What is this product?

Type

The Sub-fund is part of DIP fund. The Fund is an open-ended mutual investment fund. This Fund is authorised and supervised in Luxembourg by the CSSF. The Depositary is Quintet Private Bank (Europe) S.A.

Term

The investment horizon is medium term and should be at least 3 years.

Objectives

The Investment Objective of the Sub-Fund is to achieve mid-term capital appreciation. The Sub-Fund seeks to accomplish this objective through investing primarily in fixed income mainly issued in OECD countries.

The Sub-Fund is managed following a geographical as well as sectorial diversification. The Sub-Fund seeks to accomplish this objective by investing mainly into a diversified and actively managed portfolio of global fixed-income instruments (up to 100% of the Sub-Fund total net assets), including but not limited to debt securities issued by governments, corporations and other national or supranational bodies, money market instruments, deposits and currencies. Direct investment in equity securities will not be allowed.

The Sub-Fund is invested in bonds including but not limited to convertible bonds, fixed-rate or floating securities, zero-coupon bonds and treasury bonds. The Sub-Fund is invested also in:

- High yield bond with maximum exposure of: 75% of the Sub-Fund total net assets (with the minimum rating of B-/B3)
- Non-rated bonds with maximum exposure of: 20% of the Sub-Fund total net assets.
- Contingent Convertible bonds ("CoCo bonds") with maximum exposure of: 20% of the Sub-Fund total net assets.
- Emerging Markets ("EM") securities with maximum exposure of: 20% of the Sub-Fund total net assets. There will be no investments in China and Russia.

Intended retail investor

The investment strategy corresponds to investors with a high-risk tolerance and high investment risk profile and looking for an investment term of three to five years.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund is not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Other risks: Credit risk, Liquidity risk, Counterparty risk, Operational risk, Derivatives risk, Currency risk, Event Risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance-Scenarios:

	Average return each year	11.1 %	6.9 %
Worst case scenario	You could lose some or all of your investment		

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between September 2021 and September 2022 (If you exit after 1 year), September 2019 and September 2022 (If you exit after 3 years).

Moderate scenario: This type of scenario occurred for an investment between June 2022 and June 2023 (If you exit after 1 year), March 2016 and March 2019 (If you exit after 3 years).

Favourable scenario: This type of scenario occurred for an investment between September 2023 and September 2024 (If you exit after 1 year), September 2022 and September 2025 (If you exit after 3 years).

What happens if Adepa Asset Management S.A. is unable to pay out?

The investments of the fund are held separately from the assets of Adepa Asset Management S.A. as fund management company and from the corresponding custodian bank. Thus, you will not lose your investment in the event of a possible insolvency of Adepa Asset Management S.A.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- Investment: 10,000 EUR

Costs over Time	If you exit after 1 year	If you exit after 3 years
Total costs	158 EUR	488 EUR
Annual cost impact (*)	1.6 %	1.6 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.5 % before costs and 1.0 % after costs.

Composition of Costs

The table below shows the impact if you exit after 1 year.
