Estados Unidos. El sector de la automoción se ha visto especialmente afectado, y es testigo de crecientes recortes de empleo. El gobierno de Olaf Scholz ha perdido la mayoría, lo que conduce a nuevas elecciones legislativas el 23 de febrero de 2025. En Francia, el "efecto Olimpiadas" se ha desvanecido, dando paso a la incertidumbre política. Las previsiones de déficit público siguen deteriorándose, hasta alcanzar el 6.1% del PIB en 2024. El Gobierno de Barnier, que no logró aprobar el presupuesto para 2025, ha sido objeto de críticas. La calificación de la deuda francesa fue finalmente objeto de rebaja por parte de Moody's unas horas después del nombramiento de François Bayrou como primer ministro.

Aunque la inflación pasó del 2% en octubre al 2.3% en noviembre (variación anual del índice de precios armonizado), el Banco Central Europeo recortó sus tipos de referencia 50 puntos básicos durante el trimestre, situando el tipo de los depósitos en el 3.00%. El Banco de Inglaterra revisó a la baja su tipo de interés de referencia 25 puntos básicos, hasta el 4.75%.

Mercados emergentes:

En China, el Gobierno continuó su apoyo al sector inmobiliario y centró sus esfuerzos en sanear los balances bancarios y las finanzas públicas locales. Sin embargo, la debilidad del sector inmobiliario sigue lastrando la confianza de los hogares. China también se enfrenta al riesgo de deflación (inflación del 0.3% en octubre y del 0.2% en noviembre, en tasa interanual), ya que el dinamismo de las exportaciones se agota y podría deteriorarse aún más con un aumento de los aranceles aduaneros estadounidenses con la vuelta al poder de Donald Trump. Este entorno sigue frenando el crecimiento, que probablemente será inferior al objetivo del 5%.

En la India, el dinamismo económico general sigue siendo positivo (apoyado por las grandes inversiones en infraestructuras), a pesar del decepcionante PIB del tercer trimestre de 2024, del 5.4%, frente a la previsión del 6.5%. Las tensiones en el mercado laboral y la ralentización de algunos sectores estratégicos, como el tecnológico, reducen las perspectivas de crecimiento.

En Brasil continúa el crecimiento sostenido, lo que ha llevado al Fondo Monetario Internacional a aumentar su previsión para 2024 del 2.1% al 3%. El banco central, ante un rebrote de la inflación, ha subido sus tipos de interés 50 puntos para situar el tipo Selic en el 12%.

Mercados financieros

Mercados de bonos: Tendencias divergentes entre EE. UU. y Europa

En Estados Unidos, los rendimientos de los bonos del Tesoro siguieron subiendo, hasta el 4.58% al final del periodo. Esta tendencia se debe a la resiliencia de la economía estadounidense y la anticipación de una ampliación del déficit presupuestario, vinculada a los anuncios de recortes de impuestos del futuro presidente Donald Trump, así como el riesgo de un retorno de la inflación en 2025. Los tipos a corto plazo, a 2 años, han seguido una trayectoria similar, subiendo hasta el 4.36% en diciembre, y reflejan un entorno inflacionista persistente, que limitó el ciclo de recortes de tipos de la Fed.

En Europa, la disparidad es significativa, en un contexto de descenso de la inflación más rápido de lo previsto y de escaso crecimiento, lo que sugiere nuevos recortes de tipos por parte del BCE. El rendimiento de los bonos alemanes a 10 años regresó al 2.1%, mientras que los bonos franceses (OAT) alcanzaron el 2.9% para luego volver a subir al 3.20% al final del periodo. El diferencial entre los bonos franceses y alemanes se amplió y superó los 80 puntos básicos tras la moción de censura al Gobierno de Barnier. En cambio, el diferencial entre los tipos de la deuda pública italiana y la española y los de Alemania se ha reducido, lo que ha provocado un desplazamiento de la deuda francesa. Los tipos a corto plazo de la zona euro se muestran volátiles: en Alemania fluctuaron a lo largo del trimestre, estabilizándose en el 2.09% en diciembre, mientras que los tipos franceses cerraron el trimestre en el 2.28%. Estos movimientos reflejan ajustes ante las divergencias económicas entre los Estados miembros y la política acomodaticia del BCE.

Mercados de renta variable: resultados dispares en todo el mundo

En Estados Unidos, los índices bursátiles alcanzaron nuevos máximos, impulsados por las expectativas de una política fiscal y una desregulación favorables a las empresas estadounidenses, y por el comportamiento de los valores tecnológicos. El S&P 500 cruzó el umbral de los 6,000 puntos antes de retroceder, registrando una ganancia en USD del 3.03% durante el trimestre. Las megacapitalizaciones se dispararon más de un 14%, lo que impulsó fuertemente el mercado. El Nasdaq —especialmente expuesto a las grandes empresas tecnológicas y a la inteligencia artificial— obtuvo mejores resultados, con una subida del 6.27% (en USD). La victoria republicana en las elecciones provocó importantes flujos internacionales hacia la renta variable estadounidense. Estas rentabilidades ilustran la búsqueda del "efecto Trump" y la renovada confianza en la economía estadounidense, así como la preferencia de los inversores por los valores de crecimiento.

En Europa, los índices se vieron castigados por la incertidumbre política y unos datos económicos decepcionantes. El Eurostoxx 50 cerró el trimestre con una caída del 1.17% (en EUR). Las divergencias sectoriales fueron marcadas y los gigantes europeos (los "Granolas") se dejaron un 7.6%. El CAC 40 cerró con un descenso

Las cifras recogidas en el presente informe son históricas y no necesariamente indicativas de los resultados futuros.

del 2.55% en el trimestre, debido a los decepcionantes resultados de los sectores del lujo y automoción, junto con un descuento vinculado a la incertidumbre política. El DAX alemán, más expuesto a los sectores tecnológico y financiero, destacó con un notable resultado positivo del 3.8%.

En Asia, el Nikkei 225 cayó un 5.6% (en USD) en el cuarto trimestre, a raíz de la volatilidad del yen y la imprevisibilidad de las decisiones del Banco de Japón. El repunte de las acciones chinas que comenzó a finales de septiembre, tras el anuncio de importantes medidas para estabilizar el sector inmobiliario, se prolongó hasta principios de octubre, para luego desvanecerse. Los inversores esperan ahora medidas concretas. Sin embargo, este repunte ilustra el retorno de la confianza en la capacidad de Pekín para estabilizar su economía tras varios trimestres de ralentización.

Perspectivas para 2025

El comienzo de 2025 estará marcado por las primeras políticas de Donald Trump. Dependiendo de si favorece un eje fiscal (recortes masivos de impuestos) y la desregulación de ciertos sectores, o políticas proteccionistas y migratorias reforzadas, las implicaciones económicas podrían ser muy diferentes. En este contexto, los bancos centrales, y la Reserva Federal en particular, mantendrán la cautela, mientras que los inversores tendrán que hacer frente a unas perspectivas económicas inciertas y a una mayor volatilidad en los mercados financieros.

■ T1 2025

La economía estadounidense dio muestras de debilidad en el primer trimestre de 2025, mientras la Reserva Federal mantenía los tipos intactos ante el retorno de las presiones inflacionistas. Esto benefició a Europa, ya que el BCE siguió bajando sus tipos de interés de referencia, al tiempo que los gobiernos coordinaban sus medidas de estímulo. China también anunció un plan para estimular el consumo. Los mercados financieros se han visto afectados por la llegada al poder de Donald Trump y sus decisiones, a veces contradictorias. Tras haber batido récords, los índices bursátiles estadounidenses se consolidaron y obtuvieron resultados inferiores a los de Europa y China. Los tipos de interés a largo plazo registraron un buen comportamiento en la zona euro y se han mantenido estables en Estados Unidos.

Estados Unidos

Tras una fase casi de euforia a raíz de la victoria de Donald Trump, la economía estadounidense ha mantenido un ritmo positivo, si bien muestra claros indicios de debilidad, perturbada por una avalancha de decisiones a veces contradictorias de la nueva Administración. Marzo marcó un punto de inflexión con un descenso de la confianza de los hogares, la estabilización de los salarios y un fuerte aumento de las previsiones de inflación.

Los indicadores de crecimiento económico, como el ISM y el PMI de S&P, son dispares, aunque al final del trimestre asistimos a una ligera mejora de las perspectivas del sector manufacturero. Sin embargo, la guerra comercial iniciada por Washington está reduciendo la visibilidad para las empresas. La tasa de desempleo se mantuvo estable en el 4.1%, pero los aumentos salariales se han ralentizado, debido a la reducción de la plantilla de funcionarios federales y a la expulsión de millones de trabajadores ilegales, que mantiene la presión sobre el empleo poco cualificado.

Con este incierto telón de fondo, la Fed está dando largas al asunto y opta por mantener sin cambios los tipos de interés de referencia, para consternación del presidente Trump. Sin embargo, ante la volatilidad del mercado de bonos, ha ralentizado la velocidad de reducción de su balance. La publicación a finales de marzo de la tasa de inflación subyacente PCE, la referencia favorita de la Fed, superó las expectativas al situarse en el 2.8% anual, lo que debería animarla a no recortar los tipos en abril. Los mercados prevén entre dos y tres bajadas de tipos en el segundo semestre de 2025.

Europa

La economía europea se enfrenta a importantes retos, con un crecimiento débil y signos de desaceleración en varios países en el primer trimestre. La encuesta PMI de HCOB sigue apuntando a una contracción del sector manufacturero, pero las perspectivas mejoran claramente en Alemania, donde la industria está estancada desde la pandemia.

Los líderes europeos han mantenido su cohesión frente a las medidas proteccionistas estadounidenses y el riesgo de que retire su apoyo militar a Ucrania. En un hecho histórico, pocos días después de las elecciones legislativas alemanas (23 de febrero) se levantaron las trabas al gasto público y el futuro canciller Mertz (CDU), apoyado por una coalición con el SPD y los Verdes, lanzó un amplio plan de reactivación. De la inversión anunciada de 500,000 millones de euros en infraestructuras, 100,000 millones se destinarán a defensa, lo que supone un cambio radical. Este golpe presupuestario sin precedentes debería reforzar el crecimiento potencial de Alemania y, con él, el de la zona euro. En consecuencia, los economistas que revisaron a la baja sus previsiones en enero, volvieron a elevarlas en marzo.

La inflación en la zona euro parece haber retomado su tendencia a la baja y el índice de precios armonizado (de febrero, publicado en marzo) retrocedió al 2.3% (2.4% en enero). La inflación sigue impulsada por los servicios (3.7%), pero la contribución de la energía es baja actualmente. La inflación subyacente se sitúa ahora en el 2.4% y debería alcanzar el 2% a finales de año.

Constatando la tendencia a la baja de la inflación, y a pesar de los riesgos vinculados a la guerra comercial con Estados Unidos, el Banco Central Europeo (BCE) bajó sus tipos 50 puntos básicos durante el trimestre, el tipo de los depósitos del 3% al 2.5%, en un contexto de ralentización de la zona euro, advirtiendo al mismo tiempo que sigue vigilante sobre la evolución de la inflación.

El Banco de Inglaterra (BoE) redujo sus tipos de interés 25 puntos básicos, situándolos de nuevo en el 4.5%. La medida se produce tras las revisiones a la baja de las previsiones de crecimiento, ya que el Banco de Inglaterra rebajó sus proyecciones para 2025 del 1.5% al 0.75%.

Asia

La economía japonesa siguió mostrando signos alentadores, con un repunte del consumo y el dinamismo de las exportaciones (antes de los aranceles estadounidenses), y la estabilización de la inflación a pesar de la caída del índice. El Banco de Japón mantuvo sin cambios sus tipos de referencia, si bien la normalización no ha concluido.

Las perspectivas económicas siguen deteriorándose en China. Los recientes datos del PMI, inferiores a los de diciembre, indican un mayor debilitamiento de la economía. En respuesta, la Asamblea Popular Nacional esbozó planes para apoyar la economía mediante el gasto presupuestario, el apoyo monetario y la asignación de recursos adicionales a la demanda interna. Estas decisiones supusieron una revisión al alza de las perspectivas de crecimiento para 2025 y 2026. No obstante, el riesgo de desaceleración en el segundo trimestre, con un consumo débil y el impacto negativo de los aranceles estadounidenses, debería animar al PBoC a actuar.

En la India, la reducción del gasto público ha reducido ligeramente las perspectivas de crecimiento. La inflación fue inferior a la prevista en febrero, con un 3.6%, lo que supone una desaceleración respecto al 4.3% de enero. Este descenso se debe principalmente a una marcada caída de los precios de los alimentos. El Banco de la Reserva de la India podría recortar tipos antes de lo previsto, a partir de abril.

Renta variable

El MSCI ACWI cayó un 2% durante el trimestre (en USD). La rotación iniciada a finales de 2024 a favor de Europa (MSCI Europe +10%) y China (MSCI China +14.5%) continuó a principios de este año, mientras que los grandes valores estadounidenses se consolidaron (MSCI USA -5%).

Tras haber registrado un nuevo máximo de 6,144 puntos el 19 de febrero, el S&P 500 terminó el trimestre con un descenso del 4.6% y el Nasdaq 100, del 8%. Por otra parte, las acciones europeas registraron un comportamiento positivo; el Eurostoxx 50 subió un 7.2% y los resultados fueron claramente superiores en Alemania, donde el DAX 30 se anotó un 11.3%. El comportamiento de los mercados emergentes fue igualmente positivo (el MSCI EM subió un 2%), impulsado por China.

La rentabilidad inferior de las acciones estadounidenses puede deberse a varios factores: (1) el desplome de los valores de los "Siete Magníficos", que se dejaron cerca de un 16% durante el trimestre; (2) la divergencia de las trayectorias de la Fed y el BCE; y (3) los planes de estímulo en Alemania y China, que impulsaron las previsiones de beneficios a corto y medio plazo. Por último, la perspectiva de un alto el fuego en Ucrania podría reducir la prima de riesgo de los activos europeos y provocar un reposicionamiento de los mercados.

Además, la avalancha de anuncios a veces contradictorios de Donald Trump generó un aumento de la volatilidad, lo que impulsó el VIX hasta el 22% (+5 puntos). Los inversores han revisado sus previsiones ante los nuevos aranceles comerciales, lo que ha provocado una caída del sector automovilístico, sobre todo en Japón y Corea (el Nikkei bajó un 11%). Ante el riesgo de que Estados Unidos se retire de Ucrania, la inversión masiva en el rearme de Europa, en particular el plan ReArm Europe, dotado con 800,000 millones de euros, ha apuntalado el sector de la defensa.

Bonos

El primer trimestre se caracterizó por una gran volatilidad de los tipos de interés, con una subida de los tipos a largo plazo en la zona euro en marzo, mientras que los rendimientos estadounidenses bajaron en general. Asistimos a una convergencia de los tipos a largo plazo.

Los rendimientos de los bonos del Tesoro estadounidense a 2 y 10 años, que habían subido mucho a finales de 2024, se dejaron 36 puntos básicos cada uno, cerrando así en el 3.8% y el 4.2% respectivamente, ya que los inversores anticipan ahora un descenso del crecimiento.

En la Eurozona, la tendencia a la baja de los tipos de interés se ha revertido tras el anuncio de un aumento del déficit presupuestario alemán y la expectativa de un incremento de las emisiones de bonos. Los tipos del Bund a 10 años subieron más de 37 puntos básicos, pero el tramo corto se mantuvo anclado en el 2%, en previsión de los recortes de los tipos de interés de referencia del BCE. Por tanto, ha aumentado la inclinación de las curvas de la zona euro. Los diferenciales se mantienen estables, con una reducción de 11 pb del diferencial entre el OAT francés y el Bund alemán a 10 años.

La deuda corporativa se mostró inicialmente resistente en este periodo de volatilidad de los tipos de la deuda pública, si bien luego los diferenciales empezaron a ampliarse, sobre todo en el alto rendimiento estadounidense, con la caída de la renta variable y el aumento de la volatilidad.

Divisas, oro y petróleo

El mercado de divisas se ha mostrado volátil en relación con los movimientos de los tipos de interés. La perspectiva de divergencia entre la Fed y el BCE fortaleció inicialmente al dólar (EUR/USD 1.02) antes de que la fuerte subida de los tipos alemanes a largo plazo hiciera retroceder al euro hasta 1.08 frente al dólar.

La situación geopolítica y la caída del billete verde han favorecido al oro, que subió un 19% y alcanzó un máximo histórico de 3,124 dólares la onza.

Los precios del petróleo cayeron un 5% ante las expectativas de un aumento de la producción de la OPEP y Estados Unidos, así como del cese de los combates en Oriente Medio, para volver a subir a raíz de las nuevas sanciones contra Rusia.

T2 2025

El trimestre ha estado marcado por la guerra comercial de Estados Unidos. Esto ensombreció las perspectivas de crecimiento y acentuó el temor a que la inflación volviera a afianzarse. La Fed se mantuvo a la expectativa, mientras que el BCE siguió bajando sus tipos de referencia. La respuesta de China y las idas y venidas de Washington alimentaron la incertidumbre en los mercados financieros, marcada por una importante caída del dólar y de las acciones, así como una marcada presión sobre los tipos de interés a largo plazo. Las operaciones militares entre Israel/Estados Unidos e Irán provocaron una gran volatilidad en los precios del petróleo. A pesar de estas turbulencias, los mercados se han mostrado resilientes y, en general, han resistido bien.

Macroeconomía

Estados Unidos

El anuncio de Donald Trump, el 2 de abril, de aranceles prohibitivos para la mayoría de los socios comerciales de Estados Unidos ha supuesto un shock para empresas, consumidores e inversores. Tras la caída de los mercados y del dólar, la suspensión de esta decisión durante 90 días a partir del 9 de abril contribuyó a reducir las tensiones, pero las perspectivas de crecimiento de la economía estadounidense se revisaron a la baja. La publicación de la cifra de crecimiento, el PIB, del primer trimestre confirmó la ralentización al contraerse un 5%. La Reserva Federal prevé ahora un crecimiento del 1.4% para 2025. El FMI prevé un 1.8% y el Banco Mundial un 1.4%, lo que indica una gran incertidumbre entre los economistas. Se espera que el nuevo presupuesto, el "Big Beautiful Bill", que se está negociando con el Congreso, recorte los impuestos en 4.5 billones de dólares y aumente la deuda nacional en 3.3 billones.

El consumo de los hogares, apoyado por un mercado laboral aún resistente, se mantiene sólido, si bien muestra signos de debilidad. La creación neta de empleo se ralentiza, pero la tasa de paro se mantiene estable en el 4.2%. No obstante, los indicadores adelantados (ISM1 manufacturero estable en 48.5 e ISM no manufacturero a la baja en 49.5) confirman un deterioro de las perspectivas. Al final del trimestre, los datos cíclicos muestran una ralentización del consumo y de la producción industrial: las ventas al por menor en Estados Unidos cayeron un 0.9% en mayo con respecto a abril; la producción industrial prácticamente se estancó en mayo y la obra nueva ha bajado.

Las variables de inflación han lanzado señales contradictorias. El índice de precios al consumo subyacente de mayo se situó por debajo de las expectativas, en el 2.4% (frente al 2.5% previsto). Sin embargo, la inflación PCE, el indicador predilecto de la Fed, parece estar recuperándose. La inflación según el IPC subyacente aumentó un 2.7% anual, frente al 2.6% previsto por el consenso. En este contexto, la Reserva Federal decidió esperar y mantuvo intactos los tipos de interés de referencia, entre el 4.25% y el 4.50%, a pesar de las fuertes presiones de la Casa Blanca.

Europa

El crecimiento acelerado de Europa parece frustrado por la guerra comercial estadounidense, a pesar del aumento sin precedentes del gasto público en Alemania. El crecimiento del primer trimestre en la zona euro superó las expectativas, con un 1.5% anual. Las perspectivas de crecimiento para 2025 han sido revisadas al alza por el Banco Central Europeo (BCE) hasta el 0.9% para 2025. La fortaleza del mercado laboral, con una tasa de desempleo en un nivel históricamente bajo del 6.3%, debería estimular el consumo y apuntalar el crecimiento. Tras la caída de abril, las encuestas muestran una buena resistencia en la Eurozona. Las perspectivas del sector manufacturero se han estabilizado: la encuesta PMI2 del HCOB alcanzó los 50.2 puntos en junio, frente a los 49.4 en mayo, lo que indica una ligera mejora de los pedidos de fabricación. En Alemania, el índice ZEW registró en junio una fuerte subida, de 22.3 puntos con respecto a mayo, hasta situarse en 47.5, lo que indica una mejora de las expectativas, confirmada por el índice IFO de clima empresarial. Vemos debilidad en Francia, mientras que las perspectivas mejoran en Alemania. Este deterioro de las perspectivas francesas se vio confirmado por la encuesta trimestral del Banco de Francia.

El nuevo Gobierno alemán ha adoptado un proyecto de presupuesto para 2025 y ambiciosos planes presupuestarios a medio plazo. Las medidas se centran en desgravaciones fiscales para las empresas y ayudas al precio de la energía para hogares y negocios, con lo que se pretende impulsar la confianza y mejorar el potencial de crecimiento de la economía. Se prevé que el déficit presupuestario de 2025 alcanzará el 3.2% del PIB.

La ralentización de la inflación en la zona euro se vio confirmada por los datos de mayo, con un aumento de solo el 19%, al que contribuyó principalmente el sector servicios. El BCE ha revisado a la baja su previsión de inflación para 2026, hasta el 1.6% y el 2% en 2027, y ha recortado su tipo de los depósitos 50 puntos básicos durante el trimestre.

En el Reino Unido, el Banco de Inglaterra no movió ficha y mantuvo su tipo de interés de referencia en el 4.25%. No obstante, la ralentización de los precios inmobiliarios, unida a la debilidad de la confianza de los consumidores, podría llevar al regulador a recortar tipos en el tercer trimestre.

Asia

Japón registró una contracción del PIB en el primer trimestre y el movimiento durante el mes de mayo continuó siendo débil. El PIB cayó un 0.2% intertrimestral, penalizado por la debilidad de las exportaciones. Esta cifra aún no refleja plenamente el impacto de los aranceles comerciales estadounidenses. La inflación subyacente se aceleró en abril hasta el 3.5% interanual (frente al 3.2% de marzo). Sin embargo, la debilidad del crecimiento anuncia una recuperación muy gradual. El Banco de Japón (BoJ) mantuvo su tipo de interés de referencia en el 0.5% debido a la ralentización de la economía nipona y de la inflación. No se ha anunciado ninguna subida de tipos inminente, salvo quizá en enero de 2026 si se confirma la recuperación cíclica. Además, para limitar la volatilidad de los tipos a largo plazo, el BoJ ha decidido reducir más lentamente su balance. Por último, el Ministro de Hacienda anunció una reducción de la emisión de bonos con vencimientos muy largos para reducir la presión sobre el bono a 30 años.

¹ Un índice ISM superior al 50% indica expansión de la actividad manufacturera en comparación con el mes anterior. Un índice ISM inferior al 50% indica una contracción de la actividad manufacturera con respecto al mes anterior.

² El índice HCOB PMI® Germany Services Activity se basa en una única cuestión: comparar el nivel de actividad con el del mes anterior. Un índice inferior a 50,0 indica contracción, y cuanto más profundice por debajo de 50,0, más rápido será el ritmo de caída.

La guerra comercial con Estados Unidos ha afectado a las perspectivas económicas de China. El índice Caixin del sector manufacturero publicado a principios de junio se situó en 48,9, por debajo de las expectativas, lo que anticipó un mayor deterioro. El sector servicios solo ha crecido ligeramente. Sin embargo, el descenso de los precios inmobiliarios continúa, lo que ha llevado a las autoridades a seguir apoyando al mercado. La tasa oficial de desempleo se mantiene estable en el 5.1% y las ventas al por menor aumentan un 6.4%. Sin embargo, se ha confirmado la deflación. Los precios a la producción cayeron un 3.3% y los precios al consumo bajaron también un 0.1% en mayo. Como consecuencia, el banco central chino (PBoC) reanudó su relajación monetaria en un contexto de incertidumbre comercial, bajando su tipo a 1 año al 3% y a 5 años, al 3.5%. Además, el superávit comercial se mantuvo prácticamente invariable en 750,000 millones de yuanes en mayo y el país se enfrenta a dos objetivos: por un lado, mantener el desempleo urbano en torno al 5-5.5% y, por otro, crear 12 millones de puestos de trabajo de aquí a finales de año.

En la India, las perspectivas económicas siguen siendo sólidas y la encuesta compuesta del HSBC de junio superó las expectativas al situarse en 61 puntos, frente a los 59,4 previstos. Persiste la caída de la inflación, que alcanza su nivel más bajo en 6 años. En mayo se situó en el 2.8% interanual, frente al 3.2% de abril, debido a la desaceleración de los precios de los alimentos. La inflación subyacente también ha bajado. Este entorno permitió al Banco de la Reserva de la India (RBI) bajar su tipo de referencia 50 puntos básicos. La próxima reunión se celebrará a principios de agosto y en ella se anunciará una probable pausa en la política monetaria.

Mercados financieros

Renta variable

Los mercados de renta variable experimentaron una volatilidad extrema a principios de abril, tras el anuncio de los aranceles y su posterior aplazamiento, pero los resultados han sido positivos a lo largo del trimestre. En mayo, los mercados estadounidenses superaron a los europeos y asiáticos, impulsados por los buenos resultados de los "Siete Magníficos". Esta tendencia se confirmó en junio, cuando los índices estadounidenses registraron máximos históricos. El S&P 500 avanzó un 10.6% a finales de marzo y el Nasdaq 100 subió un 17.6%. En cambio, en la zona euro, el Eurostoxx 50 solo se anotó un 1%, impulsado por el DAX 30 (+7.9%), pero lastrado por el CAC 40 (-1.6%). En cuanto a las divisas, el euro volvió a apreciarse, un 9% este trimestre frente al dólar, lo que eleva su subida al 13% desde principios de año. Por lo tanto, en euros, el rendimiento del mercado estadounidense ha sido mediocre. Tras superar el 50% en abril, el índice de volatilidad, el VIX, volvió a situarse por debajo del 17% al final del periodo, lo que refleja el retorno de cierto optimismo. Los mercados emergentes subieron un 11.5% en dólares. En Asia, la tendencia es positiva en general, sobre todo en Corea y Taiwán. El mercado chino se mantuvo volátil y cerró el trimestre con una caída media del 2% en dólares, debido a la falta de estímulo fiscal.

Bonos

En el segundo trimestre se produjo una caída de los tipos a corto plazo y una fuerte volatilidad de los tipos largos estadounidenses. El movimiento de los tipos a corto plazo está vinculado a la expectativa de recortes de tipos por parte de la Fed y el BCE, una caída de la inflación y una perspectiva de ralentización del crecimiento mundial. La volatilidad de los bonos sigue siendo elevada, en particular en el caso de los bonos del Tesoro estadounidenses, alimentada por las incertidumbres (geo)políticas y presupuestarias. En Estados Unidos, el tipo a 10 años cerró el trimestre en torno al 4.23% a mediados de junio, tras subir al 4.6%. El tipo a 2 años cerró en el 3.72%. Los inversores esperan una relajación monetaria en la segunda mitad del año y una ralentización del crecimiento nominal estadounidense. En la zona euro, el bund alemán a 10 años alcanzó el 2.61% y el vencimiento a 2 años bajó 22 pb con respecto a finales de año (y 19 pb con respecto a finales de marzo) para situarse en el 1.86%, mientras que el BCE prosigue su ciclo de recortes, volviendo a situar sus tipo de los depósitos en el 2%. Los diferenciales de los tipos de la deuda pública en la zona euro se mantienen estables, salvo el de Italia, que se dejó 26 puntos básicos. Los bonos corporativos mantuvieron su comportamiento positivo, en particular los de alto rendimiento.

Divisas y materias primas

El euro se apreció un 9% frente al dólar y se erigió en potencial alternativa mundial a este último, al pasar de 1.08 a 1.18 durante el trimestre. La libra esterlina también sigue revalorizándose frente al billete verde y ha subido casi un 6.5% desde finales de marzo. El yuan se mantiene estable cerca de 7.2 frente al dólar y el yen ha subido ligeramente frente a esta última divisa.

El oro confirmó su condición de valor refugio, batiendo récords, puesto que la onza rozó los 3,450 dólares en abril y mayo, para luego estabilizarse en 3,303 dólares por onza a finales de junio. El oro ha subido un 25.9% desde principios de año.

El precio del barril de petróleo se ha mostrado muy volátil durante este periodo, debido a la guerra entre Israel/Estados Unidos e Irán. Con todo el precio del crudo ha bajado notablemente durante el trimestre debido al deterioro de las perspectivas económicas, pero sobre todo al aumento de las cuotas de producción de la OPEP, en particular de Arabia Saudí. El barril de Brent perdió 10 USD (un 9.5% menos) en el trimestre y cerró en torno a los 68 USD, tras haber rozado el 5 de mayo la barrera simbólica de los 60 USD, su nivel más bajo desde febrero de 2021, aunque a principios de junio se situaba en 80 USD.

Luxemburgo, 28 de octubre de 2025
El Consejo de administración

1 INTRODUCCIÓN

Amundi Funds (en lo sucesivo, el “Fondo”) está constituido a modo de “Société d’Investissement à Capital Variable” (en lo sucesivo, “SICAV”) en virtud de la legislación del Gran Ducado de Luxemburgo. El Fondo, inicialmente denominado Groupe Indosuez Funds FCP, un fondo de inversión sin personalidad jurídica (“Fonds Commun de Placement”) creado el 18 de julio de 1985, se transformó —de conformidad con el Artículo 110 (2) de la Ley de 30 de marzo de 1988 de Organismos de inversión colectiva— y adoptó la denominación de GIF SICAV II el 15 de marzo de 1999. La escritura de transformación y los Estatutos sociales (en lo sucesivo, los “Estatutos”) se publicaron en el Mémorial, Recueil des Sociétés et Associations el 28 de abril de 1999. La denominación del Fondo pasó a ser GIF SICAV el 1 de diciembre de 1999, Crédit Agricole Funds el 8 de diciembre de 2000 y CAAM Funds el 1 de julio de 2007. A 2 de marzo de 2010, de conformidad con la decisión adoptada por los accionistas en el marco de la Junta general extraordinaria celebrada el 23 de noviembre de 2009 y con la decisión del Consejo de administración adoptada el 23 de diciembre de 2009, CAAM Funds pasó a denominarse Amundi Funds.

Las enmiendas a los Estatutos se publicaron en el Mémorial, Recueil des Sociétés et Associations el 14 de enero de 2000, el 17 de enero de 2001 y el 13 de junio de 2007, respectivamente, para las tres primeras modificaciones de denominación y el 3 de abril de 2010 respecto de la última. Se llevó a cabo una última modificación a los Estatutos sociales el 14 de marzo de 2012 y se publicó en el Mémorial, Recueil des Sociétés et Associations - C, número 943 el 12 de abril del mismo año. El Fondo está sujeto a la Parte I de la Ley de 17 de diciembre de 2010 sobre Organismos de inversión colectiva (en lo sucesivo, la “Ley de 2010”).

Se han lanzado los siguientes Subfondos durante el ejercicio:

Amundi Funds China New Energy el 24 de septiembre de 2024

Amundi Funds India Equity Contra el 25 de febrero de 2025

Se han renombrado los siguientes Subfondos a 12 de septiembre de 2024:

Amundi Funds Euro Government Bond pasará a ser Amundi Funds Euro Government Bond Responsible

Amundi Funds Euro Corporate Short Term Impact Green Bond pasará a ser Amundi Funds Impact Euro Corporate Short Term Green Bond

Amundi Funds Absolute Return Credit pasará a ser Amundi Funds Multi Sector Credit

Se han renombrado los siguientes Subfondos a 28 de abril de 2025:

Amundi Funds European Equity ESG Improvers pasará a ser Amundi Funds Europe Equity Select

Amundi Funds Euroland Equity Small Cap pasará a ser Amundi Funds Euroland Equity Small Cap Select

Amundi Funds European Equity Green Technology pasará a ser Amundi Funds Europe Equity Green Technology

Amundi Funds European Equity Income ESG pasará a ser Amundi Funds Europe Equity Income Select

Amundi Funds Global Ecology ESG pasará a ser Amundi Funds Global Equity Responsible

Amundi Funds Global Equity ESG Improvers pasará a ser Amundi Funds Global Equity Select

Amundi Funds Global Equity Income ESG pasará a ser Amundi Funds Global Equity Income Select

Amundi Funds Japan Equity Engagement pasará a ser Amundi Funds Japan Equity Select

Amundi Funds Net Zero Ambition Global Equity pasará a ser Amundi Funds Global Equity Climate

Amundi Funds Net Zero Ambition Top European Players pasará a ser Amundi Funds Europe Equity Climate

Amundi Funds US Equity ESG Improvers pasará a ser Amundi Funds US Equity Select

Amundi Funds Emerging Markets Equity ESG Improvers pasará a ser Amundi Funds Emerging Markets Equity Select

Amundi Funds Net Zero Ambition Emerging Markets Equity pasará a ser Amundi Funds Emerging Markets Equity Climate

Amundi Funds New Silk Road pasará a ser Amundi Funds Emerging Markets Equity Growth Opportunities

Amundi Funds Euro Corporate ESG Bond pasará a ser Amundi Funds Euro Corporate Bond Select

Amundi Funds European Subordinated Bond ESG pasará a ser Amundi Funds Euro Subordinated Bond Responsible

Amundi Funds Global High Yield ESG Improvers Bond pasará a ser Amundi Funds Global High Yield Bond Responsible

Amundi Funds Global Bond pasará a ser Amundi Funds Global Government Bond

Amundi Funds Global Corporate ESG Improvers Bond pasará a ser Amundi Funds Global Corporate Bond Select

Amundi Funds Global Total Return Bond pasará a ser Amundi Funds Global Bond Flexible

Amundi Funds Impact Green Bonds pasará a ser Amundi Funds Impact Green Bond

Amundi Funds Net Zero Ambition Global Corporate Bond pasará a ser Amundi Funds Global Corporate Bond Climate

Amundi Funds Net Zero Ambition US Corporate Bond pasará a ser Amundi Funds US Corporate Bond Climate

Amundi Funds US Corporate Bond pasará a ser Amundi Funds US Corporate Bond Select

Amundi Funds Asia Income ESG Bond pasará a ser Amundi Funds Asia Bond Income Responsible

Amundi Funds Multi-Asset Sustainable Future pasará a ser Amundi Funds Multi-Asset Conservative Responsible

Amundi Funds Net Zero Ambition Multi-Asset pasará a ser Amundi Funds Multi-Asset Climate

Se ha renombrado el siguiente Subfondo a 16 de mayo de 2025:

Amundi Funds Target Coupon pasará a ser Amundi Funds Euro Bond Income y se ha separado de su fondo principal Amundi Revenus.

Se han liquidado los siguientes Subfondos durante el ejercicio:

Amundi Funds Global Macro Bonds & Currencies Low Vol el 22 de julio de 2024

Amundi Funds Climate Transition Global Equity el 6 de diciembre de 2024

Según la confirmación del depositario, los siguientes saldos están presentes al 30 de junio de 2025 para los Subfondos liquidados, incluidos aquellos liquidados en años anteriores:

- Amundi Funds Equity Korea : USD 11,814.03 y EUR -1,200.00

- Amundi Funds Equity Emerging Conservative : 20.349,81 USD

- Amundi Funds Global Macro Bonds & Currencies : 35.834,65 EUR

- Amundi Funds Climate Transition Global Equity : EUR 2,724.61 y USD 45.86

- Amundi Funds Global Macro Bonds & Currencies Low Vol : 6.300,83 EUR

El objetivo de Amundi Funds Protect 90 es ofrecer una participación en la evolución de los mercados financieros, proporcionando al mismo tiempo una protección parcial permanente de su inversión durante cualquier período de tres años. En concreto, el Subfondo está diseñado para garantizar que el precio de la acción no caiga por debajo del 90 % del valor liquidativo más alto alcanzado desde el último día hábil del mes de abril anterior, conforme al folleto.

Considerando la parte relevante acumulada de valores rusos y ucranianos en cartera y previa decisión del Consejo de Administración de la SICAV:

- Amundi Funds Russian Equity: los cálculos del VL se suspendieron el 28 de febrero de 2022 y el último VL oficial disponible es el del 25 de febrero de 2022.

Después de esa fecha, no se han aceptado más suscripciones ni reembolsos para este Subfondo.

Amundi Funds Emerging Europe Middle East and Africa: la clase segregada (ISIN LU2600584523) creada el 11 de abril de 2023, a la que se han transferido todos los activos y pasivos ilíquidos rusos, sigue existiendo.

La clase sigue en fase de liquidación y todavía no se aceptan suscripciones ni reembolsos. La Sociedad Gestora sigue renunciando a todas las comisiones relacionadas o haciéndose cargo de ellas. No se ha realizado a los accionistas ningún anticipo con cargo al producto de la liquidación.

En referencia al folleto con fecha de mayo de 2025, el Fondo aglutinaba 114 Subfondos activos y todos ellos invertían en un mercado o grupo de mercados específicos. Equity Japan Target, Euroland Equity, Europe Equity Select, Euroland Equity Small Cap Select, Europe ex UK Equity, European Equity, Europe Equity Green Technology, European Equity Value, Europe Equity Income Select, European Equity Small Cap, Global Equity Responsible, Global Equity, Global Equity Select, Global Equity Income Select, Japan Equity Select, Japan Equity Value, Montpensier Great European Models SRI, Montpensier M Climate Solutions, Global Equity Climate, Europe Equity Climate, Polen Capital Global Growth, US Equity Dividend Growth, US Equity Select, US Equity Fundamental Growth, US Equity Research, US Equity Research Value, US Pioneer Fund, China New Energy, Asia Equity Focus, China A Shares, China Equity, Emerging Europe Middle East and Africa, Emerging Markets Equity Select, Emerging Markets Equity Focus, Emerging Markets Equity Focus ex China, Emerging World Equity, Equity MENA, Latin America Equity, Emerging Markets Equity Climate, Emerging Markets Equity Growth Opportunities, Russian Equity, SBI FM India Equity, India Equity Contra, Euroland Equity Dynamic Multi Factors, Euroland.

Dentro de cada Subfondo, la SICAV puede crear y emitir clases de acciones con distintas características y criterios de admisibilidad aplicables a los inversores. Las clases de acciones se identifican primero por medio de una etiqueta básica (descrita en la tabla infra), seguida del sufijo oportuno.

Etiqueta de las clases de acciones (a partir del 1 de junio de 2019)	Inversores	Necesita la aprobación del Consejo	Inversión inicial mínima ¹	Comisión de suscripción máxima ²	Comisión de canje máxima ⁴	Comisión de reembolso máxima

Puede consultarse la lista completa de Subfondos y clases de acciones disponibles actualmente en el sitio web www.amundi.lu/amundi-funds.

¹ A los efectos de la inversión inicial mínima, se suman las inversiones de cada inversor (o grupo de entidades participadas al 100% por la misma sociedad matriz) en toda la SICAV (todas las clases de acciones y todos los Subfondos). Existen mínimos en USD o su importe equivalente en cualquier otra moneda.

² En el caso de Volatility Euro y Volatility World, puede incrementarse hasta en un 2.00% si el consejo determina que las nuevas inversiones pueden afectar negativamente a los intereses de los accionistas existentes.

³ En las clases de acciones I2 y A2, no es necesaria la aprobación del Consejo.

⁴ Para las clases de acciones A4, solo es posible el canje entre las acciones de clase A4 de otro Subfondo del OICVM.

2 PRINCIPALES PRINCIPIOS CONTABLES

■ PRESENTACIÓN DE LOS ESTADOS FINANCIEROS

Los estados financieros del Fondo se elaboraron de conformidad con las disposiciones legales y normativas en vigor en Luxemburgo en materia de organismos de inversión colectiva.

Los estados financieros se presentan en base al último Valor liquidativo (en lo sucesivo, "VL") calculado durante el periodo financiero. De conformidad con el folleto con fecha de junio de 2025, los VL se calcularon empleando los valores de mercado y los tipos de cambio más recientes disponibles en el momento del cálculo, a saber:

- Para todos los Subfondos: VL oficial con fecha de 30 de junio de 2025.

En el informe anual a 30 de junio de 2025, los Subfondos fusionados o liquidados durante dicho ejercicio financiero se muestran de forma independiente en el Estado de operaciones y variaciones en el patrimonio neto y se incluyen en las cifras consolidadas.

Los estados financieros del Fondo y de cada uno de sus Subfondos se han elaborado sobre la base del principio contable de empresa en funcionamiento.

- **Inversiones cruzadas entre Subfondos** - A 30 de junio de 2025, el valor de las inversiones de los Subfondos en otros de la SICAV asciende a 872,305,258.53 EUR, lo que supone el 1.07% del valor liquidativo total. Por lo tanto, el VL consolidado total al cierre del ejercicio menos las inversiones cruzadas ascendería a 80,999,072,304.47 EUR.
- **Cartera de títulos** Los valores mobiliarios cotizados en una Bolsa de valores o en un mercado regulado se valoran a su último precio conocido. Cuando tales precios no son representativos o en caso de que los valores no coticen, se valoran a su valor de realización probable dentro de unos límites razonables, determinado con precaución y de buena fe por el Consejo de administración.
- **Conversión de partidas expresadas en moneda extranjera** - Los estados financieros del Fondo se expresan en euros (EUR). Por tanto, el patrimonio neto de cada Subfondo expresado en divisas extranjeras se convierte y consolida en euros al tipo de cambio vigente al cierre del ejercicio financiero. Los costes de operaciones y adquisiciones respecto de los títulos en cartera expresados en divisas extranjeras se convierten a la divisa de contabilidad del Subfondo en cuestión al tipo de cambio en vigor en la fecha de la operación o de la adquisición, según proceda. Los valores de valoración de títulos en cartera y demás activos y pasivos expresados en divisas extranjeras se convierten a la divisa de contabilidad del Subfondo al tipo de cambio en vigor al cierre del ejercicio financiero. Las diferencias de cambio resultantes de tales conversiones se registran en el apartado "Reevaluación del patrimonio neto consolidado" en el Estado de operaciones y variaciones en el patrimonio neto.
- **Rendimiento de las inversiones** - Los dividendos se registran como rentabilidades en la fecha en la que se declaran y en la medida en que el Fondo pueda obtener la información adecuada. Los intereses se devengan diariamente.
- **Costes y gastos de distribución** - Todos los Subfondos corren con costes y gastos que les son específicamente atribuibles. Los costes y gastos no atribuibles a un Subfondo en concreto se distribuyen entre los Subfondos de manera equitativa, en proporción a sus respectivos patrimonios netos.
- **Pactos de recompra** - Los pactos de recompra (Repos) equivalen a los empréstitos garantizados por activos subyacentes presentados en la cartera de títulos del Subfondo que permanecen expuestos al riesgo de mercado. Los Pactos de recompra inversa (Reverse Repos) son similares a los préstamos garantizados. En este caso, el Subfondo no está sujeto al riesgo de depreciación del valor de los activos subyacentes. Los Pactos de recompra y recompra inversa se contabilizan como empréstitos o préstamos, respectivamente, por el importe de los activos líquidos recibidos y/o abonados.
- **Contratos de futuros** - Los contratos de futuros no vencidos se valoran a su último precio conocido en la fecha de valoración o de cierre y las plusvalías o minusvalías latentes derivadas de éstos se registran en el Estado del patrimonio neto. La ganancia/(pérdida) neta realizada y la variación neta en la ganancia/(pérdida) latente sobre contratos de futuros se registra en el Estado de operaciones y variaciones en el patrimonio neto.
- **Contratos de futuros-opciones de estilo** - Los contratos de futuros-opciones de estilo se valoran al precio disponible en una bolsa de valores oficial. Los depósitos al margen iniciales se abonan en efectivo en el momento de la formalización del contrato. El Subfondo abona o percibe periódicamente flujos de efectivo positivos o negativos posteriores, denominados márgenes de variación, que se basan en las fluctuaciones en el valor de mercado de los contratos de opciones de estilo futuros. Cuando el contrato está cerrado, el Subfondo en cuestión registra una ganancia o pérdida realizada equivalente a la diferencia entre el producto (o coste) de la transacción de cierre y la de apertura. Las revalorizaciones o pérdidas de valor netas latentes sobre contratos de futuros-opciones de estilo se contabilizan en el Estado del patrimonio neto. La ganancia/(pérdida) neta realizada y la variación neta en la ganancia/(pérdida) latente sobre contratos de futuros-opciones de estilo se registra en el Estado de operaciones y variaciones en el patrimonio neto.
- **Contratos de divisas a plazo** - Los contratos de divisas a plazo no vencidos se valoran a los tipos de cambio aplicables en la fecha de valoración o de cierre y las plusvalías o minusvalías latentes derivadas de éstos se registran en el Estado del patrimonio neto. La ganancia/(pérdida) neta realizada y la variación neta en la ganancia/(pérdida) latente sobre contratos de divisas a plazo se registra en el Estado de operaciones y variaciones en el patrimonio neto.
- **Valoración de las opciones y opciones sobre swaps** - Las opciones cotizadas oficialmente en una bolsa de valores o en cualquier otro mercado regulado, que opere de forma regular, reconocido y abierto al público, se valoran en base a sus precios de cierre el día de valoración o, en ausencia de éstos, en base a los últimos precios conocidos disponibles. Las opciones OTC, incluidas las opciones sobre swaps, se valoran a precios de mercado en función de los elementos establecidos en sus contratos. Si los últimos precios conocidos para las opciones cotizadas o el precio calculado para las opciones OTC no son representativos, la valoración se basará en el valor potencial de realización estimado por el Consejo de administración de la Sociedad gestora con prudencia y buena fe. La ganancia/(pérdida) neta realizada y la variación neta en la ganancia/(pérdida) latente sobre opciones OTC opciones sobre swaps se registra en el Estado de operaciones y variaciones en el patrimonio neto.
- **Swaps** - El Fondo se encuentra autorizado para suscribir swaps de varianza, riesgo de impago, rentabilidad total, inflación, activos, tipos de interés o divisas. Estos swaps se registran a su valor de mercado en función de los elementos de valoración establecidos en los contratos. La ganancia latente neta se incluye en el asiento "Plusvalía latente neta sobre swaps y CFD" en el Estado del patrimonio neto y la pérdida latente neta se incluye en el asiento "Minusvalía latente neta sobre swaps y CFD" en el Estado del patrimonio neto. La ganancia/(pérdida) neta realizada y la variación neta en la ganancia/(pérdida) latente sobre swaps se registra en el Estado de operaciones y variaciones en el patrimonio neto.
- **Instrumentos del mercado monetario** - El mercado monetario es un instrumento financiero con una elevada liquidez y vencimientos muy cortos. Los participantes lo utilizan como vía para realizar operaciones de préstamo y empréstito a corto plazo, con vencimientos que suelen oscilar entre un día y justo por debajo de un año. Respecto de los instrumentos del mercado monetario, la acreencia (diferencia entre el coste y el valor amortizado) se registra en el asiento "Variación neta de la plusvalía/(minusvalía) latente sobre inversiones y deudas derivadas de pactos de recompra inversa" en el Estado de operaciones y variaciones en el patrimonio neto respecto de los títulos ostentados al cierre del ejercicio. Si los instrumentos se han vendido o reembolsado, este resultado se considera una "Ganancia/(pérdida) neta materializada sobre títulos vendidos" en el Estado de operaciones y variaciones en el patrimonio neto.
- **Títulos Por Anunciar (PA)** - Las posiciones PA se refieren a la práctica de negociación habitual en el mercado de títulos con respaldo hipotecario por la que un título se extrae de un conjunto de hipotecas (p. ej., Ginnie Mae, Fannie Mae o Freddie Mac) a cambio de un precio fijo en una fecha futura. En el momento de la compra se desconoce el título exacto, aunque sí se especifican sus principales características. Aunque el precio se ha determinado en el momento de la compra, el valor del principal no se ha finalizado. Las posiciones PA se detallan en la Cartera de valores. La compra de este tipo de títulos no se ha liquidado y, por tanto, el importe correspondiente a la cantidad pagadera en la liquidación de la operación se desglosa en "Cuentas a pagar de intermediarios" en el Estado del patrimonio

neto. La ganancia/(pérdida) neta materializada sobre los títulos PA y las variaciones en la plusvalía/(minusvalía) latente se describen en el Estado de operaciones y variaciones en el patrimonio neto, en las partidas de "Ganancia/(pérdida) neta realizada sobre títulos vendidos" y "Variación neta de la plusvalía/(minusvalía) latente sobre inversiones y deudas derivadas de pactos de recompra inversa", respectivamente. Riesgo de MBS / ABS Los valores respaldados por hipotecas y por activos (MBS y ABS) suelen conllevar un riesgo de amortización anticipada y de extensión, y pueden acarrear riesgos de liquidez, de crédito y de tipos de interés superiores a la media.

- Ganancia/(pérdida) neta materializada sobre títulos vendidos** - La "Ganancia/(pérdida) neta materializada sobre títulos vendidos" del Estado de operaciones y variaciones en el patrimonio neto refleja la diferencia entre los costes e ingresos por los títulos vendidos, incluida la repercusión del mercado así como de las divisas.
- Costes de operación** - Los costes de operación incluyen las comisiones de corretaje y las comisiones cobradas por el depositario respecto de las operaciones con títulos e instrumentos derivados. Las comisiones de operación se excluyen del coste de los títulos y derivados adquiridos o vendidos. Todas estas comisiones se registran en el capítulo "Comisiones de corretaje y transacción" del Estado de operaciones y variaciones en el patrimonio neto. Véase la nota 23, donde se describen las comisiones de recepción y transmisión de solicitudes.
- Contratos por diferencias (CFD)** - En cada fecha de valoración, la diferencia entre el precio de apertura y el precio de mercado actual del título subyacente o el índice para el CFD se registra como valor de mercado (ganancia o pérdida latente) del contrato; cuando el Subfondo formaliza una transacción de cierre, la diferencia entre el importe teórico de apertura y de cierre del título subyacente se registra como ganancia o pérdida realizada en las partidas de beneficio/(pérdida) neta materializado/(a) sobre swaps y CFD en el Estado de operaciones y variaciones en el patrimonio neto. Los depósitos de margen iniciales pueden realizarse en efectivo al formalizar el CFD. El Subfondo realiza o percibe periódicamente pagos, denominados márgenes de variación, que se basan en las fluctuaciones en el valor de mercado de los contratos CFD.
- Préstamo de títulos** - En las operaciones de préstamo y empréstito de valores, un prestamista transfiere valores o instrumentos a un prestatario, con sujeción al compromiso de que el prestatario devolverá valores o instrumentos equivalentes en una fecha futura o cuando lo solicite el prestamista. El prestatario debe proporcionar una salvaguarda, en forma de garantía, vigente durante todo el periodo del préstamo y que sea al menos equivalente a la valoración global de los títulos prestados, más el valor de cualquier recorte de valoración que se considere apropiado en vista de la calidad de la garantía.

3 TIPOS DE CAMBIO UTILIZADOS A 30 DE JUNIO DE 2025

Los tipos de cambio utilizados respecto de las cifras consolidadas son:

1 JPY = 0.005898 EUR
1 USD = 0.851898 EUR

4 COMISIONES DE GESTIÓN, ADMINISTRACIÓN Y DISTRIBUCIÓN

Estructura de las comisiones - La Comisión de administración es una comisión expresada en porcentaje del VL de los Subfondos y clases de acciones, incluidos todos los gastos administrativos del Fondo.

Esta comisión incluye los honorarios del Agente administrativo, domiciliario y de transmisiones y del Agente de registro por la prestación de sus servicios al Fondo, la remuneración del Depositario por la prestación de sus servicios al Fondo así como otros gastos administrativos contraídos en la gestión del Fondo incluidos, sin que la numeración sea exhaustiva:

- los honorarios de los auditores y asesores legales del Fondo (incluidos los costes asociados al cumplimiento de los requisitos legales y normativos);
- los costes de traducción, impresión y distribución a los inversores de los informes anuales y semestrales, del folleto del Fondo y del Documentos de Datos Fundamentales para el inversor de cada clase de acciones y sus suplementos, así como las notificaciones dirigidas a la atención de los Inversores;
- cualesquiera costes relacionados con la información de los accionistas incluidos aquellos relativos a la publicación de los precios de las acciones en la prensa financiera y la elaboración de material informativo para los suscriptores y distribuidores;
- cualesquiera comisiones y gastos relativos al registro y mantenimiento del registro del Fondo en cualquier agencia gubernamental o bolsa de valores y para cumplir con cualesquiera requisitos normativos y el reembolso de dichas comisiones y gastos contraídos por cualquier representante legal;
- los honorarios de cualquier representante/corresponsal local, cuyos servicios se requieran de conformidad con la legislación aplicable;
- los costes relativos a medidas extraordinarias, en concreto, a cualquier peritaje o juicio encaminado a proteger los intereses de los accionistas;
- los costes relacionados con la traducción, distribución y publicación de cualquier notificación a los accionistas.

La Comisión de administración se abona a periodo vencido a Amundi Luxembourg S.A., con una frecuencia definida por la Sociedad de Gestión, y se calcula cada día para cada Subfondo y cada clase de acciones.

Las Comisiones de gestión, expresadas en porcentajes del VL, se abonan a periodo vencido a Amundi Luxembourg S.A., con una frecuencia definida por la Sociedad de Gestión, y se calculan a diario respecto de cada Subfondo en base al VL diario de cada clase de acciones.

Amundi Luxembourg S.A. es responsable de abonar las comisiones a los Gestores de inversiones.

Además de las comisiones de gestión abonadas por el Fondo a Amundi Luxembourg S.A., los Subfondos que se encuentran parcialmente invertidos en otros OIC también están sujetos a las comisiones de gestión cobradas a dichos Subfondos, salvo las inversiones cruzadas entre subfondos.

Las Comisiones de gestión, expresadas en porcentajes del VL, se abonan a periodo vencido a Amundi Luxembourg S.A., con una frecuencia definida por la Sociedad de Gestión, y se calculan a diario respecto de cada Subfondo en base al VL diario de cada clase de acciones. quien se hace cargo de cursar su pago a los Distribuidores. Además, la Sociedad gestora puede, a su juicio, remunerar a los Distribuidores con cargo a sus propias comisiones.

Las Comisiones de gestión, administración y distribución, expresadas en porcentaje del VL, aplicables a 30 de junio de 2025 son los máximos previstos en el sitio web www.amundi.lu/Amundi-Funds, salvo para los Subfondos Amundi Funds Cash EUR y Amundi Funds Cash USD, en cuyo caso se aplican los siguientes porcentajes anuales:

Las comisiones de gestión y las comisiones de administración aplicadas han cambiado durante el ejercicio para los Subfondos mencionados.

Tras la suspensión del cálculo del valor liquidativo de Amundi Funds Russian Equity, Amundi Luxembourg S.A. ha decidido renunciar a sus comisiones de gestión. Esta misma renuncia se aplica a la clase de acciones segregada (ISIN LU2600584523) de Amundi Funds Emerging Europe Middle East and Africa, a la que se han transferido todos los activos y pasivos rusos ilíquidos.

De conformidad con el artículo 46 (3) de la Ley de 17 de diciembre de 2010, los porcentajes de la Comisión de gestión para los fondos subyacentes de Amundi Funds Protect 90, cuyo garante forma parte del Grupo Crédit Agricole, son los siguientes:

5 COMISIONES DE RENTABILIDAD

La comisión de rentabilidad se calcula de manera independiente para cada Clase de Acciones. Se devengará diariamente, y se deducirá y abonará anualmente respecto de cada Clase de Acciones. La comisión

de rentabilidad se calcula comparando el VL de cada Clase de acciones del Subfondo pertinente y el activo de referencia.

El mecanismo aplicado se detalla en el web www.amundi.lu/Amundi-Funds

Los Subfondos y las Clases de Acciones sujetos a comisión de rentabilidad figuran en la web www.amundi.lu/Amundi-Funds.

Respecto de todas las clases autorizadas en Hong Kong, tenga en cuenta que no se aplican comisiones de rentabilidad.

Las comisiones por rendimiento están incluidas en el epígrafe «Comisiones por rendimiento» del Estado de operaciones y cambios en el patrimonio neto, y también se encuentran disponibles en la sección (no auditada) Normativa sobre comisiones por rendimiento.

6 FISCALIDAD DEL FONDO

"Taxe d'abonnement"

En Luxemburgo, el Fondo estará, asimismo, sujeto a un impuesto del 0.05% anual respecto de los Subfondos de renta variable, fija, Multi Asset y Protected, a excepción de las inversiones de los mismos en otros organismos de inversión colectiva constituidos en Luxemburgo y ya sujetos a la *taxe d'abonnement* de conformidad con la ley y del 0.01% anual respecto de los subfondos Cash, las Acciones de Clase H, I, J, M, O, OR, SE, X y Z de todos los Subfondos (Taxe d'Abonnement), resultando dicho impuesto pagadero trimestralmente en base al VL del Fondo al cierre del trimestre natural correspondiente.

El porcentaje del impuesto "Taxe d'Abonnement" del 0.01% anual está disponible para aquellos Accionistas admitidos en las Acciones de Clase H, I, J, M, O, OR, SE, X y Z en virtud de las disposiciones legales, normativas y fiscales de Luxemburgo de las que tenga conocimiento el Fondo en el momento de la admisión de un Inversor en dicha clase de acciones.

Sin embargo, no podrá otorgarse garantía alguna respecto del pasado o futuro y dicha valoración está sujeta a las interpretaciones de cualesquiera autoridades competentes existentes en su momento acerca del estatus de un Inversor apto de las Acciones de Clase H, I, J, M, O, OR, SE, X y Z. Cualquier reclasificación que realice una autoridad en lo que respecta al estatus de un Inversor podría someter a la totalidad de la clase a un porcentaje del impuesto "Taxe d'Abonnement" del 0.05% anual.

Fiscalidad en India

Cada subfondo puede estar sujeto al impuesto sobre sociedades en determinados países en los que invierte. Las ganancias de capital obtenidas por la venta de valores indios mantenidos por un subfondo están sujetas al impuesto sobre las ganancias de capital en India, el cual se revela en el apartado "Estado de operaciones y cambios en el patrimonio neto", bajo el epígrafe "Impuestos". El impuesto se calcula sobre las ganancias netas realizadas, y las pérdidas netas realizadas que excedan las ganancias al final del ejercicio fiscal en India pueden, bajo ciertas condiciones, trasladarse durante hasta 8 ejercicios fiscales consecutivos para compensar ganancias futuras. En este sentido, las pérdidas de capital a corto plazo (es decir, cuando las acciones se mantienen por menos de 12 meses) pueden compensarse con ganancias de capital tanto a corto como a largo plazo, mientras que las pérdidas de capital a largo plazo solo pueden compensarse con ganancias de capital a largo plazo. La legislación fiscal india impone un impuesto del ^{**20 %**} (más recargos adicionales y tasa de salud y educación) sobre las ganancias netas realizadas por la venta de valores indios dentro del año siguiente a la fecha de compra, y un impuesto del ^{**12,5 %**} (más recargos) si los valores indios se venden transcurridos más de 12 meses desde su adquisición. Este impuesto del 12,5 % sobre las ganancias de capital a largo plazo obtenidas con valores indios entró en vigor el 1 de abril de 2018.

La decisión de registrar provisiones fiscales por impuestos indios se adopta, subfondo por subfondo, conforme a un procedimiento detallado.

Cuando corresponda, se registran provisiones diarias en las cuentas del subfondo, y se presentan en el epígrafe "Otros pasivos" del Estado de situación del patrimonio neto.

¹ 15 % hasta el 15 de agosto de 2024

² 10 % hasta el 15 de agosto de 2024

7 OTROS INGRESOS

Los importes correspondientes a otros ingresos en el Estado de operaciones y variaciones en el patrimonio neto incluyen fundamentalmente ingresos derivados del préstamo de títulos y la recuperación de provisiones sobre comisiones de rentabilidad.

8 OTROS GASTOS

Los saldos correspondientes a otros gastos en el Estado de operaciones y variaciones en el patrimonio neto incluyen fundamentalmente otros impuestos y costes de préstamo de títulos.

Los importes de otros gastos en los Estados de operaciones y variaciones en el patrimonio neto de los Subfondos Amundi Funds Emerging Markets Equity Select, Amundi Funds Emerging Markets Equity Focus, Amundi Funds Emerging World Equity, Amundi Funds SBI FM India Equity, Amundi funds India Equity Contra, Amundi Funds Emerging Markets Blended Bond y Amundi Funds Multi-Asset Climate incluyen principalmente el impuesto indio.

9 PACTOS DE RECOMPRA INVERSA

Durante el ejercicio financiero cerrado a 30 de junio de 2025, algunos Subfondos suscribieron pactos de recompra inversa, cuyo importe se indica a continuación en la divisa de los Subfondos, en virtud de los cuales prestaron un determinado importe a instituciones financieras, garantizado por un aval. A 30 de junio de 2025, los préstamos concedidos de conformidad con dichos contratos se encontraban garantizados por los siguientes activos subyacentes. Los países de la contraparte se enumeran según la norma ISO 3166-1. El importe de bonos aptos para la inversión se especifica como bonos con una calificación mínima de BBB- (S&P), Baa3 (Moody's). Si desea saber más sobre la información colateral, consulte la nota 17.

12 POSICIONES ABIERTAS EN CONTRATOS DE DIVISAS A PLAZO

A 30 de junio de 2025, los siguientes Subfondos tenían posiciones abiertas en contratos de divisas a plazo y la correspondiente apreciación/depreciación total no realizada se indica a continuación:

■ Equity Japan Target

	Divisa	Importe en JPY
Divisa a cobrar	EUR	10,415,186,390.00
	JPY	197,973,990.00
	USD	236,606,881.00
	Total:	10,849,767,261.00
Divisa pagadera	EUR	198,142,837.00
	JPY	10,348,558,020.00
	USD	3,004,764.00
	Total:	10,549,705,621.00
Total no realizado:		300,061,640.00

La fecha de vencimiento definitiva para todos los contratos abiertos será el 10 de julio de 2025.

La contraparte de los contratos a plazo es SOCIETE GENERALE.

■ Euroland Equity

	Divisa	Importe en EUR
Divisa a cobrar	CHF	7,728,975.25
	EUR	184,517,378.49
	USD	21,411,578.71
	Total:	213,657,932.45
Divisa pagadera	CHF	315,011.90
	EUR	29,676,439.31
	GBP	180,604,530.07
	USD	948,500.94
	Total:	211,544,482.22
Total no realizado:		2,113,450.23

La fecha máxima de vencimiento definitiva para todos los contratos abiertos será el 4 de septiembre de 2025.

Las contrapartes de los contratos a plazo son CREDIT AGRICOLE y SOCIETE GENERALE.

■ Europe Equity Select

	Divisa	Importe en EUR
Divisa a cobrar	CZK	155,694.37
	EUR	4,186.39
	Total:	159,880.76
Divisa pagadera	CZK	4,204.06
	EUR	155,269.94
	Total:	159,474.00
Total no realizado:		406.76

La fecha de vencimiento definitiva para todos los contratos abiertos será el 10 de julio de 2025.

La contraparte de los contratos a plazo es SOCIETE GENERALE.

■ Europe ex UK Equity

	Divisa	Importe en EUR
Divisa a cobrar	CHF	43,842,411.67
	Total:	43,842,411.67
Divisa pagadera	EUR	43,881,519.81
	Total:	43,881,519.81
Total no realizado:		-39,108.14

La fecha de vencimiento definitiva para todos los contratos abiertos será el 4 de septiembre de 2025.

Las contrapartes de los contratos a plazo son BARCLAYS y CREDIT AGRICOLE.
