#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.08% y la cuota de inversión en actividades habilitadoras era del 3.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 4.42%.

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **48.86%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 15.03%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EUROPEAN EQUITY DYNAMIC MULTI FACTORS

Identificador de la entidad jurídica:  
5493008YF0WLJMAHCR51

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S)

y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **66.51%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI EUROPE INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.91 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.798 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior:

- La calificación ESG media ponderada de la cartera era **1.04 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG era **0.80 (C)**.

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y

factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

derechos humanos”, que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2022 al 30/06/2023**

| Mayores inversiones          | Sector                       | Subsector                                                       | País         | % de activos |
|------------------------------|------------------------------|-----------------------------------------------------------------|--------------|--------------|
| NOVO NORDISK A/S-B           | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Dinamarca    | 4.48%        |
| ASML HOLDING NV              | Tecnología de la información | Semiconductores y equipos de semiconductores                    | Países Bajos | 3.11%        |
| SAP SE / XETRA               | Tecnología de la información | Software y servicios                                            | Alemania     | 2.52%        |
| SHELL PLC                    | Energía                      | Petróleo, gas y combustibles                                    | Reino Unido  | 2.48%        |
| ROCHE HLDG AG-GENUSS         | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Suiza        | 2.36%        |
| NESTLE SA-REG                | Consumo básico               | Alimentos, bebidas y tabaco                                     | Suiza        | 2.21%        |
| ASTRAZENECA GBP              | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Reino Unido  | 1.98%        |
| NOVARTIS AG-REG              | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Suiza        | 1.84%        |
| L OREAL (PARIS)              | Consumo básico               | Productos domésticos y personales                               | Francia      | 1.62%        |
| GSK PLC                      | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Reino Unido  | 1.42%        |
| LVMH MOET HENNESSY LOUIS VUI | Consumo discrecional         | Bienes de consumo duradero y confección                         | Francia      | 1.39%        |
| RELX PLC                     | Industria                    | Servicios comerciales y profesionales                           | Reino Unido  | 1.29%        |
| HSBC HOLDING PLC GBP         | Finanzas                     | Entidades bancarias                                             | Reino Unido  | 1.26%        |
| DEUTSCHE TELEKOM NAM (XETRA) | Servicios de comunicación    | Telecomunicaciones                                              | Alemania     | 1.25%        |
| BP PLC                       | Energía                      | Petróleo, gas y combustibles                                    | Reino Unido  | 1.24%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

¿En qué sectores económicos se realizaron las inversiones?

| Sector               | Subsector                                                       | % de activos |
|----------------------|-----------------------------------------------------------------|--------------|
| Asistencia sanitaria | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | 15.01%       |
| Industria            | Bienes de capital                                               | 12.03%       |
| Finanzas             | Entidades bancarias                                             | 7.80%        |
| Finanzas             | Seguros                                                         | 6.33%        |

|                                     |                                                      |              |
|-------------------------------------|------------------------------------------------------|--------------|
| <i>Tecnología de la información</i> | <i>Semiconductores y equipos de semiconductores</i>  | <i>5.97%</i> |
| <i>Consumo básico</i>               | <i>Alimentos, bebidas y tabaco</i>                   | <i>5.86%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.08% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

● ¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.06% y la cuota de inversión en actividades habilitadoras era del 1.32%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 4.70%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **50.99%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del **14.43%**.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EUROPEAN EQUITY RISK PARITY

Identificador de la entidad jurídica:  
549300LGU40UNY8NUK95

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

Este subfondo se liquidó el 7 de junio de 2024 y el presente informe se basa en la composición de la cartera del subfondo en la fecha anterior al inicio del proceso de liquidación, es decir, el 23 de mayo de 2024. 23 de mayo de 2024.

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de **62.8%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Realizó inversiones sostenibles con un objetivo social:

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI EUROPE INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● *¿Cómo se comportaron los indicadores de sostenibilidad?*

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.969 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.792 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● *¿...y en comparación con periodos anteriores?*

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de **1.10 (C)** y la calificación ESG media ponderada del universo de inversión ESG era de **0.80 (C)**.

### ● *¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?*

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores

y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejem-

pló, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones          | Sector                       | Subsector                       | País           | % de activos |
|------------------------------|------------------------------|---------------------------------|----------------|--------------|
| ENI SPA MILAN                | Energía                      | Petróleo, gas y combustibles    | ITALIA         | 1.06%        |
| TOTALENERGIES SE PARIS       | Energía                      | Petróleo, gas y combustibles    | FRANCIA        | 1.05%        |
| OMV AG                       | Energía                      | Petróleo, gas y combustibles    | AUSTRIA        | 0.95%        |
| REPSOL SA                    | Energía                      | Petróleo, gas y combustibles    | ESPAÑA         | 0.95%        |
| SHELL PLC                    | Energía                      | Petróleo, gas y combustibles    | UNITED KINGDOM | 0.90%        |
| EQUINOR ASA                  | Energía                      | Petróleo, gas y combustibles    | NORUEGA        | 0.87%        |
| GALP ENERGIA -B              | Energía                      | Petróleo, gas y combustibles    | PORTUGAL       | 0.82%        |
| KONINKLIJKE KPN NV           | Servicios de comunicación    | Servicios de telecomunicaciones | PAÍSES BAJOS   | 0.75%        |
| DEUTSCHE TELEKOM NAM (XETRA) | Servicios de comunicación    | Servicios de telecomunicaciones | ALEMANIA       | 0.74%        |
| SAP SE / XETRA               | Tecnología de la información | Software y servicios            | ALEMANIA       | 0.73%        |
| AKER BP ASA                  | Energía                      | Petróleo, gas y combustibles    | NORUEGA        | 0.72%        |
| ORANGE                       | Servicios de comunicación    | Servicios de telecomunicaciones | FRANCIA        | 0.72%        |
| CAPGEMINI SE                 | Tecnología de la información | Software y servicios            | FRANCIA        | 0.67%        |
| ELISA OYJ                    | Servicios de comunicación    | Servicios de telecomunicaciones | FINLANDIA      | 0.66%        |
| TELEFONICA SA                | Servicios de comunicación    | Servicios de telecomunicaciones | ESPAÑA         | 0.64%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

Este subfondo se liquidó el 7 de junio de 2024 y el presente informe se basa en la composición de la cartera del subfondo en la fecha anterior al inicio del proceso de liquidación, el 23 de mayo de 2024.

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector                    | Subsector                                                       | % de activos |
|---------------------------|-----------------------------------------------------------------|--------------|
| Energía                   | Petróleo, gas y combustibles                                    | 8.52%        |
| Consumo básico            | Alimentos, bebidas y tabaco                                     | 8.39%        |
| Servicios de comunicación | Servicios de telecomunicaciones                                 | 7.79%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:  
-el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas  
-las **inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde  
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

## ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.15% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

- ☐ Sí:
- ☐ En gas fósil ☐ En energía nuclear
- ☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.21% y la cuota de inversión en actividades habilitadoras era del 2.96%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 7.81%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **47.38%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 12.28%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL EQUITY CONSERVATIVE

Identificador de la entidad jurídica:  
529900QOYD9Y5ZBAUZ70

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **39.53%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI WORLD INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.021(D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.179 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● ¿...y en comparación con periodos anteriores?

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.23 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.12 (D).

### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones     | Sector                       | Subsector                                                       | País           | % de activos |
|-------------------------|------------------------------|-----------------------------------------------------------------|----------------|--------------|
| T-MOBILE US INC         | Servicios de comunicación    | Telecomunicaciones                                              | Estados Unidos | 2.20%        |
| WASTE MANAGEMENT INC    | Industria                    | Comerciales y profesionales<br>Servicios                        | Estados Unidos | 2.19%        |
| NOVARTIS AG-REG         | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Suiza          | 2.04%        |
| MERCK & CO. INC.        | Asistencia sanitaria         | Productos farmacéuticos<br>Biotecnología y ciencias de la salud | Estados Unidos | 1.99%        |
| COLGATE-PALMOLIVE CO    | Consumo Básico               | Productos domésticos y personales                               | Estados Unidos | 1.89%        |
| CISCO SYSTEMS INC       | Tecnología de la información | Equipo tecnológico y hardware                                   | Estados Unidos | 1.86%        |
| CONSOLIDATED EDISON INC | Suministros públicos         | Multiservicios                                                  | Estados Unidos | 1.84%        |
| WALMART INC             | Consumo Básico               | Consumo básico<br>Distribución y venta minorista                | Estados Unidos | 1.81%        |
| COCA-COLA CO/THE        | Consumo Básico               | Alimentos, bebidas y tabaco                                     | Estados Unidos | 1.76%        |
| KDDI CORP               | Servicios de comunicación    | Telecomunicaciones                                              | Japón          | 1.71%        |
| CHUBB LTD               | Finanzas                     | Seguros                                                         | Suiza          | 1.65%        |
| MOTOROLA SOLUTIONS INC  | Tecnología de la información | Equipo tecnológico y hardware                                   | Estados Unidos | 1.60%        |
| MCDONALD S CORP         | Consumo discrecional         | Servicios al consumidor                                         | Estados Unidos | 1.60%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.87% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

En energía nuclear

☐ En gas fósil

☐

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.75%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.28%.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 28.66% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 10.00%.

#### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL EQUITY DYNAMIC MULTI FACTORS

Identificador de la entidad jurídica:  
549300YXILW3O14Y0587

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

|                                                                                         |                                                                                                                                                        |                                                                              |                                                                                                                                                                                      |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **MSCI WORLD (DIVIDEND REINVESTED) INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.079 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.179 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior:

- La calificación ESG media ponderada de la cartera era **0.21 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG era **-0.12 (D)**.

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de

sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con

una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones        | Sector                       | Subsector                                              | País           | % de activos |
|----------------------------|------------------------------|--------------------------------------------------------|----------------|--------------|
| NVIDIA CORP                | Tecnología de la información | Semiconductores y equipos de semiconductores           | Estados Unidos | 5.86%        |
| APPLE INC                  | Tecnología de la información | Equipo tecnológico y hardware                          | Estados Unidos | 4.98%        |
| MICROSOFT CORP             | Tecnología de la información | Software y servicios                                   | Estados Unidos | 3.15%        |
| ALPHABET INC CL A          | Servicios de comunicación    | Medios de comunicación y entretenimiento               | Estados Unidos | 2.48%        |
| META PLATFORMS INC-CLASS A | Servicios de comunicación    | Medios de comunicación y entretenimiento               | Estados Unidos | 2.30%        |
| ALPHABET INC CL C          | Servicios de comunicación    | Medios de comunicación y entretenimiento               | Estados Unidos | 2.13%        |
| BROADCOM INC               | Tecnología de la información | Semiconductores y equipos de semiconductores           | Estados Unidos | 1.26%        |
| AMAZON.COM INC             | Consumo discrecional         | Consumo discrecional<br>Distribución y venta minorista | Estados Unidos | 1.25%        |
| VISA INC-CLASS A SHARES    | Finanzas                     | Servicios financieros                                  | Estados Unidos | 1.23%        |
| COCA-COLA CO/THE           | Consumo básico               | Alimentos, bebidas y tabaco                            | Estados Unidos | 1.10%        |
| WALMART INC                | Consumo básico               | Consumo básico<br>Distribución y venta minorista       | Estados Unidos | 1.10%        |
| MASTERCARD INC-CL A        | Finanzas                     | Servicios financieros                                  | Estados Unidos | 1.10%        |
| EXXON MOBIL CORP           | Energía                      | Petróleo, gas y combustibles                           | Estados Unidos | 1.03%        |
| PEPSICO INC                | Consumo básico               | Alimentos, bebidas y tabaco                            | Estados Unidos | 1.00%        |
| HEWLETT PACKARD ENTERPRISE | Tecnología de la información | Equipo tecnológico y hardware                          | Estados Unidos | 0.98%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

¿En qué sectores económicos se realizaron las inversiones?

| Sector                       | Subsector                                    | % de activos |
|------------------------------|----------------------------------------------|--------------|
| Tecnología de la información | Semiconductores y equipos de semiconductores | 10.41%       |
| Servicios de comunicación    | Medios de comunicación y entretenimiento     | 8.70%        |
| Tecnología de la información | Equipo tecnológico y hardware                | 8.36%        |
| Tecnología de la información | Software y servicios                         | 8.31%        |

|                             |                                                                         |       |
|-----------------------------|-------------------------------------------------------------------------|-------|
| <i>Asistencia sanitaria</i> | <i>Productos farmacéuticos<br/>Biotecnología y ciencias de la salud</i> | 7.22% |
| <i>Industria</i>            | <i>Bienes de capital</i>                                                | 5.97% |
| <i>Finanzas</i>             | <i>Servicios financieros</i>                                            | 5.58% |
| <i>Finanzas</i>             | <i>Entidades bancarias</i>                                              | 4.38% |
| <i>Energía</i>              | <i>Petróleo, gas y combustibles</i>                                     | 4.28% |
| <i>Asistencia sanitaria</i> | <i>Equipo y servicios sanitarios</i>                                    | 3.92% |
| <i>Consumo básico</i>       | <i>Consumo básico Distribución y venta minorista</i>                    | 3.68% |
| <i>Finanzas</i>             | <i>Seguros</i>                                                          | 3.48% |
| <i>Consumo discrecional</i> | <i>Consumo discrecional Distribución y venta minorista</i>              | 3.30% |
| <i>Consumo básico</i>       | <i>Alimentos, bebidas y tabaco</i>                                      | 2.86% |
| <i>Consumo discrecional</i> | <i>Bienes de consumo duradero y confección</i>                          | 2.80% |
| <i>Industria</i>            | <i>Transporte</i>                                                       | 2.38% |
| <i>Consumo discrecional</i> | <i>Automóviles y componentes</i>                                        | 1.77% |
| <i>Industria</i>            | <i>Servicios comerciales y profesionales</i>                            | 1.73% |
| <i>Materiales</i>           | <i>Productos químicos</i>                                               | 1.37% |
| <i>Consumo básico</i>       | <i>Productos domésticos y personales</i>                                | 1.27% |

|                                  |                                                               |              |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.17% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el

de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las **actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las **actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las **actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los **gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

uso del producto obtenido de bonos verdes.  
El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

- ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.25%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.51%.

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **22.57%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 13.50%.

### **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

**Los índices de referencia son** índices para cuantificar si el producto

financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EUROPEAN CONVERTIBLE BOND

Identificador de la entidad jurídica:  
529900644PSS3LALW918

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí ☒ ☐ No

|                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **REFINITIV EUROPEAN CONVERTIBLE HEDGED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.037 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.675 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.94 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.71 (C).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores ma-

teriales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.

- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                     | Sector                       | Subsector                                                    | País         | % de activos |
|-----------------------------------------|------------------------------|--------------------------------------------------------------|--------------|--------------|

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector                       | Subsector                                    | % de activos |
|------------------------------|----------------------------------------------|--------------|
| Industria                    | Bienes de capital                            | 13.68%       |
| Tecnología de la información | Semiconductores y equipos de semiconductores | 9.14%        |
| Servicios de comunicación    | Telecomunicaciones                           | 8.20%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 3.00% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económi-

de efecto invernadero correspondientes al mejor rendimiento. Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

cas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 2.56%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 4.23%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 44.43% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

tal en virtud del Reglamento (UE) 2020/852.

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 20.09%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 9, apartados 1 a 4a, del Reglamento (UE) 2019/2088 y en el Artículo 5, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
MONTPENSIER GLOBAL CONVERTIBLE BOND

Identificador de la entidad jurídica:  
529900LZ9GLOP969J692

Objetivo de inversión sostenible

**Una inversión sostenible** es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental.

Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

**¿Tenía este producto financiero un objetivo de inversión sostenible?**

Sí

No

**Realizó inversiones sostenibles con un objetivo medioambiental: \_\_\_\_% del patrimonio neto del fondo**

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

**Realizó inversiones sostenibles con un objetivo social: \_\_\_\_% del patrimonio neto del fondo**

**Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 34.1% de inversiones sostenibles:**

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

**Promovió características E/S, pero no realizó inversiones sostenibles**

Una empresa es identificada como sostenible por el gestor de activos, aplicando la metodología descrita en la Política ESG disponible en el sitio web montpensier.com.

¿En qué medida se cumplió el objetivo de inversión sostenible de este producto financiero?

I fondo integra factores de sostenibilidad en su proceso de inversión, como se indica más detalladamente a continuación y en el capítulo "Estrategia de inversión" del Folleto.

El fondo tiene en cuenta los criterios ESG para unificar el rendimiento financiero y el deseo de influir positivamente, cuando sea posible, en el emisor en términos de desempeño ESG, animando a las empresas a mejorar la integración de los criterios ESG en sus actividades y valorando las mejores prácticas.

La sociedad gestora aplicó la política descrita en el Documento Precontractual para productos financieros Artículo 8, apartados 1, 2 y 2 bis, del Reglamento (UE) 2019/2088 y Artículo 6, párrafo primero, del Reglamento (UE) 2020/852.

34.65% de la cartera invertida, excluidos el efectivo y los equivalentes de efectivo y cualquier organismo de inversión colectiva (lo que supone el 34.09% del patrimonio neto del fondo), está compuesto por inversiones sostenibles.

La intensidad media ponderada de carbono y la huella de carbono de la cartera son inferiores a las de su índice.

The proportions are similar when Scope 3 Upstream is added: the carbon intensity and carbon footprint of the portfolio are significantly lower than the index.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

## ● ¿Cómo se comportaron los indicadores de sostenibilidad?

### 1.1. Rendimiento medioambiental

Independencia del Consejo: Ponderación de las empresas en cartera identificadas con una mayoría de consejeros independientes de empleados, accionistas mayoritarios y gobiernos.

Remuneración vinculada a objetivos ESG: Ponderación de las empresas en cartera identificadas que han integrado criterios ESG en la remuneración de los ejecutivos. Esta variable se basa en los informes publicados por las empresas. Se centra estrictamente en si estos elementos se incluyen o no en los componentes de la remuneración variable, y no tiene en cuenta su eficacia.

## 1.4. Desempeño en derechos humanos

Cumplimiento del Pacto Mundial: Ponderación de las empresas en cartera identificadas como conformes con los principios del Pacto Mundial de Naciones Unidas.

### ● ¿...y en comparación con periodos anteriores?

Ver más arriba.

### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

La metodología de Montpensier Finance para identificar inversiones sostenibles se basa en los siguientes componentes:

- Evaluar la contribución a un objetivo de sostenibilidad, que se basa en un enfoque basado en el mejor esfuerzo, con el fin de seleccionar a los "mejores actores" (o eliminar a los "peores actores") sobre la base de criterios E y/o S, así como un enfoque basado en los Objetivos de Desarrollo Sostenible (ODS) y una exposición de las actividades sostenibles, determinadas mediante una definición interna de "actividades definidas como sostenibles";
- Evaluating compliance with the principles of good governance, based on our analysis of the alignment of interests between management, shareholders and stakeholders more generally ;
- Evaluar el principio de "No causar un perjuicio significativo" (DNSH), que se basa en exclusiones sectoriales, en las Principales Incidencias Adversas (PIA) y en el seguimiento de las controversias, incluido en términos de gobierno corporativo.

Para obtener más información, véase el Folleto y el Documento precontractual SFDR anexo al folleto del OIC, disponibles en la página web de la sociedad gestora.

### ● ¿De qué manera las inversiones sostenibles no causaron un perjuicio significativo a ningún objetivo de inversión sostenible?

- ¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?

La evaluación del principio "No causar un perjuicio significativo" (DNSH) se basa en las exclusiones, las Principales Incidencias Adversas (PIA) y el seguimiento de las controversias. Además, se considera que las empresas con un impacto medioambiental o social negativo en la MIA, o en los pilares E y S, incumplen el principio DNSH.

Para obtener más información, véase el Folleto y el Documento precontractual SFDR anexo al folleto del OIC, disponibles en la página web de la sociedad gestora.

*¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:*

Excluimos de nuestro universo de inversión a las empresas que no están alineadas con determinadas normas y convenciones internacionales, en particular el Pacto Mundial de Naciones Unidas (UNGC), la Organización Internacional del Trabajo (OIT) y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos (UNGPNHR).

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Las empresas que son objeto de una controversia de color "Rojo" quedan excluidas del universo de inversión. Entre estas controversias de color "Rojo" están las empresas que no se ajustan al Pacto Mundial de Naciones Unidas (Derechos Humanos, Derechos Laborales, Medio Ambiente y Corrupción).

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

Tenemos en cuenta los principales indicadores de impactos negativos en la política de exclusiones sectoriales y normativas, el análisis de las prácticas de buen gobierno (utilizando el sistema interno Montpensier Governance Flag - MGF), el análisis cualitativo propio de la contribución de las empresas a las transiciones medioambiental y de solidaridad (Montpensier Impact Assessment – MIA, Montpensier Industry Contributor – MIC), y/o en el análisis de las actividades ecológicas que determina la contribución a uno o más Objetivos de Desarrollo Sostenible (ODS) de la ONU.

La pertinencia y la cobertura de estos indicadores en el análisis varían en función del sector, la industria y la región en la que opera cada empresa.

La información relativa a los objetivos medioambientales, sociales y de gobierno corporativo (ESG) puede consultarse en el sitio web de la sociedad gestora:

<https://www.montpensier.com/sites/default/files/public/documents/politique-esg.pdf>

El principio de "No causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la Unión Europea sobre actividades económicas sostenibles desde el punto de vista medioambiental.

Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la Unión Europea para las actividades económicas sostenibles desde el punto de vista medioambiental.

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: 01/07/2023 - 30/06/2024

| Mayores inversiones                                                                        | Sector                          | % de activos | País               |
|--------------------------------------------------------------------------------------------|---------------------------------|--------------|--------------------|
| Alibaba Group Holding - 0.50% - 06/2031                                                    | Venta minorista                 | 2.98%        | Islas Caimán       |
| AT&T 0% 04/2028                                                                            | Bienes y servicios industriales | 2.49%        | Francia            |
| INDOGB 2.5% 08/2029                                                                        | Tecnología                      | 2.10%        | Hong Kong          |
| AT&T 2.875% 09/2029                                                                        | Energía                         | 2.00%        | Italia             |
| Cellnex Telecom - 0.5% - 07/2028                                                           | Telecomunicaciones              | 1.93%        | España             |
| AT&T 0.125% 06/2025                                                                        | Tecnología                      | 1.91%        | Estados Unidos     |
| AT&T 0% 04/2027                                                                            | Bienes y servicios industriales | 1.87%        | Estados Unidos     |
| F 0.00% 08/2027                                                                            | Tecnología                      | 1.87%        | Países Bajos       |
| AT&T 0.50% 12/2027                                                                         | Bienes y servicios industriales | 1.81%        | Estados Unidos     |
| F 1% 08/2028                                                                               | Asistencia sanitaria            | 1.72%        | Estados Unidos     |
| LG Chem (LG Energy Solution) - 1.6% - 07/20                                                | Bienes y servicios industriales | 1.58%        | República de Corea |
| LI AUTO INC - 0.375% - 05/2028                                                             | Asistencia sanitaria            | 1.51%        | Estados Unidos     |
| On Semiconductor - 0.5% - 03/2029                                                          | Tecnología                      | 1.48%        | Estados Unidos     |
| LI AUTO INC - 0.125% - 07/2025                                                             | Tecnología                      | 1.48%        | Estados Unidos     |
| Schneider Electric - 1.97% - 11/2030                                                       | Bienes y servicios industriales | 1.43%        | Francia            |
| Ponderación total de las 15 primeras líneas frente al patrimonio neto del fondo a 28/06/24 |                                 | 28.2%        |                    |

## ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

### ¿Cuál era la asignación de activos?

The basis for calculating percentages mentioned below is the fund's net assets.

N.º 1 Alineación con características E/S incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

N.º 2 Otros incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría N.º 1 Alineado con las características E/S abarca:

- La subcategoría N.º 1A Sostenible abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría N.º 1B Otras características E/S abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

### ¿En qué sectores económicos se realizaron las inversiones?

|                               | % Activos gestionados |
|-------------------------------|-----------------------|
| Tecnología                    | 13.1%                 |
| Industria                     | 7.6%                  |
| Asistencia sanitaria          | 6.3%                  |
| Consumo básico                | 1.6%                  |
| Suministros públicos          | 1.5%                  |
| Consumo discrecional          | 1.4%                  |
| Telecomunicaciones            | 0.9%                  |
| Inmobiliario                  | 0.8%                  |
| Finanzas                      | 0.6%                  |
| Energía                       | 0.3%                  |
| Total Sustainable Investments | 34.1%                 |

Clasificación industrial de referencia (ICB) - 11 sectores industriales

del patrimonio neto del fondo a 28/06/2024

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035.

En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos;

## ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil ☐ En energía nuclear

☒ No

Los datos relativos a la participación de las empresas en actividades relacionadas con el gas fósil y/o la energía nuclear, de acuerdo con la Taxonomía, se determinan teniendo en cuenta únicamente los datos publicados por las empresas.

Aún no se dispone de datos sobre la participación de las empresas en actividades relacionadas con el gas fósil y/o la energía nuclear que cumplan la Taxonomía.

A título informativo, los valores identificados como implicados en energía fósil y/o nuclear representan el 3.40% de la cartera, es decir, el 5.80% de la cartera para los valores que obtienen parte de sus ventas de la energía nuclear, y el 2.37% para los valores implicados en energía fósil.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\*A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública. El volumen de negocio lo estima MSCI ESG Research según la metodología descrita a continuación. Los datos de Inversión en inmovilizado y Gastos de explotación solo tienen en cuenta los datos publicados por las empresas.

### Alineación con la Taxonomía de la UE

La alineación con la Taxonomía de la UE la estima MSCI ESG Research, a partir del porcentaje máximo de las ventas de una empresa derivado de productos y servicios que abordan objetivos medioambientales, sobre la base del marco MSCI Sustainable Impact Metrics.

El porcentaje de ventas generado por productos y servicios que cumplen objetivos medioambientales se reduce a 0 para las empresas que no cumplen los criterios de "No causar un perjuicio significativo" y "Salvaguardias sociales mínimas" de la Taxonomía de la UE.

Lo mismo se aplica a las empresas cuyos ingresos proceden en un 5% o más del suministro, distribución o venta al por menor de productos del tabaco, y a las empresas implicadas en armas controvertidas.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio refleja la "ecologización" de las empresas participadas en la actualidad.

- las inversiones en inmovilizado (CapEx) muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.

- los gastos de explotación (OpEx) reflejan las actividades operativas ecológicas de las empresas participadas.

Las actividades habilitadoras permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de transición son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

- ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?
- El fondo carece de porcentaje mínimo de inversión en actividades de transición o habilitadoras.
- ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

|                                       | 28/06/24              | 30/06/23              |
|---------------------------------------|-----------------------|-----------------------|
| Alineación con la Taxonomía de la UE  | % activos gestionados | % activos gestionados |
| Amundi Funds Montpensier Global Conve | 8.4%                  | 9.5%                  |

El porcentaje indicado más arriba representa la contribución de la cartera a la alineación con la Taxonomía de la UE (basada en el volumen de negocio) de todas las inversiones sostenibles, ya tengan un objetivo medioambiental o social.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

En la fecha de este informe, el 6.3% del patrimonio neto estaba asignado a inversiones sostenibles con un objetivo medioambiental, mientras que el 0.8% no estaba alineado con la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

En la fecha de este informe, el 27.8% del patrimonio neto estaba asignado a inversiones sostenibles con un objetivo social.

¿Qué inversiones se incluían en "no sostenible", cuál era su finalidad y existían salvaguardas medioambientales o sociales mínimas?

El efectivo, los equivalentes de efectivo y cualesquiera fondos o derivados de cobertura representan el 1.6% del patrimonio neto del fondo, y no ofrecen salvaguardias mínimas medioambientales o sociales.

What actions have been taken to attain the sustainable investment objective during the reference period?

La sociedad gestora ha aplicado la política descrita en el documento de información precontractual para productos financieros al que se alude en Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y Artículo 6, párrafo primero, del Reglamento (UE) 2020/852.

La política de implicación de los accionistas de Montpensier Finance consta de una política de voto y una política de implicación.

El ejercicio de los derechos de voto es un elemento importante del diálogo con los emisores. Fomenta las mejores prácticas de gobierno corporativo y promueve la ética profesional.

Montpensier Finance considera que el ejercicio de los derechos de voto forma parte integrante del proceso de gestión de las inversiones y debe llevarse a cabo velando siempre por los intereses de sus clientes. La política de derechos de voto de Montpensier Finance tiene por objeto promover la valoración a largo plazo de las inversiones de sus fondos.

Para ejercer los derechos de voto vinculados a los títulos que posee el fondo, los gestores del fondo se remiten a los principios relativos a las recomendaciones de gobierno corporativo publicadas por ISS Governance, en su Política de Sostenibilidad. ISS abarca todas las empresas incluidas en las carteras de los fondos gestionados por Montpensier Finance.

Las normas de cumplimiento exigen que los gestores de carteras desempeñen sus funciones de forma independiente, en particular con respecto a los emisores, y en interés exclusivo de los

partícipes/accionistas. Los gestores de carteras prestan especial atención a las resoluciones que puedan perjudicar los intereses de los partícipes/accionistas.

La política de voto completa, así como el último informe sobre el ejercicio de los derechos de voto, están disponibles en nuestro sitio web.

Montpensier Finance complementa su política de voto con una política de implicación.

Se anima a los equipos de gestión del fondo a que planteen cualquier inquietud a las empresas durante las reuniones, especialmente cuando las cuestiones ESG parezcan insuficientemente contempladas, con el fin de animar a estas empresas a mejorar sus prácticas en cuestiones medioambientales, sociales y de gobierno corporativo, todos ellos factores de crecimiento sostenible.

Los gestores del fondo, con la ayuda de analistas de ISR, establecerán una relación positiva y constructiva a medio y largo plazo con las empresas en cartera.

Esta relación es polifacética:

- ✓ Contactos con la empresa;
- ✓ Comunicar a la empresa la intención de voto de los gestores del fondo antes de la Junta General.

Además de las iniciativas de implicación directa que solemos llevar a cabo directamente con las Pequeñas y Medianas Empresas, Montpensier Finance también participa en acciones de implicación agrupadas puestas en marcha por ISS como parte de su programa ESG de ISS, especialmente para empresas más grandes.

Este diálogo se lleva a cabo con el objetivo de:

- ✓ Animar a las empresas a establecer un compromiso ESG;
- ✓ Animar a las empresas a comunicar sus prácticas ESG.

La política de implicación completa, así como el último informe de implicación, están disponibles en nuestro sitio web.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para medir si el producto financiero alcanza el objetivo sostenible.

El fondo no utiliza un índice de referencia sostenible. Sus resultados en materia de sostenibilidad se comparan con los de su índice de referencia: Stoxx Global 1800

- *¿En qué se diferencia el índice de referencia de un índice de mercado general?*

N/A

- *¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?*

N/A

- *¿Cómo se comportó este producto financiero en comparación con el índice de referencia?*

N/A

- *¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?*

Véanse más arriba los indicadores de desempeño del fondo y su índice de referencia con respecto a los indicadores de sostenibilidad.

**Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852**

**Nombre del producto:** AMUNDI  
FUNDS EURO AGGREGATE BOND

**Identificador de la entidad jurídica:**  
529900DJK6EP37QSNF19

## Características medioambientales y/o sociales

### ¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

**Realizó inversiones sostenibles con un objetivo medioambiental:**

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

**Realizó inversiones sostenibles con un objetivo social:**

**Promovió características Medioambientales/Sociales (E/S)**

y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **43.46%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

**Promovió características E/S, pero no realizó inversiones sostenibles**

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **85% BLOOMBERG EURO AGGREGATE (E) + 10% ICE BOFA EURO HIGH YIELD INDEX + 5% JP MORGAN EMBI GLOBAL**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.036 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.930 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.15 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.93 (C).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades

locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra

metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento

sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                     | Sector           | Subsector                     | País         | % de activos |
|-----------------------------------------|------------------|-------------------------------|--------------|--------------|
| AMUNDI EURO LIQUIDITY SRI - Z (C)       | Finanzas         | Fondos de inversión colectiva | Francia      | 2.51%        |
| SPAIN 5.15% 10/28                       | Bonos del Tesoro | Bonos del Tesoro              | España       | 2.12%        |
| SPAIN 3.15% 04/33                       | Bonos del Tesoro | Bonos del Tesoro              | España       | 1.74%        |
| GGB 3.875% 06/28                        | Bonos del Tesoro | Bonos del Tesoro              | Grecia       | 1.64%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 27.00%       |
| Empresas         | Banca                         | 16.68%       |
| Titulizado       | Activos hipotecarios          | 14.44%       |
| Finanzas         | Fondos de inversión colectiva | 8.21%        |
| Sector público   | Supranacional                 | 6.85%        |
| Sector público   | Agencias                      | 4.09%        |
| Empresas         | Consumo discrecional          | 3.14%        |

|                       |                                     |              |
|-----------------------|-------------------------------------|--------------|
| <i>Empresas</i>       | <i>Electricidad</i>                 | <i>2.77%</i> |
| <i>Empresas</i>       | <i>Comunicación</i>                 | <i>2.18%</i> |
| <i>Titulizado</i>     | <i>Híbrido</i>                      | <i>1.79%</i> |
| <i>Empresas</i>       | <i>Inmobiliario (REIT)</i>          | <i>1.77%</i> |

| <i>Otros</i>    | <i>Otros</i>                      | <i>-0.01%</i> |
| <i>Forex</i>    | <i>Forex</i>                      | <i>-0.02%</i> |
| <i>Efectivo</i> | <i>Efectivo</i>                   | <i>-0.05%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.43% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.03% y la cuota de inversión en actividades habilitadoras era del 0.30%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 10.79%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 37.93% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.09%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS EURO  
CORPORATE ESG BOND

Identificador de la entidad jurídica:  
EJCJD2QBJY0UVP7HMP10

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

|                                                                                         |                                                                                                                               |                                                                                         |                                                                                                                                                                                     |

| <input type="checkbox"/>                                                                | Realizó inversiones sostenibles con un objetivo medioambiental: _____                                                         | <input checked="" type="checkbox"/>                                                     | Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <b>58.49%</b> de inversiones sostenibles |
| <input type="checkbox"/>                                                                | en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE    | <input type="checkbox"/>                                                                | con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE                           |
| <input type="checkbox"/>                                                                | en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE | <input checked="" type="checkbox"/>                                                     | con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE                        |
| <input type="checkbox"/>                                                                | Realizó inversiones sostenibles con un objetivo social: _____                                                                 | <input type="checkbox"/>                                                                | con un objetivo social                                                                                                                                                              |
| <input type="checkbox"/>                                                                | Promovió características E/S, pero no realizó inversiones sostenibles                                                         |                                                                                         |                                                                                                                                                                                     |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG EURO AGGREGATE CORPORATE (E)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.030 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.537 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.83 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.55 (C).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades

locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo,

el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones                   | Sector           | Subsector                     | País         | % de activos |
|---------------------------------------|------------------|-------------------------------|--------------|--------------|
| BUBILL 18/09/24 364D                  | Bonos del Tesoro | Bonos del Tesoro              | Alemania     | 9.77%        |
| AMUNDI ABS - M (D)                    | Finanzas         | Fondos de inversión colectiva | Francia      | 2.03%        |
| FRLBP VAR 03/34 EMTN                  | Empresas         | Banca                         | Francia      | 1.50%        |
| URWFP VAR PERP                        | Empresas         | Inmobiliario (REIT)           | Francia      | 1.34%        |

## ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Empresas         | Banca                         | 38.55%       |
| Bonos del Tesoro | Bonos del Tesoro              | 9.77%        |
| Empresas         | Electricidad                  | 7.66%        |
| Empresas         | Comunicación                  | 6.32%        |
| Empresas         | Consumo discrecional          | 6.15%        |
| Empresas         | Inmobiliario (REIT)           | 4.92%        |
| Finanzas         | Fondos de inversión colectiva | 4.74%        |

|                   |                                    |        |
|-------------------|------------------------------------|--------|
| <i>Empresas</i>   | <i>Seguros</i>                     | 4.29%  |
| <i>Empresas</i>   | <i>Transporte</i>                  | 3.01%  |
| <i>Empresas</i>   | <i>Bienes de equipo</i>            | 2.63%  |
| <i>Titulizado</i> | <i>Activos hipotecarios</i>        | 2.49%  |
| <i>Empresas</i>   | <i>Industria básica</i>            | 2.17%  |

| <i>Otros</i>      | <i>Otros</i>                       | -0.04% |
| <i>Efectivo</i>   | <i>Efectivo</i>                    | 0.50%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.91% en inversiones sostenibles alineadas con la Taxonomía de

de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde** **- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas**

la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.09% y la cuota de inversión en actividades habilitadoras era del 1.22%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 15.27%.

 son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **53.80%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.78%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de cartera. También puede incluir valores sin calificación ESG para los que no se dispone de los datos necesarios con vistas a cuantificar el cumplimiento de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
STRATEGIC BOND

Identificador de la entidad jurídica:  
5493009E9QZ9NKKW632

## Características medioambientales y/o sociales

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

### ¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **28.38%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.151 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.20 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                | Sector   | Subsector                     | País         | % de activos |
|------------------------------------|----------|-------------------------------|--------------|--------------|
| AMU PLAN-EM GR ONE-SEN USDC        | Finanzas | Fondos de inversión colectiva | Luxemburgo   | 3.26%        |

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.55% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de

efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.09% y la cuota de inversión en actividades habilitadoras era del 0.10%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.47%.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 22.31% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.52%.

● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

**Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852**

**Nombre del producto:** AMUNDI  
FUNDS EURO HIGH YIELD BOND

**Identificador de la entidad jurídica:**  
E1BBUNTIB1P10L18SD26

## Características medioambientales y/o sociales

### ¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó **inversiones sostenibles con un objetivo medioambiental:** \_\_\_\_\_

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó **inversiones sostenibles con un objetivo social:** \_\_\_\_\_

**Promovió características Medioambientales/Sociales (E/S)**

y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **43.32%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero **no realizó inversiones sostenibles**

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA BB-B EUROPEAN CURRENCY HIGH YIELD CONSTRAINED INDEX HEDGED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.487 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.315 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.28 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.16 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades

locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra

metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.

- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                | Sector   | Subsector                     | País         | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                     | % de activos |
|----------|-------------------------------|--------------|
| Empresas | Consumo discrecional          | 18.68%       |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos. Las **actividades habilitadoras** permiten

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.69% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 0.37%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 7.54%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **34.48%** al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 8.15%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo. Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EURO HIGH YIELD SHORT TERM BOND

Identificador de la entidad jurídica:  
529900Q3IK91XCA88E07

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **41.45%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA Q759 CUSTOM INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.567(D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.309 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● ¿...y en comparación con periodos anteriores?

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.34 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.04 (D).

### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                     | Sector   | Subsector                     | País            | % de activos |
|-----------------------------------------|----------|-------------------------------|-----------------|--------------|
| AMUNDI EURO LIQUIDITY SRI - Z (C)       | Finanzas | Fondos de inversión colectiva | Francia         | 2.56%        |
| VOD VAR 08/80                           | Empresas | Comunicación                  | Reino Unido     | 2.21%        |
| EOFP 2.75% 02/27                        | Empresas | Consumo discrecional          | Francia         | 2.15%        |
| AMUNDI EURO LIQUIDITY-RATED SRI - Z (C) | Finanzas | Fondos de inversión colectiva | Francia         | 2.06%        |
| VERISR 7.125% 02/28 REGS                | Empresas | Consumo discrecional          | Suecia          | 1.64%        |
| ILDFP 5.125% 10/26 REGS                 | Empresas | Comunicación                  | Francia         | 1.59%        |
| TELEFO VAR PERP                         | Empresas | Comunicación                  | Países Bajos    | 1.54%        |
| VIEFP VAR PERP                          | Empresas | Otros suministros públicos    | Francia         | 1.52%        |
| EDPPL VAR 08/81                         | Empresas | Electricidad                  | Portugal        | 1.39%        |
| ABESM VAR PERP                          | Empresas | Transporte                    | Países Bajos    | 1.29%        |
| SAZGR 7.5% 08/26 REGS                   | Empresas | Consumo Básico                | Alemania        | 1.22%        |
| SAZKAG 3.875% 02/27 REGS                | Empresas | Consumo discrecional          | República Checa | 1.17%        |
| LORCAT 4% 09/27 REGS                    | Empresas | Comunicación                  | España          | 1.15%        |
| TEVA 3.75% 05/27                        | Empresas | Consumo Básico                | Países Bajos    | 1.15%        |
| SABSM VAR 09/26 EMTN                    | Empresas | Banca                         | España          | 1.14%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                     | % de activos |
|----------|-------------------------------|--------------|
| Empresas | Consumo discrecional          | 24.31%       |
| Empresas | Comunicación                  | 18.44%       |
| Empresas | Consumo básico                | 12.05%       |
| Empresas | Transporte                    | 7.87%        |
| Empresas | Bienes de equipo              | 6.58%        |
| Finanzas | Fondos de inversión colectiva | 5.83%        |
| Empresas | Banca                         | 5.46%        |

|                         |                                    |        |
|-------------------------|------------------------------------|--------|
| <i>Empresas</i>         | <i>Industria básica</i>            | 5.22%  |
| <i>Empresas</i>         | <i>Electricidad</i>                | 5.21%  |
| <i>Empresas</i>         | <i>Otras empresas financieras</i>  | 4.12%  |
| <i>Empresas</i>         | <i>Otros suministros públicos</i>  | 1.94%  |
| <i>Empresas</i>         | <i>Tecnología</i>                  | 1.32%  |
| <i>Empresas</i>         | <i>Energía</i>                     | 1.08%  |
| <i>Empresas</i>         | <i>Otros sectores industriales</i> | 0.93%  |
| <i>Empresas</i>         | <i>Gas natural</i>                 | 0.90%  |
| <i>Forex</i>            | <i>Forex</i>                       | 0.01%  |
| <i>Bonos del Tesoro</i> | <i>Bonos del Tesoro</i>            | 0.00%  |
| <i>Efectivo</i>         | <i>Efectivo</i>                    | -1.08% |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.79% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

☐ Sí:

En energía nuclear

☐ En gas fósil

☐

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.27%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 14.63%.

 son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **32.05%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 8.61%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL SUBORDINATED BOND

Identificador de la entidad jurídica:  
549300YM7XSURJOGN349

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **41.38%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

X

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **30% ICE BOFA CONTINGENT CAPITAL HEDGED INDEX + 15% ICE BOFA PERPETUAL PREFERRED SECURITIES HEDGED INDEX + 37.5% ICE BOFA GLOBAL HYBRID NON-FINANCIAL CORPORATE HEDGED INDEX + 17.5% ICE BOFA GLOBAL HYBRID NON-FINANCIAL HIGH YIELD HEDGED INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1339

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.506 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.420 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.51 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.50 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación

en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones  | Sector   | Subsector                  | País           | % de activos |
|----------------------|----------|----------------------------|----------------|--------------|
| SANTAN VAR PERP      | Empresas | Banca                      | España         | 4.22%        |
| AQNCN VAR 01/82      | Empresas | Electricidad               | Canadá         | 3.11%        |
| VARNO VAR 11/83      | Empresas | Energía                    | Noruega        | 2.96%        |
| WNTRDE VAR PERP NC8  | Empresas | Energía                    | Países Bajos   | 2.89%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                  | % de activos |
|----------|----------------------------|--------------|
| Empresas | Banca                      | 47.97%       |
| Empresas | Otras empresas financieras | 9.93%        |
| Empresas | Seguros                    | 9.05%        |
| Empresas | Energía                    | 8.46%        |
| Empresas | Electricidad               | 7.73%        |
| Empresas | Consumo básico             | 3.77%        |
| Empresas | Empresas financieras       | 1.97%        |

|                         |                             |        |
|-------------------------|-----------------------------|--------|
| <i>Empresas</i>         | <i>Gas natural</i>          | 1.86%  |
| <i>Empresas</i>         | <i>Industria básica</i>     | 1.30%  |
| <i>Empresas</i>         | <i>INTERMEDIACIÓN</i>       | 0.69%  |
| <i>Empresas</i>         | <i>Inmobiliario (REIT)</i>  | 0.68%  |
| <i>Empresas</i>         | <i>Transporte</i>           | 0.61%  |
| <i>Bonos del Tesoro</i> | <i>Bonos del Tesoro</i>     | 0.00%  |
| <i>Empresas</i>         | <i>Consumo discrecional</i> | -0.04% |
| <i>Forex</i>            | <i>Forex</i>                | -0.37% |
| <i>Efectivo</i>         | <i>Efectivo</i>             | 6.39%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.46% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

- ☐ Sí:
- ☐ En gas fósil ☐ En energía nuclear
- ☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

<sup>4</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 6.97%.

● **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **37.64%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.53%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
PIONEER GLOBAL HIGH YIELD BOND

Identificador de la entidad jurídica:  
5493001ZUQBYXT5ICJ95

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental: \_\_\_\_\_

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social: \_\_\_\_\_

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **14.50%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG GLOBAL HIGH YIELD**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1348

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.102 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.259 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.09 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.24 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de

más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.

- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones            | Sector     | Subsector                     | País           | % de activos |
|--------------------------------|------------|-------------------------------|----------------|--------------|
| A-F GL HI YI ESG IMPR BD Z USD | Finanzas   | Fondos de inversión colectiva | Luxemburgo     | 2.37%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector            | % de activos |
|----------|----------------------|--------------|
| Empresas | Consumo discrecional | 16.51%       |
| Empresas | Energía              | 12.07%       |
| Empresas | Comunicación         | 10.16%       |
| Empresas | Transporte           | 8.86%        |
| Empresas | Consumo básico       | 8.74%        |
| Empresas | Industria básica     | 6.15%        |
| Empresas | Empresas financieras | 4.54%        |

|                             |                                      |              |
|-----------------------------|--------------------------------------|--------------|
| <i>Empresas</i>             | <i>Bienes de equipo</i>              | <i>4.20%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

- Las actividades alineadas con la Taxonomía se expresan como porcentaje de:
- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
  - las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
  - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.23%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 9.24% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.26%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL HIGH YIELD ESG IMPROVERS BOND

Identificador de la entidad jurídica:  
21380002125EN6NGE460

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí ☒ ☐ No

|                                                                                                                                                        |                                                                                                                                                                                                                      |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:

- Exclusiones legales sobre armas controvertidas
- Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles;
- Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco; (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web [www.amundi.fr](http://www.amundi.fr))

2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares.

3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores.

4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

La gestora de inversiones ha centrado el proceso de inversión en empresas/sectores/países que han adoptado, o adoptarán, una trayectoria positiva en materia de ESG dentro de su negocio. La gestora de inversiones identificó oportunidades de inversión alineadas con el objetivo de generar alfa, centrándose en particular en la inclusión de empresas/sectores/países que serán sólidos ganadores en materia de ESG en el futuro, que tienen (o tendrán) una mejora positiva del perfil ESG, al tiempo que invierte en empresas/sectores/países que actualmente son líderes en materia de ESG.

Además, el Subfondo busca lograr una puntuación ESG en su cartera superior a la del Índice de referencia. El Subfondo se comparó con la puntuación ESG de su Índice de referencia después de excluir del Índice de referencia el 20% de los valores con la calificación ESG más baja.

#### ● *¿Cómo se comportaron los indicadores de sostenibilidad?*

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.371 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.303 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

#### ● *¿...y en comparación con periodos anteriores?*

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.29 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.29 (D).

#### ● *¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?*

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu)

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### ● *¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?*

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los

derechos humanos y la lucha contra la corrupción y el soborno.

además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco. Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en

cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

## ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del

| Mayores inversiones | Sector           | Subsector        | País           | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

-La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● **¿En qué sectores económicos se realizaron las inversiones?**

| <b>Sector</b>           | <b>Subsector</b>            | <b>% de activos</b> |
|-------------------------|-----------------------------|---------------------|
| <i>Empresas</i>         | <i>Consumo discrecional</i> | 18.44%              |
| <i>Empresas</i>         | <i>Industria básica</i>     | 11.95%              |
| <i>Bonos del Tesoro</i> | <i>Bonos del Tesoro</i>     | 9.12%               |
| <i>Empresas</i>         | <i>Consumo básico</i>       | 8.49%               |
| <i>Empresas</i>         | <i>Energía</i>              | 7.57%               |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.01% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

En energía nuclear

☐ En gas fósil

☐

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.18%.

● **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **24.23%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 7.36%.

● **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
US HIGH YIELD BOND

Identificador de la entidad jurídica:  
5493003QDKL8L48UQW51

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí ☒ ☐ No

|                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA US HIGH YIELD INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.238 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.457 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.28 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.16 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores

y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el

modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones      | Sector           | Subsector            | País           | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector            | % de activos |
|----------|----------------------|--------------|
| Empresas | Consumo discrecional | 19.39%       |
| Empresas | Energía              | 11.85%       |
| Empresas | Comunicación         | 11.03%       |
| Empresas | Consumo básico       | 10.43%       |
| Empresas | Industria básica     | 9.78%        |
| Empresas | Bienes de equipo     | 9.59%        |
| Empresas | Empresas financieras | 6.84%        |

|                                     |                                                                         |        |
|-------------------------------------|-------------------------------------------------------------------------|--------|
| <i>Empresas</i>                     | <i>Transporte</i>                                                       | 3.99%  |
| <i>Empresas</i>                     | <i>Electricidad</i>                                                     | 3.73%  |
| <i>Bonos del Tesoro</i>             | <i>Bonos del Tesoro</i>                                                 | 3.55%  |
| <i>Empresas</i>                     | <i>Tecnología</i>                                                       | 2.34%  |
| <i>Empresas</i>                     | <i>Banca</i>                                                            | 0.93%  |

| <i>Efectivo</i>                     | <i>Efectivo</i>                                                         | 1.76%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

## ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.25%.

son

inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **9.01%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.25%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EUROPEAN SUBORDINATED BOND ESG

Identificador de la entidad jurídica:  
2221006F1314ERENWD22

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

|                                                        |                                                                                                                                                        |                                                        |                                                                                                                                                                                     |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG EURO AGGREGATE CORPORATE (E)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.097 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.537 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.93 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.55 (C).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores

y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el

modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                     | Sector           | Subsector                     | País         | % de activos |
|-----------------------------------------|------------------|-------------------------------|--------------|--------------|
| AMUNDI EURO LIQUIDITY SRI - Z (C)       | Finanzas         | Fondos de inversión colectiva | Francia      | 5.47%        |
| BKO 2.9% 06/26                          | Bonos del Tesoro | Bonos del Tesoro              | Alemania     | 4.39%        |
| AMUNDI EURO LIQUIDITY-RATED SRI - Z (C) | Finanzas         | Fondos de inversión colectiva | Francia      | 2.88%        |
| URWFP VAR PERP                          | Empresas         | Inmobiliario (REIT)           | Francia      | 2.41%        |
| EDF VAR PERP REGS                       | Empresas         | Electricidad                  | Francia      | 2.22%        |

| SABSM VAR PERP                          | Empresas         | Banca                         | España       | 1.63%        |
| NWIDE VAR PERP                          | Empresas         | Banca                         | Reino Unido  | 1.62%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Empresas         | Banca                         | 54.04%       |
| Finanzas         | Fondos de inversión colectiva | 9.45%        |
| Empresas         | Seguros                       | 8.50%        |
| Empresas         | Electricidad                  | 6.74%        |
| Bonos del Tesoro | Bonos del Tesoro              | 4.39%        |
| Empresas         | Comunicación                  | 3.49%        |
| Empresas         | Otras empresas financieras    | 2.73%        |
| Empresas         | Consumo discrecional          | 2.52%        |
| Empresas         | Inmobiliario (REIT)           | 2.41%        |
| Empresas         | Gas natural                   | 1.52%        |
| Empresas         | Energía                       | 1.31%        |

|                 |                         |              |
|-----------------|-------------------------|--------------|
| <i>Empresas</i> | <i>Bienes de equipo</i> | <i>0.74%</i> |
| <i>Empresas</i> | <i>Transporte</i>       | <i>0.64%</i> |
| <i>Forex</i>    | <i>Forex</i>            | <i>0.02%</i> |
| <i>Otros</i>    | <i>Otros</i>            | <i>0.01%</i> |
| <i>Efectivo</i> | <i>Efectivo</i>         | <i>1.48%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.28% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas

-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde

- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.56%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 12.91%.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 61.90% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.78%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL AGGREGATE BOND

Identificador de la entidad jurídica:  
1BXU0IWD1154BQDOY676

**Una inversión sostenible** es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó **inversiones sostenibles con un objetivo medioambiental**:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó **inversiones sostenibles con un objetivo social**:

**Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 39.84% de inversiones sostenibles**

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

**Promovió características E/S, pero no realizó inversiones sostenibles**

**¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?**

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.942 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.488 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.92 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.51 (C).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades

locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo,

el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones             | Sector           | Subsector                     | País           | % de activos |
|---------------------------------|------------------|-------------------------------|----------------|--------------|
| BRAZIL 10% 01/29 NTN            | Bonos del Tesoro | Bonos del Tesoro              | Brasil         | 3.76%        |

## ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

### ● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 42.42%       |
| Empresas         | Banca                         | 22.00%       |
| Titulizado       | MBS de agencias               | 9.90%        |
| Finanzas         | Fondos de inversión colectiva | 5.89%        |
| Empresas         | Seguros                       | 5.36%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.06% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

-el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas  
-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde  
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.10%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 12.60%.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **31.05%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.79%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL CORPORATE BOND

Identificador de la entidad jurídica:  
XJOH2VT7DMIW80J7DZ04

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **48.28%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.356 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.007 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.42 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.03 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas**

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                  | Sector           | Subsector                     | País           | % de activos |
|--------------------------------------|------------------|-------------------------------|----------------|--------------|

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.07% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☐ Sí:

En energía nuclear

☐ En gas fósil

☐

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.12%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 8.09%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **44.23%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del **3.98%**.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardas medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardas medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los marcos de referencia son índices para cuantificar si

el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS GLOBAL CORPORATE ESG IMPROVERS BOND

Identificador de la entidad jurídica: 2138002V2U9FP8L55Z17

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 61.75% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión ICE BOFA GLOBAL LARGE CAP CORPORATE INDEX HEDGED. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1407

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
  - Exclusiones legales sobre armas controvertidas
  - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles.
  - Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web [www.amundi.fr](http://www.amundi.fr)).
2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares
3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores.
4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

La gestora de inversiones ha centrado el proceso de inversión en empresas/sectores/países que han adoptado, o adoptarán, una trayectoria positiva en materia de ESG dentro de su negocio. La gestora de inversiones identificó oportunidades de inversión alineadas con el objetivo de generar alfa, centrándose en particular en la inclusión de empresas/sectores/países que serán sólidos ganadores en materia de ESG en el futuro, que tienen (o tendrán) una mejora positiva del perfil ESG, al tiempo que invierte en empresas/sectores/países que actualmente son líderes en materia de ESG.

Además, el Subfondo busca lograr una puntuación ESG en su cartera superior a la del Índice de referencia. El Subfondo se comparó con la puntuación ESG de su Índice de referencia después de excluir del Índice de referencia el 20% de los valores con la calificación ESG más baja.

#### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.616 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.007 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

#### ● ¿...y en comparación con periodos anteriores?

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.77 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.03 (D).

#### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu)

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### ● ¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales

inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Incidenencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidenencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco. Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidenencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidenencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidenencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones**

| Mayores inversiones | Sector           | Subsector        | País           | % de activos |
|---------------------|------------------|------------------|----------------|--------------|
| US TSY 3.875% 05/43 | Bonos del Tesoro | Bonos del Tesoro | Estados Unidos | 1.85%        |
| SOCGEN 0.75%        | Empresas         | Banca            | Francia        | 1.83%        |

del producto financiero durante el periodo de referencia que es:  
**Del 01/07/2023 al 30/06/2024**

|                          |          |                            |                |       |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| <b>Sector</b>           | <b>Subsector</b>                   | <b>% de activos</b> |
|-------------------------|------------------------------------|---------------------|
| <i>Empresas</i>         | <i>Banca</i>                       | 31.72%              |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.75% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.77%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 9.87%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 55.34% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.66%.

## ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

## ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS NET  
ZERO AMBITION GLOBAL CORPORATE BOND

Identificador de la entidad jurídica:  
213800ZDJ7583Z2H5G06

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
  - Exclusiones legales sobre armas controvertidas
  - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles;
  - Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco; (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web [www.amundi.fr](http://www.amundi.fr))
2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares.
3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores.
4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

Durante el ejercicio, el producto promovió continuamente las características medioambientales con el objetivo de reducir su intensidad de carbono alineando la intensidad de su huella de carbono con la de su Índice de referencia **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX**.

#### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es 0.537 (C).
- La calificación ESG media ponderada del universo de inversión ESG es 0.172 (D).

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

El indicador de sostenibilidad utilizado es la intensidad de la huella de carbono de la cartera, que se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice de referencia. En consecuencia, los títulos con una huella ecológica relativamente baja tenían más probabilidades de ser seleccionados en la cartera que los títulos con una huella ecológica relativamente alta.

- La intensidad media ponderada de la huella de carbono de la cartera es de 82.17.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 99.19.

#### ● ***¿...y en comparación con periodos anteriores?***

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.52 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.18 (D). Al final del periodo anterior, la intensidad media ponderada de carbono de la cartera era de 120.64 y la intensidad media ponderada de carbono del índice de referencia era de 129.04.

#### ● ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### **¿Cuáles fueron las principales inversiones de este producto financiero?**

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones    | Sector   | Subsector        | País           | % de activos |
|------------------------|----------|------------------|----------------|--------------|

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● **¿En qué sectores económicos se realizaron las inversiones?**

| <b>Sector</b>   | <b>Subsector</b>                   | <b>% de activos</b> |
|-----------------|------------------------------------|---------------------|
| <i>Empresas</i> | <i>Banca</i>                       | 34.13%              |
| <i>Empresas</i> | <i>Consumo básico</i>              | 14.70%              |
| <i>Empresas</i> | <i>Comunicación</i>                | 12.11%              |
| <i>Empresas</i> | <i>Tecnología</i>                  | 7.10%               |
| <i>Empresas</i> | <i>Electricidad</i>                | 6.47%               |
| <i>Empresas</i> | <i>Bienes de equipo</i>            | 5.63%               |

| <i>Empresas</i> | <i>INTERMEDIACIÓN</i>              | 0.56%               |
| <i>Empresas</i> | <i>Otros sectores industriales</i> | 0.36%               |

|                  |                  |        |
|------------------|------------------|--------|
| Bonos del Tesoro | Bonos del Tesoro | 0.00%  |
| Forex            | Forex            | -0.12% |
| Efectivo         | Efectivo         | 3.11%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.63% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.04% y la cuota de inversión en actividades habilitadoras era del 0.73%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 6.65%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 61.00% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.58%.

● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice Solactive Paris Aligned Global Corporate USD Hedged<sup>11</sup>. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 82.17.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 99.19.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

- La calificación ESG media ponderada de la cartera es 0.537 (C).
- La calificación ESG media ponderada del universo de inversión ESG es 0.172 (D).
- La intensidad media ponderada de la huella de carbono de la cartera es de 82.17.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 99.19.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice Solactive Paris Aligned Global Corporate USD Hedged<sup>11</sup>. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 82.17.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 99.19.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS GLOBAL HIGH YIELD BOND

Identificador de la entidad jurídica: 222100AIHPWCQOF6UQ48

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 15.45% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión ICE BOFA GLOBAL HIGH YIELD INDEX HEDGED. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1428

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.090 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.303 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.10 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.29 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y

factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a

los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento

sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones            | Sector     | Subsector                     | País           | % de activos |
|--------------------------------|------------|-------------------------------|----------------|--------------|
| A-F GL HI YI ESG IMPR BD Z USD | Finanzas   | Fondos de inversión colectiva | Luxemburgo     | 3.78%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

#### ● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector            | % de activos |
|----------|----------------------|--------------|
| Empresas | Consumo discrecional | 17.70%       |
| Empresas | Energía              | 11.60%       |
| Empresas | Transporte           | 10.62%       |
| Empresas | Consumo básico       | 10.09%       |
| Empresas | Comunicación         | 9.68%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la**

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- **los gastos de explotación (OpEx)** que reflejan las actividades ecológicas de las empresas participadas

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.23%.

 son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **8.58%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.87%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL SHORT TERM BOND

Identificador de la entidad jurídica:  
213800N25O8X711K7M94

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 31.43% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **10% ICE BOFA GLOBAL HIGH YIELD INDEX + 80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.853 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.487 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Este es el primer informe periódico SFDR elaborado para este subfondo.

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones    | Sector           | Subsector            | País           | % de activos |
|------------------------|------------------|----------------------|----------------|--------------|
| US TSY 1.125% 02/28    | Bonos del Tesoro | Bonos del Tesoro     | Estados Unidos | 3.88%        |
| NZGB 0.5% 05/26 0526   | Bonos del Tesoro | Bonos del Tesoro     | Nueva Zelanda  | 3.85%        |
| US TSY 0.625% 11/27    | Bonos del Tesoro | Bonos del Tesoro     | Estados Unidos | 3.83%        |
| SPAIN 2.75% 10/24      | Bonos del Tesoro | Bonos del Tesoro     | España         | 2.84%        |
| BTPS 1.45% 11/24       | Bonos del Tesoro | Bonos del Tesoro     | Italia         | 2.78%        |
| BRAZIL 01/07/2024 LTN  | Bonos del Tesoro | Bonos del Tesoro     | Brasil         | 2.51%        |
| JGB 0.1% 11/25 454     | Bonos del Tesoro | Bonos del Tesoro     | Japón          | 2.16%        |
| JGB 0.005% 07/24 438   | Bonos del Tesoro | Bonos del Tesoro     | Japón          | 1.89%        |
| BNS 5.35% 12/26        | Empresas         | Banca                | Canadá         | 1.75%        |
| JGB 2.2% 9/26          | Bonos del Tesoro | Bonos del Tesoro     | Japón          | 1.70%        |
| LBBW 1.5% 02/25        | Empresas         | Banca                | Alemania       | 1.62%        |
| JGB 0.005% 03/26 147   | Bonos del Tesoro | Bonos del Tesoro     | Japón          | 1.62%        |
| NZLGFA 1.5% 04/26      | Sector Público   | Autoridades locales  | Nueva Zelanda  | 1.50%        |
| HYNMTR 5.3% 01/29 REGS | Empresas         | Consumo discrecional | Estados Unidos | 1.34%        |
| NAB 4.787% 01/29       | Empresas         | Banca                | Australia      | 1.33%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

-La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector            | % de activos |
|------------------|----------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro     | 31.32%       |
| Empresas         | Banca                | 23.44%       |
| Empresas         | Seguros              | 7.56%        |
| Sector público   | Autoridades locales  | 6.04%        |
| Empresas         | Consumo discrecional | 5.55%        |
| Empresas         | Electricidad         | 5.29%        |
| Sector público   | Deuda pública        | 3.18%        |

|                       |                             |       |
|-----------------------|-----------------------------|-------|
| <i>Sector público</i> | <i>Agencias</i>             | 2.45% |
| <i>Titulizado</i>     | <i>Activos hipotecarios</i> | 2.20% |
| <i>Empresas</i>       | <i>INTERMEDIACIÓN</i>       | 2.04% |
| <i>Empresas</i>       | <i>Energía</i>              | 1.99% |
| <i>Sector público</i> | <i>Supranacional</i>        | 1.17% |
| <i>Empresas</i>       | <i>Gas natural</i>          | 1.03% |
| <i>Empresas</i>       | <i>Comunicación</i>         | 1.03% |

| <i>Efectivo</i>       | <i>Efectivo</i>             | 3.78% |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades habilitadoras permiten directamente que

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.23% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

☐ Sí:

☐ En gas fósil ☐ En energía nuclear

☒ No

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.07% y la cuota de inversión en actividades habilitadoras era del 0.11%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **25.46%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del **5.74%**.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

#### Información adicional (no auditada)

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS OPTIMAL YIELD

Identificador de la entidad jurídica: 549300SEXJO4VZFPO521

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S)

y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **32.75%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.232 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.09 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y

factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad

y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones            | Sector         | Subsector                     | País         | % de activos |
|--------------------------------|----------------|-------------------------------|--------------|--------------|
| AIF - EMG MKT SOVEREIGN BD - H | Finanzas       | Fondos de inversión colectiva | Luxemburgo   | 6.04%        |
| UPCB 3.875% 06/29              | Empresas       | Comunicación                  | Países Bajos | 2.42%        |
| NRW 1.75% 07/68                | Sector público | Autoridades locales           | Alemania     | 1.99%        |
| EDF VAR PERP(5%)               | Empresas       | Electricidad                  | Francia      | 1.93%        |
| SHAEFF 3.75% 09/26 REGS        | Empresas       | Consumo discrecional          | Alemania     | 1.56%        |
| OTPHB VAR 07/29                | Empresas       | Banca                         | Hungría      | 1.18%        |
| TEVA 3.75% 05/27               | Empresas       | Consumo básico                | Países Bajos | 1.18%        |
| VERISR 3.25% 02/27 REGS        | Empresas       | Consumo discrecional          | Suecia       | 1.17%        |
| DIINFL FRN 05/27               | Empresas       | Comunicación                  |              | 1.14%        |
| EUROB VAR 05/27 EMTN           | Empresas       | Banca                         | Grecia       | 1.10%        |
| LAMON VAR PERP(5.05%)          | Empresas       | Seguros                       | Francia      | 1.08%        |
| ZIGGO 3.375% 02/30 REGS        | Empresas       | Comunicación                  | Países Bajos | 1.03%        |
| ALVGR 3.875% PERP              | Empresas       | Seguros                       | Alemania     | 1.00%        |
| ALTICE 3% 01/28 REGS           | Empresas       | Comunicación                  | Luxemburgo   | 0.97%        |
| LOXAM 3.75% 07/26              | Empresas       | Bienes de equipo              | Francia      | 0.94%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                     | % de activos |
|----------|-------------------------------|--------------|
| Empresas | Comunicación                  | 20.69%       |
| Empresas | Banca                         | 15.13%       |
| Empresas | Consumo discrecional          | 12.85%       |
| Empresas | Consumo básico                | 7.38%        |
| Finanzas | Fondos de inversión colectiva | 6.04%        |
| Empresas | Electricidad                  | 5.53%        |
| Empresas | Energía                       | 5.48%        |

|                         |                                                      |       |
|-------------------------|------------------------------------------------------|-------|
| <i>Empresas</i>         | <i>Seguros</i>                                       | 5.15% |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.23% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.11% y la cuota de inversión en actividades habilitadoras era del 0.09%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 2.62%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **25.94%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.59%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
OPTIMAL YIELD SHORT TERM

Identificador de la entidad jurídica:  
549300NI6I5JE79M9X21

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 31.48% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.221 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.17 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si

desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones            | Sector         | Subsector                     | País           | % de activos |
|--------------------------------|----------------|-------------------------------|----------------|--------------|
| AIF - EMG MKT SOVEREIGN BD - S | Finanzas       | Fondos de inversión colectiva | Luxemburgo     | 6.78%        |
| BERY 1% 01/25 REGS             | Empresas       | Bienes de equipo              | Estados Unidos | 2.10%        |
| SHAEFF 3.75% 09/26 REGS        | Empresas       | Consumo discrecional          | Alemania       | 1.91%        |
| UPCB 3.875% 06/29              | Empresas       | Comunicación                  | Países Bajos   | 1.87%        |
| AT&T VAR PERP B                | Empresas       | Comunicación                  | Estados Unidos | 1.75%        |
| EU 1.25% 02/43 NGEU            | Sector público | Supranacional                 |                | 1.56%        |
| ZFFNGR 3% 09/25 EMTN           | Empresas       | Consumo discrecional          | Alemania       | 1.24%        |
| AES 4.375% 05/30 REGS          | Empresas       | Electricidad                  | Panamá         | 1.21%        |
| THYELE 6.625% 07/28 REGS       | Empresas       | Bienes de equipo              | Alemania       | 1.21%        |
| AZMIM 1.625% 12/24             | Empresas       | INTERMEDIACIÓN                | Italia         | 1.18%        |
| REPSM VAR PERP                 | Empresas       | Energía                       | Países Bajos   | 1.17%        |
| ISPVIT 2.375% 12/30            | Empresas       | Seguros                       | Italia         | 1.16%        |
| VMED 4.5% 07/31 REGS           | Empresas       | Comunicación                  | Reino Unido    | 1.16%        |
| ADRBID 3.125% 02/26 REGS       | Empresas       | Comunicación                  | Países Bajos   | 1.14%        |
| ATOSTR 2% 01/30                | Empresas       | Transporte                    | Italia         | 1.12%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector            | % de activos |
|----------|----------------------|--------------|
| Empresas | Comunicación         | 15.94%       |
| Empresas | Banca                | 12.82%       |
| Empresas | Bienes de equipo     | 10.56%       |
| Empresas | Consumo discrecional | 10.38%       |
| Empresas | Energía              | 8.05%        |
| Empresas | Consumo básico       | 7.04%        |

|                       |                                                      |              |
|-----------------------|------------------------------------------------------|--------------|

| Otros            | Otros            | -0.13% |
| Forex            | Forex            | -0.24% |
| Efectivo         | Efectivo         | 4.70%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.11% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.14% y la cuota de inversión en actividades habilitadoras era del 0.24%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 4.86%.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 22.25% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.12%.

#### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
STRATEGIC INCOME

Identificador de la entidad jurídica:  
5493004ZTK6D21CGCO05

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí ☒ ☐ No

|                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión BLOOMBERG US UNIVERSAL. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.461 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.356 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.53 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.38 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores

y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y de-

rechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones | Sector           | Subsector        | País           | % de activos |
|---------------------|------------------|------------------|----------------|--------------|
| TBIP USA 02/07/24   | Bonos del Tesoro | Bonos del Tesoro | Estados Unidos | 4.91%        |
| IBRD 0.75% 03/25    | Sector público   | Supranacional    |                | 2.86%        |
| FNCL 2,5 7/24       | Titulizado       | MBS de agencias  | Estados Unidos | 2.00%        |
| US TSY 2.25% 02/52  | Bonos del Tesoro | Bonos del Tesoro | Estados Unidos | 1.95%        |
| FNCL 2 7/24         | Titulizado       | MBS de agencias  | Estados Unidos | 1.62%        |
| FNCL 3,5 7/24       | Titulizado       | MBS de agencias  | Estados Unidos | 1.57%        |
| US TSY 3% 02/48     | Bonos del Tesoro | Bonos del Tesoro | Estados Unidos | 1.49%        |
| TBIP USA 16/07/24   | Bonos del Tesoro | Bonos del Tesoro | Estados Unidos | 1.47%        |

| FR SD8433           | Titulizado       | MBS de agencias  | Estados Unidos | 1.42%        |
| IBRD 2.5% 7/25      | Sector público   | Supranacional    | 1.21%          |              |
| LLOYDS VAR 06/30    | Empresas         | Banca            | Reino Unido    | 0.84%        |
| FN FS6691           | Titulizado       | MBS de agencias  | Estados Unidos | 0.82%        |
| FN MA4624           | Titulizado       | MBS de agencias  | Estados Unidos | 0.73%        |
| G2SF 3.5 7/24       | Titulizado       | MBS de agencias  | Estados Unidos | 0.67%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector            | % de activos |
|------------------|----------------------|--------------|
| Titulizado       | MBS de agencias      | 25.69%       |
| Empresas         | Banca                | 13.96%       |
| Bonos del Tesoro | Bonos del Tesoro     | 13.78%       |
| Otros            | Otros                | 7.20%        |
| Titulizado       | CMBS_NO_AGENCIA      | 5.59%        |
| Sector público   | Supranacional        | 5.38%        |
| Empresas         | Energía              | 4.88%        |
| Empresas         | Consumo discrecional | 4.72%        |
| Titulizado       | ABS                  | 3.09%        |
| Finanzas         | Seguros              | 3.01%        |
| Empresas         | Empresas financieras | 2.41%        |

|                             |                                    |              |
|-----------------------------|------------------------------------|--------------|
| <i>Empresas</i>             | <i>Industria básica</i>            | <i>2.36%</i> |
| <i>Empresas</i>             | <i>Comunicación</i>                | <i>1.99%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades **de transición** son

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.38%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 16.76% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

en virtud del  
Reglamento (UE)  
2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.62%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS NET  
ZERO AMBITION US CORPORATE BOND

Identificador de la entidad jurídica:  
213800VWP1P2KAFPEU55

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 36.28% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

Durante el ejercicio, el producto promovió continuamente las características medioambientales con el objetivo de reducir su intensidad de carbono alineando la intensidad de su huella de carbono con la de su Índice de referencia MSCI USD IG CLIMATE PARIS ALIGNED CORP BOND.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.188 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.097 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

El indicador de sostenibilidad utilizado es la intensidad de la huella de carbono de la cartera, que se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice de referencia. En consecuencia, los títulos con una huella ecológica relativamente baja tenían más probabilidades de ser seleccionados en la cartera que los títulos con una huella ecológica relativamente alta.

- La intensidad media ponderada de la huella de carbono de la cartera es de **42.30**.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de **77.40**.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de **0.29 (D)** y la calificación ESG media ponderada del universo de inversión ESG era de **-0.07 (D)**. Al cierre del periodo anterior, la intensidad media ponderada de carbono de la cartera era de **67.04** y el índice de referencia de intensidad media ponderada de carbono era de **90.46**.

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política

de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

**¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es

influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones       | Sector           | Subsector            | País           | % de activos |
|---------------------------|------------------|----------------------|----------------|--------------|
| TBIP USA 16/07/24         | Bonos del Tesoro | Bonos del Tesoro     | Estados Unidos | 3.81%        |
| CCDJ 5,7% 03/28 144A      | Empresas         | Banca                | Canadá         | 1.96%        |
| UTX 3.125% 05/27          | Empresas         | Bienes de equipo     | Estados Unidos | 1.86%        |
| LLOYDS VAR 03/28          | Empresas         | Banca                | Reino Unido    | 1.85%        |
| WFC VAR 07/33 MTN         | Empresas         | Banca                | Estados Unidos | 1.81%        |
| TMUS 5.65% 01/53          | Empresas         | Comunicación         | Estados Unidos | 1.73%        |

## ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

### ● ¿Cuál era la asignación de activos?

### ● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector            | % de activos |
|----------|----------------------|--------------|
| Empresas | Banca                | 33.44%       |
| Empresas | Bienes de equipo     | 10.97%       |
| Empresas | Seguros              | 10.22%       |
| Empresas | Consumo básico       | 9.39%        |
| Empresas | Consumo discrecional | 6.89%        |

|                  |                      |       |
|------------------|----------------------|-------|
| Bonos del Tesoro | Bonos del Tesoro     | 6.42% |
| Empresas         | Tecnología           | 5.53% |
| Empresas         | INTERMEDIACIÓN       | 3.85% |
| Empresas         | Comunicación         | 3.06% |
| Empresas         | Energía              | 2.09% |
| Empresas         | Empresas financieras | 1.79% |
| Empresas         | Inmobiliario (REIT)  | 1.79% |
| Empresas         | Transporte           | 1.64% |
| Empresas         | Industria básica     | 0.80% |
| Empresas         | Electricidad         | 0.32% |
| Efectivo         | Efectivo             | 1.60% |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:  
-el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas  
-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde  
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.10%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **29.70%** al cierre del periodo.

son inversiones sostenibles con

un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.57%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice MSCI USD IG Climate Paris Aligned Corp Bond. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de **42.30**.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de **77.40**.

### ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

● ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.188 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.097 (D)**.

- La intensidad media ponderada de la huella de carbono de la cartera es de **42.30**.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de **77.40**.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

El objetivo de inversión sostenible se logra alineando los objetivos de reducción de la huella de carbono del fondo con el Índice MSCI USD IG Climate Paris Aligned Corp Bond. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de **42.30**.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de **77.40**.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales. El índice utilizado es un "índice de referencia alineado con el Acuerdo de París" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
US BOND

Identificador de la entidad jurídica:  
5493005LBJJ6BWRENA39

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí ☒ ☐ No

|                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG US AGGREGATE**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.511 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.464 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.60 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.49 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores

y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y de-

rechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones       | Sector           | Subsector        | País           | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector            | % de activos |
|------------------|----------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro     | 29.44%       |
| Titulizado       | MBS de agencias      | 27.71%       |
| Empresas         | Banca                | 13.71%       |
| Titulizado       | ABS                  | 4.50%        |
| Otros            | Otros                | 3.84%        |
| Empresas         | Consumo discrecional | 3.60%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.02%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.14%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **13.60%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.30%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

● **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si

el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

**Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852**

**Nombre del producto:** AMUNDI FUNDS US CORPORATE BOND

**Identificador de la entidad jurídica:** 222100LE431F865A4S54

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

**¿Tenía este producto financiero un objetivo de inversión sostenible?**

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental: \_\_\_\_\_

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social: \_\_\_\_\_

Promovió características Medioambientales/Sociales (E/S)

y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **30.82%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

**¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?**

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG US CORPORATE INVESTMENT GRADE**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
  - Exclusiones legales sobre armas controvertidas
  - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles.
  - Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web [www.amundi.fr](http://www.amundi.fr)).
2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares.
3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores.
4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

#### ● *¿Cómo se comportaron los indicadores de sostenibilidad?*

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.122 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.307 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan

según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.17 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.24 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos

y la lucha contra la corrupción y el soborno.

de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

## ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones      | Sector           | Subsector        | País           | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

¿En qué sectores económicos se realizaron las inversiones?

| Sector | Subsector | % de activos |
|--------|-----------|--------------|
|--------|-----------|--------------|

|                         |                                   |        |
|-------------------------|-----------------------------------|--------|
| <i>Empresas</i>         | <i>Banca</i>                      | 32.68% |
| <i>Empresas</i>         | <i>Seguros</i>                    | 10.58% |
| <i>Empresas</i>         | <i>Consumo discrecional</i>       | 7.48%  |
| <i>Empresas</i>         | <i>Electricidad</i>               | 7.03%  |
| <i>Empresas</i>         | <i>Consumo básico</i>             | 5.61%  |
| <i>Empresas</i>         | <i>Energía</i>                    | 5.23%  |
| <i>Bonos del Tesoro</i> | <i>Bonos del Tesoro</i>           | 4.78%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.07%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.30%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 27.04% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.79%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

**Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852**

**Nombre del producto:** AMUNDI FUNDS US SHORT TERM BOND

**Identificador de la entidad jurídica:** 549300QBCEQZSOFGDW23

**Una inversión sostenible** es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

**¿Tenía este producto financiero un objetivo de inversión sostenible?**

Sí

No

**Realizó inversiones sostenibles con un objetivo medioambiental:** \_\_\_\_\_

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

**Realizó inversiones sostenibles con un objetivo social:** \_\_\_\_\_

**Promovió características Medioambientales/Sociales (E/S)** y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **18.24%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

**Promovió características E/S, pero no realizó inversiones sostenibles**

**¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?**

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA 0-1 YEAR US CORPORATE INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.386 (D)**
- La calificación ESG media ponderada del universo de inversión ESG es **-0.215 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.29 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los

factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.

- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones             | Sector           | Subsector        | País           | % de activos |
|---------------------------------|------------------|------------------|----------------|--------------|
| IBRD FRN 08/24 GDIF             | Sector público   | Supranacional    |                | 3.91%        |
| TBIP USA 02/07/24               | Bonos del Tesoro | Bonos del Tesoro | Estados Unidos | 3.69%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

#### ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector            | % de activos |
|------------------|----------------------|--------------|
| Empresas         | Banca                | 24.60%       |
| Otros            | Otros                | 12.85%       |
| Titulizado       | ABS                  | 9.29%        |
| Bonos del Tesoro | Bonos del Tesoro     | 7.21%        |
| Empresas         | Consumo discrecional | 5.32%        |
| Sector público   | Supranacional        | 4.90%        |
| Empresas         | Seguros              | 4.69%        |

|                   |                                |       |
|-------------------|--------------------------------|-------|

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐ Sí:

☐ En gas fósil☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.70%.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **15.46%** al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.78%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS ASIA INCOME ESG BOND

Identificador de la entidad jurídica: 213800UVZ2BRX4N1ZK70

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 36.66% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

X

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **90% JP MORGAN ASIAN CREDIT INDEX (JACI) + 10% MARKIT IBOXX ASIAN LOCAL BOND INDEX (ALBI) (EX HSBC HSLI)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

En junio de 2024, el fondo informó sobre 4 indicadores de impacto para evaluar la calidad ESG de la cartera. Para esos cuatro indicadores representativos que abarcan los ámbitos

1519

medioambiental (huella de carbono), social (gestión de la cadena de suministro, implicación de la comunidad y derechos humanos) y de gobierno corporativo (estrategia corporativa ESG), la cartera superó al universo de inversión con una cobertura de calificación superior al 90% de los valores calificables mantenidos.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.319 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.280 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina

datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Desde el 01/07/2024 hasta el 30/06/2024**

| Mayores inversiones      | Sector           | Subsector                  | % de activos                    | País  |

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.05% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades **de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Este es el primer informe periódico del SFDR elaborado para este subfondo.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **27.10%** al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.51%.

#### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de cartera. También puede incluir valores sin calificación ESG para los que no se dispone de los datos necesarios con vistas a cuantificar el cumplimiento de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

**Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852**

**Nombre del producto:** AMUNDI FUNDS  
EMERGING MARKETS BLENDED BOND

**Identificador de la entidad jurídica:**  
222100ABBJBM1BE8222

**Una inversión sostenible** es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La **Taxonomía de la UE** es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de **actividades económicas sostenibles desde el punto de vista medioambiental**. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

### ¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó **inversiones sostenibles con un objetivo medioambiental:** \_\_\_\_\_

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó **inversiones sostenibles con un objetivo social:** \_\_\_\_\_

**Promovió características Medioambientales/Sociales (E/S) y,** aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de **16.62%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

**Promovió características E/S, pero no realizó inversiones sostenibles**

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.110 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.153 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.03 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.16 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía,

biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.

- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                      | Sector           | Subsector                     | País         | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

#### ● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Sector público   | Deuda pública                 | 45.16%       |
| Bonos del Tesoro | Bonos del Tesoro              | 10.94%       |
| Finanzas         | Fondos de inversión colectiva | 9.64%        |
| Empresas         | Energía                       | 9.48%        |
| Empresas         | Banca                         | 7.22%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.02% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.86%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **14.86%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del **1.74%**.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***  
Este producto no tiene un Índice de referencia ESG.
- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***  
Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS EMERGING MARKETS BOND

Identificador de la entidad jurídica: 549300KZW6KQ7WLJO866

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 13.47% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **50% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% JP MORGAN CEMBI BROAD DIVERSIFIED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.018 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.155 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.11 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.17 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los

factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

**¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones         | Sector           | Subsector                     | País           | % de activos |
|-----------------------------|------------------|-------------------------------|----------------|--------------|
| ARGENT FRN 07/30            | Sector público   | Deuda pública                 | Argentina      | 1.76%        |
| KSA 3.75% 01/55 REGS        | Sector público   | Deuda pública                 | Arabia Saudí   | 1.46%        |
| TII 1.75% 01/34             | Bonos del Tesoro | Bonos del Tesoro              | Estados Unidos | 1.27%        |
| AMU PLAN-EM GR ONE-SEN USDC | Finanzas         | Fondos de inversión colectiva | Luxemburgo     | 1.12%        |
| SAFTRA 8.25% 02/28 REGS     | Empresas         | Transporte                    | Sudáfrica      | 1.09%        |
| PEMEX 6.75% 09/47           | Empresas         | Energía                       | México         | 1.05%        |
| JCI 5.5% 04/29              | Empresas         | Bienes de equipo              | Irlanda        | 1.04%        |
| TLWLN 10.25% 05/26 REGS     | Empresas         | Energía                       | Reino Unido    | 0.98%        |
| DPWDU 5.5% 09/33            | Empresas         | Consumo discrecional          | Islas Caimán   | 0.95%        |

| POLAND 4.875% 10/33         | Sector público   | Deuda pública                 | Polonia        | 0.78%        |
| PARGUY 5.4% 03/50 REGS      | Sector público   | Deuda pública                 | Paraguay       | 0.77%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● **¿En qué sectores económicos se realizaron las inversiones?**

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Sector público   | Deuda pública                 | 37.03%       |
| Empresas         | Energía                       | 11.41%       |
| Empresas         | Industria básica              | 6.97%        |
| Finanzas         | Fondos de inversión colectiva | 5.85%        |
| Empresas         | Banca                         | 5.13%        |
| Empresas         | Electricidad                  | 4.50%        |
| Bonos del Tesoro | Bonos del Tesoro              | 3.58%        |
| Empresas         | Otras empresas financieras    | 3.02%        |

|                       |                                    |              |
|-----------------------|------------------------------------|--------------|
| <i>Empresas</i>       | <i>Transporte</i>                  | <i>3.00%</i> |
| <i>Empresas</i>       | <i>Comunicación</i>                | <i>2.96%</i> |
| <i>Empresas</i>       | <i>Bienes de equipo</i>            | <i>2.88%</i> |

| <i>Otros</i>          | <i>Otros</i>                       | <i>0.06%</i> |

|              |                                  |       |
|--------------|----------------------------------|-------|
| Empresas     | Gas natural                      | 0.06% |
| Materiales   | Productos químicos               | 0.03% |
| Energía      | Petróleo, gas y combustibles     | 0.02% |
| Inmobiliario | Gestión y promoción inmobiliaria | 0.00% |
| Materiales   | Metales y minería                | 0.00% |
| Energía      | Equipos y servicios de energía   | 0.00% |
| Titulizado   | Activos hipotecarios             | 0.00% |
| Efectivo     | Efectivo                         | 0.63% |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.01% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐ Sí:

☐ En gas fósil

☒ No

☐ En energía nuclear

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

#### ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.03%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.36%.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 12.39% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades

económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.06%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EMERGING MARKETS CORPORATE BOND

Identificador de la entidad jurídica:  
529900YJOJ3E3FRQQ325

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐

Sí

☒ ☐

No

☐ Realizó inversiones sostenibles con un objetivo medioambiental:

☐ en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☐ en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☐ Realizó inversiones sostenibles con un objetivo social:

☒ Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 35.38% de inversiones sostenibles

☐ con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☒ con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☐ con un objetivo social

☐ Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión JP MORGAN CEMBI BROAD DIVERSIFIED. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.003 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.157 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.11 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.17 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina

datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

**¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 1 de julio de 2023 al 30 de junio de 2024**

| Mayores inversiones                 | Sector   | Subsector                     | País                            | % de activos |
|-------------------------------------|----------|-------------------------------|---------------------------------|--------------|
| A-F EMERG MARKETS GREEN BD - SE USD | Finanzas | Fondos de inversión colectiva | Luxemburgo                      | 2.96%        |
| AMU PLAN-EM GR ONE-SEN USDC         | Finanzas | Fondos de inversión colectiva | Luxemburgo                      | 1.90%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                     | % de activos |
|----------|-------------------------------|--------------|
| Empresas | Banca                         | 20.51%       |
| Empresas | Energía                       | 15.96%       |
| Empresas | Consumo discrecional          | 9.45%        |
| Empresas | Industria básica              | 8.73%        |
| Empresas | Electricidad                  | 7.96%        |
| Finanzas | Fondos de inversión colectiva | 6.43%        |
| Empresas | Comunicación                  | 6.37%        |

|                       |                                    |              |
|-----------------------|------------------------------------|--------------|
| <i>Empresas</i>       | <i>Consumo básico</i>              | <i>4.56%</i> |
| <i>Empresas</i>       | <i>Bienes de equipo</i>            | <i>3.90%</i> |
| <i>Empresas</i>       | <i>Otras empresas financieras</i>  | <i>3.53%</i> |
| <i>Sector público</i> | <i>Deuda pública</i>               | <i>2.50%</i> |
| <i>Empresas</i>       | <i>Transporte</i>                  | <i>2.17%</i> |
| <i>Empresas</i>       | <i>Empresas financieras</i>        | <i>1.94%</i> |
| <i>Empresas</i>       | <i>Tecnología</i>                  | <i>1.28%</i> |
| <i>Empresas</i>       | <i>Inmobiliario (REIT)</i>         | <i>0.66%</i> |
| <i>Sector público</i> | <i>Supranacional</i>               | <i>0.63%</i> |
| <i>Empresas</i>       | <i>Gas natural</i>                 | <i>0.52%</i> |
| <i>Empresas</i>       | <i>Otros sectores industriales</i> | <i>0.47%</i> |
| <i>Titulizado</i>     | <i>Activos hipotecarios</i>        | <i>0.38%</i> |
| <i>Sector público</i> | <i>Agencias</i>                    | <i>0.34%</i> |
| <i>Empresas</i>       | <i>Otros suministros públicos</i>  | <i>0.32%</i> |
| <i>Sector público</i> | <i>Autoridades locales</i>         | <i>0.31%</i> |
| <i>Empresas</i>       | <i>Seguros</i>                     | <i>0.24%</i> |
| <i>Otros</i>          | <i>Otros</i>                       | <i>0.08%</i> |

|                  |                              |        |
|------------------|------------------------------|--------|
| Energía          | Petróleo, gas y combustibles | 0.02%  |
| Bonos del Tesoro | Bonos del Tesoro             | 0.00%  |
| Forex            | Forex                        | -0.36% |
| Efectivo         | Efectivo                     | 0.39%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

Las actividades **habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

Las actividades de **transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.04% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 2.67%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 29.25% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.09%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

**Los índices de referencia** son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EMERGING MARKETS GREEN BOND

Identificador de la entidad jurídica:  
2138001AOC3QUTY9SA42

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **71.39%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **JP MORGAN GREEN BOND EM CREDIT DIVERSIFIED COMPOSITE HEDGED INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

El subfondo mantuvo la parte comprometida de su asignación invertida en el uso de bonos verdes.

El objetivo de los bonos verdes es financiar proyectos que generen un impacto positivo y cuantificable en el medio ambiente. El indicador clave que mide el impacto de los bonos verdes es "Toneladas evitadas de emisiones de CO<sub>2</sub> por millón de EUR invertidos en un año". Más allá del análisis financiero cuantitativo y cualitativo de los bonos susceptibles de componer la cartera, el proceso de selección incluye una evaluación de la estrategia ESG a nivel del emisor y una evaluación de los bonos verdes tras varios puntos de análisis:

1. Amundi ha desarrollado un sistema propio de puntuación ESG basado en una escala de siete letras, que van de la A a la G, donde la A es la mejor calificación y la G, la peor. Cualquier emisor con una calificación G queda excluido de todas las carteras de gestión activa de Amundi. Llevamos a cabo la verificación de la calificación ESG del emisor y comprobamos la conformidad de la calificación con los criterios del fondo correspondiente. Como se ha indicado anteriormente, los emisores con una calificación G en la escala de calificación ESG de Amundi no son aptos para la inversión. Si hay puntos débiles, el equipo de Análisis ESG buscará con más detalle cualquier controversia sobre el pilar correspondiente (E, S y G).
2. Evaluación de los bonos verdes en términos de: (i) análisis del proyecto, mediante el análisis de la ubicación geográfica de los activos, la actuación sobre los activos, la evaluación de cualquier impacto adicional del proyecto ecológico en el medio ambiente, la biodiversidad, las comunidades locales u otros aspectos sociales (no causar un perjuicio significativo), la alineación con las normas del sector (por ejemplo, la alineación con los Principios de Bonos Verdes de la Asociación Internacional de Mercados de Capitales, la Iniciativa de Bonos Climáticos, la Taxonomía de la UE). (ii) análisis del emisor a nivel de estrategia global ESG y de controversias, (iii) justificación de la financiación verde (tipo de proyectos financiados, asignación de activos verdes, tipo de instrumentos que financian proyectos verdes) y (iv) transparencia (informe sobre bonos verdes, existencia de opiniones de segundas partes).
3. Supervisión continua (inversión a posteriori), que incluye la revisión periódica de la asignación y el informe de impacto del bono verde, las controversias en las que está involucrado el emisor y su estrategia medioambiental.

Por último, todos los Bonos Verdes seleccionados deberán cumplir los criterios y directrices de los Principios de los Bonos Verdes publicados por la Asociación Internacional de Mercados de Capitales. Visite la Política de Inversión Responsable de Amundi para obtener más información al respecto.

#### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.130 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.006 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

#### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.12 (C) y la calificación ESG media ponderada del universo de inversión ESG era de -0.17 (D). Al final de En el período anterior, la cartera poseía el 85,42% de los bonos verdes.

#### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### ● **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

## ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero

| Mayores inversiones               | Sector   | Subsector                     | País                            | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| <b>Sector</b>           | <b>Subsector</b>                     | <b>% de activos</b> |
|-------------------------|--------------------------------------|---------------------|
| <i>Empresas</i>         | <i>Electricidad</i>                  | 26.58%              |
| <i>Empresas</i>         | <i>Banca</i>                         | 21.14%              |
| <i>Sector público</i>   | <i>Deuda pública</i>                 | 7.07%               |
| <i>Empresas</i>         | <i>Industria básica</i>              | 6.70%               |
| <i>Empresas</i>         | <i>Consumo discrecional</i>          | 5.11%               |
| <i>Empresas</i>         | <i>Empresas financieras</i>          | 4.77%               |
| <i>Empresas</i>         | <i>Inmobiliario (REIT)</i>           | 4.70%               |
| <i>Finanzas</i>         | <i>Fondos de inversión colectiva</i> | 3.98%               |
| <i>Empresas</i>         | <i>Otras empresas financieras</i>    | 3.51%               |
| <i>Empresas</i>         | <i>Transporte</i>                    | 2.71%               |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.25% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☐ Sí:

☐ En gas fósil☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista

<sup>4</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 37.21%.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **71.13%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 0.00%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EMERGING MARKETS CORPORATE  
HIGH YIELD BOND

Identificador de la entidad jurídica:  
5493006QGDCTMW9Y1N50

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ ☐

Sí

☒ ☐ ☐

No

☐

Realizó inversiones sostenibles con un objetivo medioambiental:

☐

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☐

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☒

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **22.64%** de inversiones sostenibles

☐

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☒

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

☐

con un objetivo social

☐

Realizó inversiones sostenibles con un objetivo social:

☐

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo. El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.038 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.133 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.04 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.18 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía,

biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones

a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.

- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones              | Sector         | Subsector                     | País                            | % de activos |
|----------------------------------|----------------|-------------------------------|---------------------------------|--------------|
| ECOPET 8.875% 01/33              | Empresas       | Energía                       | Colombia                        | 2.14%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero. **N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles. La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector            | % de activos |
|----------|----------------------|--------------|
| Empresas | Banca                | 17.89%       |
| Empresas | Energía              | 13.94%       |
| Empresas | Consumo discrecional | 12.87%       |
| Empresas | Industria básica     | 8.19%        |
| Empresas | Consumo básico       | 7.94%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

- **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.45%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 19.76% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud de la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.87%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EMERGING MARKETS HARD CURRENCY  
BOND

Identificador de la entidad jurídica:  
549300CF4H3SXCNRP626

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 15.82% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales procurando lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE HEDGED. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1580

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **-0.119 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.153 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.07 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.16 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu)

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                      | Sector           | Subsector                     | País                            | % de activos |
|------------------------------------------|------------------|-------------------------------|---------------------------------|--------------|
| A-F EMERGING MKT CORP BD - Z- USD        | Finanzas         | Fondos de inversión colectiva | Luxemburgo                      | 4.45%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

-La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Sector público   | Deuda pública                 | 62.91%       |
| Empresas         | Energía                       | 9.29%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.02% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.  
El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?**

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.60%.

● **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **14.79%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.01%.

● **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

● **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

● **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

● **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Los índices de referencia son índices para cuantificar si

el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EMERGING MARKETS LOCAL CURRENCY  
BOND

Identificador de la entidad jurídica:  
549300JJ3276S8R63L30

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

|                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **80% JP MORGAN GBI EM GLOBAL DIVERSIFIED COMPOSITE + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.328 (D)**
- La calificación ESG media ponderada del universo de inversión ESG es **0.186 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.30 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.17 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial.

identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                   | Sector           | Subsector                     | País            | % de activos |
|---------------------------------------|------------------|-------------------------------|-----------------|--------------|
| MGS 3.757% 05/40 0519                 | Bonos del Tesoro | Bonos del Tesoro              | Malasia         | 3.48%        |
| SAGB 8.25% 3/32                       | Bonos del Tesoro | Bonos del Tesoro              | Sudáfrica       | 3.34%        |
| MGS 3.844% 4/33                       | Bonos del Tesoro | Bonos del Tesoro              | Malasia         | 2.37%        |
| ROMGB 5% 02/29 10Y                    | Bonos del Tesoro | Bonos del Tesoro              | Rumanía         | 2.29%        |
| BRAZIL 10% 01/29 NTN-F                | Bonos del Tesoro | Bonos del Tesoro              | Brasil          | 1.99%        |
| BRAZIL NTN-F 10% 01/27                | Bonos del Tesoro | Bonos del Tesoro              | Brasil          | 1.93%        |
| STH AFRICA 7.00% 02/31                | Bonos del Tesoro | Bonos del Tesoro              | Sudáfrica       | 1.88%        |
| AM INV FD CHINA RMB SOVE Z USD        | Finanzas         | Fondos de inversión colectiva | Luxemburgo      | 1.75%        |

| AMUNDI S.F. - SBI FM INDIA BD - H USD | Finanzas         | Fondos de inversión colectiva | Luxemburgo      | 1.66%        |
| CZGB 2.5% 8/28                        | Bonos del Tesoro | Bonos del Tesoro              | República Checa | 1.64%        |
| POLAND 2.75% 04/28                    | Bonos del Tesoro | Bonos del Tesoro              | Polonia         | 1.63%        |
| POLAND 2.75% 10/29 1029               | Bonos del Tesoro | Bonos del Tesoro              | Polonia         | 1.59%        |
| CZGB 0.25% 2/27                       | Bonos del Tesoro | Bonos del Tesoro              | República Checa | 1.54%        |
| SAGB 8.875% 2/35                      | Bonos del Tesoro | Bonos del Tesoro              | Sudáfrica       | 1.52%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 78.94%       |
| Sector público   | Supranacional                 | 6.24%        |
| Finanzas         | Fondos de inversión colectiva | 5.69%        |
| Empresas         | Energía                       | 1.86%        |
| Sector público   | Agencias                      | 1.28%        |
| Sector público   | Deuda pública                 | 0.66%        |
| Empresas         | Comunicación                  | 0.55%        |

|                 |                                   |               |
|-----------------|-----------------------------------|---------------|
| <i>Empresas</i> | <i>Banca</i>                      | <i>0.46%</i>  |
| <i>Empresas</i> | <i>Electricidad</i>               | <i>0.28%</i>  |
| <i>Empresas</i> | <i>Inmobiliario (REIT)</i>        | <i>0.02%</i>  |
| <i>Empresas</i> | <i>Otras empresas financieras</i> | <i>0.02%</i>  |
| <i>Forex</i>    | <i>Forex</i>                      | <i>-0.02%</i> |
| <i>Otros</i>    | <i>Otros</i>                      | <i>-0.05%</i> |
| <i>Efectivo</i> | <i>Efectivo</i>                   | <i>4.08%</i>  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.00% en inversiones sostenibles alineadas con la Taxonomía de la UE.

#### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.30%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 5.73% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.17%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
EMERGING MARKETS SHORT TERM BOND

Identificador de la entidad jurídica:  
5493000K4D8P0NQAIA67

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **23.00%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD + 25% JP MORGAN EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.019 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.201 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de -0.06 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.21 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si

desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación

**Las principales incidencias adversas**

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida

por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones            | Sector   | Subsector                     | País           | % de activos |
|--------------------------------|----------|-------------------------------|----------------|--------------|
| AIF - EMG MKT SOVEREIGN BD - S | Finanzas | Fondos de inversión colectiva | Luxemburgo     | 4.66%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo

de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:   
-**el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas   
-**las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde   
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

contable el fondo invirtió un 0.08% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.   
La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.   
El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.07% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.40%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **20.04%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.88%.

● **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

● **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

● **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
ASIA MULTI ASSET TARGET INCOME

Identificador de la entidad jurídica:  
213800D8TH8Y8YWFBV59

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ ☐ Sí ☒ ☐ No

|                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **30% JP MORGAN EMBI GLOBAL DIVERSIFIED COMPOSITE + 50% MSCI EM (EMERGING MARKETS) + 20% JP MORGAN CEMBI BROAD DIVERSIFIED**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.150 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **-0.126 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones              | Sector                       | Subsector                                    | País         | % de activos |
|----------------------------------|------------------------------|----------------------------------------------|--------------|--------------|
| ISHSIV-MSCI INDIA UCITS ETF(LSE) | Finanzas                     | Fondos de inversión colectiva                | Irlanda      | 4.89%        |
| Amundi MSCI China A II ETF       | Finanzas                     | Fondos de inversión colectiva                | Luxemburgo   | 2.85%        |
| TAIWAN SEMICONDUCTOR MANUFAC     | Tecnología de la información | Semiconductores y equipos de semiconductores | Taiwán       | 2.77%        |
| TENCENT HOLDINGS LTD             | Servicios de comunicación    | Medios de comunicación y entretenimiento     | Islas Caimán | 1.32%        |
| SAMSUNG ELECTRONICS              | Tecnología de la información | Hardware y equipo tecnológico                | Corea        | 1.20%        |
| LENOVO 3.421% 11/30 REGS         | Empresas                     | Tecnología                                   | Hong Kong    | 1.00%        |
| AMUNDI PHYSICAL GOLD ETC         | Finanzas                     | Fondos de inversión colectiva                | Irlanda      | 0.99%        |
| INDOGB 6.875% 04/29 101          | Bonos del Tesoro             | Bonos del Tesoro                             | Indonesia    | 0.98%        |
| INDOGB 6.625% 02/34 100          | Bonos del Tesoro             | Bonos del Tesoro                             | Indonesia    | 0.97%        |
| HYUELE 2.375% 01/31 REGS         | Empresas                     | Tecnología                                   | Corea        | 0.94%        |
| INDOGB 7.125% 06/43 FR97         | Bonos del Tesoro             | Bonos del Tesoro                             | Indonesia    | 0.94%        |
| PETRONAS 7.625% 10/26- REGS      | Empresas                     | Energía                                      | Malasia      | 0.90%        |
| KDB 5.625% 10/33                 | Empresas                     | Banca                                        | Corea        | 0.89%        |
| CKHH 5.5% 04/34 REGS             | Empresas                     | Consumo discrecional                         | Islas Caimán | 0.86%        |
| MEITUA 3.05% 10/30 REGS          | Empresas                     | Consumo discrecional                         | Islas Caimán | 0.86%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector                       | Subsector                                    | % de activos |
|------------------------------|----------------------------------------------|--------------|
| Finanzas                     | Fondos de inversión colectiva                | 8.92%        |
| Empresas                     | Consumo discrecional                         | 8.07%        |
| Empresas                     | Tecnología                                   | 7.22%        |
| Empresas                     | Banca                                        | 7.19%        |
| Finanzas                     | Entidades bancarias                          | 4.91%        |
| Tecnología de la información | Semiconductores y equipos de semiconductores | 3.86%        |

|                                     |                                                                |       |
|-------------------------------------|----------------------------------------------------------------|-------|
| <i>Empresas</i>                     | <i>Energía</i>                                                 | 3.71% |
| <i>Bonos del Tesoro</i>             | <i>Bonos del Tesoro</i>                                        | 2.88% |
| <i>Empresas</i>                     | <i>Electricidad</i>                                            | 2.86% |
| <i>Tecnología de la información</i> | <i>Equipo tecnológico y hardware</i>                           | 2.77% |
| <i>Empresas</i>                     | <i>Transporte</i>                                              | 2.23% |
| <i>Empresas</i>                     | <i>Otras empresas financieras</i>                              | 2.22% |
| <i>Sector público</i>               | <i>Agencias</i>                                                | 1.93% |
| <i>Empresas</i>                     | <i>Industria básica</i>                                        | 1.87% |
| <i>Empresas</i>                     | <i>Seguros</i>                                                 | 1.77% |
| <i>Servicios de comunicación</i>    | <i>Medios de comunicación y entretenimiento</i>                | 1.76% |
| <i>Empresas</i>                     | <i>Empresas financieras</i>                                    | 1.71% |
| <i>Empresas</i>                     | <i>Gas natural</i>                                             | 1.46% |
| <i>Consumo discrecional</i>         | <i>Consumo discrecional<br/>Distribución y venta minorista</i> | 1.36% |
| <i>Materiales</i>                   | <i>Metales y minería</i>                                       | 1.10% |
| <i>Sector público</i>               | <i>Supranacional</i>                                           | 1.02% |
| <i>Energía</i>                      | <i>Petróleo, gas y combustibles</i>                            | 0.81% |
| <i>Inmobiliario</i>                 | <i>REIT</i>                                                    | 0.78% |

|                                  |                                                                         |              |
|----------------------------------|-------------------------------------------------------------------------|--------------|
| <i>Empresas</i>                  | <i>Comunicación</i>                                                     | <i>0.76%</i> |
| <i>Consumo discrecional</i>      | <i>Automóviles y componentes</i>                                        | <i>0.74%</i> |
| <i>Empresas</i>                  | <i>Consumo básico</i>                                                   | <i>0.74%</i> |
| <i>Industria</i>                 | <i>Bienes de capital</i>                                                | <i>0.72%</i> |
| <i>Asistencia sanitaria</i>      | <i>Productos farmacéuticos<br/>Biotecnología y ciencias de la salud</i> | <i>0.67%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: -el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las **inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde. - los **gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

## ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.01% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Este es el primer informe periódico del SFDR elaborado para este subfondo.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **18.85%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 8.69%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS EURO  
MULTI-ASSET TARGET INCOME

Identificador de la entidad jurídica:  
549300MRV3FILX0BHB52

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 31.23% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1621

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.674 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.73 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y de-

rechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                    | Sector           | Subsector                     | País       | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● **¿En qué sectores económicos se realizaron las inversiones?**

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 20.42%       |
| Finanzas         | Fondos de inversión colectiva | 13.36%       |
| Empresas         | Banca                         | 7.09%        |
| Sector público   | Deuda pública                 | 6.35%        |
| Empresas         | Consumo discrecional          | 4.56%        |
| Empresas         | Electricidad                  | 3.06%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.62% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 0.51%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 4.92%.

 son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

 **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **24.55%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

 **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.06%.

 **¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

 **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartándose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

 **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

● **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

**Los índices de referencia** son índices para cuantificar si el producto financiero alcanza las características

medioambientales  
o sociales que  
promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL MULTI-ASSET

Identificador de la entidad jurídica:  
549300OD7WDES3BYBD54

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 34.23% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.313 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.49 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía,

biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a

los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones            | Sector                       | Subsector                                           | País           | % de activos |
|--------------------------------|------------------------------|-----------------------------------------------------|----------------|--------------|
| AMND GOLD LBMA ETC(PAR)        | Finanzas                     | Fondos de inversión colectiva                       | Irlanda        | 4.23%        |
| US TSY 2.875% 08/28            | Bonos del Tesoro             | Bonos del Tesoro                                    | Estados Unidos | 2.50%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.37% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde **- los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.42%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 2.28%.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **29.06%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.80%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

● **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Los índices de referencia son índices para medir si el producto financiero alcanza las

características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL MULTI-ASSET CONSERVATIVE

Identificador de la entidad jurídica:  
549300B1R0N20X3Z5K83

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 31.75% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.633 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● ¿...y en comparación con periodos anteriores?

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.62 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (C).

### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si

desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                     | Sector           | Subsector                     | País           | % de activos |
|-----------------------------------------|------------------|-------------------------------|----------------|--------------|
| SPAIN 5.75% 07/32                       | Bonos del Tesoro | Bonos del Tesoro              | España         | 4.96%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 36.02%       |
| Empresas         | Banca                         | 15.71%       |
| Finanzas         | Fondos de inversión colectiva | 11.26%       |
| Sector público   | Deuda pública                 | 3.96%        |
| Empresas         | Consumo discrecional          | 3.69%        |
| Empresas         | Otras empresas financieras    | 2.21%        |

|                                     |                                                                         |              |
|-------------------------------------|-------------------------------------------------------------------------|--------------|
| <i>Empresas</i>                     | <i>Electricidad</i>                                                     | <i>1.76%</i> |
| <i>Empresas</i>                     | <i>Consumo básico</i>                                                   | <i>1.63%</i> |
| <i>Asistencia sanitaria</i>         | <i>Productos farmacéuticos<br/>Biotecnología y ciencias de la salud</i> | <i>1.55%</i> |
| <i>Tecnología de la información</i> | <i>Equipo tecnológico y hardware</i>                                    | <i>1.32%</i> |
| <i>Empresas</i>                     | <i>Transporte</i>                                                       | <i>1.32%</i> |
| <i>Sector público</i>               | <i>Supranacional</i>                                                    | <i>1.17%</i> |
| <i>Empresas</i>                     | <i>Bienes de equipo</i>                                                 | <i>0.99%</i> |
| <i>Empresas</i>                     | <i>Inmobiliario (REIT)</i>                                              | <i>0.98%</i> |
| <i>Empresas</i>                     | <i>Comunicación</i>                                                     | <i>0.97%</i> |
| <i>Industria</i>                    | <i>Bienes de capital</i>                                                | <i>0.96%</i> |
| <i>Finanzas</i>                     | <i>Servicios financieros</i>                                            | <i>0.88%</i> |
| <i>Empresas</i>                     | <i>Energía</i>                                                          | <i>0.88%</i> |
| <i>Consumo básico</i>               | <i>Alimentos, bebidas y tabaco</i>                                      | <i>0.83%</i> |
| <i>Consumo discrecional</i>         | <i>Consumo discrecional<br/>Distribución y venta minorista</i>          | <i>0.74%</i> |
| <i>Empresas</i>                     | <i>Gas natural</i>                                                      | <i>0.72%</i> |
| <i>Tecnología de la información</i> | <i>Software y servicios</i>                                             | <i>0.70%</i> |
| <i>Finanzas</i>                     | <i>Entidades bancarias</i>                                              | <i>0.69%</i> |

|                                     |                                                     |              |
|-------------------------------------|-----------------------------------------------------|--------------|
| <i>Empresas</i>                     | <i>Industria básica</i>                             | <i>0.65%</i> |
| <i>Servicios de comunicación</i>    | <i>Medios de comunicación y entretenimiento</i>     | <i>0.65%</i> |
| <i>Tecnología de la información</i> | <i>Semiconductores y equipos de semiconductores</i> | <i>0.61%</i> |
| <i>Servicios de comunicación</i>    | <i>Telecomunicaciones</i>                           | <i>0.42%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.37% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.43%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 2.89%.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 27.26% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.12%.

● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
GLOBAL MULTI-ASSET TARGET INCOME

Identificador de la entidad jurídica:  
549300MJSB1OV3IZ3T98

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje 30.64% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

X

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1656

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.506 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.52 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a

los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                    | Sector           | Subsector                     | País           | % de activos |
|----------------------------------------|------------------|-------------------------------|----------------|--------------|
| AMUNDI PHYSICAL GOLD ETC               | Finanzas         | Fondos de inversión colectiva | Irlanda        | 3.29%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 12.98%       |
| Finanzas         | Fondos de inversión colectiva | 12.82%       |
| Empresas         | Banca                         | 7.87%        |
| Sector público   | Deuda pública                 | 7.57%        |
| Empresas         | Consumo discrecional          | 4.26%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.46% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

**¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.40%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.28%.

#### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 23.79% al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.38%.

#### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### **● ¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

#### **● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

#### **● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

#### **● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS NET  
ZERO AMBITION MULTI-ASSET

Identificador de la entidad jurídica:  
549300UWEKCHQNE88693

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

| <input type="checkbox"/>                               | Realizó inversiones sostenibles con un objetivo social: _____                                                                                          | <input type="checkbox"/>                               | Promovió características E/S, pero no realizó inversiones sostenibles                                                                                                                            |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **50% MSCI ACWI + 5% MSCI USD HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 5% MSCI EUR HY CORPORATE BOND INDEX + 25% MSCI EUR IG CORPORATE BOND INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo.

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
  - Exclusiones legales sobre armas controvertidas
  - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles.
  - Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web [www.amundi.fr](http://www.amundi.fr)).
2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares.
3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores.
4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

Durante el ejercicio, el producto promovió continuamente las características medioambientales con el objetivo de reducir su intensidad de carbono alineando la intensidad de su huella de carbono con la de su Índice de referencia **50% MSCI ACWI CLIMATE CHANGE INDEX + 15% MSCI USD IG CLIMATE CHANGE CORPORATE BOND INDEX + 25% MSCI EUR IG CLIMATE CHANGE CORPORATE BOND INDEX + 5% MSCI USD HY CLIMATE CHANGE CORPORATE BOND INDEX + 5% MSCI EUR HY CLIMATE CHANGE CORPORATE BOND INDEX.**

#### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es 0.519 (C).
- La calificación ESG media ponderada del universo de inversión ESG es -0.012 (D).

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

El indicador de sostenibilidad utilizado es la intensidad de la huella de carbono de la cartera, que se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice de referencia. En consecuencia, los títulos con una huella ecológica relativamente baja tenían más probabilidades de ser seleccionados en la cartera que los títulos con una huella ecológica relativamente alta.

- La intensidad media ponderada de la huella de carbono de la cartera es de 93.73.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 110.21.

### ● ¿...y en comparación con periodos anteriores?

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.46 (D) y la calificación ESG media ponderada del universo de inversión ESG era de -0.04 (D). Al cierre del periodo anterior, la intensidad media ponderada de carbono de la cartera era de 122.08 y el índice de referencia de intensidad media ponderada de carbono era de 127.65<sup>1</sup>.

### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

<sup>1</sup> En el transcurso de 2023, el índice de referencia ha sido sustituido por 50% MSCI ACWI CLIMATE CHANGE INDEX + 15% MSCI USD IG CLIMATE CHANGE CORPORATE BOND INDEX + 25% MSCI EUR IG CLIMATE CHANGE CORPORATE BOND INDEX + 5% MSCI USD HY CLIMATE CHANGE CORPORATE BOND INDEX + 5% MSCI EUR HY CLIMATE CHANGE CORPORATE BOND INDEX y hemos informado de la intensidad de carbono de dicho índice también para el periodo anterior, con fines de coherencia.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de

puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones                      | Sector                       | Subsector                                    | País           | % de activos |
|------------------------------------------|------------------------------|----------------------------------------------|----------------|--------------|
| NVIDIA CORP                              | Tecnología de la información | Semiconductores y equipos de semiconductores | Estados Unidos | 1.99%        |
| MICROSOFT CORP                           | Tecnología de la información | Software y servicios                         | Estados Unidos | 1.66%        |
| APPLE INC                                | Tecnología de la información | Hardware y equipo tecnológico                | Estados Unidos | 1.55%        |
| TAIWAN SEMICONDUCTOR MANUFAC             | Tecnología de la información | Semiconductores y equipos de semiconductores | Taiwán         | 1.45%        |
| OAT 1.75% 06/39                          | Bonos del Tesoro             | Bonos del Tesoro                             | Francia        | 1.30%        |

| HDFC BANK LIMITED                        | Finanzas                     | Entidades bancarias                          | La India       | 0.57%        |
| Amundi MSCI EMU Small Cap ESG CTB N Z Am | Finanzas                     | Fondos de inversión colectiva                | Luxemburgo     | 0.56%        |
| A-F EUROLAND EQ SMALL CAP-Z EUR          | Finanzas                     | Fondos de inversión colectiva                | Luxemburgo     | 0.55%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector                       | Subsector                                    | % de activos |
|------------------------------|----------------------------------------------|--------------|
| Empresas                     | Banca                                        | 13.49%       |
| Tecnología de la información | Semiconductores y equipos de semiconductores | 6.15%        |
| Empresas                     | Comunicación                                 | 4.91%        |
| Industria                    | Bienes de capital                            | 4.28%        |
| Tecnología de la información | Equipo tecnológico y hardware                | 3.97%        |
| Empresas                     | Consumo discrecional                         | 3.95%        |

|                                     |                                                                         |              |
|-------------------------------------|-------------------------------------------------------------------------|--------------|
| <i>Tecnología de la información</i> | <i>Software y servicios</i>                                             | <i>3.79%</i> |
| <i>Finanzas</i>                     | <i>Entidades bancarias</i>                                              | <i>3.75%</i> |
| <i>Empresas</i>                     | <i>Consumo básico</i>                                                   | <i>3.64%</i> |
| <i>Empresas</i>                     | <i>Seguros</i>                                                          | <i>3.53%</i> |
| <i>Bonos del Tesoro</i>             | <i>Bonos del Tesoro</i>                                                 | <i>3.14%</i> |
| <i>Empresas</i>                     | <i>Electricidad</i>                                                     | <i>3.09%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.68% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde** **- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas**

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.  
El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☒ Sí:

☐ En gas fósil

☐ En energía nuclear

☐ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.  
<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 0.52%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 10.80%.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **49.44%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 10.17%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

El objetivo de inversión sostenible se alcanza alineando los objetivos de reducción de la huella de carbono del fondo con el índice compuesto 50% MSCI ACWI CLIMATE CHANGE + 15% MSCI USD IG CLIMATE CHANGE CORPORATE BOND + 25% MSCI EUR IG CLIMATE CHANGE CORPORATE BOND + 5% MSCI USD HY CLIMATE CHANGE CORPORATE BOND + 5% MSCI EUR HY CLIMATE

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Los índices de referencia son índices para cuantificar si el producto

financiero alcanza las características medioambientales o sociales que promueven.

CHANGE CORPORATE BOND. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 93.73.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 110.21.

● ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia de transición climática" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

● ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

- La calificación ESG media ponderada de la cartera es 0.519 (C).
- La calificación ESG media ponderada del universo de inversión ESG es -0.012 (D).
- La intensidad media ponderada de la huella de carbono de la cartera es de 93.73.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 110.21.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

El objetivo de inversión sostenible se alcanza alineando los objetivos de reducción de la huella de carbono del fondo con el índice compuesto 50% MSCI ACWI CLIMATE CHANGE + 15% MSCI USD IG CLIMATE CHANGE CORPORATE BOND + 25% MSCI EUR IG CLIMATE CHANGE CORPORATE BOND + 5% MSCI USD HY CLIMATE CHANGE CORPORATE BOND + 5% MSCI EUR HY CLIMATE CHANGE CORPORATE BOND. La intensidad de la huella de carbono de la cartera se calcula como media ponderada por activos de la cartera y se compara con la intensidad de la huella de carbono ponderada por activos del Índice.

En consecuencia, los títulos con una huella ecológica relativamente baja tienen más probabilidades de ser seleccionados en la cartera que los títulos con una huella relativamente alta. Además, el fondo excluye empresas por su comportamiento controvertido y (o) productos controvertidos de acuerdo con la Política de Inversión Responsable.

- La intensidad media ponderada de la huella de carbono de la cartera es de 93.73.
- La intensidad media ponderada de la huella de carbono del Índice de referencia es de 110.21.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Un índice de mercado general no evalúa ni incluye a sus componentes en función de las características medioambientales y, por lo tanto, no está alineado con las características medioambientales.

El índice utilizado es un "índice de referencia de transición climática" que incorpora objetivos específicos relacionados con la reducción de emisiones y la transición a una economía con bajas emisiones de carbono a través de la selección y ponderación de los componentes subyacentes.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS

Identificador de la entidad jurídica:  
222100UNVFMGHI5DQJ57

Características medioambientales y/o sociales

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 42.84% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.770 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.80 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean

compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan

la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones                  | Sector           | Subsector                     | País           | % de activos |
|--------------------------------------|------------------|-------------------------------|----------------|--------------|

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

#### ● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 26.26%       |
| Empresas         | Banca                         | 19.27%       |
| Finanzas         | Fondos de inversión colectiva | 9.93%        |
| Empresas         | Consumo discrecional          | 5.90%        |
| Sector público   | Deuda pública                 | 3.25%        |
| Empresas         | Comunicación                  | 3.08%        |
| Empresas         | Seguros                       | 3.02%        |

|                                     |                                                                |              |
|-------------------------------------|----------------------------------------------------------------|--------------|
| <i>Empresas</i>                     | <i>Transporte</i>                                              | <i>2.94%</i> |
| <i>Titulizado</i>                   | <i>ABS</i>                                                     | <i>2.58%</i> |
| <i>Empresas</i>                     | <i>Electricidad</i>                                            | <i>2.42%</i> |
| <i>Empresas</i>                     | <i>Gas natural</i>                                             | <i>2.05%</i> |
| <i>Empresas</i>                     | <i>Inmobiliario (REIT)</i>                                     | <i>1.77%</i> |
| <i>Empresas</i>                     | <i>Consumo básico</i>                                          | <i>1.76%</i> |
| <i>Titulizado</i>                   | <i>Hipotecas residenciales</i>                                 | <i>1.50%</i> |
| <i>Empresas</i>                     | <i>Energía</i>                                                 | <i>0.94%</i> |
| <i>Industria</i>                    | <i>Bienes de capital</i>                                       | <i>0.77%</i> |
| <i>Empresas</i>                     | <i>Industria básica</i>                                        | <i>0.71%</i> |
| <i>Tecnología de la información</i> | <i>Semiconductores y equipos de semiconductores</i>            | <i>0.68%</i> |
| <i>Tecnología de la información</i> | <i>Software y servicios</i>                                    | <i>0.58%</i> |
| <i>Empresas</i>                     | <i>Bienes de equipo</i>                                        | <i>0.57%</i> |
| <i>Finanzas</i>                     | <i>Servicios financieros</i>                                   | <i>0.57%</i> |
| <i>Titulizado</i>                   | <i>CMO</i>                                                     | <i>0.56%</i> |
| <i>Consumo discrecional</i>         | <i>Consumo discrecional<br/>Distribución y venta minorista</i> | <i>0.50%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**,

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.06% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas

-las inversiones en inmovilizado (**CapEx**) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde

- los gastos de explotación (**OpEx**) que reflejan las actividades operativas ecológicas de las empresas participadas

● ¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.05% y la cuota de inversión en actividades habilitadoras era del 0.25%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 7.85%.

 son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **37.42%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 4.36%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

● **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si

el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
MULTIASSET SUSTAINABLE FUTURE

Identificador de la entidad jurídica:  
549300E1QOFTUCHMCV76

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 67.59% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **30% MSCI WORLD + 70% BLOOMBERG EURO AGGREGATE (E)**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1694

El producto lleva la etiqueta ISR (Inversión Social y Responsable). A lo largo de todo el ejercicio ha tratado de promover las 3 dimensiones (medioambiental, social y de gobierno corporativo) teniendo en cuenta la calificación ESG de los emisores en la estructuración de la cartera.

La calificación ESG de los emisores tiene por objeto evaluar su capacidad para gestionar el posible impacto negativo de sus actividades en los factores de sostenibilidad. Así pues, este análisis pretende evaluar sus comportamientos Medioambientales y Sociales en términos de gobierno corporativo, asignándoles una calificación ESG que va de la A (mejor calificación) a la G (peor calificación), con el fin de lograr una evaluación más global de los riesgos.

Al cierre del periodo:

1. La cartera ha aplicado sistemáticamente la siguiente política de exclusión de Amundi:
  - Exclusiones legales sobre armas controvertidas
  - Empresas que contravienen grave y repetidamente uno o más de los 10 principios del Pacto Mundial (Pacto Mundial de Naciones Unidas), sin medidas correctivas creíbles;
  - Las exclusiones sectoriales del grupo Amundi sobre Carbón y Tabaco; (los detalles de esta política están disponibles en la Política de Inversión Responsable de Amundi en el sitio web [www.amundi.fr](http://www.amundi.fr))
2. No se ha invertido en emisores con calificación F o G. En el caso de los emisores cuya calificación se ha rebajado a F o G, los títulos ya presentes en la cartera se vendieron dentro del plazo comprometido en el folleto y velando por el interés financiero de los titulares
3. La puntuación ESG media ponderada de la cartera ha sido sistemáticamente superior a la puntuación ESG media ponderada del universo de inversión del fondo tras eliminar el 20% de los peores emisores
4. El fondo ha favorecido a emisores líderes en su sector de actividad según los criterios ESG identificados por el equipo de analistas extrafinancieros de la sociedad gestora (enfoque "best in class"). A excepción de las exclusiones mencionadas, todos los sectores económicos están representados en este enfoque, por lo que la UCI puede estar expuesta a determinados sectores controvertidos.

#### ● *¿Cómo se comportaron los indicadores de sostenibilidad?*

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.104 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.718 (C)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse glo-

balmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.14 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.75 (C).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu)

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● **¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?**

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

- **¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?**

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

## ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones   | Sector                       | Subsector            | País           | % de activos |
|-----------------------|------------------------------|----------------------|----------------|--------------|
| SPAIN 4.20%<br>01/37  | Bonos del Tesoro             | Bonos del Tesoro     | España         | 2.19%        |
| MICROSOFT CORP        | Tecnología de la información | Software y servicios | Estados Unidos | 1.87%        |
| SPAIN 1% 07/42        | Bonos del Tesoro             | Bonos del Tesoro     | España         | 1.86%        |
| IRELAND 3%<br>10/43   | Bonos del Tesoro             | Bonos del Tesoro     | Irlanda        | 1.84%        |
| NEDERLD 0.5%<br>01/40 | Bonos del Tesoro             | Bonos del Tesoro     | Países Bajos   | 1.74%        |
| BTPS 4% 04/35<br>13Y  | Bonos del Tesoro             | Bonos del Tesoro     | Italia         | 1.71%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.04% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.85%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 12.17%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **56.84%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 9.71%.

#### ● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

- **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- **¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
PIONEER FLEXIBLE OPPORTUNITIES

Identificador de la entidad jurídica:  
5493000SYHI3US1RDZ90

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **38.25%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1706

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.509 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.43 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretendía realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores ma-

teriales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

#### - ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra meto-

dología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento

sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones         | Sector                       | Subsector                     | País           | % de activos |
|-----------------------------|------------------------------|-------------------------------|----------------|--------------|
| US TSY 4.625% 02/25         | Bonos del Tesoro             | Bonos del Tesoro              | Estados Unidos | 7.10%        |
| SWISS LIFE HOLD AG          | Finanzas                     | Seguros                       | Suiza          | 3.64%        |
| ASR NEDERLAND NV            | Finanzas                     | Seguros                       | Países Bajos   | 3.30%        |
| PALO ALTO NETWORKS INC      | Tecnología de la información | Software y servicios          | Estados Unidos | 3.03%        |
| POSTE ITALIANE SPA          | Finanzas                     | Seguros                       | Italia         | 2.74%        |
| FORD MOTOR COMPANY          | Consumo discrecional         | Automóviles y componentes     | Estados Unidos | 2.65%        |
| CRH PLC UK                  | Materiales                   | Materiales de construcción    | Irlanda        | 2.63%        |
| INTL BUSINESS MACHINES CORP | Tecnología de la información | Software y servicios          | Estados Unidos | 2.53%        |
| SUMITOMO MITSUI FINAN       | Finanzas                     | Entidades bancarias           | Japón          | 2.52%        |
| NEWMONT CORP                | Materiales                   | Metales y minería             | Estados Unidos | 2.46%        |
| IBERDROLA SA                | Suministros públicos         | Suministro eléctrico          | España         | 2.30%        |
| AXA SA                      | Finanzas                     | Seguros                       | Francia        | 2.30%        |
| CURTISS-WRIGHT              | Industria                    | Bienes de capital             | Estados Unidos | 2.27%        |
| DBS GROUP HOLDINGS LTD      | Finanzas                     | Entidades bancarias           | Singapur       | 2.25%        |
| ELEVANCE HEALTH INC         | Asistencia sanitaria         | Equipo y servicios sanitarios | Estados Unidos | 2.22%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

#### ● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero. **N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles. La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector                       | Subsector                     | % de activos |
|------------------------------|-------------------------------|--------------|
| Finanzas                     | Seguros                       | 16.34%       |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.35% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.03% y la cuota de inversión en actividades habilitadoras era del 0.99%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 11.07%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 27.95% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 8.96%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
INCOME OPPORTUNITIES

Identificador de la entidad jurídica:  
549300ILVTGROHRV6666

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 32.49% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Realizó inversiones sostenibles con un objetivo social:

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión INDEX AMUNDI RATING D. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

1716

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.280 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.046 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

#### ***¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?***

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones         | Sector                       | Subsector                                                       | País           | % de activos |
|-----------------------------|------------------------------|-----------------------------------------------------------------|----------------|--------------|
| SHELL PLC                   | Energía                      | Petróleo, gas y combustibles                                    | Reino Unido    | 3.20%        |
| INTL BUSINESS MACHINES CORP | Tecnología de la información | Software y servicios                                            | Estados Unidos | 2.78%        |
| ABN AMRO BANK NV-CVA        | Finanzas                     | Entidades bancarias                                             | Países Bajos   | 2.51%        |
| KB FINANCIAL GROUP INC      | Finanzas                     | Entidades bancarias                                             | Corea          | 2.33%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector     | Subsector                    | % de activos |
|------------|------------------------------|--------------|
| Otros      | Otros                        | 22.35%       |
| Titulizado | MBS de agencias              | 16.18%       |
| Finanzas   | Entidades bancarias          | 8.54%        |
| Empresas   | Banca                        | 6.78%        |
| Finanzas   | Servicios financieros        | 5.42%        |
| Energía    | Petróleo, gas y combustibles | 4.40%        |
| Finanzas   | Seguros                      | 4.04%        |

|                                     |                                                                         |       |
|-------------------------------------|-------------------------------------------------------------------------|-------|

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.01% en inversiones sostenibles alineadas con la Ta-

de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde.
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas.

conomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?**

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.01%.

 son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **26.46%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.02%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
REAL ASSETS TARGET INCOME

Identificador de la entidad jurídica:  
549300B49TP3UV3FOI07

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **31.88%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **7.5% ICE BOFA US HIGH YIELD INDEX + 5% IBOXX EURO CORPORATE NON FINANCIALS + 5% ALERIAN MLP + 5% BLOOMBERG GOLD SUBINDEX TOTAL RETURN + 5% BLOOMBERG COMMODITY INDEX (VALO) + 15% MSCI ACWI REAL ESTATE INVESTMENT TRUSTS (REIT) + 7.5% MSCI WORLD TRANSPORTATION INFRASTRUCTURE + 10% MSCI WORLD INDEX / FOOD BEVERAGE & TOBACCO -IG + 10% MSCI WORLD INDEX / MATERIALS -SEC + 5% ICE BOFA GLOBAL INFLATION-LINKED GOVERNMENT INDEX + 5% ICE BOFA EURO HIGH YIELD INDEX + 5% MSCI WORLD INDEX / UTILITIES -SEC + 5% ICE BOFA US NON-FINANCIAL CORPORATE INDEX + 10% MSCI WORLD INDEX / ENERGY -SEC.** Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.533 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.045 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.64 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.1 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los

factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

#### Las principales incidencias adversas

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

#### ● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

#### - ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- **¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:**

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.

- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones               | Sector                       | Subsector                              | País           | % de activos |
|-----------------------------------|------------------------------|----------------------------------------|----------------|--------------|
| AMUNDI GOLD STOCK-AED             | Finanzas                     | Fondos de inversión colectiva          | Austria        | 2.78%        |
| US TII 3.875% 04/29               | Bonos del Tesoro             | Bonos del Tesoro                       | Estados Unidos | 2.08%        |
| ISHARES EPRA ASIA (GERMANY)       | Finanzas                     | Fondos de inversión colectiva          | Irlanda        | 1.93%        |
| A-F EMERGING MKT CORP BD-Z USD QD | Finanzas                     | Fondos de inversión colectiva          | Luxemburgo     | 1.81%        |
| SIMON PROPERTY GROUP INC          | Inmobiliario                 | REIT                                   | Estados Unidos | 1.73%        |
| AVALONBAY COMMUNITIES INC         | Inmobiliario                 | REIT                                   | Estados Unidos | 1.60%        |
| FREEMPORT-MCMORAN INC             | Materiales                   | Metales y minería                      | Estados Unidos | 1.55%        |
| TRANSURBAN GRUPO                  | Industria                    | Transporte                             | Australia      | 1.41%        |
| INFINEON TECHNOLOGIES AG          | Tecnología de la información | Semiconductores y semiconductor Equipo | Alemania       | 1.34%        |
| US TII 3.375% 04/32               | Bonos del Tesoro             | Bonos del Tesoro                       | Estados Unidos | 1.33%        |
| PETROBRAS ONADR                   | Energía                      | Petróleo, gas y combustibles           | Brasil         | 1.32%        |
| VONOVIA SE                        | Inmobiliario                 | Inmobiliario Gestión y inmobiliaria    | Alemania       | 1.30%        |
| NEWMONT CORP                      | Materiales                   | Metales y minería                      | Estados Unidos | 1.24%        |
| UPM-KYMMENE OYJ                   | Materiales                   | Productos madereros y papeleros        | Finlandia      | 1.19%        |
| SCHLUMBERGER LTD                  | Energía                      | Energía Equipo y Servicios             | Curasao        | 1.18%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Inmobiliario     | REIT                          | 11.33%       |
| Energía          | Petróleo, gas y combustibles  | 8.33%        |
| Materiales       | Metales y minería             | 7.90%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.01% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- el **volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las **inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los **gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 6.07%.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **21.38%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 10.49%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

● ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

● ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

● ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
TARGET COUPON

Identificador de la entidad jurídica:  
2221009D0WCSI3Q32Q11

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

| <input checked="" type="radio"/> <input type="radio"/> Sí                                                                                                                                                                                                                                                                                                                                                                          | <input checked="" type="radio"/> <input type="radio"/> No                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.561 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.99 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y de-

rechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones | Sector   | Subsector                     | País    | % de activos |
|---------------------|----------|-------------------------------|---------|--------------|
| AMUNDI REVENUS - OR | Finanzas | Fondos de inversión colectiva | Francia | 100.09%      |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                     | % de activos |
|----------|-------------------------------|--------------|
| Finanzas | Fondos de inversión colectiva | 100.09%      |
| Efectivo | Efectivo                      | -0.09%       |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 1.96% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas

-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde

- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.02% y la cuota de inversión en actividades habilitadoras era del 1.26%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 0.00%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **53.38%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.60%.

#### ● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
ABSOLUTE RETURN CREDIT

Identificador de la entidad jurídica:  
222100C0Q8DZ0ONZYS48

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

|                                                        |                                                                                                                                                        |                                                        |                                                                                                                                                                                                  |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.507 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.29 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y de-

rechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones      | Sector           | Subsector            | País            | % de activos |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

#### ● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector            | % de activos |
|------------------|----------------------|--------------|
| Empresas         | Banca                | 37.13%       |
| Empresas         | Seguros              | 9.58%        |
| Empresas         | Consumo discrecional | 7.93%        |
| Bonos del Tesoro | Bonos del Tesoro     | 7.85%        |
| Empresas         | Comunicación         | 7.66%        |
| Empresas         | Electricidad         | 4.38%        |
| Empresas         | Consumo básico       | 4.05%        |

|                       |                                   |        |
|-----------------------|-----------------------------------|--------|
| <i>Empresas</i>       | <i>Energía</i>                    | 3.27%  |
| <i>Empresas</i>       | <i>Transporte</i>                 | 2.26%  |
| <i>Empresas</i>       | <i>Empresas financieras</i>       | 1.97%  |
| <i>Empresas</i>       | <i>Otras empresas financieras</i> | 1.29%  |
| <i>Empresas</i>       | <i>Gas natural</i>                | 0.90%  |
| <i>Empresas</i>       | <i>Industria básica</i>           | 0.86%  |
| <i>Empresas</i>       | <i>Inmobiliario (REIT)</i>        | 0.66%  |
| <i>Empresas</i>       | <i>Otros suministros públicos</i> | 0.59%  |
| <i>Sector público</i> | <i>Deuda pública</i>              | 0.53%  |
| <i>Empresas</i>       | <i>INTERMEDIACIÓN</i>             | 0.39%  |

| <i>Forex</i>          | <i>Forex</i>                      | -0.60% |
| <i>Efectivo</i>       | <i>Efectivo</i>                   | 8.82%  |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.02% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes

o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde** **- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas**

mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.00%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 10.46%.

**¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **33.61%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

**¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 3.76%.

**¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?**

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

**¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

**¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

● **¿En qué se diferencia el índice de referencia de un índice de mercado general?**

Este producto no tiene un Índice de referencia ESG.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza

las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
ABSOLUTE RETURN MULTI-STRATEGY

Identificador de la entidad jurídica:  
549300G94XO1UF8XMQ66

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

☒ Sí ☒ No

|                                                                                                                                                        |                                                                                                                                                                                                                      |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.466 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.58 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si

desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                      | Sector           | Subsector                     | País       | % de activos |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la proporción de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector         | Subsector                     | % de activos |
|----------------|-------------------------------|--------------|
| Empresas       | Banca                         | 22.44%       |
| Finanzas       | Fondos de inversión colectiva | 12.31%       |
| Sector público | Deuda pública                 | 7.24%        |
| Empresas       | Consumo discrecional          | 6.42%        |
| Empresas       | Consumo básico                | 4.13%        |
| Empresas       | Consumo básico                | 4.13%        |
| Empresas       | Comunicación                  | 3.82%        |

|                                     |                                                                         |       |
|-------------------------------------|-------------------------------------------------------------------------|-------|
| <i>Bonos del Tesoro</i>             | <i>Bonos del Tesoro</i>                                                 | 3.42% |
| <i>Empresas</i>                     | <i>Electricidad</i>                                                     | 2.47% |
| <i>Empresas</i>                     | <i>Industria básica</i>                                                 | 2.35% |
| <i>Empresas</i>                     | <i>Bienes de equipo</i>                                                 | 1.95% |
| <i>Empresas</i>                     | <i>Otras finanzas</i>                                                   | 1.87% |
| <i>Empresas</i>                     | <i>Transporte</i>                                                       | 1.68% |
| <i>Empresas</i>                     | <i>Energía</i>                                                          | 1.55% |
| <i>Sector público</i>               | <i>Supranacional</i>                                                    | 1.39% |
| <i>Empresas</i>                     | <i>Seguros</i>                                                          | 1.38% |
| <i>Tecnología de la información</i> | <i>Semiconductores y equipos de semiconductores</i>                     | 1.23% |

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.22% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.50%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.81%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 26.26% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 6.13%.

● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Plantilla de divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
ABSOLUTE RETURN GLOBAL  
OPPORTUNITIES BOND

Identificador de la entidad jurídica:  
549300BBK38MPT8QZI59

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje **34.92%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **BLOOMBERG GLOBAL AGGREGATE**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● ¿Cómo se comportaron los indicadores de sostenibilidad?

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.876 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.699 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● ¿...y en comparación con periodos anteriores?

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.94 (D) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

### ● ¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si

desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas**

son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos.

Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones    | Sector           | Subsector            | País           | % de activos |
|------------------------|------------------|----------------------|----------------|--------------|
| BTPS 2.5% 12/24        | Bonos del Tesoro | Bonos del Tesoro     | Italia         | 5.88%        |
| BTPS 1.5% 6/25         | Bonos del Tesoro | Bonos del Tesoro     | Italia         | 5.80%        |
| US TSY 4.875% 11/25    | Bonos del Tesoro | Bonos del Tesoro     | Estados Unidos | 5.74%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.22% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

- ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas**

☐ Sí:

☐ En gas fósil

☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.06%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 10.35%.

son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

### ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **31.94%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

### ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del **2.76%**.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI  
FUNDS QUANTITATIVE GLOBAL  
ABSOLUTE RETURN BOND

Identificador de la entidad jurídica:  
213800ADK5DD5CTZQ486

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del **18.52%** de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Realizó inversiones sostenibles con un objetivo social:

Promovió características E/S, pero no realizó inversiones sostenibles

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **INDEX AMUNDI RATING D**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **1.067 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 1.21 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración

Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios

relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                   | Sector           | Subsector                     | País           | % de activos |
|---------------------------------------|------------------|-------------------------------|----------------|--------------|
| AMUNDI FUNDS GLOBAL SHORT TERM BOND Z | Finanzas         | Fondos de inversión colectiva | Luxemburgo     | 5.04%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

### ● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Bonos del Tesoro | Bonos del Tesoro              | 27.28%       |
| Empresas         | Banca                         | 17.80%       |
| Sector público   | Agencias                      | 12.37%       |
| Sector público   | Deuda pública                 | 8.37%        |
| Sector público   | Autoridades locales           | 7.20%        |
| Finanzas         | Fondos de inversión colectiva | 7.08%        |

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.05% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE<sup>1</sup>?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de:

- **el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- **las inversiones en inmovilizado (CapEx)** que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- **los gastos de explotación (OpEx)** que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.01%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.47%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 16.97% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 1.50%.

## ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

## ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

**Los índices de referencia son** índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y en el Artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
MULTISTRATEGY GROWTH

Identificador de la entidad jurídica:  
549300U03843Z1MQX452

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

X

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

X

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje del 26.65% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

X

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión INDEX AMUNDI RATING D. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

Los indicadores de sostenibilidad cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

### ● **¿Cómo se han comportado los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.386 (D)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

### ● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.54 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0 (D).

### ● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y

factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad

y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### **¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?**

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el mayor porcentaje de las inversiones del producto financiero durante el periodo de referencia que es: Del 01/07/2023 al 30/06/2024

| Mayores inversiones                      | Sector                       | Subsector                                                    | País           | % de activos |
|------------------------------------------|------------------------------|--------------------------------------------------------------|----------------|--------------|
| AMUNDI PHYSICAL GOLD ETC                 | Finanzas                     | Fondos de inversión colectiva                                | Irlanda        | 6.02%        |

¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

#### ● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Finanzas         | Fondos de inversión colectiva | 17.24%       |
| Empresas         | Banca                         | 16.42%       |
| Sector público   | Deuda pública                 | 6.28%        |
| Bonos del Tesoro | Bonos del Tesoro              | 3.75%        |
| Empresas         | Consumo discrecional          | 3.19%        |
| Empresas         | Comunicación                  | 3.15%        |
| Empresas         | Consumo básico                | 3.07%        |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos.

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como

¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.15% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Invertió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE¹?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

¹Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

porcentaje de:

- el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas
- las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde
- los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.18%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.12%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del 20.79% al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.71%.

## ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

## ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

## ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

### Los índices de referencia son

índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Este producto no tiene un Índice de referencia ESG.

### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con el objetivo de inversión sostenible?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
PROTECT 90

Identificador de la entidad jurídica:  
22210055YWH87PNEL252

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

## Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

### ¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión INDEX AMUNDI RATING D. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.648 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.000 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.71 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.00 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios

relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen **el mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones                      | Sector   | Subsector                     | País       | % de activos |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

● ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector                     | % de activos |
|------------------|-------------------------------|--------------|
| Finanzas         | Fondos de inversión colectiva | 95.52%       |
| Empresas         | Banca                         | 1.49%        |
| Empresas         | Inmobiliario (REIT)           | 1.18%        |
| Otros            | Otros                         | 0.13%        |
| Forex            | Forex                         | 0.05%        |
| Bonos del Tesoro | Bonos del Tesoro              | 0.00%        |

|          |          |       |
|----------|----------|-------|
| Efectivo | Efectivo | 1.64% |
|----------|----------|-------|

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?**

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.36% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?**

☐ Sí:

☐ En gas fósil      ☐ En energía nuclear

☒ No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas -las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.01% y la cuota de inversión en actividades habilitadoras era del 0.36%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 3.34%.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **27.21%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 5.10%.

#### ● ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### **¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?**

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.

### **¿Cómo se comportó este producto financiero en comparación con el índice de referencia?**

Este producto no tiene un Índice de referencia ESG.

- ***¿En qué se diferencia el índice de referencia de un índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de referencia?***

Este producto no tiene un Índice de referencia ESG.

- ***¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?***

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE) 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS  
CASH EUR

Identificador de la entidad jurídica:  
5299002SSK89DA5VPJ96

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

Sí

No

Realizó inversiones sostenibles con un objetivo medioambiental:

en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

Realizó inversiones sostenibles con un objetivo social:

Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de 59.52% de inversiones sostenibles

con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE

con un objetivo social

Promovió características E/S, pero no realizó inversiones sostenibles

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.849 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.051 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general.
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.66 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.04 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y

factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu). Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO<sub>2</sub> que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios

Las principales incidencias adversas son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- Exclusión: Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- Integración de factores ESG: Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- Compromiso: La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- Voto: La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- Seguimiento de controversias: Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

## ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones                       | Sector           | Subsector            | País         | % de activos |

## ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.
- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector           | Subsector        | % de activos |
|------------------|------------------|--------------|
| Empresas         | Banca            | 51.74%       |
| Bonos del Tesoro | Bonos del Tesoro | 12.53%       |
| Otros            | Otros            | 10.39%       |
| Sector público   | Agencias         | 7.27%        |
| Empresas         | Bienes de equipo | 5.71%        |
| Empresas         | Consumo básico   | 4.57%        |

|            |                            |        |
|------------|----------------------------|--------|
| Empresas   | Comunicación               | 3.14%  |
| Empresas   | Tecnología                 | 3.13%  |
| Titulizado | Activos hipotecarios       | 2.31%  |
| Empresas   | Empresas financieras       | 1.75%  |
| Empresas   | Consumo discrecional       | 1.16%  |
| Empresas   | Industria básica           | 1.01%  |
| Empresas   | Otras empresas financieras | 0.31%  |
| Efectivo   | Efectivo                   | -4.38% |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición son** actividades para las

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.63% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros, tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

**Las actividades alineadas con la Taxonomía** se expresan como porcentaje de: **-el volumen de negocio** que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas **-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde** - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

 son inversiones sostenibles con un objetivo medioambiental **que no tienen en cuenta los criterios** de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

**Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.**

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública.

● **¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?**

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.46%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

● **¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?**

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 1.21%.

 **¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?**

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **57.91%** al cierre del periodo. Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

 **¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?**

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 0.97%.

### ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

### ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión. Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados

### ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿En qué se diferencia el índice de referencia de un índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero con respecto a los indicadores de sostenibilidad para determinar la alineación del índice de referencia con las características medioambientales o sociales promovidas?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de referencia?

Este producto no tiene un Índice de referencia ESG.

#### ● ¿Cómo se comportó este producto financiero en comparación con el índice de mercado general?

Este producto no tiene un Índice de referencia ESG.

Los índices de referencia son índices para cuantificar si el producto financiero alcanza las características medioambientales o sociales que promueven.

Divulgación periódica para los productos financieros contemplados en el Artículo 8, apartados 1, 2 y 2a, del Reglamento (UE 2019/2088 y el artículo 6, apartado primero, del Reglamento (UE) 2020/852

Nombre del producto: AMUNDI FUNDS CASH

Identificador de la entidad jurídica:  
529900YRTK94MJYXUO62

Una inversión sostenible es una inversión en una actividad económica que contribuya a un objetivo medioambiental o social, siempre que la inversión no cause un perjuicio significativo para ningún objetivo medioambiental o social y que las empresas participadas sigan prácticas de buen gobierno.

La Taxonomía de la UE es un sistema de clasificación establecido en el Reglamento (UE) 2020/852, que determina una lista de actividades económicas sostenibles desde el punto de vista medioambiental. Dicho Reglamento no incluye una lista de actividades económicas socialmente sostenibles. Las inversiones sostenibles con un objetivo medioambiental podrían estar alineadas con la Taxonomía o no.

Características medioambientales y/o sociales

¿Tenía este producto financiero un objetivo de inversión sostenible?

|                                                              |                                                                                                                                                        |                                                              |                                                                                                                                                                                                  |

| <input type="checkbox"/>                                     | Realizó inversiones sostenibles con un objetivo medioambiental: _____                                                                                  | <input checked="" type="checkbox"/>                          | Promovió características Medioambientales/Sociales (E/S) y, aunque no tiene como objetivo una inversión sostenible, tenía un porcentaje de <u>51.17%</u> de inversiones sostenibles              |
| <input type="checkbox"/>                                     | <input type="checkbox"/> en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE    |                                                              | <input type="checkbox"/> con un objetivo medioambiental en actividades económicas que se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE               |
| <input type="checkbox"/>                                     | <input type="checkbox"/> en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE |                                                              | <input checked="" type="checkbox"/> con un objetivo medioambiental en actividades económicas que no se consideran sostenibles desde el punto de vista medioambiental según la Taxonomía de la UE |
| <input type="checkbox"/>                                     | Realizó inversiones sostenibles con un objetivo social: _____                                                                                          |                                                              | <input type="checkbox"/> con un objetivo social                                                                                                                                                  |
|                                                              |                                                                                                                                                        | <input type="checkbox"/>                                     | Promovió características E/S, pero no realizó inversiones sostenibles                                                                                                                            |

¿En qué medida se cumplieron las características medioambientales y/o sociales promovidas por este producto financiero?

Durante el ejercicio, el producto promovió continuamente las características medioambientales y/o sociales con el objetivo de lograr una puntuación ESG superior a la puntuación ESG de su universo de inversión **ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX**. Para determinar la puntuación ESG del Producto y el universo de inversión ESG, el desempeño ESG se evaluó continuamente comparando el desempeño medio de un título frente al sector del emisor del título, con respecto a cada una de las tres características: medioambiental, social y de gobierno corporativo.

El universo de inversión es un universo de mercado general que no evalúa ni incluye componentes basados en características medioambientales y/o sociales y, por lo tanto, no pretende ser coherente con las características promovidas por el fondo. No se ha designado ningún índice de referencia ESG.

**Los indicadores de sostenibilidad** cuantifican cómo se alcanzan las características medioambientales o sociales promovidas por el producto financiero.

● **¿Cómo se comportaron los indicadores de sostenibilidad?**

Amundi ha desarrollado su propio proceso interno de calificación ESG basado en el enfoque "Best-in-class". Las calificaciones adaptadas a cada sector de actividad pretenden evaluar la dinámica en la que operan las empresas.

El indicador de sostenibilidad utilizado es la puntuación ESG del Producto que se mide con respecto a la puntuación ESG del universo de inversión ESG del Producto.

Al cierre del periodo:

- La calificación ESG media ponderada de la cartera es **0.736 (C)**.
- La calificación ESG media ponderada del universo de inversión ESG es **0.051 (D)**.

La calificación ESG de Amundi utilizada para determinar la puntuación ESG es una puntuación cuantitativa ESG traducida en siete grados, que van de la A (el universo de mejores puntuaciones) a la G (la peor). En la escala de Calificación ESG de Amundi, los títulos pertenecientes a la lista de exclusión corresponden a una G. En el caso de los emisores corporativos, el desempeño ESG se evalúa en general y a nivel de criterios relevantes comparándolo con el desempeño medio de su sector, a través de la combinación de las tres dimensiones ESG:

- Dimensión medioambiental: analiza la capacidad de los emisores para controlar su impacto medioambiental directo e indirecto, limitando su consumo de energía, reduciendo sus emisiones de efecto invernadero, luchando contra el agotamiento de los recursos y protegiendo la biodiversidad.
- Dimensión social: analiza el funcionamiento de un emisor en dos conceptos distintos: su estrategia para desarrollar su capital humano y el respeto de los derechos humanos en general;
- Dimensión de gobierno corporativo: Evalúa la capacidad del emisor para garantizar la base de un marco de gobierno corporativo eficaz y generar valor a largo plazo.

La metodología aplicada por la calificación ESG de Amundi utiliza 38 criterios que son genéricos (comunes a todas las empresas independientemente de su actividad) o sectoriales, que se ponderan según el sector y se consideran en términos de su impacto en la reputación, la eficiencia operativa y la normativa con respecto a un emisor. Las calificaciones ESG de Amundi pueden expresarse globalmente en las tres dimensiones E, S y G o individualmente en cualquier factor medioambiental o social.

● **¿...y en comparación con periodos anteriores?**

Al cierre del periodo anterior, la calificación ESG media ponderada de la cartera era de 0.62 (C) y la calificación ESG media ponderada del universo de inversión ESG era de 0.04 (D).

● **¿Cuáles eran los objetivos de las inversiones sostenibles que el producto financiero pretende realizar parcialmente y cómo contribuía la inversión sostenible a dichos objetivos?**

Los objetivos de las inversiones sostenibles son invertir en empresas participadas que traten de cumplir dos criterios:

1. seguir las mejores prácticas medioambientales y sociales; y
2. evitar fabricar productos o prestar servicios que perjudiquen al medio ambiente y a la sociedad.

Para que se considere que la empresa en la que se invierte contribuye al objetivo mencionado, debe ser uno de los "mejores actores" dentro de su sector de actividad en al menos uno de sus factores medioambientales o sociales materiales.

La definición de "mejor actor" se basa en la metodología ESG propia de Amundi, cuyo objetivo es cuantificar el desempeño ESG de una empresa participada. Para ser considerada "mejor actor", una empresa participada debe obtener las tres mejores calificaciones (A, B o C, en una escala de calificación que va de la A a la G) dentro de su sector en al menos un factor medioambiental o social material. Los factores medioambientales y sociales materiales se identifican a nivel sectorial. La identificación de factores materiales se basa en el marco de análisis ESG de Amundi, que combina datos extrafinancieros y análisis cualitativos de temáticas sectoriales y de sostenibilidad afines. Los factores identificados como materiales suponen una contribución de más del 10% a la puntuación ESG global. En el sector energético, por ejemplo, los factores materiales son: emisiones y energía, biodiversidad y contaminación, salud y seguridad, comunidades locales y derechos humanos. Si desea obtener una descripción más completa de los sectores y factores, consulte la Declaración Reglamentaria ESG de Amundi, disponible en [www.amundi.lu](http://www.amundi.lu).

Para contribuir a los objetivos anteriores, la empresa participada no debe tener una exposición significativa a actividades (por ejemplo, tabaco, armas, juegos de azar, carbón, aviación, producción de carne, fabricación de fertilizantes y pesticidas, producción de plásticos de un solo uso) que no sean compatibles con dichos criterios.

El carácter sostenible de una inversión se evalúa a nivel de la empresa participada.

**Las principales incidencias adversas** son los efectos negativos más significativos de las decisiones de inversión sobre los factores de sostenibilidad relacionados con cuestiones medioambientales, sociales y laborales, el respeto de los derechos humanos y la lucha contra la corrupción y el soborno.

● ***¿De qué manera las inversiones sostenibles que el producto financiero realizó parcialmente no causaron un perjuicio significativo a ningún objetivo de inversión sostenible desde el punto de vista medioambiental o social?***

Para garantizar que las inversiones sostenibles no causan un perjuicio significativo ("DNSH"), Amundi utiliza dos filtros:

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 de las NTR cuando se dispone de datos sólidos (por ejemplo, intensidad de GEI de las empresas participadas) a través de una combinación de indicadores (por ejemplo, intensidad de carbono) y umbrales o reglas específicas (por ejemplo, que la intensidad de carbono de la empresa participada no pertenezca al último decil del sector).

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

Más allá de los factores específicos de sostenibilidad cubiertos en el primer filtro, Amundi ha definido un segundo filtro, que no tiene en cuenta los indicadores obligatorios de Principales Incidencias Adversas mencionados anteriormente, con el fin de verificar que la empresa no obtiene malos resultados desde un punto de vista medioambiental o social global en comparación con otras empresas de su sector, lo que corresponde a una puntuación medioambiental o social superior o igual a E utilizando la calificación ESG de Amundi.

- ***¿Cómo se tuvieron en cuenta los indicadores de incidencias adversas sobre los factores de sostenibilidad?***

Los indicadores de incidencias adversas se han tenido en cuenta tal y como se detalla en el primer filtro de no causar un daño significativo (DNSH) anterior.

El primer filtro DNSH se basa en el seguimiento de los indicadores obligatorios de Principales Incidencias Adversas del Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 cuando se dispone de datos sólidos mediante la combinación de los siguientes indicadores y umbrales o normas específicas:

- Tener una intensidad de CO2 que no pertenezca al último decil en comparación con otras empresas de su sector (solo se aplica a sectores de alta intensidad), y
- Tener una diversidad en el Consejo de Administración que no pertenezca al último decil en comparación con otras empresas de su sector, y
- Estar libre de toda controversia en relación con las condiciones de trabajo y los derechos humanos.
- Estar libre de toda controversia en relación con la biodiversidad y la contaminación

Amundi ya contempla las Principales Incidencias Adversas específicas dentro de su política de exclusión en el marco de su Política de Inversión Responsable. Estas exclusiones, que se aplican además de las pruebas detalladas anteriormente, abarcan los siguientes temas: exclusiones sobre armas controvertidas, Vulneraciones de los principios del Pacto Mundial de la ONU, carbón y tabaco.

- ***¿Estaban las inversiones sostenibles alineadas con las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos? Detalles:***

Sí, las Líneas Directrices de la OCDE para Empresas Multinacionales y los Principios Rectores de Naciones Unidas sobre Empresas y Derechos Humanos están integrados en nuestra metodología de puntuación ESG. Nuestra herramienta de calificación ESG propia evalúa a los emisores utilizando los datos disponibles de nuestros proveedores de datos. Por ejemplo, el

modelo cuenta con un criterio específico denominado "Participación en la comunidad y derechos humanos", que se aplica a todos los sectores, además de otros criterios relacionados con los derechos humanos, como las cadenas de suministro socialmente responsables, las condiciones de trabajo y las relaciones laborales. Además, realizamos un seguimiento de las controversias, como mínimo trimestralmente, que incluye a las empresas identificadas por vulneraciones de los derechos humanos. Cuando surgen controversias, los analistas evalúan la situación y aplican una puntuación a la controversia (utilizando nuestra metodología de puntuación interna) y determinan el mejor curso de acción. Las puntuaciones de controversia se actualizan trimestralmente para realizar un seguimiento de la tendencia y de los esfuerzos de corrección.

*La Taxonomía de la UE establece un principio de "no causar perjuicio significativo", por el cual las inversiones alineadas con la Taxonomía no deben perjudicar significativamente los objetivos de la Taxonomía de la UE y va acompañado de criterios comunitarios específicos.*

El principio de "no causar perjuicio significativo" solo se aplica a las inversiones subyacentes del producto financiero que tienen en cuenta los criterios de la UE sobre actividades económicas sostenibles desde el punto de vista medioambiental. Las inversiones subyacentes a la parte restante de este producto financiero no tienen en cuenta los criterios de la UE para las actividades económicas sostenibles desde el punto de vista medioambiental.

*Cualquier otra inversión sostenible tampoco debe causar perjuicio significativo a ningún objetivo medioambiental o social.*

### ¿Cómo tuvo en cuenta este producto financiero las principales incidencias adversas sobre los factores de sostenibilidad?

El producto tiene en cuenta todas las Principales Incidencias Adversas obligatorias según el Anexo 1, Tabla 1 del Reglamento Delegado (UE) 2022/1288 que se aplica a la estrategia del producto y se basa en una combinación de políticas de exclusión (normativas y sectoriales), enfoques de implicación y voto:

- **Exclusión:** Amundi ha definido reglas de exclusión normativas, basadas en la actividad y sectoriales que abarcan algunos de los principales indicadores adversos de sostenibilidad enumerados por el Reglamento de Divulgación.
- **Integración de factores ESG:** Amundi ha adoptado normas mínimas de integración ESG aplicadas por defecto a sus fondos de capital variable y gestión activa (exclusión de emisores con calificación G y mejor puntuación media ponderada ESG superior a la del índice de referencia aplicable). Los 38 criterios utilizados en el enfoque de calificación ESG de Amundi también se diseñaron para tener en cuenta las principales incidencias en los factores de sostenibilidad, así como la calidad de la mitigación realizada, que también se tienen en cuenta a ese respecto.
- **Compromiso:** La interacción es un proceso continuo y orientado a un fin, cuyo objetivo es influir en las actividades o el comportamiento de las empresas participadas. El objetivo de las actividades de interacción puede clasificarse en dos categorías: comprometer a un emisor a mejorar la forma en que integra la dimensión medioambiental y social, comprometer a un emisor a mejorar su impacto en cuestiones medioambientales, sociales y relacionadas con los derechos humanos u otras cuestiones de sostenibilidad que son importantes para la sociedad y la economía mundial.
- **Voto:** La política de voto de Amundi responde a su análisis integral de todas las cuestiones a largo plazo que pueden influir en la creación de valor, incluidas cuestiones ESG sustanciales. Si desea obtener más información, consulte la Política de Voto de Amundi.
- **Seguimiento de controversias:** Amundi ha desarrollado un sistema de seguimiento de controversias que se basa en tres proveedores de datos externos para realizar un seguimiento sistemático de las controversias y su nivel de gravedad. Este enfoque cuantitativo se enriquece después con una evaluación en profundidad de cada controversia grave, dirigida por analistas ESG y la revisión periódica de su evolución. Este enfoque se aplica a todos los fondos de Amundi.

Si desea más información sobre cómo se tienen en cuenta los indicadores obligatorios de Principales Incidencias Adversas, consulte la Declaración de divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros de Amundi, disponible en [www.amundi.com](http://www.amundi.com).

### ¿Cuáles fueron las principales inversiones de este producto financiero?

La lista incluye las inversiones que constituyen el **mayor porcentaje de las inversiones** del producto financiero durante el periodo de referencia que es: **Del 01/07/2023 al 30/06/2024**

| Mayores inversiones                 | Sector     | Subsector                     | País           | % de activos |
|-------------------------------------|------------|-------------------------------|----------------|--------------|
| DAT 03/07/24<br>BRED USD F 5.32     | Otros      | Otros                         | Francia        | 7.14%        |

### ¿Cuál era el porcentaje de inversiones relacionadas con la sostenibilidad?

- ¿Cuál era la asignación de activos?

La asignación de activos describe la cuota de inversiones en activos específicos.

**N.º 1 Alineación con características E/S** incluye las inversiones del producto financiero utilizadas para alcanzar las características medioambientales o sociales promovidas por el producto financiero.

**N.º 2 Otros** incluye el resto de inversiones del producto financiero que no están alineadas con las características medioambientales o sociales, ni están calificadas como inversiones sostenibles.

La categoría **N.º 1 Alineado con las características E/S** abarca:

- La subcategoría **N.º 1A Sostenible** abarca las inversiones sostenibles desde el punto de vista medioambiental y social.

- La subcategoría **N.º 1B Otras características E/S** abarca las inversiones alineadas con las características medioambientales o sociales que no se califican como inversiones sostenibles.

● ¿En qué sectores económicos se realizaron las inversiones?

| Sector   | Subsector                     | % de activos |
|----------|-------------------------------|--------------|
| Empresas | Banca                         | 51.90%       |
| Otros    | Otros                         | 15.05%       |
| Empresas | Comunicación                  | 7.70%        |
| Empresas | Electricidad                  | 5.13%        |
| Empresas | Consumo discrecional          | 4.07%        |
| Finanzas | Fondos de inversión colectiva | 3.00%        |

|                       |                             |              |
|-----------------------|-----------------------------|--------------|
| <i>Empresas</i>       | <i>Tecnología</i>           | <i>1.67%</i> |
| <i>Empresas</i>       | <i>Consumo básico</i>       | <i>1.66%</i> |
| <i>Titulizado</i>     | <i>Activos hipotecarios</i> | <i>1.17%</i> |
| <i>Empresas</i>       | <i>Bienes de equipo</i>     | <i>0.96%</i> |
| <i>Empresas</i>       | <i>Gas natural</i>          | <i>0.71%</i> |
| <i>Empresas</i>       | <i>Seguros</i>              | <i>0.71%</i> |
| <i>Sector público</i> | <i>Agencias</i>             | <i>0.70%</i> |
| <i>Efectivo</i>       | <i>Efectivo</i>             | <i>7.96%</i> |

Para estar alineados con la Taxonomía de la UE, los criterios para el **gas fósil** incluyen limitaciones de emisiones y cambio a energías totalmente renovables o combustibles con bajas emisiones de carbono para finales de 2035. En el caso de la **energía nuclear**, los criterios incluyen normas exhaustivas de seguridad y gestión de residuos

**Las actividades habilitadoras** permiten directamente que otras actividades contribuyan de forma sustancial a un objetivo medioambiental.

**Las actividades de transición** son actividades para las que aún no se dispone de alternativas con bajas emisiones de carbono y, entre otros,

### ¿En qué medida las inversiones sostenibles con un objetivo medioambiental estaban alineadas con la Taxonomía de la UE?

El fondo promueve características tanto medioambientales como sociales. Aunque el fondo no se comprometió a realizar inversiones alineadas con la Taxonomía de la UE, durante el periodo contable el fondo invirtió un 0.39% en inversiones sostenibles alineadas con la Taxonomía de la UE. Estas inversiones contribuyeron a la obligación de lucha contra el cambio climático o a los objetivos de mitigación del cambio climático de la Taxonomía de la UE.

La alineación de las empresas participadas con los objetivos de la Taxonomía de la UE antes mencionados se cuantifica utilizando datos sobre el volumen de negocio (o los ingresos) y/o el uso del producto obtenido de bonos verdes.

El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

### ● ¿Invirtió el producto financiero en actividades relacionadas con el gas fósil y/o la energía nuclear que se ajustaban a la Taxonomía de la UE?

☐

Sí:

☐

En gas fósil

☐

En energía nuclear

☒

No

Durante el periodo no se dispuso de datos fiables sobre la alineación con la Taxonomía de la UE del gas fósil y la energía nuclear.

<sup>1</sup>Las actividades relacionadas con el gas fósil y/o la energía nuclear solo se ajustarán a la Taxonomía de la UE cuando contribuyan a limitar el cambio climático ("mitigación del cambio climático") y no causen un perjuicio significativo a ningún objetivo de la Taxonomía de la UE. Los criterios completos para las actividades económicas de gases fósiles y la energía nuclear que se ajustan a la Taxonomía de la UE se establecen en el Reglamento Delegado (UE) 2022/1214 de la Comisión.

tienen niveles de emisión de gases de efecto invernadero correspondientes al mejor rendimiento.

Las actividades alineadas con la Taxonomía se expresan como porcentaje de: -el volumen de negocio que refleja la proporción de ingresos procedentes de actividades ecológicas de las empresas participadas

-las inversiones en inmovilizado (CapEx) que muestran las inversiones ecológicas realizadas por las empresas participadas, por ejemplo, para la transición a una economía verde - los gastos de explotación (OpEx) que reflejan las actividades operativas ecológicas de las empresas participadas

Los gráficos siguientes muestran en verde el porcentaje de inversiones que estaban alineadas con la Taxonomía de la UE. Como no existe una metodología adecuada para determinar la alineación con la Taxonomía de la deuda pública\*, el primer gráfico muestra la alineación con la Taxonomía en relación con todas las inversiones del producto financiero, incluida la deuda pública, mientras que el segundo gráfico muestra la alineación con la Taxonomía solo en relación con las inversiones del producto financiero distintas de la deuda pública.

\* A efectos de estos gráficos, la "deuda pública" abarca todas las exposiciones a deuda pública

#### ● ¿Cuál era el porcentaje de inversiones en actividades de transición y habilitadoras?

A 30/06/2024, utilizando como indicador el volumen de negocio y/o los datos sobre el uso del producto obtenido de bonos verdes, la cuota de inversión del fondo en actividades de transición era del 0.00% y la cuota de inversión en actividades habilitadoras era del 0.22%. El porcentaje declarado de alineación de las inversiones del fondo con la Taxonomía de la UE no ha sido auditado por los auditores del fondo ni por terceros.

#### ● ¿Cómo era el porcentaje de inversiones alineadas con la Taxonomía de la UE respecto de los periodos de referencia anteriores?

Al cierre del periodo anterior, el porcentaje de inversiones alineadas con la Taxonomía de la UE era del 2.34%.

son inversiones sostenibles con un objetivo medioambiental que no tienen en cuenta los criterios de las actividades económicas sostenibles desde el punto de vista medioambiental en virtud del Reglamento (UE) 2020/852.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles con un objetivo medioambiental no alineadas con la Taxonomía de la UE?

La cuota de inversiones sostenibles con un objetivo medioambiental no alineado con la Taxonomía fue del **48.33%** al cierre del periodo.

Esto se debe al hecho de que algunos emisores se consideran inversiones sostenibles con arreglo al Reglamento sobre la divulgación de información relativa a la sostenibilidad en el sector de los servicios financieros (SFDR), pero presentan una parte de actividades que no se ajustan a las normas de la Taxonomía de la UE, o para las que aún no se dispone de datos con vistas a realizar una evaluación conforme a la Taxonomía de la UE.

#### ● ¿Cuál era el porcentaje de inversiones sostenibles desde el punto de vista social?

El porcentaje de inversiones sostenibles desde el punto de vista social al cierre del periodo era del 2.45%.

## ¿Qué inversiones se incluían en "otros", cuál era su finalidad y existían salvaguardias medioambientales o sociales mínimas?

El apartado "N.º 2 Otros" incluye el efectivo y otros instrumentos mantenidos con fines de liquidez y gestión del riesgo de la cartera. En el caso de los bonos y acciones sin calificación, se aplican unas salvaguardias medioambientales y sociales mínimas a través de un cribado de controversias respecto de los Principios del Pacto Mundial de Naciones Unidas. También puede incluir valores sin calificación ESG para los que no se disponga de los datos necesarios para cuantificar de la consecución de las características medioambientales o sociales.

## ¿Qué medidas se han tomado para alcanzar las características medioambientales y/o sociales durante el periodo de referencia?

Los indicadores de sostenibilidad están continuamente disponibles en el sistema de gestión de carteras, lo que permite a los gestores de carteras evaluar el impacto de sus decisiones de inversión.

Estos indicadores se integran en el marco de control de AMUNDI, repartiéndose las responsabilidades entre el primer nivel de controles, realizado por los propios equipos de Inversión, y el segundo nivel de controles, realizado por los equipos de Riesgos, que supervisan de forma continua el cumplimiento de las características medioambientales o sociales promovidas por el fondo.

Además, la Política de Inversión Responsable de AMUNDI establece un enfoque activo de interacción que promueve el diálogo con las empresas participadas, incluidas las que forman parte de la cartera de este producto. Nuestro Informe Anual de Interacción, disponible en <https://about.amundi.com/esg-documentation>, ofrece información detallada sobre esta iniciativa y sus resultados.
