This key information document is accurate as at 29/08/2025.

What is this Product?

Type This Product is a UCITS Fund. This Product is a Sub-Fund of a Luxembourg Société d'Investissement à Capital Variable. The Product is governed by Part I of the Luxembourg Law of 17 December 2010 as amended.

Term This Product has no specific maturity date. However, this Product might be dissolved or merged, in this case you would be informed by any appropriate means approved by the regulation.

Objectives The investment objective of the Product is investment return through a combination of capital appreciation and income. This Product may not be appropriate for investors who plan to withdraw their money within less than 5 years.

- The Product is not managed relative to a specific index. However, for indicative purposes only, the Product's performance may be compared with the MSCI All Country World Index (Net) ("primary index") or a blend of 60% MSCI All Country World Index (Net) and 40% Bloomberg Global Aggregate Bond Index ("secondary index"). In practice, the portfolio of the Product is likely to include constituents of the secondary index (directly or indirectly), however, the Product is unconstrained by the reference indices and may therefore significantly deviate from their performance.
- The Product is actively managed and allocates across equity and fixed income securities based on the Investment Manager's assessment of current market conditions and the relative opportunities within each asset class, among other factors. In deciding which equity securities to buy and sell, the Investment Manager seeks to hold good quality companies at attractive valuations with the potential to grow intrinsic value over time. The Investment Manager uses discounted cash flow analysis, among other methods of analysis, to determine a company's intrinsic value. In deciding which fixed-income securities to buy and sell, the Investment Manager seeks to invest in securities that it believes are undervalued and have the potential for credit upgrades, which may include securities that are below investment grade.
- The Product invests primarily in equity securities and fixed income securities worldwide. Although the Product may invest up to 100% of its net assets in either equity securities or fixed income securities, it is expected that under normal market conditions, it invests between 50% and 70% in equity securities and between 30% and 50% of its net assets in fixed income securities. The Product invests at least two-thirds of its net assets in securities worldwide, incl. emerging markets. Securities may include equity securities, fixed income securities, securitized instruments and closed-end funds. Its exposure to real estate investment trusts is not expected to exceed 20% of its net assets. It may invest up to 20% of its net assets in convertible securities, including contingent convertible bonds and up to 20% in securitized instruments on a global basis. Although the Product may invest up to 30% of its net assets in fixed income securities rated below investment grade, there is no minimum rating for the fixed income securities in which it may invest. The Product may invest in securities of any maturity or market capitalization. It may invest up to 30% of its net assets in securities of issuers in emerging market countries. The Product may invest up to 5% of its net assets in fixed income securities listed on the China Interbank Bond Market through the mutual bond market access between Mainland China and Hong Kong. It may invest in securities offered in initial public offerings, Rule 144A securities and Regulation S Securities. The Product may not invest more than 10% of its net assets in UCIs. The Product may invest up to one-third of its net assets in securities other than those described above.
- The Product may use derivative instruments in order to expose or hedge its assets.
- Income earned by the Product is reinvested.
- **Shareholders may redeem Shares on demand on any business day in Luxembourg at 13h30**

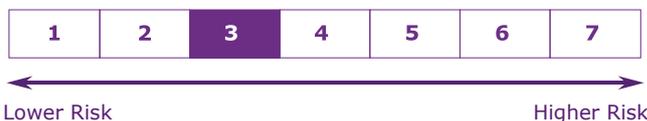

Intended retail investor The Fund is suitable for institutional and retail investors who are looking for diversified exposure to equity and fixed income markets on a global basis, can afford to set aside capital for long term horizon, can accept temporary losses and can tolerate volatility.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the Product for 5 years. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This classification rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Other risks materially relevant to the Product not included in the summary risk indicator: Credit risk, Liquidity risk, Counterparty risk, Management techniques risk, Bond connect risk.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the Product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product and a suitable proxy over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Natixis Investment Managers International is unable to pay out?

The assets of the Product are held in safekeeping by Brown Brothers Harriman (Luxembourg) S.C.A, as the depositary of the Product. In the event of insolvency of Natixis Investment Managers International, the Product assets will not be affected. However, in the event of the Depositary's insolvency, there is a potential risk of financial loss. However, this risk is mitigated to a certain extent by the fact that the Depositary is required by law and regulation to segregate its own assets from Product's assets.

There is an investor compensation or guarantee scheme in the case of default of the Depositary provided by law.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	402 EUR	878 EUR
Annual cost impact (*)	4.1%	1.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 7.3% before costs and 5.6% after costs.

We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount. These figures include the maximum distribution fee that the person selling you the Product may charge which amount to 63 EUR. This person will inform you of the actual distribution fee.

Composition of costs
