What is this product?

Type

ICAV

Term

This product has no specific maturity date. In certain circumstances, as described in the Fund prospectus, the Sub-Fund may be unilaterally terminated following written notice to unitholders subject to compliance with the Fund prospectus and applicable regulation.

Objectives

The investment objective of the Fund is to achieve long-term capital growth, through investment in Collective Investment Schemes, transferable securities in the form of equities and bonds which are listed or traded on a Recognised Market, cash or highly liquid securities consisting of certificates of deposits, and government and public securities with a maturity of less than one year. There can be no assurance that the Fund will achieve its investment objective.

The Fund will pursue its objective through a policy of investing directly in a diversified portfolio of open-ended Collective Investment Schemes, which primarily consist of exchange traded funds ("ETFs"), which will be strategically held for the medium to long term and produce income. Accordingly, the Fund may invest up to 100% of its assets in units or shares of other Collective Investment Schemes. The investments in open-ended Collective Investment Schemes will seek to achieve global exposure predominantly to equities and bonds but also to eligible property and/or commodities. The Fund shall not invest directly in commodities or property.

In addition to investing in Collective Investment Schemes, the Fund may invest up to a maximum of 30% of the Net Asset Value of the Fund in equity securities of companies listed or traded on a Recognised Market and in fixed and floating rate G7 government bonds.

The Base Currency of the Fund is UK Sterling (GBP); however, the Fund will contain investments in various global currencies. The returns on the Fund will be driven primarily by the chosen asset classes, sectors, the selection of individual underlying securities, and the currency of those securities. The Fund is not constrained by any index weightings and does not concentrate on any particular country or geographic region.

The Fund is actively managed meaning the Investment Manager uses their expertise to select investments to achieve the Fund's objectives.

For full investment objective and policy information please refer to the Fund Supplement.

Intended Retail Investor

The New Horizon Global Balanced Fund is appropriate for Retail Investors, Basic, Informed and Advanced. The Fund is appropriate for investors who are seeking long-term returns. The Fund may not be appropriate for investors that plan to withdraw their money within 5 years. Investors should be aware that 100% of their capital is at risk and investment is not appropriate for investors who seek a capital guarantee or can bear no capital loss including minor losses. The Fund is not designed to preserve or limit capital loss.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the PRIIPs manufacturer to pay you.

Due to effects of unusual market conditions, other risks could be triggered, such as: Equity investment risk, liquidity risk, currency risk, credit & fixed income risk and concentration risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Be aware of currency risk. The currency of this product may be different from that of your country. As you may receive payments in the currency of this product and not that of your country, the final return you will get will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator: performance of this product might be negatively impacted by equity risk, trading risks, portfolio volatility, market risk, market disruptions, lack of control and reliance of the sub-investment manager, risks specific to the investment universe of the fund, sustainability risks and conflicts of interest.

Performance Scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the product/its proxy between October 2017 and October 2022.

The moderate scenario occurred for an investment between October 2019 and October 2024.

The favourable scenario occurred for an investment in the product/its proxy between January 2016 and January 2021.

Recommended holding period: 5 years

Example Investment: GBP 10'000.

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	5'000 GBP -50.01 %	5'160 GBP -12.39 %
Unfavourable	What you might get back after costs Average return each year	8'860 GBP -11.41 %	10'000 GBP -0.01 %
Moderate	What you might get back after costs Average return each year	10'340 GBP 3.43 %	11'450 GBP 2.75 %
Favourable	What you might get back after costs Average return each year	12'210 GBP 22.14 %	13'840 GBP 6.71 %

What happens if Gateway Fund Services Limited is unable to pay out?

There is no investor compensation or guarantee scheme in the case of default of the Management Company or the Depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- GBP 10'000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	144 GBP	847 GBP
Annual cost impact (*)	1.4%	1.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.2% before costs and 2.7% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee	0 GBP
Exit costs	We do not charge an exit fee	0 GBP

Ongoing costs [taken each year]

Management fees and other administrative or operating costs	The aggregate fees and expenses payable out of the assets of the Fund will not exceed 1.43% of the value of your investment per year.	143 GBP
Transaction costs	0.01% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	1 GBP

Incidental costs taken under specific conditions

Performance fees	There is no performance fee for this product.	0 GBP

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The recommended holding period (RHP) has been calculated in line with the investment strategy of the Sub-Fund and the timeframe in which it is expected that it will be possible to achieve the investment objective of the Sub-Fund. The investor has the right to totally or partially redeem the contract on any valuation day, collecting the redemption value calculated based on the value of the shares of the Sub-Fund on the date the request is received by the Manager, without any redemption fee being applied. We recommend that you hold the investment at least until the end of the recommended holding period in order to fulfil the objectives of this product. This product may not be suitable for investors who plan to redeem their contract before the end of the recommended holding period. The product does not provide any guarantee of return on the expiration of the recommended time horizon, and any redemption before that date may compromise the investment performance. Please refer to the Prospectus for further details.

How can I complain?

Should you wish to complain about the product, the conduct of Gateway Fund Services Limited or the person advising on or selling the product, you can write to Gateway Fund Services Limited at our Registered Office, 56 Fitzwilliam Square, Dublin 2, Ireland, D02 X224 or submit your complaint via email to gateway@gfsmanco.com. Further information is available on the Manager's website www.gatewayfundservices.com
