Entorno del mercado

Los mercados bursátiles mundiales se mostraron volátiles durante el periodo analizado y registraron un ligero descenso en dólares estadounidenses. Aunque los sólidos resultados empresariales y el entusiasmo constante por la inteligencia artificial (IA) prestaron apoyo, las preocupaciones por los riesgos geopolíticos y las elevadas valoraciones de las acciones tecnológicas contrarrestaron las ganancias. Los mercados subieron al inicio del periodo, impulsados por los indicios de relajación en las tensiones comerciales entre EE. UU. y China, unos datos económicos mejores de lo esperado y una temporada de resultados resiliente. Sin embargo, los inversores reconsideraron la sostenibilidad del gasto y las valoraciones relacionadas con la inteligencia artificial, lo que provocó un retroceso temporal de las acciones tecnológicas y una mayor volatilidad del mercado en noviembre de 2025. Los mercados repuntaron hacia finales de año, respaldados por los datos desfavorables del mercado laboral estadounidense y los continuos avances en el desarrollo de la IA. El optimismo se mantuvo de cara a 2026, gracias al impulso constante de la IA, la mejora de los resultados empresariales y los datos económicos. Sin embargo, los mercados sufrieron repuntes de volatilidad, ya que los inversores volvieron a replantearse las valoraciones de los sectores relacionados con la IA y reaccionaron al aumento de los precios de la energía y las incertidumbres geopolíticas, lo que lastró el interés por el riesgo. En este contexto, el Reino Unido registró las mayores subidas gracias a unas políticas nacionales favorables y a un entorno macroeconómico estable. Las acciones japonesas también subieron, ya que las políticas fiscales favorables al crecimiento, las reformas en materia de gobierno corporativo y la depreciación del yen reforzaron la confianza de los inversores. Los mercados emergentes obtuvieron mejores resultados que los mercados desarrollados, gracias a los recortes generalizados de los tipos de interés y al continuo desarrollo de la IA. A nivel sectorial, el sector energético fue el más favorecido, seguido por el de materiales y el de salud, mientras que los sectores de consumo discrecional y tecnologías de la información (TI) se quedaron rezagados.

Evolución regional

Las acciones europeas registraron ganancias durante el periodo, impulsadas inicialmente por la solidez de los resultados empresariales, la mejora de la visibilidad macroeconómica y la estabilización de las expectativas de la política económica. A finales de 2025, los mercados reaccionaron de forma positiva a una sólida temporada de resultados del tercer trimestre. La moderación de la inflación y una mayor claridad en materia fiscal, tras el acuerdo sobre el presupuesto de la UE para 2026 y un nuevo programa de inversión en defensa, reforzaron aún más la confianza. El Banco Central Europeo (BCE) mantuvo una postura de política monetaria estable, dejando los tipos en el 2,0%, lo que contribuyó a consolidar las expectativas. Este impulso se mantuvo hasta principios de 2026, gracias a la mejora de las perspectivas macroeconómicas, un liderazgo del mercado más amplio, más allá de las acciones estadounidenses de gran capitalización, y una temporada de resultados más positiva de lo esperado. Sin embargo, la confianza se deterioró considerablemente a partir de principios de marzo, ya que la escalada del conflicto en Oriente Medio provocó una crisis energética, lo que suscitó inquietud en torno a la seguridad energética de Europa y al probable impacto del aumento de los precios de la energía en la inflación y el crecimiento económico. Estos acontecimientos provocaron un reajuste significativo en las expectativas sobre los tipos de interés. Si bien se esperaba de una mayor flexibilización de la política monetaria del BCE, se volvió a contemplar la posibilidad de un endurecimiento de la misma si persisten las presiones inflacionistas impulsadas por los precios de la energía.

La renta variable de Asia sin Japón ganó terreno durante el periodo. La relajación de las tensiones comerciales entre EE. UU. y China y el repunte de las acciones del sector de las TI impulsado por la IA elevaron los índices regionales durante la primera mitad del periodo. Sin embargo, hacia el final del periodo, en particular durante el mes de marzo, la volatilidad recuperó protagonismo, con rentabilidades considerablemente más bajas debido a la incertidumbre geopolítica. La escalada de tensiones entre EE. UU., Israel e Irán durante el último mes del periodo provocó un aumento de los precios del petróleo y desencadenó una tendencia generalizada de aversión al riesgo, que dio lugar a una fuerte oleada de ventas en los mercados. El aumento de los precios del crudo agravó el temor a la inflación y avivó las expectativas de un endurecimiento de la política monetaria, y los países más dependientes de las importaciones de energía registraron las caídas más pronunciadas. Las acciones surcoreanas y taiwanesas subieron, gracias a las ganancias derivadas del optimismo por los semiconductores y la IA. Las acciones chinas cerraron el periodo a la baja. A pesar de que los datos sobre la actividad económica registrados a principios del primer trimestre de 2026 fueron más sólidos y de que el objetivo de crecimiento centrado en la calidad del XV Plan Quinquenal favoreció la confianza, la renta variable siguió sometida a presión. Las acciones indias cayeron, dado que el aumento de los precios del petróleo agravó el temor a la inflación, exacerbado por la dependencia del país de las importaciones de energía. Las continuas ventas por parte de los inversores institucionales extranjeros siguieron minando la confianza del mercado, junto con la incertidumbre en torno a los aranceles, que enfrió los ánimos de los inversores. En la ASEAN, la renta variable indonesia perdió terreno después de que MSCI expresara su preocupación por la transparencia del mercado y las restricciones a la negociación, lo que afectó a la confianza de los inversores e intensificó la presión para vender.

Los mercados emergentes (ME) registraron rentabilidades positivas durante el periodo. Los resultados iniciales se vieron impulsados por la fuerte demanda relacionada con la IA y por unas condiciones monetarias acomodaticias, tras la decisión de la Reserva Federal de EE. UU. (Fed) de recortar los tipos de interés en 25 puntos básicos (pb) en octubre. Aunque las tensiones comerciales eran inicialmente elevadas, el acuerdo entre EE. UU. y China alcanzado a finales de mes contribuyó a disipar las preocupaciones sobre los aranceles. En noviembre, la confianza se debilitó debido a la preocupación por una posible "burbuja" en el mercado de la IA, lo que lastró a los mercados con gran peso tecnológico, como los de Corea y Taiwán. Los mercados se recuperaron en diciembre tras una nueva bajada de tipos de la Fed de 25 puntos básicos, que favoreció el interés por el riesgo. A principios de 2026, la situación mejoró, gracias a la confianza sostenida en la demanda de IA, un dólar estadounidense más débil y las subidas registradas tanto en los metales preciosos como en los industriales, aunque algunas materias primas, entre ellas el oro y los metales del grupo del platino, retrocedieron hacia finales de enero. El panorama se deterioró hacia finales de febrero, ya que el estallido del conflicto en Irán provocó un aumento de los precios del petróleo y desencadenó una tendencia generalizada de aversión al riesgo. Esto provocó una fuerte caída de los activos de los ME en marzo, en un contexto en el que la mayor volatilidad y las estrategias de reducción del riesgo lastraron los mercados.

1. Generalidades

La Sociedad es una sociedad de inversión de capital variable, constituida en Luxemburgo en forma de SICAV el 14 de septiembre de 2004.

La Sociedad se rige de conformidad con la Parte primera de la Ley de Luxemburgo del 17 de diciembre de 2010 modificada relativa a organismos de inversión colectiva, que implementa la Directiva 2014/91/UE ("Directiva de OICVM V").

A 31 de marzo de 2026, la Sociedad constaba de 15 subfondos activos. Los Administradores podrán, cuando lo consideren oportuno, cerrar subfondos y clases de Acciones, así como incorporar nuevos subfondos y clases de Acciones con diferentes objetivos de inversión, dependiendo de la aprobación de la CSSF.

Se lanzó el siguiente subfondo durante el periodo:

Nombre del subfondo	Fecha de lanzamiento

2. Principales normas de contabilidad

Los Estados financieros se elaboran de acuerdo con los requisitos legales y reglamentarios de Luxemburgo en relación con los organismos de inversión colectiva.

Cálculo del Valor liquidativo. El Valor liquidativo por acción de cada clase de Acciones se calcula determinando en primer lugar la proporción del patrimonio neto del subfondo pertinente atribuible a cada clase de Acciones. Cada uno de estos importes se dividirá entre el número de Acciones de la clase pertinente en circulación al cierre de la actividad, en la medida que esto sea posible. El Valor liquidativo de cada clase se determina en la divisa de negociación principal de la clase respectiva.

Valoración de títulos. Las inversiones en instrumentos financieros cotizados en cualquier mercado de valores se valorarán con arreglo al último precio disponible en el momento de la valoración en el principal mercado de valores en el que cotice dicho título. Los instrumentos financieros negociados en cualquier mercado extrabursátil, los valores mobiliarios de deuda a corto plazo y los instrumentos del mercado monetario que no coticen en bolsas o mercados regulados se valorarán al último precio disponible en el momento en el que se realice la valoración. Todos los demás activos los valoran los Administradores de la Sociedad aplicando el principio de prudencia y de buena fe, basándose en su precio de venta previsible. Las participaciones propiedad de la Sociedad cotizan en un mercado regulado, excepto cuando se indique lo contrario en la Lista de inversiones de un subfondo.

Valores rusos. A partir del 1 de marzo de 2022, cuando dejó de existir la posibilidad de operar con valores rusos locales, el valor de las posiciones en valores rusos se redujo a cero.

Política de ajustes del valor razonable. Podrán efectuarse ajustes al valor razonable para proteger los intereses de los Accionistas contra las prácticas de sincronización de las operaciones con la marcha de los mercados (*market timing*). En consecuencia, si un subfondo invierte en mercados que están cerrados en el momento de valoración del subfondo, los Administradores, sin perjuicio de las disposiciones recogidas anteriormente en Valoración de los títulos, podrán permitir que los valores incluidos en una cartera en particular se ajusten para reflejar con mayor exactitud el valor justo de las inversiones del subfondo en el momento de valoración.

Depósitos bancarios y efectivo en bancos e intermediarios. Todos los depósitos bancarios y el efectivo en bancos e intermediarios se contabilizan a su valor nominal.

Operaciones de títulos de inversión. Las operaciones de títulos de inversión se contabilizan en la fecha de compra o venta de los títulos. El cálculo del coste de venta de los títulos se realiza con arreglo al coste medio.

Futuros. Los futuros se contabilizan en la fecha de apertura o de cierre del contrato. Los futuros se valoran al precio de cierre o recibidos por la cartera cada día, dependiendo de las fluctuaciones diarias del valor del índice o el título asociado, que se registran a efectos de las declaraciones financieras como ganancias o pérdidas no realizadas por la cartera. Las ganancias y pérdidas no realizadas derivadas de futuros se incluyen en el Estado del patrimonio neto y en la Lista de inversiones. Las ganancias y pérdidas materializadas se basan en el método de "primera entrada, primera salida".

Nº 230

Contratos de cambio de divisas a plazo. Los contratos de cambio de divisas a plazo se valoran con arreglo a los tipos de cambio a plazo vigentes en la fecha de cierre y aplicables durante el periodo restante hasta la fecha de vencimiento. Las ganancias y las pérdidas no realizadas derivadas de contratos de cambio de divisas a plazo se incluyen en el Estado del patrimonio neto y en la Lista de inversiones. Todos los contratos a plazo, incluyendo aquellos utilizados para la cobertura de clases de Acciones, se incluyen en la Lista de inversiones.

Contratos de opciones. Las opciones adquiridas se registran como inversiones a su valor de mercado realizable; las opciones suscritas o vendidas se registran como pasivo en base al coste al cierre de la posición. Las opciones adquiridas y suscritas se incluyen en el Estado del patrimonio neto y en la Lista de inversiones. Cuando el ejercicio de una opción ofrece una liquidación al contado, la diferencia entre la prima y el producto de la liquidación se contabiliza como beneficio o pérdida realizado(a). Cuando caduca una opción, las primas se contabilizan como beneficio realizado para opciones suscritas o como pérdida realizada para opciones adquiridas.

Contratos por diferencias. Los contratos por diferencias son contratos celebrados entre un intermediario y la Sociedad en virtud de los cuales las partes acuerdan realizarse pagos mutuos con el fin de reproducir las consecuencias económicas derivadas de la tenencia de una posición larga o corta en el valor subyacente. Los contratos por diferencias también reflejan las medidas empresariales adoptadas. Cuando se cierra un contrato, la Sociedad registra una ganancia o una pérdida realizada equivalente a la diferencia entre el valor del contrato en el momento en el que se firmó y el valor en el momento en el que se cerró. La valoración de los contratos por diferencias se basa en el valor subyacente y se declara en el Estado del patrimonio neto y en la Lista de inversiones.

Swaps de incumplimiento crediticio. Las primas abonadas y recibidas por contratos de swaps de incumplimiento crediticio para comprar o vender protección frente a problemas de crédito se devengan a diario y se reflejan como ingresos netos. Los compromisos futuros en virtud del swap se valoran a precio de mercado. Los contratos de swaps de incumplimiento crediticio se incluyen en el Estado del patrimonio neto y la Lista de inversiones.

Cambio de divisas. Los Administradores deciden la divisa de denominación de cada subfondo. Todas las operaciones denominadas en divisas extranjeras durante el periodo se convierten a la divisa de denominación del subfondo aplicando el tipo de cambio vigente el día de la operación. Los activos y pasivos a 31 de marzo de 2026 se han convertido aplicando los tipos de cambio vigentes en esa fecha.

Títulos en depósito fiduciario. Los títulos incluidos en la Lista de inversiones pueden utilizarse como garantía subsidiaria contra riesgos derivados abiertos. En tal caso, los títulos serán custodiados para evitar su negociación. A 31 de marzo de 2026, los subfondos no contaban con valores en depósito fiduciario.

Operaciones de acciones de los fondos. El precio de emisión y de reembolso por Acción de cada subfondo es el Valor liquidativo por acción el día de la operación, sujeto a la política de ajuste del precio.

Política de ajuste del precio. Se ha adoptado e implantado una política de ajuste del precio destinada a proteger los intereses de los Accionistas de la Sociedad. El propósito de la política de ajuste del precio es asignar los costes asociados a las grandes entradas y salidas a los inversores que realizan operaciones ese día, protegiendo así al Accionista a largo plazo de los peores efectos de la dilución. Este propósito se consigue mediante el ajuste del precio de la clase de acciones al que se efectúan las operaciones en un subfondo. De este modo, el precio de las clases de acciones se puede ajustar al alza o a la baja dependiendo del nivel y del tipo de operaciones de los inversores ese día en concreto en un subfondo. De esta forma, los Accionistas existentes y restantes no sufren un nivel de dilución inadecuado. La Sociedad solo aplicará un ajuste en el precio cuando existan flujos netos significativos que puedan tener una repercusión importante en los Accionistas restantes. El ajuste estará basado en los costes de operación normales de los activos correspondientes en los que invierte cada subfondo, sin superar el 2% del precio. El Consejo podrá decidir incrementar este límite de ajuste en circunstancias excepcionales para proteger los intereses de los Accionistas. Una vez efectuado un ajuste en el precio de la clase de acciones, dicho precio será el precio oficial de esa clase de acciones para todas las operaciones de ese día. A 31 de marzo 2026, se han realizado ajustes de precio en los siguientes subfondos:

Nombre del subfondo	Clase de Acciones	VL por acción no ajustado	VL por acción ajustado
Maybank Alpha Capital & Income Opportunities Fund	Acciones A-ACC (USD)	119,89	120,06

Costes de constitución. Todos los costes de constitución relativos al lanzamiento de la Sociedad se han amortizado. Los costes ocasionados por el lanzamiento de nuevos subfondos se imputarán a los gastos de operación actuales.

Ingresos. Los dividendos de los títulos de renta variable se reconocen cuando el título cotiza ex dividendo. El interés se contabiliza con el método de acumulación.

Información sobre el cupón cero. Los bonos de cupón cero se indican en la Lista de inversiones a una tasa que refleja el rendimiento real.

Cuentas combinadas. Los Estados financieros combinados se han presentado en USD y representan los Estados financieros totales de los diferentes subfondos. Los subfondos expresados en divisas distintas a USD se han convertido de acuerdo con los tipos de cambio vigentes al final del periodo.

Comisiones de rentabilidad

Además, FFML tiene derecho a recibir una Comisión de Rentabilidad sobre ciertas Clases de Acciones si el VL por acción de la Clase de Acciones, con arreglo a ciertos ajustes, supera su Índice, o tasa crítica de rentabilidad sobre su Índice, durante el Periodo de cálculo. La base para el cálculo de las comisiones de rentabilidad se explica de forma detallada en el Folleto informativo, que deben leer todos los inversores antes de invertir. Las comisiones de rentabilidad, las tasas críticas de rentabilidad y el índice de referencia de cada subfondo son los siguientes:

Nombre del subfondo	Comisión de rentabilidad	Tasa crítica de rentabilidad	Índice de referencia
Asia Fund	20%	2%	MSCI AC Asia ex Japan Index (Net)
Emerging Markets Fund	20%	2%	MSCI Emerging Markets Index (Net)
Europe Fund	20%	2%	MSCI Europe Index (Net)
Global Fund	20%	2%	MSCI ACWI Index (Net)
Global Contrarian Long/Short Fund	15%	-	Secured Overnight Financing Rate (SOFR) Index

Los índices de referencia anteriores se utilizan únicamente para el cálculo de la comisión de rentabilidad y, por tanto, no deben considerarse en ningún caso indicativos de un estilo de inversión determinado.

La siguiente tabla muestra las comisiones de rentabilidad devengadas pero no cristalizadas de cada clase de acciones a 31 de marzo de 2026:

Otras

FFML podrá renunciar en cada momento a cualquiera de sus comisiones o a todas ellas en relación con cualquier subfondo según su propio criterio. FFML asume todos los gastos generados por ella y sus filiales y asesores en relación con los servicios prestados por ella a la Sociedad. Las comisiones de intermediación, gastos de operaciones y otros costes operativos de la Sociedad serán abonados por la Sociedad. No hubo operaciones de la Sociedad negociadas a través de intermediarios asociados durante el periodo. No se pagaron comisiones de intermediación a intermediarios asociados durante el periodo finalizado el 31 de marzo de 2026. Ocasionalmente, FFML realiza algunas operaciones de la cartera con algunos intermediarios que acuerdan devolver una parte de las comisiones procedentes de las mismas para compensar los gastos de la Sociedad; sin embargo, no se realizaron operaciones de este tipo durante el periodo.

FFML utiliza estudios complementarios en el transcurso de su trabajo para la Sociedad y otros clientes, que son suministrados por los intermediarios a través de los cuales el Gestor de Inversiones realiza operaciones para la Sociedad y otros clientes. Todas las comisiones de negociación pagadas por la Sociedad y otros clientes en operaciones con intermediarios solo representan los costes de ejecución de la operación. Sin embargo, en el caso de los fondos en los que FFML actúe como subasesor de una firma no participada al 100 % por el grupo FIL Limited en otros países como los EE. UU. o Canadá, se podrá recurrir a comisiones blandas para pagar por servicios conforme a la normativa local aplicable. Todos los estudios complementarios utilizados por FFML son valorados y pagados de manera independiente a la ejecución y el resto de relaciones con los intermediarios de acuerdo con la normativa.

La Sociedad participa en el programa de operaciones entre fondos del Gestor de Inversiones, en virtud del cual, en algunas ocasiones, los operadores de FIL identifican situaciones en las que una cuenta o un subfondo gestionado por FIL está comprando el mismo título que está siendo vendido por otra cuenta o subfondo. Si un operador puede confirmar que sería beneficioso para ambas cuentas ejecutar una operación entre ellas, en lugar de en el mercado, se ejecuta una operación entre fondos. Estas operaciones ascendieron a 2.226.803 USD para el periodo analizado.

4. Préstamo de valores

A 31 de marzo de 2026, la Sociedad efectuó préstamos de valores por un valor de 33.420.378 USD y recibió garantías con un valor de mercado de 35.110.010 USD. Durante el periodo finalizado el 31 de marzo de 2026, la Sociedad pagó 45.076 USD a los agentes de préstamo de valores en relación con los títulos prestados. En cuanto a las operaciones de préstamo de valores, en general, la Sociedad exigirá al prestatario que presente una garantía que represente, en todo momento a lo largo de la vigencia del contrato, como mínimo, el 105 % del valor total de los valores prestados. En la siguiente tabla se desglosa el valor total de los títulos prestados, por cada subfondo, a 31 de marzo de 2026:

Nombre del subfondo	Divisas	Plazo de vencimiento	Valor de los títulos	% de activos disponibles para activos bajo	% de los
Emerging Markets Fund	USD	Operaciones abiertas	231.552	0,05	0,05
Europe Fund	EUR	Operaciones abiertas	341.731	0,19	0,18
Global Fund	USD	Entre 1 día y 1 semana	239.916	0,02	0,02
		Operaciones abiertas	32.555.355	2,70	2,59

La siguiente tabla desglosa el valor total de los títulos prestados como contraparte y el total del valor de mercado de la garantía secundaria como contraparte a 31 de marzo de 2026:

Contraparte	Valor total USD	Valor de mercado de la garantía secundaria USD	País	Tipo de compensación
Goldman Sachs	19.155.376	20.120.000	Reino Unido	Bilateral
Morgan Stanley	11.334.264	11.910.010	Reino Unido	Bilateral
UBS	2.930.738	3.080.000	Reino Unido	Bilateral

La garantía, compuesta por bonos del Estado, se encuentra en manos del Depositario y no se refleja en los estados financieros. La garantía no se ha vuelto a utilizar. No existen restricciones a la reutilización de la garantía. A 31 de marzo de 2026, el análisis de las garantías recibidas por el préstamo de valores era el siguiente:

Tipo de garantía	Valor total USD	Calidad de la garantía	Plazo de vencimiento de la garantía	Divisa de la garantía
Bono del Estado	1	Aa3	Entre 1 semana y 1 año	EUR
Bono del Estado	14.043.715	Aa1	Más de 1 año	USD

World Equity Fund	EUR	27	2	25

5. Tributación

La Sociedad no está sujeta a ningún impuesto luxemburgués sobre la renta o sobre plusvalías realizadas o no realizadas, ni a ninguna retención fiscal luxemburguesa. Los subfondos están sujetos a un impuesto anual de suscripción del 0,05%, calculado y pagadero trimestralmente en relación con el patrimonio neto del subfondo el último día de cada trimestre natural. El tipo fiscal reducido del 0,01% anual del patrimonio neto será aplicable a las clases de Acciones vendidas o poseídas únicamente por inversores institucionales en el sentido del artículo 174 de la Ley modificada del 17 de diciembre de 2010. Las plusvalías de capital, los dividendos y los intereses de los títulos pueden estar sujetos a impuestos sobre plusvalías, retenciones fiscales u otros impuestos aplicados por el país de origen correspondiente y dichos impuestos pueden no ser recuperables por la Sociedad o sus Accionistas.

6. Compensación

Se aplican acuerdos de compensación de ingresos a todas las clases de Acciones de todos los subfondos. Estos acuerdos tienen por objeto que los beneficios por acción distribuidos con relación a un periodo de distribución no se vean afectados por los cambios en el número de Acciones emitidas durante ese periodo. El cálculo de la compensación se basa en los beneficios netos de inversión.

7. Pago de dividendos

Market Environment

Global equities were volatile during the review period and declined slightly in US dollar terms. While strong corporate earnings and continued enthusiasm for artificial intelligence (AI) provided support, concerns over geopolitical risks and elevated valuations in technology stocks offset the gains. Markets rose early in the period, supported by signs of easing US-China trade tensions, stronger-than-expected economic data, and a resilient earnings season. However, investors reassessed the sustainability of AI-related spending and valuations, leading to a temporary pullback in technology stocks and broader market volatility in November 2025. Markets rebounded towards year-end, supported by a weak US labour market data and continued progress in AI development. Sentiment remained constructive turning into 2026 given continued AI momentum, improving earnings, and economic data. However, markets experienced bouts of volatility as investors reassessed valuations in AI-linked sectors again and reacted to higher energy prices and geopolitical uncertainties, which weighed on the risk appetite. Against this backdrop, UK led gains due to supportive domestic policies and a stable macroeconomic environment. Japanese equities also advanced as pro-growth fiscal policies, corporate governance reforms, and a weaker yen supported investor sentiment. Emerging markets outperformed developed markets, underpinned by broad-based interest rate cuts and continued AI development. At a sector level, energy was the top performer, followed by materials and health care, while consumer discretionary and information technology (IT) lagged.

Regional Developments

European equities gained over the period, supported initially by resilient corporate earnings, improving macroeconomic visibility and stabilising policy expectations. In late 2025, markets responded constructively to a solid third-quarter earnings season. Easing inflation and greater fiscal clarity, following an agreement on the EU's 2026 budget and a new defence investment programme, further underpinned sentiment. The European Central Bank (ECB) maintained a steady policy stance, holding rates at 2.0%, which helped anchor expectations. This momentum carried into early 2026, aided by improving macro expectations, broader market leadership beyond US mega-cap stocks, and a better-than-expected earnings season. However, sentiment weakened sharply from early March as escalating conflict in the Middle East triggered an energy shock, raising concerns around Europe's energy security and the likely impact of higher energy prices on inflation and economic growth. The developments drove a significant reset in interest rate expectations, shifting from prospects of further ECB policy easing towards the possibility of tighter policy if energy-led price pressures persist.

Asia ex Japan equities advanced over the period. Easing US-China trade tensions and an AI-driven rally in IT stocks lifted regional indices in the first half of the period. However, later in the period, notably the month of March was marked by volatility, with significant underperformance stemming from geopolitical concerns. An escalation in tensions between US-Israel and Iran in the last month of the period pushed oil prices higher, and triggered a broader risk-off move, leading to sharp sell-off across markets. Elevated crude prices added to inflation concerns and raised expectations of tighter monetary policy, with countries more reliant on imported energy seeing the sharpest declines. South Korean and Taiwanese equities rose, supported by gains linked to semiconductor and AI optimism. Chinese equities ended the period lower. Despite stronger economic activity data early in the first quarter of 2026 and a quality-focused growth target in the 15th Five-Year Plan supporting sentiment, equities remained under pressure. Indian equities declined as rising oil prices added to inflationary concerns, exacerbated by the country's reliance on energy imports. Persistent foreign institutional investor selling continued to weigh on sentiment, alongside tariff-related uncertainties that dampened investor confidence. In ASEAN, Indonesian equities lagged after MSCI flagged concerns over market transparency and trading constraints, which weighed on investor confidence and intensified selling pressure.

Emerging markets (EMs) posted positive returns over the period. Early performance was driven by strong AI-related demand and accommodative monetary conditions, with the US Federal Reserve (Fed) cutting interest rates by 25-basis points (bps) in October. While trade tensions were initially elevated, a US-China agreement later in the month helped ease tariff concerns. In November, sentiment weakened amid concerns around a potential AI-driven market "bubble", weighing on technology-heavy markets such as Korea and Taiwan. Markets rebounded in December following a further 25-bps Fed rate cut, supporting risk appetite. At the start of 2026, conditions improved, aided by continued confidence in AI demand, a weaker US dollar and gains in both precious and industrial metals, although some commodities, including gold and platinum group metals, retraced towards the end of January. The backdrop weakened towards the end of February as emergence of conflict in Iran pushed oil prices higher and prompted a broad risk-off move. This led to a sharp decline in EM assets in March, with heightened volatility and de-risking positioning weighing on markets.

1. These sub-funds are defined as Article 8 sub-funds as per Sustainable Finance Disclosure Regulation ("SFDR"). SFDR refers to the regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector. Article 8 sub-funds seek to achieve their investment objectives while promoting, among other characteristics, environmental or social characteristics, or a combination of those characteristics. Information on the environmental/social characteristics for the sub-funds disclosing under Article 8 of SFDR, is made available in the annex to the unaudited section of the annual report.

Within the meaning of SFDR, the others sub-funds are defined as Article 6 and do not promote environmental and/or social characteristics nor have a sustainable investment as its objective as at period end.

2. These sub-funds have not been authorised by the Swiss Financial Market Supervisory Authority (FINMA) and have therefore not been approved for distribution in Switzerland.

A copy of the Fund Factsheet report disclosing the Sector/Industry Exposure, Country Exposure and Top Net Long Positions including derivatives exposures may be obtained upon request from either the offices of the companies registered as distributors or from the Registered Office of the Company. The market value disclosed in the largest holdings consists of the market value as per local GAAP and does not include derivatives exposures. 2. Significant Accounting Policies

The Financial Statements are prepared in accordance with the Luxembourg legal and regulatory requirements relating to undertakings for collective investments.

Calculation of the Net Asset Value. The Net Asset Value per Share of each class of Shares, is calculated by determining first the proportion of the net assets of the relevant sub-fund attributable to each class of Shares. Each such amount will be divided by the number of Shares of the relevant class outstanding as at close of business to the extent feasible. The Net Asset Value of each class is determined in the principal dealing currency of the respective class.

Security Valuation. Investments in financial instruments traded on any stock exchange are valued at the last available price at the time when the valuation is carried out on the principal stock exchange on which such security is traded. Financial instruments dealt on any Over-the-Counter ("OTC") market, short-dated debt transferable securities and money market instruments not traded on a regulated exchange or market are valued at the last available price at the time when the valuation is carried out. All other assets are valued with prudence and in good faith by the Directors of the Company on the basis of their reasonably foreseeable sales price. All holdings owned by the Company are quoted on a regulated market, except where otherwise distinguished in a sub-fund's Schedule of Investments.

Russian Securities. Since 1 March 2022, as it became no longer possible to transact in local Russian securities, the valuations on the Russian securities held were reduced to nil.

Fair Value Adjustments Policy. Fair value adjustments may be implemented to protect the interests of Shareholders against market timing practices. Accordingly if a sub-fund invests in markets that are closed for business at the time the sub-fund is valued, the Directors may, by derogation from the provisions above under security valuation, allow for the securities included in a particular portfolio to be adjusted to reflect more accurately the fair value of the sub-fund's investments at the point of valuation.

Bank Deposits and Cash at Banks and Brokers. All bank deposits and cash at bank and brokers amounts are carried at face value.

Investment Security Transactions. Investment security transactions are accounted for on the date securities are purchased or sold. The computation of the cost of sales of securities is made on the basis of average cost.

Futures. Futures are accounted for on the date of opening or closing of the contract. Subsequent payments are made or received by the portfolio each day, dependent on the daily fluctuations in the value of the underlying index or security which are recorded for financial reporting purposes as unrealised gains or losses by the portfolio. The unrealised gains or losses resulting from futures are included in the Statement of Net Assets and in the Schedule of Investments. The realised gain and loss is based on the First In – First Out method.

Forward Foreign Exchange Contracts. Forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from forward foreign exchange contracts are included in the Statement of Net Assets and in the Schedule of Investments. All forwards, including those used for the hedging of share classes, are included in the Schedule of Investments.

ANA MARIA AYALA CASELLAS

Nº 230

Option Contracts. Options purchased are recorded as investments at their realisable market value; options written or sold are recorded as liabilities based on the cost to close the position. Purchased and written options are included in the Statement of Net Assets and in the Schedule of Investments. When the exercise of an option results in a cash settlement, the difference between the premium and the settlement proceeds is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

Contracts for Difference. Contracts for difference are contracts entered into between a broker and the Company under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place. When a contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The valuation of contracts for difference is based on the underlying security and they are disclosed in the Statement of Net Assets and the Schedule of Investments.

Credit Default Swaps. Premiums paid and received on credit default swap contracts to buy or sell protection against a credit event are accrued on a daily basis and reflected as net income. Future commitments under the swap are valued at market rates. Credit default swap contracts are disclosed in the Statement of Net Assets and in the Schedule of Investments.

Foreign Exchange. The Directors determine the designated currency of each sub-fund. All transactions denominated in foreign currencies during the period are translated into the sub-fund's designated currency at the exchange rate prevailing on the day of transaction. Assets and liabilities as at 31 March 2026 have been translated at the prevailing exchange rates on that date.

Securities in Escrow. Securities included in the Schedule of Investments can be used as collateral against open derivative exposures. Where this is the case, securities will be escrowed to prevent them from being traded. As at 31 March 2026, no securities in escrow were held by the sub-funds.

Fund Share Transactions. The issue and redemption price per Share of each sub-fund is the Net Asset Value per Share on the date of trade, subject to the price adjustment policy.

Swing Pricing Policy. A swing pricing policy has been adopted and implemented to protect the interests of the Company's shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class price at which deals in a sub-fund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution. The Company will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. The Board may decide to increase this adjustment limit in exceptional circumstances to protect Shareholders' interests. Once an adjustment is made to a share class price, that price is the official price for that share class for all deals that day. As at 31 March 2026, price adjustments were made on the following sub-funds:

Sub-fund name	Class of Shares	Unswung NAV per Share	Swung NAV per Share
Maybank Alpha Capital & Income Opportunities Fund	A-ACC Shares (USD)	119.89	120.06
Maybank Alpha Capital & Income Opportunities Fund	A-ACC Shares (SGD) (SGD/USD hedged)	114.61	114.77

Maybank Alpha Capital & Income Opportunities Fund	Y-MINCOME (G) Shares (USD)	110.17	110.32

Formation Costs. All formation costs related to the launch of the Company have been amortised. Costs incurred in launching new sub-funds will be charged to current operating expenses.

Income. Dividends on equities are recognised when the security is quoted ex-dividend. Interest is accounted for on an accrual basis.

Zero Coupon Disclosure. Zero coupon bonds are disclosed in the Schedule of Investments at a rate reflecting the actual return.

Combined Accounts. The combined Financial Statements have been presented in USD and represent the total Financial Statements of the different sub-funds. Sub-funds stated in currencies other than USD have been converted at exchange rates ruling at the period end.

3. Investment Management Fees and Other Transactions with the Investment Manager or its Affiliates

Performance Fees

In addition, FFML is entitled to receive a Performance Fee for certain Share Classes if the NAV per Share of the Share Class, subject to certain adjustments, outperforms its Index, or Hurdle Rate over its Index, during the Calculation Period. The basis for calculation of performance fees is fully explained in the Prospectus that all investors should read before investing. The relevant performance fee rates, hurdle rates and comparative indices for each sub-fund are as follows:

Sub-fund name	Performance fee	Hurdle rate	Comparative Index
Asia Fund	20%	2%	MSCI AC Asia ex Japan Index (Net)
Emerging Markets Fund	20%	2%	MSCI Emerging Markets Index (Net)
Europe Fund	20%	2%	MSCI Europe Index (Net)
Global Fund	20%	2%	MSCI ACWI Index (Net)
Global Contrarian Long/Short Fund	15%	-	Secured Overnight Financing Rate (SOFR) Index

The above mentioned comparative indices are solely used for performance fee calculation purposes and they should therefore under no circumstances be considered as indicative of a specific investment style.

The following table discloses the accrued yet uncrystallised performances fees for each share class as at 31 March 2026:

Others

FFML may waive any or all of its fees in respect of any sub-fund at its discretion from time to time. FFML bears all expenses incurred by it and its affiliates and advisers related to services performed by it for the Company. Brokerage commissions, transaction charges and other operating costs of the Company are payable by the Company. There were no transactions of the Company traded through connected brokers during the period. There were no brokerage commissions paid to connected brokers during the period ended 31 March 2026. FFML from time to time executes certain portfolio transactions to selected brokers who agree to repay a portion of commissions from such transactions to offset Company expenses, but no such transactions were executed during the period.

FFML uses supplemental research in the course of its work for the Company and other clients provided by brokers through whom the Investment Manager executes transactions for the Company and other clients. All dealing commission paid by the Company and other clients on trades with brokers account only for the costs of executing the trade. However for funds where FFML sub-advises to a firm outside of the wholly owned FIL Limited group in other jurisdictions such as the United States or Canada, soft commissions may be used to pay for services in line with applicable local regulations. All supplemental research used by the Investment Manager is valued and paid for separately from execution and other relationships with brokers in accordance with regulations.

The Company participates in the Investment Manager's interfunding programme whereby FIL's traders, on occasion, identify situations where an account or sub-fund managed by FIL is buying the same security that another account or sub-fund is selling. If a trader can confirm that it would be in the interests of both accounts to execute a transaction between them rather than in the market then an interfund transaction is executed. These transactions amounted to USD 2,226,803 during the period under review.

4. Securities Lending

As at 31 March 2026, the Company lent securities having a value of USD 33,420,378 and received collateral with a market value of USD 35,110,010. During the period ended 31 March 2026, the Company paid USD 45,076 to the securities lending agent in relation to the securities lent. With respect to securities lending transactions, the Company will generally require the borrower to post collateral representing, at any time during the lifetime of the agreement, at least 105% of the total value of the securities lent. The following table discloses the breakdown of the total value of securities on loan, by sub-fund, as at 31 March 2026:

Sub-fund name	Currency	Maturity Tenor	Securities Values	% of Lendable Assets	% of AUM
Emerging Markets Fund	USD	Open Transactions	231,552	0.05	0.05
Europe Fund	EUR	Open Transactions	341,731	0.19	0.18
Global Fund	USD	1 Day to 1 Week	239,916	0.02	0.02
		Open Transactions	32,555,355	2.70	2.59

The following table discloses the breakdown of the total value of securities on loan by counterparty and the total collateral market value by counterparty as at 31 March 2026:

Counterparty	Total Value USD	Collateral Market Value USD	Country	Clearing Type
Goldman Sachs	19,155,376	20,120,000	United Kingdom	Bilateral
Morgan Stanley	11,334,264	11,910,010	United Kingdom	Bilateral
UBS	2,930,738	3,080,000	United Kingdom	Bilateral

The collateral which consists of government bonds is held by the Custodian and is not reflected in the financial statements. The collateral has not been reused. There are no restrictions on the reuse of collateral. As at 31 March 2026, the analysis of collateral received on securities lending was as follows:

Collateral Type	Total Value USD	Collateral Quality	Maturity Tenor of Collateral	Collateral Currency
Government Bond	1	Aa3	Above 1 Year	EUR

World Equity Fund	EUR	27	2	25

5. Taxation

The Company is not liable to any Luxembourg taxes on income or on realised or unrealised capital gains, nor to any Luxembourg withholding tax. The sub-funds are subject to an annual subscription tax of 0.05%, calculated and payable quarterly on the net assets of the sub-funds on the last day of each calendar quarter. The reduced tax rate of 0.01% per annum of the net assets will be applicable to classes of Shares which are only sold or held by institutional investors within the meaning of Article 174 of the amended Law of 17 December 2010. Capital gains, dividends and interest on securities may be subject to capital gains and withholding taxes or other taxes imposed by the country of origin concerned and such taxes may not be recoverable by the Company or its Shareholders.

6. Equalisation

Income equalisation arrangements are applied to all Share classes across all sub-funds. These arrangements are intended to ensure that the income per Share which is distributed in respect of a distribution period is not affected by changes in the number of Shares in issue during that period. The calculation of equalisation is based on net investment income.
