## 1 - GENERAL

Amundi Index Solutions (the "SICAV") is organised as a société anonyme and qualifying as a "Société d'Investissement à Capital Variable" ("SICAV") under the laws of the Grand Duchy of Luxembourg and created on 9 June 2016. The articles of incorporation (the "Articles") were initially published in the Memorial Recueil des Sociétés et Associations, on 17 June, 2016.

The SICAV is submitted to Part I of the law of 17 December 2010 as amended, relating to Undertakings for Collective Investment.

The SICAV is registered under number B 206.810 at the Commercial Register of Luxembourg, where its Articles are available for inspection and a copy thereof may be obtained upon request.

The Capital of the SICAV is represented by the sum of the net assets of all of the sub-funds.

The annual report dated as at 30 September 2024 is based on the last official NAV dated as at 30 September 2024.

As at 30 September 2024, the following sub-funds were active:

**1 - GENERAL (continued)**Mergers within Amundi Index Solutions umbrella

During the year-ended 30 September 2024:

- The sub-fund AMUNDI MSCI EMU ESG UNIVERSAL SELECT merged into AMUNDI MSCI EMU ESG CTB NET ZERO AMBITION with effective date on 3 May 2024.

Mergers "in":

During the year-ended 30 September 2024:

- The sub-fund LYXOR MDAX ESG UCITS ETF, from LYXOR merged into the sub-fund AMUNDI MDAX ESG of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR CORE DAX (DR) UCITS ETF, from LYXOR merged into the sub-fund AMUNDI DAX of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR DIVDAX (DR) UCITS ETF, from LYXOR merged into the sub-fund AMUNDI DIVDAX of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR NYSE ARCA GOLD BUGS (DR) UCITS ETF, from LYXOR merged into the sub-fund AMUNDI NYSE ARCA GOLD BUGS of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR F.A.Z 100 Index (DR) UCITS ETF, from LYXOR merged into the sub-fund AMUNDI F.A.Z 100 of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR SDAX (DR) UCITS ETF, from LYXOR merged into the sub-fund AMUNDI SDAX of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR DOW JONES SWITZERLAND TITANS 30 (DR) UCITS ETF, from LYXOR merged into the sub-fund AMUNDI DJ SWITZERLAND TITANS 30 of AMUNDI INDEX SOLUTIONS on 8 December 2023.

- The sub-fund LYXOR NET ZERO 2050 S&P EUROPE CLMATE PAB (DR) UCITS ETF, from MULTI UNITS LUXEMBOURG merged into the sub-fund AMUNDI MSCI EUROPE PAB NET ZERO AMBITION of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR IBOXX \$ LIQUID EMERGING MARKETS SOVEREIGNS UCITS ETF from LYXOR INDEX FUND merged into the sub-fund AMUNDI GLOBAL EMERGING BOND MARKIT IBOXX of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR CORE STOXX EUROPE 600 (DR), from LYXOR INDEX FUND, merged into the sub-fund AMUNDI STOXX EUROPE 600 of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR FTSE EPRA/NAREIT GLOBAL DEVELOPED UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI FTSE EPRA NAREIT GLOBAL DEVELOPED of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR ESG USD CORPORATE BOND (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI USD CORPORATE BOND PAB NET ZERO AMBITION of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR BOFAML € SHORT TERM HIGH YIELD BOND UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI EUR SHORT TERM HIGH YIELD CORPORATE BOND ESG of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR MSCI EMU SMALL CAP (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI MSCI EMU SMALL CAP ESG CTB NET ZERO AMBITION of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR STOXX EUROPE SELECT DIVIDEND 30 UCITS ETF from LYXOR INDEX FUND, merged into the sub-fund AMUNDI STOXX EUROPE SELECT DIVIDEND 30 of AMUNDI INDEX SOLUTIONS on 9 February 2024.

- The sub-fund LYXOR ESG USD HIGH YIELD (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI USD HIGH YIELD CORPORATE BOND ESG of AMUNDI INDEX SOLUTIONS on 16 February 2024.

- The sub-fund LYXOR MSCI EMU ESG BROAD CTB (DR) - UCIT ETF, from LYXOR INDEX FUND, merged into the sub-fund of AMUNDI MSCI EMU ESG CTB NET ZERO AMBITION of AMUNDI INDEX SOLUTIONS on 16 February 2024.

- The sub-fund LYXOR EUROMTS 1-3Y ITALY BTP GOVERNMENT BOND (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI ITALY BTP GOVERNMENT BOND 1-3Y UCITS ETF of AMUNDI INDEX SOLUTIONS on 16 February 2024.

- The sub-fund LYXOR EUROMTS 10Y ITALY BTP GOVERNMENT BOND (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI ITALY BTP GOVERNMENT BOND 10Y of AMUNDI INDEX SOLUTIONS on 16 February 2024.

- The sub-fund LYXOR EURO GOVERNMENT BOND 25+Y (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI EURO GOVERNMENT BOND 25+Y of AMUNDI INDEX SOLUTIONS on 16 February 2024.

- The sub-fund LYXOR ESG EURO HIGH YIELD (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI EUR HIGH YIELD CORPORATE BOND ESG of AMUNDI INDEX SOLUTIONS on 16 February 2024.

- The sub-fund LYXOR PEA MONDE (MSCI WORLD), from French FCP, merged into the sub-fund AMUNDI MSCI WORLD of AMUNDI INDEX SOLUTIONS on 15 March 2024.

- The sub-fund LYXOR EURO STOXX SELECT DIVIDEND 30 (DR) UCITS ETF, from LYXOR, merged into the sub-fund AMUNDI EURO STOXX SELECT DIVIDEND 30 of AMUNDI INDEX SOLUTIONS on 22 March 2024.

- The sub-fund LYXOR MSCI EMU GROWTH (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI MSCI EUROPE GROWTH of AMUNDI INDEX SOLUTIONS on 25 April 2024.

**1 - GENERAL (continued)**

- The sub-fund LYXOR MSCI SMART CITIES ESG FILTERED (DR) UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI MSCI SMART CITIES ESG SCREENED (previously named AMUNDI SMART CITY) of AMUNDI INDEX SOLUTIONS on 25 April 2024.
- The sub-fund AMUNDI EURO GOVERNMENT BOND II, from MULTI UNITS LUXEMBOURG, merged into the sub-fund AMUNDI EURO GOVERNMENT BOND of AMUNDI INDEX SOLUTIONS on 25 April 2024.
- The sub-fund LYXOR GLOBAL HIGH YIELD SUSTAINABLE EXPOSURE UCITS ETF, from LYXOR INDEX FUND, merged into the sub-fund AMUNDI GLOBAL HIGH YIELD CORPORATE BOND ESG of AMUNDI INDEX SOLUTIONS on 11 June 2024.

Liquidations:

During the year-ended 30 September 2024:

- The sub-fund AMUNDI MSCI WORLD ESG LEADERS SELECT liquidated on 22 November 2023. The remaining cash balances were 37.25 AUD, 2.70 CAD, 0.52CHF, 6.58 DKK, 18,019.07 EUR, 28.12 GBP, 56.33 HKD, 7.37 ILS, -216.00 JPY, 21.57 NOK, -1.67 NZD, 0.37 SGD, 14.03 SEK and 53,491.08 USD as at 30 September 2024.
- The sub-funds AMUNDI MSCI EUROPE ESG UNIVERSAL SELECT, AMUNDI MSCI USA ESG UNIVERSAL SELECT and AMUNDI MSCI EUROPE CLIMATE PARIS ALIGNED PAB liquidated on 7 March 2024. The remaining cash balances were respectively 3.17 CHF, 7.39 DKK, 9,974.95 EUR, 2,736.97 GBP, 12.12 NOK, 88.34 SEK and 52.96 USD for AMUNDI MSCI EUROPE ESG UNIVERSAL SELECT, 65.86 CAD and 18,253.72 USD for AMUNDI MSCI USA ESG UNIVERSAL SELECT and 7.62 CHF, 5.08 DKK, 22,140.95 EUR, 6,681.08 GBP, 0.33 NOK, 129.12 SEK and 94.04 USD for AMUNDI MSCI EUROPE CLIMATE PARIS ALIGNED PAB as at 30 September 2024.
- The sub-funds AMUNDI MSCI EUROPE EX UK and AMUNDI EUROPE EQUITY MULTI SMART ALLOCATION SCIENTIFIC BETA liquidated on 27 April 2023. The remaining cash balances for AMUNDI MSCI EUROPE EX UK were 1.79 CHF, 0.43 SEK, 1.68 NOK, 4,936.81 DKK and 1,285.76 EUR and for AMUNDI EUROPE EQUITY MULTI SMART ALLOCATION SCIENTIFIC BETA were 12,547.14 USD and 1,373.24 EUR as at 30 September 2024.

Launches:

\* Based on first NAV published:

- The following sub-funds have been launched on 7 December 2023:

AMUNDI DJ SWITZERLAND TITANS 30  
 AMUNDI DAX  
 AMUNDI DIVDAX  
 AMUNDI SDAX  
 AMUNDI F.A.Z. 100  
 AMUNDI NYSE ARCA GOLD BUGS  
 AMUNDI MDAX ESG

- The sub-fund AMUNDI GLOBAL CORPORATE IG has been launched on 12 December 2023.

- The following sub-funds have been launched on 9 February 2024:

AMUNDI STOXX EUROPE 600  
 AMUNDI EUR SHORT TERM HIGH YIELD CORPORATE BOND ESG  
 AMUNDI FTSE EPRA NAREIT GLOBAL DEVELOPED  
 AMUNDI MSCI EMU SMALL CAP ESG CTB NET ZERO AMBITION  
 AMUNDI STOXX EUROPE SELECT DIVIDEND 30  
 AMUNDI USD CORPORATE BOND PAB NET ZERO AMBITION

- The following sub-funds have been launched on 16 February 2024:

AMUNDI MSCI EMU ESG CTB NET ZERO AMBITION  
 AMUNDI EURO GOVERNMENT BOND 25+Y  
 AMUNDI ITALY BTP GOVERNMENT BOND 1-3Y  
 AMUNDI ITALY BTP GOVERNMENT BOND 10Y  
 AMUNDI USD HIGH YIELD CORPORATE BOND ESG  
 AMUNDI EUR HIGH YIELD CORPORATE BOND ESG

- The sub-fund AMUNDI EURO STOXX SELECT DIVIDEND30 has been launched on 22 March 2024.

- The following sub-funds have been launched on 25 April 2024:

AMUNDI FIXED MATURITY 2027 ITALY BTP GOVERNMENT BOND  
 AMUNDI FIXED MATURITY 2027 GERMAN BUND GOVERNMENT BOND  
 AMUNDI FIXED MATURITY 2028 EURO GOVERNMENT BOND BROAD  
 AMUNDI FIXED MATURITY 2028 EURO GOVERNMENT BOND YIELD +

- The sub-fund AMUNDI GLOBAL CORPORATE SRI 1-5Y HIGHEST RATED has been launched on 21 May 2024.

- The sub-fund AMUNDI GLOBAL HIGH YIELD CORPORATE BOND ESG has been launched on 11 June 2024.

Renaming of sub-funds:

- \*\* The sub-fund AMUNDI SMART CITY has been renamed AMUNDI MSCI SMART CITIES ESG SCREENED on 19 April 2024.
- The sub-fund AMUNDI MSCI EUROPE CLIMATE TRANSITION CTB has been renamed AMUNDI MSCI EUROPE PAB NET ZERO AMBITION on 2 February 2024.
- The sub-fund AMUNDI INDEX GLOBAL AGG 500M has been renamed AMUNDI GLOBAL AGGREGATE BOND on 17 January 2024.
- The sub-fund AMUNDI INDEX J.P. MORGAN EMU GOVIES IG has been renamed AMUNDI EURO GOVERNMENT BOND on 19 April 2024.
- The sub-fund AMUNDI PRIME EURO CORPORATES has been renamed AMUNDI EUR CORPORATE BOND on 4 October 2023.
- The sub-fund AMUNDI PRIME GLOBAL GOVIES has been renamed AMUNDI PRIME GLOBAL GOVERNMENT BOND on 13 March 2024.
- The sub-fund AMUNDI PRIME US CORPORATES has been renamed AMUNDI USD CORPORATE BOND on 30 September 2024.
- The sub-fund AMUNDI PRIME US TREASURY BOND 0-1 Y has been renamed AMUNDI US TREASURY BOND 0-1Y on 4 October 2023.

## 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### ■ PRESENTATION OF FINANCIAL STATEMENTS

The SICAV's financial statements are prepared and presented in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements for investment funds. The financial statement are prepared under going concern basis of accounting, except for the sub-funds AMUNDI MSCI BRAZIL, AMUNDI SMART FACTORY, AMUNDI INDEX US GOV INFLATION-LINKED BOND and AMUNDI INDEX EQUITY GLOBAL MULTI SMART ALLOCATION SCIENTIFIC BETA.

### ■ VALUATION POLICY

#### ■ Securities Portfolio

Transferable securities and money market instruments that are quoted or dealt in any stock exchange or traded in any other regulated market are generally valued at the last available market price on the relevant business day. All Russian securities have been fair valued at zero (please refer to Note 14).

Non-listed securities, or listed securities for which the price determined according to the above methods is not representative of fair market value are valued in good faith at a prudent estimate of their sale price.

#### ■ Valuation of forward foreign exchange contracts

Outstanding forward foreign exchange contracts are valued at the closing date by reference to the rate of exchange applicable to the outstanding life of the contract. The unrealised appreciation or depreciation on forward foreign exchange contracts is disclosed in the accounts.

#### ■ Valuation of future contracts

During the financial year, the SICAV concluded a series of future contracts. At the end of the year, the outstanding contracts are valued at their net liquidation value based on the closing price of the exchange on which the futures contracts are traded. The change in unrealised net appreciation or depreciation appears in the Statement of Operations and Changes in Net Assets.

#### ■ Valuation of swaps

Total return swaps are contracts where one party transfers to another party the total performance of a reference asset, including all interest, fee income, market gains or losses, and credit losses. Total return swaps entered into by the sub-funds are in the form of unfunded swaps.

An unfunded swap is a swap where no upfront payment is made by the total return receiver at inception. Swaps are valued at the net present value of their cash flows. The interest receivable on swaps are included in the item "Receivable on swaps" of the Statement of Net Assets and the interest payable are included in the item "Payable on purchase on swaps" of the Statement of Net Assets.

### ■ DIVIDEND AND INTEREST INCOME

Dividend income is recorded as of the ex-dividend date and net of withholding tax; the figures include also the amount of net dividends received from the counterparties for the securities lent. Interest income is recorded on an accrual basis.

### ■ CONVERSION OF ITEMS EXPRESSED IN FOREIGN CURRENCIES

Bank deposits, other net assets and the value of portfolio securities denominated in currencies other than the base currency of the sub-fund are converted to the reference currency of the sub-fund at the exchange rate prevailing at the closing date. Income and expenses in a currency other than the base currency of the sub-fund are converted to the base currency of the sub-fund at the exchange rate prevailing at the date of recognition.

The combined financial statements are expressed in Euros (EUR), and are calculated by summing the net assets of each sub-fund. The exchange rates used are the following:

1 EUR = 4.09925	AED	1 EUR = 1.60875	AUD	1 EUR = 6.0778	BRL
1 EUR = 1.50775	CAD	1 EUR = 0.94145	CHF	1 EUR = 1,002.1013	CLP
1 EUR = 7.81085	CNH	1 EUR = 7.83035	CNY	1 EUR = 4,658.4322	COP
1 EUR = 25.216	CZK	1 EUR = 7.45465	DKK	1 EUR = 53.90525	EGP
1 EUR = 0.83205	GBP	1 EUR = 3.0468	GEL	1 EUR = 8.6689	HKD
1 EUR = 397.15	HUF	1 EUR = 16,896.99775	IDR	1 EUR = 4.15135	ILS
1 EUR = 93.5264	INR	1 EUR = 1,936.27	ITL	1 EUR = 159.6398	JPY
1 EUR = 1,459.45865	KRW	1 EUR = 0.3407	KWD	1 EUR = 21.8768	MXN
1 EUR = 4.602	MYR	1 EUR = 11.755	NOK	1 EUR = 1.7541	NZD
1 EUR = 4.15115	PEN	1 EUR = 62.54065	PHP	1 EUR = 4.2815	PLN
1 EUR = 4.0635	QAR	1 EUR = 4.9758	RON	1 EUR = 103.9323	RUB
1 EUR = 4.18675	SAR	1 EUR = 11.313	SEK	1 EUR = 1.43075	SGD
1 EUR = 35.9117	THB	1 EUR = 38.15465	TRY	1 EUR = 35.3191	TWD
1 EUR = 1.11605	USD	1 EUR = 19.2323	ZAR		

**2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)****■ NET REALISED GAIN/LOSS ON SALES OF INVESTMENTS**

The net profit or loss realised on sales of investment securities is calculated on the basis of the average cost of the securities sold. For forwards foreign exchange contracts, the realised profit or loss is calculated by each forward contract and for financial futures it is first in first out. Equities swaps transactions are computed by taking in consideration both the floating leg which refers to the interest rate of the contracts and the equity leg which refers to the performance of the underlying equity of the contract.

**■ TRANSACTION FEES**

Transaction fees include fees resulting from the coding of each new trade (buy or sell) by the dedicated service within CACEIS Bank, Luxembourg Branch, forex fees, stock exchange fees, handling charges linked to transactions on portfolio securities and forward foreign exchange contracts. The transaction fees are included in the item "Transactions fees".

**■ SECURITIES LENDING AND BORROWING**

In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. Through such transactions, a sub-fund may lend securities or instruments with any counterparty that is subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

A sub-fund may lend portfolio securities either directly or through one of the following:

- a standardised lending system organised by a recognised clearing institution;
- a lending system organised by a financial institution that specializes in this type of transaction.

The borrower must provide a guarantee (in the form of collateral) that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

The figures of the security lending income disclosed in Statement of Operations and Changes in Net Assets are net, representing the gross income after the deduction of the 35% for direct and indirect costs. The gross income and the costs are recorded on a daily accrual basis. The entities involved in the execution of the EPM transactions are Amundi Intermediation, Paris and CACEIS Bank, Luxembourg Branch, which are related parties.

**■ DIVIDEND POLICY**

Distributing shares will distribute all or part of the net investment income received by the relevant sub-fund, and may also distribute capital gains (both realised and unrealised) and capital. When a dividend is declared, the NAV of the relevant class is reduced by the amount of the dividend. Dividends may be declared yearly, quarterly or monthly, as indicated by a share class suffix (QD, MD, YD). Such shares set a target dividend amount, which is communicated in advance. This is an amount that the sub-fund aims to pay, but does not guarantee. Target dividends may be stated as a specific currency amount or as a percentage of NAV. In order to meet a targeted dividend amount, a sub-fund may end up paying out more money than it actually earned in dividends, meaning that the Shareholders are getting some of their capital back as a dividend.

For more information on dividend calendar and objectives, go to [amundi.com](http://amundi.com) and/or [amundi.etf.com](http://amundi.etf.com).

Distribution shares with no share class suffix (QD, MD, YD) declare an annual dividend in November.

Additional dividends may be declared as determined by the Board.

Dividends on distributing shares are either automatically reinvested or paid according to the bank account details Amundi has on file for the Shareholders' account. For each share class, dividends are paid in the currency of the share class. The Shareholders can request to have their dividends converted to a different currency. If the currency is one that the sub-fund accepts, there is typically no currency conversion charge. In other cases the Shareholders will be typically charged applicable currency conversion costs.

Unclaimed dividend payments will be returned to the sub-fund after five years. Dividends are paid only on shares owned as at the record date.

No sub-fund will make a dividend payment if the assets of the SICAV are below the minimum capital requirement, or if paying the dividend would cause that situation to occur.

**2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)****■ ABBREVIATIONS (continued)**

In the Securities Portfolio, XX XX/XXA refers to Perpetual Bonds.

**3 - MANAGEMENT AND ADMINISTRATIVE FEES**

Amundi Luxembourg S.A is entitled to receive from the SICAV the Management Fees calculated for each sub-fund. These fees are calculated and accrued on each Dealing Day and are payable quarterly in arrears. Amundi Luxembourg S.A is responsible for the payment of fees to Investment managers, service providers and Distributors.

The administrative fee is a fee expressed as a percentage of the NAV of the sub-funds and classes of shares, payable quarterly in arrears to Amundi Luxembourg S.A. and calculated each day.

As at 30 September 2024, the management fees and applicable administrative fees per annum are as follows:

**4 - TAXE D'ABONNEMENT**

The SICAV is normally subject to a subscription tax ("taxe d'abonnement"). However all sub-funds meet the exemption criteria to be exempt of the tax d'abonnement pursuant to article 175 (e) of the 2010 law as (i) they have listed at least one share class on regulated stock exchange and (ii) their exclusive object is to replicate the performance of one or more indices.

The SICAV is not currently subject to any other Luxembourg taxes on income or capital gains.

While the above tax information is accurate to the best of the Board's knowledge, it is possible that a tax authority may impose new taxes (including retroactive taxes).

**5 - FORWARD FOREIGN EXCHANGE CONTRACTS**

As at 30 September 2024, the following forward foreign contracts were outstanding:

## 12 - SWING PRICING

On business days when it believes that trading in a sub-fund's shares will require significant purchases or sales of portfolio investments, the Board may adjust the sub-fund's NAV to more closely reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations. In general, the NAV will be adjusted upward when there is strong demand to buy sub-fund shares and downward when there is strong demand to redeem sub-fund shares. For any given business day the adjustment will normally not be larger than 2% of the NAV, but the Board can raise this limit when necessary to protect the interests of shareholders.

As at 30 September 2024, the swing pricing adjustment has been applied for some sub-funds. The Net Asset Value per share after application of swinging pricing is detailed in the Financial details.

The swing factor is the amount by which the NAV is swung when the swing pricing process is triggered after net subscriptions or redemptions exceed the swing threshold. The factors to consider when setting the swinging factor include net broker commissions paid by the sub-fund and fiscal charges (e.g. stamp duty and sales tax).

**13 - SUSTAINABLE FINANCE DISCLOSURE REGULATION (“SFDR”)**

Information on environmental and/or social characteristics and/or sustainable investments are available under the (unaudited) Sustainable Finance Disclosure Regulation section and its relevant annexes where applicable.

**14 - VALUATION OF RUSSIAN SECURITIES**

As a consequence of the Russian invasion on Ukraine on 24th February 2022 and its impact on the Russian markets and securities, the Board of Directors and the Management Company decided from the beginning of March to daily review and fair value Russian equities (including ADR/GDR) and bonds. Fair valuation takes into consideration the valuation and potential deletion of the securities from the index by the providers of the benchmark indices as well as the sanctions regimes in force and their impact on the tradability and settlement process of the concerned securities.

As at the time of writing, the fair valuation process in respect of these securities remains in place.

The Board of Directors and the Management Company are undertaking actions to resolve the issues in the interest of the fund and its shareholders, having regard to the unprecedented nature of the situation and continue to monitor the evolution of the situation.

Here below is the list of Russian securities which have been fair valued at 0 as of 30 September 2024, in the following sub-funds:

AMUNDI INDEX MSCI EMERGING MARKETS  
AMUNDI GLOBAL AGGREGATE BOND

**15 - AUDITOR'S REMUNERATION**

The remuneration for all work carried out by the statutory audit firm in respect of the financial year ended 30 September 2024 is as follows:

	EUR
Statutory audit of financial statements	375,557
Separate report in relation to CSSF Circular 21/790	10,868
Singapore report	3,041
Merger reports	40,056
Master / Feeder ad-hoc report	21,757
Agreed Upon Procedures reports	12,018
<b>Total</b>	<b>463,296</b>

All amounts presented are rounded to the nearest Euro and exclusive VAT.

**16 - SUBSEQUENT EVENTS**

The sub-fund AMUNDI MSCI EMERGING ASIA II, from MULTI UNITS LUXEMBOURG merged into the sub-fund AMUNDI MSCI EM ASIA ESG CTB NET ZERO AMBITION of AMUNDI INDEX SOLUTIONS on 19 November 2024.

The sub-fund AMUNDI PRIME GLOBAL of AMUNDI INDEX SOLUTIONS merged into AMUNDI PRIME GLOBAL UCITS ETF of AMUNDI ETF SICAV on 22 November 2024.

The following sub-funds will liquidate on 4 February 2025:

- AMUNDI MSCI BRAZIL
- AMUNDI SMART FACTORY
- AMUNDI INDEX US GOV INFLATION-LINKED BOND
- AMUNDI INDEX EQUITY GLOBAL MULTI SMART ALLOCATION SCIENTIFIC BETA

**17 - RECONCILIATION OF THE PUBLISHED NET ASSET VALUE**

AMUNDI INDEX MSCI EMERGING MARKETS and AMUNDI MSCI EMERGING EX CHINA ESG LEADERS SELECT can be invested in Indian equities. In accordance with LUX GAAP, the Fund must recognize a provision for potential capital gains tax payable taking into consideration the unrealized positions that were not reflected in the official NAV at period/year end. These adjustments have been integrated in the Statement of Operations and Changes in Net Assets under "others expenses" and in the Statement of Net Assets under "others liabilities" and have led to the below differences between the NAV per share as recorded in the financial statements and the published NAV.

AMUNDI INDEX MSCI EMERGING MARKETS	
Net asset Value in accordance with LUX GAAP	6,104,497,770.61 USD
Add: adjustments	70,450,130.36 USD
Published net asset value	6,174,947,900.97 USD

AMUNDI MSCI EMERGING EX CHINA ESG LEADERS SELECT	
Net asset Value in accordance with LUX GAAP	596,222,366.77 USD
Add: adjustments	6,135,884.25 USD
Published net asset value	602,358,251.02 USD

The current booking process is that any capital gains tax calculable as a result of portfolio transactions relating to redemptions will be dealt with the anti dilution mechanism and may result in an additional spread, which may reduce the net proceeds received for the redemption. Any capital gains tax incurred as a result of portfolio transactions not related to redemptions (e.g. rebalancing) will be borne by the respective Fund.

## **Audit report**

To the Shareholders of  
**Amundi Index Solutions**

---

## **Report on the audit of the financial statements**

---

### **Our opinion**

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Amundi Index Solutions (the “Fund”) and of each of its sub-funds as at 30 September 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund’s financial statements comprise:

- the statement of net assets as at 30 September 2024;
  - the securities portfolio as at 30 September 2024;
  - the statement of operations and changes in net assets for the year then ended; and
  - the notes to the financial statements, which include a summary of significant accounting policies.
- 

### **Basis for opinion**

We conducted our audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the EU Regulation No 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

To the best of our knowledge and belief, we declare that we have not provided non-audit services that are prohibited under Article 5(1) of the EU Regulation No 537/2014.

The non-audit services that we have provided to the Fund, for the year then ended, are disclosed in Note 15 to the financial statements.

**Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

<b>Key audit matter</b>	<b>How our audit addressed the key audit matter</b>
<p data-bbox="326 655 602 684"><i>Existence of OTC swaps</i></p> <p data-bbox="326 714 721 919">The existence of such assets is considered to be a key audit matter due to the potential magnitude of material misstatement combined with the higher inherent risk for assets that cannot be held by the Depository Bank.</p>	<p data-bbox="760 655 1430 804">We gained an understanding of the control environment and operating effectiveness of key controls surrounding authorisation, completeness and accuracy of OTC swaps transactions and the reconciliation process in place for these instruments at the fund administrator.</p> <p data-bbox="760 833 1430 947">We obtained from the Depository Bank, the confirmation of the ownership by the Fund of all OTC swaps instruments. We agreed all positions as per Depository Bank confirmation to the Fund's accounting records.</p>
<p data-bbox="326 976 602 1005"><i>Valuation of OTC swaps</i></p> <p data-bbox="326 1035 721 1184">As part of their investment strategy, a number of sub-funds of Amundi Index Solutions use over-the-counter swaps to replicate the performance of indices.</p> <p data-bbox="326 1213 721 1325">The valuation of such investments is considered to be a key audit matter due to the potential magnitude of a material misstatement.</p> <p data-bbox="326 1354 721 1436">Refer to Note 2 of the financial statements for the valuation policy for such instruments.</p>	<p data-bbox="760 976 1430 1184">We gained an understanding of the control environment and operating effectiveness of key controls surrounding the valuation of OTC swaps (total return swaps) at Fund Administrator level through its ISAE 3402 controls report. In addition, we gained an understanding of key controls over the valuation process implemented by the Management Company.</p> <p data-bbox="760 1213 1430 1268">We carried out an independent valuation of all the total return swaps held by the Fund as of 30 September 2024.</p> <p data-bbox="760 1297 1430 1409">We independently determined a range of acceptable values, based on models using recognized methodologies, considering the key terms of the contracts and observable market data.</p> <p data-bbox="760 1438 1430 1528">In addition, for all OTC swaps, we compared the value of such derivatives to the counter-valuation performed by the Fund's Management Company.</p>

---

---

### **Other information**

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

### **Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Amundi MSCI Brazil, Amundi Smart Factory, Amundi Index US Gov Inflation-Linked Bond and Amundi Index Equity Global Multi Smart Allocation Scientific Beta where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our audit report unless law or regulation precludes public disclosure about the matter.

## **Report on other legal and regulatory requirements**

We have been appointed as “Réviseur d’entreprises agréé” of the Fund by the General Meeting of the Shareholders on 24 January 2024 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 4 years.

PricewaterhouseCoopers, Société coopérative  
Represented by

Luxembourg, 31 January 2025

Thomas Druant

## SECURITIES FINANCING TRANSACTIONS AND OF REUSE REGULATION (“SFTR”)

The Regulation on Transparency of Securities Financing Transactions and of Reuse (the « SFTR ») entered into force on 12 January 2016 aiming to improve transparency in securities and commodities lending, repurchase transactions, margin loans and certain collateral arrangements. The disclosure requirements of the SFTR include the following details on securities lending:

## REMUNERATION POLICY AND PRACTICES

### REMUNERATION POLICY AND PRACTICES

Amundi Luxembourg S.A. remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that come into force on March 18, 2016, and was transposed into Luxembourg Law of 10 May 2016. The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Luxembourg. The policy is subject to independent review by the internal Compliance function. In main evolutions of the 2023 remuneration policy was linked to "Amundi Ambition 2025" and ESG criteria and Sustainability Risk. Qualitative and quantitative criteria for Investment Management and Sales and Marketing has been added. There were no further material changes to the remuneration policy adopted for previous years. The policy applicable for 2023 was approved by Amundi Luxembourg Board on October 05, 2023. Amundi group Remuneration Committee reviews on an annual basis the group remuneration policy. The 2023 review took place on February 02, 2023. The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system.

Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.

Amundi Luxembourg S.A. and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of the funds.

### AMOUNTS OF REMUNERATION AWARDED

Amundi Luxembourg S.A., the Management Company acts as of December 31, 2023 as Management Company or AIFM for several umbrella and standalone UCITS and AIFs.

The total remuneration expressed in Euro paid by Amundi Luxembourg S.A. to its staff during the calendar year 2023 is as follows:

	No of beneficiaries	Fixed remuneration	Variable remuneration	Total
Staff	110	8,737,726.50	1,545,780.42	10,283,506.92
Out of which				
- Identified staff	9	1,419,514.99	516,082.67	1,935,597.66
- All other staff	101	7,318,211.51	1,029,697.75	8,347,909.26

Amundi Index Solution Fund represented as of 31.12.2023 around 40% and as of 30.09.2024 around 41% of the Total Net Assets under Management of Amundi Luxembourg S.A.. The total remuneration figures shown above refer to activities in respect of all funds managed.

Amundi Luxembourg S.A. and Amundi group employees who are appointed to the Board of Directors of the Management Company and/or of the Funds waive the right to any remuneration in respect of all funds managed.

No employee of the Management Company receives any amount, including carried interest and performance fees, paid directly by the UCITS or AIFs managed.

### REMUNERATION OF DELEGATES

As of 30 September 2024: - Amundi Asset Management managed EUR 1,187.08 billion AuM, out of which EUR 118.46 billion represented by the sub-funds in the umbrella (respectively 9.98% of the total assets managed by the Investment Manager and 96.22% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of the sub-funds was EUR 3,648,249, out of which EUR 1,763,143 in fixed remuneration and EUR 1,885,106 in variable one. The pro-rata portion of staff total remuneration attributable to the management of the sub-funds was EUR 20,694,775, out of which EUR 14,505,588 in fixed remuneration and EUR 6,189,187 in variable one. Amundi Asset Management had a total of 100 identified staff out of a total of 1,923 staff in 2023.

- Amundi Japan managed EUR 37.85 billion AuM, out of which EUR 4.65 billion represented by the sub-funds in the umbrella (respectively 12.29% of the total assets managed by the Investment Manager and 3.78% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of the sub-funds was EUR 505,310, out of which EUR 312,029 in fixed remuneration and EUR 193,281 in variable one. The pro-rata portion of staff total remuneration attributable to the management of the sub-funds was EUR 2,298,045, out of which EUR 1,763,649 in fixed remuneration and EUR 534,396 in variable one. Amundi Japan had a total of 15 identified staff out of a total of 191 staff in 2023.

Please note that the staff remuneration figures refer to the calendar year 2023.

**FRENCH "PLAN D'EPARGNE EN ACTIONS" ("PEA")**

Plan d'Epargne en Actions (PEA) is a savings plan dedicated to French tax resident individuals in order to promote the investment in European equities (companies established in European Union, Iceland, Liechtenstein or Norway, and subject to corporate income tax).

To be eligible for PEA the sub-fund must invest on a permanent basis at least 75% of their assets in PEA eligible securities.

During the period between 1 October 2023 and 30 September 2024 the following sub-funds invested constantly at least 75% of their total net assets in PEA eligible securities.

As of 30 September 2024, the percent of the assets invested in PEA eligible securities was:

Sub-funds	Name (umbrella)	Depository Bank	PEA eligibility	Ratio

**SUSTAINABLE FINANCE DISCLOSURE REGULATION (“SFDR”)****DISCLOSURE REGULATION**

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonized approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product".

For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation please refer to the supplement for that Sub-Fund. Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Amundi Responsible Investment Policy available on [www.amundi.com](http://www.amundi.com).

As required by Art.11 of the Disclosure Regulation the Fund makes the following statements:

Under the Amundi Responsible Investment Policy, Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage Sustainability Risks and opportunities inherent to its industry and individual circumstances. By using the Amundi ESG ratings, portfolio managers are taking into account Sustainability Risks in their investment decisions. Amundi applies targeted exclusion policies to all Amundi's active investing strategies by excluding companies in contradiction with the Responsible Investment Policy, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

**Article 8 Sub-Funds (required Art.11.1)**

The Sub-Funds listed below are classified pursuant to article 8 of the Disclosure Regulation and aim to promote environmental and/or social characteristics. In addition to applying Amundi's Responsible Investment Policy, these Article 8 Sub-Funds aim to promote such characteristics through investments resulting in an ESG score of their portfolios greater than of their respective benchmark or investment universe. The ESG portfolio score is the AUM-weighted average of the issuers' ESG score based on Amundi ESG scoring model.

During the financial year under reporting, the Investment Manager continuously promoted environmental and/or social characteristics through the application of the above mentioned methodologies.

**Article 6 Sub-Funds**

Given the investment focus and the asset classes/sectors they invest in, the investment managers of all other Sub-Funds, not classified pursuant to article 8 or 9 of the Disclosure Regulation did not integrate a consideration of environmentally sustainable economic activities into the investment process for the Sub-Fund. Therefore, it should be noted that the investments underlying the Sub-Fund did not take into account the EU criteria for environmentally sustainable economic activities.

Throughout the financial year, the Sub-Fund considered PAI 14 via the Amundi Minimum Standard and Exclusion Policy related to controversial weapons, excluding issuers in the production, sale, storage or services for and of anti-personnel mines and cluster bombs, prohibited by the Ottawa and Oslo treaties and issuers involved in the production, sale or storage of chemical, biological and depleted uranium weapons, as per Amundi Global Responsible Investment Policy.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **45.81%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Japan ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Japan ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the MSCI ESG Score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI Japan ESG Broad CTB Select Index is 258.132.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Japan Index is 577.279.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 385.344

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

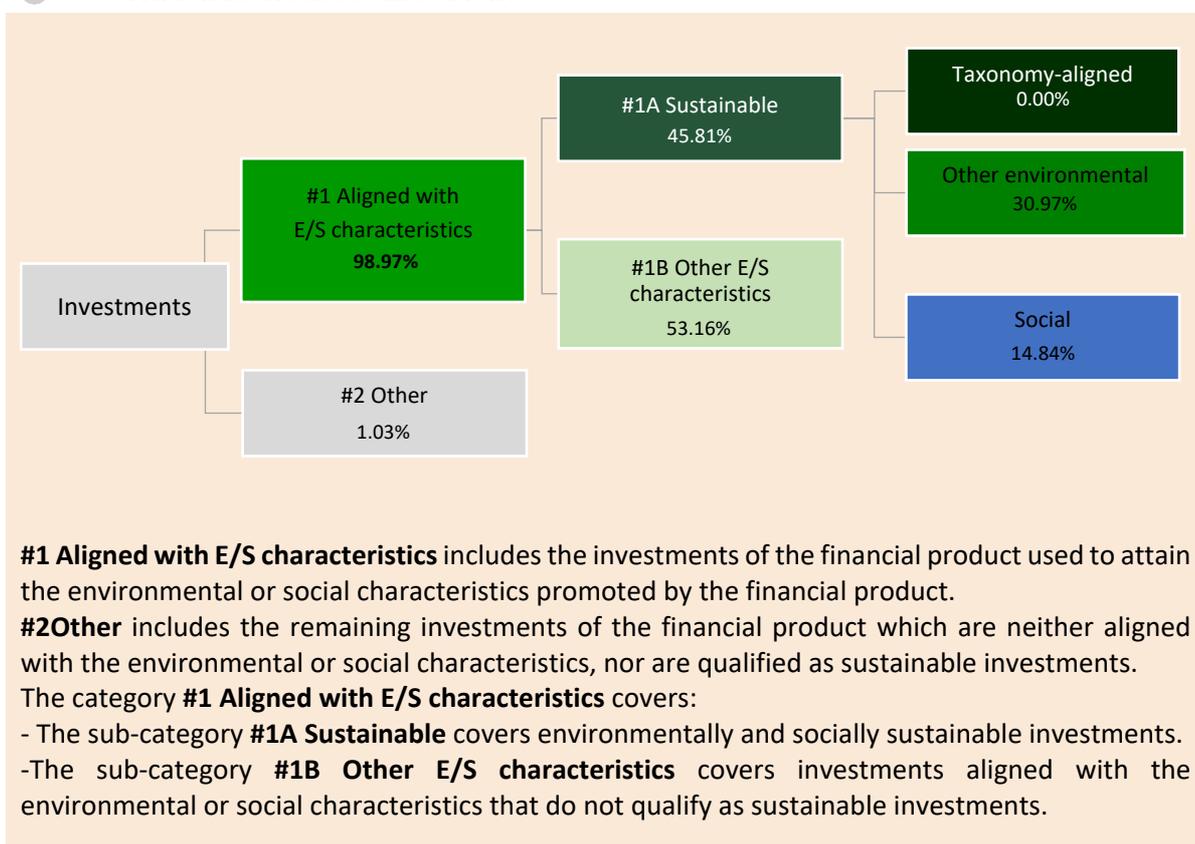

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
TOYOTA MOTOR CORP	Consumer Discretionary	Automobiles & Components	Japan	4.26%
SONY GROUP CORP (JT)	Consumer Discretionary	Consumer Durables & Apparel	Japan	3.75%
MITSUBISHI UFJ FIN	Financials	Banks	Japan	3.00%
KEYENCE CORP	Information Technology	Technology Hardware & Equipment	Japan	2.60%
TOKYO ELECTRON LTD	Information Technology	Semiconductors & Semiconductor Equipment	Japan	2.37%
SUMITOMO MITSUI FINAN	Financials	Banks	Japan	2.33%
TOKIO MARINE HOLDINGS INC	Financials	Insurance	Japan	2.27%
RECRUIT HOLDINGS CO LTD	Industrials	Commercial & Professional Services	Japan	2.26%
FAST RETAILING	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Japan	2.16%
SHIN-ETSU CHEMICAL	Materials	Chemicals	Japan	2.08%

HOYA CORP	Health Care	Health Care Equipment & Services	Japan	2.02%
DAIICHI SANKYO	Health Care	Pharmaceuticals Biotech & Life Sciences	Japan	1.89%
TAKEDA PHARMACEUTIC	Health Care	Pharmaceuticals Biotech & Life Sciences	Japan	1.89%
HITACHI LTD	Industrials	Capital goods	Japan	1.73%
MIZUHO FINANCIAL GROUP INC	Financials	Banks	Japan	1.71%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Industrials	Capital goods	9.30%

<i>Financials</i>	<i>Banks</i>	8.61%
<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	7.86%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	7.76%
<i>Industrials</i>	<i>Transportation</i>	6.31%
<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	6.15%
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	5.81%
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	5.58%
<i>Financials</i>	<i>Insurance</i>	5.42%
<i>Real Estate</i>	<i>Real Estate Management &amp; Development</i>	4.34%
<i>Communication Services</i>	<i>Telecommunication</i>	4.20%
<i>Consumer Discretionary</i>	<i>Consumer Discretionary Distribution &amp; Retail</i>	3.98%
<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	3.89%
<i>Financials</i>	<i>Financial Services</i>	3.27%
<i>Materials</i>	<i>Chemicals</i>	2.95%
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	2.52%
<i>Information Technology</i>	<i>Software &amp; Services</i>	2.45%

<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	<i>2.09%</i>
<i>Communication Services</i>	<i>Media &amp; Entertainment</i>	<i>1.79%</i>
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	<i>1.59%</i>
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	<i>1.30%</i>
<i>Real Estate</i>	<i>REITs</i>	<i>0.65%</i>
<i>Consumer Discretionary</i>	<i>Consumer Services</i>	<i>0.64%</i>
<i>Materials</i>	<i>Metals &amp; Mining</i>	<i>0.25%</i>
<i>Energy</i>	<i>Oil, Gas &amp; Consumable Fuels</i>	<i>0.20%</i>
<i>Utilities</i>	<i>Gas Utilities</i>	<i>0.12%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Forex</i>	<i>Forex</i>	<i>-0.02%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.98%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

environmental objective.

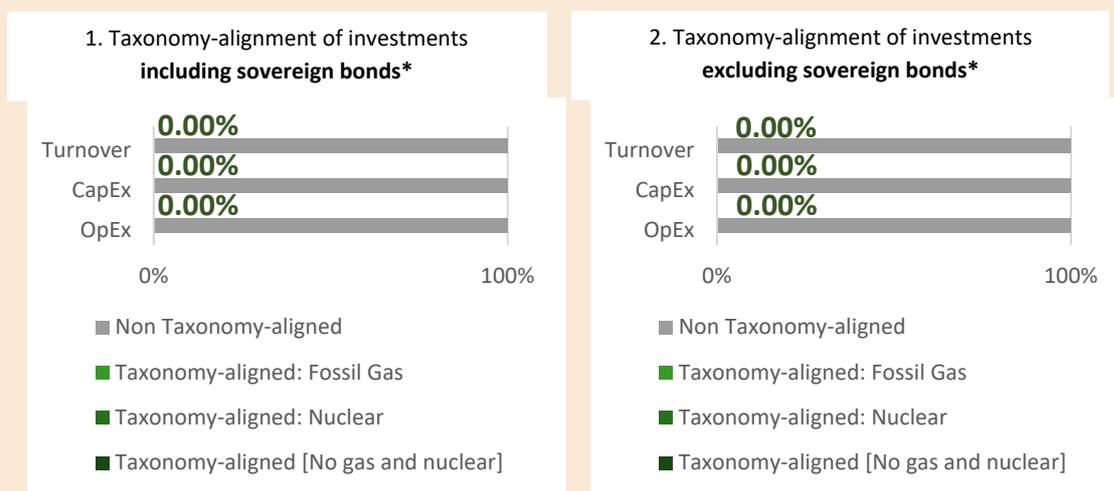

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.97%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.84%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

#### ***How does the reference benchmark differ from a broad market index ?***

MSCI Japan ESG Broad CTB Select Index is an equity index based on the MSCI Japan Index representative of the large and mid-cap securities of the Japan Market (the Parent Index). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

#### ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

#### ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

#### ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI NORTH AMERICA ESG BROAD CTB

Legal entity identifier: 2221009K64OHGR1O8Z36

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.28% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI North America ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

-Scope 2 emissions: those caused by the generation of electricity purchased by the company.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

-Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI North America ESG Broad CTB Select Index is 118.959

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI North America Index (the "Parent Index") is 248.384

● ***... and compared to previous periods?***

The previous period weighted average greenhouse gas (GHG) intensity (the "WACI") of the index was 153.179

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

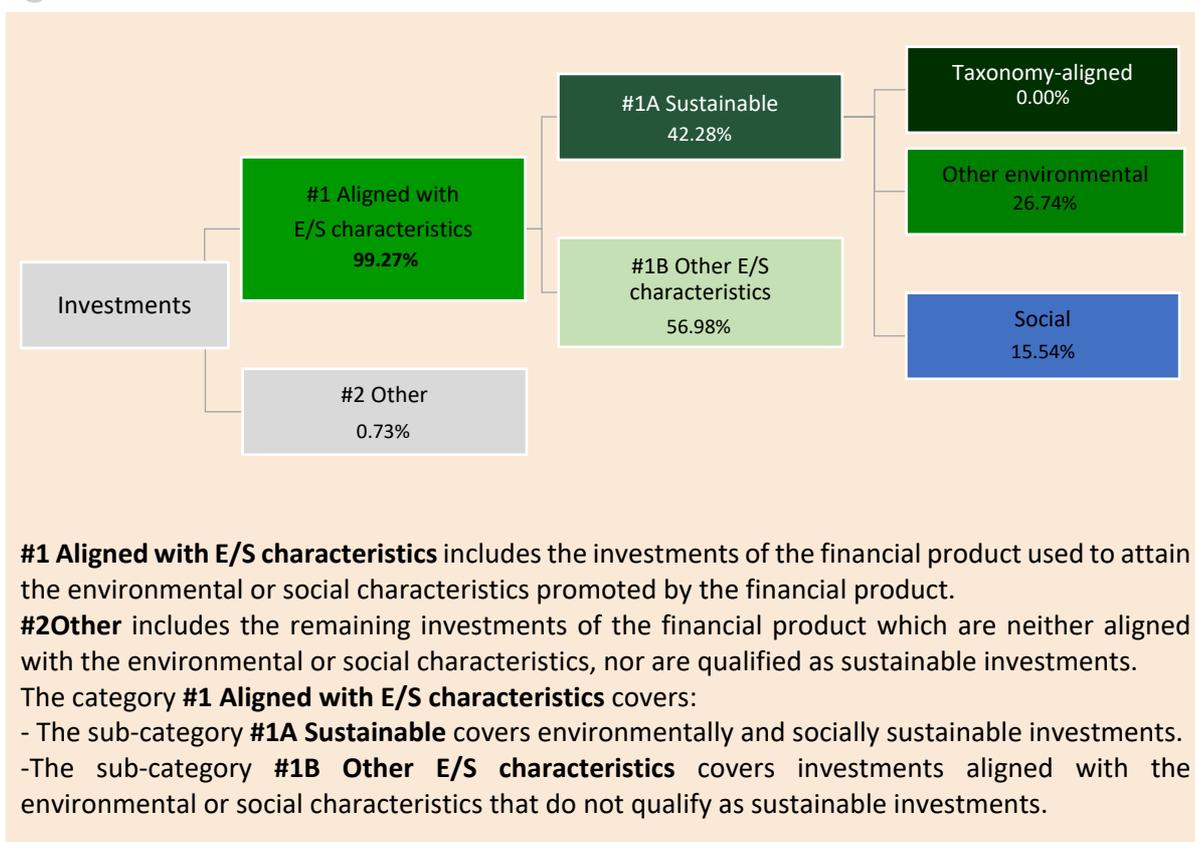

Largest Investments	Sector	Sub-Sector	Country	% Assets
APPLE INC	Information Technology	Technology Hardware & Equipment	United States	6.20%
MICROSOFT CORP	Information Technology	Software & Services	United States	5.83%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	5.82%
AMAZON.COM INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	United States	3.20%
ALPHABET INC CL C	Communication Services	Media & Entertainment	United States	2.66%
META PLATFORMS INC-CLASS A	Communication Services	Media & Entertainment	United States	2.03%
ELI LILLY & CO	Health Care	Pharmaceuticals Biotech & Life Sciences	United States	1.50%
TESLA INC	Consumer Discretionary	Automobiles & Components	United States	1.39%
BROADCOM INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	1.33%
HOME DEPOT INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	United States	1.05%
TEXAS INSTRUMENTS	Information Technology	Semiconductors & Semiconductor Equipment	United States	0.99%

JPMORGAN CHASE & CO	Financials	Banks	United States	0.96%
VISA INC-CLASS A SHARES	Financials	Financial Services	United States	0.96%
AUTOMATIC DATA PROCESSING	Industrials	Commercial & Professional Services	United States	0.87%
MASTERCARD INC-CL A	Financials	Financial Services	United States	0.85%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Information Technology</i>	<i>Software &amp; Services</i>	<i>12.62%</i>
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>10.96%</i>

<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	8.36%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	7.32%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

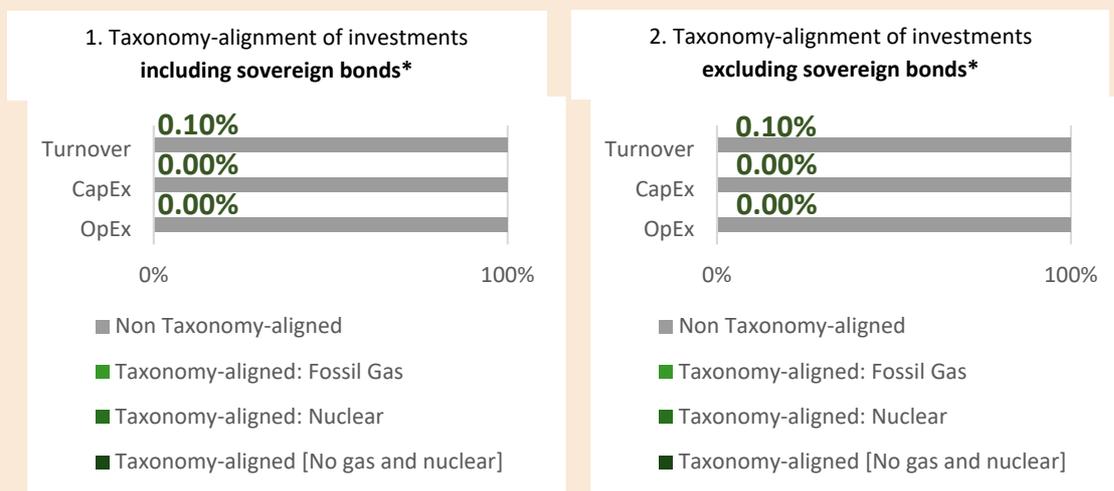

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:  
 In fossil gas       In nuclear energy  
 No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.74%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 15.54%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI North America ESG Broad CTB Select Index is an equity index based on the MSCI North America Index representative of the large and mid-cap segments of the US and Canada markets (the "Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI CAC 40 ESG

Legal entity identifier:  
549300TC0PVE58KW9N64

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **92.04%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the CAC 40 ESG Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The Moody's ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. Moody's ESG Solutions assesses and rates the performances of companies according the Equitics methodology based on 38 criteria, divided in to six key areas of corporate environmental, social and governance responsibility.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Each issuer is assigned an overall score out of 100 (the higher the better) which is a weighted and consolidated score of all sustainability factors in a given sector.

More precisely, CAC 40 ESG Index (the "Index") is constructed from the CAC Large 60 Index and applies the following filters:

- Companies with an active critical controversies related to UNGC as determined by Moody's are not eligible for the Index.
- Companies as per Moody's data involved in controversial weapons, civilian firearms, thermal coal mining, coal fuelled power generation, Tar sand and oil and tobacco are not eligible for inclusion into the Index.

The eligible companies are ranked by decreasing order on the ESG score as assigned by Moody's. In case of an equal score the company with the highest free float market capitalization will rank higher.

- At the end of the period, the Moody's ESG Rating of the index CAC 40 ESG Index is 69.00.
- At the end of the period, the Moody's ESG Rating of the parent index CAC Large 60 Index is 67.00.

- ***... and compared to previous periods?***

The previous period Moody's ESG score of the index was 68

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for

human rights,  
anti-corruption and  
anti-bribery matters.

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

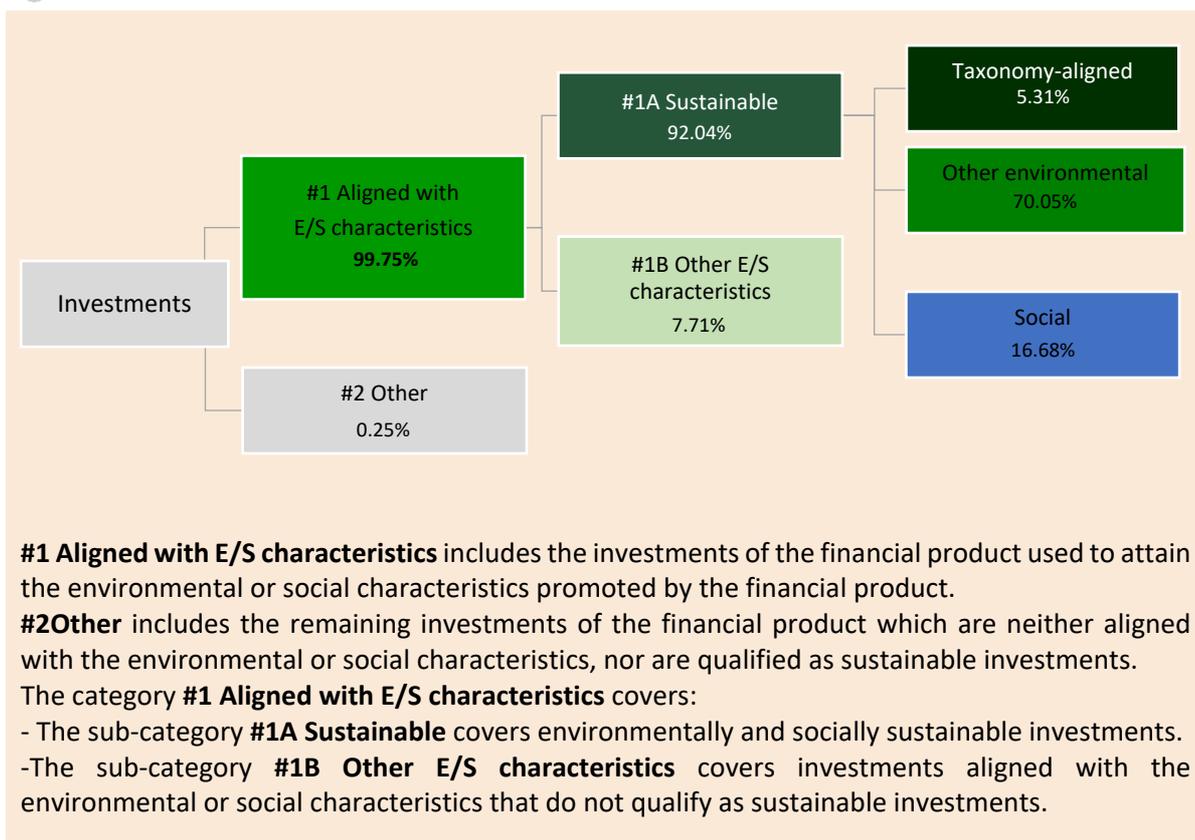

Largest Investments	Sector	Sub-Sector	Country	% Assets
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	11.16%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	9.15%
SANOFI - PARIS	Health Care	Pharmaceuticals Biotech & Life Sciences	France	7.91%
AIRBUS SE	Industrials	Capital goods	Netherlands	5.25%
SAFRAN SA	Industrials	Capital goods	France	5.16%
HERMES INTERNATIONAL	Consumer Discretionary	Consumer Durables & Apparel	France	4.70%
BNP PARIBAS	Financials	Banks	France	4.45%
AXA SA	Financials	Insurance	France	4.35%
AIR LIQUIDE PRIME FID 02	Materials	Chemicals	France	4.13%
L OREAL PRIME FID	Consumer Staples	Household & Personal Products	France	3.97%
VINCI SA (PARIS)	Industrials	Capital goods	France	3.74%
DANONE	Consumer Staples	Food, Beverage & Tobacco	France	2.84%
COMPAGNIE DE SAINT GOBAIN	Industrials	Capital goods	France	2.49%

AIR LIQUIDE SA	Materials	Chemicals	France	2.28%
L OREAL (PARIS)	Consumer Staples	Household & Personal Products	France	2.22%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>29.43%</i>
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	<i>17.14%</i>

<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.25%</i>

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 5.31% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

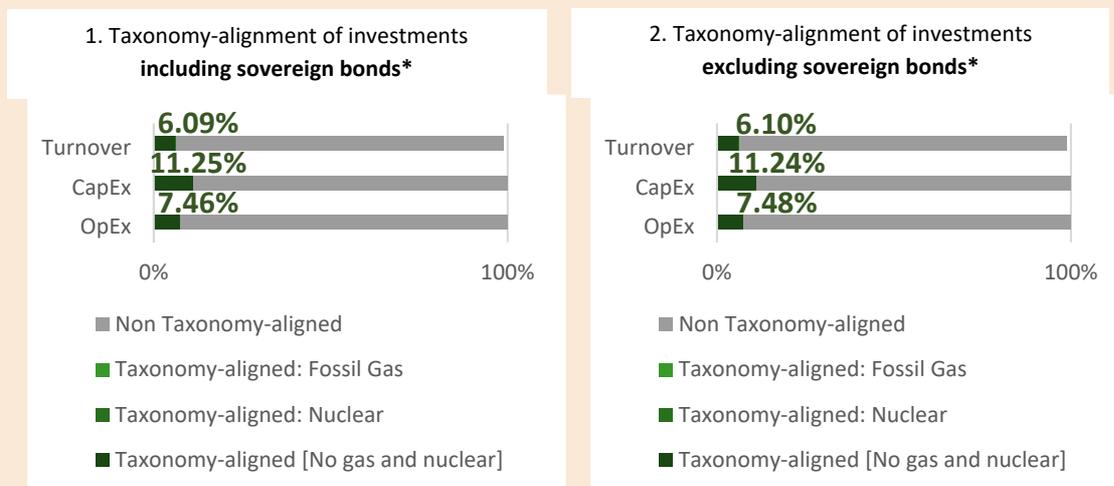

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.11% and the share of investment in enabling activities was 4.85%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 3.93%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **70.05%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 16.68%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

CAC 40 ESG Index is an equity index representative of the top 40 companies demonstrating strong Environmental, Social and Governance practices within the CAC Large 60 Index (Parent Index) representing the 60 leading stocks on the Paris stock market. The Index aims to deliver a reduced weighted carbon footprint and improved green-to-brown ratio compared to its Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI ITALY MIB ESG

Legal entity identifier:  
549300RPOWOZJH77LP16

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **66.25%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, the MIB ESG Index. This is an equity index representing the top 40 companies demonstrating strong Environmental, Social and Governance practices amongst the 60 most liquid Italian companies listed on Euronext Milan MTA and MIV markets. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

● **How did the sustainability indicators perform?**

The Moody's ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. Moody's ESG Solutions assesses and rates the performances of companies according the Equitics methodology based on 38 criteria,

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

financial product are attained.

divided in to six key areas of corporate environmental, social and governance responsibility.

Each issuer is assigned an overall score out of 100 (the higher the better) which is a weighted and consolidated score of all sustainability factors in a given sector.

More precisely, MIB ESG Index (the "Index") is constructed from all the companies listed on Euronext Milan MTA and MIV markets and applies the following filters: The top 60 companies in term of 6 months MDTV (Median Daily Traded Value) are eligible.

- At the end of the period, the Moody's ESG Rating of the index MIB ESG NR is 66.00.
- At the end of the period, the Moody's ESG Rating of the Euronext Milan MTA and MIV markets is 63.00.

- ***... and compared to previous periods?***

The previous period Moody's ESG rating of the portfolio was 63

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

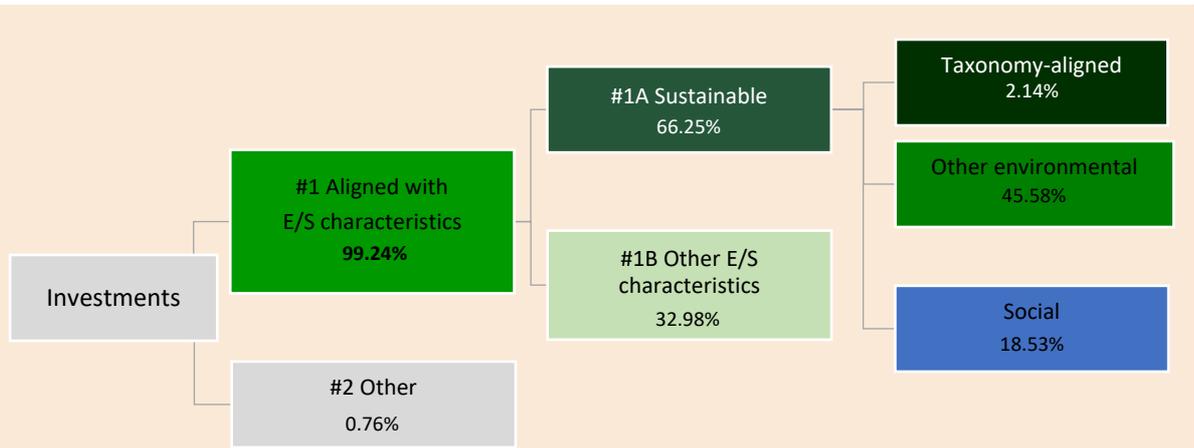

Largest Investments	Sector	Sub-Sector	Country	% Assets
UNICREDIT SPA	Financials	Banks	Italy	10.36%
INTESA SANPAOLO	Financials	Banks	Italy	10.03%
ENEL SPA	Utilities	Electric Utilities	Italy	9.96%
ENI SPA MILAN	Energy	Oil, Gas & Consumable Fuels	Italy	8.59%
GENERALI	Financials	Insurance	Italy	7.79%
STELLANTIS MILAN	Consumer Discretionary	Automobiles & Components	Netherlands	7.17%
PRYSMIAN SPA	Industrials	Capital goods	Italy	5.27%
STMICROELECTRONICS/I	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	4.64%
MONCLER SPA	Consumer Discretionary	Consumer Durables & Apparel	Italy	3.64%
TERNA-RETE ELETTRICA NAZIONALE	Utilities	Electric Utilities	Italy	3.11%
FINECOBANK SPA	Financials	Banks	Italy	2.57%
SNAM SPA	Utilities	Gas Utilities	Italy	2.52%
LEONARDO SPA	Industrials	Capital goods	Italy	2.21%
BANCO BPM SPA	Financials	Banks	Italy	2.13%
MEDIOBANCA SPA	Financials	Banks	Italy	2.09%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

## What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Financials</i>	<i>Banks</i>	<i>29.78%</i>
<i>Utilities</i>	<i>Electric Utilities</i>	<i>13.07%</i>
<i>Financials</i>	<i>Insurance</i>	<i>10.51%</i>
<i>Energy</i>	<i>Oil, Gas &amp; Consumable Fuels</i>	<i>8.59%</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>7.96%</i>
<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	<i>7.69%</i>
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>4.64%</i>

<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	3.89%
<i>Utilities</i>	<i>Gas Utilities</i>	3.24%
<i>Financials</i>	<i>Financial Services</i>	2.49%
<i>Utilities</i>	<i>Multi-Utilities</i>	2.26%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	1.45%
<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	0.96%
<i>Information Technology</i>	<i>Software &amp; Services</i>	0.83%
<i>Energy</i>	<i>Energy Equipment &amp; Services</i>	0.70%
<i>Communication Services</i>	<i>Telecommunication</i>	0.68%
<i>Utilities</i>	<i>Independent Power &amp; Renewable Electricity Producers</i>	0.35%
<i>Communication Services</i>	<i>Media &amp; Entertainment</i>	0.14%
<i>Others</i>	<i>Others</i>	0.00%
<i>Cash</i>	<i>Cash</i>	0.76%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.14% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

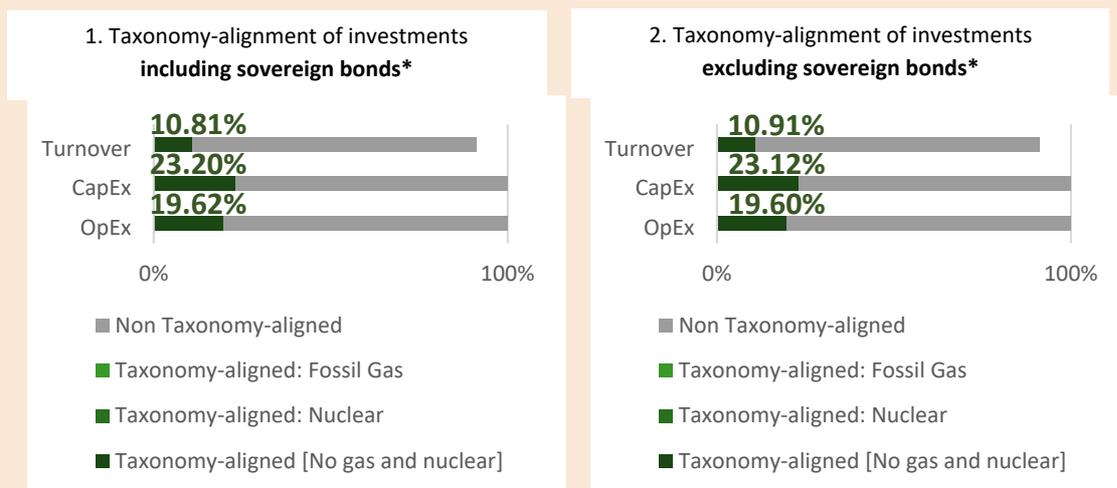

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.51% and the share of investment in enabling activities was 8.04%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 6.40%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **45.58%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 18.53%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The MIB ESG Index is an equity index representing the top 40 companies demonstrating strong Environmental, Social and Governance practices amongst the 60 most liquid Italian companies listed on Euronext Milan MTA and MIV markets.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index ?**

The MIB ESG Index is an equity index representing the top 40 companies demonstrating strong Environmental, Social and Governance practices amongst the 60 most liquid Italian companies listed on Euronext Milan MTA and MIV markets .

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI CHINA  
TECH ESG SCREENED

Legal entity identifier:  
549300LYZ55LWKOSOL45

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **33.71%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI China Tech IMI All Share Stock Connect ESG Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI China Tech IMI All Share Stock Connect ESG Filtered Net USD Index is 5.195
- the MSCI China IMI Index is 4.741

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 4.689

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
XPENG INC - CLASS A SHARES	Consumer Discretionary	Automobiles & Components	Cayman Islands	2.38%
BILIBILI INC- CLASS Z	Communication Services	Media & Entertainment	Cayman Islands	2.16%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Communication Services	Media & Entertainment	15.91%

<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	<i>12.36%</i>
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>12.13%</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>12.04%</i>

Others	Others	0.00%
Cash	Cash	0.08%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

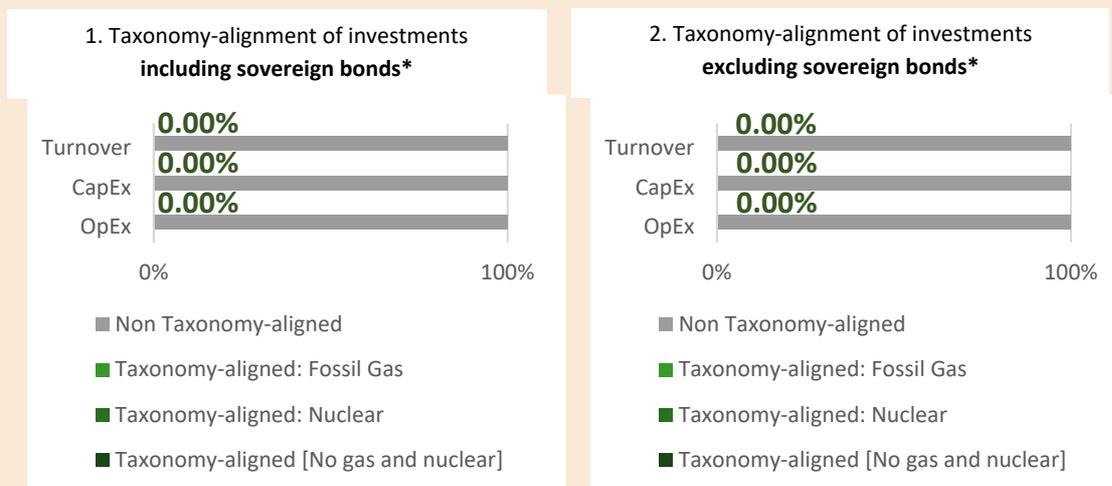

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **22.67%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.04%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● *How does the reference benchmark differ from a broad market index ?*

MSCI China Tech IMI All Share Stock Connect ESG Index aims to represent the performance of companies associated with the development of new products and services from technology innovations leading to breakthroughs in areas such as internet and digitization, mobility, autonomous technology, industrial automation and digital healthcare, while excluding those involved in certain controversial business activities or with relatively low MSCI ESG Controversies scores or MSCI ESG Ratings

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● *How did this financial product perform compared with the reference benchmark ?*

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● *How did this financial product perform compared with the broad market index ?*

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI EUROPE EX SWITZERLAND ESG LEADERS

Legal entity identifier: 5493009JG8TNRW3XF071

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective: \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 86.09% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

"The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index. This is an equity index based on the MSCI Europe ex Switzerland Index ("Parent Index") representative of large and mid-cap stocks across 14 Developed Markets (DM) countries in Europe (as of May 2022) excluding Switzerland and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy."

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or

**Sustainability indicators** measure how the environmental or

social characteristics promoted by the financial product are attained.

social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index is 8.521
- the MSCI Europe ex Switzerland Index is 7.888

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 8.613

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

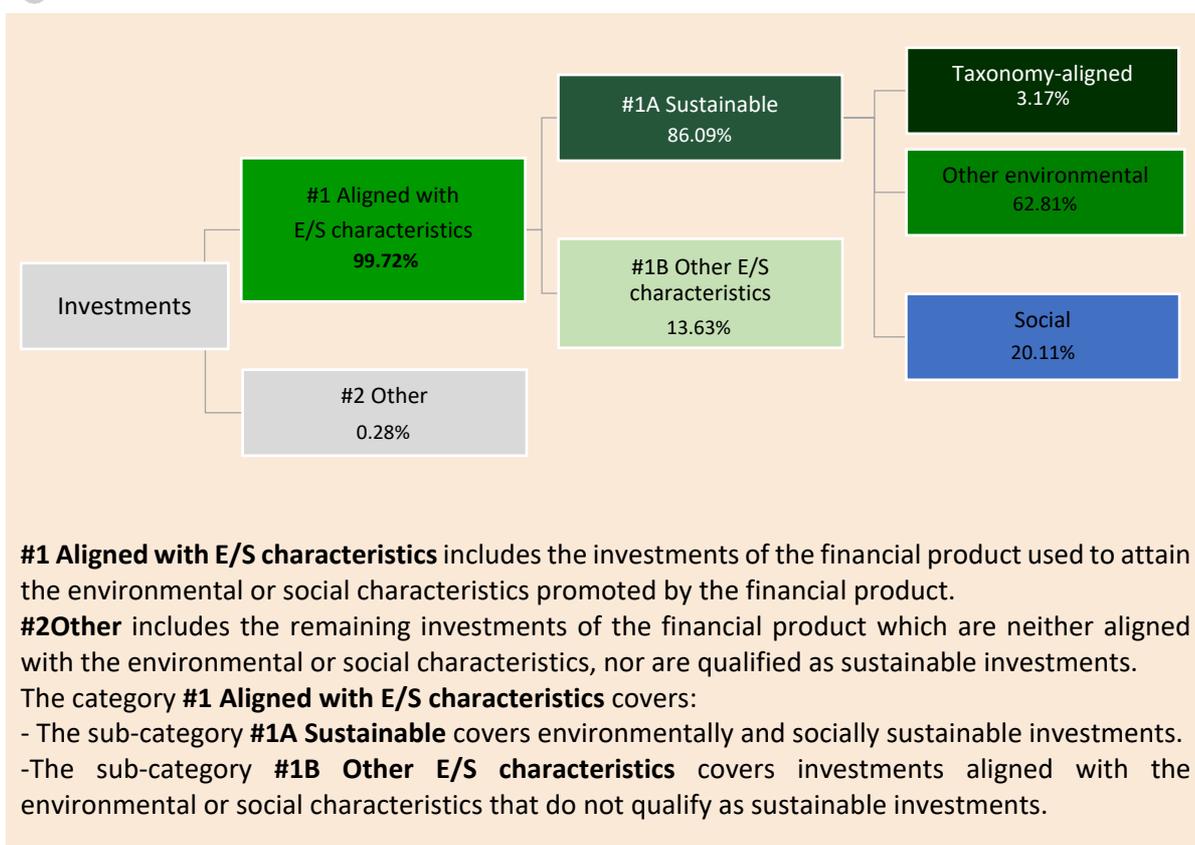

Largest Investments	Sector	Sub-Sector	Country	% Assets
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	4.48%
ASTRAZENECA GBP	Health Care	Pharmaceuticals Biotech & Life Sciences	United Kingdom	4.43%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	4.37%
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotech & Life Sciences	Denmark	4.23%
HSBC HOLDING PLC GBP	Financials	Banks	United Kingdom	3.52%
UNILEVER PLC (GBP)	Consumer Staples	Household & Personal Products	United Kingdom	3.43%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	3.05%
TOTALENERGIES SE PARIS	Energy	Oil, Gas & Consumable Fuels	France	2.98%
IBERDROLA SA	Utilities	Electric Utilities	Spain	2.01%
RELX PLC	Industrials	Commercial & Professional Services	United Kingdom	1.86%

HERMES INTERNATIONAL	Consumer Discretionary	Consumer Durables & Apparel	France	1.65%
MUENCHENER RUECKVER AG-REG	Financials	Insurance	Germany	1.56%
AXA SA	Financials	Insurance	France	1.48%
BNP PARIBAS	Financials	Banks	France	1.48%
NATIONAL GRID PLC	Utilities	Multi-Utilities	United Kingdom	1.41%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>12.94%</i>
<i>Financials</i>	<i>Banks</i>	<i>11.13%</i>

<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	<i>10.14%</i>
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	<i>8.65%</i>
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	<i>7.86%</i>
<i>Financials</i>	<i>Insurance</i>	<i>6.80%</i>
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>4.81%</i>
<i>Materials</i>	<i>Chemicals</i>	<i>4.49%</i>
<i>Energy</i>	<i>Oil, Gas &amp; Consumable Fuels</i>	<i>4.41%</i>
<i>Utilities</i>	<i>Electric Utilities</i>	<i>3.67%</i>
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	<i>3.25%</i>
<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	<i>2.63%</i>
<i>Financials</i>	<i>Financial Services</i>	<i>2.50%</i>
<i>Communication Services</i>	<i>Telecommunication</i>	<i>2.17%</i>
<i>Consumer Discretionary</i>	<i>Consumer Discretionary Distribution &amp; Retail</i>	<i>1.85%</i>
<i>Communication Services</i>	<i>Media &amp; Entertainment</i>	<i>1.76%</i>
<i>Utilities</i>	<i>Multi-Utilities</i>	<i>1.41%</i>
<i>Industrials</i>	<i>Transportation</i>	<i>1.31%</i>
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	<i>1.26%</i>

<i>Consumer Discretionary</i>	<i>Consumer Services</i>	<i>1.22%</i>

<i>Real Estate</i>	<i>Real Estate Management &amp; Development</i>	<i>0.17%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.00%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.28%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.17% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

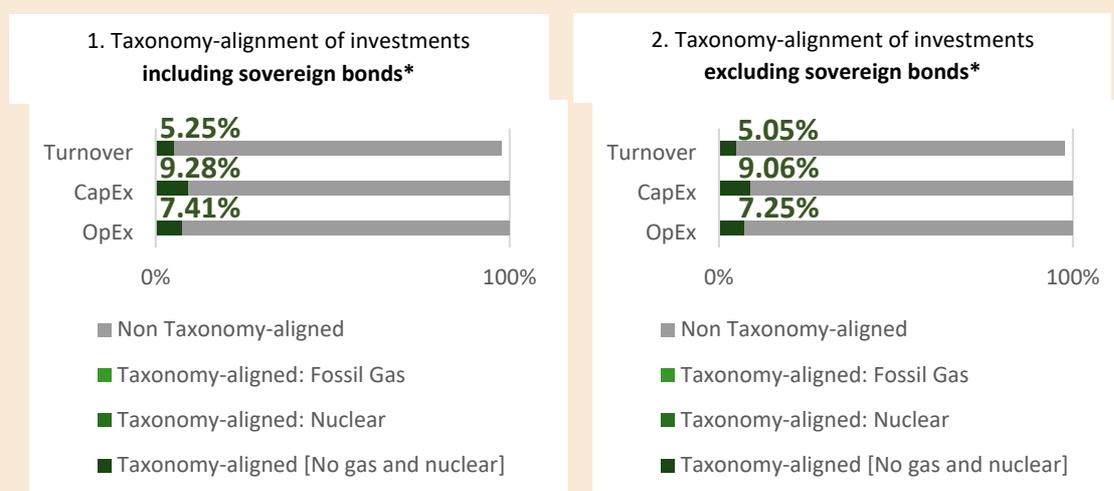

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.08% and the share of investment in enabling activities was 4.11%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.71%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **62.81%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 20.11%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI Europe ex Switzerland ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI Europe ex Switzerland Index ("Parent Index") representative of large and mid-cap stocks across 14 Developed Markets (DM) countries in Europe (as of May 2022) excluding Switzerland and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

MSCI Europe ex Switzerland Index is an equity index representative of the large and mid-cap markets of the developed European countries (as defined in the index methodology), excluding Switzerland.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI PEA MSCI USA  
ESG LEADERS

Legal entity identifier:  
549300XNMQWJFP5AXO77

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **44.85%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI USA ESG LEADERS SELECT 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI USA ESG LEADERS SELECT 5% Issuer Cappedis 7.495
- the MSCI ESG score of the MSCI USA Index is 6.674

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.486

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
INDEX LEG SG LU1681042864 SEP25	Others	Others	France	54.90%
INDEX LEG SG LU1681042948 SEP25	Others	Others	France	45.08%

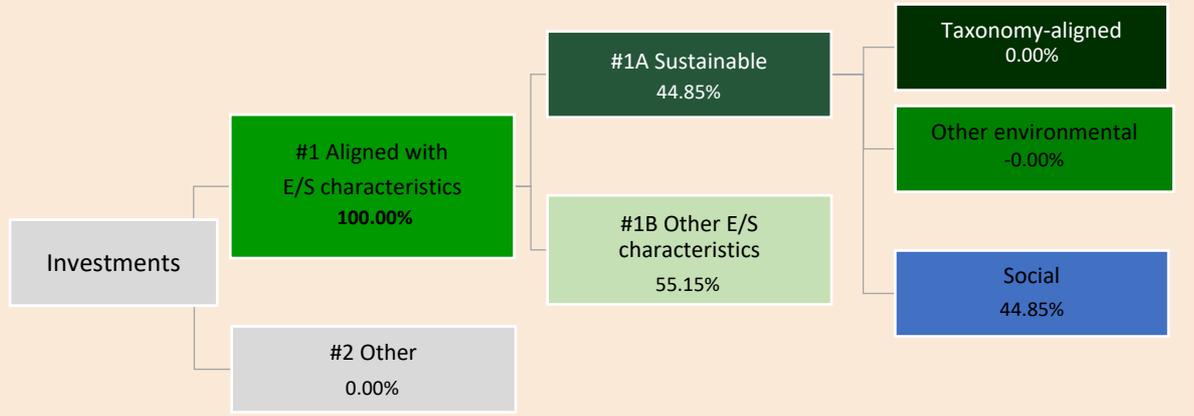

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made ?*

<b>Sector</b>	<b>Sub-Sector</b>	<b>% Assets</b>
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	<i>13.48%</i>
<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	<i>11.98%</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>11.17%</i>
<i>Financials</i>	<i>Banks</i>	<i>9.04%</i>
<i>Financials</i>	<i>Insurance</i>	<i>8.18%</i>

<i>Consumer Discretionary</i>	<i>Consumer Services</i>	<i>0.08%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.00%</i>

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

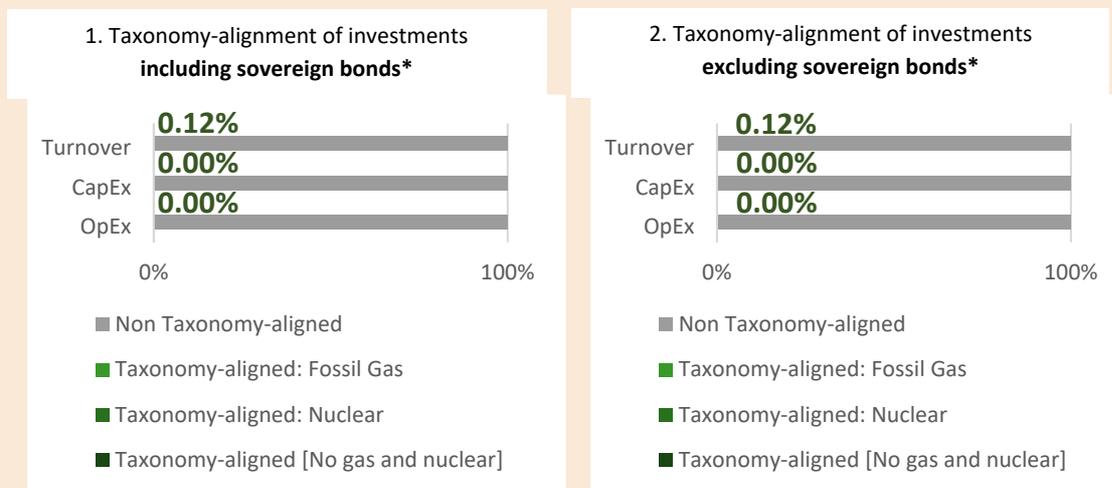

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was - **0.00%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 44.85%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI USA ESG LEADERS SELECT 5% Issuer Capped Index is an equity index based on the MSCI USA Index (the Parent Index), representative of the large and mid-cap securities of the US market and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI GLOBAL BIOENERGY ESG SCREENED

Legal entity identifier: 549300ZVYCLE5NKBFX60

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.21% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg BioEnergy ESG Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The Sustainalytics ESG Risk Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

The Sustainalytics ESG Risk Ratings (the "ESG score") measures a company's exposure to industry-

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

specific material ESG risks and how well a company is managing those risks. Exposure refers to the extent to which a company is exposed to different material ESG issues. It takes into consideration subindustry and company-specific factors such as its business model. Management refers to how well a company is managing its relevant ESG issues. It assesses the robustness of a company's ESG programs, practices and policies.

The sustainability indicator used is the Sustainalytics ESG Risk Rating of the ESG reference benchmark that is measured against the Sustainalytics ESG Risk Rating of the Parent index.

At the end of the period:

- the Sustainalytics ESG Risk Rating of the Bloomberg BioEnergy ESG Net Return Index is 23.95
- the Sustainalytics ESG Risk Rating of the Bloomberg BioEnergy Benchmark (the "Parent Index") is 28.13

● ***... and compared to previous periods?***

At the end of the previous period, the Sustainalytics ESG Risk Rating of the index was 25.69

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

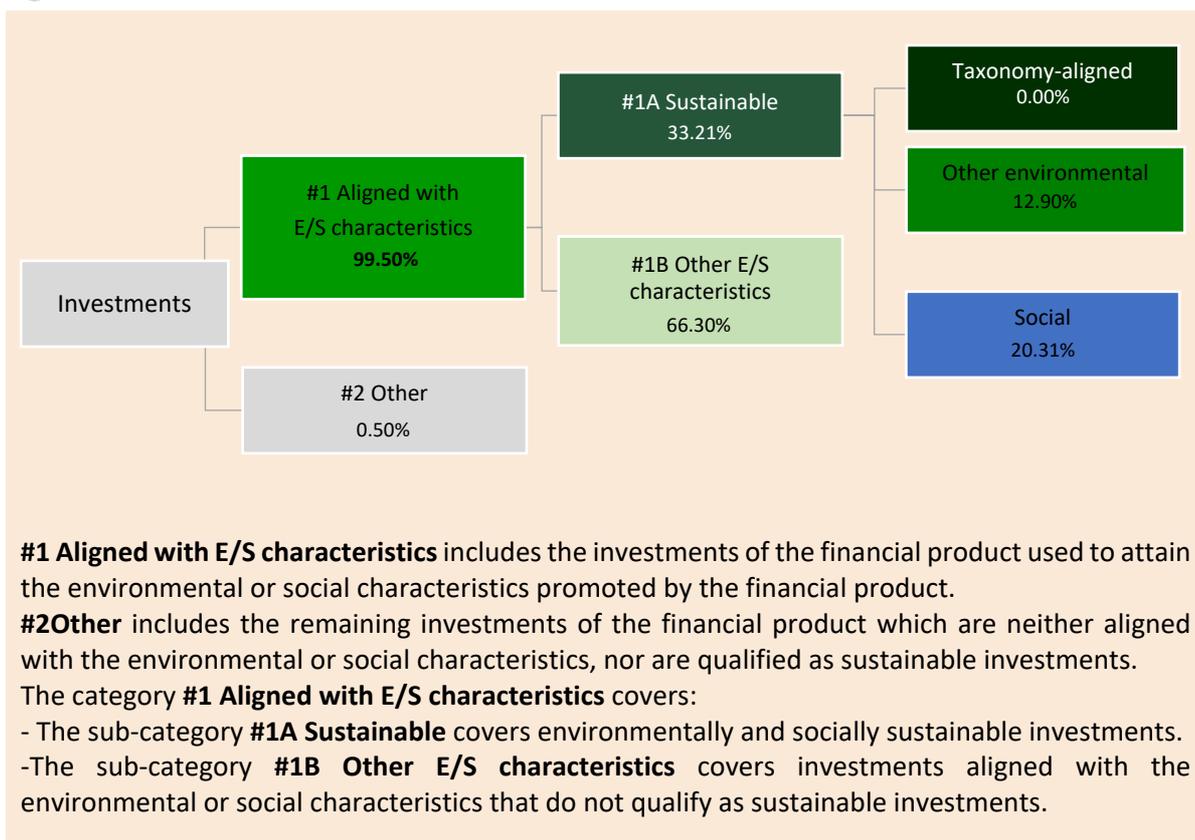

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
NOVONESIS (NOVOZYMES) B	Materials	Chemicals	Denmark	9.10%
VEOLIA ENVIRONNEMENT	Utilities	Multi-Utilities	France	8.42%
UPM-KYMMENE OYJ	Materials	Paper & Forest Products	Finland	8.08%
DARLING INGREDIENTS INC	Consumer Staples	Food, Beverage & Tobacco	United States	7.93%
ENI SPA MILAN	Energy	Oil, Gas & Consumable Fuels	Italy	7.82%
HF SINCLAIR CORP	Energy	Oil, Gas & Consumable Fuels	United States	7.80%
VALERO ENERGY CORP	Energy	Oil, Gas & Consumable Fuels	United States	7.77%
NESTE OYJ	Energy	Oil, Gas & Consumable Fuels	Finland	7.24%
CLARIANT AG-REG	Materials	Chemicals	Switzerland	5.05%
E.ON SE	Utilities	Multi-Utilities	Germany	4.48%
TATE & LYLE PLC	Consumer	Food, Beverage	United Kingdom	4.42%

	Staples	& Tobacco		
WASTE MANAGEMENT INC	Industrials	Commercial & Professional Services	United States	4.10%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Energy	Oil, Gas & Consumable Fuels	36.40%
Consumer Staples	Food, Beverage & Tobacco	15.43%
Materials	Chemicals	14.15%
Utilities	Multi-Utilities	12.91%

<i>Materials</i>	<i>Paper &amp; Forest Products</i>	8.08%
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	8.04%
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	2.65%
<i>Industrials</i>	<i>Capital goods</i>	1.98%
<i>Others</i>	<i>Others</i>	0.00%
<i>Cash</i>	<i>Cash</i>	0.38%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

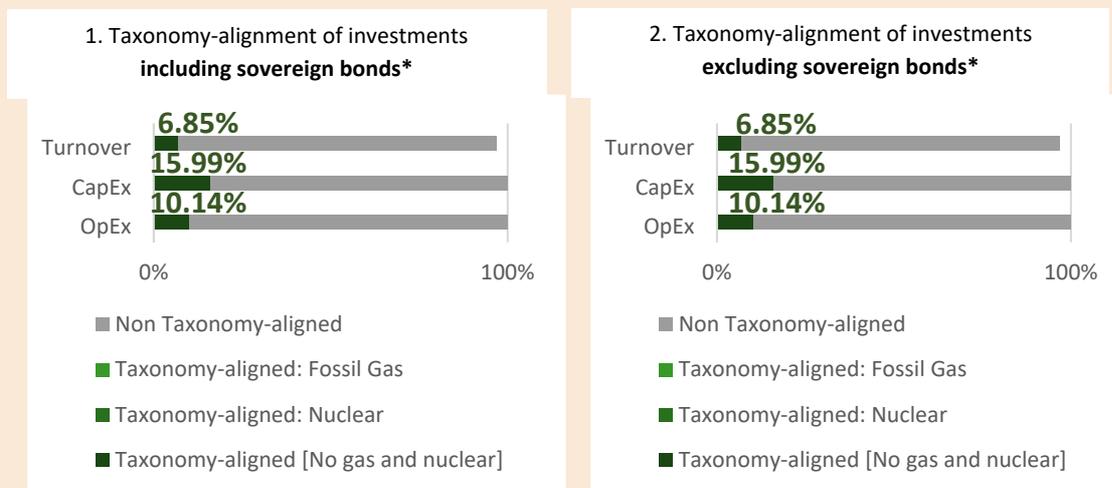

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.05% and the share of investment in enabling activities was 1.88%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.39%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **12.90%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 20.31%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

Bloomberg BioEnergy ESG Index is constructed to track the performance of companies that are expected to generate a meaningful portion of revenue from the production, storage, and distribution of ethanol, biodiesel, and renewable fuel. In addition, securities must meet certain minimum Environmental, Social or Governance (ESG) standards.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI SMART CITIES ESG SCREENED

Legal entity identifier: 5493004ZDNQO27QH8R39

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective: \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.22% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ACWI IMI Smart Cities ESG Filtered is 7.058
- the MSCI ACWI Investable Market Index (IMI) is 6.7

● **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
AXON ENTERPRISE INC	Industrials	Capital goods	United States	1.54%
CHECK POINT SOFT	Information Technology	Software & Services	Israel	1.41%
FORTINET INC	Information Technology	Software & Services	United States	1.40%
BROADCOM INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	1.36%
LENNOX INTERNATIONAL INC	Industrials	Capital goods	United States	1.36%
CARRIER GLOBAL CORP	Industrials	Capital goods	United States	1.35%
CYBERARK SOFTWARE LTD/ISRAEL	Information Technology	Software & Services	Israel	1.31%
SAMSARA INC	Information Technology	Software & Services	United States	1.30%
PENTAIR PLC	Industrials	Capital goods	Ireland	1.28%
ZEBRA TECHNOLOGIES	Information Technology	Technology Hardware & Equipment	United States	1.27%
VERIZON COMMUNICATIONS INC	Communication Services	Telecommunication	United States	1.25%
YAGEO CORPORATION	Information Technology	Technology Hardware & Equipment	Taiwan	1.23%
AAON INC	Industrials	Capital goods	United States	1.23%

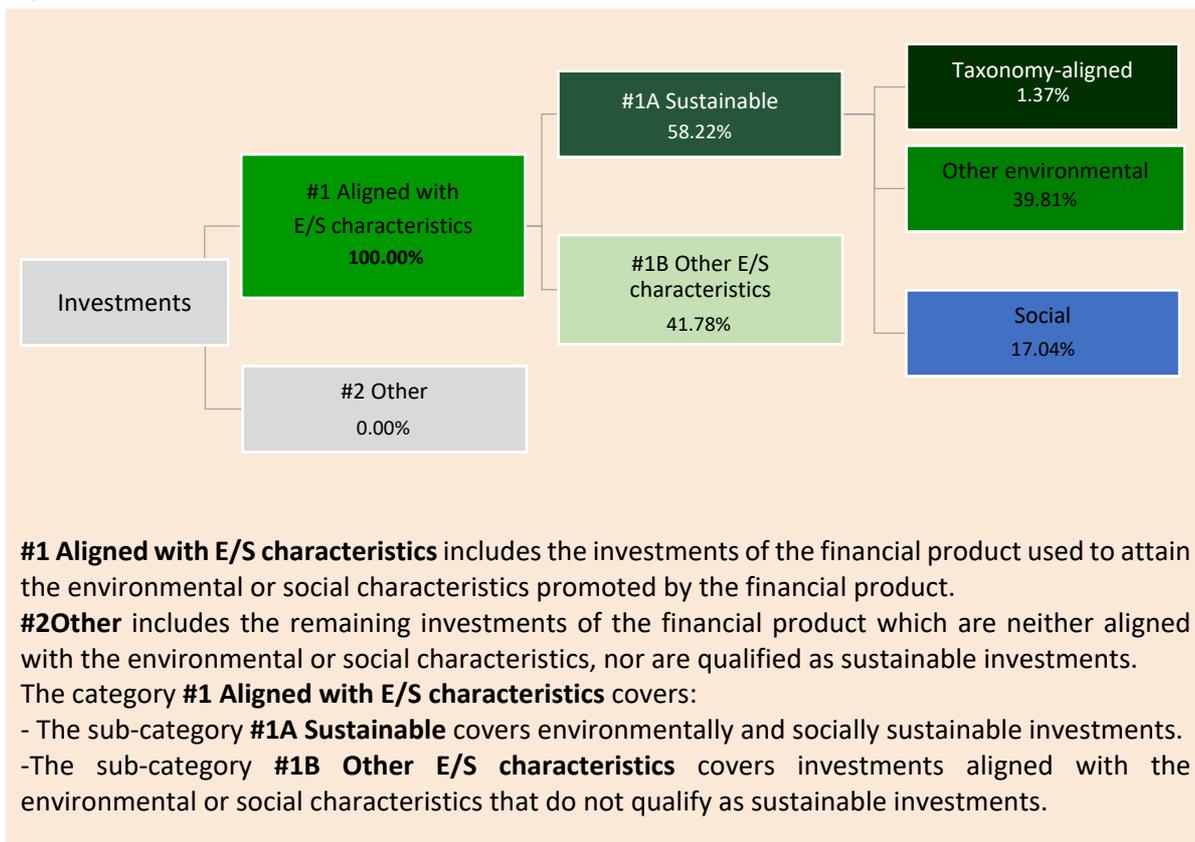

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

GEN DIGITAL INC	Information Technology	Software & Services	United States	1.21%
ABB LTD-REG	Industrials	Capital goods	Switzerland	1.21%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>41.41%</i>
<i>Information Technology</i>	<i>Software &amp; Services</i>	<i>17.96%</i>
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>16.84%</i>

<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	12.90%
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	3.74%
<i>Communication Services</i>	<i>Telecommunication</i>	3.73%
<i>Utilities</i>	<i>Water Utilities</i>	1.51%
<i>Utilities</i>	<i>Independent Power &amp; Renewable Electricity Producers</i>	0.89%
<i>Utilities</i>	<i>Multi-Utilities</i>	0.61%
<i>Materials</i>	<i>Paper &amp; Forest Products</i>	0.13%
<i>Others</i>	<i>Others</i>	0.00%
<i>Forex</i>	<i>Forex</i>	-0.01%
<i>Cash</i>	<i>Cash</i>	0.25%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.37% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

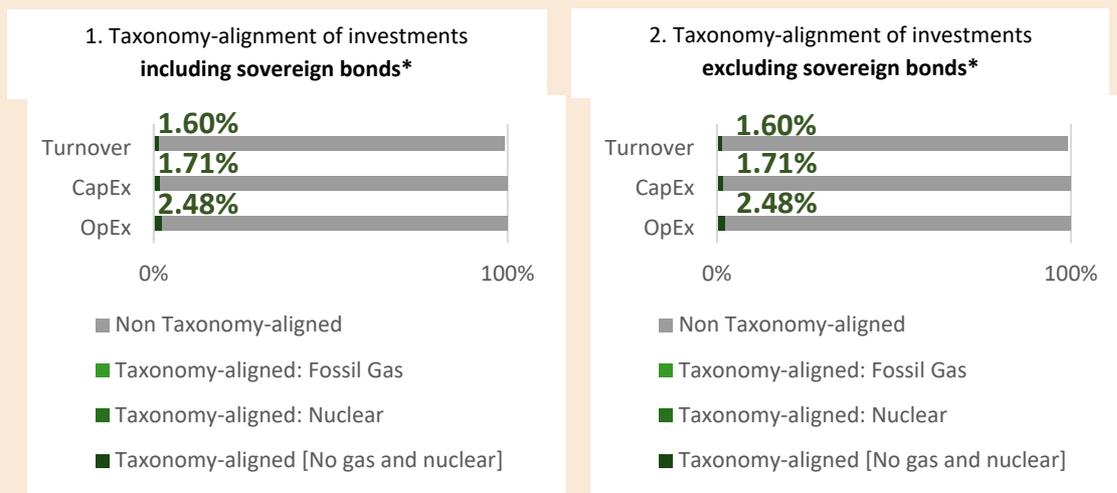

**Taxonomy-aligned activities** are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **39.81%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 17.04%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index aims to represent the performance of companies that are expected to derive significant revenues from activities associated with the development of new products and services focused on smart solutions for urban infrastructure and to exclude companies which are Environmental, Social and Governance ("ESG") laggards relative to the theme universe.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI  
ROBOTICS & AI ESG SCREENED

Legal entity identifier:  
54930038GH5HM293HY35

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46.56% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI ACWI IMI Robotics & AI ESG Filtered Net Total Return Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI ACWI IMI Robotics & AI ESG Filtered Net Total Return Index is 7.324
- the MSCI ESG score of the MSCI ACWI IMI ROBOTICS & AI Index is 6.837

● ***... and compared to previous periods?***

At the end of the previous period, the MSCI ESG score of the index was 7.332.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
ORACLE CORP	Information Technology	Software & Services	United States	4.45%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.14%
INTUITIVE SURGICAL INC	Health Care	Health Care Equipment & Services	United States	3.98%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.45% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

contribution to an environmental objective.

Yes:

In fossil gas       In nuclear energy

No

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

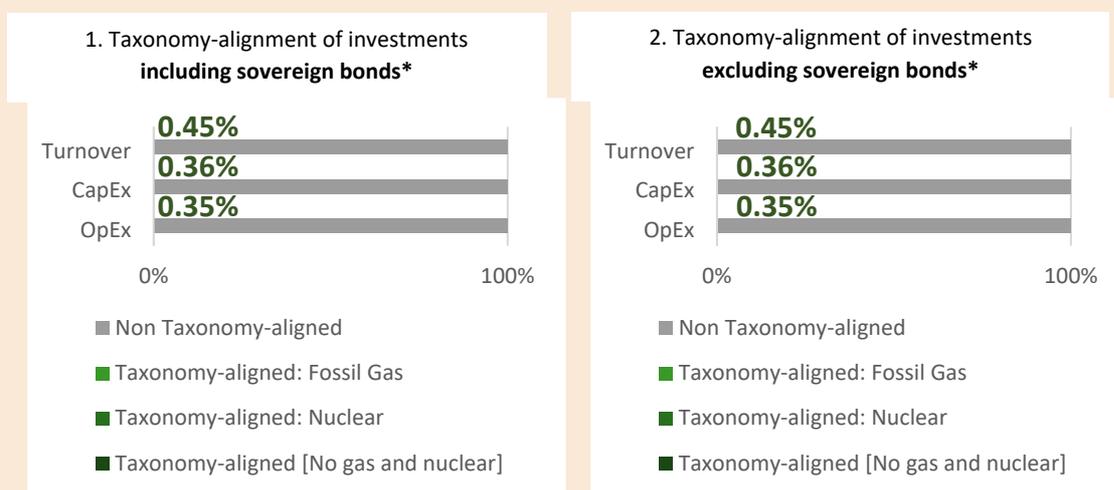

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.45%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.17%

are

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of sustainable investments with environmental objective not aligned to taxonomy was **29.35%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 16.76%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

#### **● How does the reference benchmark differ from a broad market index ?**

MSCI ACWI IMI Robotics & AI ESG Filtered Net Total Return Index is an equity index representative of the performance of companies associated with the increased adoption and utilization of artificial intelligence, robots and automation while excluding those involved in certain controversial businesses or with relatively low ESG controversies and ratings scores. It selects companies which are assessed to have high exposure to business activities such as: Robotics/ Artificial Intelligence, IoT/ Smart Homes, Cloud Computing, Cybersecurity, Medical Robotics, Social Media Automation, Vehicle Automation.

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

#### **● How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI INDEX MSCI EM ASIA SRI PAB

**Legal entity identifier:** 213800XKAFV6VIB4O832

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **65.94%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EM Asia SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI EM Asia SRI Filtered PAB Index (the "Index") is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI EM Asia SRI filtered PAB Index is 183.485.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI EM Asia Index is 570.066.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 225.575

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

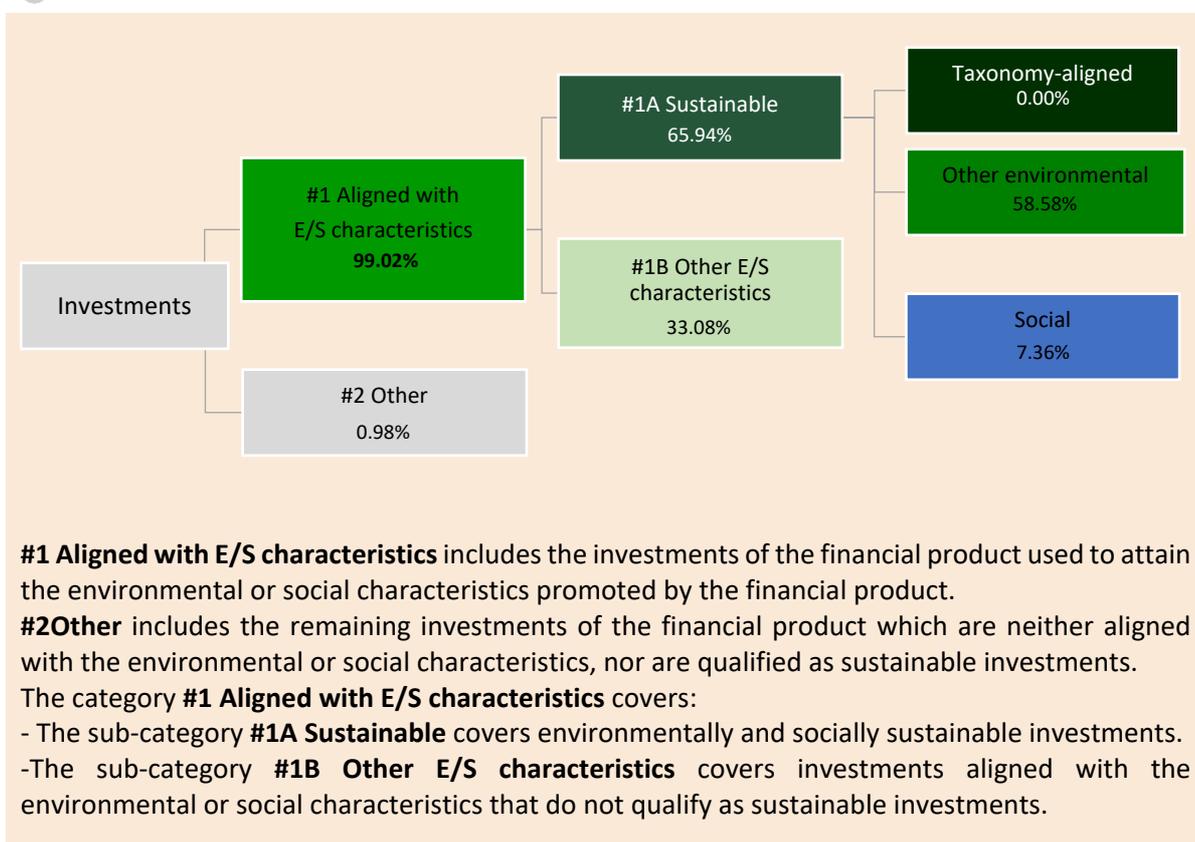

Largest Investments	Sector	Sub-Sector	Country	% Assets
MEITUAN-CLASS B	Consumer Discretionary	Consumer Services	Cayman Islands	6.23%
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	4.50%
INFOSYS LTD	Information Technology	Software & Services	India	4.10%
NETEASE INC	Communication Services	Media & Entertainment	Cayman Islands	3.86%
SK HYNIX INC	Information Technology	Semiconductors & Semiconductor Equipment	Korea	3.79%
DELTA ELECTRONICS INC	Information Technology	Technology Hardware & Equipment	Taiwan	3.54%
BYD CO LTD-H	Consumer Discretionary	Automobiles & Components	China	2.99%
HINDUSTAN UNILEVER	Consumer Staples	Household & Personal Products	India	2.65%
UNITED MICROELECTRONICS CORP	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	2.60%
MAHINDRA & MAHINDRA LTD	Consumer Discretionary	Automobiles & Components	India	2.51%
HCL	Information	Software &	India	2.07%

TECHNOLOGIES	Technology	Services		
AIRPORTS OF THAILAND PCL-FOREIGN	Industrials	Transportation	Thailand	1.83%
ASIAN PAINTS LTD	Materials	Chemicals	India	1.82%
CP ALL PCL-FOREIGN	Consumer Staples	Consumer Staples Distribution & Retail	Thailand	1.67%
NAVER CORP	Communication Services	Media & Entertainment	Korea	1.61%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Financials	Banks	11.73%

<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>10.89%</i>
<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	<i>9.02%</i>
<i>Consumer Discretionary</i>	<i>Consumer Services</i>	<i>8.19%</i>
<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	<i>7.71%</i>
<i>Information Technology</i>	<i>Software &amp; Services</i>	<i>6.32%</i>
<i>Communication Services</i>	<i>Media &amp; Entertainment</i>	<i>6.31%</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>5.02%</i>
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	<i>4.41%</i>
<i>Materials</i>	<i>Chemicals</i>	<i>4.19%</i>
<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	<i>3.90%</i>
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	<i>3.70%</i>
<i>Real Estate</i>	<i>Real Estate Management &amp; Development</i>	<i>3.57%</i>
<i>Financials</i>	<i>Insurance</i>	<i>2.97%</i>
<i>Industrials</i>	<i>Transportation</i>	<i>2.93%</i>
<i>Consumer Discretionary</i>	<i>Consumer Discretionary Distribution &amp; Retail</i>	<i>2.24%</i>
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	<i>1.70%</i>

<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	<i>1.46%</i>
<i>Materials</i>	<i>Metals &amp; Mining</i>	<i>0.95%</i>
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	<i>0.88%</i>
<i>Utilities</i>	<i>Independent Power &amp; Renewable Electricity Producers</i>	<i>0.59%</i>
<i>Communication Services</i>	<i>Telecommunication</i>	<i>0.53%</i>
<i>Utilities</i>	<i>Water Utilities</i>	<i>0.38%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.41%</i>

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

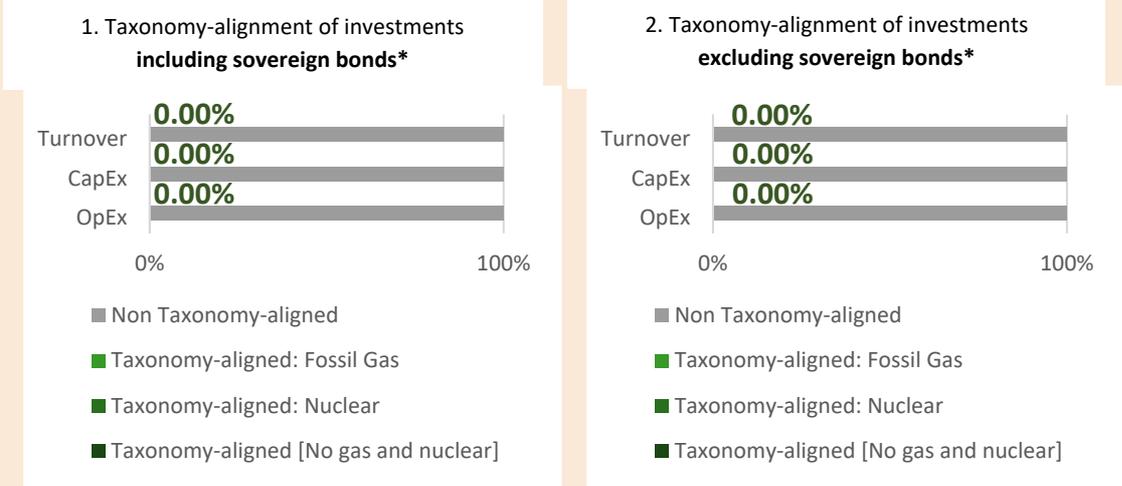

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **58.58%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 7.36%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI EM Asia SRI Filtered PAB Index is an equity index based on the MSCI Emerging Markets (EM) Asia index representative of the large and mid-cap stocks across 9 Asian emerging market countries (as of November 2021) (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI EMERGING MARKETS SRI PAB

Legal entity identifier: 549300GISPIIUMKTYR80

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.79%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EM (Emerging Markets) SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI EM (Emerging Markets) SRI Filtered PAB Index is 199.767
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Emerging Markets Index ("Parent Index") is 594.114

● ***... and compared to previous periods?***

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 253.112

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

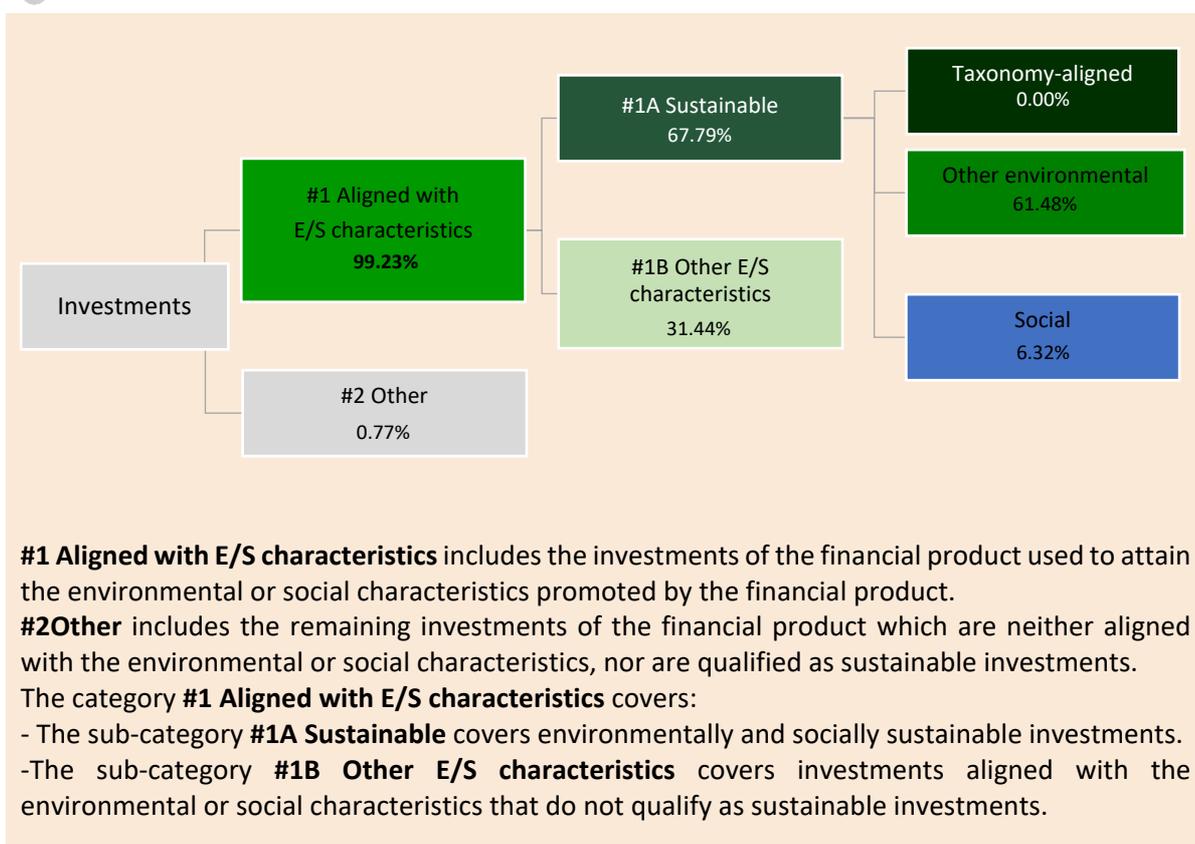

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
MEITUAN-CLASS B	Consumer Discretionary	Consumer Services	Cayman Islands	5.50%
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	4.58%
INFOSYS LTD	Information Technology	Software & Services	India	4.56%
SK HYNIX INC	Information Technology	Semiconductors & Semiconductor Equipment	Korea	4.03%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

 **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

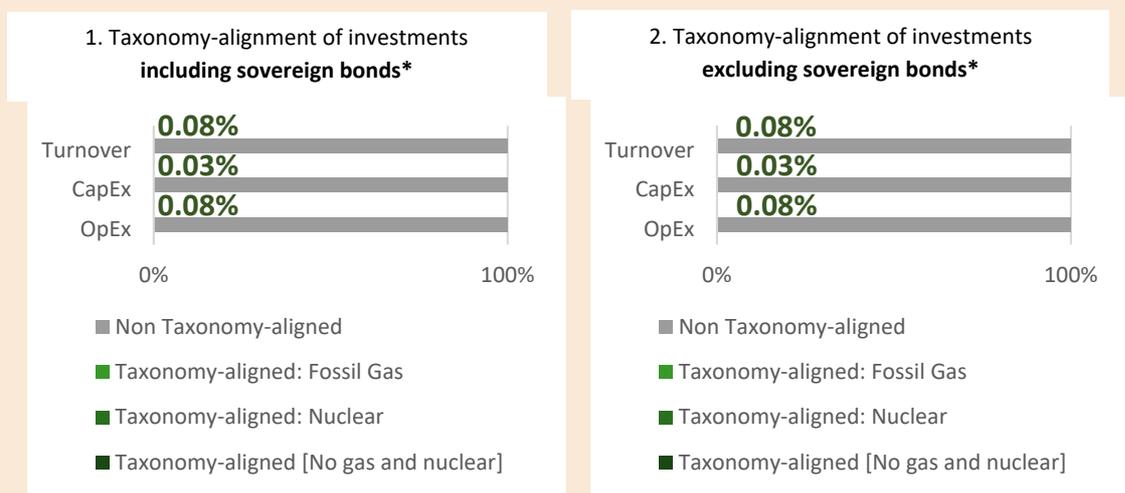

**Taxonomy-aligned activities** are expressed as a share of:

**-turnover** reflecting the share of revenue from green activities of investee companies

**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.07%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **61.48%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

● **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 6.32%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

**How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

**How does the reference benchmark differ from a broad market index ?**

MSCI EM (Emerging Markets) SRI Filtered PAB Index is an equity index based on the MSCI Emerging Markets index representative of the large and mid-cap stocks across 27 emerging countries (as of November 2021) (the Parent Index). The index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

**How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

**How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI  
EMU SRI PAB

Legal entity identifier:  
2138002M8JUPUVNSJT429

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of **91.08%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EMU SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI EMU SRI Filtered PAB Index is 198.488
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI EMU Index (the "Parent Index") is 499.751

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 204.052

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

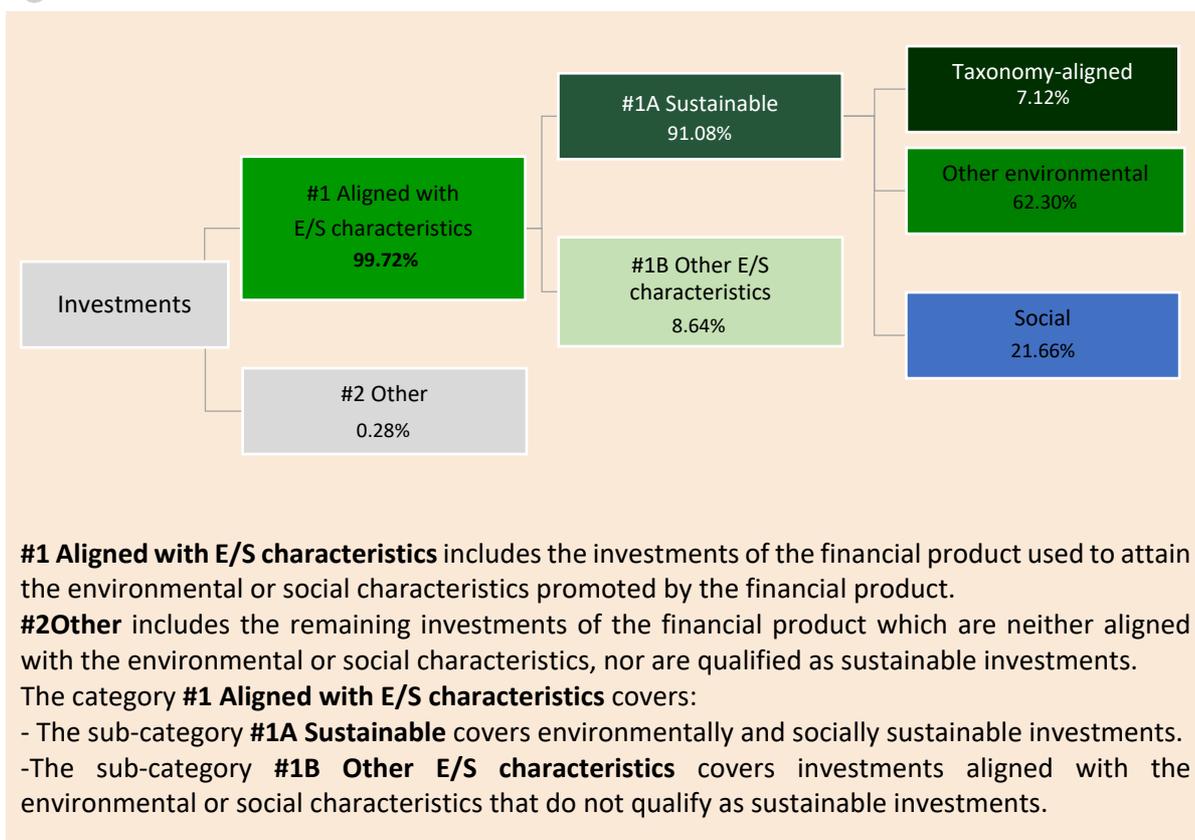

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
SCHNEIDER ELECT SE	Industrials	Capital goods	France	5.03%
NOKIA OYJ	Information Technology	Technology Hardware & Equipment	Finland	5.01%
HERMES INTERNATIONAL	Consumer Discretionary	Consumer Durables & Apparel	France	4.78%

<i>Real Estate</i>	<i>Real Estate Management &amp; Development</i>	<i>0.64%</i>
<i>Consumer Discretionary</i>	<i>Consumer Discretionary Distribution &amp; Retail</i>	<i>0.61%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.28%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 7.12% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

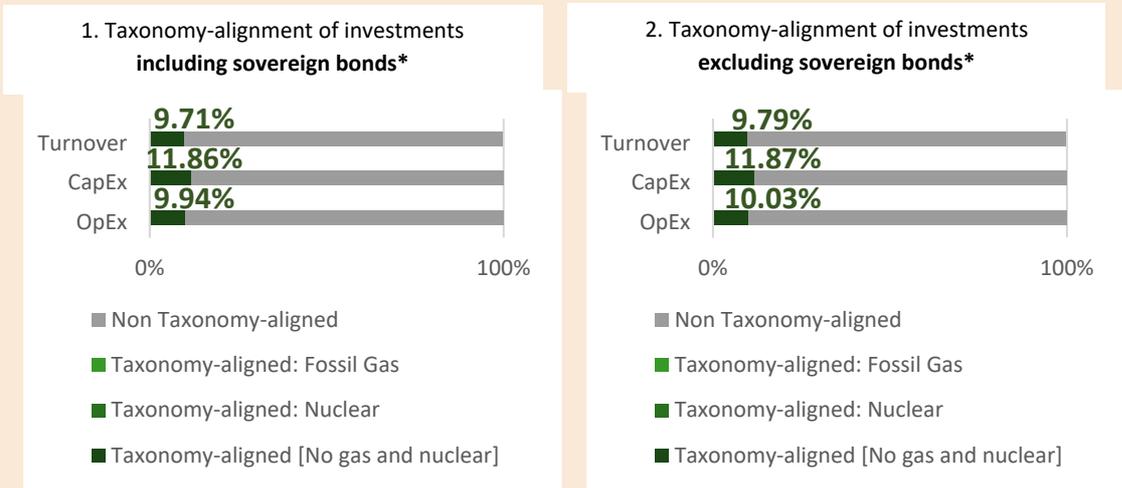

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.07% and the share of investment in enabling activities was 7.54%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 5.19%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **62.30%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 21.66%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI EMU SRI Filtered PAB Index is an equity index based on the MSCI EMU index representative of the large and mid-cap stocks across 10 developed market countries in the European Economic and Monetary Union (as of November 2021) (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI EUROPE SRI PAB

Legal entity identifier: 549300T9XW2XYJW1RS43

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **86.76%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Europe SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Europe SRI Filtered PAB Index (the Index") is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI Europe SRI filtered PAB Index is 144.804.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Europe Index is 484.855.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 193.41

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

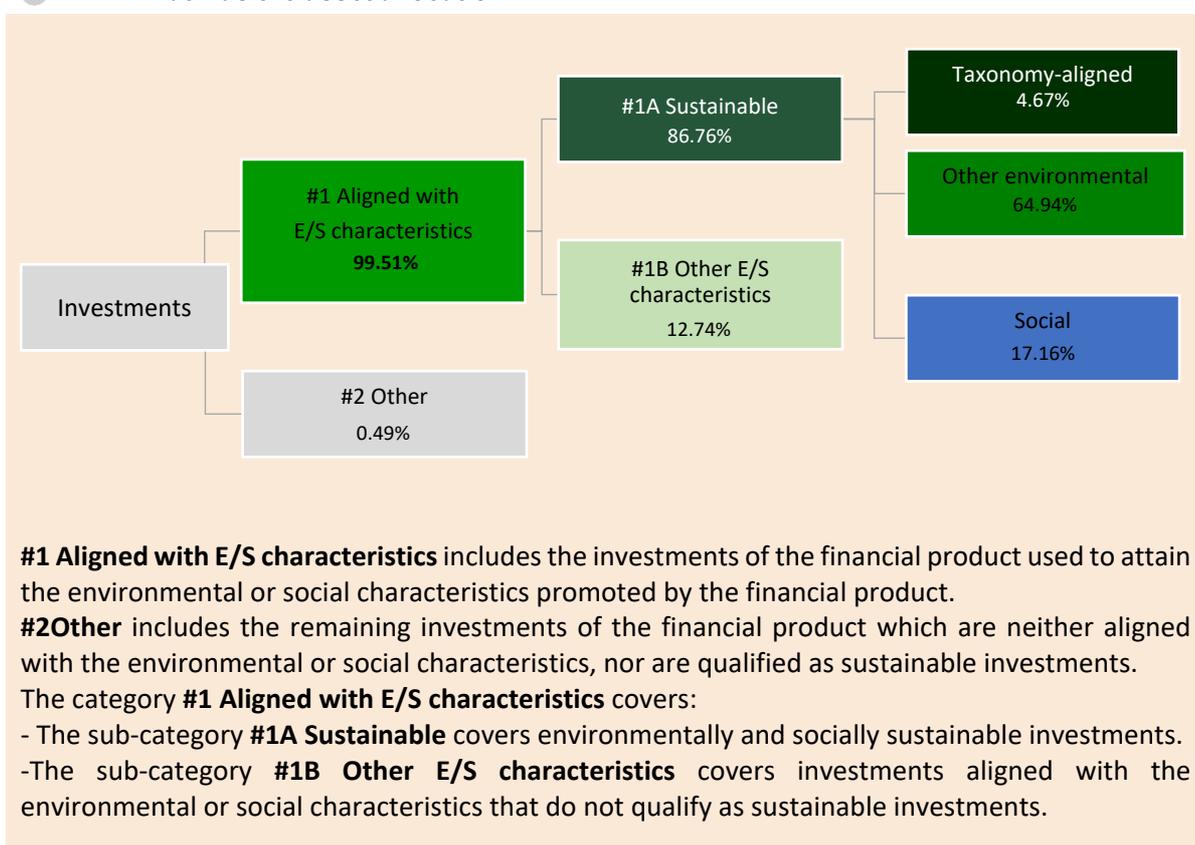

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
SCHNEIDER ELECT SE	Industrials	Capital goods	France	5.10%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	4.34%
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotech & Life Sciences	Denmark	4.21%
L OREAL PRIME FID	Consumer Staples	Household & Personal Products	France	4.20%
ALCON INC - CHF	Health Care	Health Care Equipment & Services	Switzerland	3.47%

<i>Cash</i>	<i>Cash</i>	<i>0.49%</i>

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.67% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by

the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

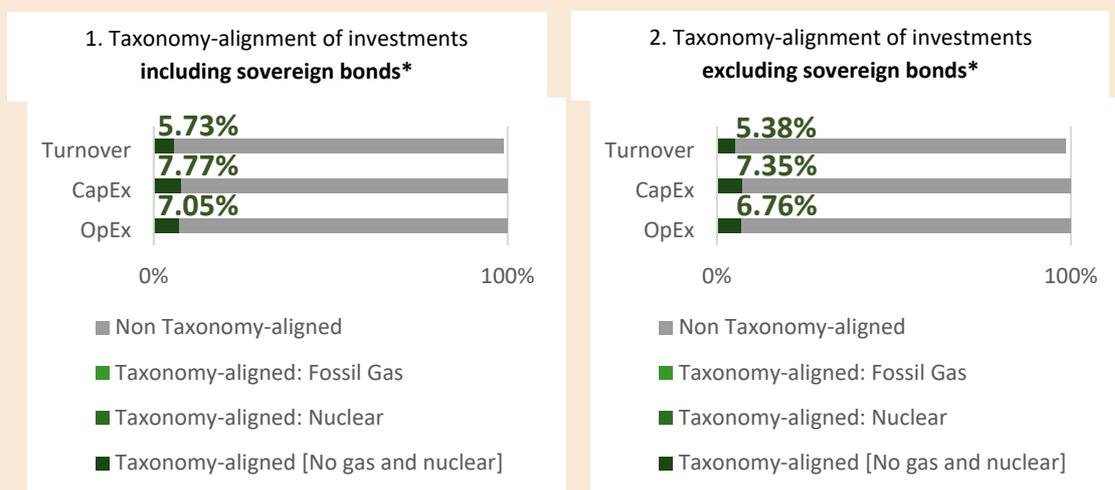

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 4.73%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 4.44%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **64.94%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 17.16%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI Europe SRI Filtered PAB Index is an equity index based on the MSCI Europe index representative of the large and mid-cap stocks across 15 developed market countries in Europe (as of November 2021) (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI JAPAN SRI PAB

Legal entity identifier: 2138007H5QEZTOGC4B22

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **62.15%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EM Asia SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Japan SRI Filtered PAB Index (the "Index") is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI JAPAN SRI filtered PAB Index is 216.9.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Japan Index is 577.279.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 270.007

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

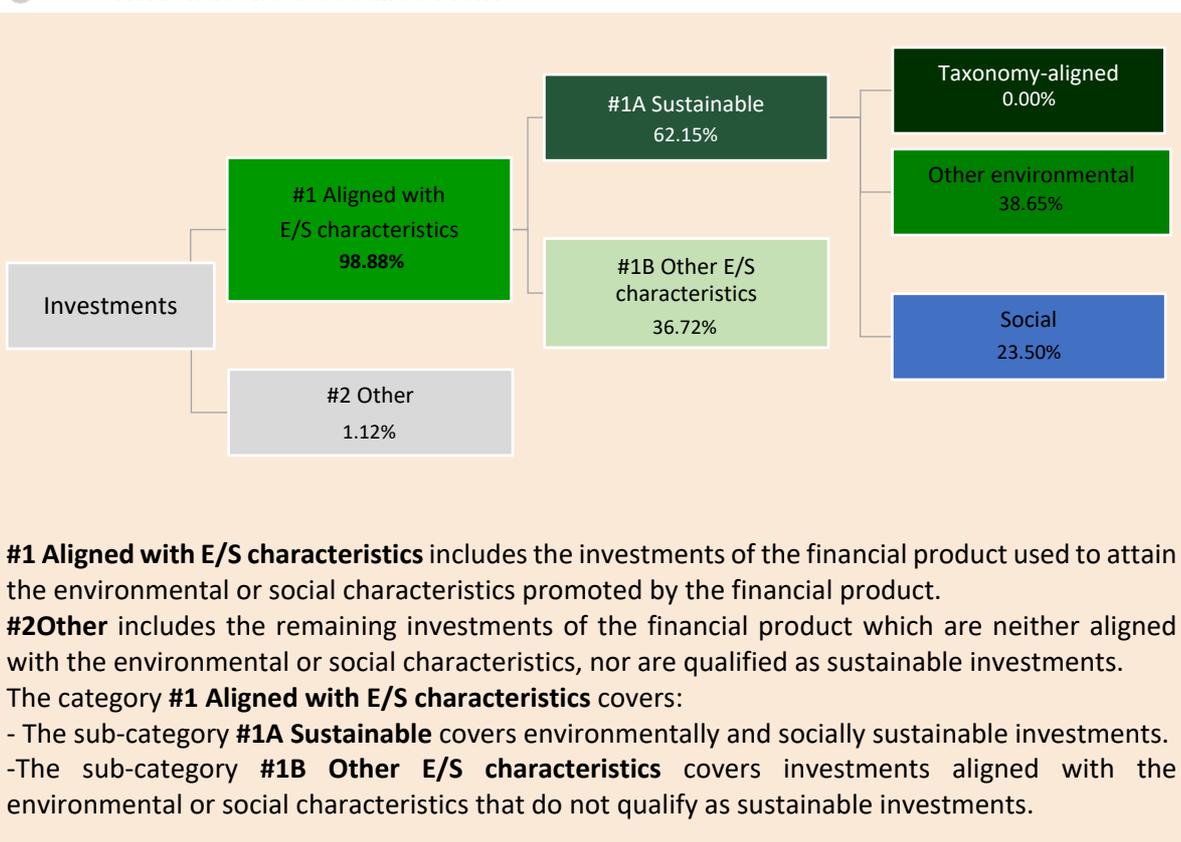

Largest Investments	Sector	Sub-Sector	Country	% Assets
SONY GROUP CORP (JT)	Consumer Discretionary	Consumer Durables & Apparel	Japan	5.22%
HOYA CORP	Health Care	Health Care Equipment & Services	Japan	5.02%
FANUC CORP	Industrials	Capital goods	Japan	5.02%
TOKIO MARINE HOLDINGS INC	Financials	Insurance	Japan	4.63%
SUMITOMO MITSUI FINAN	Financials	Banks	Japan	4.24%
ASTELLAS PHARMA INC	Health Care	Pharmaceuticals Biotech & Life Sciences	Japan	4.19%
ORIENTAL LAND CO LTD	Consumer Discretionary	Consumer Services	Japan	4.19%
RENESAS ELECTRONICS CORP	Information Technology	Semiconductors & Semiconductor Equipment	Japan	4.17%
MITSUI FUDOSAN	Real Estate	Real Estate Management & Development	Japan	4.12%
KDDI CORP	Communication Services	Telecommunication	Japan	3.59%
UNICHARM CORP	Consumer Staples	Household & Personal	Japan	3.41%

		Products		
AEON CO LTD	Consumer Staples	Consumer Staples Distribution & Retail	Japan	3.35%
SYSMEX CORPORATION	Health Care	Health Care Equipment & Services	Japan	3.16%
ZOZO INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Japan	3.06%
HANKYU HANSHIN HGS	Industrials	Transportation	Japan	2.93%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Industrials	Capital goods	13.48%

<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	8.18%
<i>Industrials</i>	<i>Transportation</i>	8.13%
<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	7.85%
<i>Financials</i>	<i>Insurance</i>	6.70%
<i>Communication Services</i>	<i>Telecommunication</i>	6.09%
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	5.73%
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	4.91%
<i>Financials</i>	<i>Banks</i>	4.24%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	4.19%
<i>Consumer Discretionary</i>	<i>Consumer Services</i>	4.19%
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	4.17%
<i>Real Estate</i>	<i>Real Estate Management &amp; Development</i>	4.12%
<i>Information Technology</i>	<i>Software &amp; Services</i>	4.09%
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	3.41%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

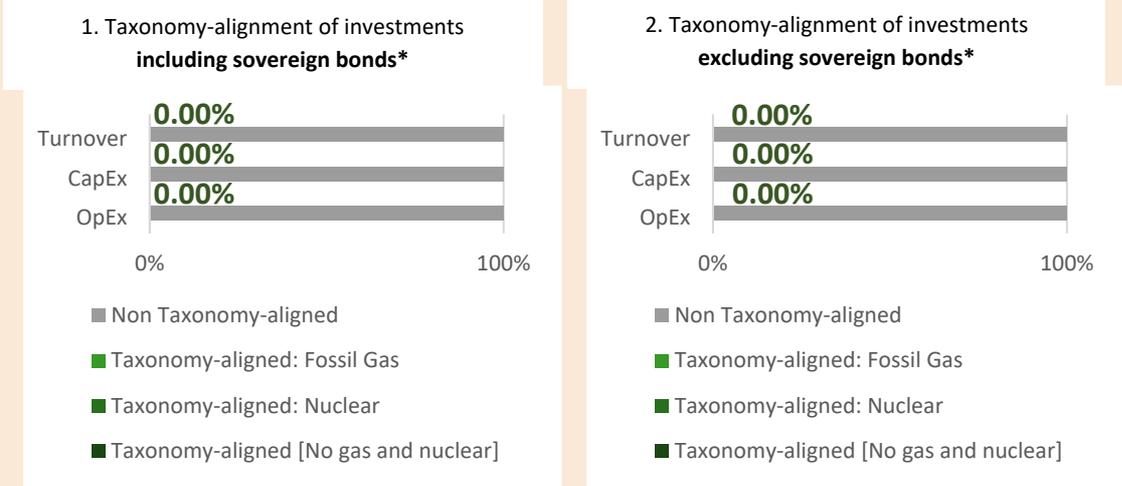

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **38.65%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 23.50%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI Japan SRI Filtered PAB Index is an equity index based on the MSCI Japan index representative of the large and mid-cap stocks of Japanese market (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI PACIFIC EX JAPAN SRI PAB

Legal entity identifier: 22210085PY3LW5RGLP55

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 75.47% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EM Asia SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Pacific ex Japan SRI Filtered PAB Index (the "Index") is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the regional indexes that make up the Pare

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI Pacific ex Japan SRI filtered PAB Index is 180.503.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Pacific ex Japan Index is 523.492.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 188.107

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

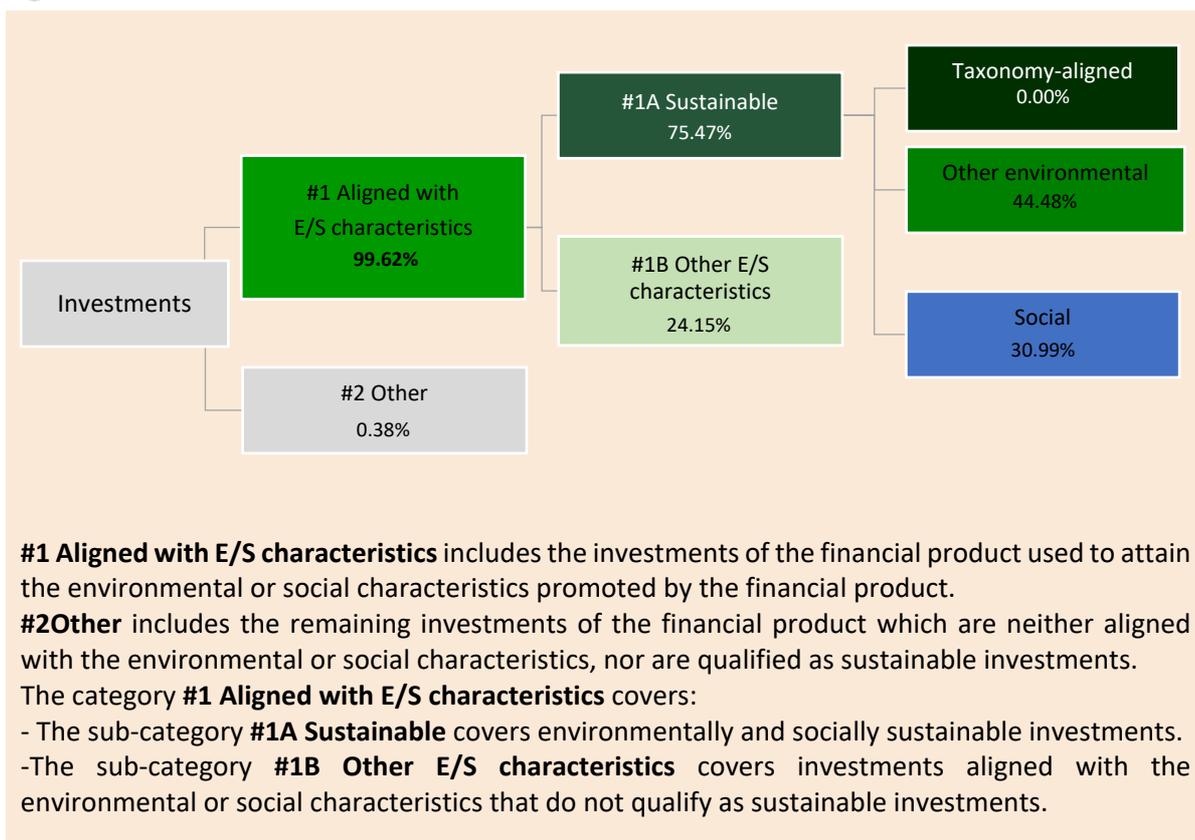

Largest Investments	Sector	Sub-Sector	Country	% Assets
WISETECH GLOBAL LTD	Information Technology	Software & Services	Australia	6.73%
AIA GROUP LTD	Financials	Insurance	Hong Kong	6.03%
BRAMBLES LTD	Industrials	Commercial & Professional Services	Australia	5.62%

<i>Forex</i>	<i>Forex</i>	-0.01%
<i>Cash</i>	<i>Cash</i>	0.39%

To comply with the EU Taxonomy, the criteria for **fossil gas**

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

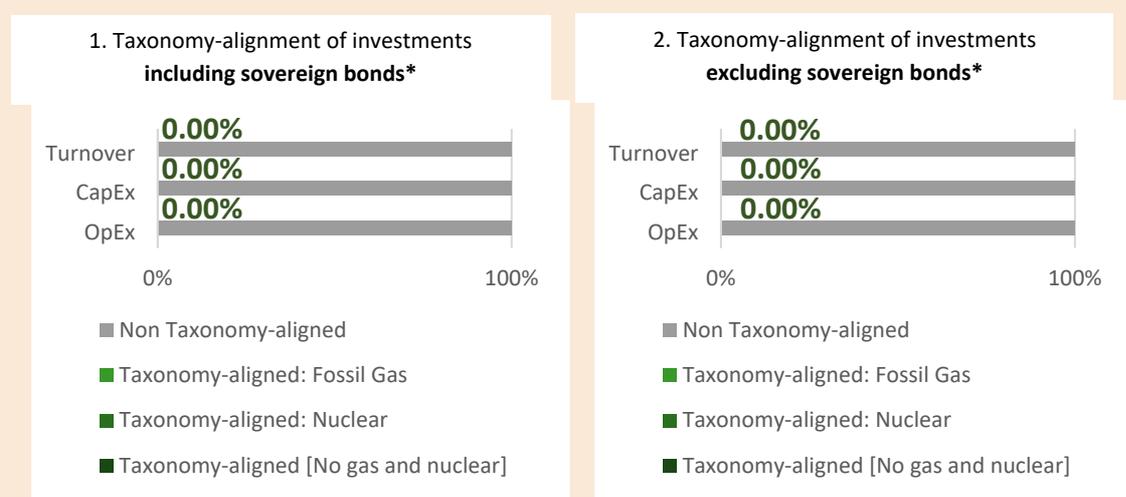

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **44.48%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 30.99%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI Pacific ex Japan SRI Filtered PAB Index is an equity index based on the MSCI Pacific ex Japan index representative of the large and mid-cap stocks across 4 of 5 developed markets countries of the Pacific region, excluding Japan (as of November 2021) (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI USA SRI PAB

Legal entity identifier: 549300W0L1QTBIEUXI22

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **58.46%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI USA SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

-Scope 2 emissions: those caused by the generation of electricity purchased by the company.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

-Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI USA SRI Filtered PAB Index is 73.932

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI USA index (the "Parent Index") is 234.86

● ***... and compared to previous periods?***

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 97.915

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
MICROSOFT CORP	Information Technology	Software & Services	United States	4.42%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.33%
TEXAS INSTRUMENTS	Information Technology	Semiconductors & Semiconductor Equipment	United States	3.86%
ADOBE INC	Information Technology	Software & Services	United States	3.76%
HOME DEPOT INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	United States	3.72%
DANAHER CORP	Health Care	Pharmaceuticals Biotech & Life Sciences	United States	2.59%
INTUIT INC	Information Technology	Software & Services	United States	2.34%
APPLIED MATERIALS INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	2.23%
VERIZON COMMUNICATIONS INC	Communication Services	Telecommunication	United States	2.15%
WALT DISNEY CO/THE	Communication Services	Media & Entertainment	United States	2.11%
INTEL CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	1.85%

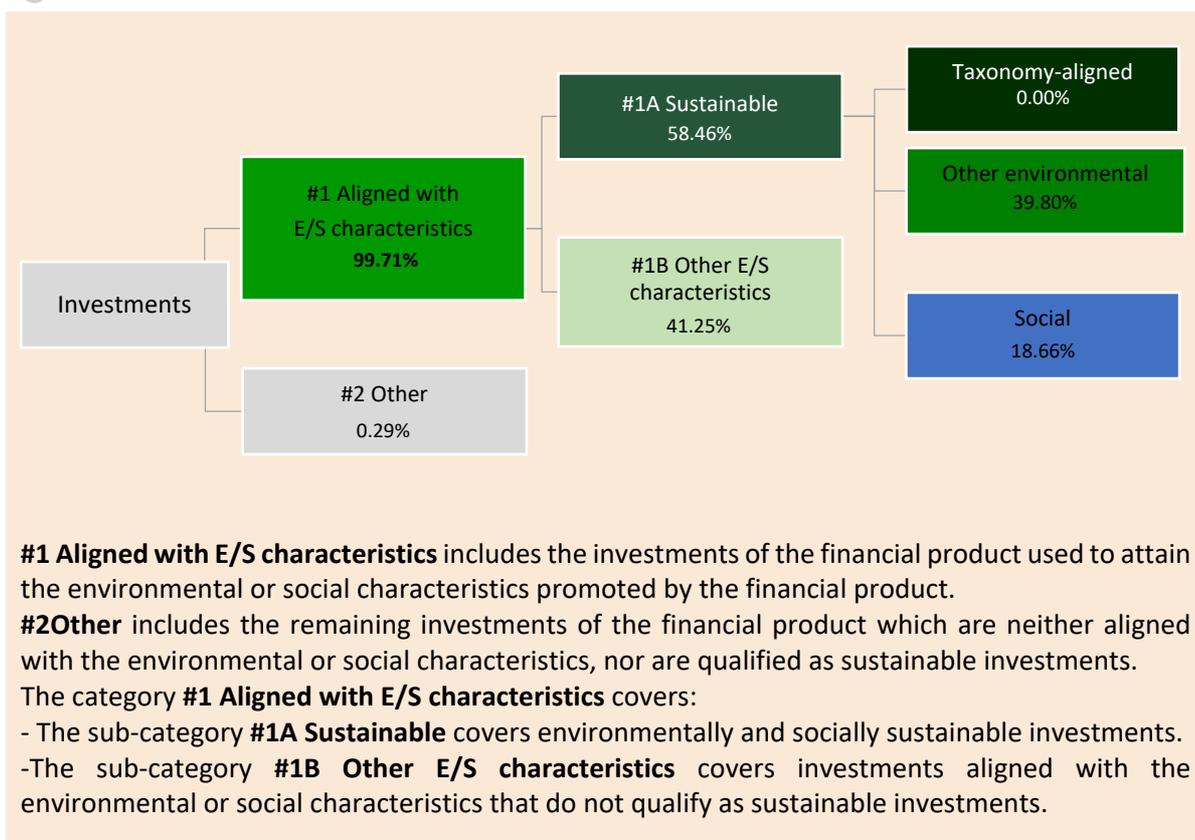

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

AMERICAN WATER WORKS	Utilities	Water Utilities	United States	1.54%
S&P GLOBAL INC	Financials	Financial Services	United States	1.51%
WELLTOWER INC	Real Estate	REITs	United States	1.51%
AMERICAN TOWER CL A	Real Estate	REITs	United States	1.49%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	14.87%
Information Technology	Software & Services	11.41%
Industrials	Capital goods	10.70%

<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	<i>10.58%</i>
<i>Financials</i>	<i>Financial Services</i>	<i>8.29%</i>

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

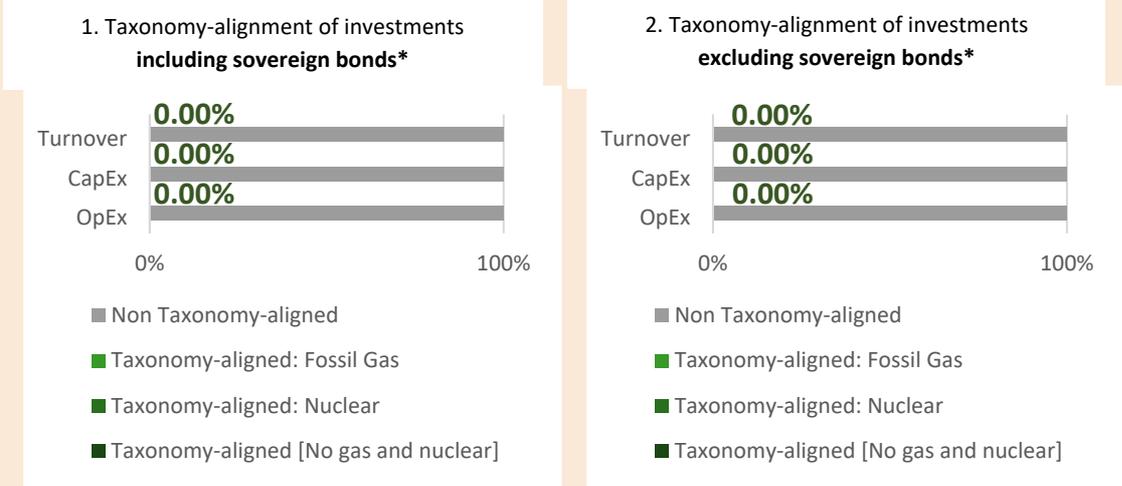

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **39.80%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 18.66%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI USA SRI Filtered PAB Index is an equity index based on the MSCI USA index representative of the large and mid-cap stocks of the US market (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI  
WORLD SRI PAB

Legal entity identifier:  
54930067TT873B9E5C67

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of **67.30%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI World SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI World SRI Filtered PAB Index is 112.656
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI World Index (the "Parent Index") is 314.281

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 142.355

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
TESLA INC	Consumer Discretionary	Automobiles & Components	United States	4.61%
MICROSOFT CORP	Information Technology	Software & Services	United States	4.50%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.33%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	3.42%
HOME DEPOT INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	United States	2.39%

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.88% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by

the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

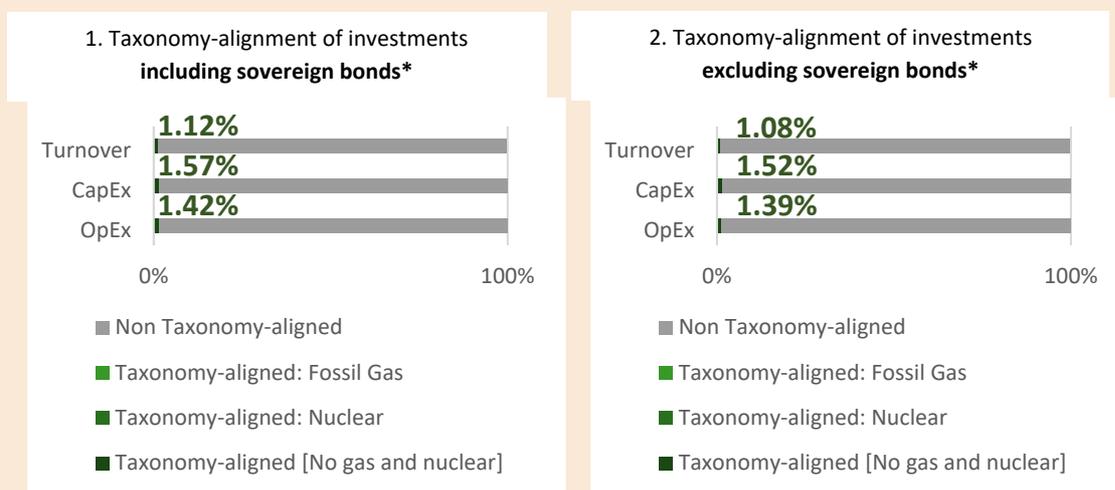

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.93%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 1.04%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **47.93%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 18.49%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

**How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI World SRI Filtered PAB Index is an equity index based on the MSCI World index representative of the large and mid-cap stocks across 23 developed market countries (as of November 2021) (the Parent Index). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI UK IMI SRI PAB

Legal entity identifier: 222100W4JS565M7W3C88

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.77%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI UK IMI SRI Filtered PAB Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI UK IMI SRI Filtered PAB Index (the "Index") is constructed by applying a combination of values based exclusions and a best-in-class selection process to companies in the Parent Index and to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI UK IMI SRI filtered PAB Index is 199.453.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI UK IMI Index is 703.796.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 252.534

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

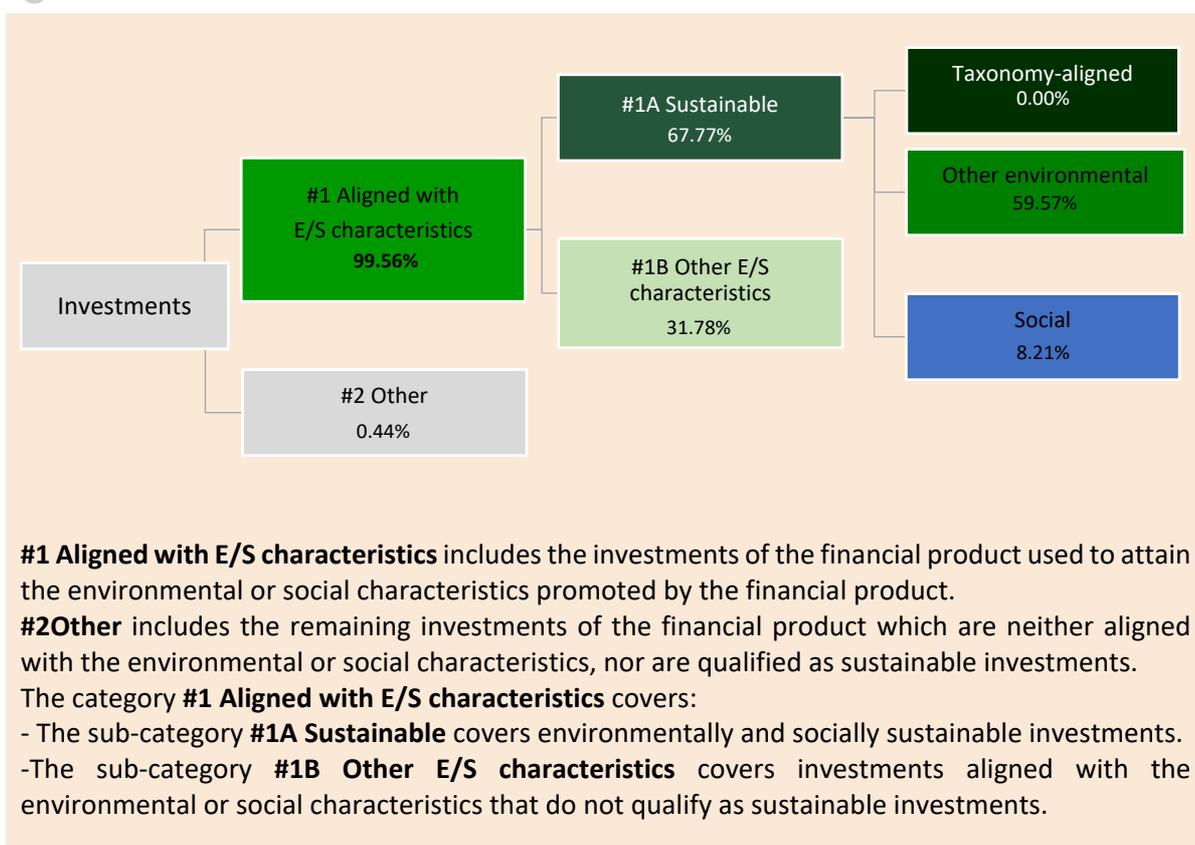

Largest Investments	Sector	Sub-Sector	Country	% Assets
RELX PLC	Industrials	Commercial & Professional Services	United Kingdom	4.93%
SMITH & NEPHEW PLC	Health Care	Health Care Equipment & Services	United Kingdom	4.88%
LLOYDS BANKING GROUP PLC	Financials	Banks	United Kingdom	4.43%
ASTRAZENECA GBP	Health Care	Pharmaceuticals Biotech & Life Sciences	United Kingdom	4.37%
RECKITT BENCKISER GROUP PLC	Consumer Staples	Household & Personal Products	United Kingdom	4.32%
HALEON PLC	Consumer Staples	Household & Personal Products	United Kingdom	3.99%
BARCLAYS PLC	Financials	Banks	United Kingdom	3.79%
3I GROUP PLC	Financials	Financial Services	United Kingdom	3.44%
SSE PLC	Utilities	Electric Utilities	United Kingdom	3.33%
CONVATEC GROUP PLC	Health Care	Health Care Equipment & Services	United Kingdom	3.19%
NEXT PLC	Consumer Discretionary	Consumer Discretionary Distribution &	United Kingdom	2.36%

		Retail		
NATWEST GROUP PLC	Financials	Banks	United Kingdom	2.33%
STANDARD CHARTERED PLC	Financials	Banks	United Kingdom	2.08%
HALMA PLC	Information Technology	Technology Hardware & Equipment	United Kingdom	1.98%
ANTOFAGASTA PLC	Materials	Metals & Mining	United Kingdom	1.73%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Financials	Banks	12.66%
Industrials	Capital goods	8.76%

<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	8.69%
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	8.60%
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	6.91%
<i>Consumer Discretionary</i>	<i>Consumer Discretionary Distribution &amp; Retail</i>	5.86%
<i>Real Estate</i>	<i>REITs</i>	5.70%
<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	5.54%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	5.33%
<i>Financials</i>	<i>Financial Services</i>	4.93%
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	3.82%
<i>Financials</i>	<i>Insurance</i>	3.75%
<i>Utilities</i>	<i>Electric Utilities</i>	3.33%
<i>Materials</i>	<i>Metals &amp; Mining</i>	3.11%
<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	2.54%
<i>Consumer Discretionary</i>	<i>Consumer Services</i>	1.74%
<i>Materials</i>	<i>Chemicals</i>	1.69%
<i>Communication Services</i>	<i>Media &amp; Entertainment</i>	1.52%
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	1.48%

<i>Information Technology</i>	<i>Software &amp; Services</i>	<i>0.85%</i>
<i>Communication Services</i>	<i>Telecommunication</i>	<i>0.73%</i>

<i>Materials</i>	<i>Containers &amp; Packaging</i>	<i>0.55%</i>
<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	<i>0.20%</i>
<i>Materials</i>	<i>Construction Materials</i>	<i>0.04%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.45%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

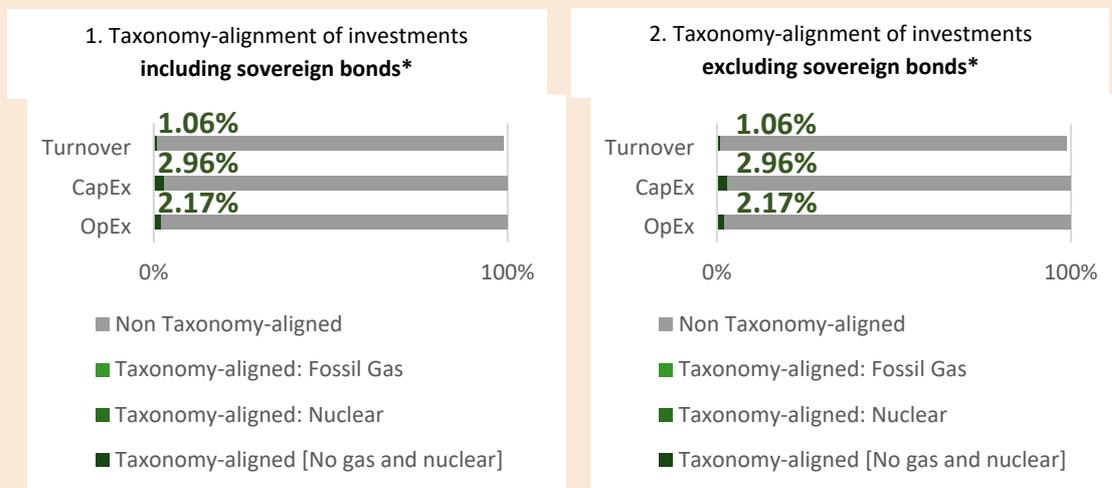

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **59.57%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 8.21%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI UK IMI SRI Filtered PAB Index is an equity index based on the MSCI United Kingdom IMI Index representative of the large, mid and small-cap securities of the UK market (Parent Index). The Index provides exposure to companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI DAX 50 ESG

Legal entity identifier:  
213800TB2ROJ7LC3AT12

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **68.35%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, the DAX 50 ESG. This tracks the performance of the 50 largest stocks that have comparably good performance based on their Environmental, Social and Governance criteria. The Index is composed of securities included in the HDAX index which is representative of the large and medium-sized companies traded on the German equity market and having their legal or operating headquarter located in Germany. The HDAX universe is the joint set of companies included in the DAX (Germany's blue-chip index tracking the performance of the 40 largest companies on the German stock market in terms of market capitalization and turnover rate), the MDAX (comprising the 50 next-largest companies after the DAX in terms of market capitalization and turnover) and the TecDAX (comprising the 30 largest and most liquid tech securities in terms of market capitalization and turnover) indexes. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and

sectorials) as further described in Amundi Responsible Investment policy.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

The Sustainalytics ESG Risk Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. The Sustainalytics ESG Risk Ratings measures a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. Exposure refers to the extent to which a company is exposed to different material ESG issues.

It takes into consideration subindustry and company-specific factors such as its business model. Management refers to how well a company is managing its relevant ESG issues. It assesses the robustness of a company's ESG programs, practices and policies.

More precisely, DAX 50 ESG Index (the "Index") is constructed from all stocks included in the HDAX Index.

- At the end of the period, the Sustainalytics ESG Risk Rating of the index DAX 50 ESG+ Index is 77.81.
- At the end of the period, the Sustainalytics ESG Risk Rating of the parent index HDAX Index is 76.67.

- ***... and compared to previous periods?***

The previous period Sustainalytics ESG rating of the index was 76.14

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion :** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement :** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote :** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring :** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

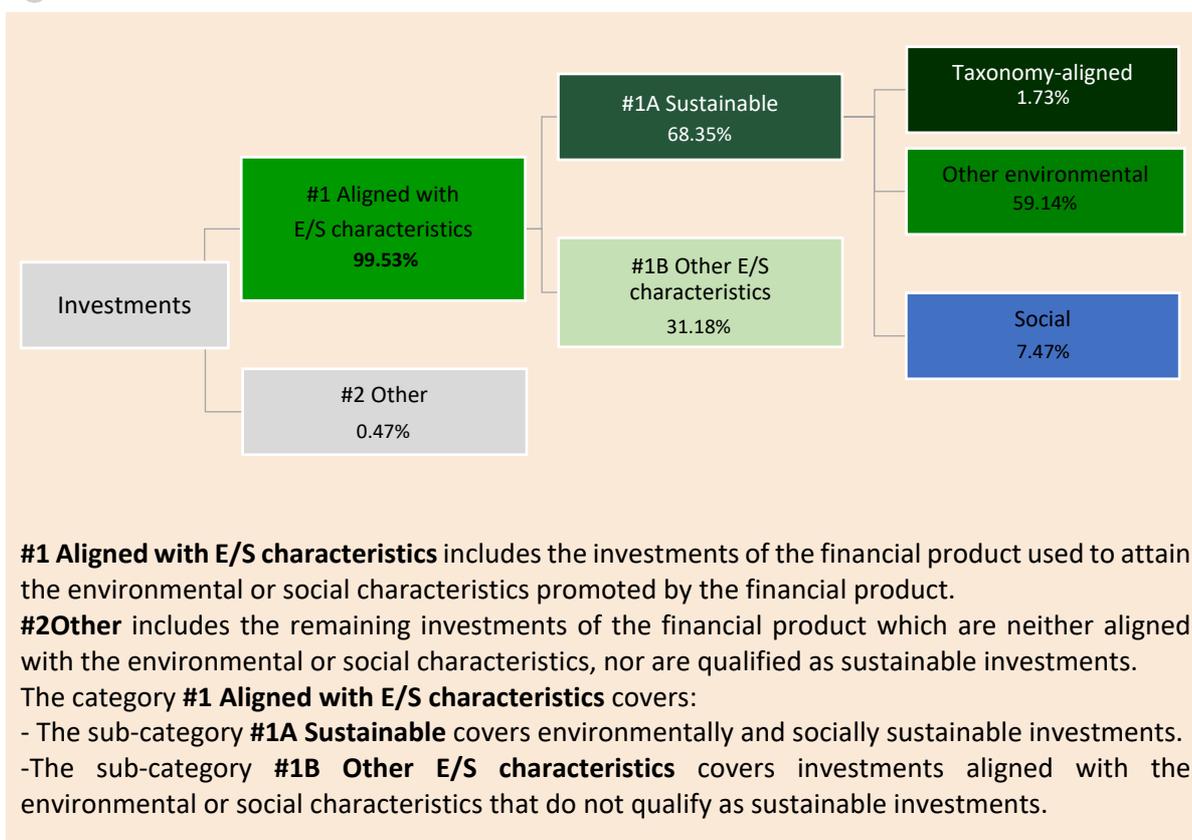

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
SIEMENS AG-REG	Industrials	Capital goods	Germany	7.31%
ALLIANZ SE-REG	Financials	Insurance	Germany	6.86%
SAP SE / XETRA	Information Technology	Software & Services	Germany	6.80%
MUENCHENER RUECKVER AG-REG	Financials	Insurance	Germany	6.77%
DEUTSCHE TELEKOM NAM (XETRA)	Communication Services	Telecommunication	Germany	6.58%
BASF SE XETRA	Materials	Chemicals	Germany	4.55%
INFINEON TECHNOLOGIES AG	Information Technology	Semiconductors & Semiconductor Equipment	Germany	4.40%
MERCEDES-BENZ GROUP AG	Consumer Discretionary	Automobiles & Components	Germany	4.38%

<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.47%</i>

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.73% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?***

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

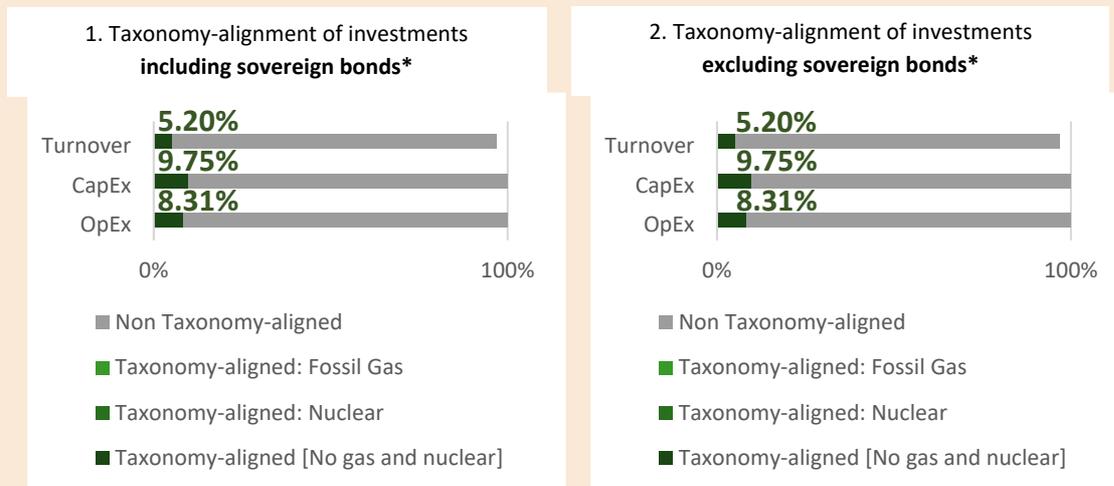

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 4.26%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 2.14%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **59.14%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 7.47%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The DAX 50 ESG tracks the performance of the 50 largest stocks that have comparably good performance based on their Environmental, Social and Governance criteria. The Index is composed of securities included in the HDAX index which is representative of the large and medium-sized companies traded on the German equity market and having their legal or operating headquarter located in Germany. The HDAX universe is the joint set of companies included in the DAX (Germany's blue-chip index tracking the performance of the 40 largest companies on the German stock market in terms of market capitalization and turnover rate), the MDAX (comprising the 50 next-largest companies after the DAX in terms of market capitalization and turnover) and the TecDAX (comprising the 30 largest and most liquid tech securities in terms of market capitalization and turnover) indexes.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MDAX ESG

Legal entity identifier:  
213800YZZ7KZKF3GHS38

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.69%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (The MDAX ESG+ index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The ISS ESG Corporate Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. The ISS ESG Corporate Rating provides relevant and forward-looking environmental, social, and governance (ESG) data and performance assessments. Rooted in a holistic understanding of materiality, companies are

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

assessed against a standard set of universal ESG topics as well as additional industry-specific topics. The materiality approach covers both material sustainability risks as well as adverse impacts on society and the environment. Drawing on an overall pool of more than 700 indicators, ISS ESG applies approximately 100 social, environmental, and governance-related indicators per rated entity, covering topics such as employee matters, supply chain management, business ethics, corporate governance, environmental management, eco-efficiency, and others.

The sustainability indicator used is the ISS ESG Corporate Rating of the ESG reference benchmark that is measured against the ISS ESG Corporate Rating of the Parent index.

At the end of the period:

- the ISS ESG Corporate Rating of the MDAX ESG+ Index is 54.01
- the ISS ESG Corporate Rating of the MDAX Index (the "Parent Index") is 48.66

- ***... and compared to previous periods?***

This is the first SFDR periodic report produced for this sub-fund.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
FRESEN MED CARE AG	Health Care	Health Care Equipment & Services	Germany	6.53%
LEG IMMOBILIEN AG	Real Estate	Real Estate Management & Development	Germany	6.00%

<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	1.51%
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	1.22%
<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	1.21%
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	0.80%
<i>Others</i>	<i>Others</i>	0.00%
<i>Cash</i>	<i>Cash</i>	0.28%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

To comply with the EU Taxonomy, the criteria for **fossil gas**

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.00% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

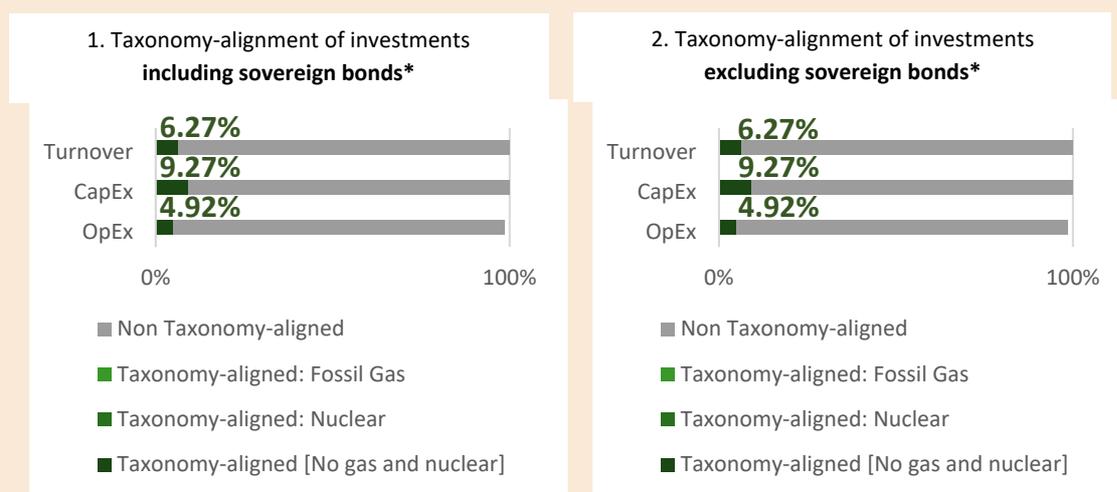

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.07% and the share of investment in

enabling activities was 2.80%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **42.61%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 21.08%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MDAX ESG+ (NR) EUR Index is an equity index based on the MDAX Index (the "Parent Index") representative of medium capitalization companies (mid-caps) in Germany from traditional sectors, including media, chemical, industry, and financial services and technology that follow the companies included in the MDAX in terms of market capitalization and order book turnover.

The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. For inclusion in the MDAX ESG+, only companies that are listed on a regulated market are considered. Furthermore, the companies must demonstrate that their legal or operational base is in Germany or they must generate the bulk of their trading turnover on the Frankfurt Stock Exchange and have their head office in an EU or EFTA Member State.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI S&P 500 ESG

Legal entity identifier:  
222100YTW62AGYBTTC41

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.34%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the S&P 500 ESG+ Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

#### ● How did the sustainability indicators perform?

The S&P DJI ESG Scores is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. S&P Dow Jones Indices (S&P DJI), in association with S&P Global Sustainable1 Research, together provide Environmental, Social, and Governance (ESG) scores, (collectively known as S&P DJI ESG Scores), which measure companies' overall performance relating to financially material ESG factors. The S&P Global ESG scores dataset contains a total company-level ESG score for one financial year and consists of individual

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

environmental (E), social (S), and governance (G) dimension scores, beneath which are (on average) more than 20 industry-specific criteria scores that can be used as signals of ESG risks and repercussions.

The sustainability indicator used is the S&P DJI ESG Score of the ESG reference benchmark that is measured against the S&P DJI ESG Score of the Parent index.

At the end of the period:

- the S&P DJI ESG Scores of the S&P 500 ESG+ Index is 50.79
- the S&P DJI ESG Scores of the S&P 500 (the "Parent Index") is 46.19

- **... and compared to previous periods?**

The previous period S&P DJI ESG score of the index was 73.49

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

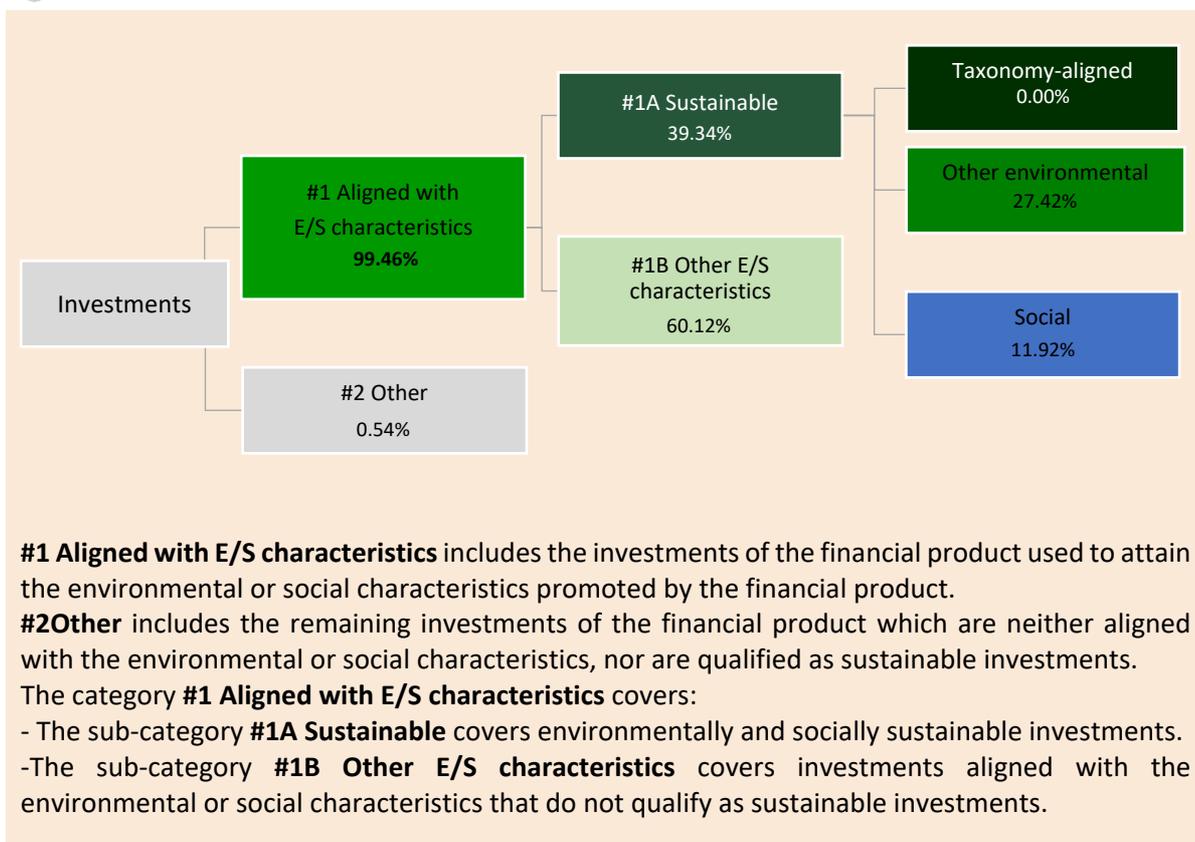

Largest Investments	Sector	Sub-Sector	Country	% Assets
APPLE INC	Information Technology	Technology Hardware & Equipment	United States	10.25%
MICROSOFT CORP	Information Technology	Software & Services	United States	9.26%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	8.65%
ALPHABET INC CL A	Communication Services	Media & Entertainment	United States	2.81%
ALPHABET INC CL C	Communication Services	Media & Entertainment	United States	2.32%
TESLA INC	Consumer Discretionary	Automobiles & Components	United States	2.10%
ELI LILLY & CO	Health Care	Pharmaceuticals Biotech & Life Sciences	United States	2.02%
JPMORGAN CHASE & CO	Financials	Banks	United States	1.74%
UNITEDHEALTH GROUP INC	Health Care	Health Care Equipment & Services	United States	1.56%
EXXON MOBIL CORP	Energy	Oil, Gas & Consumable Fuels	United States	1.51%
VISA INC-CLASS A SHARES	Financials	Financial Services	United States	1.33%
PROCTER & GAMBLE CO/THE	Consumer Staples	Household & Personal Products	United States	1.18%
MASTERCARD INC-CL A	Financials	Financial Services	United States	1.18%

HOME DEPOT INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	United States	1.16%
COSTCO WHOLESALE CORP	Consumer Staples	Consumer Staples Distribution & Retail	United States	1.14%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	11.77%
Information Technology	Software & Services	11.54%

<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	11.25%
<i>Financials</i>	<i>Financial Services</i>	7.75%

<i>Cash</i>	<i>Cash</i>	<i>0.40%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

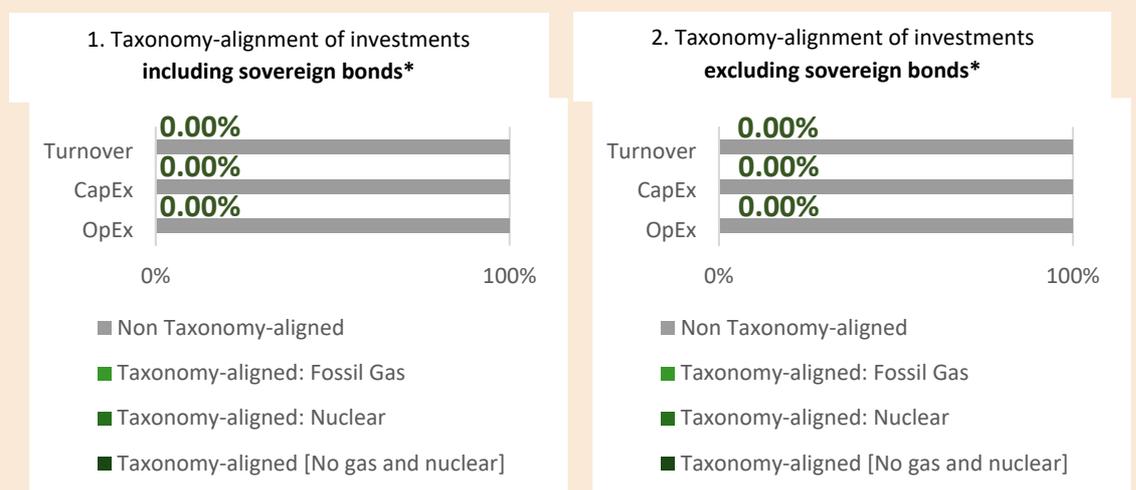

Yes:  
 In fossil gas  In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **27.42%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 11.92%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

S&P 500 ESG Index (the Index) is a broad-based, market-cap-weighted index that measures the performance of securities meeting sustainability criteria, while maintaining similar overall industry group weight as the S&P 500 (the Parent Index). The S&P500 Index is an equity index representative of the leading securities traded in the USA.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Amundi Stoxx Europe 600 ESG

**Legal entity identifier:** 549300JX3L7U61W4HF88

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**X**

**No**

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **73.61%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the STOXX Europe 600 ESG Broad Market Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The ISS ESG Corporate Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

More precisely, STOXX EUROPE 600 ESG+ index is an equity index based on Stoxx Europe 600 -

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

representing the 600 leading securities of European developed countries (the "Parent Index") that applies a set of sector exclusion and ESG performance screen for security eligibility and targets a total selection of 80% of the number of securities from the Parent Index.

- At the end of the period, the ISS ESG Corporate Rating of the index STOXX Europe 600 ESG+ is 58.33.

- At the end of the period, the ISS ESG Corporate Rating of the parent index STOXX Europe 600 Index is 56.08.

● **... and compared to previous periods?**

The previous period ISS ESG rating of the index was 56.95.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

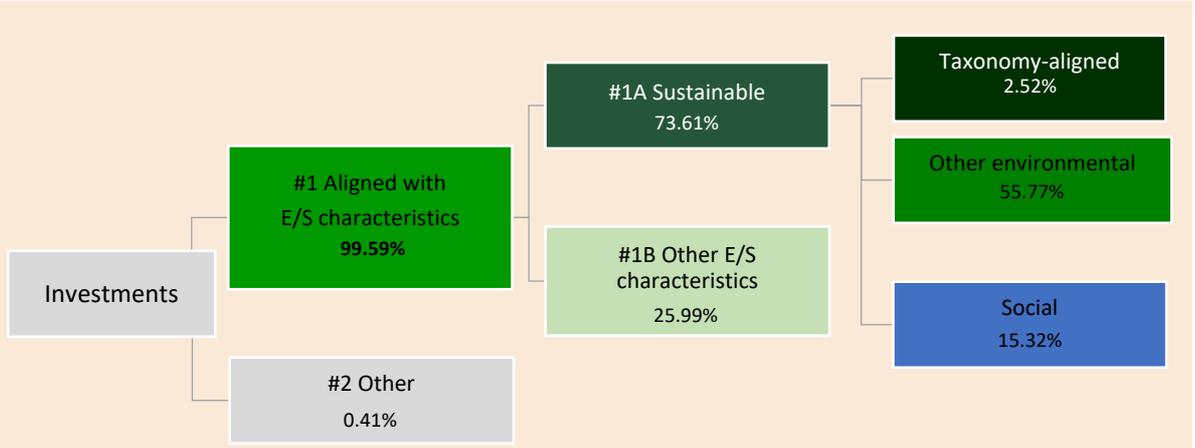

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotech & Life Sciences	Denmark	3.62%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	3.19%
NESTLE SA-REG	Consumer Staples	Food, Beverage & Tobacco	Switzerland	2.53%
ASTRAZENECA GBP	Health Care	Pharmaceuticals Biotech & Life Sciences	United Kingdom	2.31%
SAP SE / XETRA	Information Technology	Software & Services	Germany	2.23%
NOVARTIS AG-REG	Health Care	Pharmaceuticals Biotech & Life Sciences	Switzerland	2.22%
ROCHE HLDG AG-GENUSS	Health Care	Pharmaceuticals Biotech & Life Sciences	Switzerland	2.16%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	1.88%
HSBC HOLDING PLC GBP	Financials	Banks	United Kingdom	1.58%
UNILEVER PLC (GBP)	Consumer Staples	Household & Personal Products	United Kingdom	1.57%
SIEMENS AG-REG	Industrials	Capital goods	Germany	1.46%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	1.45%
SANOFI - PARIS	Health Care	Pharmaceuticals Biotech & Life Sciences	France	1.26%
ALLIANZ SE-REG	Financials	Insurance	Germany	1.23%
DEUTSCHE TELEKOM NAM	Communication Services	Telecommunicati on	Germany	1.01%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	<i>14.76%</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>12.04%</i>
<i>Financials</i>	<i>Banks</i>	<i>10.18%</i>
<i>Financials</i>	<i>Insurance</i>	<i>6.20%</i>

<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	5.99%
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	5.01%
<i>Financials</i>	<i>Financial Services</i>	4.72%
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	4.23%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

the fund invested 2.52% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

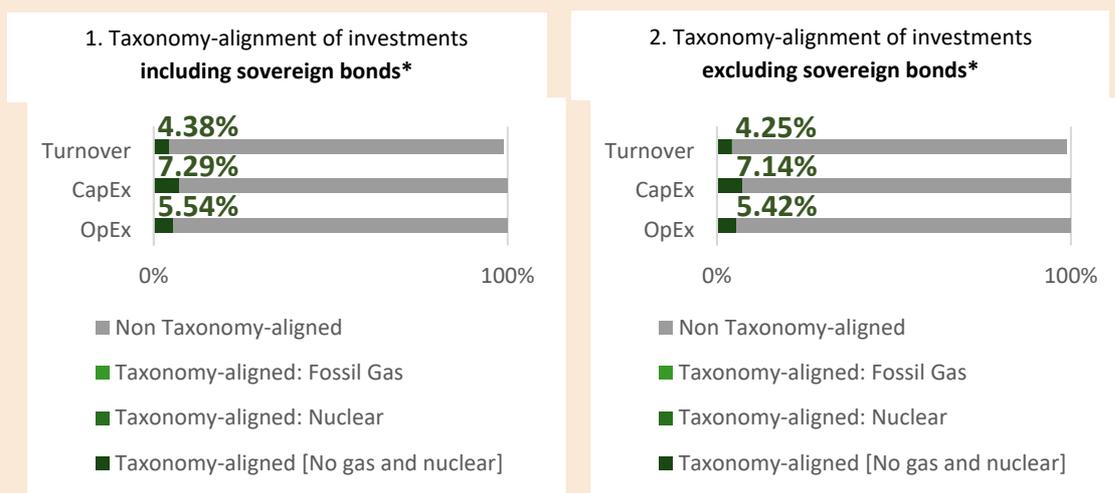

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.18% and the share of investment in enabling activities was 3.21%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.50%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **55.77%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 15.32%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

STOXX Europe 600 ESG Broad Market Index is an equity index based on Stoxx Europe 600 - representing the 600 leading securities of European developed countries (the Parent Index) that applies a set of sector exclusion and ESG performance screen for security eligibility and targets a total selection of 80% of the number of securities from the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI AC FAR EAST EX JAPAN ESG LEADERS SELECT

Legal entity identifier: 5493004IAZX50HV2CQ46

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 45.89% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI Ac Far East ex Japan ESG Leaders Select 5% Issuer Capped index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI AC Far East ex Japan ESG Leaders Select 5% Issuer Capped Net USD Index is 6.792
- the MSCI AC FAR EAST ex JAPAN Index is 6.318

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 6.731

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Cayman Islands	5.99%
TENCENT HOLDINGS LTD	Communication Services	Media & Entertainment	Cayman Islands	5.27%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies **-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

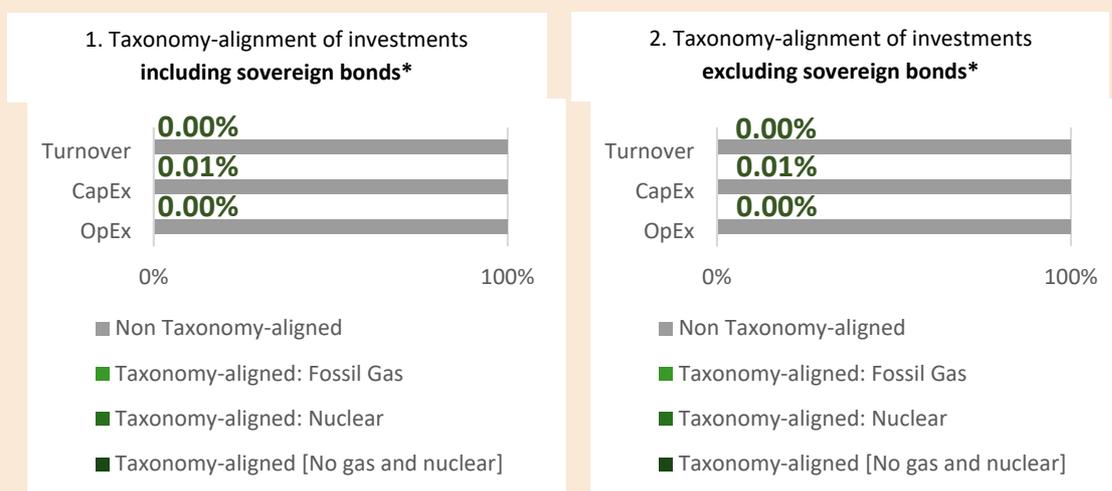

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in

enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.14%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 15.75%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI Ac Far East ex Japan ESG Leaders Select 5% Issuer Capped index is an equity index based on the MSCI AC Far East ex Japan Index (the Parent Index), representative of the large and mid-cap markets across 2 Developed Markets (excluding Japan) and 7 Emerging Markets countries in the Far East, and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI CHINA ESG LEADERS SELECT

Legal entity identifier: 213800YL23YUT5FBRB63

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **31.07%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI China ESG Leaders Select 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI China ESG Leaders Select 5% Issuer Capped Net USD Index is 6.25
- the MSCI China Index is 4.924

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 6.206

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

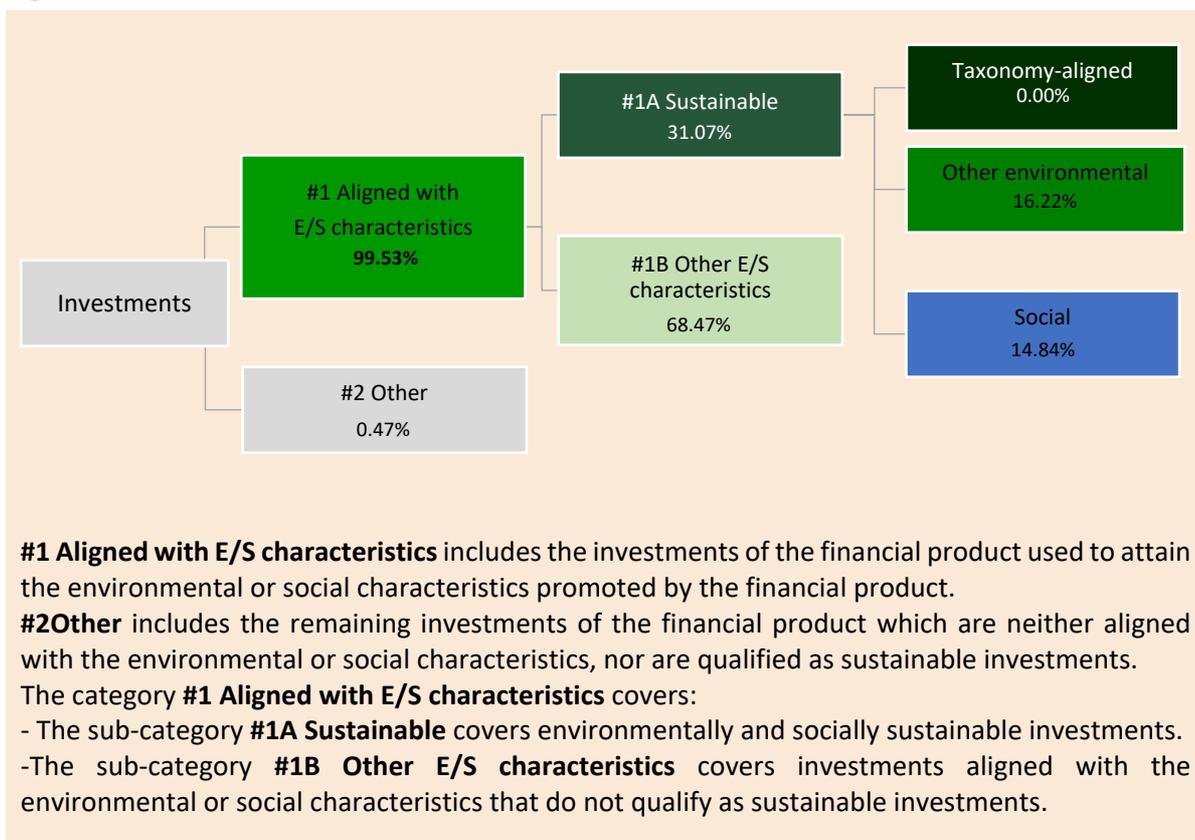

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
JD.COM INC-CLASS A	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Cayman Islands	6.11%
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Cayman Islands	5.54%
TENCENT HOLDINGS LTD	Communication Services	Media & Entertainment	Cayman Islands	4.87%
BYD CO LTD-H	Consumer Discretionary	Automobiles & Components	China	4.37%
NETEASE INC	Communication Services	Media & Entertainment	Cayman Islands	4.30%
BANK OF CHINA LTD-H	Financials	Banks	China	4.16%

<i>Energy</i>	<i>Energy Equipment &amp; Services</i>	<i>0.05%</i>
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	<i>0.03%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.41%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which

 **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

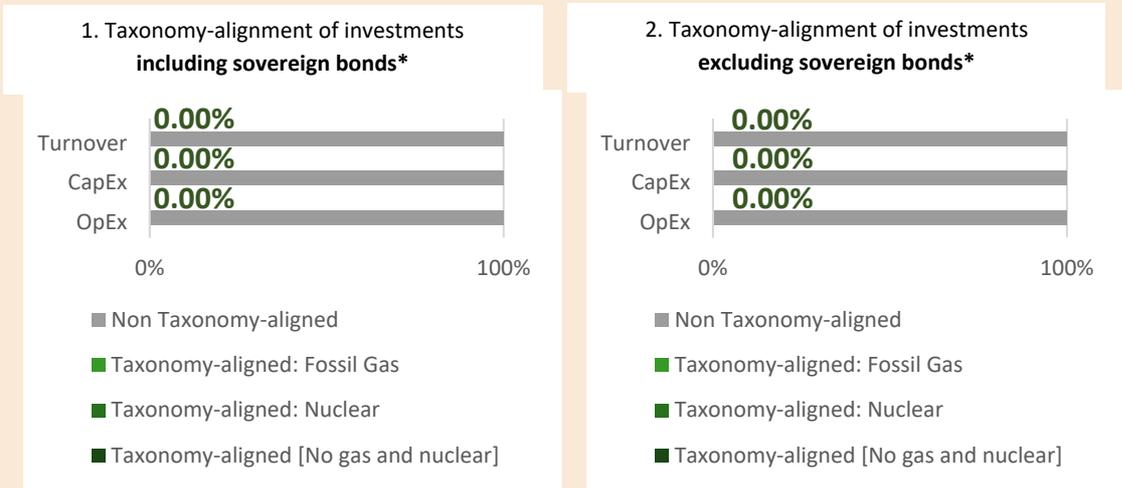

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **16.22%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.84%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI China ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI China Index (Parent Index) representative of large and mid-cap stocks of China equity universe across China A shares, H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI MSCI EMERGING EX CHINA ESG LEADERS SELECT

**Legal entity identifier:** 213800J6GAIQJ1OPP251

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **54.69%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI EM ex China ESG Leaders Select 5% Issuer Capped Net USD Index is 6.79
- the MSCI EM Ex China Index is 6.209

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 6.609

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

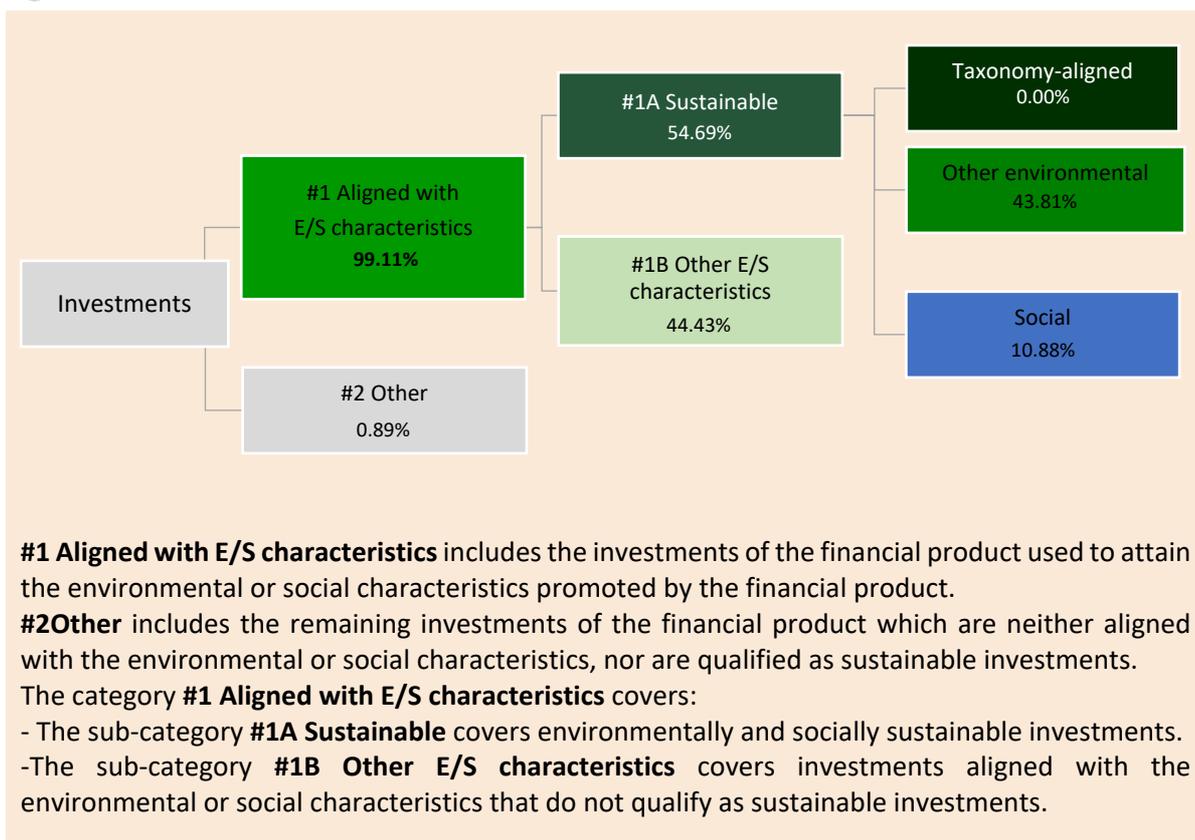

Largest Investments	Sector	Sub-Sector	Country	% Assets
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	4.79%
RELIANCE INDUSTRIES LTD	Energy	Oil, Gas & Consumable Fuels	India	4.14%
HDFC BANK LIMITED	Financials	Banks	India	3.40%
INFOSYS LTD	Information Technology	Software & Services	India	2.87%

<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Forex</i>	<i>Forex</i>	<i>-0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.46%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

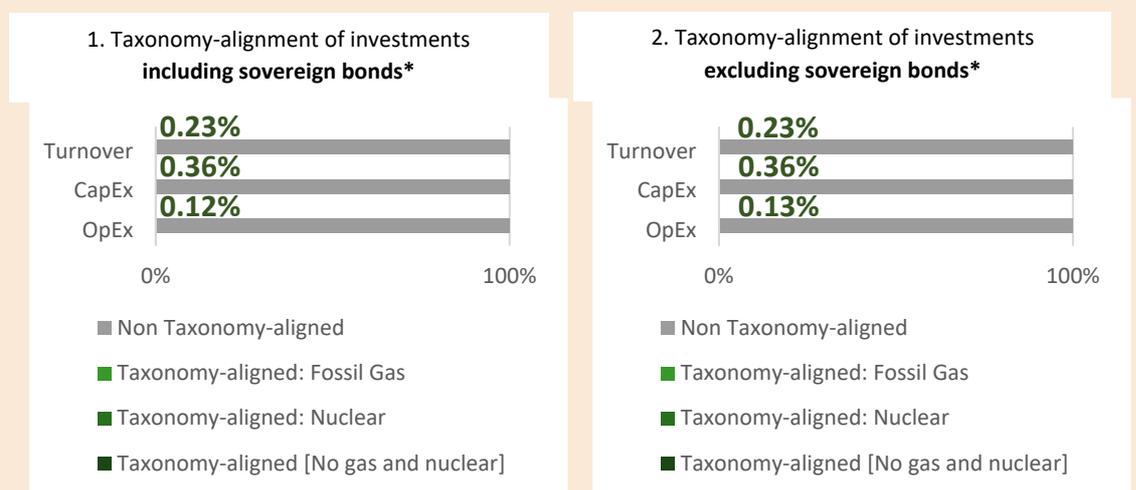

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

- Yes:
- In fossil gas  In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.09%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.03%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **43.81%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.88%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped is an equity index based on the MSCI Emerging Markets ex China Index (Parent Index) representative of large and mid-cap stocks across 26 of the 27 Emerging Markets (EM) countries (as of January 2021) excluding China and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI EMERGING ESG LEADERS

Legal entity identifier: 213800CMYD4SG29DTC94

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46.65% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI EM ESG Leaders 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI EM ESG Leaders 5% Issuer Capped Index is 6.598
- the MSCI ESG score of the MSCI Emerging Markets Index ("Parent Index") is 5.895

- ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 6.494

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Cayman Islands	5.60%
TENCENT HOLDINGS LTD	Communication Services	Media & Entertainment	Cayman Islands	5.50%
TAIWAN SEMICONDUCTOR MANUFACTURING CO. LTD	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	4.54%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

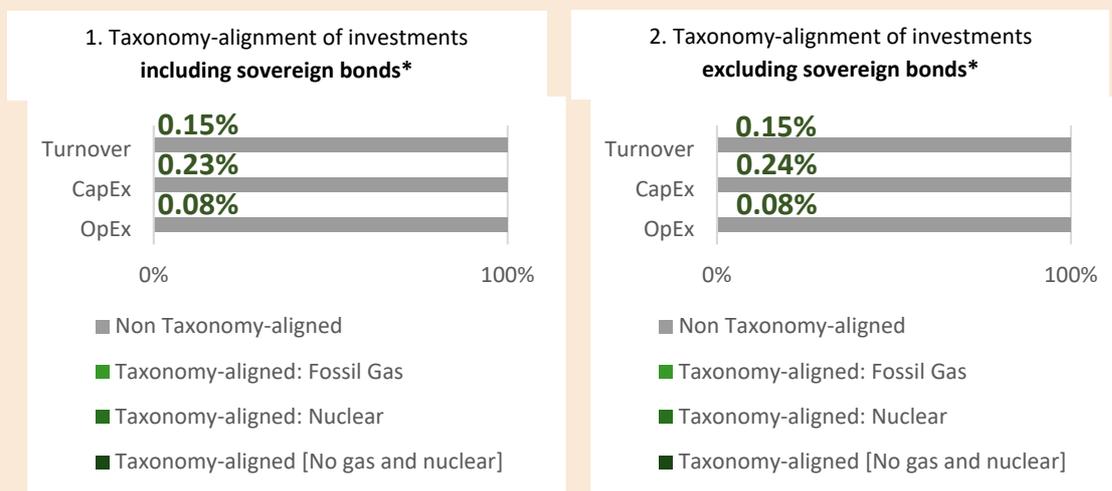

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:  
 In fossil gas     In nuclear energy  
 No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

enabling activities was 0.06%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.02%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **34.97%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.68%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI EM ESG Leaders 5% Issuer Capped Index is an equity index based on the MSCI Emerging Markets Index (Parent Index), representative of the large and mid-cap securities of 27 emerging countries (as of November 2021) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI EMU ESG LEADERS SELECT

Legal entity identifier: 2221007ZZU8XN39KWS32

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 85.92% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI EMU ESG Leaders Select 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent mIndex. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI EMU ESG Leaders Select 5% Issuer Capped Net EUR is 8.625
- the MSCI EMU Index is 7.85

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 8.644

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

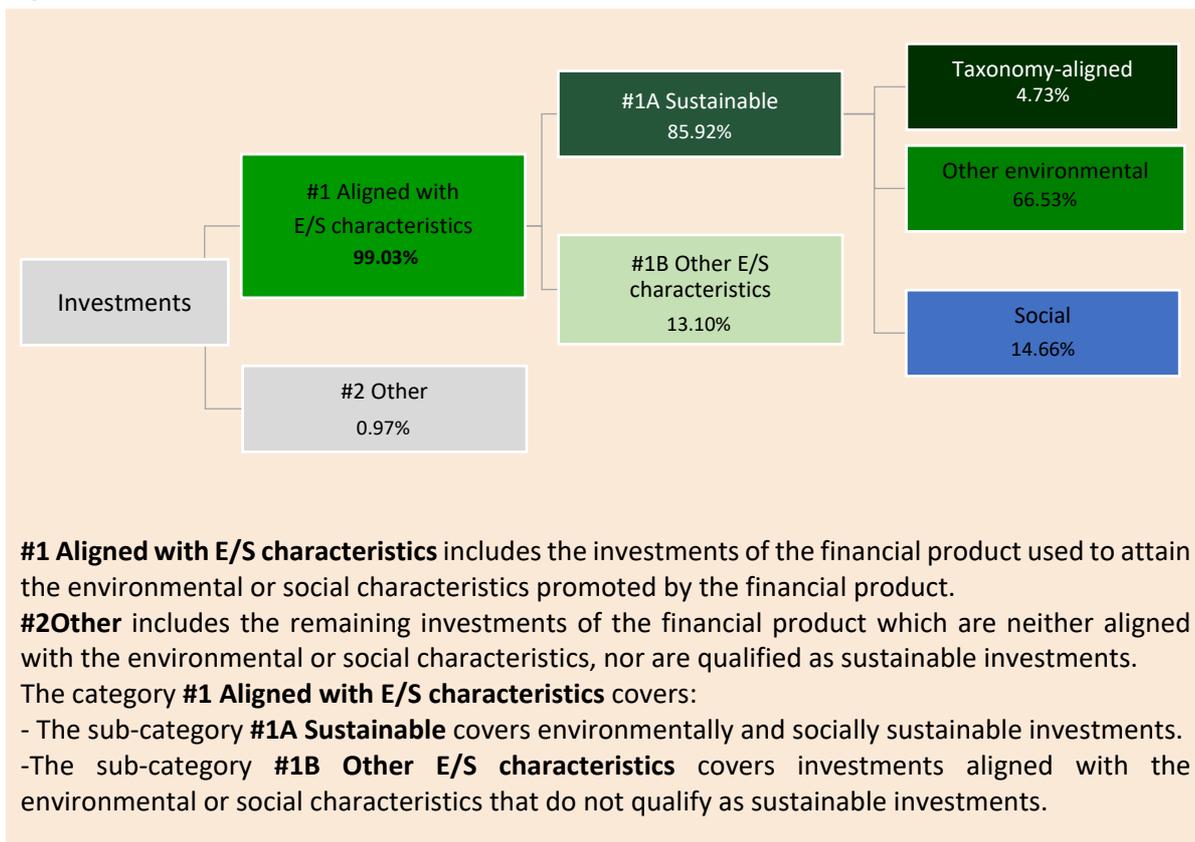

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
SCHNEIDER ELECT SE	Industrials	Capital goods	France	5.02%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	4.85%
TOTALENERGIES SE PARIS	Energy	Oil, Gas & Consumable Fuels	France	4.50%
AIR LIQUIDE PRIME FID 02	Materials	Chemicals	France	4.27%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	4.27%
L OREAL PRIME FID	Consumer Staples	Household & Personal Products	France	4.01%
IBERDROLA SA	Utilities	Electric Utilities	Spain	3.82%

<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.97%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.73% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

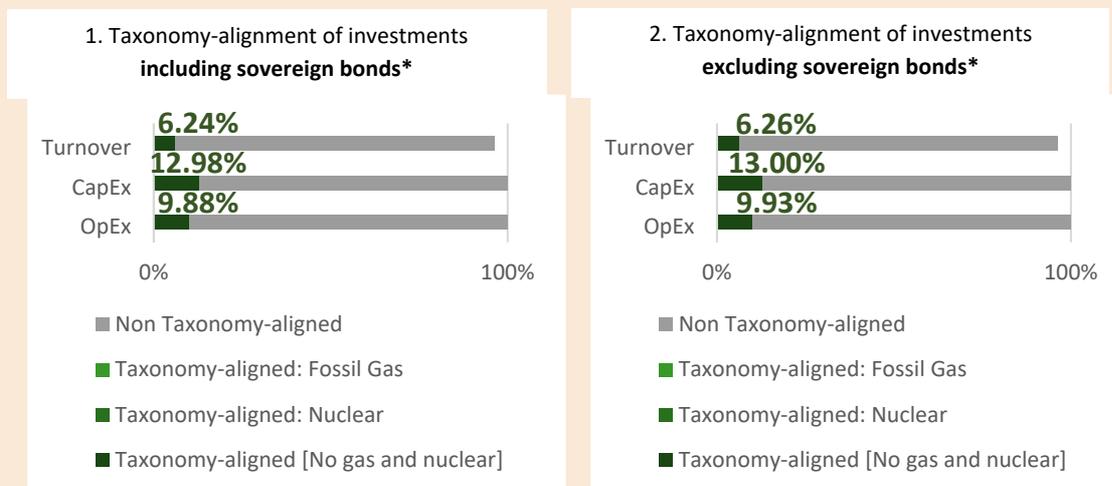

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 4.66%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 5.61%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **66.53%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.66%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI EMU ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI EMU Index (Parent Index), representative of the large and mid-cap stocks across 10 developed countries (as of September 2020) in the European Economic and Monetary Union (EMU) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AMUNDI MSCI USA ESG LEADERS SELECT

**Legal entity identifier:** 2138003G3CHCAIBE6B94

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**X**

**No**

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **44.60%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI USA ESG Leaders Select 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI USA ESG Leaders Select 5% Issuer Capped Index is 7.495
- the MSCI ESG score of the MSCI USA Index ("Parent Index") is 6.674

- ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.495

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

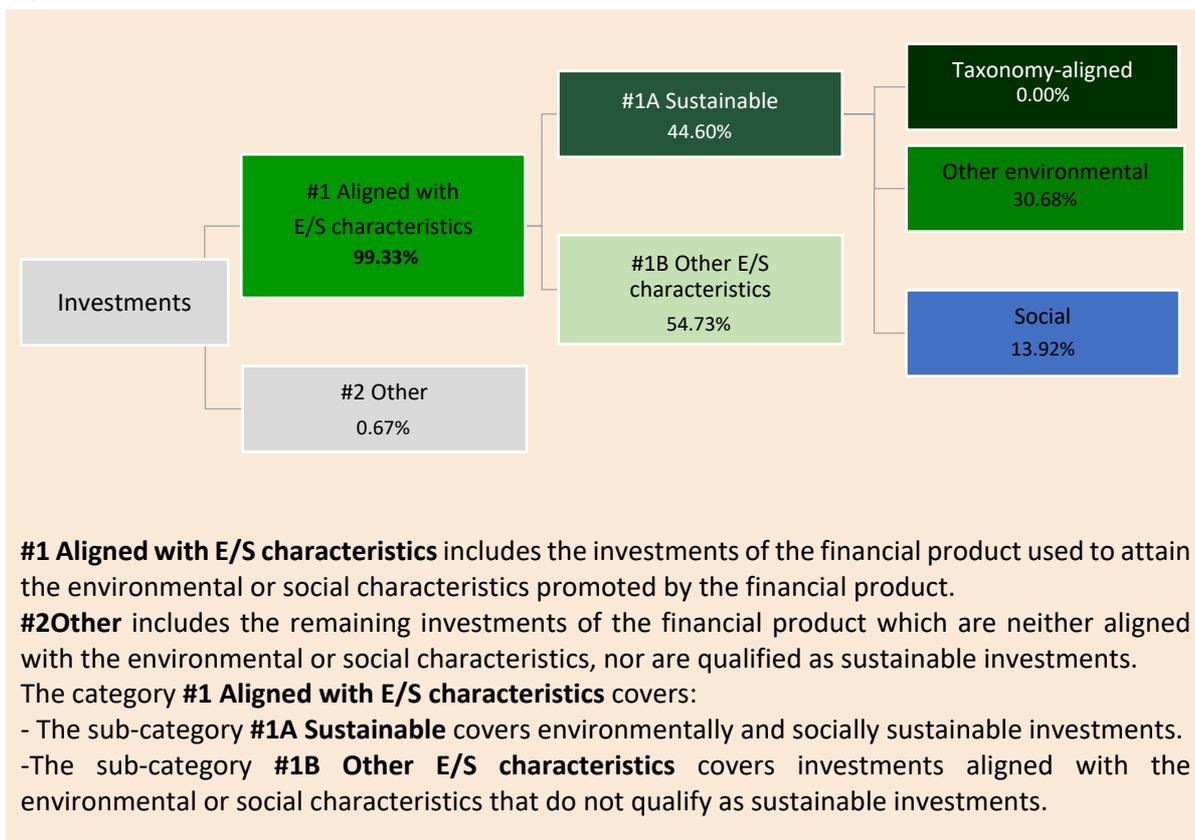

Largest Investments	Sector	Sub-Sector	Country	% Assets
MICROSOFT CORP	Information Technology	Software & Services	United States	4.87%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.59%
TESLA INC	Consumer Discretionary	Automobiles & Components	United States	3.48%
ELI LILLY & CO	Health Care	Pharmaceuticals Biotech & Life Sciences	United States	3.32%
ALPHABET INC CL A	Communication Services	Media & Entertainment	United States	2.55%
ALPHABET INC CL C	Communication Services	Media & Entertainment	United States	2.21%
VISA INC-CLASS A SHARES	Financials	Financial Services	United States	2.01%

<i>Cash</i>	<i>Cash</i>	<i>0.67%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

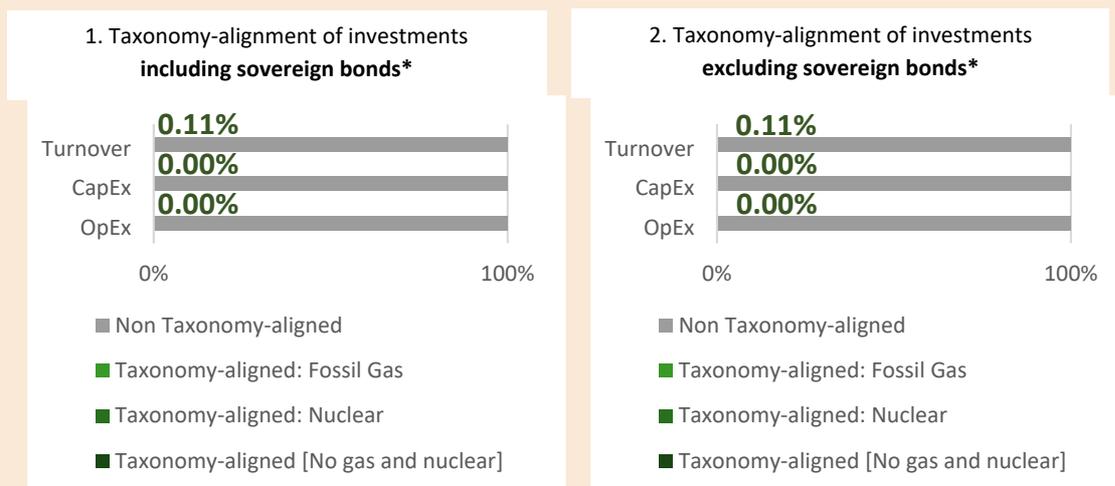

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.68%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 13.92%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI USA ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI USA Index (Parent Index), representative of the large and mid-cap securities of the US market and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI WORLD ESG LEADERS SELECT

Legal entity identifier: 213800PRSOJ2FG7X8887

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 13<sup>th</sup> November 2023, before the liquidation process started.

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.07%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the MSCI WORLD ESG LEADERS SELECT 5% Issuer Capped Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

#### ● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI WORLD ESG LEADERS SELECT 5% Issuer Capped Index is **7.797**
- the MSCI ESG score of the MSCI World Index (Parent Index) is **6.9**

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 7.783

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion :** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement :** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote :** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring :** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
MICROSOFT CORP	Information Technology	Software & Services	USA	5.72%
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	USA	4.43%
ALPHABET INC CL A	Communication Services	Media & Entertainment	USA	2.73%
ALPHABET INC CL C	Communication Services	Media & Entertainment	USA	2.46%
TESLA INC	Consumer Discretionary	Automobiles & Components	USA	2.35%
ELI LILLY & CO	Health Care	Pharmaceuticals Biotec & Life Sciences	USA	1.82%
VISA INC-CLASS A SHARES	Financials	Financial Services	USA	1.46%
PROCTER & GAMBLE CO/THE	Consumer Staples	Household & Personal Products	USA	1.33%
MASTERCARD INC-CL A	Financials	Financial Services	USA	1.23%
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotec & Life Sciences	DENMARK	1.18%
HOME DEPOT INC	Consumer Discretionary	Consumer Discretionary	USA	1.07%

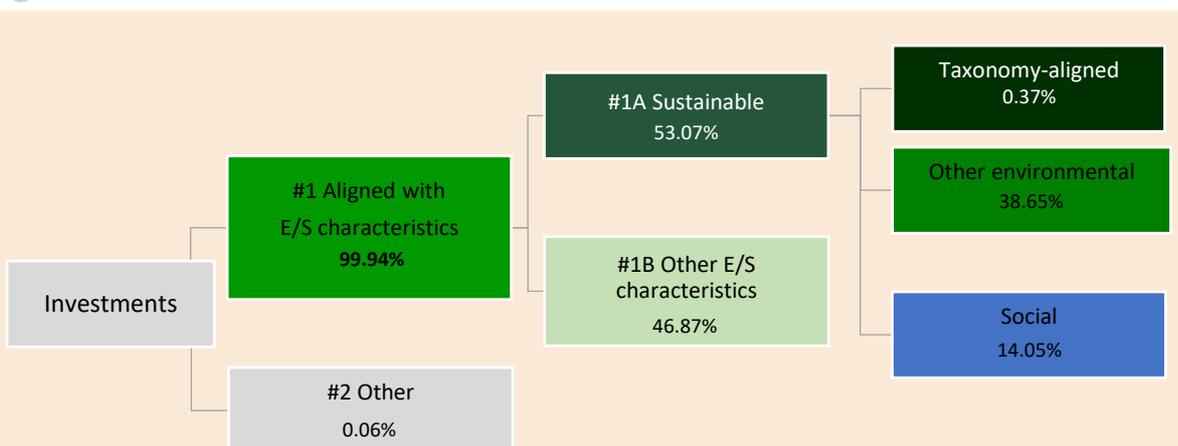

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 13/11/2023**

		Distribution & Retail		
ADOBE INC	Information Technology	Software & Services	USA	0.99%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	NETHERLANDS	0.97%
ABBVIE INC	Health Care	Pharmaceuticals Biotec & Life Sciences	USA	0.90%
COCA-COLA CO/THE	Consumer Staples	Food, Beverage & Tobacco	USA	0.86%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
--------	------------	----------

Information Technology	Software & Services	12.27%
Health Care	Pharmaceuticals Biotech & Life Sciences	9.94%
Information Technology	Semiconductors & Semiconductor Equipment	8.14%
Financials	Financial Services	7.42%
Communication Services	Media & Entertainment	7.29%
Industrials	Capital Goods	6.77%
Financials	Banks	3.99%
Financials	Insurance	3.93%

Health Care	Health Care Equipment & Services	3.43%
Consumer Staples	Household & Personal Products	3.15%
Consumer Discretionary	Consumer Durables & Apparel	3.03%
Consumer Staples	Food, Beverage & Tobacco	3.01%
Consumer Discretionary	Automobiles & Components	3.00%
Materials	Chemicals	2.79%
Industrials	Transportation	2.50%

Energy	Oil, Gas & Consumable Fuels	2.49%
Industrials	Commercial & Professional Services	2.04%
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.94%
Consumer Discretionary	Consumer Services	1.58%
Communication Services	Telecommunication Services	1.40%
Materials	Metals & Mining	1.02%
Consumer Staples	Consumer Staples Distribution & Retail	0.86%
Information Technology	Technology Hardware & Equipment	0.85%
Utilities	Electric Utilities	0.79%
Energy	Energy Equipment & Services	0.58%
Real Estate	Real Estate Management & Development	0.47%
Utilities	Multi-Utilities	0.45%
Materials	Construction Materials	0.35%
Materials	Containers & Packaging	0.30%
Utilities	Gas Utilities	0.18%
Materials	Paper & Forest Products	0.15%

Utilities	Water Utilities	0.11%
Utilities	Independent Power&Renewable Electricity Producers	0.06%
Forex	Forex	0.00%
Other	Other	0.00%
Cash	Cash	0.22%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.37% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

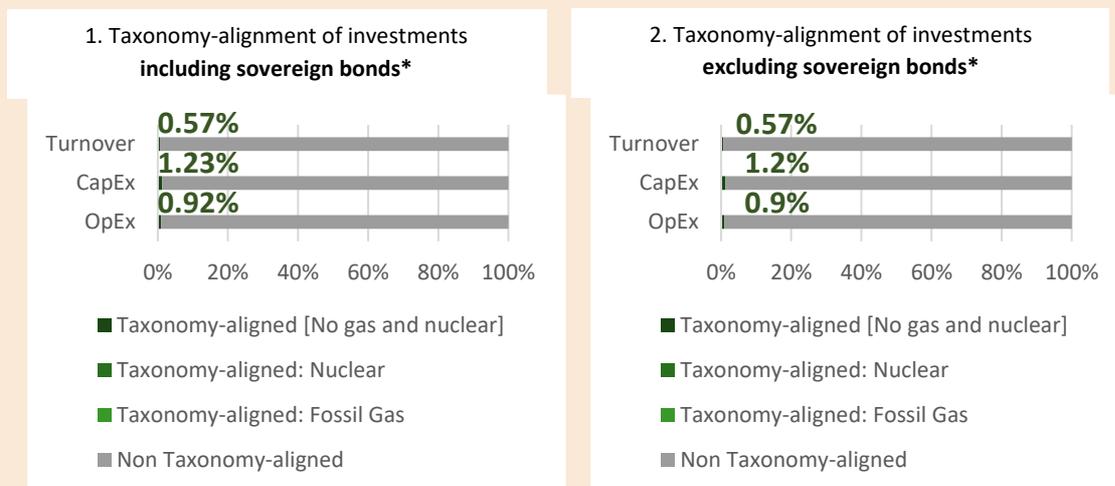

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 13/11/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.41%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.56%.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **38.65%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

● **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.05%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● ***How does the reference benchmark differ from a broad market index ?***

MSCI WORLD ESG LEADERS SELECT 5% Issuer Capped Index is an equity index based on the MSCI World Index (Parent Index), representative of the large and mid-cap securities of the 23 developed countries and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

### ● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI EMU ESG UNIVERSAL SELECT

Legal entity identifier: 2138005S5JAYPLESDA45

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 2<sup>nd</sup> May 2024, before it merged into Amundi MSCI EMU ESG CTB Net Zero Ambition.

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **76.62%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, **MSCI EMU ESG UNIVERSAL SELECT** is an equity index based on the MSCI EMU Index ("Parent Index"), representative of the large and mid- cap securities of the 10 developed countries in the European Economic and Monetary Union. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI EMU ESG UNIVERSAL SELECT Index is 8.229
- the MSCI ESG score of the MSCI EMU Index ("Parent Index") is 7.8

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 8.244

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 02/05/2024**

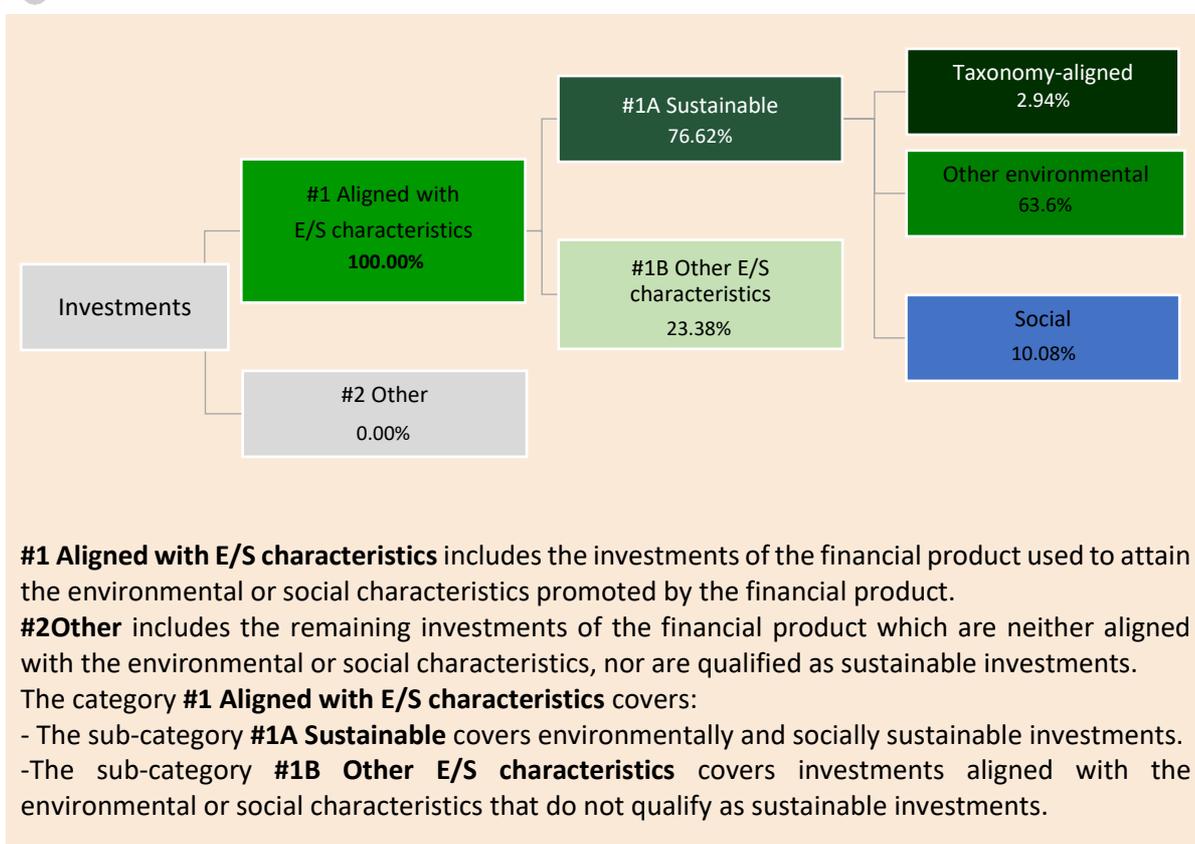

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	NETHERLANDS	5.85%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	FRANCE	4.85%
SAP SE / XETRA	Information Technology	Software & Services	GERMANY	4.62%
SIEMENS AG-REG	Industrials	Capital Goods	GERMANY	3.50%
SCHNEIDER ELECT SE	Industrials	Capital Goods	USA	3.05%
ALLIANZ SE-REG	Financials	Insurance	GERMANY	2.12%

Financials	Financial Services	2.61%
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.42%
Communication Services	Telecommunication Services	2.39%
Industrials	Transportation	1.58%
Utilities	Multi-Utilities	1.47%
Communication Services	Media & Entertainment	1.39%
Industrials	Commercial & Professional Services	1.34%
Health Care	Health Care Equipment & Services	1.31%
Consumer Staples	Consumer Staples Distribution & Retail	1.13%

Consumer Discretionary	Consumer Services	1.10%
Materials	Paper & Forest Products	0.66%
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.58%
Information Technology	Technology Hardware & Equipment	0.48%
Energy	Oil, Gas & Consumable Fuels	0.48%
Real Estate	Real Estate Management & Development	0.36%
Materials	Construction Materials	0.35%
Utilities	Gas Utilities	0.32%
Materials	Containers & Packaging	0.30%
Utilities	Independent Power&Renewable Electricity Producers	0.11%
Energy	Energy Equipment & Services	0.10%
Materials	Metals & Mining	0.03%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.94 % in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

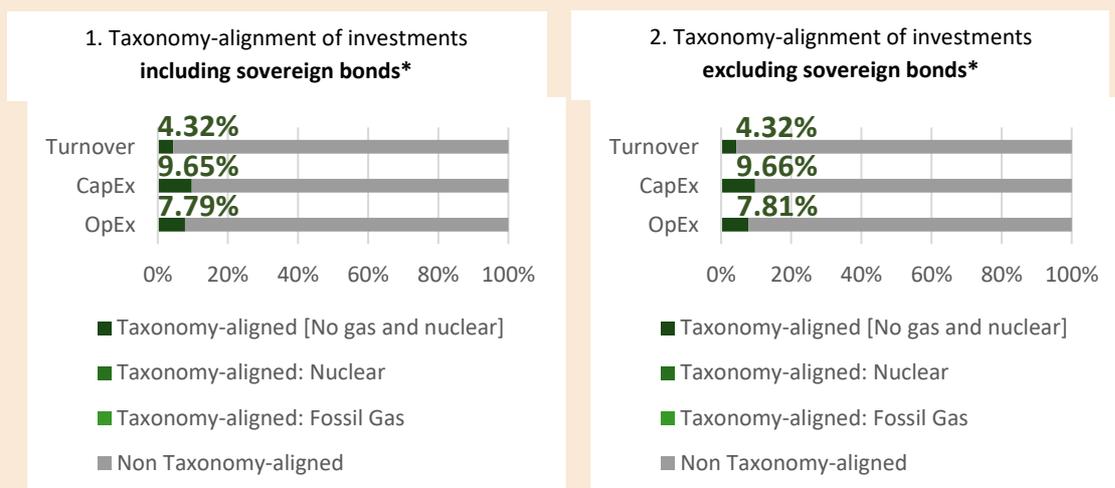

- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 02/05/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 3.09%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 4.19%

 are sustainable investments with an

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **63.6%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 10.08%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI EMU ESG UNIVERSAL SELECT is an equity index based on the MSCI EMU Index (Parent Index), representative of the large and mid- cap securities of the 10 developed countries in the European Economic and Monetary Union. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance (ESG) metrics.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AMUNDI MSCI EUROPE ESG UNIVERSAL SELECT

**Legal entity identifier:** 213800RNWZ7POOYTH64

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 1st March 2024, before the liquidation process started.

### Did this financial product have a sustainable investment objective?

**Yes**

**No**

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **72.6%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, **MSCI Europe ESG UNIVERSAL SELECT** which is an equity index based on the MSCI Europe Index ("Parent Index"), representative of the large and mid-cap securities of the 15 developed European countries. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI Europe ESG UNIVERSAL SELECT Index is 8.248
- the MSCI ESG score of the MSCI Europe Index ("Parent Index") is 7.9

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 8.26

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion :** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement :** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote :** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring :** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
MONDI PLC GBP	Materials	Paper & Forest Products	UNITED KINGDOM	8.45%
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotec & Life Sciences	DENMARK	4.34%

Cash	Cash	1.79%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.88% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

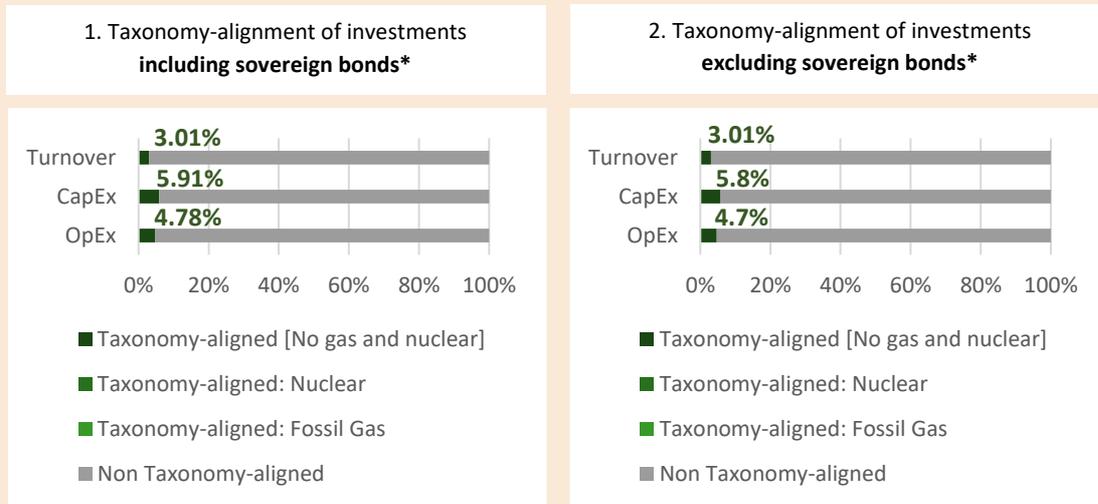

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 01/03/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 1.86%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.41%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was 59.17% at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.55%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI Europe ESG UNIVERSAL SELECT is an equity index based on the MSCI Europe Index (Parent Index), representative of the large and mid-cap securities of the 15 developed European countries. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance (ESG) metrics.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI USA ESG UNIVERSAL SELECT

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 1st March 2024, before the liquidation process started.

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **42.36%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, **MSCI USA ESG UNIVERSAL SELECT** which is an equity index based on the MSCI USA Index ("Parent Index"), representative of the large and mid- cap securities of the US market. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the MSCI USA ESG UNIVERSAL SELECT index is 7.192
- the MSCI ESG score of the MSCI USA Index (Parent Index) is 6.5

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.057

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

**Principal adverse impacts** are the most significant negative impacts of

investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 01/03/2024**

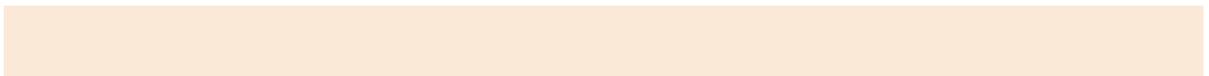

Largest Investments	Sector	Sub-Sector	Country	% Assets
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	USA	7.07%
MICROSOFT CORP	Information Technology	Software & Services	USA	4.77%
APPLE INC	Information Technology	Technology Hardware & Equipment	USA	3.99%

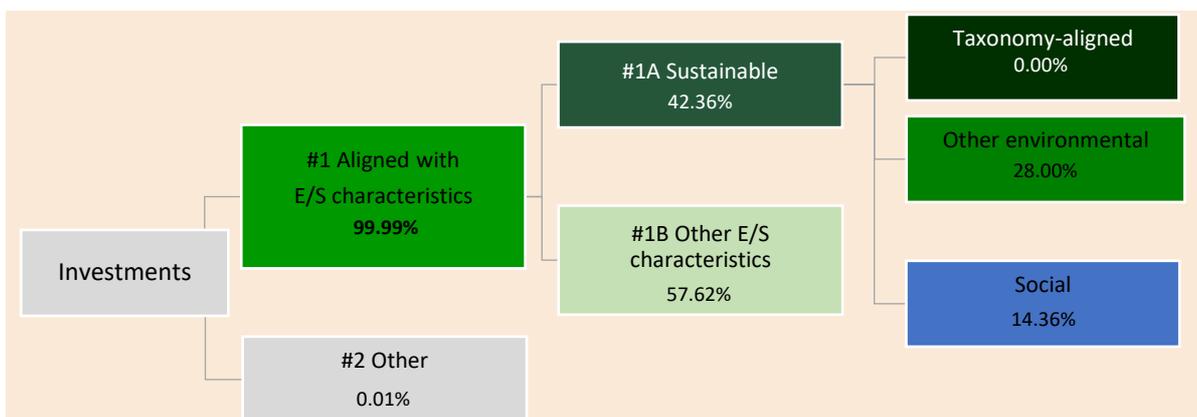

AMAZON.COM INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	USA	2.35%
UNITEDHEALTH GROUP INC	Health Care	Health Care Equipment & Services	USA	1.72%
ALPHABET INC CL A	Communication Services	Media & Entertainment	USA	1.54%
BROADCOM INC	Information Technology	Semiconductors & Semiconductor Equipment	USA	1.52%
MASTERCARD INC-CL A	Financials	Financial Services	USA	1.52%
HOME DEPOT INC	Consumer Discretionary	Consumer Discretionary Distribution & Retail	USA	1.46%
ALPHABET INC CL C	Communication Services	Media & Entertainment	USA	1.37%

SALESFORCE COM	Information Technology	Software & Services	USA	1.17%
TESLA INC	Consumer Discretionary	Automobiles & Components	USA	1.10%
META PLATFORMS INC-CLASS A	Communication Services	Media & Entertainment	USA	1.05%
JPMORGAN CHASE & CO	Financials	Banks	USA	1.02%

**What was the proportion of sustainability-related investments?**

● ***What was the asset allocation?***

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made ?*

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
Semiconductors & Semiconductor Equipment	Information Technology	14.25%
Software & Services	Information Technology	13.90%
Financial Services	Financials	7.31%
Pharmaceuticals Biotech & Life Sciences	Health Care	7.16%
Health Care Equipment & Services	Health Care	6.31%
Technology Hardware & Equipment	Information Technology	6.17%

Media & Entertainment	Communication Services	5.83%
Consumer Discretionary Distribution & Retail	Consumer Discretionary	5.72%
Capital Goods	Industrials	5.00%
Food, Beverage & Tobacco	Consumer Staples	3.23%
Banks	Financials	2.84%
Equity Real Estate Investment Trusts (REITs)	Real Estate	2.41%
Insurance	Financials	1.94%
Consumer Services	Consumer Discretionary	1.89%
Consumer Staples Distribution & Retail	Consumer Staples	1.81%
Chemicals	Materials	1.67%
Commercial & Professional Services	Industrials	1.59%
Transportation	Industrials	1.53%
Automobiles & Components	Consumer Discretionary	1.44%
Household & Personal Products	Consumer Staples	1.25%
Oil, Gas & Consumable Fuels	Energy	1.11%
Telecommunication Services	Communication Services	1.05%

Electric Utilities	Utilities	0.92%
Consumer Durables & Apparel	Consumer Discretionary	0.80%
Metals & Mining	Materials	0.56%
Energy Equipment & Services	Energy	0.44%
Multi-Utilities	Utilities	0.39%
Containers & Packaging	Materials	0.32%
Real Estate Management & Development	Real Estate	0.21%
Construction Materials	Materials	0.16%
Water Utilities	Utilities	0.12%
Gas Utilities	Utilities	0.02%
Other	Other	0.00%
Cash	Cash	0.65%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
 - **turnover** reflecting the share of revenue from green activities of investee companies  
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

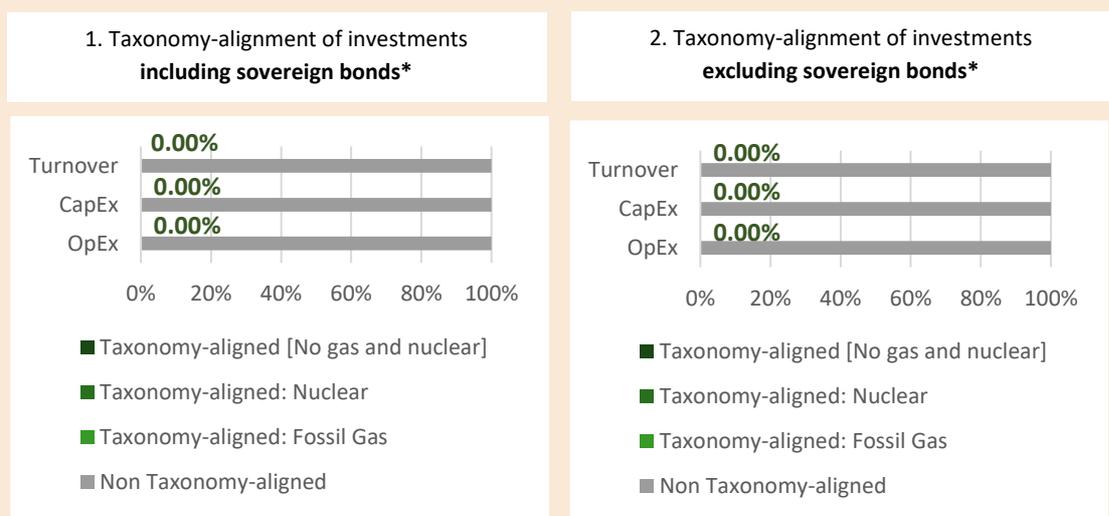

Yes:  
                    In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 01/03/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.00%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.36%.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

 **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index ?**

MSCI USA ESG UNIVERSAL SELECT is an equity index based on the MSCI USA Index (Parent Index), representative of the large and mid- cap securities of the US market. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance (ESG) metrics.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI WORLD ESG UNIVERSAL SELECT

Legal entity identifier: 2138002DTNQGWIYKRV03

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **49.97%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

"The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, MSCI WORLD ESG UNIVERSAL SELECT is an equity index based on the MSCI World Index ("Parent Index"), representative of the large and mid-cap markets across 23 developed market countries. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy."

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI WORLD ESG UNIVERSAL SELECT is 7.502
- the MSCI World Index is 6.967

● ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.449

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

matters, respect for human rights, anti-corruption and anti-bribery matters.

companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion :** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement :** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote :** Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring :** Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

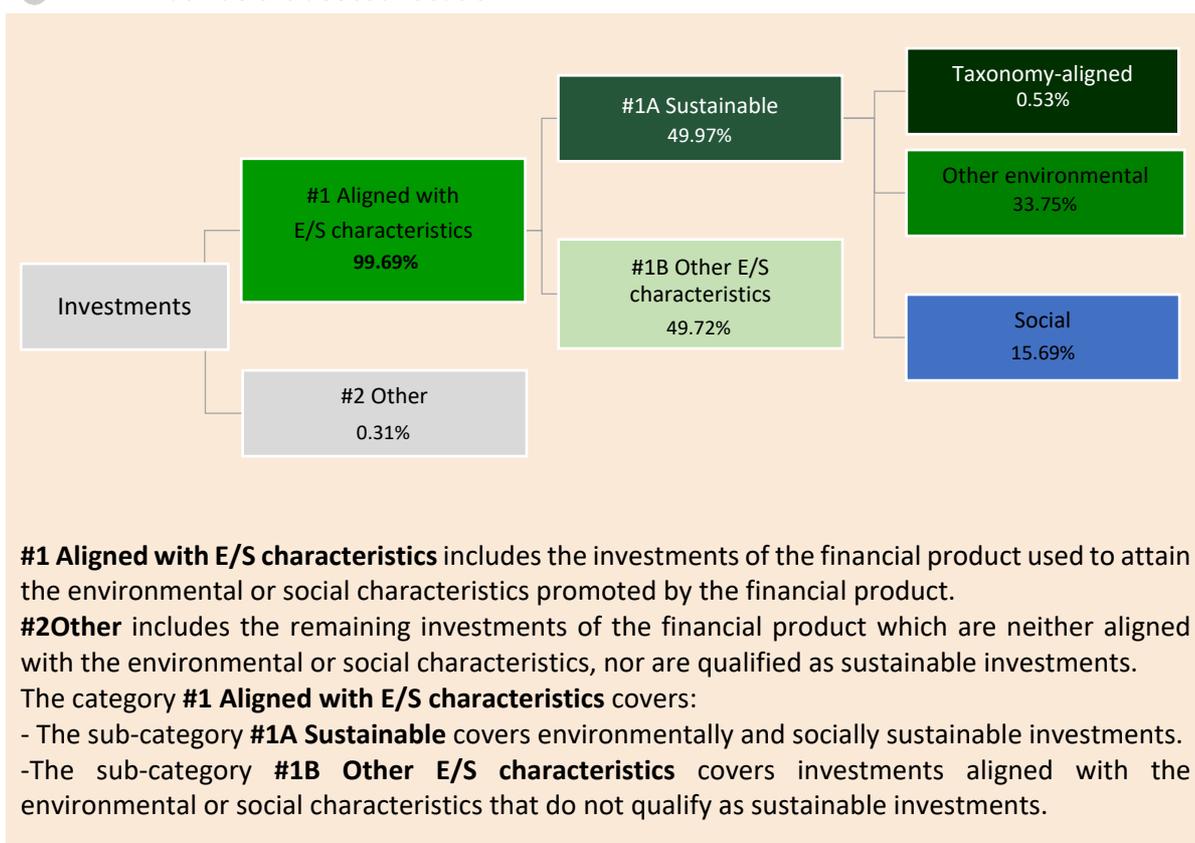

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	5.94%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.53% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

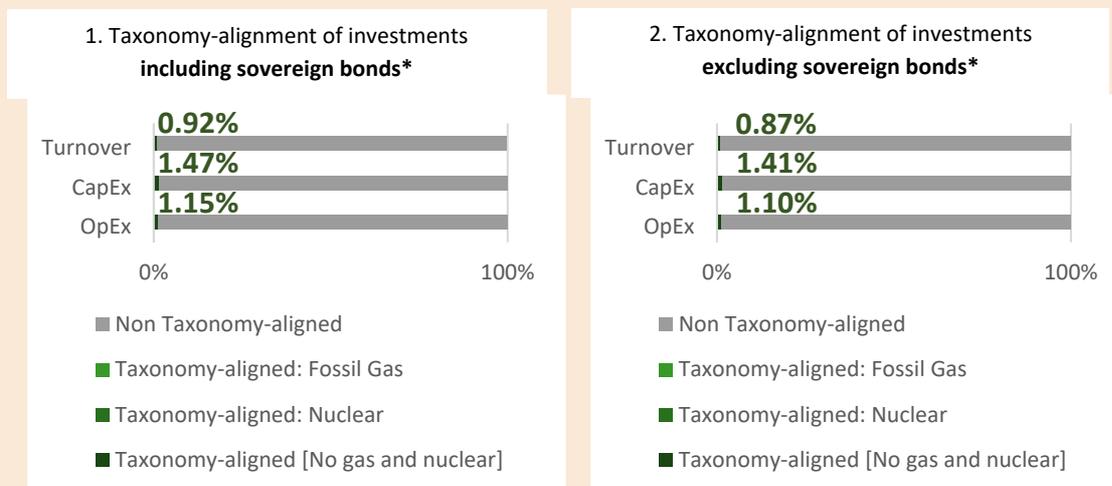

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 0.60%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.50%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **33.75%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 15.69%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI WORLD ESG UNIVERSAL SELECT is an equity index based on the MSCI World Index (Parent Index), representative of the large and mid-cap markets across 23 developed market countries. The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile. The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance (ESG) metrics.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI EUROPE PAB NET ZERO AMBITION

Legal entity identifier: 2221005CN7A7XZRQ4W36

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of **82.09%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Europe Climate Change CTB Select Index Net EUR) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Europe Climate Paris Aligned Filtered Index is constructed using an optimization process that aims to achieve replicability and investability

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI EUROPE Climate Paris Aligned Filtered Net EUR Index is 223.938.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Europe Index is 521.639.

- **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 216.425

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

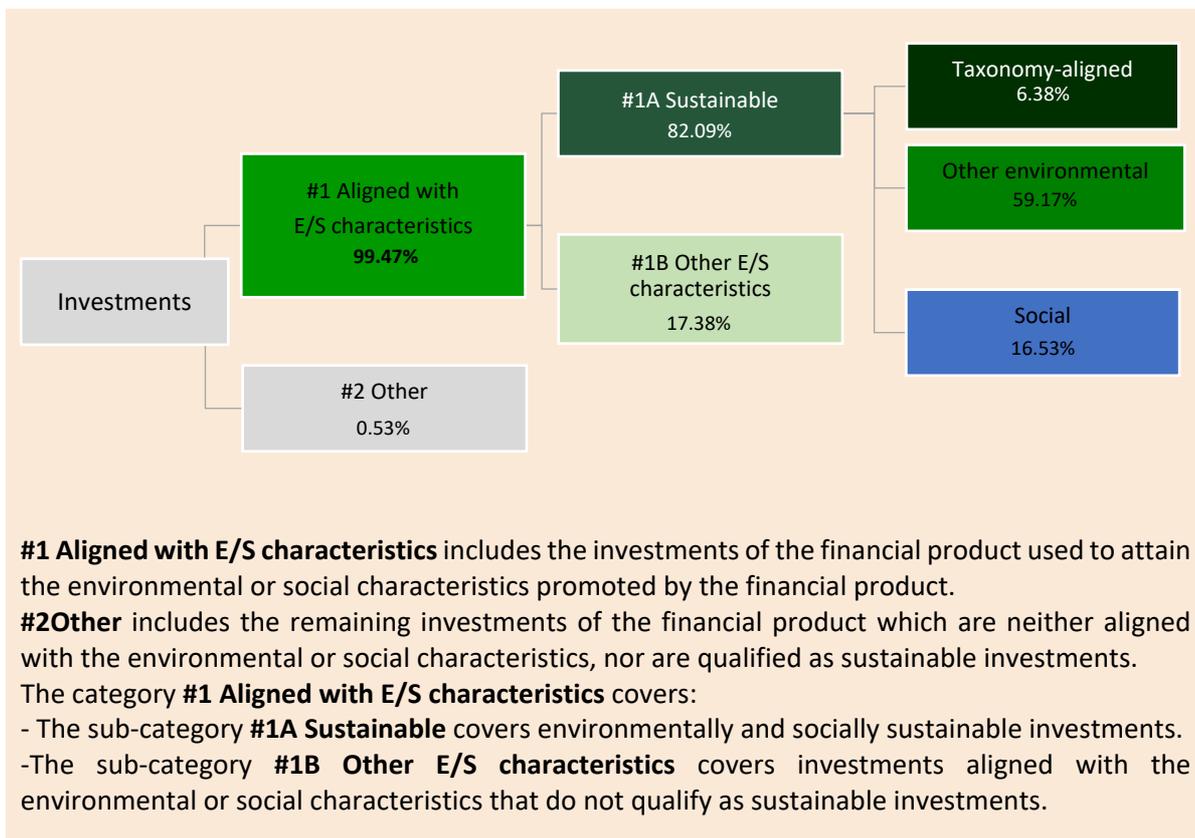

Largest Investments	Sector	Sub-Sector	Country	% Assets
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotech & Life Sciences	Denmark	3.78%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	3.07%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	2.67%
ABB LTD-REG	Industrials	Capital goods	Switzerland	2.43%

<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.52%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.38% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas       In nuclear energy
- No

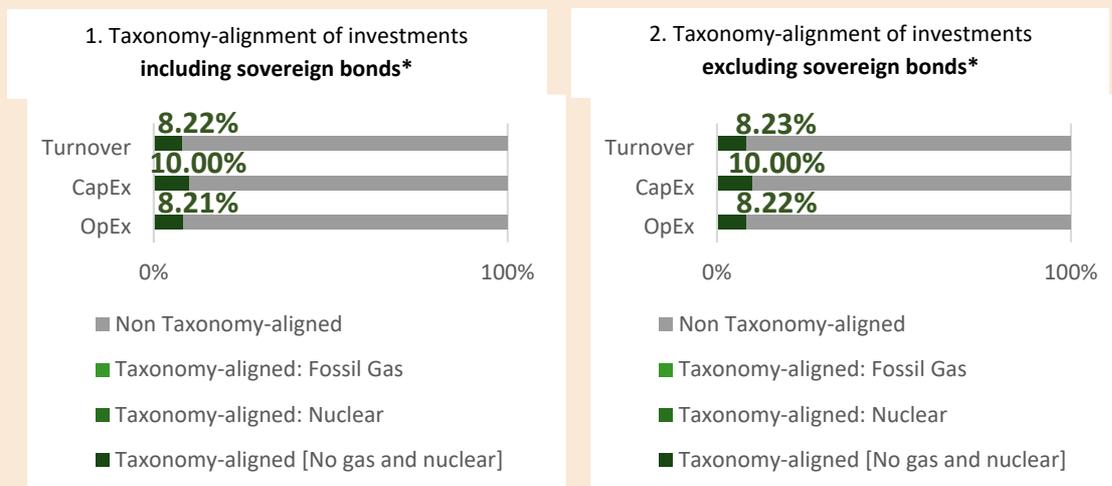

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.05% and the share of investment in enabling activities was 6.16%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 4.67%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **59.17%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 16.53%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The MSCI Europe Climate Change CTB Select Index is an equity index based on the MSCI Europe Index (Parent Index) representative of the large and mid-cap securities across 15 Developed Markets countries in Europe (as of December 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) label minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI WORLD CLIMATE TRANSITION CTB

Legal entity identifier: 222100479LWJEIXZB875

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **43.08%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI World Climate Change CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI World Climate Change CTB Select Index is 116.98
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI World Index ("Parent Index") is 335.024

● ***... and compared to previous periods?***

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 135.508

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

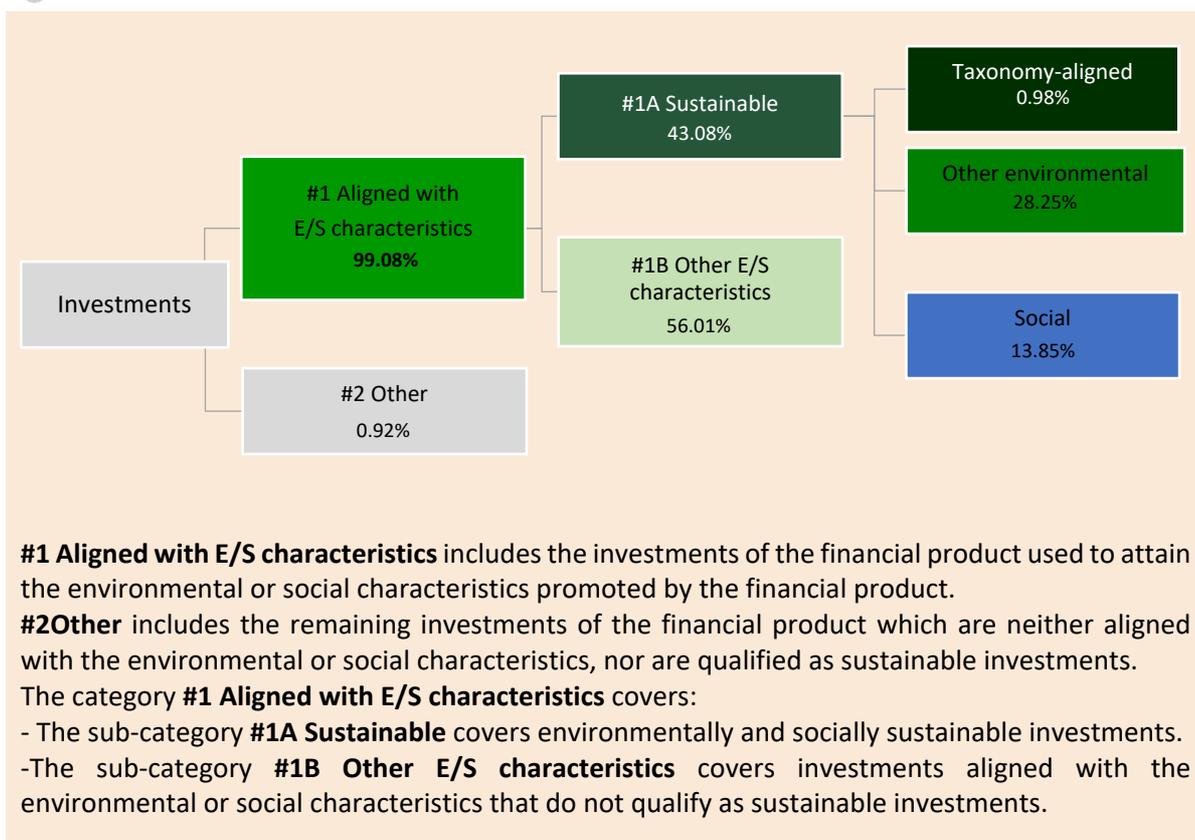

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.66%
APPLE INC	Information Technology	Technology Hardware & Equipment	United States	4.41%
TESLA INC	Consumer Discretionary	Automobiles & Components	United States	4.27%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.98% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

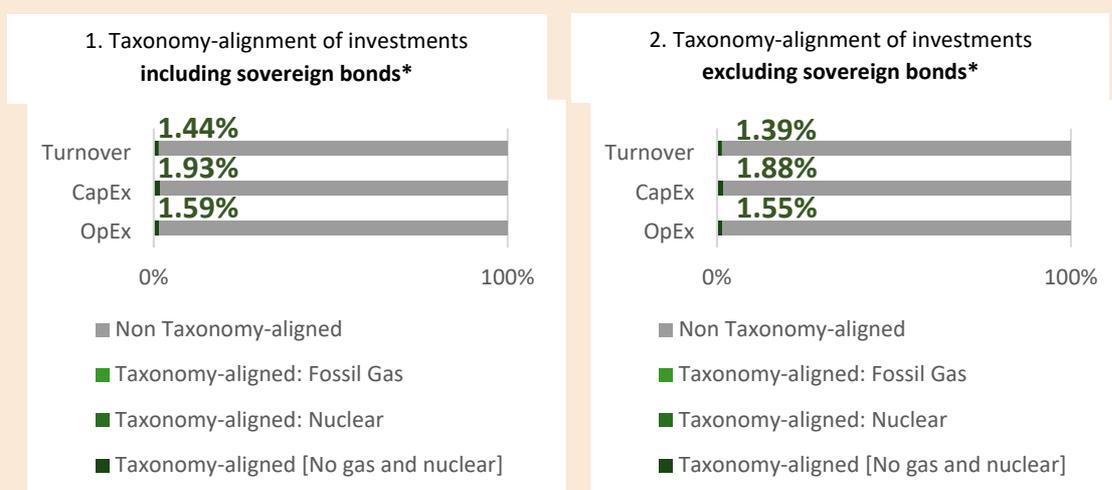

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.93%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.72%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.25%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 13.85%.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The MSCI World Climate Change CTB Select Index is an equity index based on the MSCI World Index (Parent Index). representative of the large and mid-cap securities across 23 Developed Markets countries (as of December 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) label minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI EUROPE ESG BROAD CTB

Legal entity identifier: 5493000LLOOP2JUYI637

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 76.41% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Europe ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Europe ESG Broad CTB Select Index is 264.609
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Europe Index (the "Parent Index") is 484.855

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 325.487

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotech & Life Sciences	Denmark	3.39%
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	2.96%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.94% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### ● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

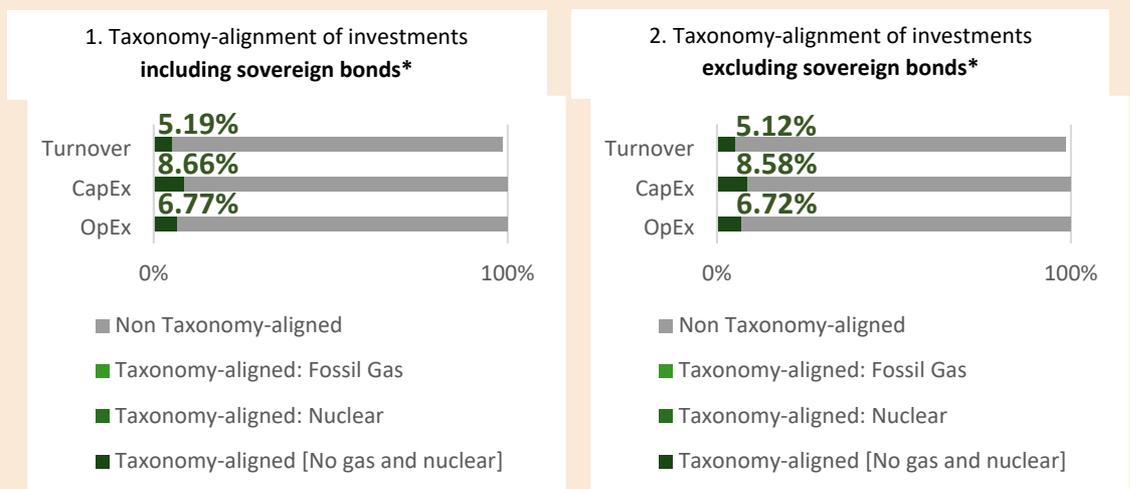

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### ● **What was the share of investments in transitional and enabling activities ?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.57% and the share of investment in enabling activities was 3.36%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 3.27%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **58.29%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 15.19%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI Europe ESG Broad CTB Select Index is an equity index based on the MSCI Europe Index representative of the large and mid-cap securities across developed markets countries in Europe (the Parent Index). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition

Benchmark (EU CTB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX MSCI EMERGING ESG BROAD CTB

Legal entity identifier: 213800T33RUJA8EO4L57

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.62% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Emerging Markets ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Emerging Markets ESG Broad CTB Select Index is 285.47
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Emerging Markets Index ("Parent Index") is 594.114

● ***... and compared to previous periods?***

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 362.934

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

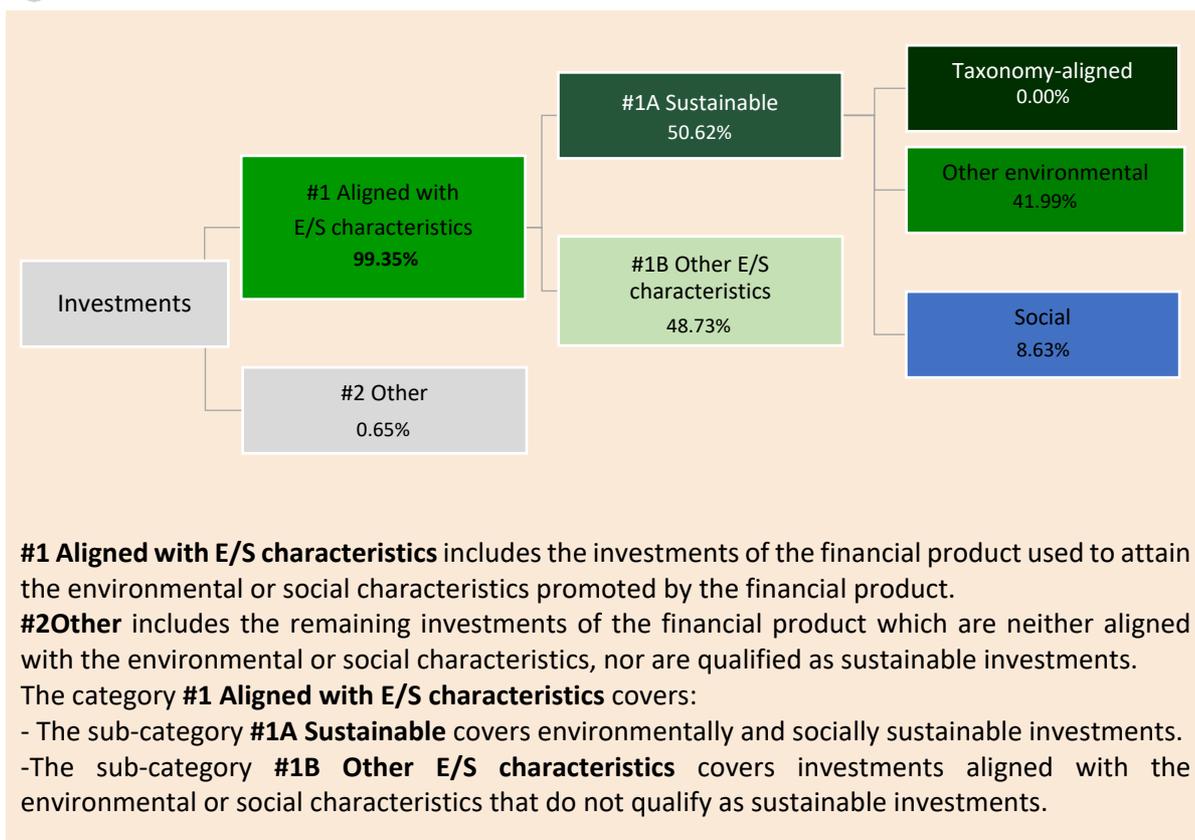

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
TAIWAN SEMICONDUCTOR MANUFACTURING LTD	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	10.17%
TENCENT HOLDINGS LTD	Communication Services	Media & Entertainment	Cayman Islands	3.86%
SAMSUNG ELECTRONICS	Information Technology	Technology Hardware & Equipment	Korea	2.77%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

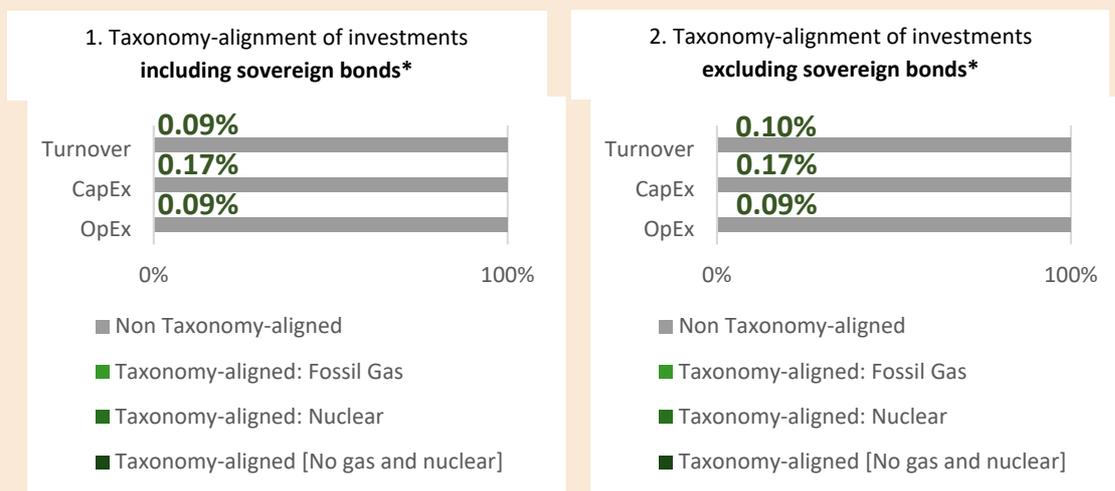

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:  
 In fossil gas       In nuclear energy  
 No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

enabling activities was 0.05%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.01%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **41.99%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 8.63%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI Emerging Markets ESG Broad CTB Select Index is an equity index based on the MSCI Emerging markets Index representative of the large and mid-cap markets across 27 emerging countries (as of November 2021) (Parent Index). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI MSCI EMU ESG CTB NET ZERO AMBITION

**Legal entity identifier:** 213800BXN74KCDO6QM33

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **79.58%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EMU ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

-Scope 2 emissions: those caused by the generation of electricity purchased by the company.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

-Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI EMU ESG Broad CTB Select Index is 315.942

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI EMU Index (the "Parent Index") is 499.751

● ***... and compared to previous periods?***

This is the first SFDR periodic report produced for this sub-fund.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

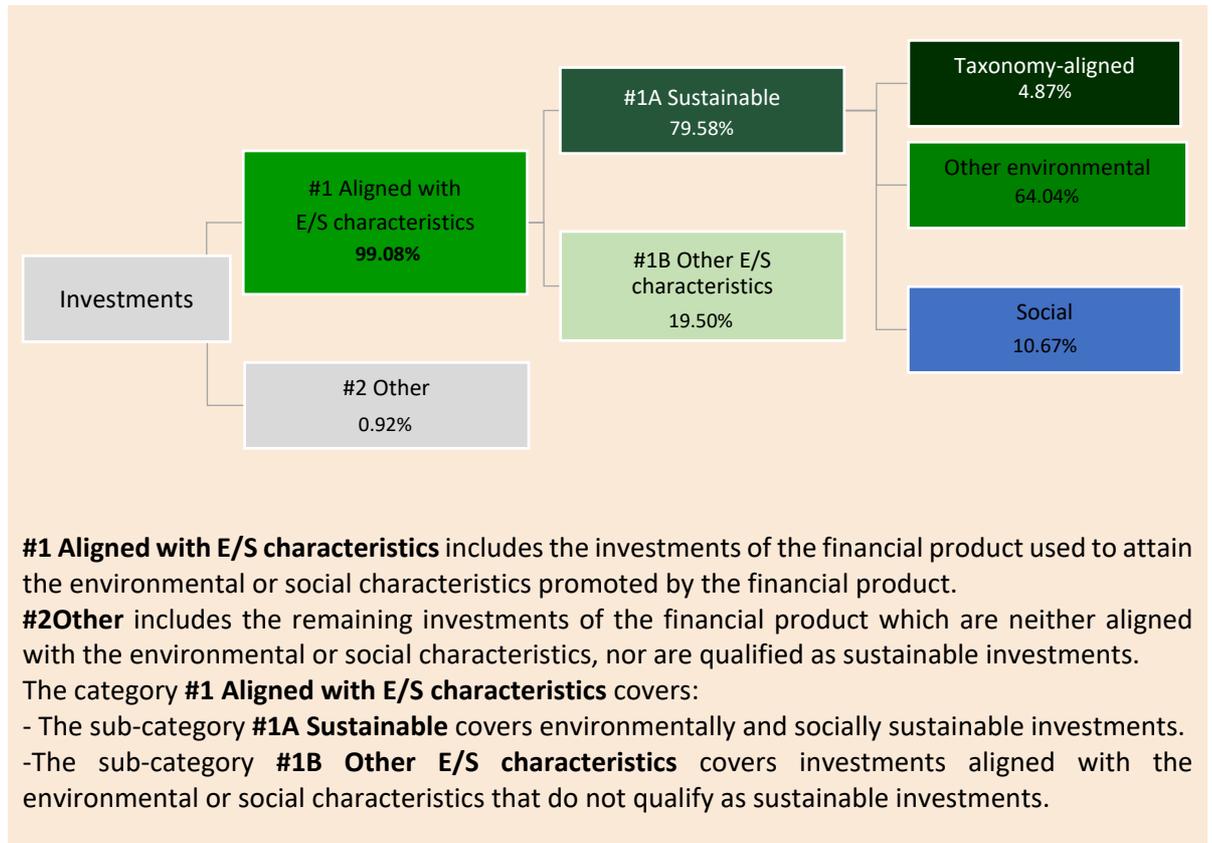

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	5.66%
SAP SE / XETRA	Information Technology	Software & Services	Germany	4.01%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	3.55%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	2.97%
SIEMENS AG-REG	Industrials	Capital goods	Germany	2.49%
ALLIANZ SE-REG	Financials	Insurance	Germany	2.45%
SANOFI - PARIS	Health Care	Pharmaceuticals Biotech & Life Sciences	France	2.42%
IBERDROLA SA	Utilities	Electric Utilities	Spain	2.05%
AIR LIQUIDE SA	Materials	Chemicals	France	1.76%
L OREAL (PARIS)	Consumer Staples	Household & Personal Products	France	1.61%
DEUTSCHE TELEKOM NAM (XETRA)	Communication Services	Telecommunication	Germany	1.60%
MUENCHENER RUECKVER AG-REG	Financials	Insurance	Germany	1.50%
AXA SA	Financials	Insurance	France	1.45%
ESSILORLUXOTTI CA	Health Care	Health Care Equipment & Services	France	1.40%
BANCO SANTANDER SA	Financials	Banks	Spain	1.38%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Industrials	Capital goods	13.65%
Financials	Banks	10.80%
Financials	Insurance	7.86%
Information Technology	Semiconductors & Semiconductor Equipment	7.64%
Consumer Discretionary	Consumer Durables & Apparel	6.43%

<i>Information Technology</i>	<i>Software &amp; Services</i>	4.90%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	4.83%
<i>Utilities</i>	<i>Electric Utilities</i>	4.60%
<i>Consumer Staples</i>	<i>Food, Beverage &amp; Tobacco</i>	3.95%
<i>Materials</i>	<i>Chemicals</i>	3.90%
<i>Consumer Discretionary</i>	<i>Automobiles &amp; Components</i>	3.61%
<i>Communication Services</i>	<i>Telecommunication</i>	2.86%
<i>Consumer Staples</i>	<i>Household &amp; Personal Products</i>	2.68%
<i>Financials</i>	<i>Financial Services</i>	2.66%
<i>Health Care</i>	<i>Health Care Equipment &amp; Services</i>	2.62%
<i>Consumer Discretionary</i>	<i>Consumer Discretionary Distribution &amp; Retail</i>	2.61%
<i>Industrials</i>	<i>Transportation</i>	2.37%
<i>Utilities</i>	<i>Multi-Utilities</i>	1.68%
<i>Real Estate</i>	<i>REITs</i>	1.34%
<i>Consumer Staples</i>	<i>Consumer Staples Distribution &amp; Retail</i>	1.25%
<i>Communication Services</i>	<i>Media &amp; Entertainment</i>	1.04%
<i>Energy</i>	<i>Oil, Gas &amp; Consumable Fuels</i>	1.04%

<i>Consumer Discretionary</i>	<i>Consumer Services</i>	<i>0.85%</i>
<i>Industrials</i>	<i>Commercial &amp; Professional Services</i>	<i>0.79%</i>
<i>Energy</i>	<i>Energy Equipment &amp; Services</i>	<i>0.71%</i>
<i>Utilities</i>	<i>Gas Utilities</i>	<i>0.64%</i>
<i>Real Estate</i>	<i>Real Estate Management &amp; Development</i>	<i>0.64%</i>
<i>Information Technology</i>	<i>Technology Hardware &amp; Equipment</i>	<i>0.48%</i>
<i>Materials</i>	<i>Paper &amp; Forest Products</i>	<i>0.36%</i>
<i>Materials</i>	<i>Metals &amp; Mining</i>	<i>0.13%</i>
<i>Utilities</i>	<i>Independent Power &amp; Renewable Electricity Producers</i>	<i>0.09%</i>
<i>Materials</i>	<i>Construction Materials</i>	<i>0.07%</i>
<i>Others</i>	<i>Others</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.92%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.87% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

contribution to an environmental objective.

- Yes:
- In fossil gas       In nuclear energy
- No

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

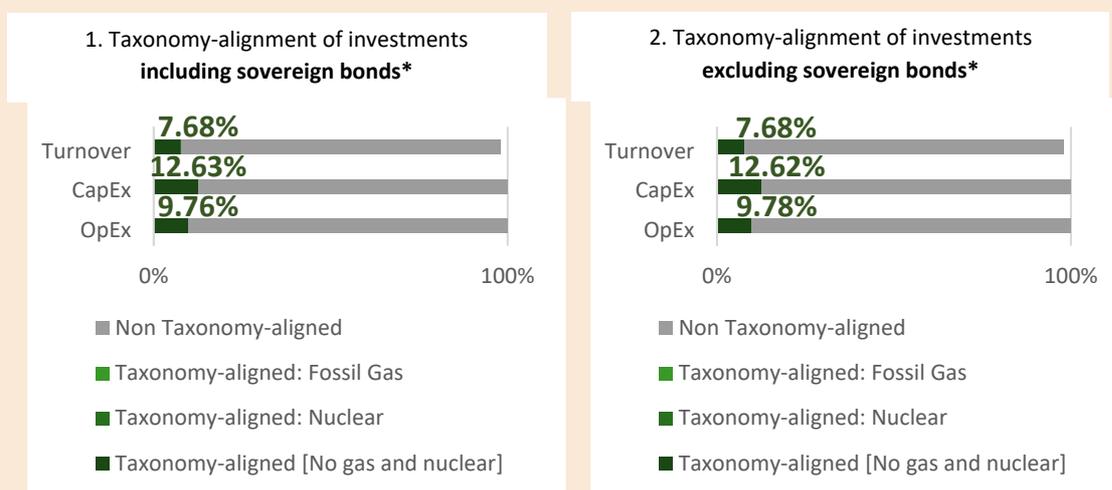

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.77% and the share of investment in enabling activities was 4.77%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **64.04%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 10.67%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI EMU ESG Broad CTB Select Index is an equity index based on the MSCI EMU Index representative of the large and mid-cap securities across developed markets countries in Europe (the "Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI MSCI EUROPE  
SMALL CAP ESG CLIMATE NET ZERO  
AMBITION CTB

**Legal entity identifier:**  
213800H5N4JH1FRBT766

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **65.15%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Europe Small Cap ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Europe Small Cap ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the MSCI ESG Score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI Europe Small Cap ESG Broad CTB Select Index is 241.475
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Europe Small Cap Index is 485.95.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 291.795

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

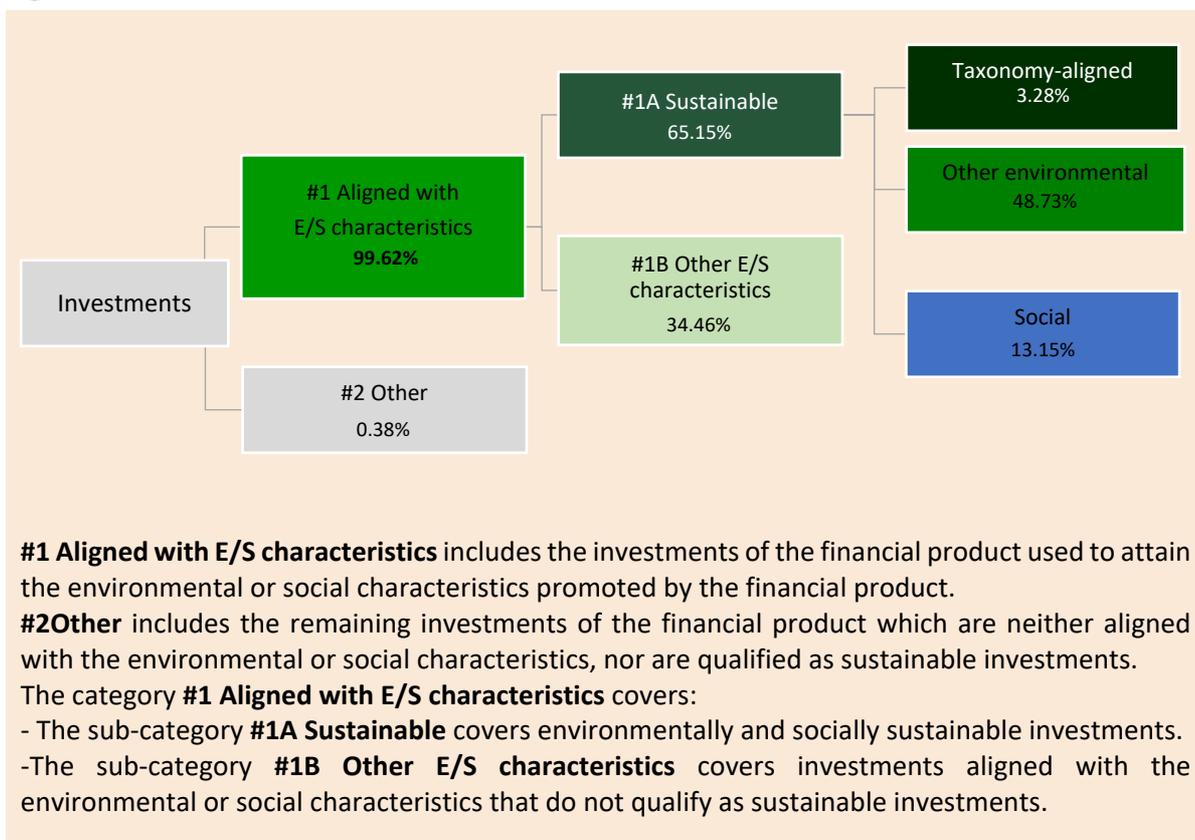

Largest Investments	Sector	Sub-Sector	Country	% Assets
DIPLOMA PLC	Industrials	Capital goods	United Kingdom	1.02%
HOWDEN JOINERY GRP	Industrials	Capital goods	United Kingdom	1.01%
ROTORK PLC	Industrials	Capital goods	United Kingdom	0.96%

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.28% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

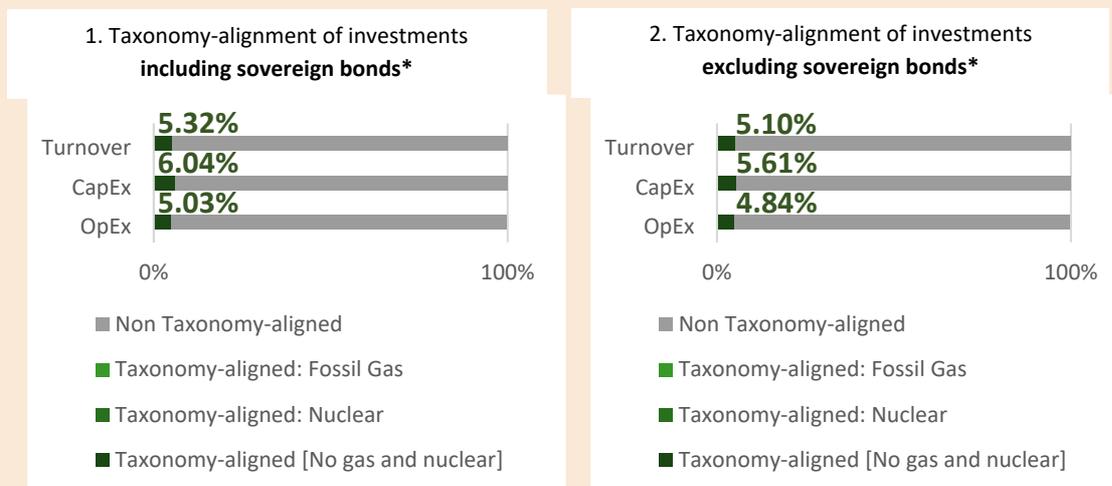

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.38% and the share of investment in enabling activities was 2.27%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 3.09%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.73%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 13.15%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

MSCI Europe Small Cap ESG Broad CTB Select Index is an equity index based on the MSCI Europe Small Cap Index (the Parent Index) representative of small-cap securities across developed markets countries in Europe. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI PACIFIC  
ESG CLIMATE NET ZERO AMBITION CTB

Legal entity identifier:  
213800SBLTEAN62APV17

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.59% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Pacific ESG Broad CTB Select Index) meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.  
-Scope 1 emissions: those from sources owned or controlled by the company.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI Pacific ESG Broad CTB Select Index is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI Pacific ESG Broad CTB Select Index is 231.74.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI Pacific Index is 560.004.

● ***... and compared to previous periods?***

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 321.532

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

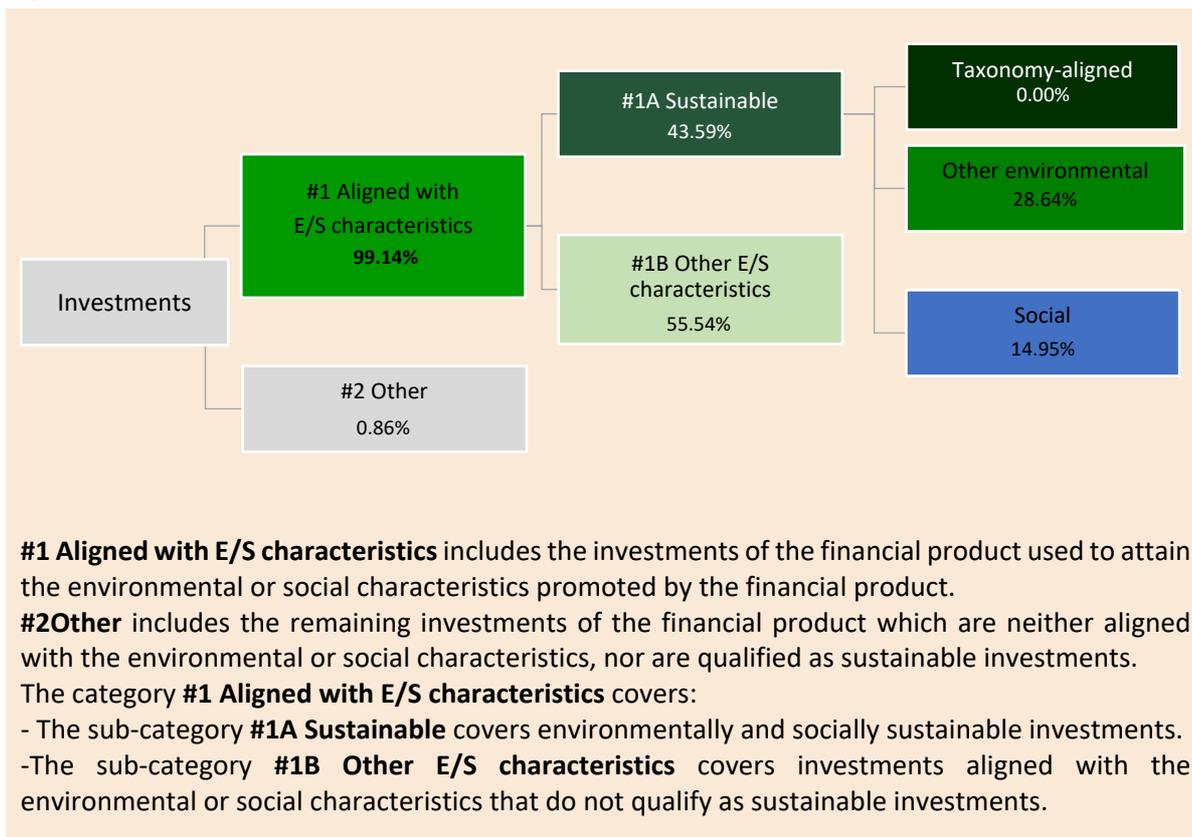

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
TOYOTA MOTOR CORP	Consumer Discretionary	Automobiles & Components	Japan	3.04%

<i>Cash</i>	<i>Cash</i>	<i>0.83%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

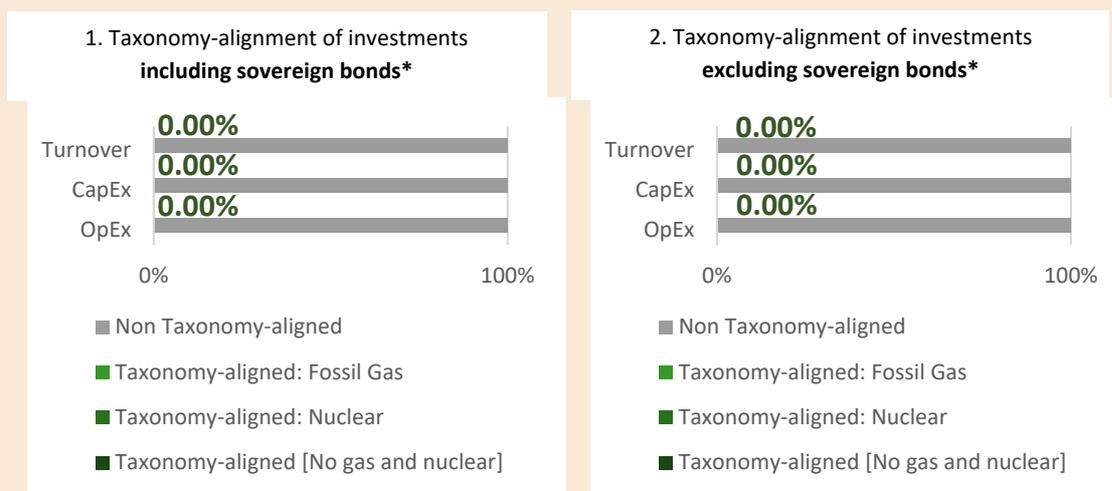

- **turnover** reflecting the share of revenue from green activities of investee companies  
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.00%.

 are sustainable investments with an

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.64%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.95%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

#### **● How does the reference benchmark differ from a broad market index ?**

MSCI Pacific ESG Broad CTB Select Index is an equity index based on the MSCI Pacific Index representative of the large and mid cap securities across 5 Developed Markets (DM) countries in the Pacific region (the "Parent Index").

The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

#### **● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

#### **● How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

#### **● How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI MSCI EUROPE CLIMATE PARIS ALIGNED PAB

**Legal entity identifier:** 213800S12GFSBFT69J81

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

This report is based on the sub-fund's portfolio composition as of 1st March 2024, before the liquidation process started.

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **76.3%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI Europe Climate Change Paris Aligned Select Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### ● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash. The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

-Scope 1 emissions: those from sources owned or controlled by the company.

-Scope 2 emissions: those caused by the generation of electricity purchased by the company.

-Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

The sustainability indicator used is the weighted average greenhouse gas (GHG) intensity (the "WACI") of the ESG reference benchmark that is measured against the weighted average greenhouse gas (GHG) intensity (the "WACI") score of the Parent index.

At the end of the period:

- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Europe Climate Change Paris Aligned Select Index is 172
- the weighted average greenhouse gas (GHG) intensity (the "WACI") of the MSCI Europe Index (Parent Index) is 570

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the "WACI") was 190.83

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 01/03/2024**

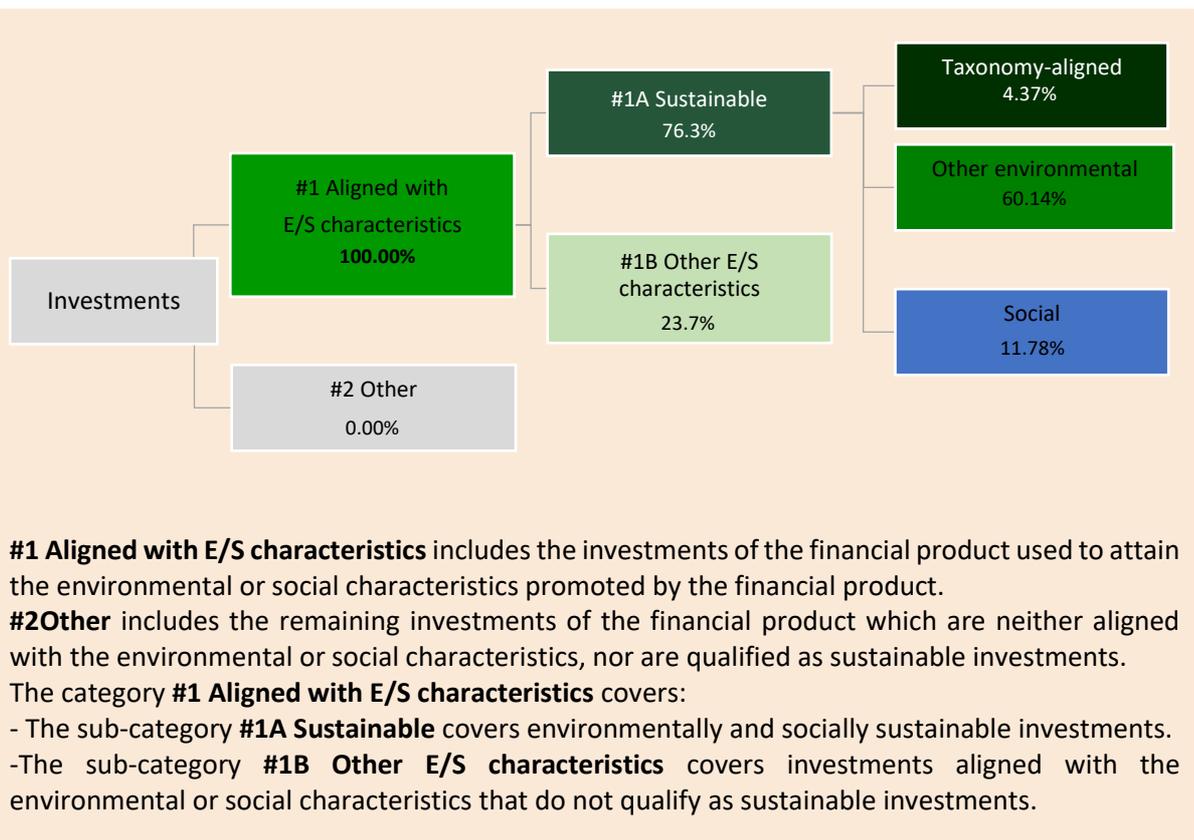

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	NETHERLANDS	4.97%
NOVO NORDISK A/S-B	Health Care	Pharmaceuticals Biotec & Life Sciences	DENMARK	4.35%
SCHNEIDER ELECT SE	Industrials	Capital Goods	FRANCE	3.83%
SAP SE / XETRA	Information Technology	Software & Services	GERMANY	3.70%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	FRANCE	3.25%
NOVARTIS AG-REG	Health Care	Pharmaceuticals Biotec & Life Sciences	SWITZERLAND	2.77%
ASTRAZENECA GBP	Health Care	Pharmaceuticals Biotec & Life Sciences	UNITED KINGDOM	2.63%
ROCHE HLDG AG-GENUSS	Health Care	Pharmaceuticals Biotec & Life Sciences	SWITZERLAND	2.46%
IBERDROLA SA	Utilities	Electric Utilities	SPAIN	2.17%

L OREAL	Consumer Staples	Household & Personal Products	FRANCE	1.49%
SANOFI	Health Care	Pharmaceuticals Biotec & Life Sciences	FRANCE	1.43%
HSBC HOLDING PLC GBP	Financials	Banks	UNITED KINGDOM	1.25%
SIEMENS AG-REG	Industrials	Capital Goods	GERMANY	1.23%
GSK PLC	Health Care	Pharmaceuticals Biotec & Life Sciences	UNITED KINGDOM	1.14%
VESTAS WIND SYSTEMS A/S	Industrials	Capital Goods	DENMARK	1.13%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals Biotec & Life Sciences	17.81%
Industrials	Capital Goods	16.46%

Financials	Banks	7.41%
Consumer Discretionary	Consumer Durables & Apparel	7.09%
Information Technology	Semiconductors & Semiconductor Equipment	6.43%
Financials	Insurance	5.09%
Information Technology	Software & Services	4.87%
Financials	Financial Services	4.49%
Utilities	Electric Utilities	4.01%
Consumer Staples	Food, Beverage & Tobacco	3.60%
Materials	Chemicals	3.14%
Health Care	Health Care Equipment & Services	2.72%
Consumer Staples	Household & Personal Products	2.62%
Industrials	Commercial & Professional Services	1.95%
Communication Services	Telecommunication Services	1.82%
Industrials	Transportation	1.62%
Consumer Discretionary	Consumer Services	1.53%
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.13%

Information Technology	Technology Hardware & Equipment	1.08%
Consumer Discretionary	Automobiles & Components	0.74%
Consumer Staples	Consumer Staples Distribution & Retail	0.66%
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.59%
Communication Services	Media & Entertainment	0.57%
Real Estate	Real Estate Management & Development	0.56%
Materials	Construction Materials	0.55%
Materials	Paper & Forest Products	0.45%
Materials	Metals & Mining	0.35%
Utilities	Water Utilities	0.22%
Materials	Containers & Packaging	0.20%
Utilities	Independent Power&Renewable Electricity Producers	0.18%
Utilities	Multi-Utilities	0.06%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.37% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

**nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

**-turnover** reflecting the share of revenue from green activities of investee companies

**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**-operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

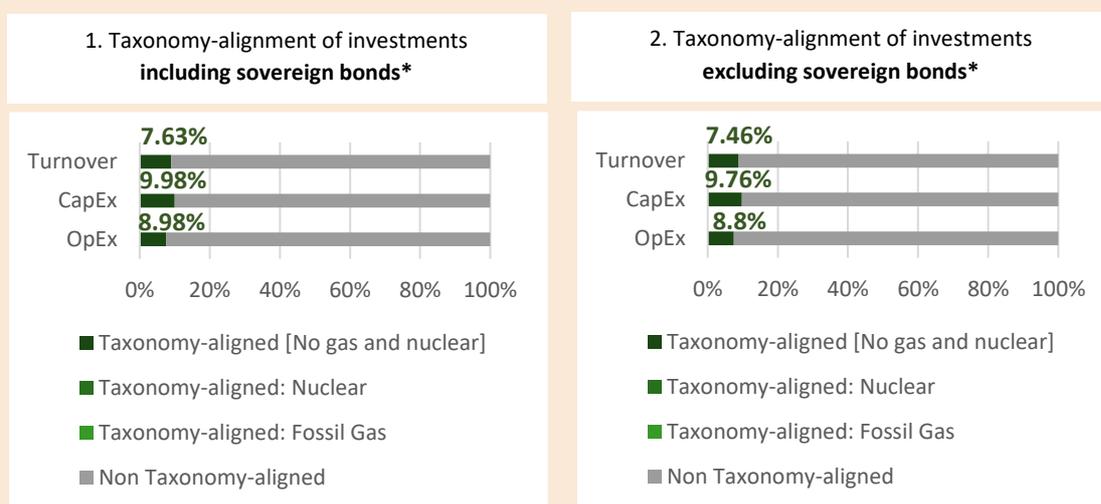

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 01/03/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 4.17%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 4.30%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was 60.14% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.78%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The MSCI Europe Climate Change Paris Aligned Select Index is an equity index based on the MSCI Europe Index (Parent Index) representative of the large and mid-cap securities across 15 Developed Markets countries in Europe (as of March 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI MSCI WORLD CLIMATE PARIS ALIGNED PAB

**Legal entity identifier:** 213800MMM38NXMDMHQ95

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **43.79%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI World Climate Change Paris Aligned Select Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO2) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI World Climate Change Paris Aligned Select Index (the "Index") aims to reduce its greenhouse gases (GHG) intensity by at least 50% when compared to the Parent Index, and is designed to meet the year on year 7% decarbonisation target.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI World Climate Change Paris Aligned Low Carbon Select Net USD Index is 111.38.
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI World Climate Change Index is 125.486.

● **... and compared to previous periods?**

The previous period weighted average greenhouse gas (GHG) intensity of the index (the WACI) was 128.519

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

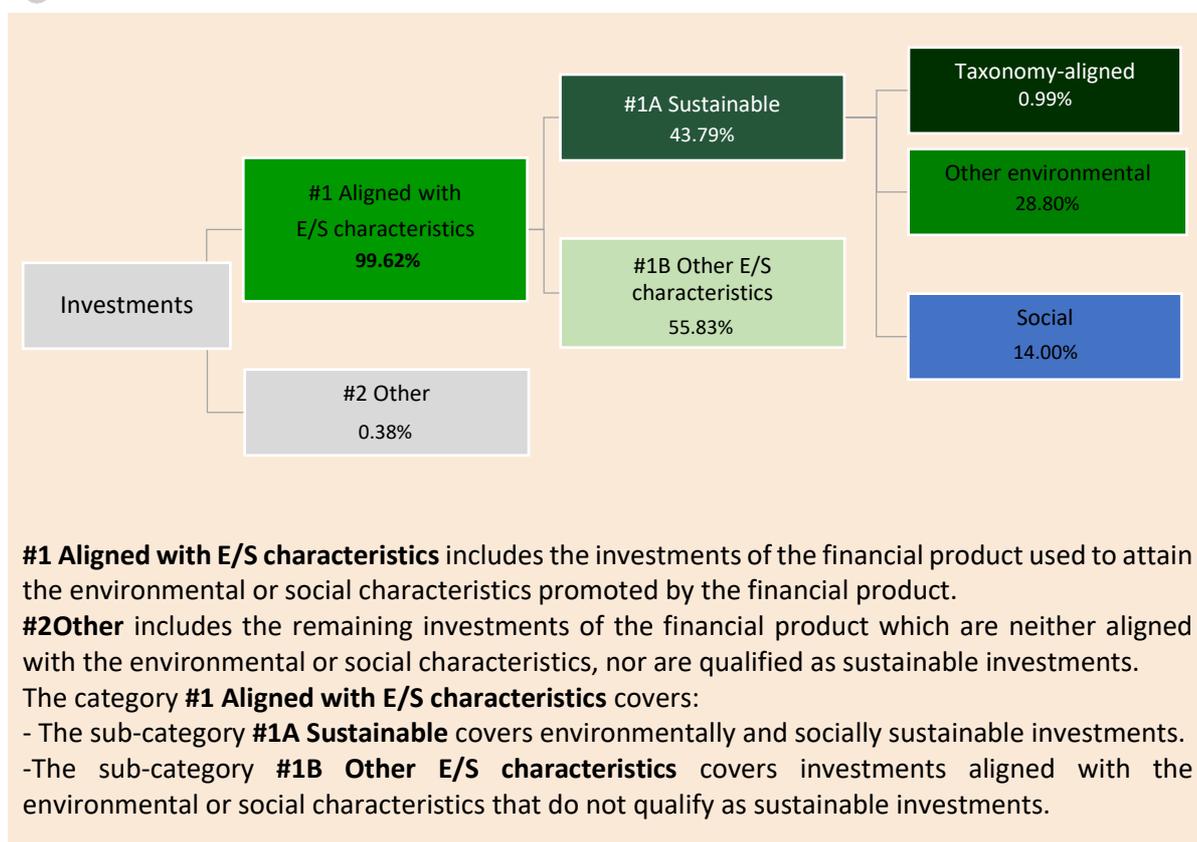

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	4.68%
APPLE INC	Information Technology	Technology Hardware & Equipment	United States	4.45%

<i>Cash</i>	<i>Cash</i>	<i>0.29%</i>

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
 - **turnover** reflecting the share of revenue from green activities of investee companies  
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

the fund invested 0.99% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

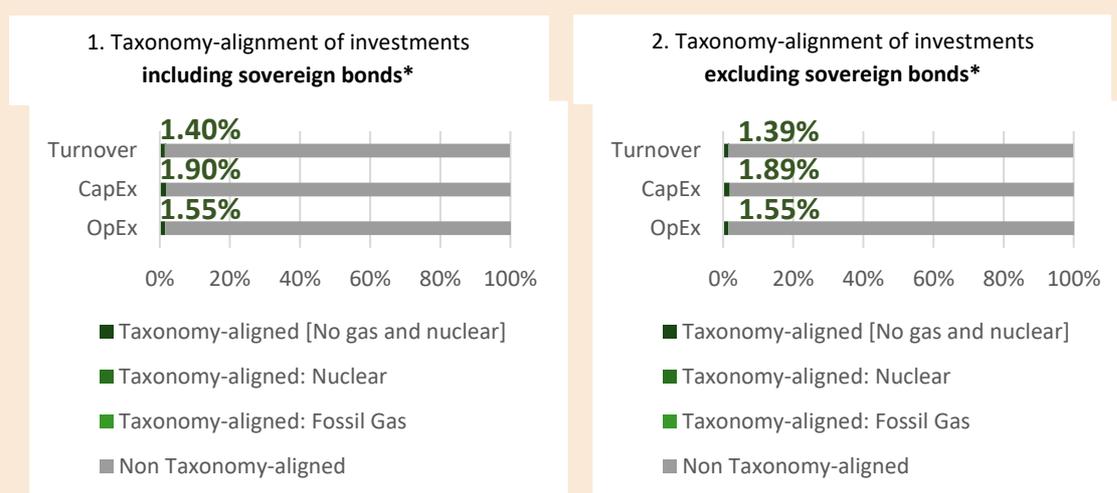

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.91%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.65%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.80%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 14.00%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The MSCI World Climate Change Paris Aligned Select Index is an equity index based on the MSCI World Index (Parent Index) representative of the large and mid-cap markets across 23 developed countries (as of March 2020). The index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI EURO CORP 0-1Y ESG

Legal entity identifier: 213800LLBNM6TDFBXD07

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **61.55%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Iboxx MSCI ESG EUR Corporates 0-1 TCA Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the iBoxx MSCI ESG EUR Corporates 0-1 TCA Index is 7.441
- the MSCI ESG score of the iBoxx Euro Corporates is 7.279

- **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 7.533

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

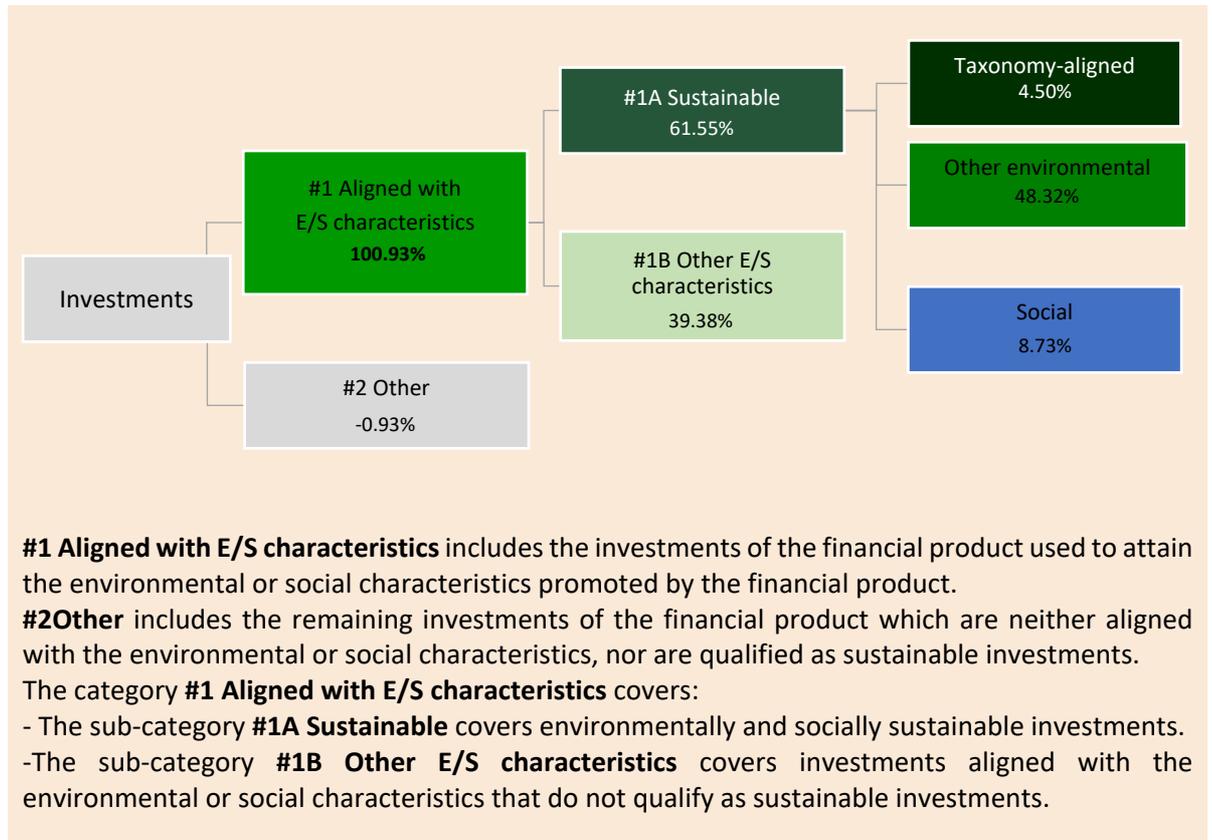

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
RABOBK 4.125% 07/25	Corporates	Banking	Netherlands	1.42%
GS 3.375% 03/25	Corporates	Banking	United States	1.00%
BFCM 0.01% 03/25 EMTN	Corporates	Banking	France	0.82%
BFCM 1% 05/25 EMTN	Corporates	Banking	France	0.80%
ABNANV 3.75% 04/25 EMTN	Corporates	Banking	Netherlands	0.76%
MBGGR 2.625% 04/25 EMTN	Corporates	Consumer Discretionary	Netherlands	0.76%

BFCM 1.25% 14/01/25	Corporates	Banking	France	0.66%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	36.32%
Corporates	Consumer Staples	13.07%
Corporates	Consumer Discretionary	11.80%
Corporates	Communications	6.54%
Corporates	Transportation	6.24%

<i>Corporates</i>	<i>Capital Goods</i>	5.51%
<i>Corporates</i>	<i>Technology</i>	4.21%
<i>Corporates</i>	<i>Electric</i>	3.71%
<i>Corporates</i>	<i>Basic Industry</i>	3.11%
<i>Corporates</i>	<i>Real Estate (REIT)</i>	2.86%
<i>Corporates</i>	<i>Other Financials</i>	2.78%
<i>Corporates</i>	<i>Natural Gas</i>	1.42%
<i>Corporates</i>	<i>BROKERAGE</i>	1.31%
<i>Corporates</i>	<i>Insurance</i>	1.10%
<i>Corporates</i>	<i>Other Utilities</i>	0.48%
<i>Cash</i>	<i>Cash</i>	-0.47%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.50% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

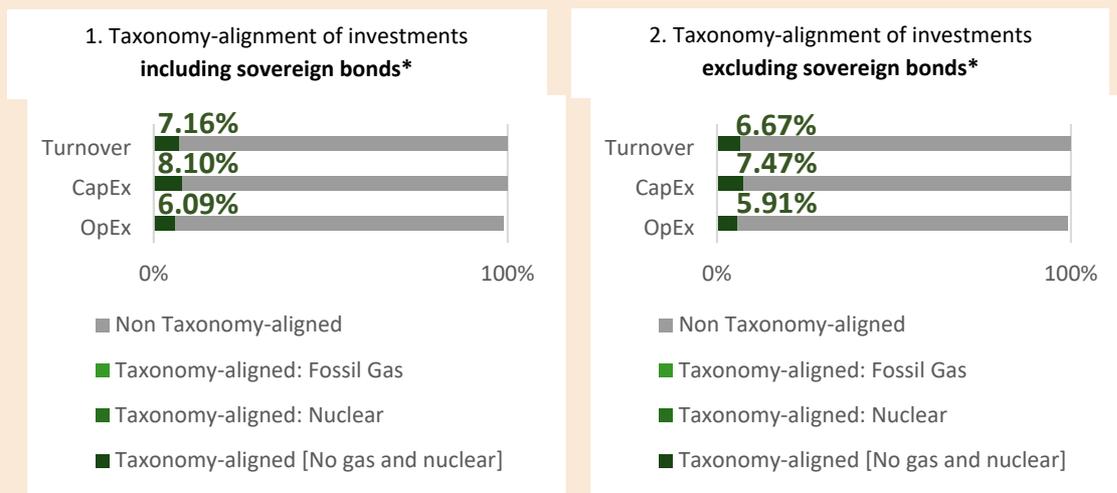

**Taxonomy-aligned activities** are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.26% and the share of investment in enabling activities was 2.36%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 5.31%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.32%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 8.73%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Iboxx MSCI ESG EUR Corporates 0-1 TCA Index is a bond index representative of euro-denominated, Investment Grade, fixed-rate bonds issued by private companies (known as 'corporate bonds') with a residual maturity ranging from 1 month to 1 year and applies additional sector and ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI GLOBAL AGG SRI

Legal entity identifier: 213800B37T1WLWBOYS44

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **13.65%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, Bloomberg MSCI Global Aggregate 500MM ex Securitized Sustainable SRI Sector Neutral Index. This is a bond index, representative of the global fixed-rate investment grade debt market from both developed and emerging markets countries that follows the rules of the Bloomberg MSCI Global Aggregate 500MM ex Securitized Index (the "Parent Index") and applies sector and ESG criteria for security eligibility. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics

promoted by the financial product are attained.

rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Global Aggregate 500MM ex Securitized Sustainable SRI Sector Neutral Index is 7.514
- the MSCI ESG score of the Bloomberg Global Aggregate 500MM ex Securitized Index (the "Parent Index") is 6.525

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 7.545.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

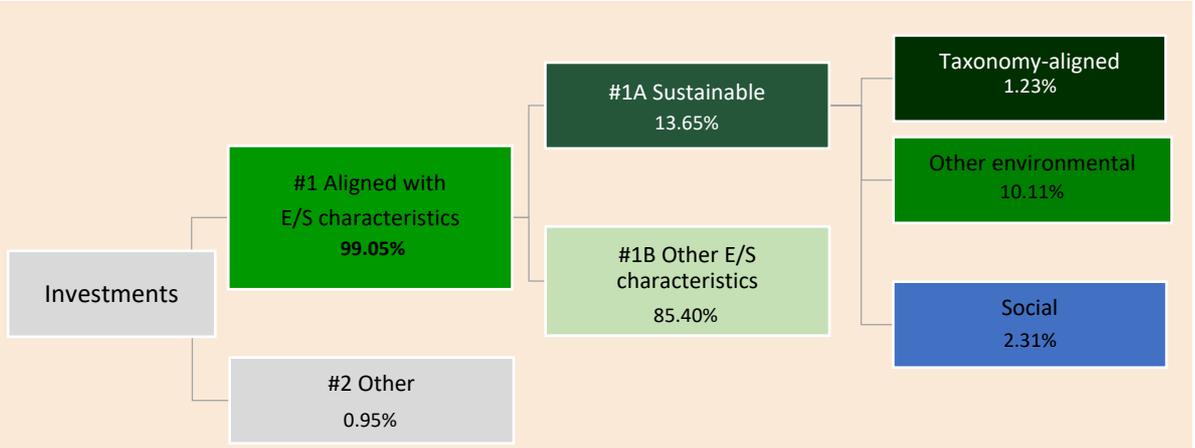

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>65.63%</i>

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.23% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

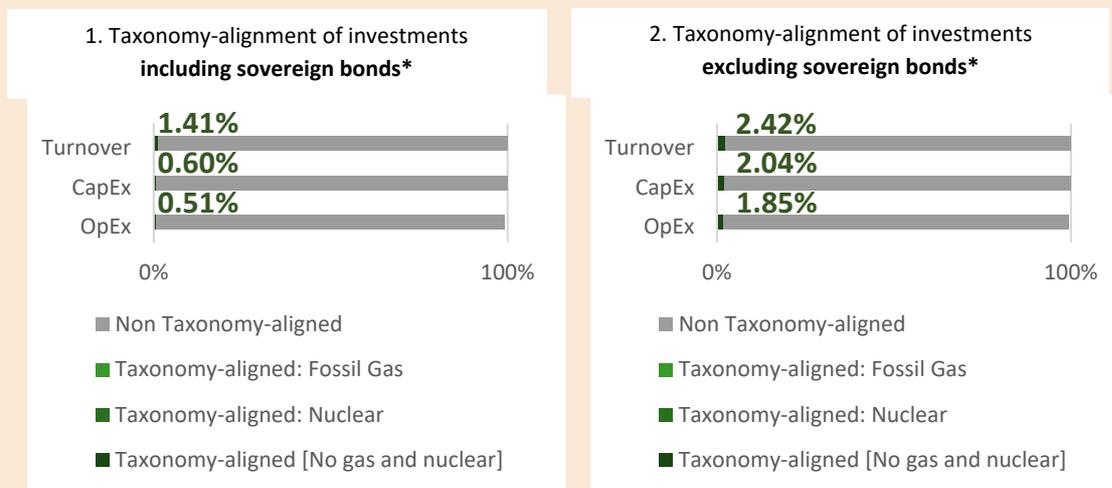

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.16%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.31%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **10.11%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 2.31%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Bloomberg MSCI Global Aggregate 500MM ex Securitized Sustainable SRI Sector Neutral Index is a bond index, representative of the global fixed-rate investment grade debt market from both developed and emerging markets countries that follows the rules of the Bloomberg MSCI Global Aggregate 500MM ex Securitized Index (the Parent Index) and applies sector and ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI GLOBAL AGG  
SRI 1-5

Legal entity identifier:  
213800KMRNQ4SR4RKX08

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **15.52%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, Bloomberg MSCI Global Aggregate 500MM ex Securitized 1-5 Year Sustainable SRI Sector Neutral Index. This is a bond index, representative of the global fixed-rate investment grade debt market from both developed and emerging markets countries with a remaining maturity between 1 and 5 years following the rules of the Global Agg ex Securitized 500mn 1-5 Year (the ""Parent Index"" ) and applies sector and ESG criteria for security eligibility. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics

promoted by the financial product are attained.

rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Global Aggregate 500MM ex Securitized 1-5 Year Sustainable SRI Sector Neutral Index is 7.612
- the MSCI ESG score of the Bloomberg Global Agg ex Securitized 500mn 1-5 Year Index is 6.525

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 7.676

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.41% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

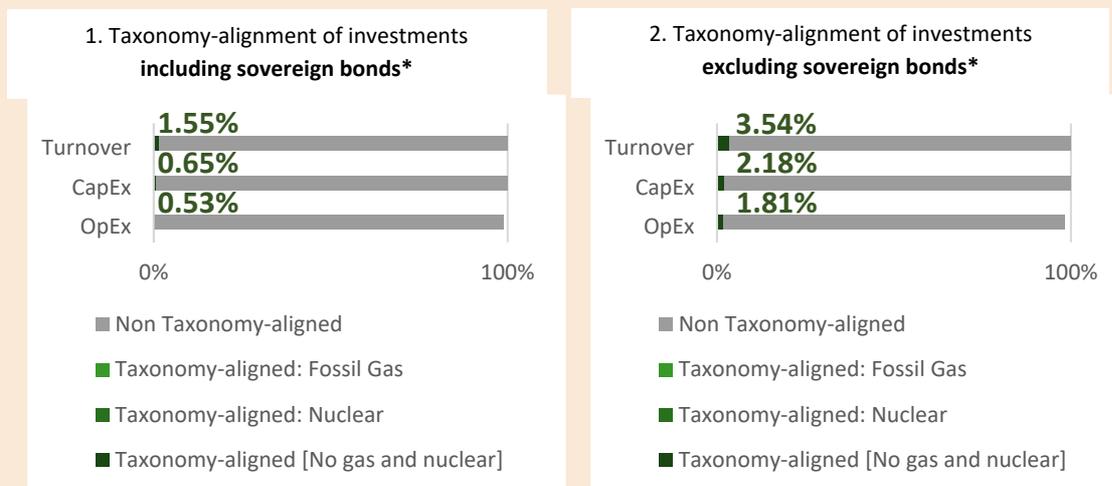

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.13%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.06%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **10.89%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 3.22%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Bloomberg MSCI Global Aggregate 500MM ex Securitized 1-5 Year Sustainable SRI Sector Neutral Index is a bond index, representative of the global fixed-rate investment grade debt market from both developed and emerging markets countries with a remaining maturity between 1 and 5 years following the rules of the Global Agg ex Securitized 500mn 1-5 Year (the Parent Index) and applies sector and ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI GLOBAL CORP  
SRI 1-5Y

Legal entity identifier:  
222100AVKM1M7Q2EFT37

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **46.56%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index is 7.29

- the MSCI ESG score of the Bloomberg Global Corporate 1-5 Year Index (the "Parent Index") is 6.89

- ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.302

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

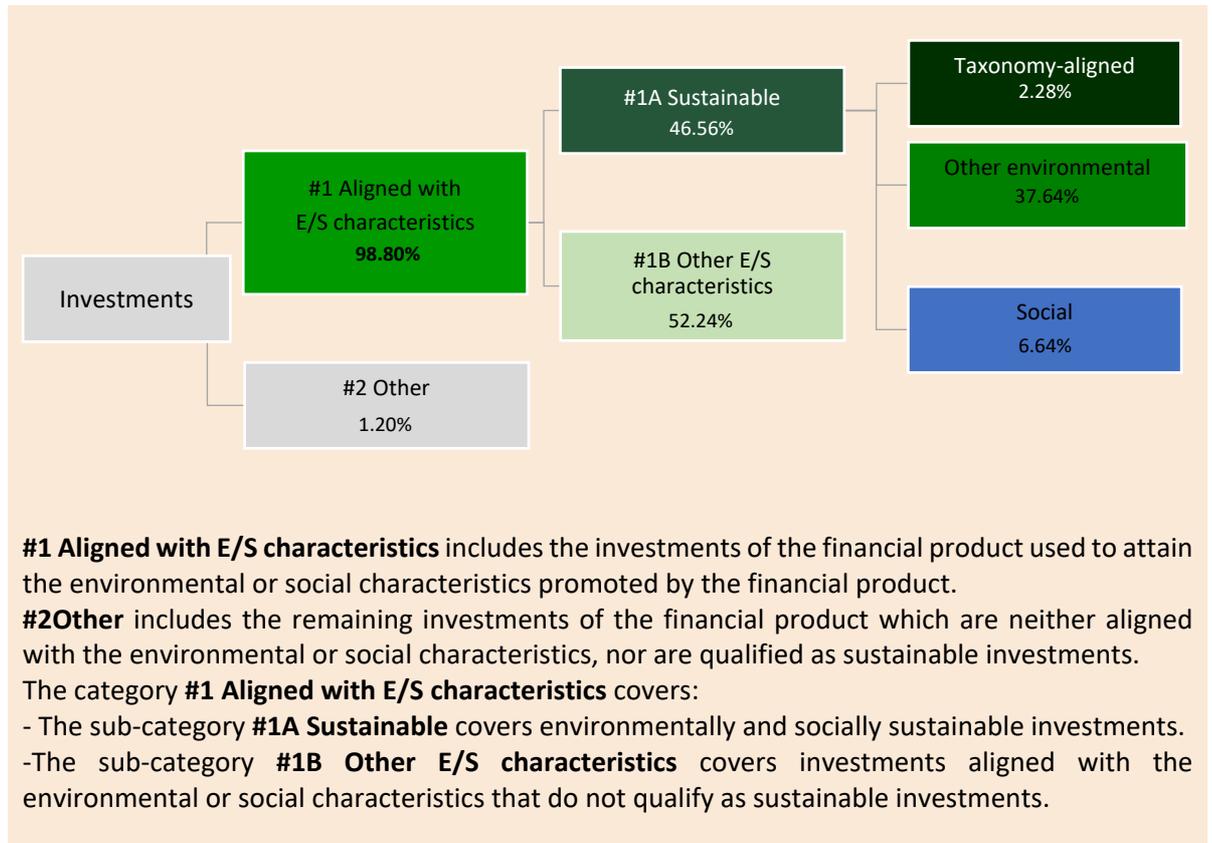

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
SWAP - GBP/+USD 1.3189371 02/10/2024	Forex	Forex		0.73%
TERME +GBP/-USD 1.314628 02/10/2024	Forex	Forex		0.31%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	44.38%
Corporates	Consumer Staples	10.28%
Corporates	Consumer Discretionary	8.54%
Corporates	Technology	6.80%
Corporates	Communications	5.54%

<i>Corporates</i>	<i>Insurance</i>	<i>4.45%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>4.09%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>2.57%</i>
<i>Corporates</i>	<i>Transportation</i>	<i>2.26%</i>
<i>Corporates</i>	<i>Electric</i>	<i>2.04%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>1.79%</i>
<i>Corporates</i>	<i>Energy</i>	<i>1.62%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>1.38%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>1.37%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>0.92%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.91%</i>
<i>Corporates</i>	<i>Natural Gas</i>	<i>0.64%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>0.37%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>0.14%</i>
<i>Cash</i>	<i>Cash</i>	<i>-0.08%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.28% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

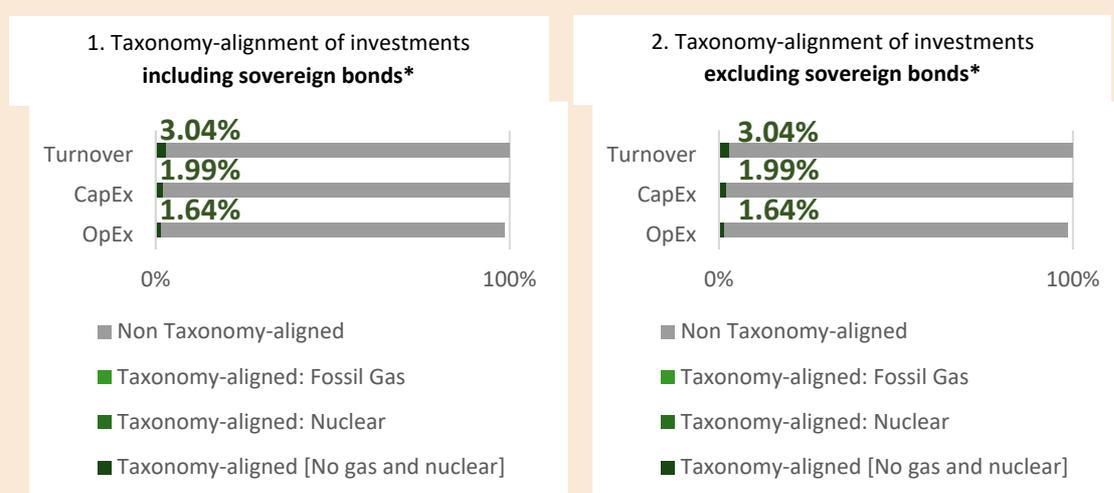

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 0.64%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.42%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **37.64%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 6.64%.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

 **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● ***How does the reference benchmark differ from a broad market index ?***

Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX EURO CORPORATE SRI

Legal entity identifier: 2221000A7N8FW0MB1V42

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 67.87% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI Euro Corporate ESG Sustainability SRI Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Euro Corporate ESG Sustainability SRI Index is 7.611
- the MSCI ESG score of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") is 7.26

- ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.7

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

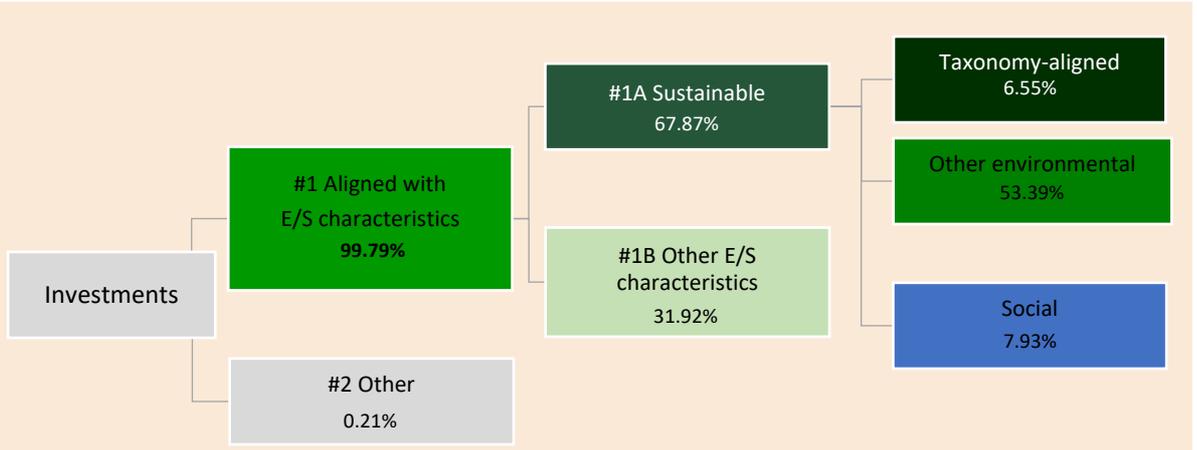

Largest Investments	Sector	Sub-Sector	Country	% Assets
UBS VAR 03/29	Corporates	Banking	Switzerland	0.18%
JPM VAR 03/30 EMTN	Corporates	Banking	United States	0.12%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

**What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.  
**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.  
 The category **#1 Aligned with E/S characteristics** covers:  
 - The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.  
 - The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**In which economic sectors were the investments made ?**

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>40.15%</i>
<i>Corporates</i>	<i>Consumer Staples</i>	<i>12.04%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>7.57%</i>
<i>Corporates</i>	<i>Communications</i>	<i>7.27%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>5.47%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>4.68%</i>
<i>Corporates</i>	<i>Transportation</i>	<i>3.87%</i>

<i>Corporates</i>	<i>Technology</i>	<i>3.72%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>3.22%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>3.11%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>2.94%</i>
<i>Corporates</i>	<i>Electric</i>	<i>2.61%</i>
<i>Corporates</i>	<i>Natural Gas</i>	<i>1.18%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>0.93%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>0.69%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>0.34%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>0.13%</i>
<i>Corporates</i>	<i>Energy</i>	<i>0.11%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.00%</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.00%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.55% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

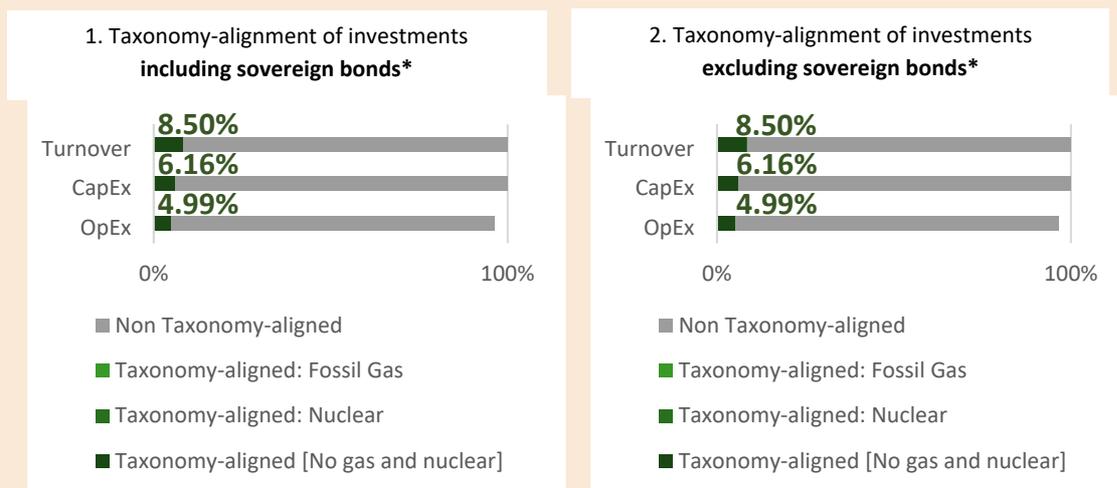

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.19% and the share of investment in enabling activities was 1.97%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 6.79%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **53.39%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.93%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

Bloomberg MSCI Euro Corporate ESG Sustainability SRI Index is a bond index, representative of the corporate fixed-rate investment grade Euro denominated securities, that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the Parent Index) and applies sector and additional ESG criteria for security eligibility.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX EURO AGG SRI

Legal entity identifier: 213800MNGINQA3GWTZ79

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **24.51%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI Euro Aggregate Sustainable SRI Sector Neutral Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Euro Aggregate Sustainable SRI Sector Neutral Index is 7.909
- the MSCI ESG score of the Bloomberg Euro Aggregate Index (the "Parent Index") is 7.593

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 7.820

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

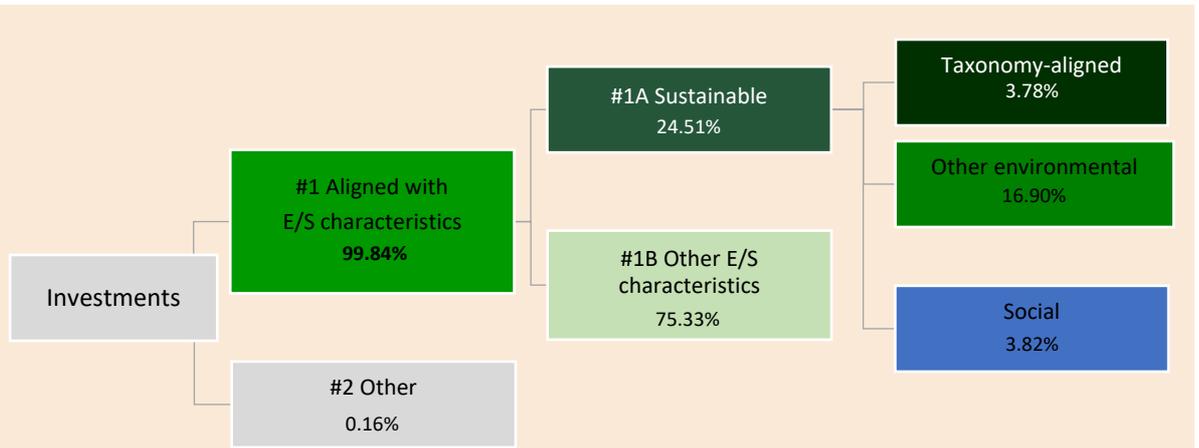

Largest Investments	Sector	Sub-Sector	Country	% Assets
OAT 2.75% 10/27	Treasuries	Treasuries	France	0.46%
OAT 2.5% 5/30	Treasuries	Treasuries	France	0.46%
OAT 1.5% 5/31	Treasuries	Treasuries	France	0.44%

OAT % 11/30	Treasuries	Treasuries	France	0.35%
OAT 5.50% 97-04/29	Treasuries	Treasuries	France	0.35%
OAT 2% 11/32	Treasuries	Treasuries	France	0.34%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

**What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.  
**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.  
 The category **#1 Aligned with E/S characteristics** covers:  
 - The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.  
 -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**In which economic sectors were the investments made ?**

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>54.78%</i>
<i>Corporates</i>	<i>Banking</i>	<i>11.00%</i>

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.78% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

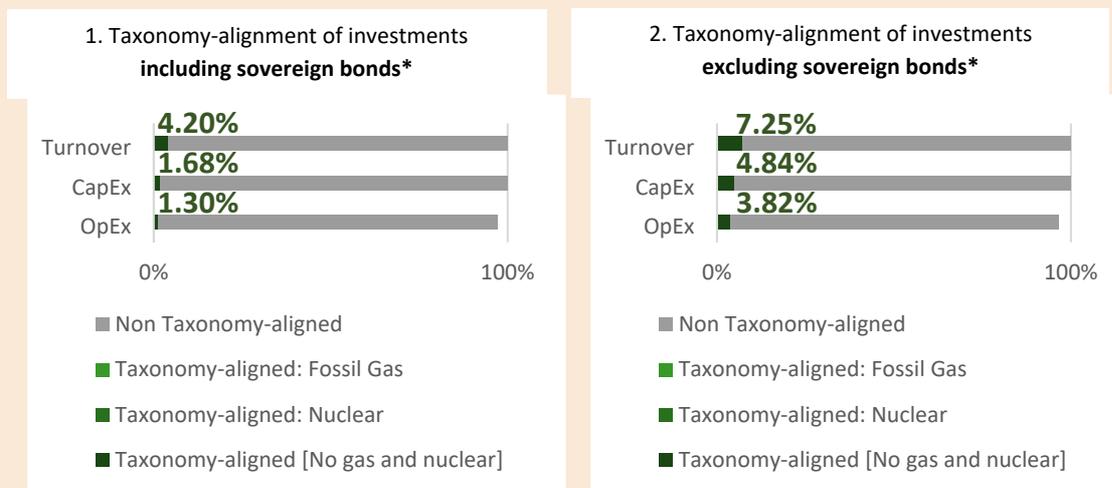

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 0.40%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.48%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **16.90%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 3.82%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Bloomberg MSCI Euro Aggregate Sustainable SRI Sector Neutral Index is a bond index, representative of the fixed-rate investment grade Euro denominated securities universe that follows the rules of the Bloomberg Euro Aggregate Index (the Parent Index) and applies sector and ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX EURO CORPORATE SRI 0-3 Y

Legal entity identifier: 5493003U13Y6UYB5XW65

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.48%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI Euro Corporate ESG BBB+ Sustainability SRI 0-3 Year Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Euro Corporate ESG BBB+ Sustainability SRI 0-3 Year Index is 7.59
- the MSCI ESG score of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") is 7.26

- ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.7

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

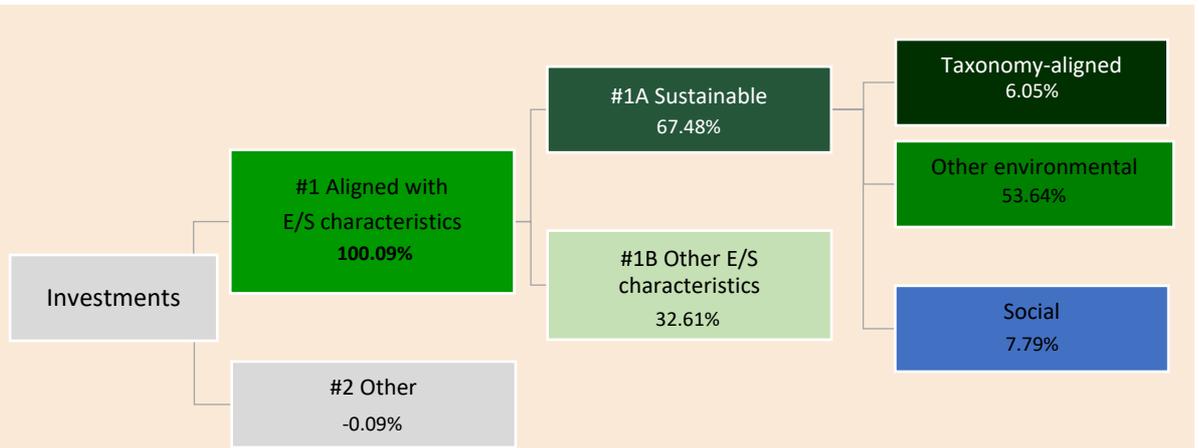

Largest Investments	Sector	Sub-Sector	Country	% Assets
RABOBK 4.125% 07/25	Corporates	Banking	Netherlands	0.28%
DB 1.625% 01/27 EMTN	Corporates	Banking	Germany	0.26%
UBS VAR 10/26	Corporates	Banking	Switzerland	0.25%
BNP VAR 01/27 EMTN	Corporates	Banking	France	0.24%
JPM 1.638% 05/28	Corporates	Banking	United States	0.24%
GS 1.625% 07/26	Corporates	Banking	United States	0.23%

SANTAN 3.75% 01/26 EMTN	Corporates	Banking	Spain	0.21%
ISPIM VAR 03/28 EMTN	Corporates	Banking	Italy	0.21%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

**What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.  
**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.  
 The category **#1 Aligned with E/S characteristics** covers:  
 - The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.  
 -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**In which economic sectors were the investments made ?**

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>49.51%</i>
<i>Corporates</i>	<i>Consumer Staples</i>	<i>9.58%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>8.20%</i>
<i>Corporates</i>	<i>Communications</i>	<i>5.84%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>4.09%</i>
<i>Corporates</i>	<i>Technology</i>	<i>3.78%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>3.61%</i>

<i>Corporates</i>	<i>Transportation</i>	<i>3.11%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>2.84%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>2.64%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>2.33%</i>
<i>Corporates</i>	<i>Electric</i>	<i>1.81%</i>
<i>Corporates</i>	<i>Natural Gas</i>	<i>0.89%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>0.73%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>0.67%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>0.28%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>0.22%</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>-0.13%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.05% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

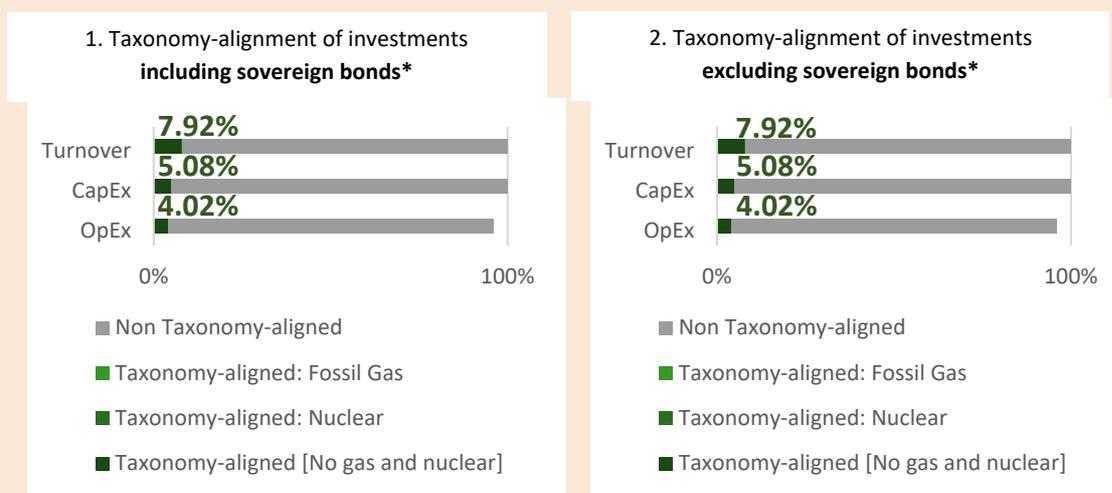

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.18% and the share of investment in enabling activities was 1.69%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 5.96%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **53.64%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities are** expressed as a share of:

**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for

environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.79%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

Bloomberg MSCI Euro Corporate ESG BBB+ Sustainability SRI 0-3 Year Index is a bond index representative of the investment grade, euro-denominated bonds universe that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the Parent Index) with a remaining maturity constraint of 0 & 3 years and applies additional sector and ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI INDEX US  
CORP SRI

Legal entity identifier:  
549300JEQE3CM0S0ZJ51

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.23%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI US Corporate ESG Sustainability SRI Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company.

The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI US Corporate ESG Sustainability SRI Index is 6.926

- the MSCI ESG score of the Bloomberg US Aggregate Corporate Index (the "Parent Index") is 6.583

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 6.951

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

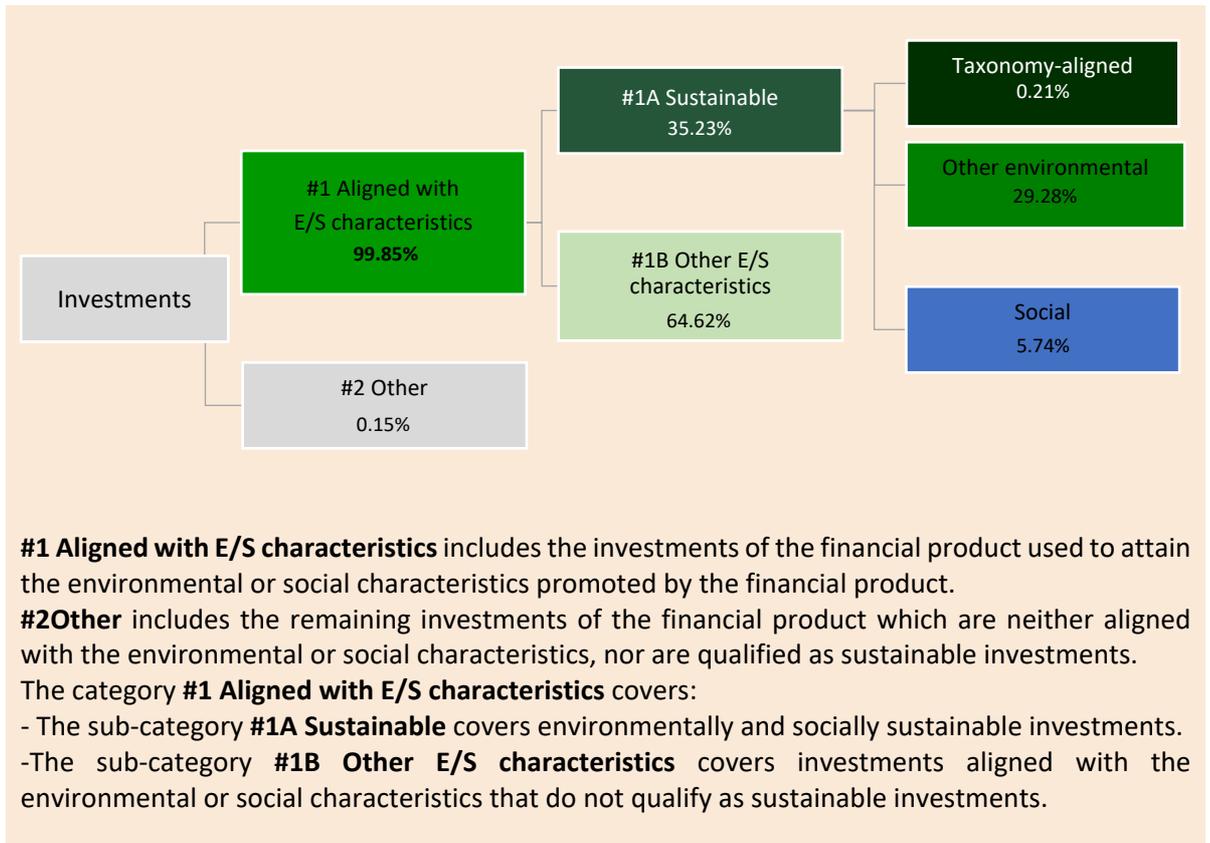

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
CVS 5.05% 03/48	Corporates	Consumer Staples	United States	0.14%
PFE 5.3% 05/53	Corporates	Consumer Staples	Singapore	0.13%
AT&T 3.55% 09/55	Corporates	Communications	United States	0.12%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	28.07%
Corporates	Consumer Staples	15.82%
Corporates	Technology	11.93%
Corporates	Communications	9.22%
Corporates	Consumer Discretionary	6.90%

<i>Corporates</i>	<i>Insurance</i>	5.46%
<i>Corporates</i>	<i>Energy</i>	4.12%
<i>Corporates</i>	<i>Capital Goods</i>	4.02%
<i>Corporates</i>	<i>Electric</i>	3.14%
<i>Corporates</i>	<i>Real Estate (REIT)</i>	2.76%
<i>Corporates</i>	<i>Transportation</i>	2.32%
<i>Corporates</i>	<i>Basic Industry</i>	2.11%
<i>Corporates</i>	<i>BROKERAGE</i>	1.68%
<i>Corporates</i>	<i>Natural Gas</i>	0.90%
<i>Corporates</i>	<i>Finance Companies</i>	0.88%
<i>Corporates</i>	<i>Other Utilities</i>	0.25%
<i>Forex</i>	<i>Forex</i>	0.20%
<i>Corporates</i>	<i>Other Industrials</i>	0.12%
<i>Corporates</i>	<i>Other Financials</i>	0.05%
<i>Cash</i>	<i>Cash</i>	0.07%

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.21% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

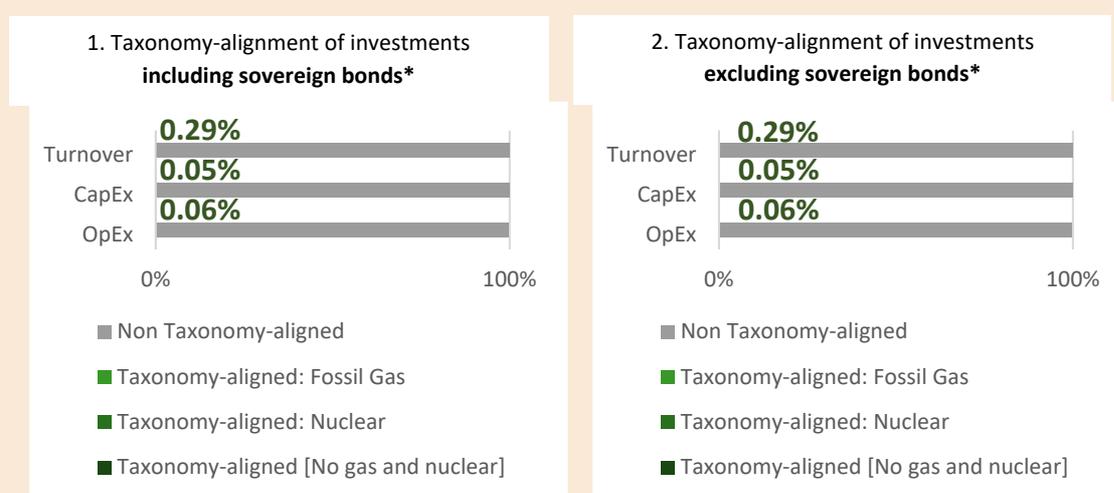

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.04%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.36%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **29.28%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.74%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

Bloomberg MSCI US Corporate ESG Sustainability SRI Index is a bond index representative of the corporate fixed-rate, investment grade, USD denominated securities that follows the rules of the Bloomberg US Aggregate Corporate Index (the Parent Index) and applies sector and additional ESG criteria for security eligibility.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI US AGG SRI

Legal entity identifier:  
213800MEFG6O5JHBKE31

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **12.87%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI US Aggregate ex Securitized Sustainable SRI Sector Neutral Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI US Aggregate ex Securitized Sustainable SRI Sector Neutral Index is 7.111
- the MSCI ESG score of the Bloomberg US Aggregate ex Securitized Index (the "Parent Index") is 6.571

● ***... and compared to previous periods?***

At the end of the previous period, the MSCI ESG score of the index was 7.203.

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

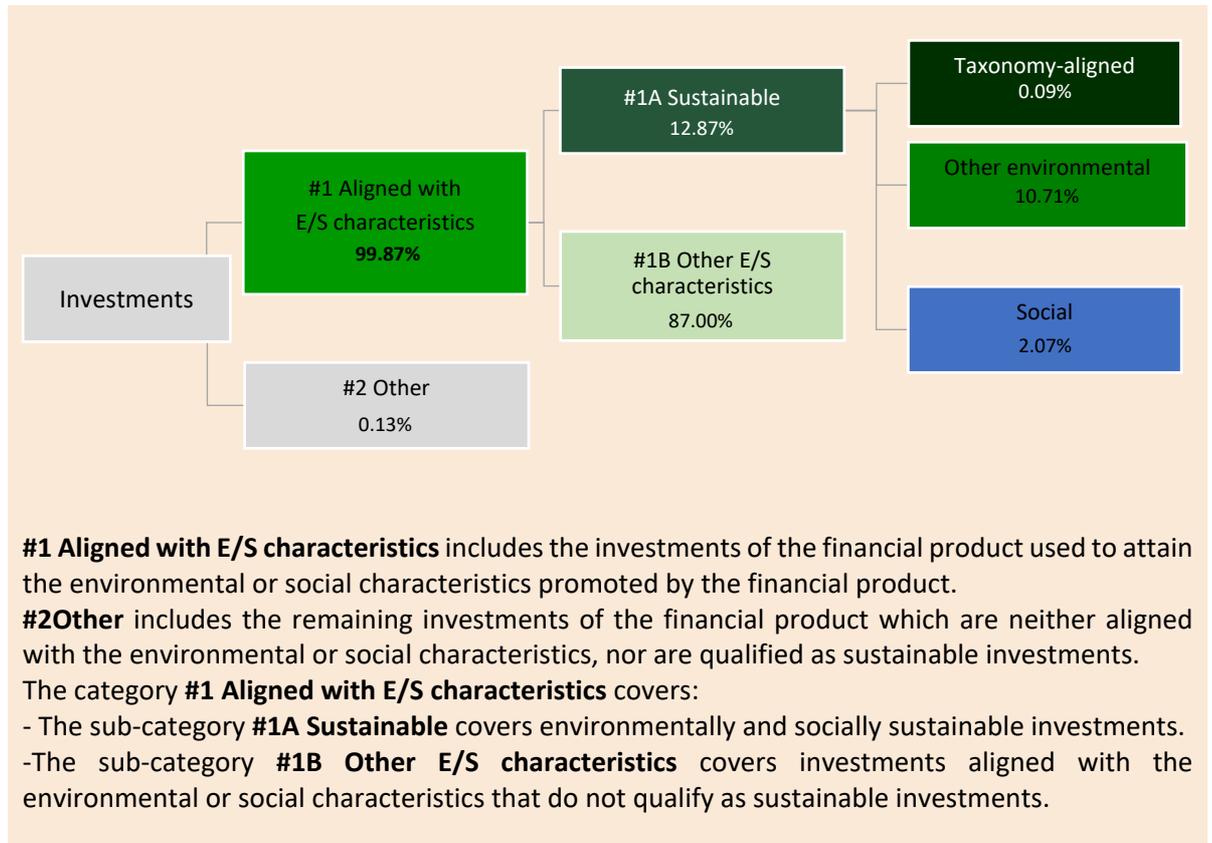

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
US TSY 4.375% 05/34	Treasuries	Treasuries	United States	0.71%

## To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.09% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

### ● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

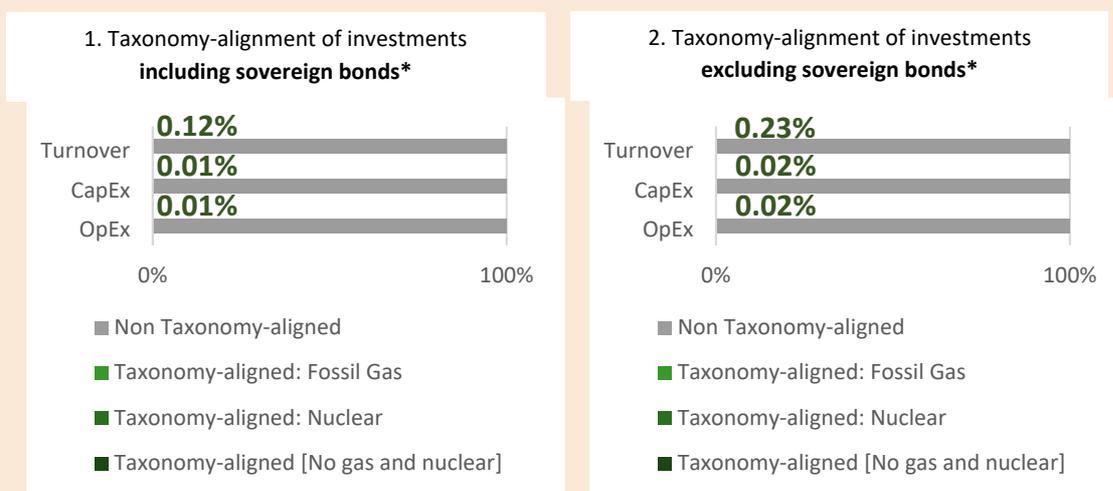

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### ● **What was the share of investments in transitional and enabling activities ?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies **-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.01%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 0.25%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **10.71%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 2.07%.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

Bloomberg MSCI US Aggregate ex Securitised Sustainable SRI Sector Neutral Index tracks fixed-rate, investment-grade debt with at least USD500mn par amount outstanding. The Index is based on the US Aggregate ex Securitised index (the Parent Index) and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted because they are inconsistent with certain values-based business involvement criteria and those issuers with a red MSCI ESG Controversy Score. Additionally, the market of the three sectors (Treasury, Government-Related and Corporate) are

reweighted to match the weights of these three sectors in the Parent Index. The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index integrating an environmental, social and governance (ESG) rating. The Index methodology is constructed using a Best-in-class approach: best ranked companies are selected to construct the Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI MSCI EMU CLIMATE NET ZERO AMBITION PAB

Legal entity identifier: 2138007S1QFFN8UYKB61

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **90.58%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (MSCI EMU Climate Paris Aligned Filtered Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI EMU Climate Paris Aligned Filtered Index is constructed using an optimization process that aims to achieve replicability and investability

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI EMU Climate Paris Aligned Filtered Index is 167.791.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI EMU Index is 527.035.

● ***... and compared to previous periods?***

At the end of the previous period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index was 195.744

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	6.04%
SAP SE / XETRA	Information Technology	Software & Services	Germany	4.78%
SCHNEIDER ELECT SE	Industrials	Capital goods	France	4.37%
LVMH MOET HENNESSY LOUIS VUI	Consumer Discretionary	Consumer Durables & Apparel	France	4.04%
SIEMENS AG-REG	Industrials	Capital goods	Germany	3.14%
ALLIANZ SE-REG	Financials	Insurance	Germany	2.59%
SANOFI - PARIS	Health Care	Pharmaceuticals Biotech & Life Sciences	France	2.55%
FERROVIAL SE	Industrials	Capital goods	Netherlands	2.48%
MUENCHENER RUECKVER AG-REG	Financials	Insurance	Germany	2.05%
INDUSTRIA DE DISENO TEXTIL	Consumer Discretionary	Consumer Discretionary Distribution & Retail	Spain	1.92%
REDEIA CORP SA	Utilities	Electric Utilities	Spain	1.86%
AKZO NOBEL N.V.	Materials	Chemicals	Netherlands	1.86%
EDP RENOVAVEIS	Utilities	Independent Power & Renewable Electricity	Spain	1.72%

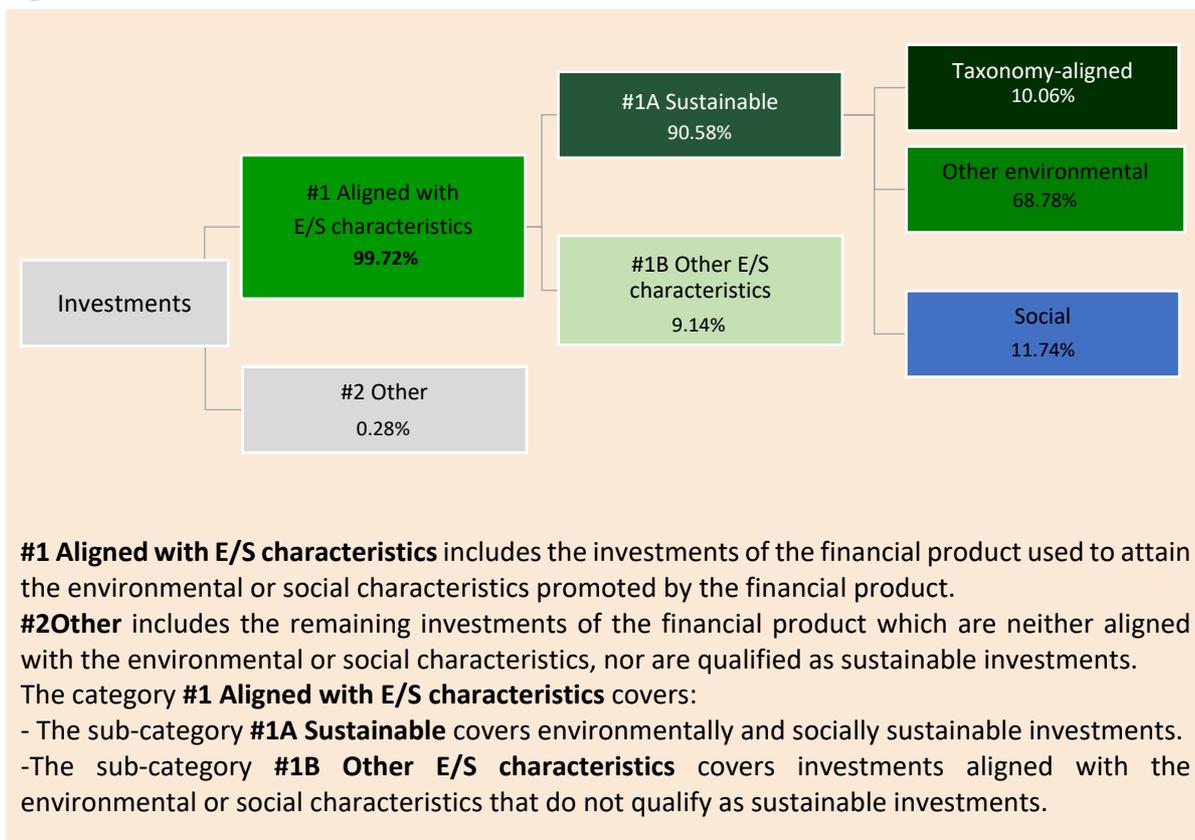

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

		Producers		
HERMES INTERNATIONAL	Consumer Discretionary	Consumer Durables & Apparel	France	1.71%
NORDEA BANK ABP	Financials	Banks	Finland	1.71%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>17.48%</i>
<i>Financials</i>	<i>Insurance</i>	<i>8.55%</i>
<i>Information Technology</i>	<i>Semiconductors &amp; Semiconductor Equipment</i>	<i>8.19%</i>

<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	7.55%
<i>Financials</i>	<i>Banks</i>	6.72%
<i>Information Technology</i>	<i>Software &amp; Services</i>	6.47%
<i>Health Care</i>	<i>Pharmaceuticals Biotech &amp; Life Sciences</i>	5.75%

<i>Forex</i>	<i>Forex</i>	<i>-0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.28%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 10.06% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

- Yes:
- In fossil gas       In nuclear energy
- No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

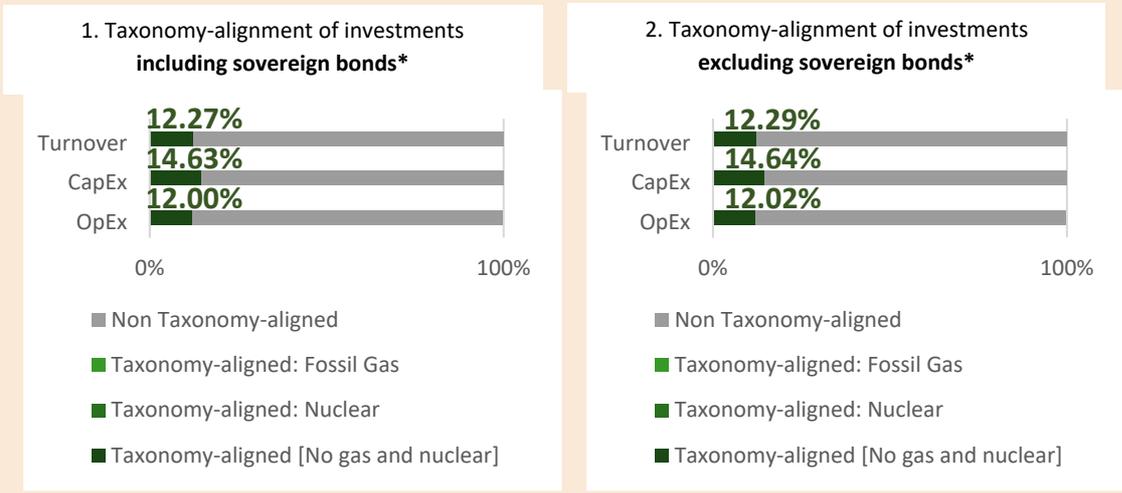

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.08% and the share of investment in enabling activities was 7.97%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 8.92%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **68.78%** at the end of the period. This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.74%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

### ● **How does the reference benchmark differ from a broad market index ?**

MSCI EMU Climate Paris Aligned Filtered Index tracks an equity index based on the MSCI EMU index representative of the large and mid-cap stocks across developed market countries in the European Economic and Monetary Union (the Parent Index). The Index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy, while aligning with the Paris Agreement requirements. The Index incorporate the Task Force on Climate-Related Financial Disclosures (TCFD) recommendations and are designed to exceed the minimum standards of the European Union Paris Aligned Benchmark.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

### ● **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI EUR CORPORATE BOND 1-5Y ESG

Legal entity identifier: 222100VHBKJHMDJL8J52

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **68.07%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI Euro Corporate 1-5 Year ESG Sustainability SRI Bond Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Euro Corporate 1-5 Year ESG Sustainability SRI Bond Index is 7.635

- the MSCI ESG score of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") is 7.26

● **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 7.764

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

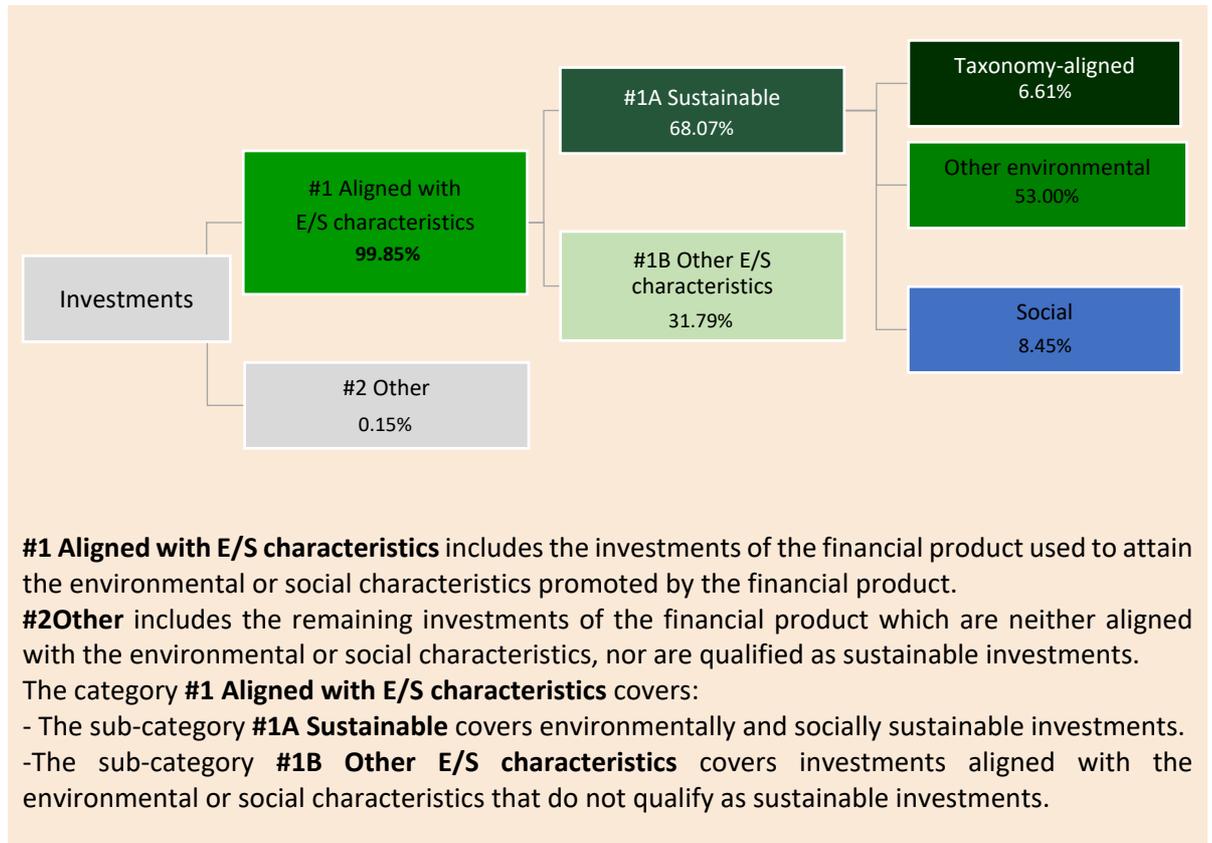

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
UBS VAR 03/29	Corporates	Banking	Switzerland	0.31%
AXASA VAR 05/49 EMTN	Corporates	Insurance	France	0.19%
JPM VAR 03/30 EMTN	Corporates	Banking	United States	0.19%
BFCM 3.125% 09/27 EMTN	Corporates	Banking	France	0.18%
MS 1.875% 04/27	Corporates	Banking	United States	0.18%
GS 1.625% 07/26	Corporates	Banking	United States	0.17%
UBS VAR 10/26	Corporates	Banking	Switzerland	0.17%
MS VAR 03/29	Corporates	Banking	United States	0.17%
BNP VAR 01/27 EMTN	Corporates	Banking	France	0.17%
SANFP 1.75% 9/26	Corporates	Consumer Staples	France	0.17%
BNFP 1.208% 11/28	Corporates	Consumer Staples	France	0.16%
HSBC VAR 06/27	Corporates	Banking	United Kingdom	0.16%
SANTAN VAR 04/29 EMTN	Corporates	Banking	Spain	0.16%
RABOBK 1.25% 23/03/26	Corporates	Banking	Netherlands	0.16%
AAPL 1.625% 11/26	Corporates	Technology	United States	0.16%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	46.78%
Corporates	Consumer Staples	9.94%
Corporates	Consumer Discretionary	7.91%
Corporates	Communications	5.84%
Corporates	Capital Goods	4.81%

<i>Corporates</i>	<i>Technology</i>	<i>4.20%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>3.57%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>3.43%</i>
<i>Corporates</i>	<i>Transportation</i>	<i>3.25%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>2.84%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>2.34%</i>
<i>Corporates</i>	<i>Electric</i>	<i>2.06%</i>
<i>Corporates</i>	<i>Natural Gas</i>	<i>1.00%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>0.86%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>0.63%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>0.27%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>0.16%</i>
<i>Corporates</i>	<i>Energy</i>	<i>0.08%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.03%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.61% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

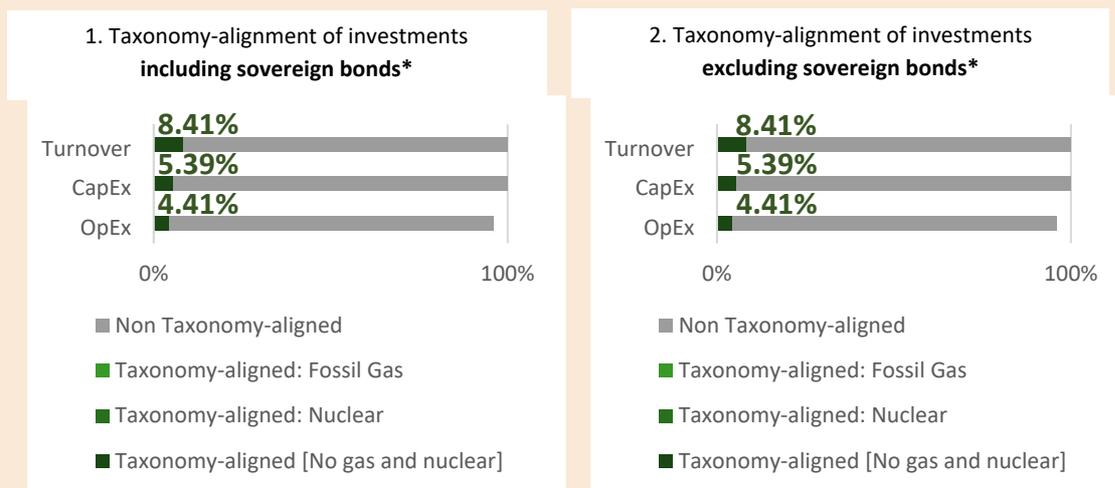

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.19% and the share of investment in enabling activities was 1.79%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 6.53%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **53.00%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 8.45%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

Bloomberg MSCI Euro Corporate 1-5 Year ESG Sustainability SRI Bond Index is a fixed-rate, investment-grade corporate bond index that follows the rule of the Bloomberg Euro Aggregate Corporate Index (the Parent Index) and applies additional ESG criteria for security eligibility. The applicable universe includes the securities composing the Parent Index (i.e. corporate fixed-rate investment grade Euro denominated bonds with a remaining maturity higher than 1 year and up to, but not including, 5 years and a minimum per amount outstanding of EUR 300 million).

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI EURO HIGH YIELD BOND ESG

Legal entity identifier: 549300WFFU01S3XDX018

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **65.78%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the iBoxx MSCI ESG EUR High Yield Corporates TCA Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the iBoxx MSCI ESG EUR High Yield Corporates TCA Index is 6.895
- the MSCI ESG score of the iBoxx EUR High Yield TCA Index (the "Parent Index") is 6.55

- **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 6.958

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

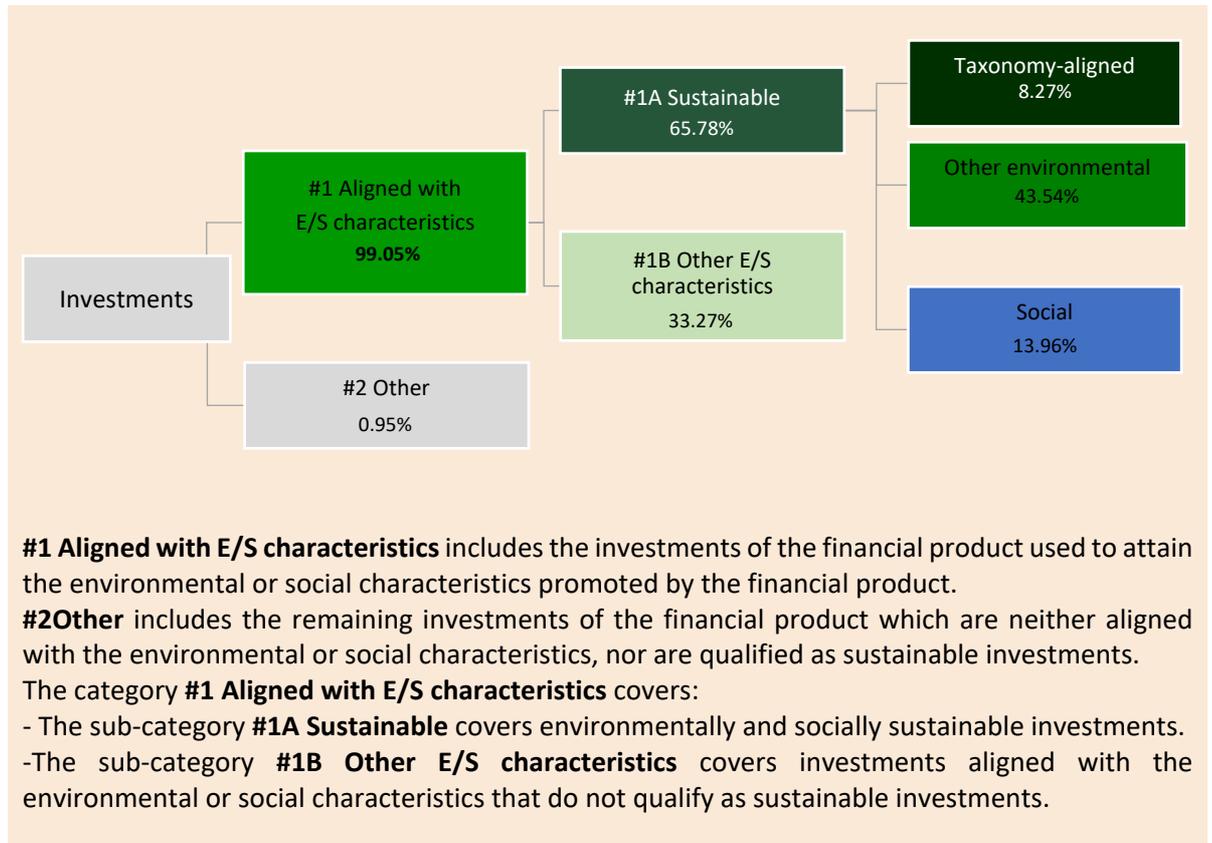

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets
UCGIM VAR 01/32	Corporates	Banking	Italy	0.84%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	20.92%
Corporates	Consumer Discretionary	18.75%
Corporates	Communications	16.83%
Corporates	Consumer Staples	9.90%
Corporates	Capital Goods	7.71%

<i>Corporates</i>	<i>Electric</i>	5.62%
<i>Corporates</i>	<i>Transportation</i>	5.51%
<i>Corporates</i>	<i>Other Financials</i>	3.86%
<i>Corporates</i>	<i>Basic Industry</i>	2.87%
<i>Corporates</i>	<i>Technology</i>	1.95%
<i>Corporates</i>	<i>Other Industrials</i>	1.71%
<i>Corporates</i>	<i>Energy</i>	1.33%
<i>Corporates</i>	<i>Insurance</i>	1.23%
<i>Corporates</i>	<i>Finance Companies</i>	0.73%
<i>Corporates</i>	<i>Real Estate (REIT)</i>	0.73%
<i>Corporates</i>	<i>Natural Gas</i>	0.39%
<i>Treasuries</i>	<i>Treasuries</i>	0.00%
<i>Cash</i>	<i>Cash</i>	-0.05%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 8.27% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

contribution to an environmental objective.

Yes:

In fossil gas       In nuclear energy

No

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

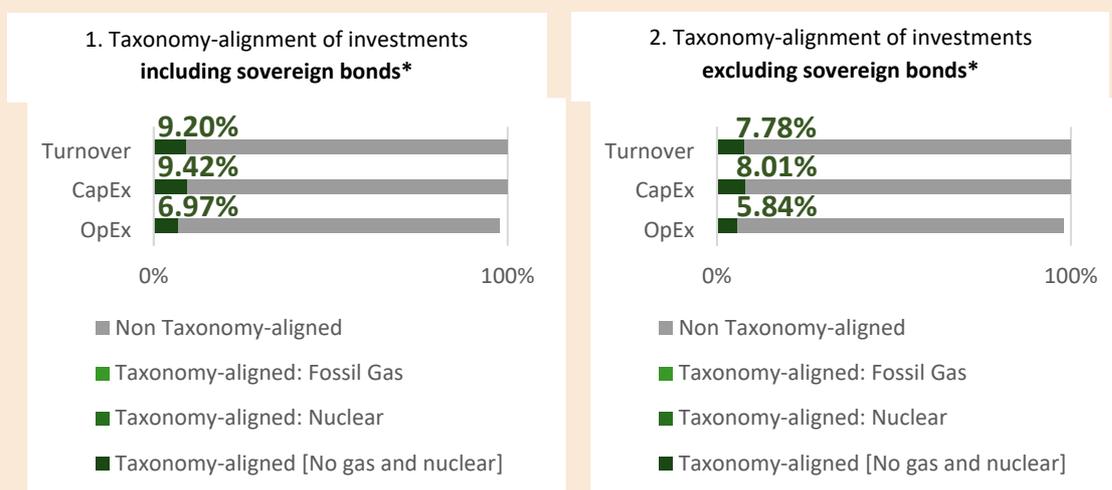

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 1.95%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 6.84%

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The share of sustainable investments with environmental objective not aligned to taxonomy was **43.54%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 13.96%.

### **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

iBoxx MSCI ESG EUR High Yield Corporates TCA Index is a bond index representative of euro-denominated BB/B rated bonds issued by corporate issuers that follows the rules of the iBoxx EUR High Yield TCA Index (the Parent Index) and applies ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AMUNDI EUR SHORT TERM HIGH YIELD CORPORATE BOND ESG

**Legal entity identifier:** 2138001B51SCUCTAZU58

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**No**

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **69.48%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (iBoxx MSCI ESG EUR High Yield Corporates 1-3 TCA Index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the iBoxx MSCI ESG EUR High Yield Corporates 1-3 TCA Index is 6.928
- the MSCI ESG score of the iBoxx EUR High Yield Corporates 1-3 TCA index (the "Parent Index") is 6.55

- **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

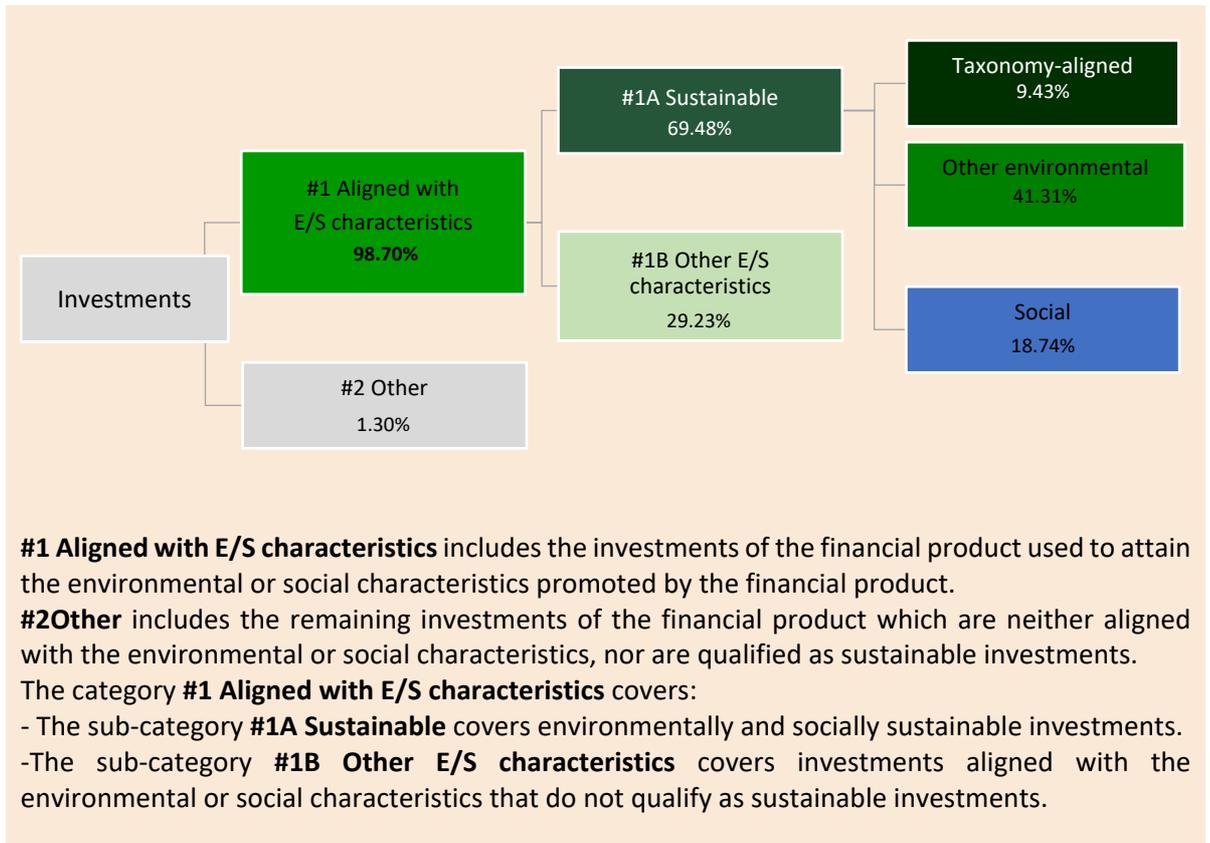

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

Largest Investments	Sector	Sub-Sector	Country	% Assets

NGGLN VAR 09/82	Corporates	Electric	United Kingdom	1.34%
AVTR 2.625% 11/25 REGS	Corporates	Consumer Staples	United States	1.31%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	30.71%
Corporates	Consumer Discretionary	17.95%
Corporates	Communications	11.11%
Corporates	Consumer Staples	8.72%
Corporates	Capital Goods	7.88%

Corporates	Transportation	6.00%
Corporates	Electric	5.02%
Corporates	Other Financials	4.12%
Corporates	Basic Industry	1.88%
Corporates	Technology	1.67%
Corporates	Other Industrials	1.57%
Corporates	Real Estate (REIT)	1.45%
Corporates	Energy	1.24%
Corporates	Finance Companies	0.55%
Cash	Cash	0.12%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 9.43% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

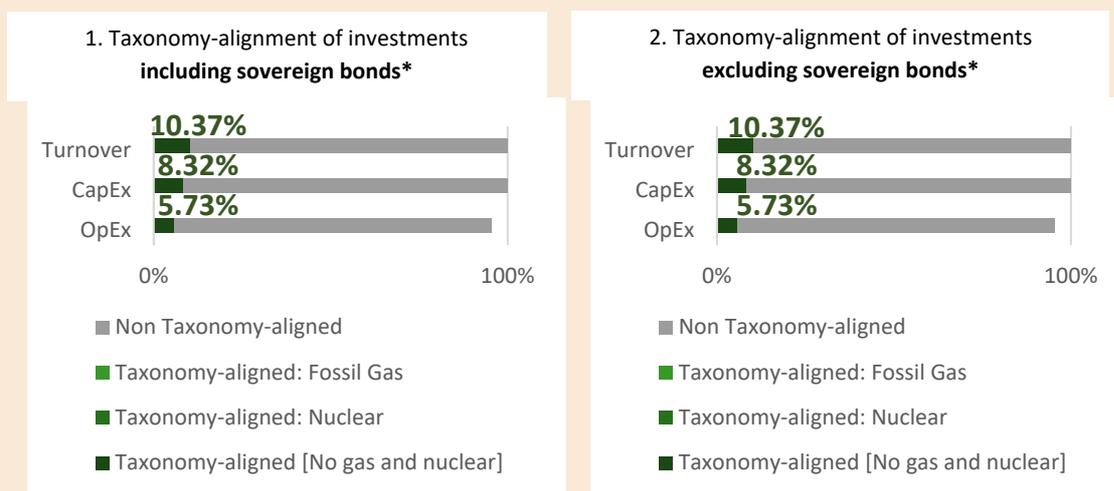

yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 2.49%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **41.31%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 18.74%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

iBoxx MSCI ESG EUR High Yield Corporates 1-3 TCA Index is a bond index representative of euro-denominated BB/B rated bonds issued by corporate issuers that follows the rules of the iBoxx EUR High Yield Corporates 1-3 TCA index (the "Parent Index") and applies ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI EUR FLOATING RATE CORPORATE BOND ESG

**Legal entity identifier:** 5493006D311M3Q4K364

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made **sustainable investments with an environmental objective:**

\_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **60.07%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA is 7.809
- the MSCI ESG score of the iBoxx EUR FRN Investment Grade Corporates is 7.382

- **... and compared to previous periods?**

The previous period MSCI ESG score of the index was 8.034

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

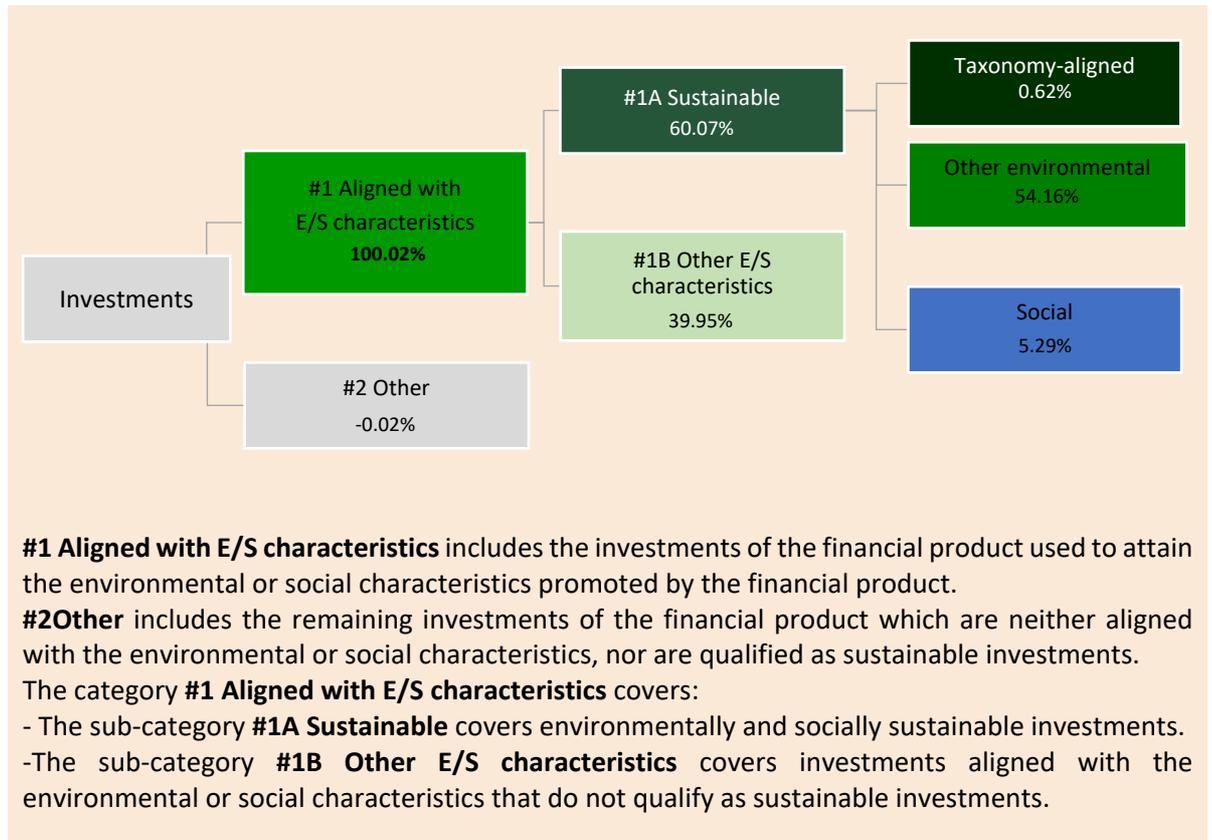

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
ACA FP FRN 03/25 EMTN	Corporates	Banking	France	3.39%
MS FRN 03/27 *	Corporates	Banking	United States	3.06%
RY FRN 01/25 EMTN	Corporates	Banking	Canada	2.94%
ANZ FRN 05/27 EMTN	Corporates	Banking	Australia	2.81%
CCDJ FRN 01/26 GMTN	Corporates	Banking	Canada	2.60%
LBBW FRN 11/26 EMTN	Corporates	Banking	Germany	2.54%
MQGAU FRN 10/25 EMTN	Corporates	Banking	Australia	2.05%
RABOBK FRN 11/26 GMTN	Corporates	Banking	Netherlands	2.02%
BNS FRN 05/25 EMTN	Corporates	Banking	Canada	1.95%
SEB FRN 06/25 GMTN	Corporates	Banking	Sweden	1.92%
KBC FRN 03/26 EMTN	Corporates	Banking	Luxembourg	1.90%
SANTAN FRN 01/25 EMTN	Corporates	Banking	Spain	1.84%
NACN FRN 03/26 EMTN	Corporates	Banking	Canada	1.78%
HSBC FRN 03/25 EMTN	Corporates	Banking	United Kingdom	1.78%
BBVASM FRN 11/25 .	Corporates	Banking	Spain	1.69%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	90.17%
Corporates	Consumer Discretionary	3.54%
Corporates	Capital Goods	2.52%
Corporates	Consumer Staples	1.44%
Corporates	Natural Gas	1.30%

<i>Corporates</i>	<i>Insurance</i>	<i>0.64%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>0.44%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>-0.05%</i>

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.62% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

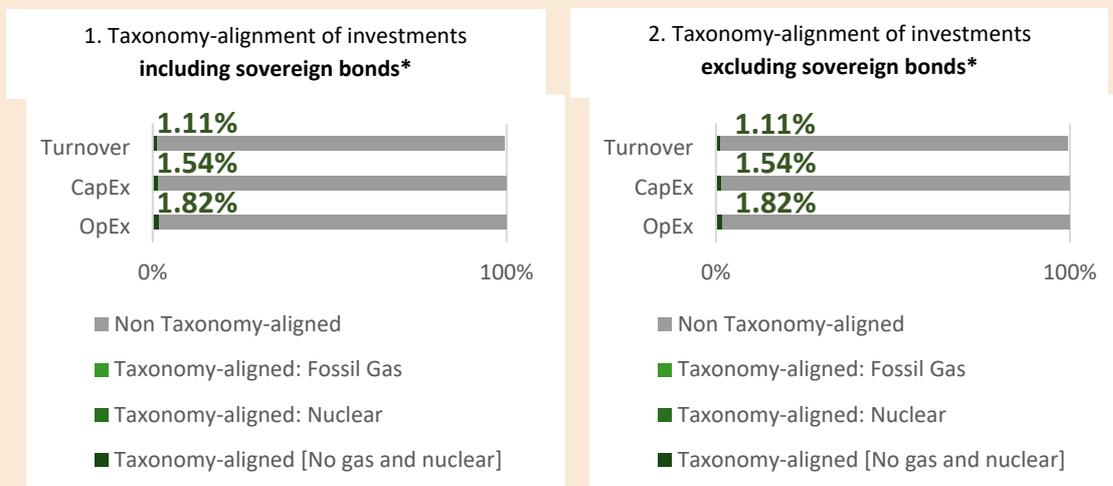

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.32% and the share of investment in enabling activities was 0.74%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.95%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **54.16%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 5.29%.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA Index is a bond index representative of euro-denominated investment grade floating rate note (FRN) bonds issued by corporate issuers from developed countries that follows the rules of the iBoxx EUR FRN Investment Grade Corporates TCA Index (the Parent Index) and applies ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AMUNDI USD FLOATING RATE CORPORATE BOND ESG

**Legal entity identifier:** 549300W6M26WPJCWRV83

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**X**

**No**

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **34.01%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the iBoxx MSCI ESG USD FRN Investment Grade Corporates TCA Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the iBoxx MSCI ESG USD FRN Investment Grade Corporates TCA is 7.809
- the MSCI ESG score of the iBoxx USD FRN Broad Investment Grade Corporates TCA Index (the Parent Index) is 6.879

- ***... and compared to previous periods?***

The previous period MSCI ESG score of the index was 7.362

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

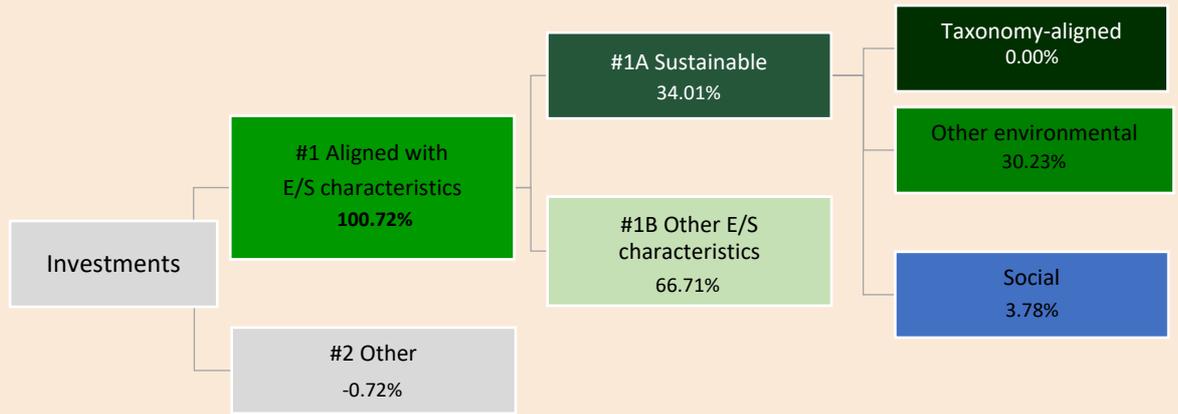

Largest Investments	Sector	Sub-Sector	Country	% Assets
TD FRN 04/27 GMTN	Corporates	Banking	Canada	1.25%
MIZUHO FRN 05/26	Corporates	Banking	Japan	1.13%
SCHW FRN 05/26	Corporates	BROKERAGE	United States	1.07%
TD FRN 07/26 MTN	Corporates	Banking	Canada	1.00%
HSBC FRN 03/27	Corporates	Banking	United States	0.94%
BACR FRN 09/27	Corporates	Banking	United Kingdom	0.93%
BK FRN 07/28	Corporates	Banking	United States	0.92%
CBAAU FRN 07/25 REGS	Corporates	Banking	Australia	0.89%
JPM FRN 04/27	Corporates	Banking	United States	0.86%
WSTP FRN 04/29	Corporates	Banking	Australia	0.84%
NWG FRN 11/28	Corporates	Banking	United Kingdom	0.82%
ROSW FRN 03/25 REGS	Corporates	Consumer Staples	United States	0.81%
AXP FRN 07/27	Corporates	Banking	United States	0.81%
RABOBK FRN 03/27	Corporates	Banking	Netherlands	0.77%
SOCGEN FRN 01/26 REGS	Corporates	Banking	France	0.73%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

## What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>76.49%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>10.56%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>6.06%</i>
<i>Corporates</i>	<i>Consumer Staples</i>	<i>3.08%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>1.96%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>0.92%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>0.70%</i>

Corporates	Communications	0.54%
Corporates	Technology	0.34%
Forex	Forex	0.04%
Cash	Cash	-0.70%

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.00% in sustainable investments aligned with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

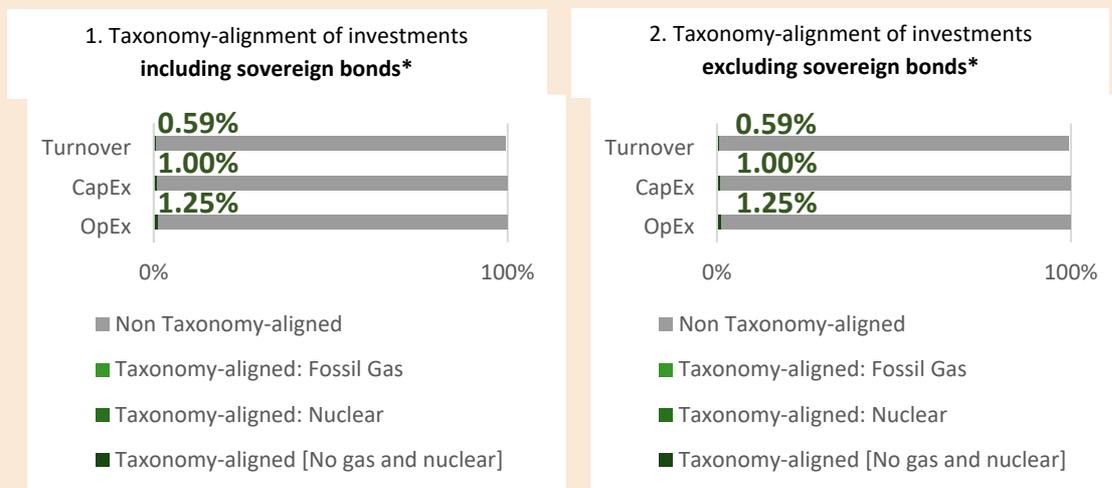

**Transitional activities** are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.58%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period; the percentage of investments with Taxonomy alignment was 0.31%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.23%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 3.78%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

iBoxx MSCI ESG USD FRN Investment Grade Corporates TCA Index is a bond index representative of USD denominated investment grade floating rate note (FRN) bonds issued by corporate issuers from developed countries that follows the rules of the iBoxx USD FRN Investment Grade Corporates TCA Index (the Parent Index) and applies ESG criteria for security eligibility.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI GLOBAL HIGH YIELD CORPORATE BOND ESG

Legal entity identifier: 213800NJA5FHLC6HE45

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **42.51%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (Bloomberg Barclays MSCI Global Corporate High Yield SRI Sustainable Index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Global Corporate High Yield SRI Sustainable Index is 6.763
- the MSCI ESG score of the Bloomberg Global High Yield Corporate Index (the "Parent Index") is 5.75

● **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

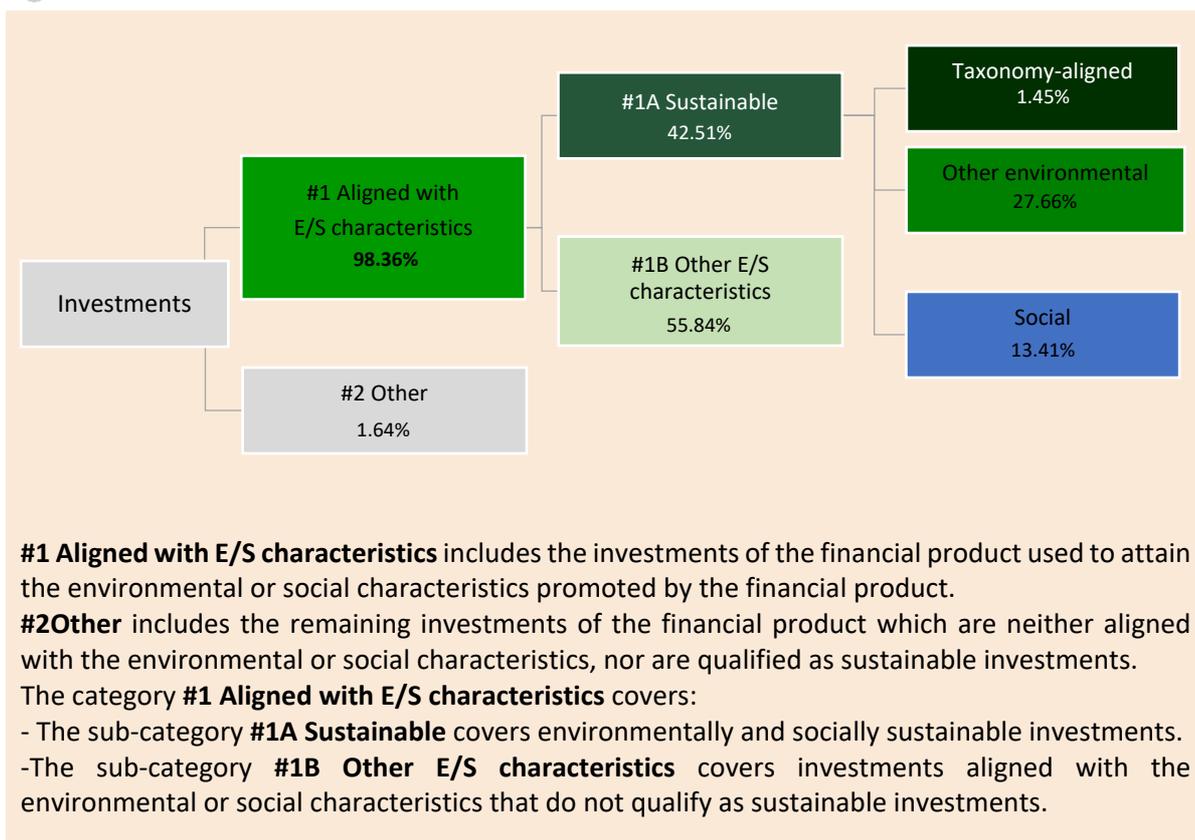

Largest Investments	Sector	Sub-Sector	Country	% Assets
CVNA FRN 06/31 144A	Corporates	Consumer Discretionary	United States	0.47%
BCULC 4% 10/30 144A	Corporates	Consumer Discretionary	Canada	0.47%
CSTM 6.375% 08/32 144A	Corporates	Basic Industry	France	0.46%
ISPIM VAR 02/34 EMTN	Corporates	Banking	Italy	0.44%
CHTR 5.125% 01/27	Corporates	Communications	United States	0.43%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>19.66%</i>
<i>Corporates</i>	<i>Communications</i>	<i>19.40%</i>
<i>Corporates</i>	<i>Consumer Staples</i>	<i>13.86%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>8.85%</i>

<i>Corporates</i>	<i>Technology</i>	<i>6.13%</i>
<i>Corporates</i>	<i>Banking</i>	<i>6.05%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>4.79%</i>
<i>Corporates</i>	<i>Transportation</i>	<i>4.54%</i>
<i>Corporates</i>	<i>Energy</i>	<i>3.74%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>2.72%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>2.28%</i>
<i>Corporates</i>	<i>Electric</i>	<i>2.10%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>1.73%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>1.39%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>1.08%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>1.08%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>0.14%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.09%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.36%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.45% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
**-turnover** reflecting the share of revenue from green activities of investee companies  
**-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

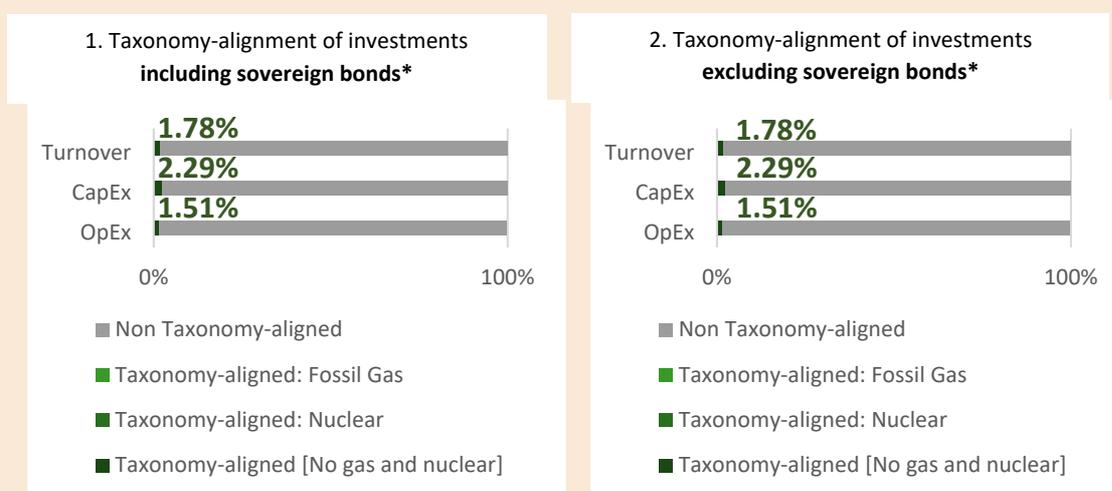

Yes:  
 In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.49%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **27.66%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 13.41%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The Index offers exposure to the high yield corporate bond market denominated in USD, EUR and GBP. This index is based on the Bloomberg Global High Yield Corporate Index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy Score.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI EURO GOVERNMENT TILTED GREEN BOND

Legal entity identifier: 54930086L1BR8DOJL973

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32.39% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by this financial product are met through the tracking of an Index, Bloomberg Euro Treasury Green Bond Tilted Index. which is based on the Euro Treasury 50bn Bond Index (the ""Parent Index""), and measures the performance of investment grade, EUR-denominated, fixed-rate government debt. The index is constructed by the index provider by applying filters. The Product strategy is also relying on systematic exclusions policies (normative and sectorials) as further described in Amundi Responsible Investment policy.

● **How did the sustainability indicators perform?**

The percentage of the fund allocated to bonds considered as "Green Bonds" by Bloomberg is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

More precisely, the methodology of the Bloomberg Euro Treasury Green Bond Tilted Index (the "Reference Benchmark") respects the following criteria:

- Eligible bonds have at least EUR 300 mn outstanding nominal and are issued by Eurozone countries with at least EUR 50 bn in issuance. The list of countries eligible for the index is reviewed on an annual basis.
- Countries must be rated investment grade (Baa3/BBB-/BBB-) or higher to enter the index using the middle rating of Moody's, S&P and Fitch.
- Maturity must be at least one year until final maturity, regardless of optionality.
- Principal and interest must be denominated in EUR.
- The index is rebalanced monthly. Prior to the end of the month, the index composition for the following month is determined based on the Parent Index values in order to set the total weight of green bonds to at least 30%, and maintain a comparable risk profile with the one of the Parent Index.

Additionally, the index excludes sovereign issuers designated as "Not Free" by Freedom House.

At the end of the period, the percentage of the sub-fund allocated to bonds considered as "Green Bonds" by Bloomberg is 32.61%.

- ***... and compared to previous periods?***

At the end of the previous period the portfolio held 30.49 % of green bonds

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

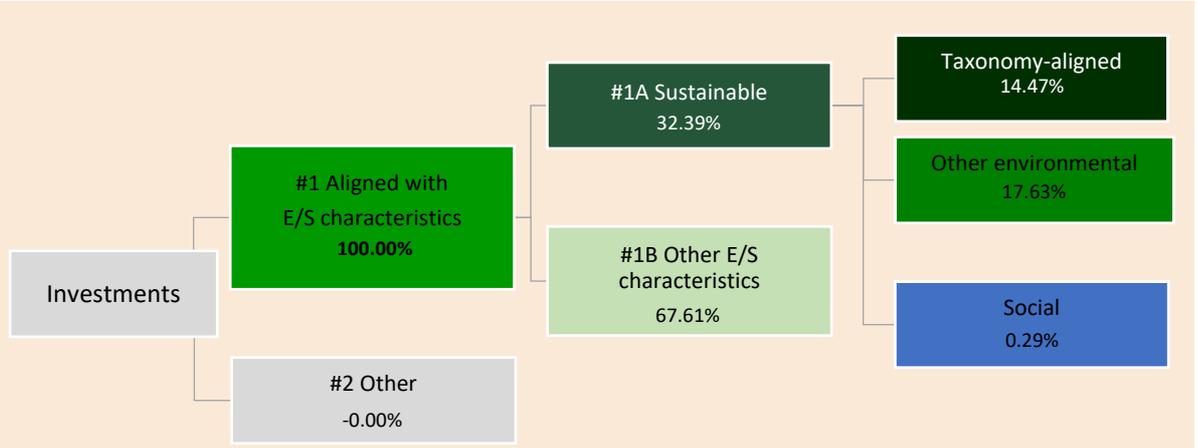

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
OAT 1.75% 06/39	Treasuries	Treasuries	France	4.12%
BTPS 4% 04/35 13Y	Treasuries	Treasuries	Italy	1.95%
OAT 0.5% 06/44 OAT	Treasuries	Treasuries	France	1.86%
BTPS 4% 10/31 8Y	Treasuries	Treasuries	Italy	1.71%
NEDERLD 0.5% 01/40	Treasuries	Treasuries	Netherlands	1.62%
BELGIUM 1.25% 22/04/33 EUR	Treasuries	Treasuries	Belgium	1.50%
NEDERLD 3.25% 01/44	Treasuries	Treasuries	Netherlands	1.43%
BTPS 4.05% 10/37 13Y	Treasuries	Treasuries	Italy	1.34%
DBR 2.3% 02/33 G	Treasuries	Treasuries	Germany	1.31%
SPAIN 1% 07/42	Treasuries	Treasuries	Spain	1.29%
BTPS 1.5% 04/45 34Y	Treasuries	Treasuries	Italy	1.28%
OBL 1.3% 10/27 G	Treasuries	Treasuries	Germany	1.26%
DBR % 08/30 G	Treasuries	Treasuries	Germany	1.25%
OBL % 10/25 G	Treasuries	Treasuries	Germany	1.16%
DBR 1.8% 08/53	Treasuries	Treasuries	Germany	1.16%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>100.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>-0.00%</i>

### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 14.47% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by

the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

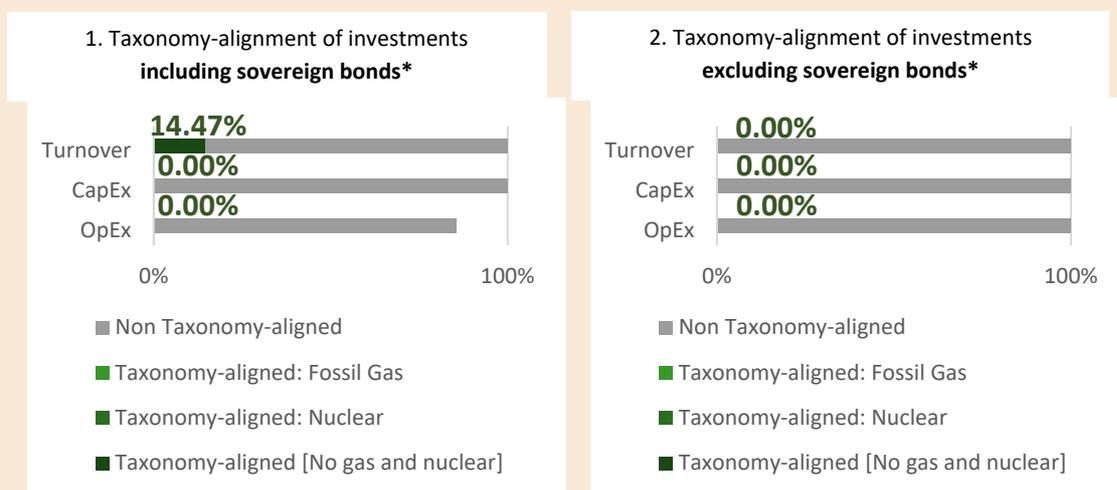

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

At the end of the previous period: the percentage of investments with Taxonomy alignment was 13.94%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **17.63%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

- **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 0.29%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

- **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

Bloomberg Euro Treasury Green Bond Tilted Index is based on the Euro Treasury 50bn Bond Index (the Parent Index), and measures the performance of investment grade, EUR-denominated, fixed-rate government debt. The Index is tilted such that, on a rebalancing date, at least 30% of the Index's market value is allocated to securities classified as Green Bonds and the remaining percentage is allocated to non-Green Bonds, and the risk profiles of the Index and the Parent Index are comparable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product name:** AMUNDI MSCI EMU  
SMALL CAP ESG CTB NET ZERO  
AMBITION

**Legal entity identifier:**  
213800EOKXEM989MZ785

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **71.55%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

financial product are attained.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.

- Scope 1 emissions: those from sources owned or controlled by the company.
- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, MSCI EMU Small Cap ESG Broad CTB Select Index (the "Index") is constructed by applying a combination of values based exclusions and an optimization process to increase the ESG score compared to the Parent Index and to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements while targeting a similar risk profile to the Parent Index.

- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index MSCI EMU Small Cap ESG Broad CTB Select Index is 315.942
- At the end of the period, the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index MSCI EMU Small Cap Index is 706.896.

- **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

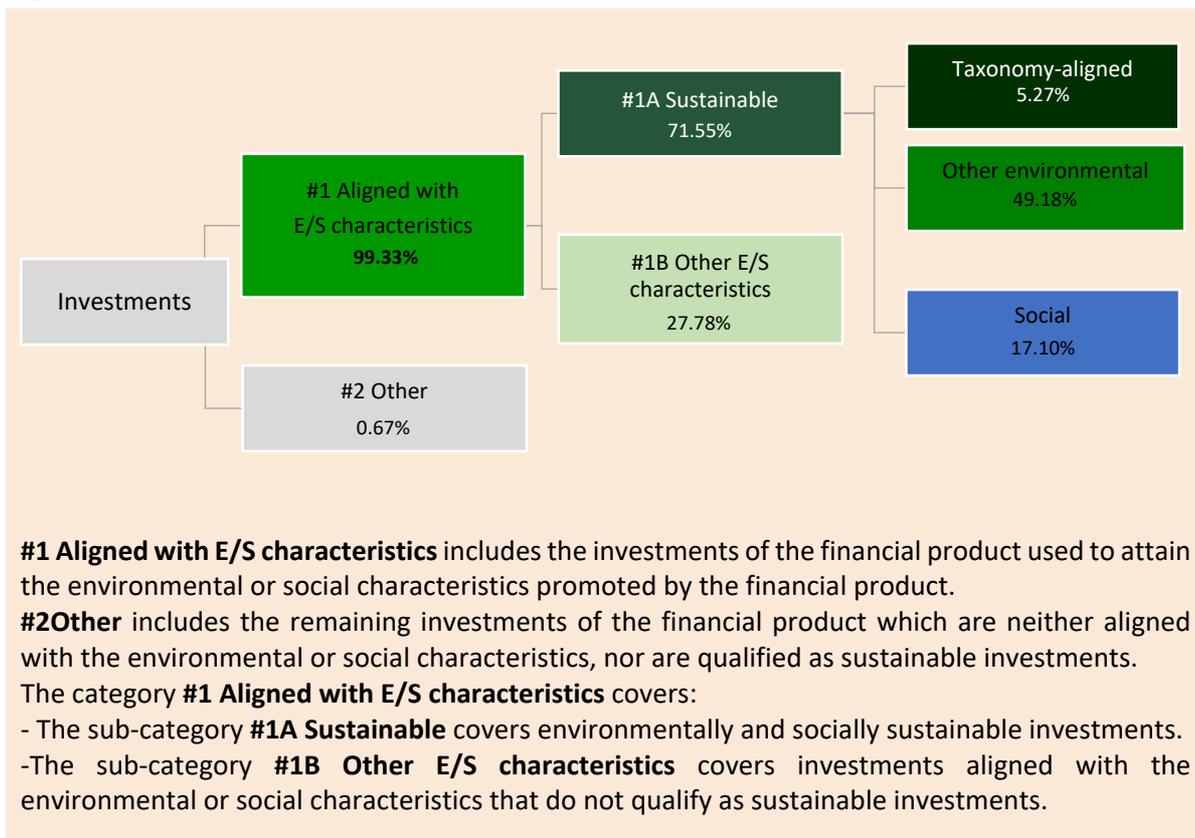

Largest Investments	Sector	Sub-Sector	Country	% Assets
BAWAG GROUP AG	Financials	Banks	Austria	1.57%
KONECRANES OYJ	Industrials	Capital goods	Finland	1.41%
BPER BANCA SPA	Financials	Banks	Italy	1.32%
ACKERMANS & VAN HAAREN	Industrials	Capital goods	Belgium	1.27%
BANKINTER SA	Financials	Banks	Spain	1.24%
GAZTRANSPORT ET TECHNIGAZ SA	Energy	Oil, Gas & Consumable Fuels	France	1.16%
FUCHS SE-PFD	Materials	Chemicals	Germany	1.14%
MERLIN PROPERTIES SOCIMI	Real Estate	REITs	Spain	1.13%
INTERPUMP GROUP	Industrials	Capital goods	Italy	1.10%
BANCA MONTE DEI PASCHI SIENA	Financials	Banks	Italy	1.09%
UNIPOL GRUPPO FINANZ	Financials	Insurance	Italy	1.06%
SBM OFFSHORE NV	Energy	Energy Equipment & Services	Netherlands	1.00%

ARCADIS NV	Industrials	Commercial & Professional Services	Netherlands	1.00%
VALMET OYJ	Industrials	Capital goods	Finland	1.00%
ENAGAS SA	Utilities	Gas Utilities	Spain	0.95%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Industrials</i>	<i>Capital goods</i>	<i>16.48%</i>
<i>Financials</i>	<i>Banks</i>	<i>8.02%</i>
<i>Real Estate</i>	<i>REITs</i>	<i>5.85%</i>

<i>Financials</i>	<i>Financial Services</i>	5.53%
<i>Information Technology</i>	<i>Software &amp; Services</i>	4.95%
<i>Consumer Discretionary</i>	<i>Consumer Durables &amp; Apparel</i>	4.28%
<i>Industrials</i>	<i>Transportation</i>	4.12%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period

switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:  
 - **turnover** reflecting the share of revenue from green activities of investee companies  
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.  
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

the fund invested 5.27% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

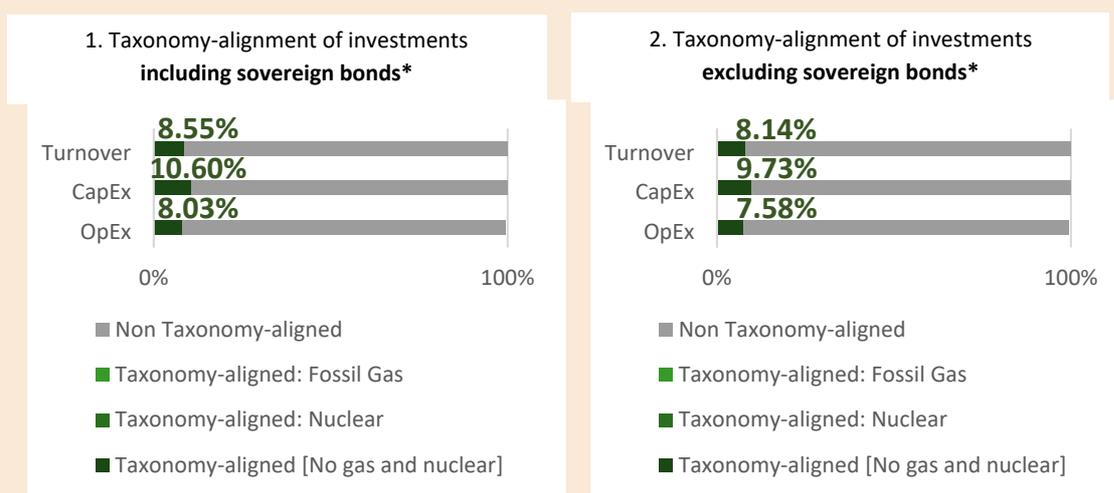

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.35% and the share of investment in enabling activities was 4.62%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **49.18%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 17.10%.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?**

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

 **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

MSCI EMU Small Cap ESG Broad CTB Select Index is an equity index based on the MSCI EMU Small Cap Index (the "Parent Index") representative of small-cap securities across developed European Economic and Monetary Union ("EMU") countries. The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with a strong MSCI ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AMUNDI USD CORPORATE BOND PAB NET ZERO AMBITION

**Legal entity identifier:** 213800713AA69XKCG155

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**No**

It made **sustainable investments with an environmental objective:** \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **41.39%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index (Bloomberg MSCI USD Corporate Paris Aligned Green Tilted Index) meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

● **How did the sustainability indicators perform?**

The weighted average greenhouse gas (GHG) intensity (the "WACI") is used to measure the attainment of each of the environmental or social characteristics promoted by this financial product. The WACI is the weighted average of the Index components' greenhouse gas (GHG) emissions (expressed in tCO<sub>2</sub>) divided by the enterprise value including cash.

The GHG emissions are divided into Scope 1, Scope 2, and Scope 3 emissions.  
- Scope 1 emissions: those from sources owned or controlled by the company.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- Scope 2 emissions: those caused by the generation of electricity purchased by the company.
- Scope 3 emissions: include all other indirect emissions that occur in a company's value chain.

More precisely, Bloomberg MSCI USD Corporate Paris Aligned Green Tilted Index ("The Index") intends to be representative of the USD-denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB. The index uses an optimization approach

At the end of the period the weighted average greenhouse gas (GHG) intensity (the "WACI") of the index Bloomberg MSCI USD Corporate PAB Green Tilted Index is 126.875.

At the end of the period the weighted average greenhouse gas (GHG) intensity (the "WACI") of the parent index Bloomberg US Corporate Bond Index is 367.082.

- **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g. GHG intensity of investee companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

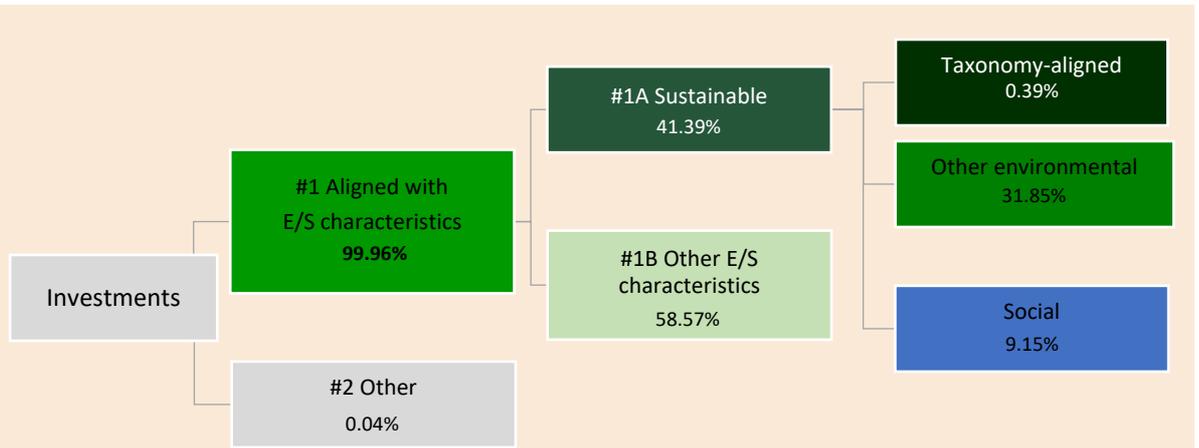

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
CVS 4.3% 03/28	Corporates	Consumer Staples	United States	0.39%
MSFT 3.3% 2/27	Corporates	Technology	United States	0.33%
CI 4.375% 10/28	Corporates	Consumer Staples	United States	0.33%
IBM 3.3% 05/26	Corporates	Technology	United States	0.28%
BRITISH TEL 9.125 30	Corporates	Communications	United Kingdom	0.27%
AMZN 3.15% 08/27	Corporates	Consumer Discretionary	United States	0.27%
ORCL 3.25% 11/27	Corporates	Technology	United States	0.24%

DEUT TELEK 8 1/4% 30	Corporates	Communications	Netherlands	0.19%

### What was the proportion of sustainability-related investments?

**What was the asset allocation?**

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

**In which economic sectors were the investments made ?**

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>18.06%</i>
<i>Corporates</i>	<i>Consumer Staples</i>	<i>14.78%</i>
<i>Corporates</i>	<i>Technology</i>	<i>14.06%</i>
<i>Corporates</i>	<i>Communications</i>	<i>12.81%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>8.68%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>7.33%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>6.62%</i>

<i>Corporates</i>	<i>Electric</i>	<i>5.87%</i>
<i>Corporates</i>	<i>Transportation</i>	<i>3.59%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>2.65%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>1.96%</i>
<i>Corporates</i>	<i>BROKERAGE</i>	<i>1.53%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>0.80%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>0.52%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>0.35%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>0.11%</i>
<i>Forex</i>	<i>Forex</i>	<i>0.03%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.15%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.39% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

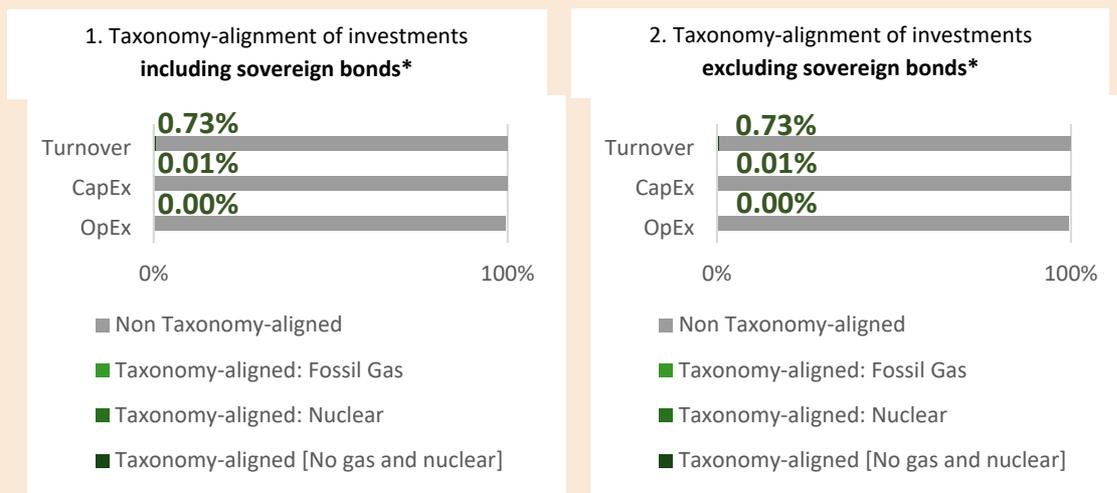

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **31.85%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 9.15%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The Bloomberg MSCI USD Corporate Paris Aligned Green Tilted Index is constructed from the Bloomberg US Corporate Index (the "Parent Index") and intends to be representative of the USD-denominated investment grade corporate bond market while meeting and exceeding the minimum standards of the EU PAB label. The index sets an initial 50% decarbonization of absolute GHG emissions and carbon intensity relative to the standard Bloomberg US Corporate Index, followed by an annual 10% decarbonization trajectory of both measures, and uses an optimization approach that aims to minimize the active total risk with respect to the Parent Index under constraints.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the broad market index ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI USD HIGH YIELD CORPORATE BOND ESG

Legal entity identifier: 213800AHCNYOPPST5889

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

X No

It made sustainable investments with an environmental objective:

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of **32.34%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (Bloomberg MSCI US Corporate High Yield SRI Sustainable Index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI US Corporate High Yield SRI Sustainable Index is 6.767
- the MSCI ESG score of the Bloomberg US Corporate High Yield Index (the "Parent Index") is 5.62

- ***... and compared to previous periods?***

This is the first SFDR periodic report produced for this sub-fund.

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

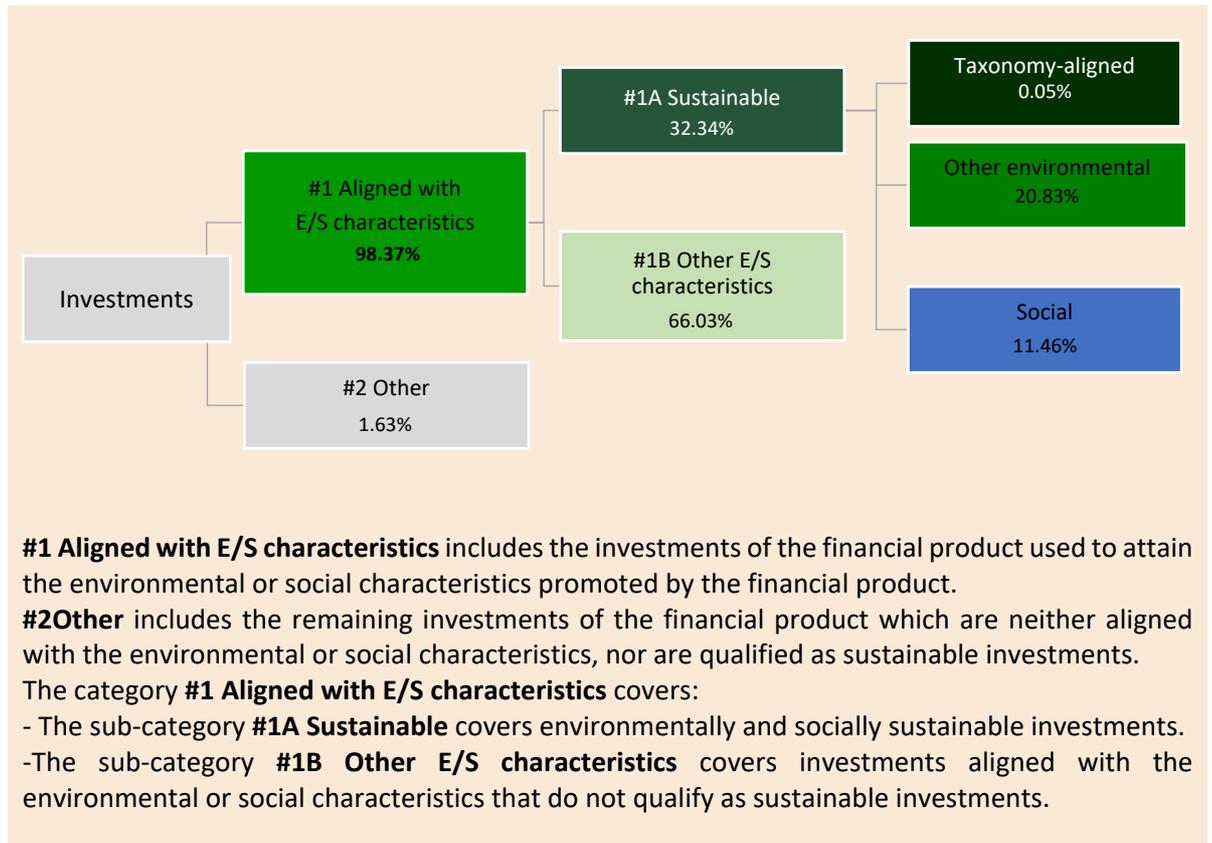

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>
DTV 5.875% 08/27 144A	Corporates	Communications	United States	0.60%
UNIT 10.5% 02/28 144A	Corporates	Communications	United States	0.53%
AAL 5.75% 04/29 144A	Corporates	Transportation		0.49%
INTEL 6.5% 03/30 144A	Corporates	Communications	Luxembourg	0.45%

UAL 4.375% 04/26 144A	Corporates	Transportation	United States	0.33%

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Consumer Discretionary	21.12%
Corporates	Communications	18.30%
Corporates	Consumer Staples	14.09%
Corporates	Capital Goods	9.21%
Corporates	Technology	8.19%

<i>Corporates</i>	<i>Basic Industry</i>	6.95%
<i>Corporates</i>	<i>Energy</i>	5.36%
<i>Corporates</i>	<i>Transportation</i>	3.98%
<i>Corporates</i>	<i>Finance Companies</i>	3.26%
<i>Corporates</i>	<i>Real Estate (REIT)</i>	2.62%
<i>Corporates</i>	<i>Banking</i>	1.38%
<i>Corporates</i>	<i>Other Industrials</i>	1.34%
<i>Corporates</i>	<i>Other Financials</i>	1.23%
<i>Corporates</i>	<i>Electric</i>	1.12%
<i>Corporates</i>	<i>Insurance</i>	1.03%
<i>Corporates</i>	<i>BROKERAGE</i>	0.22%
<i>Forex</i>	<i>Forex</i>	0.08%
<i>Cash</i>	<i>Cash</i>	0.53%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.05% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Yes:

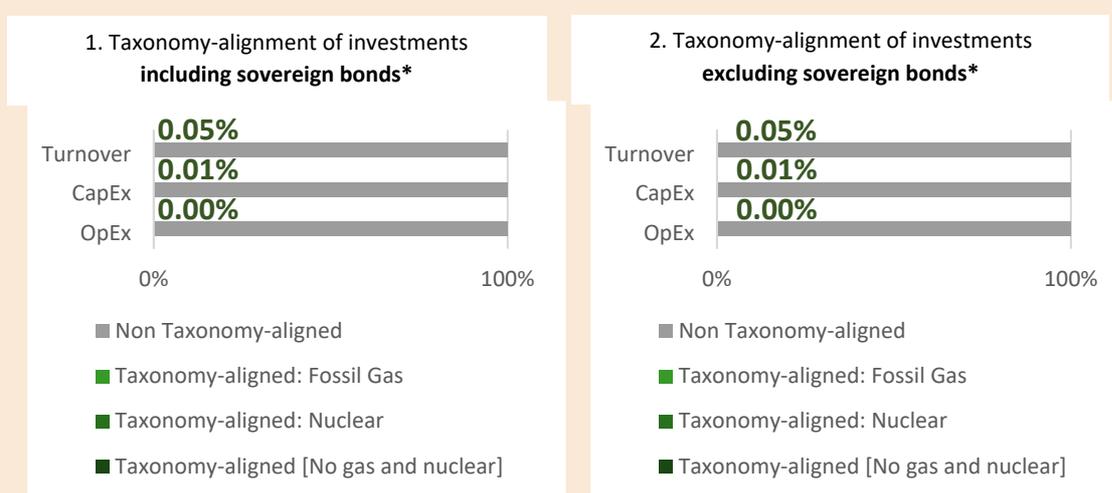

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **20.83%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 11.46%.

### **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?**

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### **What actions have been taken to meet the environmental and/or social characteristics during the reference period ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### **How did this financial product perform compared to the reference benchmark ?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Bloomberg MSCI US Corporate High Yield SRI Sustainable Bond Index tracks fixed-rate, high-yield corporate bond with at least USD300mn par amount outstanding. This index is based on the Bloomberg US Corporate High Yield Index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy Score.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** AMUNDI EUR HIGH YIELD CORPORATE BOND ESG

**Legal entity identifier:** 213800ARODHGWD8M71

## Environmental and/or social characteristics

**Did this financial product have a sustainable investment objective?**

**Yes**

**No**

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** \_\_\_\_\_

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.84%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The environmental and/or social characteristics promoted by this financial product are met through the tracking of the Bloomberg MSCI Euro Corporate High Yield SRI Sustainable Bond Index. The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Euro Corporate High Yield SRI Sustainable is 6.848
- the MSCI ESG score of the Bloomberg Euro Corporate High Yield Index is 6.55

- **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

- **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account,

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

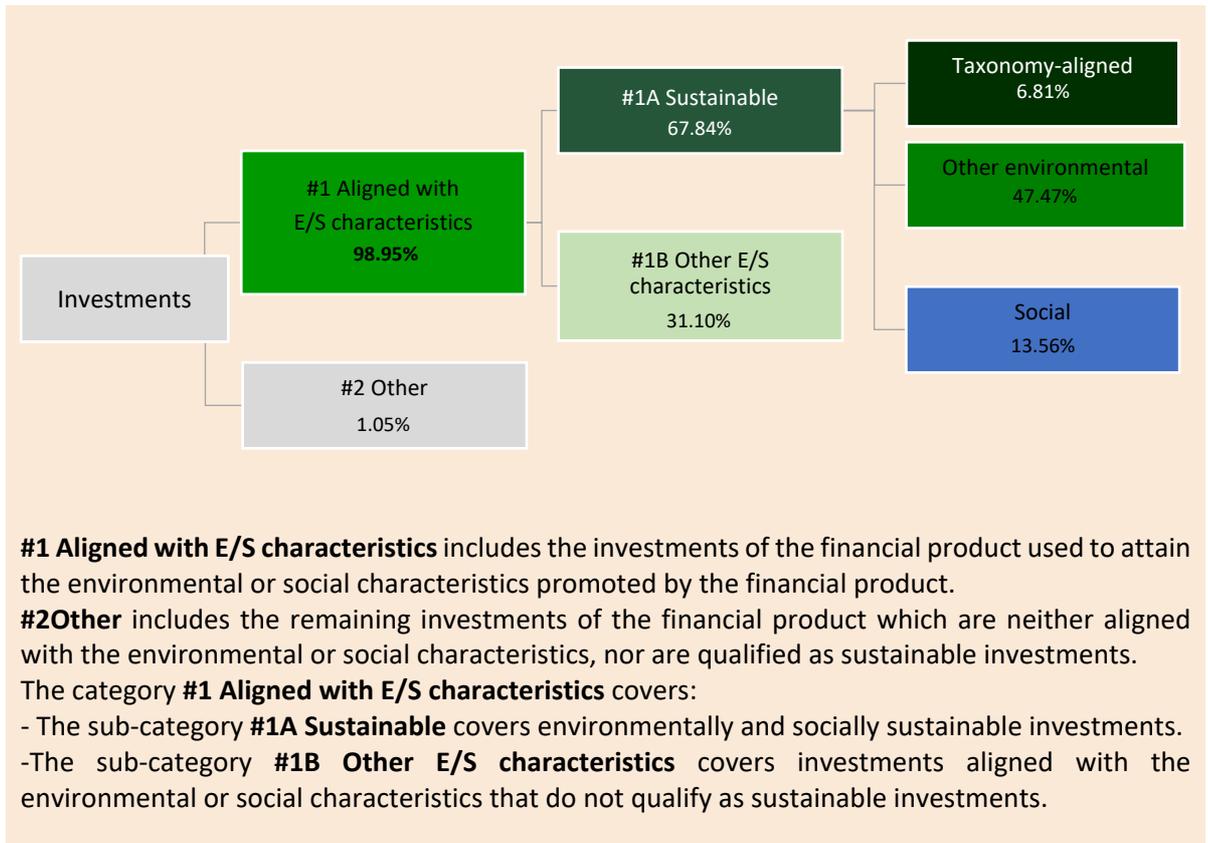

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

<b>Largest Investments</b>	<b>Sector</b>	<b>Sub-Sector</b>	<b>Country</b>	<b>% Assets</b>

## What was the proportion of sustainability-related investments?

### What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

### In which economic sectors were the investments made ?

Sector	Sub-Sector	% Assets
Corporates	Banking	19.33%
Corporates	Communications	18.91%
Corporates	Consumer Discretionary	18.06%
Corporates	Consumer Staples	10.16%
Corporates	Capital Goods	7.03%

<i>Corporates</i>	<i>Transportation</i>	<i>5.35%</i>
<i>Corporates</i>	<i>Electric</i>	<i>4.84%</i>
<i>Corporates</i>	<i>Other Financials</i>	<i>3.41%</i>
<i>Corporates</i>	<i>Other Utilities</i>	<i>2.84%</i>
<i>Corporates</i>	<i>Basic Industry</i>	<i>2.13%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>1.90%</i>
<i>Corporates</i>	<i>Technology</i>	<i>1.75%</i>
<i>Corporates</i>	<i>Other Industrials</i>	<i>1.38%</i>
<i>Corporates</i>	<i>Energy</i>	<i>1.09%</i>
<i>Corporates</i>	<i>Real Estate (REIT)</i>	<i>0.64%</i>
<i>Corporates</i>	<i>Finance Companies</i>	<i>0.60%</i>
<i>Corporates</i>	<i>Natural Gas</i>	<i>0.33%</i>
<i>Treasuries</i>	<i>Treasuries</i>	<i>0.00%</i>
<i>Cash</i>	<i>Cash</i>	<i>0.26%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

### **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 6.81% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

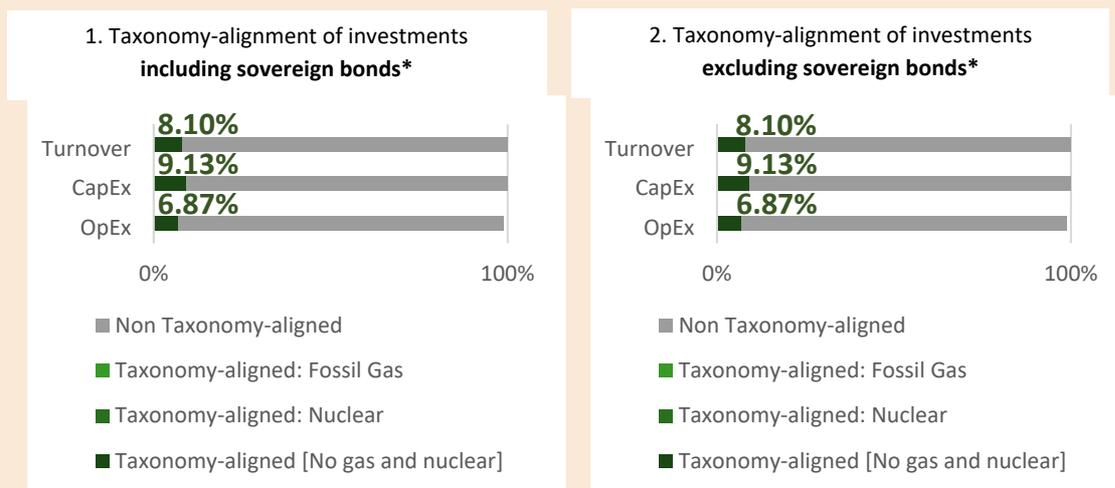

In fossil gas       In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>1</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 2.43%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **47.47%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

### What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 13.56%.

### What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

### How did this financial product perform compared to the reference benchmark ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index ?**

The Bloomberg MSCI Euro Corporate High Yield SRI Sustainable Bond Index tracks fixed-rate, high-yield corporate bond with at least EUR300mn par amount outstanding. This index is based on the Bloomberg Euro Corporate High Yield Index (the "Parent Index") and applies additional criteria to include issuers with MSCI ESG Ratings of BBB or higher and negatively screens issuers that are involved in business activities that are restricted according to pre-defined Business Involvement Screens and issuers with a "Red" MSCI ESG Controversy Score.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- **How did this financial product perform compared with the reference benchmark ?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI GLOBAL CORPORATE SRI 1-5Y HIGHEST RATED

Legal entity identifier: 213800N2FV95PC2WZF51

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

X

It made sustainable investments with an environmental objective: \_\_\_\_\_

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a sustainable investments with a social objective: \_\_\_\_\_

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.50% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics through among others, replicating an Index (Bloomberg MSCI Global Corporate A+ ESG Sustainability SRI 1-5 Year Index) integrating an environmental, social and governance ("ESG") rating.

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

The MSCI ESG Rating is used to measure the attainment of each of the environmental and or social characteristic promoted by this financial product. MSCI ESG Rating methodology uses a rules-based methodology designed to measure a company's resilience to long-term, industry

**Sustainability indicators** measure how the environmental or social characteristics promoted by the

financial product are attained.

material ESG risks. It is based on extra-financial ESG key issues that focus on the intersection between a company's core business and the industry-specific issues that may create significant risks and opportunities for the company. The ESG key issues are weighted according to impact and time horizon of the risk or opportunity. The ESG key issues include for instance, but are not limited to, water stress, carbon emissions, labor management or business ethics.

The sustainability indicator used is the MSCI ESG score of the ESG reference benchmark that is measured against the MSCI ESG score of the Parent index.

At the end of the period:

- the MSCI ESG score of the Bloomberg MSCI Global Corporate A+ ESG Sustainability SRI 1-5 Year Index is 7.254
- the MSCI ESG score of the Bloomberg Global Corporate 1-5 Year Index (the "Parent Index") is 6.89

● **... and compared to previous periods?**

This is the first SFDR periodic report produced for this sub-fund.

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at [www.amundi.lu](http://www.amundi.lu)

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,

detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion** : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement** : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- **Vote** : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- **Controversies monitoring** : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

### What were the top investments of this financial product?

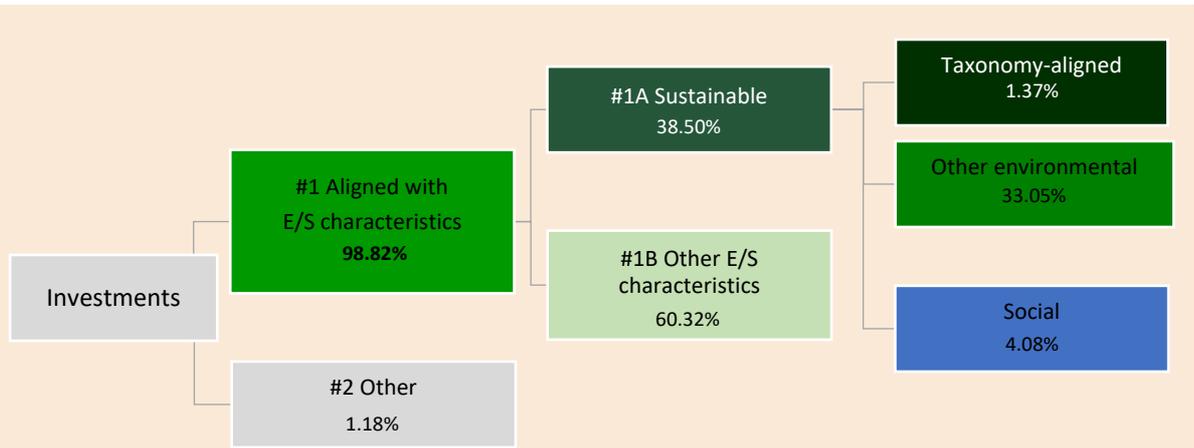

Largest Investments	Sector	Sub-Sector	Country	% Assets
BAC VAR 07/27	Corporates	Banking	United States	0.31%
BAC VAR 12/28	Corporates	Banking	United States	0.28%
CMCSA 4.15% 10/28	Corporates	Communications	United States	0.23%
V 3.15% 12/25	Corporates	Technology	United States	0.23%
MSFT 3.3% 2/27	Corporates	Technology	United States	0.23%
MSFT 2.4% 08/26	Corporates	Technology	United States	0.22%
PFE 4.45% 05/28	Corporates	Consumer Staples	Singapore	0.21%
ABBV 2.95% 11/26	Corporates	Consumer Staples	United States	0.20%
JPM VAR 04/27	Corporates	Banking	United States	0.20%
HSBC VAR 08/27	Corporates	Banking	United Kingdom	0.20%
MS VAR 05/27	Corporates	Banking	United States	0.20%
UBS VAR 03/29	Corporates	Banking	Switzerland	0.20%
C 5.803% 09/28	Corporates	Banking	United States	0.19%
AAPL 3.25% 2/26	Corporates	Technology	United States	0.19%
IBM 3.5% 05/29	Corporates	Technology	United States	0.19%

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2023 to 30/09/2024**

### What was the proportion of sustainability-related investments?

## What was the asset allocation?

**Asset allocation** describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## In which economic sectors were the investments made ?

<i>Sector</i>	<i>Sub-Sector</i>	<i>% Assets</i>
<i>Corporates</i>	<i>Banking</i>	<i>53.49%</i>
<i>Corporates</i>	<i>Consumer Staples</i>	<i>11.49%</i>
<i>Corporates</i>	<i>Consumer Discretionary</i>	<i>10.30%</i>
<i>Corporates</i>	<i>Technology</i>	<i>6.40%</i>
<i>Corporates</i>	<i>Insurance</i>	<i>4.31%</i>
<i>Corporates</i>	<i>Capital Goods</i>	<i>3.61%</i>
<i>Corporates</i>	<i>Communications</i>	<i>2.23%</i>

Corporates	Transportation	1.63%
Corporates	BROKERAGE	1.35%
Corporates	Real Estate (REIT)	1.16%
Corporates	Basic Industry	1.04%
Corporates	Electric	1.00%
Corporates	Other Financials	0.76%
Corporates	Energy	0.34%
Corporates	Natural Gas	0.12%
Corporates	Other Industrials	0.06%
Forex	Forex	-0.12%
Cash	Cash	0.82%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?**

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.37% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup> ?**

Yes:

In fossil gas       In nuclear energy

No

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

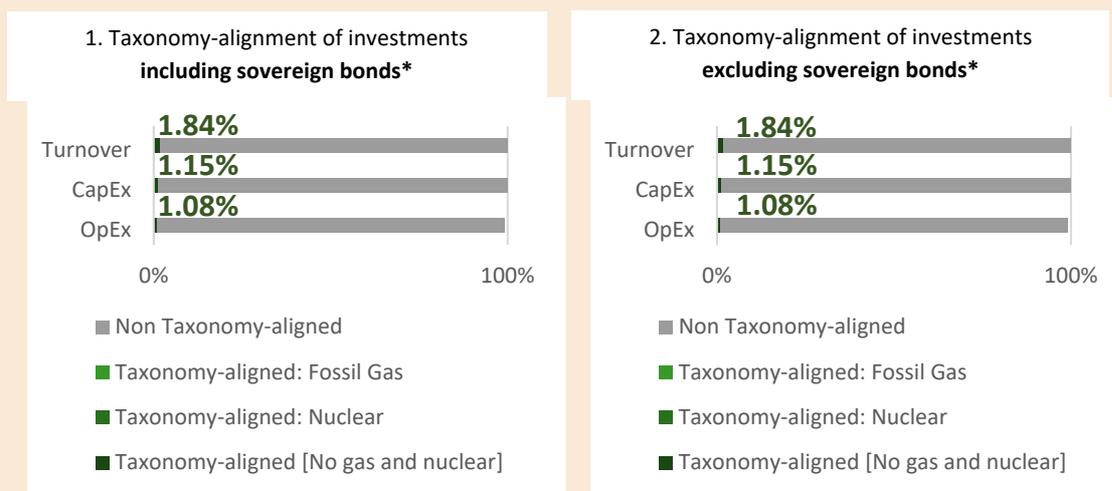

**Taxonomy-aligned activities** are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

<sup>4</sup>Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.**

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities ?**

As of 30/09/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 0.55%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

This is the first SFDR periodic report produced for this sub-fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?**

The share of sustainable investments with environmental objective not aligned to taxonomy was **33.05%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments ?**

The share of socially sustainable investments at the end of the period was 4.08%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards ?

“#2 Other” includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

## How did this financial product perform compared to the reference benchmark ?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index ?***

The Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the reference benchmark ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index ?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform ?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
