Lindsell Train Global Equity Fund, Class E Euro (the "Fund"), ISIN: IE00BF2VFW20

The Fund, a sub-fund of Lindsell Train Global Funds PLC (the "Company"), is authorised and supervised by the Central Bank of Ireland ("CBI") in Ireland and manufactured by Waystone Management Company (IE) Limited (the "Manager"). The Manager is authorised in Ireland and regulated by the CBI and the CBI is responsible for supervising the Manager in relation to this Key Information Document.

For more information on this product, please refer to <https://www.lindselltrain.com/funds-trusts/funds/> or call +44 20 7808 1210.

What is this product?

Type: The Fund is domiciled in Ireland and is an open-ended investment company ("OEIC") and qualifies as an undertaking for collective investment in transferable securities ("UCITS").

Intended Retail Investor: The Fund is suitable for investors seeking capital growth over a 5 to 10 year period and who are prepared to accept some volatility in the shorter term.

Term: The Fund does not have a fixed term of existence or maturity period but in certain circumstances, as described in the Prospectus, the Fund may be unilaterally terminated following written notice to investors subject to compliance with the Prospectus and applicable regulation.

Objectives:

The Fund's aim is to achieve growth through both share price appreciation and income from the shares.

The Fund invests directly in the shares of global companies primarily quoted on recognised exchanges in developed countries.

The Fund is actively managed, the Investment Manager having discretion in selecting investments in line with the Fund's objective and investment policy.

The MSCI World Index (the "Benchmark") has been selected as the Fund's Benchmark for performance comparison purposes only. Whilst the Fund may invest in companies that are components of the Benchmark, the Fund does not track the Benchmark or use the Benchmark as a performance target, and the Fund may hold investments that are not constituents of the Benchmark. The Benchmark does not play a role in the construction of the Fund's portfolio.

The Fund is a concentrated Fund which means that it holds fewer shares than many other funds; typically between 20 and 35 individual holdings.

In building the portfolio, the Investment Manager does not apply any limits in terms of stock and sector portfolio weightings, when compared to the Benchmark.

The depositary of the Fund is The Bank of New York Mellon SA/NV, Dublin Branch. (the "Depositary").

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less than your original investment. In addition to the market price risk, please refer to the Prospectus for further information.

If the Fund currency differs from your investment currency, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. Poor market conditions could impact your returns.

The value of your investment may fall and you may not get back the amount you invested.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Company's Prospectus for further details.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The figures shown include all the costs of the product itself, but do not take into account your personal tax situation and may not include all the costs that you pay to your advisor or distributor, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable, moderate, and favourable scenarios shown are illustrations of what you might get back using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Investment: EUR 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Minimum:	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress Scenario	What you might get back after costs	4,310 EUR	4,550 EUR
	Average return each year	-56.90%	-14.60%
Unfavourable Scenario	What you might get back after costs	8,620 EUR	10,600 EUR
	Average return each year	-13.80%	1.20%
Moderate Scenario	What you might get back after costs	11,540 EUR	15,120 EUR
	Average return each year	15.40%	8.60%
Favourable Scenario	What you might get back after costs	13,460 EUR	23,440 EUR
	Average return each year	34.60%	18.60%

Unfavourable: This type of scenario occurred for an investment between April 2024 and April 2025.

Moderate: This type of scenario occurred for an investment between April 2020 and March 2025.

Favourable: This type of scenario occurred for an investment between February 2016 and January 2021.

What happens if the Manager is unable to pay out?

The Manager is responsible for administration and management of the Company and does not typically hold assets of the Fund (assets that can be held by depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager and the Investment Manager have no obligation to pay out since the Fund's design does not contemplate any such payment being made. However, investors may suffer loss if the Company or the depositary is unable to pay out. There is no public or private investor compensation scheme that can compensate for any losses due to the insolvency of the Company, the Manager and the Investment Manager.

What are the costs?

Costs over Time

The person selling you or advising you about the Fund may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

The tables below show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the Fund performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment: EUR 10,000		
	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	71 EUR	544 EUR
Annual Cost Impact (*)	0.70%	0.80%

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.4% before costs and 8.6% after costs.

Composition of Costs

			If you exit after 1 year
One-off costs upon entry or exit	Entry costs	The impact of the costs you pay when entering your investment. We do not charge an entry fee for this investment, but the person selling you the product may do so.	N/A
