Report of the Board of Directors of the Company to the shareholders

For the six months ended 30 June 2026

The following pages contain the financial report for the six months ended 30 June 2026 for the 33 funds that comprise Capital International Fund (CIF).

CIF is an open-ended investment company established in Luxembourg as a société d'investissement à capital variable (SICAV). Its assets are held in different funds. Each fund holds a separate portfolio of securities and other assets managed in accordance with specific investment objectives[1].

Global equities delivered strong gains in the first half of 2026 driven by an extraordinary surge in artificial intelligence-related semiconductor stocks and resilient corporate earnings across most major markets. Emerging markets powered the headline advance on the back of AI-driven memory chip demand.

US stocks delivered strong gains boosted primarily by persistent demand for AI infrastructure, robust corporate earnings from semiconductor companies, and resilient economic growth. US economic growth picked up in the first quarter and the labour market showed resilience with unemployment steady at 4.3% in May. Inflation, however, continued to accelerate. Technology stocks drove returns as the S&P Index increased 15.2%.

European equities rose as progress toward a US-Iran diplomatic agreement cooled oil prices from their highs and eased concerns about energy supply disruptions. Better-than-expected corporate earnings helped sustain the rally with technology and industrial companies benefiting from continued investment in AI infrastructure.

Japanese equities climbed to record highs supported by solid corporate results, AI-related momentum, and a weaker yen that boosted export earnings. Elsewhere in Asia Pacific, Australian stocks advanced as strong business investment partly offset softness in consumer spending and exports. Hong Kong was one of the weakest major markets globally. China's retail sales contracted in May, the first decline since the pandemic, weighing heavily on Hong Kong-listed consumer names.

Emerging market equities notched exceptional gains driven by robust earnings from large semiconductor-related firms and progress in US-Iran ceasefire talks. South Korean and Taiwanese stocks led the rally delivering extraordinary returns on the back of AI-driven memory chip demand. Overall, the MSCI Emerging Markets Index surged 24%, recording its best half-year performance in 17 years and outpacing all major global indices.

Chinese stocks declined pressured by soft consumer spending, continued weakness in the housing market and geopolitical uncertainty weighing on foreign investor sentiment. Indian equities also fell as persistent foreign investor outflows, elevated valuations relative to peers and the impact of higher energy costs on domestic consumption weighed on markets.

Bond markets delivered modest returns over the period as investors balanced resilient economic activity against inflation pressures. The US Federal Reserve held interest rates broadly steady throughout the period, but a hawkish pivot under new Fed Chair Kevin Warsh sparked a sharp repricing of near-term rate expectations.

Results were mixed over the first six months of the year. Equity funds without significant exposure to the narrow, technology-led rally tended to lag their reference indices but still generated strong positive absolute returns. Several growth-oriented strategies generated strong relative and absolute returns. Fixed income funds focused on risk assets outpaced their indices, but results across other fixed income asset classes were either broadly inline or slightly behind the reference index. Results for balanced funds were solid with select funds producing particularly strong returns. A full breakdown of results can be found on pages 19 to 39.

There were no significant activities to report over the period.

Assets and cash flow
During the period, CIF's combined total net assets increased to €60.5 billion, up from €52.7 billion. Net subscriptions were €3.2 billion over the period. Changes in the total net assets for each fund are shown in the Statement of shares and net assets statistics table on pages 40 to 56.

The table on pages 19 to 39 gives an overview of the funds' results in their accounting currency. Results in other currencies can be found on our website, thecapitalgroup.com/international.

Thank you for your investment and we look forward to reporting to you again in our next annual report.

The Board of Directors of the Company

Capital International Fund

Luxembourg, 26 August 2026

(Returns in US dollars unless otherwise stated)

[1] Funds investment objectives are available in CIF Prospectus on CG website at capitalgroup.com/international.

Why do different share classes have different returns?

Each share class is designed to support the needs of different investor types and has a different total expense ratio that affects the investment returns for that share class. For example:

□ Class A4, A7, A9, A11, A13, A15 & C shares and their equivalent classes, where available, are only available to institutional investors who qualify for the reduced Luxembourg tax of 0.01% (rather than 0.05%).

□ Class B, BL, L, N, P, S, U1, Z and ZL shares and their equivalent classes, where available, are primarily designed for distribution to individual investors. The management fee for class B, N shares and their equivalent classes, where available, is higher than for the other share classes to allow for compensation to distributors and other intermediaries for day-to-day services to investors or similar services in relation to investments made with their assistance.

□ Class Y Shares and its equivalent classes are available only to Capital Group Investors, subject to conditions established from time to time by Capital Group, including the entering into of a separate agreement with respect to management fee and/or other fund expenses, which are not deducted from these Shares' Net Asset Value

□ The management fee for class C shares and its equivalent classes, where available, is charged to shareholders outside the fund by specific separate agreement. Actual returns to shareholders of class C and its equivalent classes, where available, will be lower than those published.

□ In addition, the returns of hedged equivalent classes and dividend distributing hedged equivalent classes are impacted by the passive currency-hedging overlay programme (see note 7 to the financial statements).

□ For those funds without a specified reference index, a suitable illustrative index is displayed for context.

[1] Returns are with net dividends reinvested for unhedged share classes. Lifetime returns that relate to a period of less than a year are not annualised.
[2] Launch date is the date as of which shares are first issued by a fund, and hence the date on which the fund or share class was first priced. Prior results back to the launch of the fund relate to the older share classes, adjusted where necessary to reflect the management fee of the recipient share class.
[3] Lifetime returns that relate to a period of less than a year are not annualised.
[4] Investment results are shown in the currency referred to in the relevant class's designation. Lifetime returns are from launch date to 30 June 2026.
[5] Shown for indicative purposes only. Please visit capitalgroup.com for the fund's index history.
[6] Capital Group Emerging Markets Growth Fund was launched on 31 May 1990 and merged into Capital International Fund - Capital Group Emerging Markets Growth Fund (LUX) on 28 June 2019. Effective 19 September 2025 the fund was renamed to Capital Group Emerging Markets Equity Fund (LUX).
[7] Effective 23 July 2026, Capital Group European Opportunities (LUX) will be liquidated.
[8] Capital International Portfolios - Capital Group Emerging Markets Total Opportunities (LUX) was launched on 01 February 2008 and merged into Capital International Fund - Capital Group Emerging Markets Total Opportunities (LUX) on 31 May 2019.
[9] Capital International Portfolios - Capital Group Emerging Markets Debt Fund (LUX) was launched on 24 July 2007 and merged into Capital International Fund - Capital Group Emerging Markets Debt Fund (LUX) on 31 May 2019.
[10] Capital International Portfolios - Capital Group Emerging Markets Local Currency Debt Fund (LUX) was launched on 10 August 2010 and merged into Capital International Fund - Capital Group Emerging Markets Local Currency Debt Fund (LUX) on 31 May 2019.

Past results are no indication of future results.

[1] Bank overdraft could be the result of fund accounting cash settlements that do not appear to be duly covered by an available cash balance.The fund is typically sufficiently covered with cash held in the JPMorgan Liquidity Funds and overdraft balances are the consequence of a delay of the accounting records to reflect a net positive cash and cash related holdings as at any given value date.

[2] Effective 23 July 2026, Capital Group European Opportunities (LUX) will be liquidated.

The accompanying notes form an integral part of these financial statements.

[1] Effective 23 July 2026, Capital Group European Opportunities (LUX) will be liquidated.

The accompanying notes form an integral part of these financial statements.

Notes to the financial statements

As at 30 June 2026

1) Capital International Fund (CIF)

a. Legal structure

CIF is an investment company (the "Company") organised as a Société d'Investissement à Capital Variable (SICAV) in the Grand Duchy of Luxembourg and is established as an Undertaking for Collective Investment in Transferable Securities (UCITS) under Part 1 of the amended law of 17 December 2010. CIF is a SICAV managed by a management company, namely Capital International Management Company, Sàrl (the "Management Company"), on 1 February 2013. CIF commenced operations on 30 December 1969.

b. Funds

CIF has adopted a multiple-compartment (or "umbrella") structure. CIF currently comprises the following funds (the "funds"):

Capital Group New Perspective Fund (LUX)
Capital Group Future Generations Global Opportunities Fund (LUX)
Capital Group Global Equity Fund (LUX)
Capital Group World Growth and Income (LUX)
Capital Group World Dividend Growers (LUX)
Capital Group New Economy Fund (LUX)
Capital Group New World Fund (LUX)
Capital Group Emerging Markets Equity Fund (LUX)
Capital Group Asian Horizon Fund (LUX)
Capital Group Japan Equity Fund (LUX)
Capital Group European Opportunities (LUX) (in liquidation)
Capital Group European Core Equity Fund (LUX)
Capital Group AMCAP Fund (LUX)
Capital Group Investment Company of America (LUX)
Capital Group Capital Income Builder (LUX)
Capital Group Global Allocation Fund (LUX)
Capital Group Future Generations Global Balanced Fund (LUX)
Capital Group Global New Perspective Fund (LUX)
Capital Group Global Screened Allocation Fund (LUX)
Capital Group American Balanced Fund (LUX)
Capital Group Emerging Markets Total Opportunities (LUX)
Capital Group Global Bond Fund (LUX)
Capital Group Global Intermediate Bond Fund (LUX)
Capital Group Global Total Return Bond Fund (LUX)
Capital Group Euro Bond Fund (LUX)
Capital Group Global Corporate Bond Fund (LUX)
Capital Group Future Generations Global Corporate Bond Fund (LUX)
Capital Group US Corporate Bond Fund (LUX)
Capital Group Global High Income Opportunities (LUX)
Capital Group Multi-Sector Income Fund (LUX)
Capital Group US High Yield Fund (LUX)
Capital Group Emerging Markets Debt Fund (LUX)
Capital Group Emerging Markets Local Currency Debt Fund (LUX)

1) Capital International Fund (CIF) (continued)

c. Share classes and currencies

Shares of each fund may be divided into class A4, A7, A9, A11, A13, A15, B, BL, C, L, N, P, S, U1, Y, Z and ZL shares. In addition, some classes of some funds may be further broken down into equivalent classes.

The funds publish net asset values (NAVs) and offer dealing and reporting in various payment currencies, except hedged equivalent and dividend-distributing hedged equivalent classes for which the funds publish NAVs and offer dealing in the currency referred to in the relevant class's designation only. A detailed list of all active share classes as at 30 June 2026 is disclosed on pages 19 to 39. Furthermore, the list of all active share classes, available payment currencies and other details can be found online on the Management Company's webpage at capitalgroup.com/international.

The reporting currency in which the combined financial statements accounts are prepared is Euro. This currency may be different from the reporting currency of each CIF funds which are expressed in Euro, US dollars or Yen.

The combined statement of net assets and the combined statement of operations and changes in net assets are the sum of the statement of net assets, the statement of operations and changes in net assets of each fund converted into the Company's reporting currency using an exchange rate as at 30 June 2026.

d. Dividend Policy

Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class B, Class BL, Class C, Class L, Class N, Class P, Class S, Class Y, Class U1, Class Z, Class ZL and corresponding Hedged Equivalent Classes

Non-dividend distributing Equivalent Classes and corresponding Hedged Equivalent Classes

It is not at present intended that dividends be distributed to Shareholders of Class A4, Class A7, Class A9, Class A11, Class A13, Class A15, Class B, Class BL, Class C, Class L, Class N, Class P, Class S, Class Y, Class Z, Class ZL and corresponding Hedged Equivalent Classes in any fund.

Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes

- **Principle and amount:** The Board of Directors of the Company intends to recommend that dividends be distributed to Shareholders of all Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes.

  Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a "d": The dividend will generally represent all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, net investment income.

  Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a "gd": The dividend will generally represent a substantial part of the gross investment income (i.e., investment income net of withholding taxes but gross of expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, gross investment income. The payment of dividends out of gross investment income implies that all or part of the fees and expenses are charged to capital (i.e. accumulated capital gains or initial investment).

  Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with an "ad": This Class is available only to Capital Group investors, subject to conditions established from time to time by Capital Group. The dividend will generally represent all of the net investment income (i.e., investment income net of withholding taxes and expenses) of such Classes. A given Class may not actually pay a dividend in any given accounting period if it has no, or insignificant, net income.

1) Capital International Fund (CIF) (continued)

d. Dividend Policy (continued)

Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a "fd": The dividend will generally be fixed and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The payment of a fixed dividend implies that any payment in excess of the net investment income may include capital gains, as well as partially be paid out of capital. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. Investors should refer to the "Risks Related to Classes" section in the prospectus for further information.

Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a "fdx": The dividend will generally be fixed based on a pre-determined annual percentage of Net Asset Value per Share and may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of these Classes. The payment of a fixed dividend implies that any payment in excess of the net investment income may include capital gains, as well as partially be paid out of capital. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. Investors should refer to the "Risks Related to Classes" section in the prospectus for further information. These Classes will only be available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company.

Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a "fyd": The dividend will be calculated based on a fixed annual dividend yield applied as a percentage of the Net Asset Value per Share, resulting in a variable dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The payment of a dividend calculated in this manner implies that any payment in excess of the net investment income may include capital gains and/or payments out of capital which may result in the reduction of invested capital over time. The fixed percentage applied to the Net Asset Value per Share is intended to achieve a predictable annual dividend yield. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Share Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. The fixed annual dividend yield may be changed at the discretion of the Management Company taking into consideration exceptional circumstances. Investors should refer to the "Risks Related to Classes" section in the prospectus for further information. Classes marked with a "fyd" are only available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company.

Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes marked with a "fyd2": The dividend will be calculated based on a fixed annual dividend yield applied as a percentage of the Net Asset Value per Share, resulting in a variable dividend, which may exceed the gross investment income (i.e. investment income net of withholding taxes but gross of expenses) of such Classes. The fixed percentage applied to the Net Asset Value per Share is intended to achieve a predictable annual dividend yield that is anticipated to be higher than Classes marked with a "fyd". The payment of a dividend calculated in this manner implies that any payment in excess of the net investment income may include capital gains and/or payments out of capital which may result in the reduction of invested capital over time. It is expected that the dividend distribution may include distributions from net income, realised and unrealised gains and capital of the relevant Class, and may at times exceed the increase in the Net Asset Value per Share deriving from the net income from realised and/or unrealised gains of the Class. The fixed annual dividend yield may be changed at the discretion of the Management Company, taking into account prevailing market conditions and

1) Capital International Fund (CIF) (continued)

d. Dividend Policy (continued)

other factors, including exceptional circumstances, as well as the Fund's capacity to sustain dividend distributions over the long term, having regard to capital. Investors should refer to the "Risks Related to Classes" section in the prospectus for further information. The Company or the Management Company may also, at their sole discretion, decide to close the subscriptions and switches in (but not redemptions or switches out of) Classes marked with fyd2 for a limited or unlimited period of time, if it is necessary to protect Shareholders of other Classes of the same Fund. Investors should refer to the "Rejection Privilege" in the prospectus for further information. Share Classes marked with a "fyd2" are only available to investors purchasing or holding through specific Asian distribution networks, and to other investors at the discretion of the Management Company..

- **Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes with an "m" designation:** It is intended that these Classes will distribute dividends monthly.

  These are marked by a "m", i.e. "dm", "gdm", "adm", "fdm", "fdxm", "fydm" or "fyd2m" depending on the applicable dividend methodology (see "Dividend Policy" above for details) or "dmh", "gdmh", "admh", "fdmh", "fdxmh", "fydmh" or "fyd2mh" for Dividend-distributing Hedged Equivalent Class.

- **Dividend-distributing Equivalent Classes and Dividend-distributing Hedged Equivalent Classes with an "b" designation:** It is intended that these Classes will distribute dividends bi-monthly, i.e. every two months.

  These are marked by a "b", i.e. "db", "gdb", "adb", "fdb", "fdxb", "fydb" or "fyd2b" depending on the applicable dividend methodology (see "Dividend Policy" above for details) or "dbh", "gdbh", "adbh", "fdbh", "fdxbh", "fydbh" or "fyd2bh" for Dividend-distributing Hedged Equivalent Classes. These Classes may be launched at the discretion of the Management Company and may be made available only to certain distributors or categories of investors, as determined by the Management Company.

- **Payment:** Shareholders can elect in writing to have their dividends either reinvested in Shares or paid to them. In the absence of instruction from a Shareholder, the Administrative Manager will automatically reinvest any dividends in Shares promptly upon payment of the dividend. If the Shareholder elects to have dividends paid, the relevant amount will be paid at no charge by bank transfer in the relevant Payment Currency to the bank account designated for this purpose (with all necessary details as specified in the Account Opening Form) by the Shareholder. Upon dividends paid to a Shareholder having been returned to the Company for the second consecutive year, the Administrative Manager will reinvest in Shares the amounts so returned, as well as the amount of any subsequent dividend paid to the same Shareholder until otherwise instructed.

Details of dividends distributed during the period ended 30 June 2026 are available on the relevant regional websites where the share classes are registered and distributed: https://www.capitalgroup.com/international.

Investors should refer to the fund centre applicable to their jurisdiction.

e. Accounting year

The accounting year of CIF begins on 1 January and terminates on 31 December in each year.

2) Significant accounting policies

a. General

These financial statements are prepared in accordance with Luxembourg laws, regulations and practices relating to investment funds. The last Net Asset Value, and the last day on which prices were calculated for all funds, was 30 June 2026. Please note that Fund Non-trading dates calendar for the year ongoing is available on CG website at capitalgroup.com/international. The financial statements have been prepared on a going concern basis of accounting, except Capital Group European Opportunities (LUX) (in liquidation) which have been prepared on a non-going concern basis following its liquidation on 23 July 2026.

b. Valuation of investments

i. Except as otherwise provided in (v) below, securities which are listed on an official stock exchange or traded on any other regulated market are valued at the last traded or otherwise available price at the time the NAV is calculated on the principal market on which they are traded, as published by such market or furnished by a pricing service approved by the Board of Directors of the Company; and other securities are valued at prices furnished by, or yield equivalents obtained from, one or more dealers or such pricing service.

ii. Securities issued by UCITS or UCIs will be valued at their last available NAV on the relevant valuation date; they may be valued in accordance with item (i) above where such securities are listed.

iii. Money market instruments will be valued at nominal value plus any accrued interest or using an amortised cost method, provided that this method of valuation ensures that such assets will be valued at their fair value as determined in good faith pursuant to the procedure established by the Board of Directors of the Company.

iv. Swaps will be valued at the net present value of their cash flows.

v. The liquidating value of OTC derivatives shall be determined based on information provided by pricing services approved by the Board of Directors of the Company.

vi. If a price representative of a security's fair value is not readily available from the pricing sources described under (i) through (iv) above, or if the accuracy of a portfolio's valuation, as established pursuant to (i) above, is materially affected by events that occur prior to the NAV being calculated, the relevant security or securities will be valued at the fair value, as determined by or under the direction of the Board of Directors of the Company. Use of such fair valuation procedures is intended to result in more representative NAVs and to eliminate or substantially reduce potential arbitrage opportunities at the expense of shareholders that might otherwise be available to short-term investors. In addition, the closing prices of equity securities that trade in markets outside US time zones may be adjusted to reflect significant events that occur after the close of local trading but before the Net Asset Value of each Share Class of the Fund is determined.

c. Foreign currencies

i. Assets and liabilities in currencies other than euros have been translated into euros at the prevailing exchange rates as at 30 June 2026. Transactions during the period in currencies other than euros have been translated at rates prevailing at the time of the transaction. The variation of the net unrealised exchange gains or losses on open forward currency exchange contracts and on other assets and liabilities between 31 December 2025 and 30 June 2026 is disclosed in "net change in unrealised appreciation/(depreciation) on foreign currency transactions". The net realised gains or losses on exchange, including on open forward currency exchange contracts expired during the period, are disclosed in "net realised gain/(loss) on foreign currency transactions".

The principal exchange rates applied as at 30 June 2026 are 1 EUR = 185.781047070000 YEN and 1 EUR = 1.142600000400 USD.

2) Significant accounting policies (continued)

c. Foreign currencies (continued)

ii. If a current quote representative of a foreign currency value is not readily available, or if the accuracy of a portfolio's valuation, as established pursuant to (i) above, is significantly affected by events that occur prior to the NAV being calculated, the relevant foreign currency or currencies will be valued at the fair value, as determined by or under the direction of the Board of Directors of the Company. Use of such fair valuation procedures is intended to result in more representative NAVs and to eliminate or substantially reduce potential arbitrage opportunities at the expense of shareholders that might otherwise be available to short-term investors.

d. Income

Dividends are taken into income on the date upon which the relevant securities are first listed as ex-dividend. Interest income is accrued on a daily basis.

The securities lending income is accounted for on a cash basis on the 16th day of each month following the month that the revenue was generated, net of lending fees paid to the lending agent.

Premiums and discounts on convertible bonds, sinkable bonds, sinkable-callable bonds, index-linked assets, inflation linked assets, dirty priced bonds and unitised bonds are amortised using an effective interest rate (EIR) methodology. Premiums and discounts on all other fixed income securities are amortised on a straight-line basis.

e. Securities lending

Fund may use securities financing transactions as defined under Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 by entering into securities lending transactions to provide an additional source of potential investment return to Shareholders, which will help achieve the Fund's investment objective. Where a fund enters into securities financing transactions, only equity securities will be subject to securities lending transactions.

Each transaction involves three parties, the fund, a borrower, and the lending agent. Portfolio securities of the relevant fund will be lent to borrowers such as brokers, dealers or other institutions approved by Capital Group. Borrowers are subject to prudential supervision rules that the CSSF deems equivalent to those required under EU Law. The lending agent facilitates the exchange of securities between the fund and approved borrowers under a securities lending agreement.

All revenues from securities lending transactions shall be payable to the relevant fund following the deduction of compensation to the lending agent for its services. The expenses which may be deducted from the revenue delivered to the relevant fund should generally not exceed 5% of the gross revenue arising from securities lending transactions. The difference, i.e. 95%, will be paid to the relevant fund.

See "Appendix 1: Securities Financing Transactions Regulation (SFTR) disclosure" for further information on securities lending transactions.

2) Significant accounting policies (continued)

e. Securities lending (continued)

The value of loaned securities, related collateral outstanding, identity of the counterparties, security lending income and associated operational costs and fees as at 30 June 2026 are as follows:

Fund	Fund currency	Counterparty	Market value of securities on loan (in fund currency)	Cash collateral (in fund currency)	Non cash collateral (in fund currency)	Total collateral (in fund currency)
Capital Group New Perspective Fund (LUX)	USD	BNP	2,395,950	225,522	2,424,370	2,649,892

f. Realised gain or loss on sale of investments

The realised gain or loss on sale of equities is determined on the average cost basis and the methodology of calculating gains or losses on disposal of fixed income securities is first-in-first-out (FIFO).

g. Unfunded capital commitments

Unfunded capital commitments represent agreements which obligate the Capital Group Emerging Markets Equity Fund (LUX) to meet capital call in the future. Payment would be made when a capital call is requested. Capital calls can only be made if and when certain requirements have been fulfiled; thus, the timing and the amount of such capital calls cannot readily be determined. Unfunded capital commitments are recorded when capital calls are requested. As of 30 June 2026, unfunded capital commitments were US$150,032.

2) Significant accounting policies (continued)

h. Mortgage related securities - To Be Announced securities contracts (TBAs)

TBA contracts are forward contracts on agency mortgage pass-through securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. The particular securities (i.e., specified mortgage pools) to be delivered or received are not identified at the trade date, but are “to be announced” on the notification date which is two days before the settlement date. However, securities to be delivered must meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted “good delivery” standards. TBAs settle once each month based on a calendar published by the Securities Industry and Financial Markets Association.

TBA positions are disclosed in the schedule of investments. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under “Payable for To Be Announced contracts” in the statement of net assets.

Negative positions in the schedule of investments reflect the fund’s sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under “Receivable for To Be Announced contracts” in the statement of net assets.

The realised gain/(loss) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the statement of operations and changes in net assets respectively under the headings “Net realised gain/(loss) on sale of investments” and “Net change in unrealised appreciation/(depreciation) on investments”.

i. Swing pricing adjustment

A fund may suffer dilution of the net asset value as a result of large subscriptions, redemptions or switches. Such dilution would arise from shareholders buying or selling shares at a net asset value which would not accurately reflect the dealing and other costs incurred when securities are traded to accommodate cash inflows or outflows. In order to counter such dilution impact, the Company adopts a swing pricing mechanism as part of its valuation policy. If on any valuation date, the net aggregate amount of subscriptions or redemptions in shares of a fund exceeds a pre-determined threshold expressed as a percentage of the net asset value of that fund, the net asset value may be adjusted upwards or downwards to reflect the costs attributable to the underlying trade in securities undertaken by the Investment Advisers to accommodate inflows or outflows as the case may be.

Any swing pricing adjustment to such net asset value will be applied systematically and consistently based on predefined factors. The price adjustment may vary from fund to fund and will normally not exceed 3% of the original net asset value. The Company may decide to suspend the application of any swing pricing adjustment to the net asset value of any particular fund or increase this price adjustment limit in exceptional circumstances to protect the interests of shareholders. Such price adjustment is available on the Management Company’s webpage at capitalgroup.com/international concomitantly with the publication of the relevant net asset value. The Company, relying on the Management Company and its Conducting Officers’ ongoing review, will reassess on a periodic basis the price adjustment factors to reflect an approximation of current dealing and other costs.

As at period end a swing pricing adjustment has been applied to Capital Group New Perspective Fund (LUX) and Capital Group New Economy Fund (LUX).

The official Net Asset Values per share of these funds, following the application of the swing pricing factor, are shown in the following table.

All other financial information stated in this report is shown before any adjustment for swing pricing.

3) Fees and expenses

a. Management fee and Annual administration charge (AAC)

CIF pays the management fee at the annual rates specified below. This fee is used to compensate the Management Company which can in turn use it to compensate the Investment Advisers for their investment advisory services and the distributors and other intermediaries, as applicable, for services to investors or similar services in relation to investments made with their assistance.

The Company also pays an Annual Administration Charge to the Management Company. The Annual Administration Charge is used by the Management Company to pay certain charges and expenses incurred in relation to the operation and administration of the Company and the funds. The Annual Administration Charge is a fixed-rate charge accrued on a daily basis by reference to the Net Asset Value and is payable monthly in arrears to the Management Company. The Annual Administration Charge is charged first against income. In the event the actual costs incurred by the funds exceed the level of the Annual Administration Charge applicable to a Class, the Management Company will bear the excess.

The Annual Administration Charge includes costs related, but not limited, to depositary and custody fees, and other relevant charges that may occur from time to time. More details on the other charges can be found in the CIF prospectus, available on the Management Company's webpage at capitalgroup.com/international.

The Annual Administration Charge is applied to the share classes and their equivalent classes in accordance with the rates outlined in the table below.

Each share class is designed to support the needs of different investor types and has a different total expense ratio that affects the returns to shareholders. The CIF prospectus, available on the Management Company's webpage at capitalgroup.com/ international, explains further the differences between share classes.

The Management Company established a reimbursement threshold so that each fund's total expense ratio (excluding management fee) did not exceed the maximum annual rates specified below:

	Management fee	Annual administration charge (AAC)	Maximum expense ratio (excluding management fee)

[1] Investments in shares of class C and equivalent classes may only be made by investors having entered into a separate agreement with respect to management fee.
[2] Investments in shares of class Y and equivalent classes may only be made by investors having entered into a separate agreement with respect to management fee.
[3] Effective 23 July 2026, Capital Group European Opportunities (LUX) will be liquidated.

b. Reimbursement of expenses

On a daily basis, for share classes where the expenses are capped, the level of expenses is calculated and compared to the cap and where the level of expenses is higher than the cap, this difference is booked as a decrease of expense (the "waiver fees"). The amount of waiver fees is disclosed as "Reimbursement of expenses" in the "Combined statement of Operations and Changes in Net Assets.

4) Taxation

a. Taxe d'abonnement

In Luxembourg, CIF is subject only to a tax ("taxe d'abonnement") at the annual rate of 0.05% of the total net assets of each share class in each fund. However, as provided by the relevant Luxembourg laws in respect of share classes wholly held by institutional investors, a reduced rate of 0.01% per annum was applied in respect of class A4, A7, A9, A11, A13, A15, C and equivalent share classes, where available, for the period ended 30 June 2026. It should be noted that there can be no guarantee that the benefit of such reduced rate will not be denied or that, once obtained, it will continue to be available in the future. Such tax is accrued daily, payable quarterly and calculated on the total NAV of each share class at the end of the relevant quarter.

b. Foreign taxes

Capital gains and income on securities may be subject to respectively capital gain taxes and withholding taxes. CIF is not expected to recover such taxes in full, but may have the possibility to reclaim a portion of the withholding taxes in accordance with the tax relief provided for in the double tax treaties in place between Luxembourg and some foreign countries.

4) Taxation (continued)

b. Foreign taxes (continued)

It is CIF's policy to accrue for withholding taxes and any other significant liability for foreign capital gain taxes.

The below funds had a provision for Indian Capital Gains Tax net of any refunds as at the period end, the amounts are included within the "Provision for foreign tax" on the Statement of Assets and Liabilities, and movement in the provision for Indian Capital Gains Tax since last year end is disclosed as "Unrealised capital gain tax on investments" on the Combined statement of operations and changes in net assets:

	Fund Currency	Provision at 30 June 2026 (in fund currency)	Provision at 31 December 2025 (in fund currency)	Movement (in fund currency)
Capital Group New World Fund (LUX)	USD	944,568	2,159,898	(1,215,330)
Capital Group Emerging Markets Equity Fund (LUX)	USD	546,383	754,006	(207,623)
Capital Group Asian Horizon Fund (LUX)	USD	30,452	117,974	(87,522)
Capital Group Emerging Markets Total Opportunities (LUX)	USD	450,842	651,389	(200,547)

Under certain circumstances, CIF may file claims with the tax authorities of some foreign countries, when the tax treatment it has been subject to could be considered as contestable or discriminatory. The nature of these claims is complex and subject to each jurisdiction's local procedural rules and case law. In such cases, in view of the uncertainty of success, and in accordance with the accounting principle of prudence applied in Luxembourg, CIF does not accrue for the potential tax refund. When a claim is successful, any significant withholding tax or capital gain tax reimbursement is recognised as "other income" or "net realised gain on sale of investments" respectively upon notification of the final judgment.

For the period ended 30 June 2026, the amounts earned by the funds as a result of these claims are disclosed as "Other income" in the "Combined statement of operations and changes in net assets", and were as follows:

Please refer to the Company's prospectus for further information on taxation.

	Fund Currency	Amount
Capital Group Global Equity Fund (LUX)	USD	4,811
Capital Group World Growth and Income (LUX)	USD	135,079
Capital Group New Economy Fund (LUX)	USD	3,661
Capital Group New World Fund (LUX)	USD	1,595
Capital Group European Core Equity Fund (LUX)	EUR	114,361
Capital Group Investment Company of America (LUX)	USD	22,005
Capital Group Capital Income Builder (LUX)	USD	39,514

5) Forward currency exchange contracts

In order to achieve the most appropriate currency distribution, the fund enters into forward currency exchange contracts aiming to reduce the risk of the depreciation in the value of specific currencies. The funds do not intend to systematically hedge currency exposures back to any currency, except in the case of hedged equivalent classes, as described in note 7 to the financial statements.

5) Forward currency exchange contracts (continued)

Forward currency exchange contracts are valued on the basis of forward currency exchange rates prevailing on the relevant reporting date and the resulting net change in unrealised gain or loss is included in the statement of operations and changes in net assets.

6) Hedged equivalent classes

The hedged equivalent classes (includes "dividend-distributing hedged equivalent classes") seek to limit the exposure of their shareholders to currencies other than the currency referred to in the relevant class's designation, through a systematic passive currency-hedging overlay performed by J.P. Morgan Chase Bank, N.A. on a significant part of the assets of the relevant fund attributable to these classes.

In the case of a net asset flow to or from such a class or fluctuation in the net asset value of the class, the passive currency-hedging overlay may not, or not immediately, be adjusted, unless the flow or fluctuation is significant. Passive currency-hedging overlay will not completely eliminate the exposure to currency movements, and proxy hedging may, for instance, be used when the underlying currency is not liquid or is closely linked to another currency. Shareholders of hedged equivalent classes should note that returns of hedged equivalent classes may be significantly different over time than those of unhedged classes and that passive currency-hedging overlay may limit their ability to benefit from the currency diversification undertaken within the portfolio (including partially offsetting the currency hedging undertaken at the level of the fund's portfolio).

The cost of passive currency-hedging overlay and gains/losses from hedging transactions are borne by the relevant hedged equivalent class(es).

These classes are marked by a "h" and a reference to the currency being hedged into.

The actual passive currency-hedging overlay methodology varies from fund to fund, as described hereafter.

Capital Group New Perspective Fund (LUX)
CGNPLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Future Generations Global Opportunities Fund (LUX)
CGFGOLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Global Equity Fund (LUX)
CGGELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group World Growth and Income (LUX)
CGWGILU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

6) Hedged equivalent classes (continued)

Capital Group World Dividend Growers (LUX)
CGWDGLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group New Economy Fund (LUX)
CGNELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group New World Fund (LUX)
CGNWLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

Capital Group Emerging Markets Equity Fund (LUX)
CGEMELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

Capital Group Japan Equity Fund (LUX)
CGJPELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

Capital Group European Opportunities (LUX) (in liquidation)
CGEOLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

Capital Group European Core Equity Fund (LUX)
CGECELU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

Capital Group AMCAP Fund (LUX)
CGAMCAPLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

Capital Group Investment Company of America (LUX)
CGICALU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

6) Hedged equivalent classes (continued)

Capital Group Capital Income Builder (LUX)
CGCIBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

Capital Group Global Allocation Fund (LUX)
CGGALU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Future Generations Global Balanced Fund (LUX)
CGFGBLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Global New Perspective Fund (LUX)
CGGNPLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Global Screened Allocation Fund (LUX)
CGGSALU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group American Balanced Fund (LUX)
CGAMBALLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposure of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be 100%.

Capital Group Emerging Markets Total Opportunities (LUX)
CGETOPLU SGD and JPY hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. Other hedged share classes aim at hedging 50% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. At times, and for exceptional periods, a different ratio may be applied in order for the Class to achieve the objectives of the fund, but it will be no less than 25% and no more than 75%.

Capital Group Global Bond Fund (LUX)
CGGBLU hedged share classes aim at hedging with a reasonable margin of tolerance the main currency exposures of the fund's investment universe (represented by a relevant representative index) back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

6) Hedged equivalent classes (continued)

Capital Group Global Intermediate Bond Fund (LUX)
CGGIBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

Capital Group Global Total Return Bond Fund (LUX)
CGGTRLU hedged share classes aim at hedging hedging with a reasonable margin of tolerance the main currency exposures of the fund's investment universe (represented by a relevant representative index) back into the currency referred to in the Class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Euro Bond Fund (LUX)
CGEBLU hedged share classes aim at hedging, with a reasonable margin of tolerance, the main currency exposures of the fund back into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Global Corporate Bond Fund (LUX)
CGGCBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

Capital Group Future Generations Global Corporate Bond Fund (LUX)
CGFGCBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

Capital Group US Corporate Bond Fund (LUX)
CGUSCBLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD into the currency referred to in the relevant class's designation.

Capital Group Global High Income Opportunities (LUX)
CGGHIOLU hedged share classes aim at hedging, with a reasonable margin of tolerance, its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group Multi-Sector Income Fund (LUX)
CGMSILU hedged share classes aim at hedging, with a reasonable margin of tolerance, its total net assets from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation. It is expected that the resulting effective hedge ratio (i.e. the percentage exposure in the currency of the hedged share class) will typically be in the range of 80% to 100%.

Capital Group US High Yield Fund (LUX)
CGUSHYLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

6) Hedged equivalent classes (continued)

Capital Group Emerging Markets Debt Fund (LUX)
CGEMDLU hedged share classes aim at hedging 50% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD), into the currency referred to in the relevant class's designation. Class A7 EUR hedged class will aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the current exposure of the portfolio to USD), into the currency referred to in the relevant class's designation.

Capital Group Emerging Markets Local Currency Debt Fund (LUX)
CGEMLCDLU hedged share classes aim at hedging 100% (with a reasonable margin of tolerance) of its total net assets, from USD (regardless of the underlying current exposure of the portfolio to USD) into the currency referred to in the relevant class's designation.

7) Credit Default Swaps contracts

In order to obtain exposure to a diversified portfolio of credits or to hedge against existing credit risks, the funds may use Credit default swaps ("CDS") or credit default swap indices contracts ("CDXs"). CDS allows the transfer of default risk. This allows investors to effectively buy insurance on a Bond they hold (hedging the investment) in the expectation that the credit will decline in quality. Conversely, where the investment view is that the payments due to decline in credit quality will be less than the coupon payments, protection will be sold by means of entering into a credit default swap. A CDX is based on a portfolio of credit default swaps with similar characteristics, such as credit default swaps on high-yield bonds. In a typical CDS and/or CDX transaction, one party - the protection buyer - is obligated to pay the other party - the protection seller - a stream of periodic payments over the term of the contract. If a credit event, such as a default or restructuring, occurs with respect to any of the underlying reference obligations, the protection seller must pay the protection buyer the loss on those credits. The fund may enter into a CDS and/or CDX transaction as either protection buyer or protection seller.

The unrealised gain/(loss) is disclosed in the statement of net assets under "Unrealised gain/(loss) on swap contracts". Realised gain/(loss) and changes in unrealised gain/(loss) as a result thereof are included in the statement of operations and changes in net assets respectively under "Net realised gain/(loss) on swap contracts" and "Net change in unrealised appreciation/(depreciation) on swap contracts".

8) Interest Rate Swaps

An interest rate swap is a bilateral agreement in which each party agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis which is usually not exchanged.

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised gain/(loss) is disclosed in the statement of net assets under "Unrealised gain/(loss) on swap contracts." Realised gain/(loss) and changes in unrealised gain/(loss) as a result thereof are included in the statement of operations and changes in net assets respectively under "Net realised gain/(loss) on swap contracts" and "Net change in unrealised appreciation/ (depreciation) on swap contracts".

9) Futures contracts

Futures contracts provide for the delayed delivery of the underlying instrument at a fixed price or for a cash amount based on the change in the value of the underlying instruments at a specific date in the future.

Upon entering into futures contract, the fund is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account. Subsequent payments, referred to as variation margin, are made or received by the fund periodically and are based on changes in the market value of open futures contracts.

The unrealised gain/(loss) on future contracts is disclosed in the statement of net assets under “Unrealised gain/(loss) on financial futures contracts”. Changes in the market value of open future contracts are recorded as unrealised gain/(loss) in the statement of operations and changes in net assets under “Net change in unrealised appreciation/(depreciation) on financial futures contracts”. Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of operations and changes in net assets under “Net realised gain/(loss) on financial futures contracts”.

10) Options

An option is a contract that gives the holder of the option, in return for a premium payment, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the reference instrument underlying the option (or the cash value of the instrument underlying the option) at a specified exercise price. The writer of an option on a security has the obligation, upon exercise of the option, to cash settle or deliver the underlying currency or instrument upon payment of the exercise price (in the case of a call) or to cash settle or take delivery of the underlying currency or instrument and pay the exercise price (in the case of a put). Options prices can diverge from the prices of their underlying instruments for a number of reasons. Options prices are affected by such factors as current and anticipated short-term interest rates, changes in the volatility of the underlying instrument, and the time remaining until expiration of the contract, which may not affect security prices in the same way. Imperfect correlation may also result from differing levels of demand in the options markets and the markets for the underlying instruments, from structural differences in how options and underlying instruments are traded, or from imposition of daily price fluctuation limits or trading halts.

11) Collateral

As at 30 June 2026, the collateral received or paid which is composed of cash and non-cash collateral granted to or received from brokers and counterparties for the purpose of transactions in derivatives is as follows:

Fund	Fund Currency	Counterparty/ Broker	Type of Collateral	Collateral Amount received	Collateral Amount paid
Capital Group Future Generations Global Opportunities Fund (LUX)	USD	Morgan Stanley & Co LLC	Cash	–	738,000
Capital Group New World Fund (LUX)	USD	JP Morgan Securities LLC	Cash	–	63,000
Capital Group Capital Income Builder (LUX)	USD	Citigroup Global Markets Inc	Cash	–	1,108,000

12) Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect

Some funds may invest via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (collectively "Stock Connects"). The Shanghai-Hong Kong Stock Connect is a securities trading and clearing linked program developed by Stock Exchange of Hong Kong Limited (the "SEHK"), Shanghai Stock Exchange ("SSE") and China Securities Depository and Clearing Corporation Limited ("ChinaClear") and the Shenzhen-Hong Kong Stock Connect is a securities trading and clearing linked program developed by SEHK, Shenzhen Stock Exchange ("SZSE") and ChinaClear, both aiming to achieve mutual stock market access between the People's Republic of China ("PRC") and Hong Kong. Hong Kong Securities Clearing Company Limited (HKSCC), a wholly-owned subsidiary of SEHK, and ChinaClear will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by their respective market participants and/or investors.

The Shanghai-Hong Kong Stock Connect comprises a Northbound Shanghai Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shanghai Trading Link, Hong Kong and overseas investors, through their Hong Kong

12) Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (continued)

brokers and a securities trading service company established by the SEHK, may be able to trade eligible securities, such as China A Shares listed on the SSE by routing orders to SSE. Under the Southbound Hong Kong Trading Link under Shanghai-Hong Kong Stock Connect, investors in the PRC will be able to trade certain securities listed on the SEHK.

The Shenzhen-Hong Kong Stock Connect comprises a Northbound Shenzhen Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shenzhen Trading Link, Hong Kong and overseas investors, through their Hong Kong brokers and a securities trading service company established by SEHK, may be able to trade eligible securities listed on the SZSE by routing orders to SZSE. Under the Southbound Hong Kong Trading Link under Shenzhen-Hong Kong Stock Connect investors in the PRC will be able to trade certain securities listed on the SEHK.

The trading is subject to rules and regulations issued from time to time. Trading under the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are both subject to a daily quota ("Daily Quota"). Northbound Shanghai Trading Link and Southbound Hong Kong Trading Link under the Shanghai-Hong Kong Stock Connect as well as Northbound Shenzhen Trading Link and Southbound Hong Kong Trading Link under the Shenzhen-Hong Kong Stock Connect will be subject to a separate set of Daily Quota. The Daily Quota limits the maximum net buy value of cross boundary trades under the Shanghai- Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect each day.

13) China Interbank Bond Market

The fund may invest on the China Interbank Bond Market. Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the China Interbank Bond Market may result in prices of certain debt securities traded on such market fluctuating significantly. The relevant fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the relevant fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

To the extent that a fund transacts in the China Interbank Bond Market, the fund may also be exposed to risks associated with settlement procedures and default of counterparties. The counterparty which has entered into a transaction with the fund may default in its obligation to settle the transaction by delivery of the relevant security or by payment for value. Since the relevant filings and account opening for investment in the China Interbank Bond Market have to be carried out via an onshore settlement agent, the relevant fund is subject to the risks of default or errors on the part of the onshore settlement agent.

The China Interbank Bond Market is also subject to regulatory risks. The relevant rules and regulations on investment in the China Interbank Bond Market are subject to change which may have potential retrospective effect. In the event that the relevant Chinese authorities suspend account opening or trading on the China Interbank Bond Market, the funds' ability to invest in the China Interbank Bond Market will be limited and, after exhausting other trading alternatives, the relevant fund may suffer substantial losses as a result.

Reforms or changes in macro-economic policies, such as the monetary and tax policies might affect interest rates. Consequently, the price and the yield of the bonds held in a portfolio would/could also be affected.

14) Bond Connect

Some funds may invest via the Bond Connect. Bond Connect is the historic opening up of China's Interbank Bond Market (CIBM) to global investors through the China-Hong Kong mutual access program. The program allows foreign and Mainland China investors the ability to trade in each other's bond market through a connection between the Mainland and Hong Kong based financial infrastructure institutions.

14) Bond Connect (continued)

Bond Connect aims to enhance the efficiency and flexibility of investing in the China Interbank Bond Market. This is accomplished by easing the access requirements to enter the market, the use of the Hong Kong trading infrastructure to connect to China Foreign Exchange Trading System (CFETS) and Bond Settlement Agent, all which are required to invest in the CIBM directly.

Market volatility and potential lack of liquidity due to low trading volume of certain debt securities in the CIBM may result in prices of certain debt securities traded on such market fluctuating significantly. The relevant fund investing in such market is therefore subject to liquidity and volatility risks. The bid and offer spreads of the prices of such securities may be large, and the relevant fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

15) Calculation method of the Global Exposure and Leverage

In accordance with the CSSF Circular 11/512, Global Exposure is calculated using either the Commitment Approach or Value at Risk ("VaR") approach, depending on the fund's investment strategy, risk profile and use of derivative instruments. Under the Commitment Approach, financial derivative instruments are converted into equivalent positions in their underlying assets in accordance with applicable regulatory requirements. Global Exposure is calculated by aggregating these equivalent exposures, taking into account eligible netting and hedging arrangements where permitted. The Global Exposure for a fund under the Commitment Approach must not exceed 100% of the fund's Net Asset Value.

For funds listed below, the Global Exposure methodology used for the calculation of market risk is the absolute or relative VaR approach. The VaR approach seeks to estimate and constrain the potential loss that the fund could experience on a 1-month (20 business days) horizon, with a 99% confidence interval. A third-party risk system is used to calculate analytical VaR utilising historical data observation period of no less than one year (250 days) to carry out the calculation on a daily basis.

For the below funds, the relative VaR is used for the purpose of calculating Global Exposure. The relative VaR method (fund VaR vs benchmark VaR) is subject to the regulatory limit of 200% benchmark VaR.

Capital Group Global Bond Fund (LUX)
Capital Group Global Intermediate Bond Fund (LUX)
Capital Group Global Total Return Bond Fund (LUX)
Capital Group Euro Bond Fund (LUX)
Capital Group Global Corporate Bond Fund (LUX)
Capital Group Future Generations Global Corporate Bond Fund (LUX)
Capital Group US Corporate Bond Fund (LUX)
Capital Group Global High Income Opportunities (LUX)
Capital Group Multi-Sector Income Fund (LUX)
Capital Group US High Yield Fund (LUX)
Capital Group Emerging Markets Debt Fund (LUX)
Capital Group Emerging Markets Local Currency Debt Fund (LUX)

For the Capital Group Global Total Return Bond Fund (LUX), the absolute VaR approach is used for the purposes of calculating Global Exposure. The absolute VaR method is subject to the regulatory limit of 20% of the fund's Net Asset Value.

15) Calculation method of the Global Exposure and Leverage (continued)

The table below details the fund's highest, lowest and average utilisation of the VaR limit, expressed as a percentage of the absolute VaR regulatory limit of 20% or a percentage of the relative VaR regulatory limit of 200%. In addition, the Leverage figure is calculated using the Gross Sum of the Notionals of the financial derivatives used by the fund as is required by UCITS regulations and as such does not take into account any netting of the financial derivatives and hedging arrangements that the fund may have in place at any time.

		Regulatory VaR limit utilisation(percentage of total VaR limit used)				
Fund	Global Exposure Approach	Reference Index	Lowest	Highest	Average	Average Gross Sum of Notionals
Capital Group Global Bond Fund (LUX)	Relative VaR	Bloomberg Global Aggregate Bond Total Return index	50.20%	62.50%	56.33%	259.40%
Capital Group Global Intermediate Bond Fund (LUX)	Relative VaR	Bloomberg Global Aggregate 1-7 Years Custom hedged to USD Total Return index	46.39%	76.96%	57.28%	230.58%

b. Compliance with the revised SFC Code

The revised Code on Unit Trusts and Mutual Funds issued by the Securities and Futures Commission (SFC Code) came into effect on 1 January 2019 with a 12-month transition period for compliance for funds previously authorised by the SFC (including the funds authorised in Hong Kong).

During the period ended 30 June 2026, disclosures on transactions with Connected Persons (as defined under the SFC Code) of each fund authorised in Hong Kong were further amended for compliance with the applicable requirements under the revised SFC Code. For the avoidance of doubt, as a result of the amendments of disclosures for compliance with the revised SFC Code, there will not be (i) any change of the investment objective and policies of the funds authorised in Hong Kong; (ii) any material changes to the funds authorised in Hong Kong; (iii) any material change or increase in the overall risk profile of the funds authorised in Hong Kong; and (iv) any material adverse impact on the rights or interests of the Hong Kong Shareholders.

c. Soft Commissions

No soft commission arrangements were entered into by the Management Company or the Investment Advisers with brokers for the period ended 30 June 2026.

17 Subsequent event

Effective 23 July 2026, Capital Group European Opportunities (LUX) has been liquidated.

General information

Annual General Meeting

The Company's Annual General Meeting of Shareholders is held at the registered office of the Company in Luxembourg on the last Tuesday of April in each year at 11:00am or, if any such day is not a Business Day, on the next Business Day. Convening notices and all other legal notices are given in accordance with Luxembourg law and the Articles of Incorporation.

Information available to investors

The current Prospectus, Key Information Document (KID), Key Investor Information Document (KIID), Articles of Incorporation, audited Annual Report, unaudited Semi-annual Report and a Statement of changes in the investment portfolio for each fund for the period ended 30 June 2026 are made available free of charge at the registered office of CIF or at the authorised representatives of CIF in various jurisdictions in accordance with Luxembourg law and with the laws of all relevant jurisdictions – see Authorised Agents and Country Paying Agents on page 435. In addition, for investors in the Federal Republic of Germany, the above documents may be obtained free of charge in paper form from the German paying and information agent.

The net asset value per share can be obtained from the registered office of CIF. In addition, information about the funds is available on the Management Company's webpage at capitalgroup.com/international.

Presentation of results information

- **Pre-merger funds**
  Some of the funds are a consequence of the merger of pre-existing SICAVs into Capital International Fund. For these funds, lifetime results relate to the pre-existing SICAVs.

The Investment Adviser disclosure

The Investment Adviser and Affiliates (the "Affiliates") will place trades with brokers who provide certain brokerage and/or investment research services to the Affiliates, but only when in the Affiliates judgement the broker is capable of providing best execution for that transaction. For the period ended 30 June 2026, there were no transactions through connected brokers and hence no commissions were paid to connected brokers since none of the Affiliates operate any brokerage activity. These services permit the Affiliates to supplement their own research and analysis, which contributes to the efficient management of investment portfolios by Affiliates for the benefit of investors. Although Affiliates may enter into arrangements with brokers with the expectation that these services will be provided, Affiliates do not incur any obligation with any broker to pay for research by generating trading commissions. Affiliates also pay cash for certain third-party research they receive. In addition, Affiliates' employees are governed by a global Code of Ethics, which includes rigorous personal investing and gifts and entertainment policies. Affiliates may also provide the Company with other services to support its business development, including, but not limited to, product development, fund registration and any other similar support as may be required, for which they receive a reasonable compensation.

Appendix 1: Securities Financing Transactions Regulation (SFTR) disclosure

The funds may enter into securities lending transactions subject to the same rules regarding collateral as derivatives where relevant in accordance with the ESMA Guidelines 2014/937.

For each securities lending transaction and subject to a commitment that the equivalent securities will be returned on a future date or when requested to do so, the borrower must provide cash in USD, EUR or JPY currency or cash equivalents, such as US Treasury securities as Collateral in an amount at least equivalent, at all times during the lifetime of the transactions, to the full current value of the securities lent. US Treasury securities generally have a maturity between one day and one year.

SECURITIES LENDING

Global Data

Amount of securities on loan and amount of assets engaged in securities lending transactions

The following table represents the total value of assets engaged in securities lending as at the period end date. The total value of securities on loan as a proportion of the funds' total lendable assets as at the period end date is also detailed below. Total lendable assets represents the aggregate value of asset types forming part of the Funds' securities lending programme.

Fund	Fund currency	Market Value of Securities on Loan (in fund currency)	% of Total Lendable Assets*	% Total Net Asset Value*
Capital Group New Perspective Fund (LUX)	USD	15,679,765	0.09	0.08
Capital Group Global Equity Fund (LUX)	USD	2,544,303	0.35	0.33
Capital Group World Growth and Income (LUX)	USD	3,619,991	0.72	0.61
Capital Group New Economy Fund (LUX)	USD	3,176,341	0.18	0.15
Capital Group New World Fund (LUX)	USD	2,860,460	0.63	0.33
Capital Group Emerging Markets Equity Fund (LUX)	USD	454,103	0.63	0.18
Capital Group Asian Horizon Fund (LUX)	USD	548,323	2.86	0.70
Capital Group European Opportunities (LUX) (in liquidation)[1]	EUR	699,116	1.72	2.02
Capital Group European Core Equity Fund (LUX)	EUR	317,510	0.23	0.20
Capital Group Capital Income Builder (LUX)	USD	1,493,815	0.13	0.11
Capital Group Global Allocation Fund (LUX)	USD	16,267,414	1.18	0.98
Capital Group Future Generations Global Balanced Fund (LUX)	USD	217,107	0.28	0.23
Capital Group Global New Perspective Fund (LUX)	USD	27,911,253	0.21	0.19

[1] Effective 23 July 2026, Capital Group European Opportunities (LUX) will be liquidated.

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point and therefore have a maturity tenor of one day.

Country in which counterparties are established
J.P. Morgan S.E. was incorporated in Luxembourg.

Settlement and clearing
The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Reuse of collateral

Non-cash collateral received by a fund may not be sold, re-invested or pledged. As the collateral in receipt for securities lending is entirely in the form of securities, there is no reuse of securities lending collateral.

Safekeeping of collateral

Collateral received

J.P. Morgan S.E., as securities lending agent of the Company, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan S.E. is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Return and cost

The total income earned from securities lending transactions is split between the relevant funds and the securities lending agent. Income earned during the period by the funds from securities lending transactions is disclosed in the Combined statement of operations and changes in net assets on pages 383 to 394.
