Edmond de Rothschild Asset Management (France) is authorised to operate in France under the no. GP 04000015 and is regulated by the Autorité des Marchés Financiers (AMF).

Key Information Document production date: 12/12/2024

What is this Product?

Type

The Product is a sub-fund of a French SICAV mutual fund, which is a UCITS governed by European Directive 2009/65/EC.

Term

The term of the Product is 99 years. This Product has no maturity date. The Management Company reserves the right to dissolve the Product unilaterally. The Product may also be dissolved in the event of a merger, a total redemption of shares, or if the Product's net assets fall below the regulatory minimum amount. The assets and liabilities of the various sub-funds are segregated. As such, any shares you hold in this sub-fund may not be exchanged for shares in another sub-fund in the EdR SICAV mutual fund.

Objectives

The aim of the Product, over its recommended investment period, is to provide partial exposure to the performance of eurozone equity markets, while hedging the equity risk at all times, completely or in part, on futures and options markets, in line with the manager's expectations. The aforementioned companies are selected on the basis of an analysis that combines financial profitability and compliance with non-financial criteria. The Product is managed actively, which means that the Manager makes investment decisions in line with the Product's investment policy with a view to achieving the Product's objectives. This active management includes taking decisions related to asset selection and overall market exposure. The Product's "equities" investment universe is comparable to that of the MSCI EMU NR index.

Benchmark index: 56% MSCI EMU (NR), net dividends reinvested + 44% Capitalised €STR

Investment policy: The Product uses an active selection strategy, by investing, directly or through UCIs, a minimum of 75% of its net assets in eurozone equities eligible for the equity savings plan (PEA), irrespective of stock market capitalisation (including small and mid-caps), while managing exposure to equity risk for between 0% and 90% of its net assets by implementing hedging or exposure strategies via trading on futures and options markets. The ESG investment universe includes listed companies from developed eurozone countries with market capitalisation of over €1 billion. The management company may select securities from outside this ESG universe. However, it will ensure that the chosen ESG universe offers a relevant comparison for the Product's ESG rating.

The manager will systematically include environmental, social and governance (ESG) factors in its financial analysis when selecting securities for its portfolio.

Other than for the efficient and marginal management of the portfolio, derivatives will only be used on a temporary and exceptional basis.

At least 90% of portfolio companies will have either an internal ESG rating, or an ESG rating assigned by an external rating agency. This may be either a proprietary ESG rating, or a rating assigned by an external non-financial data agency. At the end of this process, the Compartment will have a higher ESG rating than that of its investment universe.

Environmental, social and governance (ESG) criteria are one of the components of the management; their weighting in the final decision is not defined in advance.

Shares will be selected in accordance with the following strategy. Various filters will be applied to the investment universe in order to define those securities that will be considered eligible and therefore subject to further analyses. The first category of filters, based on non-financial analysis, will reduce the investment universe according to the individual ESG ratings of the securities. A second category of filters allows securities to be selected on the basis of financial ratios, focusing in particular on style bias (discounted stocks, quality stocks, growth stocks, etc.). The Product will not be exposed to equities from emerging countries.

The aim of using derivative instruments is to reduce exposure to European equity markets. The Product may invest up to 25% of its assets in debt securities and money market instruments denominated in euros. The Product will target issues from European public or private issuers with a maximum residual maturity of 397 days, rated Investment Grade (i.e. with a rating of BBB- or above according to Standard & Poor's, or any other equivalent rating assigned by another independent agency, or an internal rating deemed equivalent and assigned by the Investment Manager). The Product may be exposed to an ancillary currency risk by holding UCIs and investment funds. Subject to a limit of 100% of its assets, the Product may use, for hedging and/or exposure purposes, derivative instruments traded over the counter or financial contracts traded on regulated markets in the eurozone. The Product may invest in callable and puttable bonds up to a limit of 25% of its assets. In addition, the Product may invest up to a maximum of 10% of its net assets in UCI units or shares or other eligible investment funds. The Product may enter into reverse repurchase agreements involving transferable securities or financial market instruments, up to a limit of 25% of its assets. The Product may invest up to 50% of its net assets in over-the-counter forward foreign exchange contracts in the form of total return swaps (TRS) on equities, equity indices and/or equity baskets. The expected proportion of assets under management is 15%.

French tax law can have an impact on the investor's personal tax situation (eligible for the PEA).

Allocation of income: Accumulation

Allocation of net realised gains: Accumulation

Intended retail investors

CR EUR shares: All subscribers, provided they are willing to accept the risk of capital loss. These shares may be marketed to retail investors (non-professional or professional) in the following cases only:

- For subscriptions further to independent advice provided by a financial advisor or regulated financial entity.
- For subscriptions further to non-independent advice, with a specific agreement that does not authorise the advisor to receive or retain trailer fees.
- For subscriptions made by a regulated financial entity on behalf of its clients as part of a management mandate.
- For subscriptions as part of the provision of investment services (i.e. MiFID II-compliant services), paid for exclusively by the subscriber under a specific remuneration agreement waiving the management company's right to charge trailer fees.

In addition to the management fees charged by the Management Company, financial advisors or regulated financial entities may charge the investor management or advisory fees. The Management Company is not party to these agreements. The shares are not registered for marketing in all countries. As such, they are not available to retail investors in all jurisdictions. This Product may not be purchased by or benefit, either directly or indirectly, natural or legal persons residing or domiciled in the United States, citizens of the United States, or United States Persons.

Practical information

Custodian: Edmond de Rothschild (France)

You can request the redemption of your shares on any day of the week, except on public holidays and on the days on which French markets are closed (see the official Euronext Paris S.A. calendar), or European derivatives markets are closed (see the official calendar of the EUREX) for orders received by the clearing house before 12:30 pm on the day before the net-asset valuation day.

The Product's prospectus, its latest annual report, and any subsequent interim reports (in French, and in English, if required) will be provided free of charge upon written request to Edmond de Rothschild Asset Management (France) 47, rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France; telephone: +33 140 172 525; email: contact-am-fr@edr.com.

Share prices and, where necessary, information on other share classes, as well as information on the Product's net asset value, performance scenarios and past performance, can be found on www.edmond-de-rothschild.com.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator assumes that you will hold the Product until the maturity date of the recommended holding period (3 years). The actual risk can vary significantly if you opt to exit before the maturity date, and you may get back less.

The summary risk indicator is provided as a guide to the level of risk of this Product compared to other products. It shows how likely it is that this Product will incur losses due to market fluctuations, or our inability to pay you.

We have assigned this Product a risk rating of 4 out of 7, which means that it is a medium-risk product. In other words, the potential losses on the Product's future performance are in the medium range and, if market conditions were to deteriorate, our ability to pay you may be affected.

Moreover, you will also be exposed to the following risks (not shown in the summary risk indicator):

Liquidity risk: risk linked to the low level of liquidity on the underlying markets, which makes them sensitive to significant buy/sell trends.

Derivative risk: The use of derivatives may result in a more significant decline in the Product's net asset value than that in the markets where investments are made.

Counterparty risk: This is the risk that a market participant defaults, preventing them from honouring their commitments in respect of your portfolio.

The occurrence of any of these risks may negatively impact the net asset value. As this Product does not include any protection against future market performance, you could end up losing some or all of your investment.

Pay particular attention to currency risk. If an investment Product is denominated in a currency other than the official currency of the State in which the Product is marketed, the final return will depend on the rate of exchange between the two currencies. This risk is not taken into account in the indicator shown above.

Performance Scenarios

The figures shown include all the costs in connection with the Product itself, but may not include all of the costs that you may be required to pay your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Future market trends are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the Product's and/or the relevant the benchmark index's worst, average, and best performance over the last 10 years.

Markets could trend very differently in the future.

The stress scenario shows what you might get back in extreme market conditions.

With an investment of EUR 10,000

Recommended holding period: 3 years		If you exit after 1 year	If you exit after 3 years (i.e. the recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you could get back after costs are deducted	EUR 2,940	EUR 4,500
	Average annual return	-70.6%	-23.4%
Unfavourable	What you could get back after costs are deducted	EUR 8,250	EUR 7,870
	Average annual return	-17.5%	-7.7%
Moderate	What you could get back after costs are deducted	EUR 10,000	EUR 10,060
	Average annual return	0.0%	0.2%
Favourable	What you could get back after costs are deducted	EUR 11,770	EUR 11,950
	Average annual return	17.7%	6.1%

This table shows different scenarios illustrating the amounts that you could get back over the recommended holding period of 3 years, assuming you invest EUR 10,000.

Unfavourable scenario: This scenario occurred for an investment made between October 2017 and October 2020.

Moderate scenario: This scenario occurred for an investment made between February 2015 and February 2018.

Favourable scenario: This scenario occurred for an investment made between March 2020 and March 2023.

What happens if Edmond de Rothschild Asset Management (France) is unable to pay out?

The Product is a separate co-ownership comprising financial instruments and deposits held by the portfolio management company. Should the latter become insolvent, the Product's assets that are held by the custodian will not be affected. Should the custodian become insolvent, the risk that the Product incurs financial losses will be mitigated due to the legal requirement for the custodian's asset to be held separately from those of the Product.

Investments in the Product are not themselves hedged or guaranteed by a national compensation mechanism. The resale of the Product's shares, and the Product's capital and income, are not guaranteed by the Product manufacturer.

How much will this investment cost me?

The person who is selling you this Product, or advising you about this Product, may charge you additional costs. If so, this person will provide you with information about these costs and how they will affect your investment over time.

Costs over time

The tables show the amounts that are deducted from your investment to cover different types of costs. These amounts depend on how much you invest, and on how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed that:

- In the first year, you would get back the amount you invested (0% annual return). For the other holding periods, the Product is expected to perform as shown in the moderate scenario.
- The investment is EUR 10,000.

With an investment of EUR 10,000	If you exit after 1 year	If you exit after 3 years (i.e. the recommended holding period)
Total costs	EUR 441	EUR 732
Annual impact of costs *	4.4%	2.5% each year

(*) This illustrates the extent to which the costs will reduce your return each year over the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is projected to be 2.64% before costs, and 0.19% after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. If this is the case, they will inform you of the amount.

Composition of costs

With an investment of EUR 10,000 and an annual cost if you exit after 1 year.

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay upon subscribing to the Product.	EUR 300
Exit costs	We do not charge an exit fee for this Product, but the person selling you the Product may do so.	EUR 0
Ongoing costs (deducted each year)		
Management fees and other administrative or operating costs	1.00% of the value of your investment per year. This percentage is determined based on the actual costs incurred in the previous year.	EUR 100
Transaction costs	0.41% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the Product's underlying investments. The actual amount will vary depending on how much we buy and sell.	EUR 41
Incidental costs deducted under specific conditions		
Performance fees (and carried interest)	0.00% , Description: 15% per year of the outperformance compared to the benchmark index. If a share in the Product outperforms its benchmark index – and even if the share's performance is negative – a performance fee may be deducted during the reference period. The estimated aggregated costs shown above includes the average for the past 5 years.	EUR 0

The table above shows the annual impact of the different types of costs on the return you could obtain on your investment at the end of the recommended investment period.

The costs shown here do not include any additional costs that may be charged by your distributor or advisor, or any costs in connection with a package that the Product may be part of. If you invest in this Product as part of a life insurance or capitalisation contract, this document does not take into account the contract fees.

This table also explains what the different cost categories mean.

How long should I hold the Product, and can I take money out early?

Recommended holding period: 3 years

This Product is designed for short-term investments. You should be prepared to hold your investment in the Product for at least 3 years. However, you may request the redemption of your investment at any time during this period – there will be no penalty for doing so. You may also hold your investment for longer than the recommended holding period.

You can request the redemption of your shares on any day of the week, except on public holidays and on the days on which French stock markets are closed (see the official Euronext Paris S.A. calendar), or European derivatives markets are closed (see the official calendar of the EUREX) for orders received by the clearing house before 12:30 pm on each day on which the net asset value is calculated.

A redemption cap mechanism (known as "gating") may be implemented by the Management Company. The way this works is described in the SICAV's Prospectus and Articles of Association.

How can I complain?

If you wish to make a complaint regarding the Product, the Product manufacturer or the person distributing or advising you about the Product, with a view to having a right recognised or a damage remedied, please send us a written request, describing the problem and the details of the complaint, by post or e-mail, to:

Edmond de Rothschild Asset Management (France), 47, rue du Faubourg Saint-Honoré, 75401 Paris Cedex 08, France.

E-mail: contact-am-fr@edr.com
