What is this product?

Type

The Fund is a sub-fund of the Company, a UCITS authorised by the Central Bank, and this KID describes the share class above and the Fund.

Term

The Fund has no fixed maturity date, however it may be terminated in certain circumstances described in the Prospectus, including if the Net Asset Value ("NAV") of the Fund falls below US\$50 million. This share class may be terminated where its NAV falls below US\$10 million.

Objectives

Investment Objective

The Fund aims to generate capital growth over the medium to long term by providing exposure to a range of assets. The Fund aims to target a stable level of volatility regardless of market conditions by allocating all or substantially all of its assets in accordance with a quantitative investment approach. This approach uses computerised processes to identify investment opportunities. The Fund may, directly and indirectly, invest over 20% of its net asset value in emerging markets.

Investment Policy

The Fund's exposure to different investments is determined by its computer-based model using various techniques, including 'volatility scaling'. This technique involves reducing the Fund's exposure to a market when returns are volatile and increasing exposure when the market is calm.

The Fund has set an annualised volatility target of 10% of Net Asset Value.

The Fund may also use money market instruments and cash, currencies, government debt instruments and other liquid assets for cash management purposes.

The Fund may invest in financial derivative instruments (ie instruments whose prices are dependent on one or more underlying asset, "FDI"), stocks and bonds. Stocks will be listed and may be issued globally and across all industrial sectors and market capitalisations. Debt instruments may be issued by any government or company.

The Fund may actively use FDI to achieve the investment objective, for hedging against anticipated movements in a market or a security, or where it is more economically effective than directly holding the underlying asset, and to gain exposure to commodities indices.

The Fund may also use FDI to gain exposure to the Bloomberg Commodity Ex-Agriculture and Livestock Capped Index, which is a benchmark for commodities investments, such as precious and industrial metals and oil but excluding agriculture and livestock.

The Fund may retain a significant proportion of its portfolio in cash and/or liquid assets.

The Fund may use currency related transactions to alter its foreign currency exposures.

The extensive use of FDI, and the fact that FDI may only require a small upfront payment, may mean the Fund is consistently required to hold a substantial portion of its assets in bank deposits and other money market securities.

Benchmarks. The Fund is actively managed. The Fund does not intend to track the 60%/40% Composite Index (60% MSCI World Net Total Return Hedged, 40% Bloomberg Global Aggregate Bond Index Hedged) and is not constrained by it, it is included here for performance comparison purposes only. The Fund may not hold all or any of the benchmark components.

Share Class Policy

Any income earned on investments will be added to the value of investors' shares.

The Fund's reference currency is USD. This share class is denominated in EUR. The Fund will use financial derivatives to the extent reasonably possible with the aim of protecting investors against USD / EUR currency fluctuations.

Processing of subscription and redemption orders

Investors can buy and sell their shares on each Dealing Day of the Fund.

Intended retail investor

This Fund is suitable for all types of retail investors that can accept a risk of investment losses of up to but not more than the amount originally invested. Potential investors need not have prior financial markets experience or knowledge to invest in this fund, although potential investors may wish to seek independent financial advice prior to investing in the Fund if unsure. Potential investors should be able to hold this investment for at least 3 years and should ensure that they are happy to accept the risk level indicated by the provided SRI measure.

Depositary

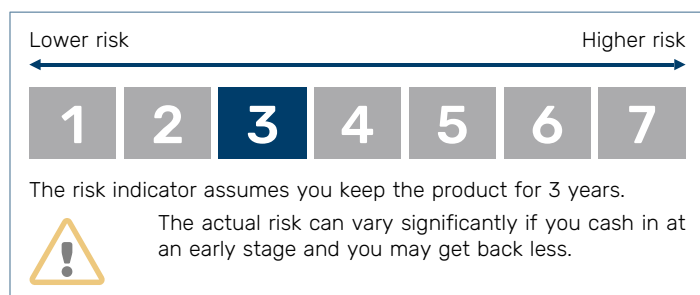

The Depositary of the Company is The Bank of New York Mellon SA/NV, Dublin Branch.

Further information

Additional information related to the Fund is located in the Prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The Prospectus is available together with the most recent financial statements, information on other share classes and the latest share prices free of charge at <https://www.man.com/>. The periodic reports are prepared in respect of the Company. The Company is established as an umbrella fund with segregated liability between sub-funds under Irish law. The shares may be exchanged for shares in another sub-fund in accordance with the Prospectus.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the benchmark as stated in the prospectus over the last 10 years. Markets could develop very differently in the future.

Recommended holding period		3 years	
Example Investment		10,000 EUR	
Scenarios		if you exit after 1 year	if you exit after 3 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	5,980 EUR -40.2%	6,700 EUR -12.5%
Unfavourable	What you might get back after costs Average return each year	8,080 EUR -19.2%	9,360 EUR -2.2%
Moderate	What you might get back after costs Average return each year	10,680 EUR 6.8%	11,870 EUR 5.9%
Favourable	What you might get back after costs Average return each year	12,390 EUR 23.9%	14,390 EUR 12.9%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 31 December 2021 and 31 December 2024.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Fund to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please read the Fund's Annual Report or Prospectus available at <https://www.man.com/documents>.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Moderate scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 30 October 2015 and 31 October 2018.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between 31 December 2018 and 31 December 2021.

What happens if Man Asset Management (Ireland) Limited is unable to pay out?

The assets of the Fund are held in safekeeping by its depositary. In the event of the insolvency of the PRIIPs Manufacturer, the Fund's assets in the safekeeping of the Depositary will not be affected. However, in the event of the Depositary's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary will also be liable to the Fund and the investors for any loss arising from, among other things, its negligence, fraud or intentional failure properly to fulfil its obligations (subject to certain limitations). If the Fund is not able to pay out what you are owed, you are not covered by any investor compensation or guarantee scheme and you may face financial loss. There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	196 EUR	664 EUR
Annual cost impact*	2.0%	2.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.0% before costs and 5.9% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	We do not charge an entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.69% of the value of your investment per year. This is an estimate based on actual costs over the last year.	169 EUR
Transaction costs	0.27% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	27 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

This product has no required minimum holding period but is designed for medium term investment; you should have an investment horizon of at least 3 years. You may buy or sell shares in the product, without penalty, on any normal business day by submitting a subscription or redemption request in the manner set out in the Prospectus. Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares. If you cash in at an early stage this will increase the risk of lower investment returns or a loss.
