Competent Authority:	The Commission de Surveillance du Secteur Financier (CSSF) is in charge of the control of Candriam with regard to this key information document. . This product is authorised in France. Candriam is approved in France and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

This key information document is valid as at 2025-02-28.

WHAT DOES THIS PRODUCT CONSIST OF?

Type: This product is a unit class ("C") of a Fonds Commun de Placement (FCP) governed by French law ("Candriam Index Arbitrage"), an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term: 99 years.

Objectives:

Investment objectives:

Over the recommended investment period and within the context of its totally discretionary management, the fund seeks to outperform the €STR (Euro Short Term Rate) Capitalized with an annualised target volatility (an indicator of the upward or downward fluctuations of the fund's value) of less than 5% under normal market conditions.

Benchmark: €STR (Euro Short Term Rate) Capitalized.

The fund is managed actively and the investment process includes the reference to a benchmark .

Use of the benchmark:

- to calculate the performance fee for some share classes,
- for performance comparison purposes.

Investment strategy:

Portfolio management is built around a prudent portfolio foundation strategy via bonds and money market instruments, and a dynamic strategy.

The dynamic investment strategy is an arbitrage strategy on shares particularly in the context of index adjustments, of transactions on securities (e.g. companies impacted by a demerger) or discount of the traded assets. The arbitrage strategy consists in taking advantage of the differences in prices recorded (or anticipated) between markets and/or sectors and/or currencies and/or instruments. The fund does not have sustainable investment as its objective and does not specifically promote environmental and/or social characteristics.

The management team may use derivative products such as swaps, futures, options, CDS, etc., arising notably from equity, interest rate and foreign exchange risk. Total return swaps, or other derivative financial instruments which have the same characteristics, may also be used.

Derivatives are used for the purpose of (long or short) exposure, hedging or arbitrage.

Principal assets traded:

Global units/shares of closed-end funds invested directly and/or through derivatives. As part of the strategy of the portfolio fund: bonds and other debt securities, and money market instruments, of all types of issuers with a short-term rating of at least A-2 when acquired (or equivalent) from one of the rating agencies (i.e. issuers with a good rating)

Frequency of redemptions: On demand, every day, in France. The requests must be received by CACEIS BANK on business day D before noon and will be settled on business day D+3.

A redemption capping mechanism (gates) may be applied by the management company as described in the prospectus of the UCITS.

Allocation of income: Accumulation.

Intended retail investors:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with the level of investment knowledge required by the distributor who are looking for Capital Growth. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 3 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

General information:

Depositary bank: CACEIS BANK.

Other information:

This document provides a description of a category of units of Candriam Index Arbitrage. The prospectus and periodical reports are established for all the categories. There are other unit classes and these are listed in the prospectus.

There is additional information about the fund in the prospectus and the periodical reports which may be obtained free of charge on request from Candriam - Succursale française and viewed at any time on the website www.candriam.com. These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its units or in a common language in the international finance sphere.

All other practical information, in particular the latest unit price, is available from the places shown above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 2 out of 7, which is a low-risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Other risk(s) materially relevant not included in the summary risk indicator: Counterparty. Derivatives.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 09/2016 and 08/2019.

Moderate: This type of scenario occurred for an investment between 07/2017 and 06/2020.

Favourable: This type of scenario occurred for an investment between 12/2021 and 11/2024.

Recommended holding period Example Investment:		3 years 10 000 EUR	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	9 500 EUR	9 520 EUR
	Average return each year	- 5.01%	- 1.62%
Unfavourable	What you might get back after costs	9 700 EUR	9 820 EUR
	Average return each year	- 3.05%	- 0.61%
Moderate	What you might get back after costs	9 970 EUR	10 140 EUR
	Average return each year	- 0.33%	0.48%
Favourable	What you might get back after costs	10 400 EUR	10 530 EUR
	Average return each year	3.98%	1.73%

WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depositary, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depositary, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depositary.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 3 years
Total costs	182 EUR	351 EUR
Annual cost impact (*)	1.8%	1.1% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.6% before costs and 0.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

Composition of Costs

One-off entry or exit costs		If you exit after 1 year
Entry costs	1.00% maximum of the amount you pay in when entering this investment.	Maximum 100 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.40% of the value of your investment per year. This is an estimate based on actual costs over the last year.	42 EUR
Transaction costs	0.23% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	23 EUR
Incidental costs taken under specific conditions		
Performance fees	0.17% - 20% per annum calculated using the Permanent High Water Mark Methodology based on the outperformance of the NAV relative to the benchmark, namely €STR (Euro Short Term Rate) Capitalized, and the conditions of which are set out in prospectus. The actual amount varies according to the performance of your investment. The above estimation of total costs is the average over the past five years.	17 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period **3 years**

The choice of recommended holding period depends on the types of the underlying investments and on the associated degree of risk, which may be higher or lower. For example "equity" type products (higher risk) generally have a recommended holding period of six years (long term), and "bonds or money market" type products (lower risk) have a shorter recommended holding period (generally between two and four years for bond products or less than one year for money market products - medium term/short term). "Mixed" type products generally have a recommended holding period of between three and five years depending on the weighting of the types of underlyings. "Alternative" type products generally have a recommended holding period of three years.

Investors may request redemption of their units at any time under the conditions set out in "What will this investment cost me? ". The shorter the holding period in relation to the recommended period, the greater the potential impact of any charges on the performance profile.

HOW CAN I COMPLAIN?

Complaints about this product or about the conduct of the product manufacturer or the person advising on, or selling, the product:

Postal address: Candriam - Succursale française, 40, rue Washington, 75408 PARIS Cedex 08
