				nt were the e duct met?	environmental	and/d	or social	charac	teristics promoted by this

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and/or social characteristics promoted by the Fund were met by targeting and investing in companies with positive overall ESG quality.

To assist in selecting companies with positive overall ESG quality, the Investment Manager performed an ESG review of the market to identify and exclude companies with the poorest ESG credentials from the Fund's investable market. This resulted in a reduction of the investable market by at least 20%. The ESG review was applied to at least 90% of the Fund's investee companies.

In addition, throughout the period, the Investment Manager also applied an exclusion policy to exclude investment in companies with negative social and environmental characteristics as set out in the Fund's pre-contractual disclosures.

In respect of sustainable investment held by the Fund, please find below the list of environmental objectives (set out in Article 9 of Regulation (EU) 202/852) and the list of social objectives to which the Fund's sustainable investments contributed:

1. Environmental objectives:

The Fund invested in sustainable investments that contributed to the environmental objective of climate change mitigation.

2. Social objectives:

The Fund invested in sustainable investments with a social objective that contributed to the objective of the promotion of adequate living standards and wellbeing for end users.

How did the sustainability indicators perform?

As at end December 2024, the Fund had attained the environmental and social characteristics promoted, including:

- (i) at least 90% of the Fund's investee companies had an ESG score in the top 80% of companies rated by the Investment Manager;
- (ii) none of the Fund's investee companies were engaged in excluded activities; and
- (iii) 21.17% of assets qualified, in the opinion of the Investment Manager, as sustainable investments.

...and compared to previous periods?

N/A. The Fund did not qualify as a financial product referred to in Article 8 of Regulation (EU) 2019/2088 in prior periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund invested 21.17% of its assets in sustainable investments which contributed to the environmental objectives and social objectives listed above.

Description of how the sustainable investments contributed to the sustainable investment objective

The sustainable investments' contribution to the environmental and/or social objectives listed above was measured by the Investment Manager using proprietary analysis.¹

¹ The methodology for qualifying investee companies as sustainable investments changed with effect from the Fund prospectus update on 4 June 2024. The percentage reported for 31 December 2024 reports against the updated methodology.

For the social objectives:

- **at least 25%** of the investee company's revenue is generated from business activities which contribute to one or more of the United Nations' Sustainable Development Goals (SDGs number 1, 2, 3, 4, 6, 7, 8, 9, 11 and 12).

For the environmental objectives:

- at least 5% of the investee company's revenue is reported to be from Taxonomy-aligned activities ('Taxonomy-aligned Revenue') or is estimated, using the Taxonomy's substantial contribution criteria, to be from activities which substantially contribute to an environmental objective under the Taxonomy ('Substantial Contribution Revenue'); or
- at least 10% of the investee company's CapEx is reported to be in Taxonomy-aligned activities or is estimated, using the Taxonomy's substantial contribution criteria, to be in activities which substantially contribute to an environmental objective under the Taxonomy ('Substantial Contribution CapEx'); or
- the percentage of Taxonomy-aligned CapEx divided by the percentage of Taxonomy-aligned Revenue, or Substantial Contribution CapEx divided by the percentage of Substantial Contribution Revenue, is greater than 1; or
- the investee company has its near-term climate targets approved by the Science Based Targets initiative (SBTi).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

An assessment was performed to ensure that investments identified as contributing to one or more of the above environmental and/or social objectives did not significantly harm any of those objectives. This was done by assessing and monitoring the 14 mandatory principal adverse impact indicators and relevant optional indicators referenced in Annex 1 of the SFDR Delegated Regulation (EU 2022/1288) and by seeking to ensure that such investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

How were the indicators for adverse impacts on sustainability factors taken into account?

The 14 mandatory principal adverse impact indicators and relevant optional indicators have been reviewed by the Investment Manager as part of its ESG assessment for sustainable investments. The Investment Manager used external data where available and also relied on a qualitative assessment using information directly from the company or its own research where quantitative data was not available.

The assessment performed by the Investment Manager focused on those PAIs which are material, depending on the sector in which investee companies operate. For investee companies that operate in sectors that have a limited impact on one or several PAI indicators, a brief conclusion was provided, to explain that there is no significant harm against those indicators given the sector the companies operate in. For PAIs that were material to the sectors investee companies operate in, a detailed assessment was performed to determine if the companies do significant harm. In the absence of specific data on the relevant PAI, other factors were used to assess significant harm (e.g. in the absence of data on hazardous waste, the Investment Manager assessed if a company operates in a biodiversity sensitive area and if it is linked to a controversy).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager also assessed companies' alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights ('Guidelines and Principles') by monitoring any reported violations of global norms (this assessment is covered by PAI 10) and assessing whether the investee companies have put in place processes and compliance mechanisms to help meet the Guidelines and Principles (this assessment is covered by PAI 11).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts ("PAI") on sustainability factors by assessing and monitoring the 14 mandatory principal adverse impact indicators (PAIs) referenced in Annex 1 of the delegated regulation (EU) 2022/1288. The Investment Manager used external data where available and relied on information directly from the company or its own research and knowledge of the relevant industry or sector to assess the 14 mandatory principal adverse impacts.

The Investment Manager has reviewed and considered the 14 mandatory PAI indicators, identifying specific issues for several of them:

- PAIs 1 to 6 "Greenhouse Gas Emissions": The main emitters in the portfolio are companies operating in high-emission sectors, where emissions are inherent to their activities. The Investment Manager has maintained close dialogue with some of these companies for several years and has observed their progress in climate-related practices and disclosures.
- PAIs 7 "Biodiversity", 8 "Water", and 9 "Waste": The main challenge lies in the quality and coverage of data. The Investment Manager will continue to engage with its data provider as well as with portfolio companies to improve transparency and the quality of reporting. Regarding PAI 7, the Investment Manager has conducted engagement activities with the one main contributor.
- PAI 11 "Lack of processes and compliance mechanisms to monitor adherence to the UN Global Compact principles and the OECD Guidelines for Multinational Enterprises": Although most covered companies are not facing major controversies related to the UN Global Compact (UNGC) principles and OECD guidelines, companies in China similar to other emerging markets more generally lack policies, processes, or mechanisms to ensure effective monitoring. The Investment Manager will continue internal discussions on the approach to adopt and will engage in dialogue with portfolio companies to encourage them to implement appropriate monitoring mechanisms.
- PAI 13 "Board gender diversity": The analysis revealed that the Fund holds three portfolio companies whose boards of directors include no women. During engagement with portfolio companies, the Investment Manager will address more diversity and inclusion topics and encourage companies to appoint more women directors to their boards.

Following the review of the PAIs, the Investment Manager will continue to monitor them and undertake engagement actions when deemed appropriate.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is:

Largest investments	Sector	% of	Country
		assets	
Tencent Holdings Ltd.	Communication Services	9.20	China
Trip.com Group Ltd.	Consumer Discretionary	6.08	China
ANTA Sports Products Ltd.	Consumer Discretionary	5.45	China
Inner Mongolia Yili Industrial Group Co., Ltd. Class A	Consumer Staples	5.01	China
Ping An Insurance (Group)	Financials	4.66	China
Alibaba Group Holding Limited	Consumer Discretionary	4.61	China
Netease Inc	Communication Services	4.37	China
Midea Group Co. Ltd. Class A	Consumer Discretionary	4.29	China
Suofeiya Home Collection Co. Ltd Class A	Consumer Discretionary	4.26	China
Man Wah Holdings Limited	Consumer Discretionary	4.05	Hong Kong

The top investments represent the greatest proportion of investments over the course of the period covered, calculated at appropriate intervals to be representative of that period.

What was the proportion of sustainability-related investments?

The proportion of sustainable investment was 21.17% and included 4.95%% of sustainable investments with a social objective and 16.21% of sustainable investment with an environmental objective. Please see below the breakdown:

Breakdown of the proportion of the sustainable investments per each of environmental objectives set out in Article 9 of Regulation (EU) 2020/852 to which those investments contributed				
Environmental objective % of assets				
Climate change mitigation	16.21%			

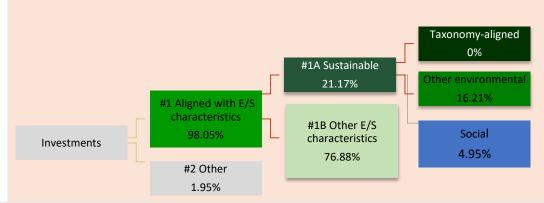

Breakdown of the proportion of the sustainable investments per each of social objectives to which those investments contributed					
Social objective % of assets					
Promotion of adequate living standards and wellbeing for end 4.95%					
users					

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at end of December 2024, 98.05% of the assets of the financial product were used to meet the environmental and social characteristics promoted. This included 21.17% of sustainable investments. 1.95% of assets were not aligned with the environmental or social characteristics.

The Fund was primarily invested in direct holdings of listed equities. 100% of the investments in listed equities were aligned with the environmental and/or social characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Several actions were taken to meet the environmental and/or social characteristics during the reference period.

Engagement activities:

Maintaining an active relationship with investee companies is a key element of the Investment Manager's investment process.

In 2024, 12 engagement activities were carried out with 8 companies in the Fund to encourage best practices with regard to ESG topics, including working toward mitigating any adverse impacts identified. 25% of the engagement activities were related to Environmental topics, 8% to Social topics, 25% to Governance topics and 42% to combined ESG topics.

Voting activities:

The Investment Manager exercises its right to vote at shareholder meetings in accordance with corporate governance values and voting principles that have been determined by the Investment Manager with reference to regulations, industry standards and best practice. The Investment Manager's objective is to vote systematically at all shareholder meetings when it is technically possible to do so.
