Description of the share classes :

Class A :
distribution shares offered to the public.

Class A USD :
distribution shares which differ from shares of class **A** due to the fact that they are denominated in United States dollars.

Class A EUR HEDGED:
distribution shares which differ from class **A** shares in that the exchange risk against the euro is hedged. The Manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class V:
distribution shares which differ from class **A** shares due to the fact that (i) at the discretion of the management company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, excluding Banque Degroof Petercam Belgium and CA Indosuez Wealth Europe, (ii) they may be offered by distributors and platforms that have entered into separate remuneration agreements with their customers that are not subject to any rebate, and (iii) they are not subject to a rebate on management fees.

Class V USD:
distribution shares which differ from shares of class **V** due to the fact that they are denominated in United States dollars.

Class V EUR HEDGED:
distribution shares which differ from Class **V** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class E:
distribution shares which differ from class **A** shares in that (i) they are reserved for eligible investors[1] acting on their own account, (ii) they have a minimum initial subscription amount, (iii) a different management fee and (iv) a different annual tax.

Class E USD:
distribution shares which differ from shares of class **E** due to the fact that they are denominated in United States dollars.

Class E EUR HEDGED:
distribution shares which differ from Class **E** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class M:
Distribution shares which differ from class **A** shares due to the fact that (i) they are reserved to investors having one or more current discretionary management mandates with one or entities of the Crédit Agricole group, (ii) they are reserved to the account(s) to which these discretionary management mandates apply, (iii) they are reserved for all-in mandates and in that (iv) they have a different management fee.

In this context, "all in" includes at least the management fees and custody fees charged on the account (s) to which these "all in" discretionary management mandates apply.

Class M USD:
distribution shares which differ from shares of class **M** due to the fact that they are denominated in United States dollars.

Class M EUR HEDGED:
distribution shares which differ from class **M** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class B:
capitalisation shares offered to the public.

Class B LC:
capitalisation shares which differ from class **B** shares due to the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current "Services Agreement Life Cycle" contracts with Degroof Petercam Asset Management, and (ii) that they have a different management fee.

Class B USD:
capitalisation shares which differ from shares of class **B** due to the fact that they are denominated in United States dollars.

Class B EUR HEDGED:
capitalisation shares which differ from class **B** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class L:
capitalisation shares which differ from shares of class **B** due to the fact that (i) they have a minimum initial subscription, and (ii) a management fee that may be different.

Class L USD:
capitalisation shares which differ from shares of class **L** due to the fact that they are denominated in United States dollars.

Class W:
capitalisation shares offered to the public which differ from class **B** shares due to the fact that (i) at the discretion of the management company they may be offered to distributors and platforms in the United Kingdom, Switzerland and European Union Member States, excluding Banque Degroof Petercam Belgium and CA Indosuez Wealth Europe, (ii) they may be offered by distributors and platforms that have entered into separate remuneration agreements with their customers that are not subject to any rebate, and (iii) they are not subject to a rebate on management fees.

Class W USD:
capitalisation shares which differ from class **W** shares due to the fact that (i) they are denominated in US dollars.

Class W EUR HEDGED:
capitalisation shares which differ from class **W** shares in that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class F:
capitalisation shares which differ from class **B** shares due to the fact that (i) they are reserved for eligible investors[1] dealing on behalf of their own name, (ii) they have a minimum initial subscription amount, (iii) a different management fee and (iv) a different annual tax.

Class F LC:
capitalisation shares which differ from class **F** shares due to the fact that (i) they are reserved for investors affected, directly or indirectly, by one or more current "Services Agreement Life Cycle" contracts with Degroof Petercam Asset Management, (ii) they have no minimum initial subscription amount and (iii) that they have a different management fee.

Class F USD:
capitalisation shares which differ from shares of class **F** due to the fact they are denominated in United States dollars.

Class F EUR HEDGED:
capitalisation shares which differ from class **F** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class F USD HEDGED:
capitalisation shares which differ from class **F USD** shares due to the fact that the exchange risk against the US dollar is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class F CHF HEDGED:
a capitalisation shares which differ from class **F CHF** shares due to the fact that the exchange risk against the Swiss franc is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class J:
capitalisation shares which differ from shares of class **F** due to the fact that they are reserved for (i) investors for which there are currently one or more discretionary management mandates with one or more entities of the Crédit Agricole group, and (ii) accounts to which these discretionary management mandates apply, due to the fact that (iii) they have no minimum initial subscription amount and (iv) they have a different management fee.

Class J EUR HEDGED:
capitalisation shares which differ from class **J** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class N:
capitalisation shares which differ from shares of class **B** due to the fact that they are reserved for (i) investors for which there are currently one or more discretionary management mandates with one or more entities of the Crédit Agricole group, and (ii) accounts to which these discretionary management mandates apply, (iii) in that they are reserved for all-in mandates and due to the fact that (iv) they have a different management fee.
In this context, “all in” includes at least the management fees and custody fees charged on the account (s) to which these "all in" discretionary management mandates apply.

Class N USD:
capitalisation shares which differ from shares of class **N** due to the fact they are denominated in United States dollars.

Class N EUR HEDGED:
capitalisation shares which differ from class **N** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class P:
capitalisation shares which differ from class **F** shares by the absence of (i) a management fee and (ii) capitalisation shares which differ from class F shares by the fact that (i) they have no management fee (ii) no minimum initial subscription amount and (iii) due to the fact that they are reserved for invertors that have one of more discretionary mandates with Degroof Petercam Asset Management and (iv) they are reserved for the accounts where this discretionary mandates are applicable.

Class P EUR HEDGED:
capitalisation shares which differ from class **P** shares due to the fact that the exchange risk against the euro is hedged. The manager must take measures to systematically hedge the exchange risk in relation to the sub-fund's reference currency within a tolerance threshold defined in the information on the sub-fund.
Investors are advised that implementing an exchange risk hedging policy may result in additional costs as mentioned in the information on the sub-fund.

Class Z:
capitalisation shares which differ from class **F** shares due to the fact that (i) they are reserved for investors where the minimum initial subscription amount is EUR 25,000,000 and (ii) they are subject to a different management fee and (iii) a different annual tax, it being understood that shareholders investing in this class may not request the partial redemption of their shares so as to reduce their level of investment to below the minimum initial subscription amount.

- Chile
- Spain
- France
- Italy
- Luxembourg
- The Netherlands
- United Kingdom
- Switzerland
- Finland
- Sweden
- Portugal
- Singapore (only for institutional investors)

1.2 . MANAGEMENT REPORT

1.2.1 . Information to shareholders

DPAM B (hereinafter referred to as "the SICAV") is an undertaking for collective investment (UCI) in the form of a public limited investment company with variable capital under Belgian law, which meets the conditions of Directive 2009/65/EC.

The Board of Directors has informed shareholders that changes have been made to the investment policy of the DPAM B Balanced Growth sub-fund with effect from March 26, 2026.

The ordinary general meeting of shareholders of 18 March 2026 approved, among other things, the annual accounts closed on 31 December 2025 and the distribution of a dividend to the holders of distribution shares of certain sub-funds of the Sicav as mentioned in the notice published on March 20 March 2026.

The Ordinary General Meeting of 18 March 2026 also :

- decided to renew the non-executive directorship of Mr. Lucien Van den Brande for a period of two years until the ordinary general meeting of 2028

- acknowledged the change of representative of PwC Bedrijfsrevisoren BV/PwC Reviseurs d'Entreprises SRL (“PwC”), with its registered office at Culliganlaan 5, 1831 Diegem, in accordance with article 3:60 of the Companies and Associations Code. PwC will be represented, in the exercise of its mandate as statutory auditor, from March 18, 2026, by Damien Walgrave, certified public accountant, replacing Brieuc Lefrancq SRL, itself represented by Brieuc Lefrancq, certified public accountant. Damien Walgrave is the sole director and permanent representative of Damien Walgrave BV, a member of the governing body of PwCThe Board of Directors acknowledged Mrs. Caroline Tubeuf's resignation as of 26 March 2025.

Shareholders of the DPAM B Equities DRAGONS Sustainable sub-fund and shareholders of the DPAM B Bonds EUR Short Term sub-fund are invited to attend an extraordinary general meeting on July 6, 2026, which will decide on the proposal to liquidate these two sub-funds.

Fee sharing agreements

Such agreements between, on the one hand, the SICAV or where applicable the distributor and the investment portfolio manager and, on the other hand, other distributors mentioned where relevant in the prospectus and third parties, including the shareholders of the undertaking for collective investment, may exist but are under no circumstances exclusive. These agreements do not affect the manager’s ability to perform his/her duties freely in the interests of the shareholders of the SICAV. The management fee is split according to the market conditions.

The information concerning the remuneration retroceded by the manager is taken up at the level of each sub-fund concerned under point "Charges”.

Aberdeen and Fokus Bank

As the result of the Aberdeen and Fokus Bank rulings by the European Union Court of Justice concerning discrimination in the tax laws of certain EU Member States towards foreign UCIs, the SICAV has taken steps, with the help of the management company and external consultants, to reclaim the supplementary withholding tax paid and not recovered in some countries members of the EU. The costs will be charged immediately to the current financial year.

The SICAV did not record any Aberdeen redemptions during the first half of 2026.

Class action

During the first half of 2026, the SICAV did not record any redemptions under ‘Class Actions.’

Information required under Article 3:6 §1 of the Company and Association Code

Risk factors

In view of the status of DPAM B as a société d’investissement au capital variable (SICAV, or open-ended investment company), its development and results are influenced by various risk factors, including two over which the Board of Directors has little or no control:

- subscription and redemption applications,
- direct and indirect risks inherent in financial markets.

The risk factors, which are also described in the prospectus, can be broken down as follows:

Type of risk	DPAM B Bonds EUR Short Term 1 Y	DPAM B Bonds EUR Government	DPAM B Equities Europe Small Caps Sustainable	DPAM B Equities Euroland	DPAM B Real Estate Europe Sustainable
Capital risk: Risk to capital, including the risks of erosion following redemptions of units and distributions in excess of returns	High	High	High	High	High
Inflation risk: Risk to which the value of the assets of the portfolio is exposed due to inflation	High	High	/	/	/
Market risk: Risk of a decline in the market for a given asset class that may affect the price and value of the assets in the portfolio	Low	Low	High	High	High
Credit risk: Risk of default of an issuer or counterparty	Low	Moderate	/	/	/
Settlement risk: Risk that the settlement of a transaction does not take place as expected in a given transfer system, due to a payment/delivery default by a counterparty, or a payment/delivery not conforming to the original conditions	/	/	/	/	/
Liquidity risk: Risk that a position cannot be closed at an appropriate time at a reasonable price	Moderate	Low	High	Low	High
Exchange risk: Risk of the value of the investment being affected by changes in exchange rates	/	/	Moderate	/	Moderate
Concentration risk: Risk linked to a high concentration of investments in a given class of assets or on a given market	Moderate	Moderate	Moderate	High	High
Performance risk: Risk to performance, including variability of the levels of risk depending on the stock-picking strategy of each sub-fund and/or UCI, and the existence or absence of third-party guarantees or restrictions on these guarantees	/	/	/	/	/
Risks relating to derivative products	Low	High	Low	Low	Low
Sustainability risk: Risk of the probability of occurrence of an environmental, social or governance event that could lead to an actual or potential material loss in the value of the sub-fund as a result of that event	Moderate	Moderate	Low	Moderate	Low
Hedging risk : (only applicable for hedged share classes)	/	/	/	Low	/

Other information

No significant event has occurred since the closing date of the financial year and no circumstance is likely to have a significant influence on the development of the SICAV with the exception of those mentioned under the heading « Events after the reporting period ».

All circumstances likely to have a significant influence on the SICAV are set out in this report.

The SICAV has not carried out any research and development activities.

The SICAV employs no staff and has no branches.

This report includes all the information that must be included in accordance with the Companies and Associations Code.

Remuneration and mission of the auditor

The auditor's fees in respect of its auditor mandate amount 4,060.00 EUR (excl. VAT) per year and per sub fund.

No exceptional services or special assignments were provided by the auditor or by persons with whom the auditor has developed a professional relationship during the financial year.

Regarding the use of financial instruments by the company and, where relevant, for the assessment of its assets, liabilities, financial position, and profits or losses:

1/ Statement of the SICAV's objectives and policy regarding financial risk management: in this respect, please refer to the sections relating to each sub-fund in this report.

2/ Information concerning the SICAV's exposure to price risk, credit risk, liquidity risk, and cash flow risk: in this respect, please refer to the section relating to the risk factors.

Events after the reporting period

The extraordinary general meeting of shareholders of the DPAM B Equities DRAGONS Sustainable sub-fund and the extraordinary general meeting of shareholders of the DPAM B Bonds EUR Short Term sub-fund of July 6, 2026 approved the proposal to liquidate these two sub-funds.

Regulation EU 2015/2365 of the European Parliament and the Council of 25 November 2015: transparency of securities financing transactions and of reuse (hereinafter the Regulation)

In accordance with Article 13 and Section A of the Annex to the Regulation, the SICAV must inform investors of the use it makes of securities financing transactions and total return swaps in its annual and half-yearly reports.
This information is included in each sub-fund concerned by the requirements of the Regulation under the heading "Notes to the financial statements and other information".

Use of liquidity management tools

The Directors decided, pursuant to the Royal Decree of October 15, 2018 regarding the liquidity tools, to introduce the possibility of using the following liquidity tools:

I. SWING PRICING

1. List of sub-funds that may use swing pricing:

All of the SICAV's sub-funds will use swing pricing.

2. Description of the objective, operation and methodology of swing pricing:

Objective:
The objective is to reduce performance dilution due to net inputs or outputs. The performance of the SICAV may be eroded by frequent transactions due to large inflows or outflows and the SICAV may suffer from (in)direct trading costs involved in capital movements. Swing pricing offers investors already invested in the SICAV the possibility of not having to bear the transaction costs or the cost of illiquidity in the underlying financial markets generated by the entry or exit of investors.

With swing pricing, existing investors should, in principle, no longer indirectly incur the transaction fees, which will now be directly integrated into the calculation of the net asset value (NAV) and borne by the entering and exiting investors.

Swing pricing protects long-term investors, as an investor can only be affected by swing pricing on the day of subscription/redemption.

Methodology and operation:
The swing pricing method adopted is based on the following principles:

- It is a partial swing, which implies that a certain threshold must be crossed before the NAV is adjusted;
- It is a symmetrical swing, which is activated for both subscriptions and redemptions;
- The use of swing pricing is systematic, without favoring one or more categories of investors.

The swing threshold is the value determined as a trigger event for net subscriptions and redemptions. This threshold value is expressed as a percentage of the total net assets of the sub-fund in question.

The swing threshold is always applied.

Swing factor: the direction of the swing depends on the net flow of capital applicable to a NAV.

In the case of a net inflow of capital, the swing factor linked to subscriptions of shares in the sub-fund will be added to the NAV. For net redemptions, the swing factor linked to redemptions of shares in the sub-fund in question will be deducted from the NAV. In both cases, all entering/exiting investors on a given date will have the same NAV applied.

3. Maximum swing factor:

The maximum swing factor set to a maximum of 5% of the unadjusted NAV.

4. Use of the swing pricing during the period:

The table below indicates, by sub-fund, the number of times and the dates when the swing pricing has been applied during the period covered by this report and the impact of this application for the purpose of calculating during the period covered by this report:

Transaction date	Sub-Fund	Swing threshold	swing factor	Subsription/Reimbursement size	Net amount

II. ANTI-DILUTION LEVY

1. List of sub-funds that may use the anti-dilution levy:

All of the SICAV's sub-funds may use "the anti-dilution levy".

2. Description of the objective, operation and methodology of the anti-dilution levy:

Objective:
The objective of this mechanism is to transfer the negative impact on the NAV of a sub-fund of the SICAV to the investors who generated this impact.

Methodology and operation:
If redemptions / subscriptions exceed a threshold, the SICAV may decide to impose an additional cost on incoming or outgoing investors, which will benefit the SICAV. Higher exit fees may be charged for large net outflows, and higher entry fees may be charged for large net inflows.

The anti-dilution levy will only be applied after an explicit decision of the Board of Directors of the SICAV. There is no automatic application of this mechanism. The Board of Director's decision relates both to the level of the threshold and the additional costs and whether or not to apply the mechanism if the threshold is exceeded.

It should be noted that these two mechanisms, swing pricing and the anti-dilution levy, cannot be applied to the same NAV.

3. Use of the anti-dilution levy during the period:

During the period covered by this report, no sub-fund of the Sicav used anti-dilution levy.

III. REDEMPTION GATES

1. Description of the objective, operation and methodology

This mechanism allows the SICAV to partially suspend the execution of requests for the redemption and/or repayment of units ("redemption gates") when the negative change in the balance of the liabilities of the company or sub-fund for a given day exceeds, for the day in question, a percentage (or threshold) determined by the Board of Directors.

The threshold above which this mechanism may be applied is set at 5% for all sub-funds.

The NAV calculation itself is not suspended as orders are partially executed.

Only the part of the requests for redemptions which exceeds the threshold is affected by this partial suspension. It must be applied proportionally to all requests for individual redemptions submitted by the closing date concerned.

The portion of the redemption requests not executed following this partial suspension will be postponed automatically to the next closing date, except in the event of revocation by the shareholder or if this mechanism is reapplied.

The partial suspension is always provisional.

This suspension will be carried out in accordance with the provisions of Article 198/1 of the Royal Decree of 2012.

In the event of a partial suspension of the execution of redemption and/or repayment requests, a notice to shareholders will be published on the website www.funds.dpaminvestments.com/funds.html in the "News" section.

2. Use of the redemption gates during the period

During the period covered by this report, no sub-fund of the Sicav used the redemption gates.

1.2.2 . Market overview

Global equities rose by nearly 15% in euro terms over H1 2026. A volatile first quarter, driven by the conflict between Iran and the United States, was followed by a strong rebound in the second quarter, supported in particular by easing geopolitical tensions and a rally in semiconductor stocks. Emerging market and Japanese equities delivered the strongest returns over the first half, gaining more than 28% and 17% respectively in euro terms, while US and European markets also ended the period in positive territory, up 13% and 11% respectively, albeit trailing the other regions.

In the US, after a difficult start to the year for technology stocks, large-scale investment by hyperscalers in artificial intelligence infrastructure drove a strong rebound in semiconductor stocks in the second quarter. By contrast, the energy sector delivered mixed performance, initially benefiting from the surge in oil prices triggered by the conflict in the Middle East before giving back some of its gains as the conflict eased. At the Fed, the first half was marked by a change in leadership, with Kevin Warsh taking office as Chair, and by particularly firm rhetoric on inflation. Policy rates were left

unchanged, while the 10-year US Treasury yield, after briefly falling below 4%, ended the period at around 4.5%. The dollar, meanwhile, strengthened by almost 3% against the euro during the second quarter.

European markets experienced two distinct phases over the first half. After giving up their year-to-date gains as tensions in the Middle East escalated, they rebounded in the second quarter but continued to underperform global markets owing to the region's high energy dependence. The energy, utilities and, in particular, semiconductor sectors were the best performers over the period. The ECB gradually tightened monetary policy in response to inflationary pressures fuelled by energy prices, raising its main policy rate to 2.25% in June. The 10-year German Bund yield ended the first half at around 2.9%, having traded above 3% for much of the period.

Emerging markets delivered the strongest performance among the major regions over the first half, despite significant volatility stemming from geopolitical events. South Korean and Taiwanese markets continued to perform strongly, also supported by their substantial exposure to the semiconductor sector. By contrast, Chinese and Indian markets were weighed down by disappointing growth and inflation concerns during the early part of the year. Local-currency emerging-market debt also gained in euro terms over the first half, benefiting in particular from the euro's continued depreciation against major emerging-market currencies, including the Brazilian real, Mexican peso and Chinese yuan.

Finally, Japanese equities outperformed the global market in the first quarter before performing in line with it in the second quarter, supported by expansionary fiscal policy, a pro-growth agenda and strong performance from the technology and defence sectors. Faced with persistent inflationary pressures, the Bank of Japan raised its policy rate from 0.75% to 1% in the second quarter, bringing it to its highest level in more than 30 years. Despite this monetary tightening, the Japanese yen remained historically weak against major currencies.

1.5 . SUMMARY OF THE ACCOUNTING AND VALUATION RULES

1.5.1 . Summary of rules

The below valuation rules have been drawn up based on the Royal Decree of 10 November 2006 on the accounting, annual accounts and periodic reports of certain public undertakings for collective investment with a variable number of units. In particular, the provisions of Articles 7 to 19 apply.

Fees

In order to avoid significant changes in the net asset value at the time of payment, recurring charges are provided for on a pro rata temporise basis. These are mainly recurring fees and commissions as mentioned in the prospectus (e.g. remuneration for management of the investment portfolio, administration, custodian, statutory auditor, etc.).

The start-up costs are amortised over one or more years up to a maximum of 5 years, using the straight-line method.

Accounting for purchases and sales

Transferable securities, money market instruments, units in collective investment undertakings and derivative financial instruments that are valued at their fair value are, at the time of their acquisition and disposal, recorded in the accounts at their purchase price and sale price respectively. Incidental costs, such as transaction and delivery costs, are immediately charged to the profit and loss account.

Receivables and payables

Short-term receivables and payables as well as term investments are recorded in the balance sheet at their par value.

Where the investment policy of the subfund is primarily focused on investing its assets in deposits, cash or money market instruments, investments are valued at their fair value.

Transferable securities, money market instruments and derivative financial instruments

Transferable securities, money market instruments and derivative financial instruments (option contracts, futures contracts and swap contracts) are valued at their fair value in accordance with the following hierarchy:

- If these are assets for which there is an active market operating via the involvement of third-party financial institutions, the current bid and offer prices set on this market are used. In exceptional cases, these prices may be unavailable for bonds and other debt securities; the average price will then be used and this procedure will be mentioned in the (semi-) annual report.

- If these are assets that are traded on an active market without the involvement of any third-party financial institutions, the closing price is used.

- Use of the price of the most recent transaction, provided that the economic circumstances have not fundamentally changed since this transaction.

- Use of other valuation techniques that must make maximum use of market data, comply with the economic methods usually used and be regularly calibrated and tested for validity.

The units in unlisted undertakings for collective investment with a variable number of units are valued based on the net asset value of these units.

Impairments, capital losses and capital gains resulting from the above rules are charged to the profit and loss account in the relevant sub-item under “I. Impairments, capital losses and capital gains”.

Changes in value relating to bonds and other debt securities resulting from the pro rata temporis accounting of accrued interest are charged to the profit and loss account as a component of item “II. Investment income and expenses - B. Interest".

The fair value of derivative financial instruments (option contracts, futures contracts and swap contracts) is recognised in the various balance sheet and off-balance-sheet items depending on the underlying instrument.

Underlying securities (options and warrants) and notional amounts (futures and swaps) are recognised in off-balance sheet items under the relevant headings.

If option contracts and warrants are exercised, the premiums are added to or deducted from the purchase or sale price of the underlying assets. Intermediary payments and income from swap contracts are recognised in the profit and loss account in sub-item “II. Investment income and expenses - D. Swap contracts".

Foreign currency transactions

Assets denominated in foreign currencies are converted into the currency of the subfund at the average market rate and the balance of any positive and negative differences resulting from the conversion is charged to the profit and loss account under “I.H. Foreign exchange positions and transactions”.

2 . INFORMATION ON SUBFUND DPAM B BONDS EUR SHORT TERM 1 Y

2.1 . MANAGEMENT REPORT

2.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 06/08/1992
Subscription price during this period: EUR 123.98

2.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

2.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the short-term bond market.

The portfolio of the sub-fund consists essentially of instruments issued by Investment grade* or Prime* issuers, as rated by a ratings agency such as Standard & Poor's, Moody's or Fitch. These issuers may be public authorities, companies or private issuers.

The portfolio is invested principally in bonds, treasury certificates and other debt securities or equivalent securities denominated in EUR.

The initial or residual maturity of the instruments making up the portfolio will not exceed twelve months.

This is an actively managed sub-fund.

No benchmark is used in the management of the sub-fund. Quantitative information from a broader market may be used for risk management and evaluation by the manager.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

* Investment Grade: is an interpretation in terms of financial risk of the quality of the bond's issuer. The rating agencies each use their own scale to assess the notion of risk. Investment grade ratings are between AAA and BBB- on the Standard & Poor's and Fitch scale and between Aaa and Baa3 on the Moody's scale.

*Prime: is a short-term rating that assesses the issuer's ability to meet its obligations within one year. Prime ratings are between A-1+ and A-3 on the Standard & Poor's scale, between F1+ and F3 on the Fitch scale and between P-1 and P-3 on the Moody's scale.

Investment policy

The sub-fund invests a maximum of 10% of its assets in undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed below), and by its regional public bodies. These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

2.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

2.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

2.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

2.1.7 . Policy followed during the year

At the end of June 2026, the net asset value of DPAM INVEST B Bonds EUR Short Term 1Y (Class B) stood at €253.20, corresponding to a year-to-date return of 0.97%.

Short-term interest rates continued to be largely influenced by central bank monetary policy. Over the course of the year, the 3-month Euribor increased from 2.03% to 2.32%. The higher interest-rate environment continued to support the attractiveness of short-term fixed-income investments, allowing investors to benefit from compelling yield levels while maintaining limited duration risk.

Against a backdrop of ongoing market uncertainty and volatility, demand for short-term bonds remained robust as investors sought high-quality and defensive investment opportunities.

Within the portfolio, we maintained a well-diversified exposure across sectors, ratings and geographies. Financial issuers, and banks in particular, continued to represent the largest allocation, with the majority of holdings carrying strong investment-grade ratings, typically around the A- level. Outside the financial sector, we focused on building a balanced portfolio through careful issuer selection, ensuring broad diversification across industries, credit-quality segments and regions.

2.1.8 . Future policy

- Search for bonds with a final maturity date of between 5 and 12 months.

- Corporate bonds, financials and government bonds within investment grade bonds in euros.

- Good diversification to be maintained in terms of countries, sectors and ratings.

2.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 2

2.4.2 . Asset Allocation (% of portfolio)

By Country	
Netherlands	35.53%
United States of America	18.77%
Spain	13.87%
France	10.97%
Italy	6.57%
Portugal	4.07%
Luxembourg	4.06%
United Kingdom	3.29%
Germany	2.87%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Financial, Investment And Other Diversified Comp.	29.82%
Banks And Other Credit Institutions	27.83%
Real Estate companies	8.12%
Transportation	4.90%
Communications	4.09%
Electronics and semiconductors	4.08%
Utilities	4.07%

By sector	
Pharmaceuticals and cosmetics	4.06%
Road vehicles	3.23%
Insurance Companies	2.84%
Hotels and restaurants	2.83%
Office supplies and computing	2.46%
Countries And Central Governments	1.67%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

2.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	100,742,946.30
Sales	98,506,494.00
Total 1	**199,249,440.30**
Subscriptions	39,205,299.68
Redemptions	36,336,233.16
Total 2	**75,541,532.84**
Reference average of the total net asset	120,472,249.60
Rotation Percentage	**102.69%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

All bonds have a remaining term of less than 365 days until their final maturity date. The redemption amounts at maturity have been reinvested. This results in a higher turnover rate for the fund.

2.4.4 . Subscriptions, redemptions and net asset value

Evolution of the number of shares in circulation									
Class	2024			2025			01.01.26 - 30.06.26

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

2.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determined at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

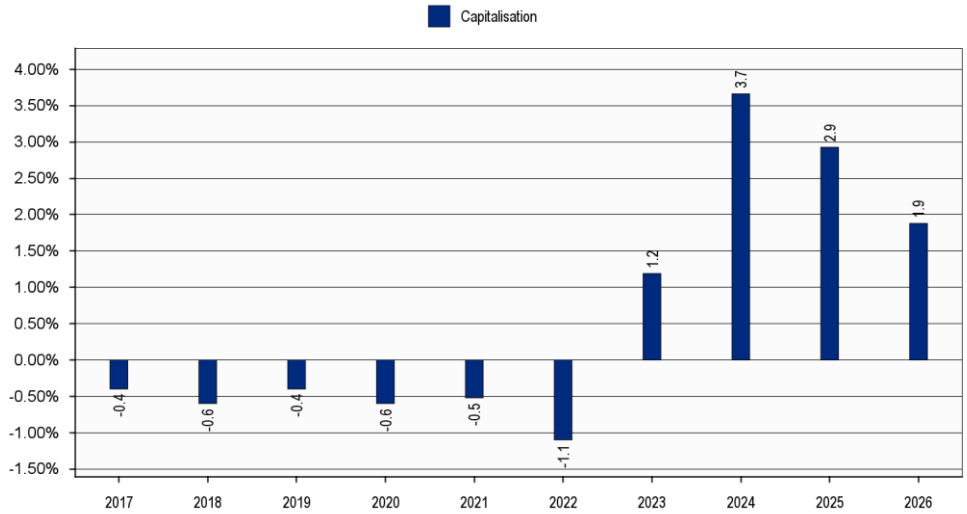

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

3 . INFORMATION ON SUBFUND DPAM B BONDS EUR GOVERNMENT

3.1 . MANAGEMENT REPORT

3.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 04/10/1996
Subscription price during this period: EUR 123.98
On 26/10/2004, the capitalization and distribution shares were divided by four.
On 30/12/2004, this sub-fund absorbed the sub-fund Belginvest Bonds within the framework of merger by acquisition of the investment company Belginvest SA by DPAM VB SA (formerly DPAM INVEST B SA.)

3.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

3.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of short-, medium- and long-term instruments such as bonds and other debt securities or equivalent securities denominated in EUR, at fixed or floating rates, offering periodic or capitalised income and issued or guaranteed by Member States of the European Union.

The portfolio may also comprise government bonds (fixed-rate and variable-rate) issued by government agencies and by local authorities, government bonds denominated in a currency other than the country's local currency, and supranational agencies.

There is no rating requirement on the instruments making up the portfolio or their issuers.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed below(*)) and by its regional public bodies.These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

3.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

3.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

3.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: JPM EMU Government Bond Total Return.

This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency. The performance is calculated by reinvesting the coupons paid by the debt securities included in the index.

J.P. Morgan Securities PLC is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of the assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

3.1.7 . Policy followed during the year

The first half of 2026 was characterized by a clear shift from a disinflationary, stable macroeconomic backdrop to a much more volatile and uncertain environment dominated by geopolitical shocks and renewed inflation risks. The early part of the year supported European government bonds through declining yields and tightening spreads, but this trend reversed sharply from March onwards following the outbreak of war in the Middle East.

Energy prices became the central driver of markets, triggering a reassessment of inflation expectations and forcing central banks, particularly the ECB, to adopt a more cautious and eventually more hawkish stance. While bond markets initially sold off amid rising inflation concerns, later months saw a partial recovery as markets repriced the persistence of the energy shock and its implications for monetary policy.

Market developments

At the start of the year, markets were driven by geopolitical uncertainty linked to US policy actions and trade tensions, which contributed to increased volatility but supported European rates as yields declined across most maturities.

This constructive environment continued into February, with a broad-based rally in European government bonds. Yields declined across the curve and spreads tightened, supported by improving macroeconomic data and a stable ECB policy stance.

However, the macro regime shifted abruptly in March following the escalation of the war in the Middle East. The surge in oil and gas prices triggered a rapid reassessment of inflation dynamics, with markets moving away from a disinflation narrative toward expectations of more persistent inflation. This led to higher rates and flatter curves, while spreads widened amid renewed risk aversion.

Elevated geopolitical tensions persisted into April, keeping both inflation and growth risks in focus. Bond markets experienced heightened volatility, with yields moving higher overall and central banks emphasizing the increased uncertainty surrounding the outlook.

In May, markets began to stabilize, although the fundamental backdrop remained dominated by high energy prices and persistent inflation concerns. Economic data remained mixed, and while yields declined somewhat, expectations for further monetary tightening strengthened as the ECB signaled its readiness to act in response to inflation risks.

By June, a perceived easing of geopolitical tensions, particularly linked to developments in the Middle East, contributed to a decline in energy prices and supported a meaningful rally in European government bonds. Yields declined across most maturities as markets repriced the inflation outlook toward normalization. Nevertheless, the ECB adopted a more assertive stance, highlighting that inflation remained above target and that further tightening could still be required.

Performance drivers

Performance over the period was driven primarily by three key factors: duration positioning, curve strategies, and country allocation.

Duration was initially a positive contributor during the early months of the year as yields declined, particularly in January and February. However, the sharp rise in yields in March following the energy-driven inflation shock led to a change in positioning, with the portfolio moving from a duration overweight to an underweight stance in order to mitigate downside risks.

Curve positioning also played an important role. The portfolio's overweight to the intermediate segment of the curve and underweight to shorter maturities contributed positively in periods of curve flattening, particularly during the later phase of the period.

Country allocation was a significant source of performance, especially during periods of spread tightening early in the year. Exposure to peripheral markets such as Italy, Spain, and Romania contributed positively during February, although these positions detracted during the spread widening observed in March. In the subsequent months, selective reallocation toward higher-yielding countries helped capture carry and benefit from renewed spread compression.

Portfolio positioning

Portfolio positioning evolved significantly over the period in response to changing market conditions.

At the beginning of the year, the strategy maintained a constructive stance, with a duration overweight and a focus on the belly of the curve to enhance carry and roll-down. This positioning was complemented by selective exposure to peripheral sovereigns to capture spread compression opportunities
Following the geopolitical shock in March, positioning shifted decisively. Duration exposure was reduced and ultimately turned into an underweight as the outlook for interest rates moved toward higher levels driven by persistent inflation. At the same time, exposure to higher-beta countries was reduced to protect the portfolio from spread widening in a risk-off environment.

In the following months, positioning became more balanced. While the underweight duration stance was largely maintained given expectations of further monetary tightening, the portfolio gradually reintroduced selective spread exposure, particularly in Southern European markets, to improve carry and benefit from potential spread compression.

By June, the portfolio remained positioned for a complex macro environment, with cautious duration exposure and a diversified allocation across countries. The combination of curve strategies, selective country positioning, and active duration management continued to reflect the need to navigate both inflation risks and geopolitical uncertainty.

3.1.8 . Future policy

Looking ahead, the key focus for markets will be on how the situation in the Middle East evolves and how this feeds through into energy prices and broader inflation dynamics. While recent developments have led to a rapid normalization in oil prices, uncertainty remains elevated regarding the sustainability of this move, particularly given the fragility of supply conditions and the risk of renewed tensions. In this respect, several factors will be critical to monitor, including the pace at which oil flows through key chokepoints are genuinely recovering, whether the rebound in supply is driven by a durable restart in production or merely the release of existing inventories, and the relative contribution of key producers such as Iran versus the Gulf states. These elements will determine whether the recent decline in energy prices can be sustained.

In this context, the reaction of the ECB will be crucial. The Governing Council has already signaled a more assertive stance, reflecting concerns that the energy shock could continue to broaden into underlying inflation. As such, the interplay between geopolitical developments, oil market normalization, and monetary policy responses will be the main determinant of the trajectory of interest rates and as such portfolio positioning going forward.

3.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

3.4.2 . Asset Allocation (% of portfolio)

By Country	
Germany	28.69%
Italy	20.30%
France	16.40%
Spain	8.72%
Belgium	4.99%
Romania	3.85%
Slovakia	3.61%
Netherlands	2.70%
Lithuania	1.94%
Portugal	1.82%
Finland	1.63%
Greece	1.33%

By Country	
Austria	1.13%
Latvia	1.05%
Ireland	0.84%
Poland	0.76%
Slovenia	0.24%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Countries And Central Governments	91.72%
Cantons, Federal States, Provinces Etc.	4.99%
Transportation	2.43%
Other	0.86%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

3.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	298,235,726.07
Sales	289,455,262.25
Total 1	**587,690,988.32**
Subscriptions	89,219,495.75
Redemptions	92,482,724.49
Total 2	**181,702,220.24**
Reference average of the total net asset	921,329,403.34
Rotation Percentage	**44.07%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

3.4.4 . Liabilities relating to the positions on financial derivative instruments

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

3.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determined at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

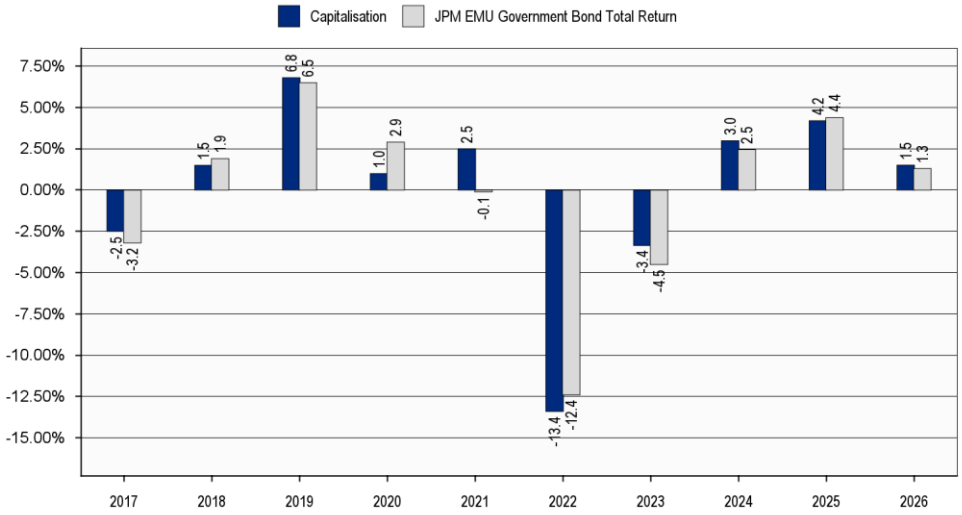

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 june 2026, 16.11%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

4 . INFORMATION ON SUBFUND DPAM B EQUITIES EUROPE SMALL CAPS SUSTAINABLE

4.1 . MANAGEMENT REPORT

4.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 07/12/1997.
Subscription price during this period: EUR 123.98.
On 16/12/2001 the shares were divided into three.
The sub-fund received all the assets of the DPAM CAPITAL B Equities Belgium sub-fund through a merger by absorption which took effect on 26 February 2021.

4.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

4.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is investment in shares of European companies with a small market capitalisation (1) at European level, selected on the basis of compliance with environmental, social and governance (ESG) criteria, and any securities giving entitlement to the capital of these companies.

The following are considered to be equivalent companies: companies resident in non-European countries that have a significant proportion of their assets, activities and profit or decision-making centres in Europe and which meet the criteria stated above. The investment policy favours the selection of companies based on their specific qualities, with no particular rules as to geographic or sectoral distribution.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

The sub-fund invests mainly in European companies representing a small market capitalization, i.e. companies whose market capitalization does not exceed the largest market capitalization among the companies making up the MSCI Europe Small Cap Net Return index at the time of the initial investment

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

4.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

4.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

4.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Small Cap Net Return

This index is representative of the small-cap equity market in developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance and to determine the maximum authorized market capitalization of the underlying securities (see "Objectives of the sub-fund" above). The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

4.1.7 . Policy followed during the year

The DPAM Invest B Equities Europe small caps fund invests in high quality, sustainable undervalued small cap companies with a minimum investment horizon of 3 to 5 years. The fund focuses on attractively valued sustainable quality stocks. For us, these are companies with a strong market position, active in attractive market segments. They have excellent management teams focused on sustainable value creation, make efficient use of their (mainly) internally generated cash flow and score well on our sustainability criteria. The fund pursues a bottom-up buy and hold approach. We reduce the huge universe by means of quantitative and qualitative filters and select a limited number of attractively valued sustainable quality stocks. Interviews with management and company visits are an important aspect of the analysis, as are the insights of our buy-side analysts. The geographical and sector allocation are the result of bottom-up stock picking but must conform to certain limits. 2026 has seen a rather strong first half for equity markets which was led by the so called AI winners (semiconductor equipment names, IT hardware related names, especially exposed to infrastructure & hyperscalers), industrials (especially the ones exposed to energy transition investments, datacenter build out, mining & general infrastructure investments), at the detriment of the so called AI losers (software, IT services, some business models in business services, media,..), while also Financials (strong credit growth, strong NII growth), Energy & utilities performed well, while Healthcare, Staples, Real Estate & Consumer Discretionary sectors underperformed (on the back of higher interest rates, a consumer under pressure and regulatory pressures (for healthcare equipment names). The European small cap fund performed very strong both in absolute and relative terms (+11.07%, which corresponds to an outperformance of 5.67% for the F-share class). Main positive contributors were semi-equipment names like Besi, Inficon & VAT (all 3 leading semi-equipment suppliers, that benefited from the semi-capex supercycle where the cycle itself recovered, which got reinforced by demand for AI compute and the scarcity in memory chips which are in high demand), Prysmian (Global leading cable manufacturer that benefited from strong offshore wind order intake, the fiber optic cable business that benefited from very high demand from hyperscalers), Diploma (the UK value added distributor that upgraded their organic growth figures for 2026 already 2x this year with their aerospace exposure via Peerless doing particularly well), Computacenter (IT hardware reseller with a UK, German & US exposure that issued strong q1 numbers and a significant upgrade to full year numbers helped by strong hyperscaler demand in the US and demand recovery in their 2 other geographies) & Lotus Bakeries (continued strong demand for caramelized biscuits in the US, while new capacities have been put in place in the US, Asia and Europe which should facilitate strong future growth). Royal Unibrew (the Nordic multi-beverage company lost a long held important distribution contract with Pepsico), CTS Eventim (leading European ticketing company; They lost a btb contract which leads to mid-single digit downgrade of 2026 earnings, while the new CFO has come out with an overly conservative guidance), and Bechtle (the German IT reseller suffered from spiking memory prices that makes investors concerned on demand and availability of IT hardware like desk & laptops) were underperformers..

4.1.8 . Future policy

We are maintaining our focus on quality sustainable names while remaining disciplined on valuation and staying away from value traps i.e. disrupted industries and highly geared companies. The European small cap segment remains an attractive asset class. Studies have shown that in the longer-term small caps perform better than the universe of larger cap stocks. The high-quality sustainable companies on which we focus in this fund perform strikingly better in the longer term. For 2026 we remain constructive on the asset class given the long period (5 years) of underp3-yearance of European small caps (which is the longest period of underperformance of the last 25 years), relative valuation at extremely attractive levels, the asset class being very under owned and economic leading iindicators improving There is, in our view, an asymmetric positive opportunity to invest in the asset class on a 3 year view. Smallcap investing is, for us, all about stockpicking. We added some attractively valued quality companies over the course of the first half of 2026. Over the course of the first half we bought for instance stakes in Bawag (niche banking activities in Europe which with a private equity approach creates value through optimizing acquired assets; did a very attractive deal in Ireland), Rational (world leader in sophisticated ovens; penetration of their products is still very low in the US & Asia, but gaining traction), Alzchem (sole Western supplier of high quality creatine and Nitroguanadine used for healthy food&drinks & defense applications respectively; Both products are sold out, but additional capacity is ramping up which should provide visible growth for years to come), CVS group (leading vet practices player in the UK which should benefit from a more favorable outcome of the CMA review) & Nordnet (an online financial services platform in the Nordics which benefits from growth in the savings market, a top notch IT platform & market share gains from bulge bracket banks)

4.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

4.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	46,682,595.79
Sales	125,595,159.12
Total 1	**172,277,754.91**
Subscriptions	15,673,769.20
Redemptions	94,018,503.56
Total 2	**109,692,272.76**
Reference average of the total net asset	275,103,471.41
Rotation Percentage	**22.75%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

4.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determined at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

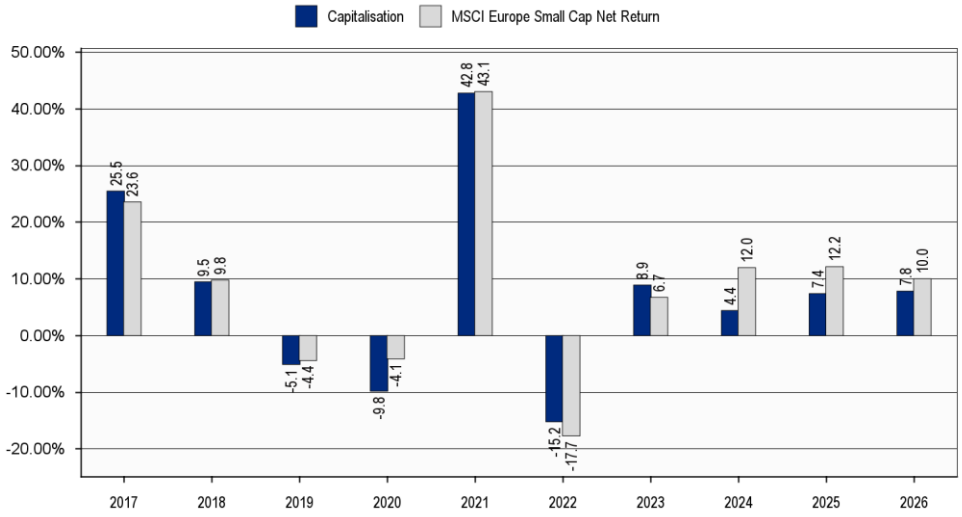

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 june 2026, 28.51%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

5 . INFORMATION ON SUBFUND DPAM B EQUITIES EUROLAND

5.1 . MANAGEMENT REPORT

5.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 19/04/1998
Subscription price during this period: EUR 123.98

On 16/12/2001, the shares of the sub-fund were divided by two.

5.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

5.1.3 . Objective and main aspects of the investment policy

Objective

The principal objective of this sub-fund is investment in shares of companies having their registered office in one of the Member States of the European Union which have the euro as its national currency, and any securities giving entitlement to the capital of these companies. The following are considered to be equivalent companies: other companies that have a significant proportion of their assets, activities and profit or decision-making centres in the aforementioned countries.

More specifically, at least two-thirds of the sub-fund’s investments are invested in stocks of companies which have their registered office or which carry out their primary economic activity in one of the European Union Member States which use the Euro as their national currency and any securities giving entitlement to the capital of these companies.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR Regulation 2019/2088.

5.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

5.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

5.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI EMU Net Return

This index is representative of the large and mid-cap equity market in developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the EMU zone.
The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

5.1.7 . Policy followed during the year

In a context of sharp oil price volatility on the back of the Iran conflict, as well as ongoing strong momentum in AI infrastructure buildout, the fund had a positive return over the first half. With the exception of healthcare and consumer discretionary, all sectors added to the performance.

Within IT leading edge semiconductor equipment companies ASML and ASMI, as well as analog power semiconductor holding Infineon saw strong performances thanks to accelerating demand from AI applications.

In this context of AI infrastructure buildout and its requirements for power grid reinforcement, holdings in utilities (Iberdrola, EON) benefited performance as well, further reinforced by ongoing strong earnings reports.

Positions in Materials had a positive impact. Symrise and Air Liquide were the main contributors. The former posted resulted better than expected results while the latter started to see an improving order outlook helped by its electronics division as well as ongoing decarbonization projects after a period of normalization.

Finally, the communication services sector also made a significantly positive contribution, explained by holdings in Orange and Telecom Italia in the context of industry consolidation. Orange reported better than expected results while Telecom Italia, which attracted takeover interest from Poste Italiane.

Important changes to stock selection were made across several sectors, driven by market volatility and changes in conviction. Within Healthcare, Recordati was sold after a takeover bid from private equity firm CVC.

With regards to consumer discretionary the decision was taken to exit automobile manufacturers (Stellantis) and increase other parts of the value chain (Continental, Infineon). Whereas manufacturers are facing an increasing global oversupply, this is not the case for the high-end tires segment and analog chips.

In communication services, Telecom Italia was added based on the view that its market was in the earlier stages of consolidation. Still on the defensive side, in utilities, a new position was started in Veolia. The French company is gradually changing its business mix which will result in higher and more profitable growth over the medium to long term. According to our analysis, this transition is still not correctly reflected in valuation.

In financials new holdings were added in Bawag, AIB Group and Piraeus. Our research suggested further value creation potential from Bawag's acquisition strategy. AIB Group was expected to benefit from ECB rate increases. Piraeus was added based on the view that growth in the Greek banking industry is set to outpace that of European peers.

Finally, in industrials new positions were added in ACS and Leonardo. ACS, the Spanish construction company, is expected to benefit not only from the buildout of datacenters in the US but also in Europe where the expansion is at an earlier stage. Leonardo was added by reducing the exposure to Germany defense exposure, a decision explained by a more constructure view on air versus land defense solutions. Within the same industry profit was taken on Ryanair to buy a holding in IAG Group, mainly on relative valuation grounds.

5.1.8 . Future policy

For the remainder of the year, fund managers will continue to look for opportunities to add weight to companies with good business models that stand to benefit from developing structural growth trends (modernization of infrastructure, energy efficiency, climate change, aging society, technological disruption, innovative therapies etc.). At the same time the goal is to retain a healthy level of portfolio diversification.

5.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

Graphic art and publishing	0.59%
Coal mining and steel industry	0.52%
Miscellaneous consumer goods	0.34%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

5.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	233,329,296.86
Sales	594,351,136.81
Total 1	**827,680,433.67**
Subscriptions	145,293,824.46
Redemptions	515,149,224.15
Total 2	**660,443,048.61**
Reference average of the total net asset	657,288,309.60
Rotation Percentage	**25.44%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

5.4.4 . Liabilities relating to the positions on financial derivative instruments

Liabilities on forwards

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

5.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determined at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

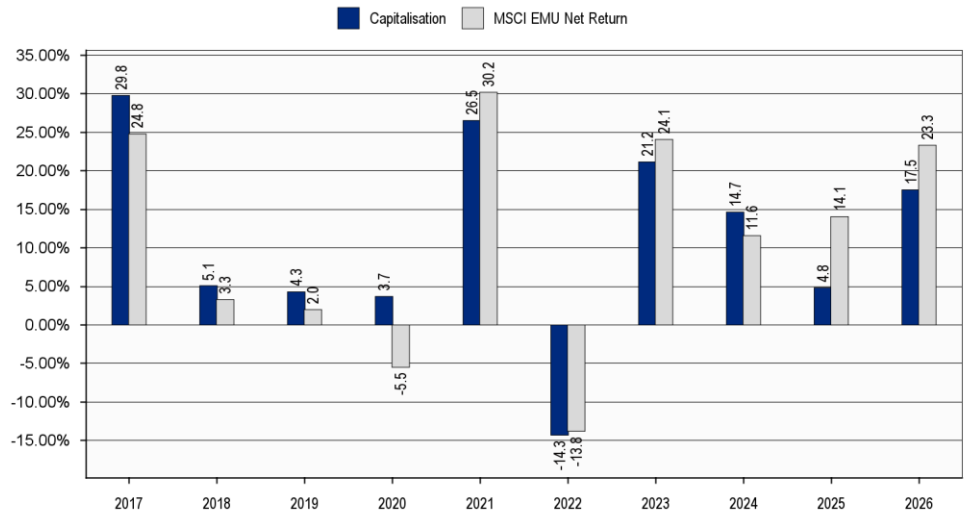

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means the portfolio manager's goal isn't to match a benchmark's performance. The benchmark is used just to compare performance.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 Juin 2026 :

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 june 2026, 25.03%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Investment restrictions and overruns

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 30/06/2026, the fund was invested for 10.085% in the issuer ASML Holding NV (NL0010273215). The breach was caused by market fluctuations. Breach closed as of NAV date 01/07/2026 (T+1).

6 . INFORMATION ON SUBFUND DPAM B REAL ESTATE EUROPE SUSTAINABLE

6.1 . MANAGEMENT REPORT

6.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 27/12/1999
Subscription price during this period: EUR 100.00

6.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

6.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders the highest possible long-term return through a balanced management policy, by investing its assets in securities representative of the real estate sector, in its broad sense, in Europe. These securities include but are not limited to shares of REITs, real estate certificates, shares of real estate companies and companies active in real estate promotion and development, shares in real estate debt investment funds etc. These companies are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

More precisely, the sub-fund invests at least two-thirds of its assets in securities representative of the real estate sector issued by companies having their registered office or carrying out their primary economic activity in Europe.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, as well as units in undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR Regulation 2019/2088.

6.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

6.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

6.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: GPR Europe UK 25% Capped Net Return

This index is representative of real estate companies listed in developed Europe. The GPR Europe UK 25% Capped Net Return is a tailor-made index for DPAM calculated by Global Property Research. In this index, the weight of the United Kingdom is capped at 25%.

Performance is calculated by reinvesting net dividends (Net Return).

Global Property Research is listed in the register held by ESMA (European Securities and Markets Authority).
The benchmark is used to compare the performance.

The risk and return profile of the sub-fund may be aligned with that of the benchmark as the sub-fund invests mainly in the same securities as the benchmark. This may result in a tracking error of less than 3%.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

6.1.7 . Policy followed during the year

At the start of the year, the European listed real estate portfolios benefited from favorable capital market conditions as interest rates eased and markets were heading to a consensus of controlled inflation and stable rates. We saw strong debt issuance activity and compressed financing spreads. These conditions supported refinancing initiatives and shareholder return programs, including share buybacks. Better performing sub-sectors were logistics demonstrating strong operating fundamentals, healthcare, and the residential sector. Especially the latter benefited from the Heavy Asset Low Obsolescence (HALO) trade, which global investors diversifying their AI exposure into tangible assets.

Market conditions became significantly more challenging in March, after the start of the war in the Middle East. Higher oil prices meant higher expected inflation. Thus, rates rose again, challenging the capital-intensive real estate sector that is generally seen as a bond proxy by many strategists and general equity investors.

These escalating geopolitical concerns, combined with higher interest rates, triggered a broad pullback across risk assets.

Against this uncertain backdrop, portfolio construction became more defensive, illustrated by a weight increase in Swiss companies, and the continued preference for companies with solid balance sheets and carefully selected exposures. We remained vigilant regarding inflationary developments, and changes in interest-rate expectations, maintaining allocations to areas offering defensive characteristics and greater inflation resilience, including healthcare and selected retail segments enjoying an attractive yield spread compared to the cost of financing.

Operational execution remained a key differentiator throughout the first half, which made us boost our positions in companies that raise fresh equity to invest in highly profitable projects: Merlin Properties in data centers, Sirius Real Estate in property for the defense sector and VGP in brownfield logistics projects.

We favored companies capable of delivering earnings growth through internal initiatives, supported by stable occupier demand and disciplined capital deployment. Although financing costs increased somewhat and geopolitical risks persisted, underlying fundamentals across the European listed real estate market continued to hold up well.

6.1.8 . Future policy

Looking ahead, our investment approach will remain centered on operational quality and accretive growth opportunities. We continue to favor businesses with strong financial positions, visible earnings trajectories, and attractive risk-adjusted return potential. In our view, the market has largely incorporated the implications of a prolonged higher-interest-rate environment, and potential future valuation adjustments are more likely to occur gradually through inflationary effects than through a significant correction in asset prices.

In this, fund we will continue to select companies with strong balance sheets that are able to benefit from growth opportunities driving superior to average EPS growth and total returns and preferably with a lower-than-average volatility.

We find these characteristics mainly in the logistics subsector and expect to remain overweight here. We also continue to like the retail sector offering a superior NOI yield compared to the rest of the sector.

Meanwhile, we'll closely monitor interest rate evolutions and inflation expectations that could impact our portfolio construction, mainly in residential. For offices we expect to remain underweight as fundamental headwinds persist.

On the real estate market, tenant demand and leasing markets are expected to remain broadly supportive, while management teams are likely to maintain their focus on organic growth and operational performance. Capital allocation discipline will continue to be critical, with asset recycling and targeted disposals serving as important sources of funding for new investments.

Overall, we maintain a constructive outlook. Access to funding has remained stable despite the Iran conflict, while sector valuations continue to present attractive opportunities which finds its best illustration in the end of June bid made by the US giant Prologis on the largest UK REIT Segro.

6.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5

6.4.2 . Asset Allocation (% of portfolio)

By Country	
United Kingdom	23.69%
France	21.86%
Germany	14.95%
Belgium	13.10%
Switzerland	10.99%
Sweden	6.69%
Spain	5.45%
Netherlands	2.15%
Luxembourg	0.74%
Jersey	0.38%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Real Estate companies	97.17%
Miscellaneous services	1.55%
Communications	1.28%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	56.02%
GBP	26.30%
CHF	10.99%
SEK	6.69%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

6.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	40,020,905.14
Sales	91,350,992.40
Total 1	**131,371,897.54**
Subscriptions	30,749,784.96
Redemptions	93,161,765.61
Total 2	**123,911,550.57**
Reference average of the total net asset	484,987,487.52
Rotation Percentage	**1.54%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

6.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determined at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

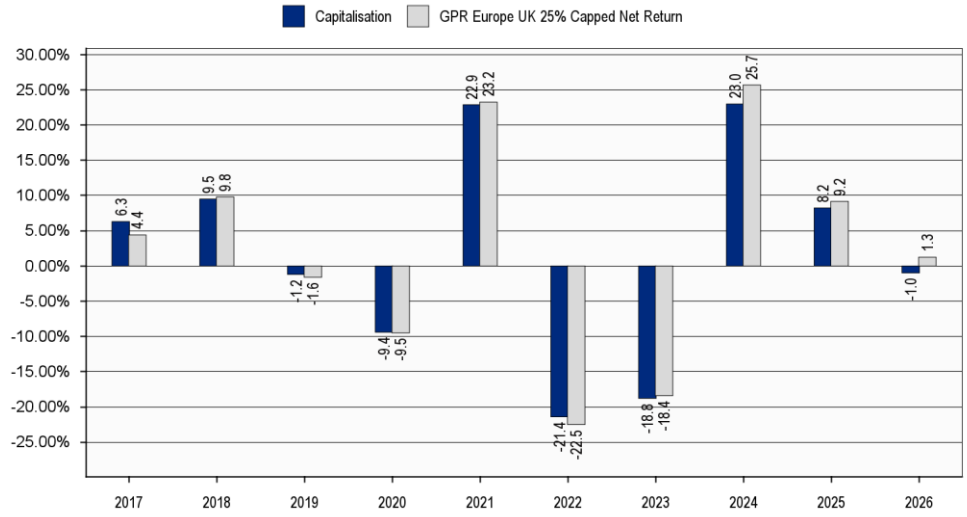

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 june 2026:

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 june 2026, 42.56%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

7 . INFORMATION ON SUBFUND DPAM B EQUITIES WORLD SUSTAINABLE

7.1 . MANAGEMENT REPORT

7.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 14/12/2001

Subscription price during this period: EUR 24.79

F.N.I.C. initial value as at 25/02/1993. On 16/12/2001, the sub-fund received in contribution all the active and passive situation of the investment company F.N.I.C, in a report/ratio of one share F.N.I.C against three shares of DPAM INVEST B Equities World Sustainable in each class of shares.

The sub-fund has received the entire assets of the DPAM INVEST B Equities World Dividend sub-fund through a merger by absorption that took effect on 26 February 2021.

7.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

7.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer investors exposure to equities and/or equity-equivalent securities, issued by companies without any geographical restrictions, and to all securities giving entitlement to the capital of these companies, selected on the basis of a strict methodology in terms of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund invests mainly in equities and/or equity-equivalent securities issued by companies, without any geographical restrictions, and in all securities giving entitlement to the capital of these companies.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV’s assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

7.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

7.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

7.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI AC World Net Return.

This index is representative of the large and mid-cap equity markets of 23 developed countries and 26 emerging countries (as defined by MSCI and mainly according to the country of incorporation and the country of primary listing of its securities) around the world.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the sub-fund's sustainable investment objective. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund's sustainable investment objective is achieved.

7.1.7 . Policy followed during the year

At the end of June 2026, the net asset value of DPAM B Equities World Sustainable (F share) amounted to EUR 471.83. This represents a 9.02% increase since the beginning of the year.

Markets have been highly polarized, with investors rewarding the direct enablers of artificial intelligence, most notably semiconductors, where accelerating demand and supply constraints continued to support earnings expectations and valuations—while sharply penalizing companies perceived to be exposed to disruption. Software and business services were particularly affected, as concerns that AI could lower barriers to entry, automate workflows and weaken traditional pricing models triggered further multiple compression. More broadly, the market increasingly discounted the durability of established competitive advantages, often overlooking proprietary data, switching costs, network effects, regulatory positioning and deeply embedded customer relationships. This broad-based reassessment of corporate moats, alongside a preference for scarcity-driven pricing power over differentiation, resulted in another leg of underperformance for quality-oriented companies.

Our TMT exposure made a strong contribution, representing more than the total return of the portfolio over the period. Our semiconductor companies exposed to AI (SK Hynix, TSMC, Applied Materials and ASML) made a solid contribution, supported by the ongoing build-out of AI infrastructure. Within software, fears of AI disruption pressured valuation multiples across the sector (Microsoft, ServiceNow and SAP), with Palo Alto providing only a limited offset. In Media & Entertainment, the strong performance of Alphabet and SoftBank was slightly offset by the weak returns of Netflix and Spotify. We exited Oracle and Xiaomi. We bought Micron, SK Square, Infineon, ASM International, Samsung Electronics, Spotify and SoftBank.

Our financials exposure, the second-largest sector exposure, detracted from performance. The most notable factor was the perceived risk of AI disruption impairing the moats and valuations of several financial services companies (KKR, Blackstone, Mastercard and S&P Global) and insurance brokers (AJ Gallagher). 3i Group was also a material detractor. However, banks made a positive contribution on the back of higher-for-longer interest rates and a resilient macroeconomic backdrop. We added Japanese banks, Canadian banks (Bank of Montreal and Royal Bank of Canada) and US banks (Citigroup and Goldman Sachs), and optimized our European bank exposure by exiting Intesa Sanpaolo and adding ABN AMRO, AIB and BAWAG. We also exited KKR and AJ Gallagher.

Our industrials exposure made a positive contribution, mostly stemming from our capital goods companies exposed to the AI build-out (Eaton, Schneider and Trane) and those exposed to aerospace (General Electric, HEICO and Howmet), which were bought following the drop induced by the Middle East conflict. We also added exposure to Hitachi, Mitsubishi Electric, Parker Hannifin, Sandvik and Siemens Energy.

Healthcare detracted from performance, entirely driven by Boston Scientific, as key product lines slowed significantly. We added AbbVie and AstraZeneca to our pharmaceutical exposure, diversified our medical technology exposure with Edwards Lifesciences, and bought UnitedHealth.

Our consumer exposure made a negative contribution, driven by the weak performance of Booking, MercadoLibre and Alibaba, only partly offset by the good performance of Royal Caribbean Cruises and Richemont. We added Coca-Cola and TJX to the portfolio.

We built an exposure to utilities through stakes in Iberdrola, Engie and NextEra, which contributed positively.

Our materials exposure made a limited contribution. We added exposure to Norsk Hydro when the Middle East conflict started and initiated a rotation towards ArcelorMittal when signs of a peace deal appeared.

7.1.8 . Future policy

DPAM B Equities World Sustainable will continue its strategy of investing in high-quality large-cap companies with strong ESG credentials. These businesses are well-positioned to benefit from various long-term growth trends, including artificial intelligence, digital transformation, personalized and affordable healthcare, the green energy transition, luxury, travel, electronic payments, streaming. Our investment philosophy is grounded in the conviction that sustainable, profitable growth drives stock prices over the long-term. Our high-quality approach is differentiated because of a rigorous ESG process and portfolio diversification. This results in a resilient portfolio that aims to perform well in different economic environments.

7.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

7.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	1,013,196,956.05
Sales	1,642,283,262.71
Total 1	**2,655,480,218.76**
Subscriptions	77,840,217.66
Redemptions	642,875,601.05
Total 2	**720,715,818.71**
Reference average of the total net asset	1,658,625,974.12
Rotation Percentage	**116.65%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

The year has been driven by a volatile and uncertain environment, driven by DeepSeek, liberation day, AI disruptions impacting the moat of many incumbents. In that context, we made some structural changes to the portfolio and made use of the volatility to seize opportunities.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

7.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determined at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

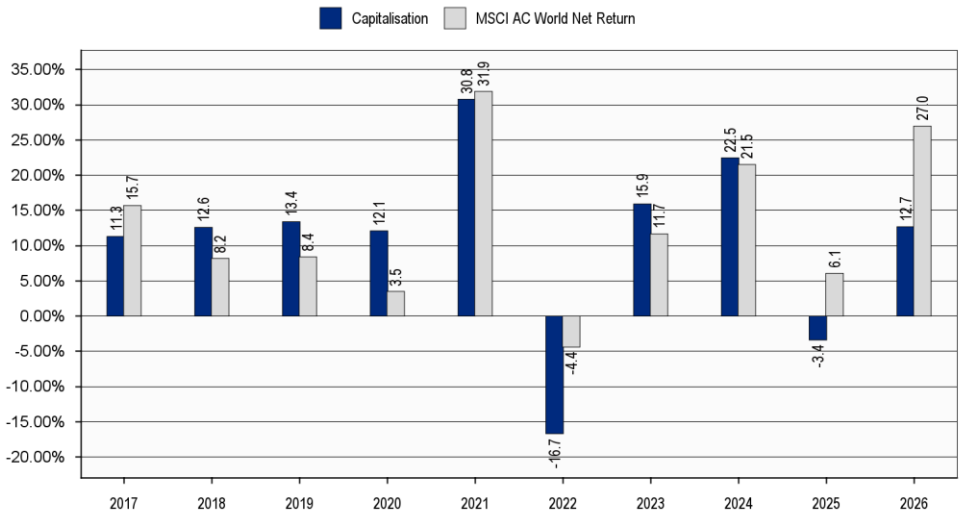

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 35.10%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

8 . INFORMATION ON SUBFUND DPAM B EQUITIES EUROPE DIVIDEND

8.1 . MANAGEMENT REPORT

8.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 16/09/2002
Subscription price during this period: EUR 100.00

8.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

8.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the equity market.

The sub-fund's portfolio consists mainly of shares of companies having their registered office in a European country. Included in the category equities of companies that have their registered office in a European country are the equities of other companies that hold a significant proportion of their assets, activities, profit centre or decision-making centre in a European country.

The sub-fund may also invest in any other securities giving entitlement to the capital of the companies referred to above.

At least 50% of the portfolio must consist of equities and other securities mentioned above that generate a dividend yield or an expected dividend yield higher than the average represented by the MSCI Europe index.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Shareholders of the sub-fund have no capital protection or guarantee.

Investment policy

The sub-fund invests up to 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

8.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

8.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

8.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Net Return.

This index is representative of the large and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe. The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

8.1.7 . Policy followed during the year

In the first semester of 2026, the sub-fund delivered a positive absolute and relative performance against the benchmark MSCI Europe. This was partly explained by a selection effect (as opposed to style or factor effect), with all but one sector contributing positively. In particular, the stock selection within consumer staples contributed positively, with Carrefour benefitting from improved portfolio to show rising margin and improving market share performance in France. Also, Belgian brewer ABI continued to progress on its return to growth trajectory and Ingredient company Tate & Lyle is now subject to takeover interest from peer company Ingredion. Besides, Materials was another sector of strong contribution to alpha with PM having wisely taken advantage of depressed share price in Syensqo post conservative guidance to accumulate shares in the Belgian specialty chemical company. In Healthcare, Merck kgAa had a strong run, supported by positively inflecting earnings revision across all 3 divisions combined with a well-received large acquisition in lifesciences. ABN did particularly well during the semester, supported by continued progress on its cost cutting plan combined with improving capital allocation demonstrated. Finally, midcap Belgian dredging company DEME contributed positively to fund performance with the group benefitting from solid orderbook and growing margin

During the period, the fund took profits in a few companies for valuation and / or DVD yield reasons, in line with its process (EDP, DEME, Aperam, ABI).

On the other hand, the portfolio management team identified new opportunities in 3i Group (excessive share price correction following disappointing in like for like sales of its ACTION retail format), Fresenius AG (market too negative on German healthcare reform impact for its German hospital business Helios) or CTP (PM team does not view the premium growth profile of this Eastern Europe focused real estate logistics developer as impaired).

In telecom operators, the fund bought into telecom Italia as the deleveraging benefits combined with a new more resilient and above average growth profile powered a rally in the Southern European group. At the end of the period, Poste italiana launched a takeover bid on Telecom Italia, further strengthening the rally.

8.1.8 . Future policy

H1 2026 has been characterized by continuously high equity market concentration around Artificial intelligence but also the Middle East conflict impacting energy markets and populist policies impacting growth & deficits across the globe. In Europe, a transition by Germany, Europe’s largest economy from chronic under-spending to fiscal expansion could generate positive spillovers across neighboring countries, which should also benefit from this renewed fiscal impulse. At the EU level, a more pragmatic approach to national debt dynamics has emerged, potentially creating additional room for investment. That said, the recovery in the manufacturing sector remains muted (ex-selected verticals restocking due to energy prices volatility), and recent tariff agreements with the Trump administration have failed to generate meaningful enthusiasm across key European industries. Looking ahead, a potential end to the war in Ukraine would materially reduce Europe’s risk premium, notably through lower energy prices. Overall, light investor positioning in Europe after years of sustained outflows, has created attractive opportunities. Going forward, valuation-driven fund managers are expected to remain focused on resilient business models, strong balance sheets, and strong free cash flow generation, supporting dividend paying potential.

8.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	67.76%
GBP	17.11%
CHF	7.50%
DKK	3.99%
NOK	3.64%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

8.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	52,062,395.38
Sales	52,986,726.66
Total 1	**105,049,122.04**
Subscriptions	2,371,613.82
Redemptions	4,167,358.55
Total 2	**6,538,972.37**
Reference average of the total net asset	90,819,523.29
Rotation Percentage	**108.47%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

The turnover rate is explained by flows, active management due to a change in economic regime and increasing consequences from AI on varying business models, an increase in volatility offering more opportunities.

8.4.4 . Subscriptions, redemptions and net asset value

Evolution of the number of shares in circulation

Class	2024			2025			01.01.26 - 30.06.26

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

8.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

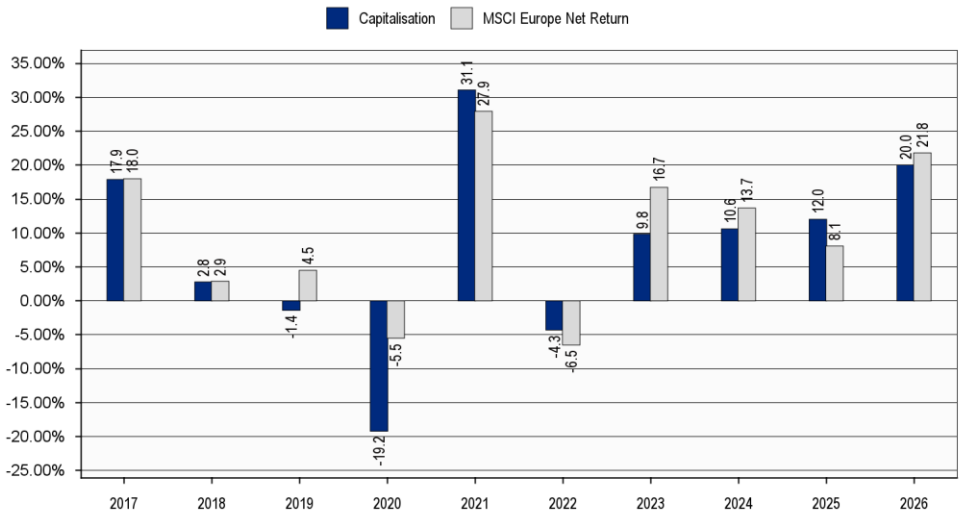

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 27.44%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

9 . INFORMATION ON SUBFUND DPAM B EQUITIES EUROPE SUSTAINABLE

9.1 . MANAGEMENT REPORT

9.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 31/12/2002
Subscription price during this period: EUR 100.00

On 18 November 2020, the sub-fund received all the assets and liabilities of the DPAM INVEST B Equities Europe sub-fund through a merger by absorption. The merger took effect on 26 November 2020.

9.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

9.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to enable shareholders to benefit from the growth of shares of European companies or other equivalent securities, selected on the basis of a strict methodology in terms of respect for environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

To achieve its objective, the sub-fund invests in shares of European companies that meet certain environmental, social and governance criteria (ESG). The following are considered to be equivalent: other companies belonging to the aforementioned universe that have a significant proportion of their assets, activities and profit or decision-making centres in Europe. The sub-fund may also invest in any other securities giving entitlement to the capital of the companies referred to above.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities.

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV’s assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

9.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

9.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

9.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI Europe Net Return.

This index is representative of the large and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in Europe.
The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performances.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the sub-fund's sustainable investment objective. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund's sustainable investment objective is achieved.

9.1.7 . Policy followed during the year

In a context of sharp oil price volatility on the back of the Iran conflict, as well as ongoing strong momentum in AI infrastructure buildout, the fund had a positive return over the first half. With the exception of healthcare and communication services, all sectors added to the performance.

Within IT leading edge semiconductor equipment companies ASML and ASMI, as well as analog power semiconductor holding Infineon saw strong performances thanks to accelerating demand from AI applications.

In this context of AI infrastructure buildout and its requirements for power grid reinforcement, holdings in utilities (Iberdrola, EON) benefited performance as well, further reinforced by ongoing strong earnings reports. The same dynamic was seen in industrials where electricals (Siemens Energy, Schneider Electric) and machinery stocks (Atlas Copco) reported strong orders for their datacenter exposed divisions.

Positions in Materials had a positive impact. SSAB, producer of low emission specialty steel, was supported by strong pricing dynamics in the context of an improving supply demand outlook.

Finaly the banking sector extended its positive trajectory from last year. Interest income is benefitting from a pickup in loan demand and high interest rates. Moreover, company specific capital and cost efficiency measures as well as M&A strategies from banks held in the fund like Bawag, Santander and ABN Amro contributed positively to performance.

Important changes to stock selection were made across several sectors, driven by market volatility and changes in conviction. Within Healthcare, Astra Zeneca was reduced to the benefit of Roche and Novartis where potential upside from investments in new drug development was relatively more undervalued.

In financials new holdings were added in Bawag, HSBC and Bankinter, at the cost of BCP. Our research suggested further value creation potential form Bawag’s acquisition strategy. Both HSBC and Bankinter are expected to see structurally higher growth in their respective fee an commission businesses compared to industry. The remaining holding in private credit company ICG Group was sold to finance a position in CVC, reflecting a preference for the latter’s business mix.

Finally, with regards to Materials, the remaining position in DSM Firmenich was switched into ingredients peer Symrise where we expect a stronger improvement in profitability.

9.1.8 . Future policy

For the remainder of the year, fund managers will continue to look for opportunities to add weight to companies with good business models that stand to benefit from developing structural growth trends (modernization of infrastructure, energy efficiency, climate change, aging society, technological disruption, innovative therapies etc.). At the same time the goal is to retain a healthy level of portfolio diversification.

9.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

9.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	242,418,459.82
Sales	452,843,089.49
Total 1	**695,261,549.31**
Subscriptions	70,616,313.18
Redemptions	285,204,222.67
Total 2	**355,820,535.85**
Reference average of the total net asset	884,646,044.66
Rotation Percentage	**38.37%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

9.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

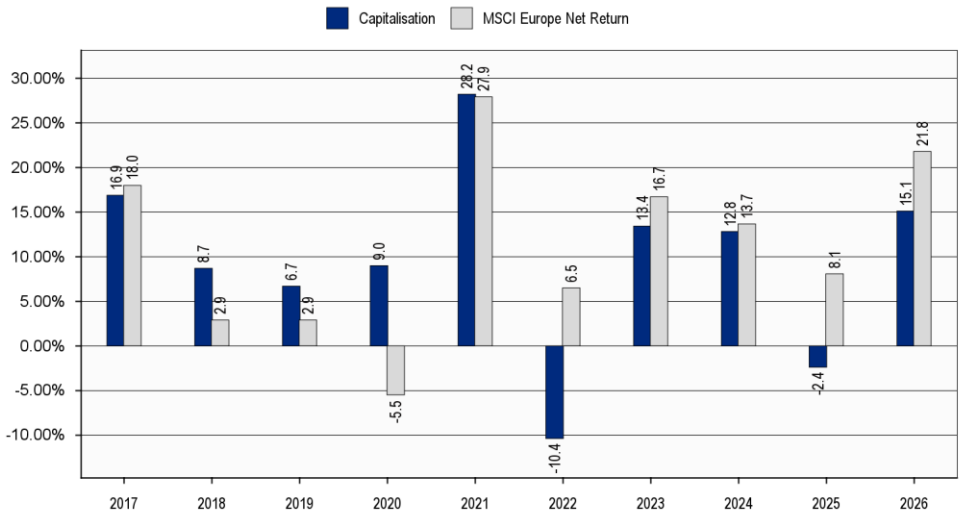

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 26.90%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

10 . INFORMATION ON SUBFUND DPAM B EQUITIES NEWGEMS SUSTAINABLE

10.1 . MANAGEMENT REPORT

10.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 02/10/2006
Subscription price during this period: EUR 100.00

10.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

10.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors exposure to equities and/or equity-equivalent securities issued by companies without geographical restriction and all securities giving access to the capital of such companies, which are selected on the basis of themes linked to the acronym NEWGEMS (Nanotechnology, Ecology, Wellness, Generation Z, E-society, Manufacturing 4.0, Security) (trends and themes of activities linked to nanotechnology, ecology, wellness, generation Z, E-Society, manufacturing 4.0 and security - see investment policy below). These companies are selected on the basis of a strict methodology for compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund invests mainly in equities and/or equity-equivalent securities issued by companies "of the future" without geographical restriction, and in all securities giving access to the capital of such companies.

These companies “of the future” are identified by the acronym NEWGEMS (Nanotechnology, Ecology, Wellness, Generation Z, E-society, Manufacturing 4.0, Security) and include trends and themes of activities related to nanotechnology, ecology, wellness, generation Z, E-society, manufacturing 4.0 and security; activities that can be defined as follows (list is not exhaustive):

- «Nanotechnology»: Nanotechnology encompasses companies operating at a molecular level (the production of semiconductor equipment chips, medical diagnostics, life science tools and services, etc. which require complex miniaturisation) and the companies that make these advances possible.

- «Ecology»: Ecology includes companies whose activities relate to the environment and environmental protection such as Electrical Vehicles or clean energy.

- «Wellness»: Wellness includes any company whose activity involves human and animals health through, for example medical device or nutrition.

- «Generation Z»: Generation Z refers to the generation after the millennials. In this area, the manager will invest in companies that facilitate the lifestyle of this generation. Relevant examples are content (streaming or gaming), experience (travel) or fintech (payments).

- «E-society»: E-society includes any company that is engaged in e-commerce, supports digitalisation or cloud infrastructure.

- «Manufacturing 4.0»: Manufacturing 4.0 includes any company related to the new industrial revolution, or enterprise automation, such as robotics & automation, software-as-a service, the industry of things and artificial intelligence.

- «Security»: Security includes any company that relates to cybersecurity financial security and/or physical safety.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

10.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

10.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

10.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI World Net Return.

This index is representative of the equity market for large and mid-cap stocks from 23 developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) around the world.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.
The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

10.1.7 . Policy followed during the year

At the end of June 2025, the net asset value of DPAM B Equities NewGems Sustainable (F share) stood at EUR 422.09, representing a 13.2% decrease since the start of the year.

The first half of 2026 marked another period of exceptional market concentration. AI leaders continued to dominate index returns, while HALO ("hard assets, low obsolescence") stocks—including industrials, banks, utilities and materials—also performed strongly. At the same time, several traditional high-quality areas of the market, including healthcare, consumer, media and diversified financials, de-rated to valuations near multi-year lows. NewGems' performance largely reflected these dynamics, with strong gains from semiconductors offset by weaker performance in these out-of-favour sectors.

NewGems maintained a significant exposure to AI semiconductor companies, hyperscalers and selective software names. While software companies sold off indiscriminately during the first two months of the year, sentiment has improved markedly in recent months as investors gained confidence that AI is accelerating, rather than disrupting, the growth outlook for infrastructure software, cybersecurity and electronic design automation. We remain constructive on our AI winner's holdings, yet actively manage our exposure, as our profit-taking this year reflects.

While we maintain a meaningful overweight to AI winners, we also hold significant positions in out-of-favour growth companies, where we consider the market overly pessimistic about AI's impact on their businesses. Our AI-discounted exposure spans e-commerce, payments, financial data, application software, entertainment, travel and healthcare.

Another angle we have been paying particular attention to in our portfolio construction is our balance between cyclical vs. defensive exposure. While NewGems has limited exposure to traditional defensive sectors like consumer staples, utilities, telecom, pharmaceuticals and insurance, it seeks defensive exposure through 'visible growth at an attractive valuation'. Today, we find such exposure in waste management, life sciences, medtech, specialty chemicals, business services, and selective consumer and financials exposure.

10.1.8 . Future policy

We remain firmly committed to our strategy of investing in innovative companies. To guide this approach, we have identified seven core themes that shape our portfolio: Nanotechnology, Ecology, Wellness, Generation Z, E-Society, Manufacturing 4.0, and Security. These pillars collectively form the acronym NEWGEMS.

In every investment decision, we apply a barbell strategy—balancing higher-growth, relatively expensive and riskier names on one side, with more mature, lower-valued, and high-quality growth companies on the other.

Sustainability is embedded in our process: we integrate ESG key performance indicators (KPIs) aligned with each theme, as we firmly believe that ESG risks and opportunities are an essential component of a robust fundamental investment framework.

10.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4 with the exception of class W USD: 5

10.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	852,281,712.17
Sales	1,101,825,073.56
Total 1	**1,954,106,785.73**
Subscriptions	61,773,775.73
Redemptions	307,003,257.96
Total 2	**368,777,033.69**
Reference average of the total net asset	1,395,074,908.91
Rotation Percentage	**113.64%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

The year has been driven by a volatile and uncertain environment, driven by DeepSeek, liberation day, AI disruptions impacting the moat of many incumbents. In that context, we made some structural changes to the portfolio and made use of the volatility to seize opportunities.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

10.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

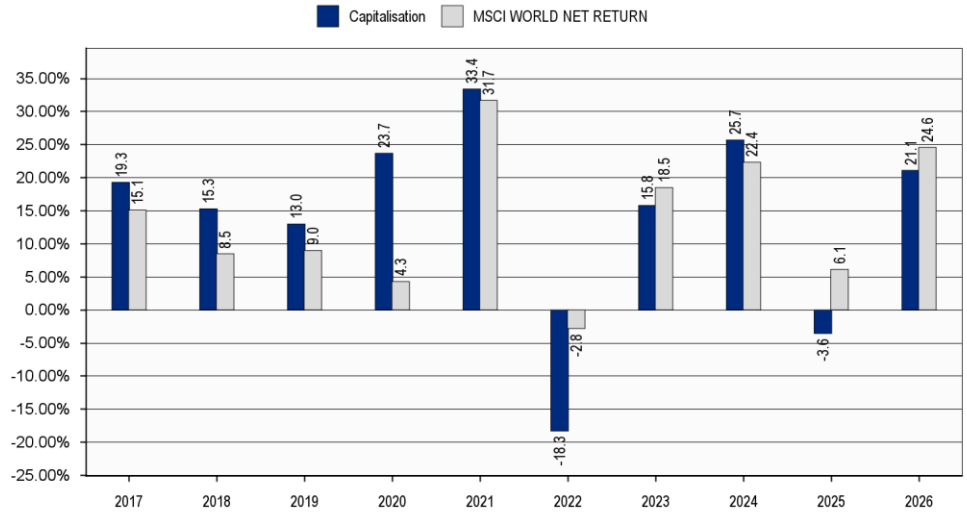

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 38.18%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report

11 . INFORMATION ON SUBFUND DPAM B EQUITIES SUSTAINABLE FOOD TRENDS

11.1 . MANAGEMENT REPORT

11.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 17/12/2007
Subscription price during this period: EUR 100.00

11.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

11.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to provide investors with exposure to equities and/or equity-equivalent securities issued by companies that are active, directly or indirectly, in the food value chains in the broad sense of the term and in related or analogous sectors.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund.

No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The investments of this sub-fund mainly consist, without geographical limits, of shares or securities representing the share capital of companies that are active, directly or indirectly, in the agri-food value chains in the broad sense of the term and in related or analogous sectors. These agri-food value chains range from the production of food, including products and services that contribute to the production of food, to the sale of food products to the consumer. Companies whose activities such as storage, transport, packaging, processing etc., add value to food value chains, fall within the scope of the investment universe. Related sectors include, but are not limited to, plantations, storage, transport, packaging or agricultural businesses in general.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

All other securities giving access to the capital of these companies shall be treated as equivalent to these investments.

The sub-fund invests at least two thirds of its total assets in these investments.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities.

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

11.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

11.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

11.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

11.1.7 . Policy followed during the year

The fund continues to invest in the global agriculture and food chain by selecting interesting pockets and investing in the best positioned companies.

The fund posted a positive return of over 10% supported by the upstream segment which benefited from the supply chain disruption following the Middle East conflict which benefited notably CF Industries which as access to low-cost natural gas in the United States. Other segments that benefited were biofuels-exposed companies (Darling Ingredients and palm oil plantations) that not only were supported by higher oil prices but also by policies favoring increased blending notably in the US and Indonesia. Vital Farms, Bellring Brands and the salmon companies (Mowi and Bakkafrost) were the largest negative contributors

During the period we added new positions in Sakata Seed, Glanbia, UIE, Sensient and Alzchem. We exited OCI as the company sold the bulk of its assets and distributed most of the cash to the shareholders. Elsewhere we increased the weight in DSM-Firmenich and Corbion while reducing Compass.

11.1.8 . Future policy

Going forward we expect a continued solid operational performance of the companies in the fund that continue to be supported by good fundamentals. After weak performance over the last years we expect ingredient companies to continue their recovery on the back of positive volume growth driven by an increased demand for product reformulation.

11.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

11.2 . BALANCE SHEET

	As at 30.06.26 (in EUR)	As at 30.06.25 (in EUR)

Redemptions	4,214,136.87
Total 2	**5,713,107.08**
Reference average of the total net asset	22,037,508.11
Rotation Percentage	**8.82%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

11.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

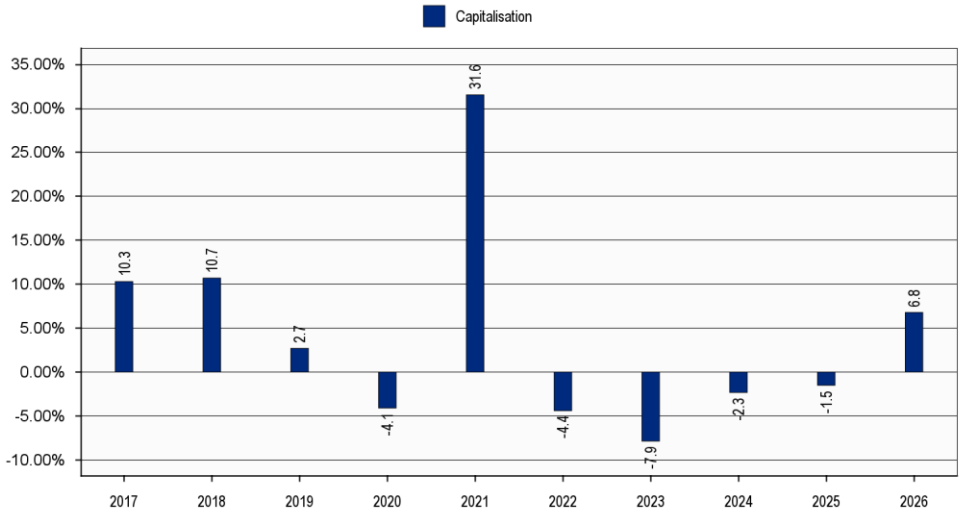

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 35.91%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Investment restrictions and overruns

The sum of issuers representing more than 5% each represented more than 40% (41.930%) of the fund's TNA. The breach was caused by market fluctuations, more notably to the price increase of Lotus Bakeries NV (BE0003604155). The breach remained open for the following day due to the price increase of United Plantations BHD (MYL2089OO000). The breach remained open for another day as the transactions made by the PM were not sufficient to close the breach. Breach closed as of NAV date 09/01/2026 (T+3).

The sum of issuers representing more than 5% each represented more than 40% (43.171%) of the fund's TNA. The breach was caused by market fluctuations, more notably to the price increase of Lotus Bakeries NV (BE0003604155). Breach closed as of NAV date 14/01/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (40.294%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 09/02/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (40.055%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 20/02/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 25/02/2026, the fund was invested for 10.112% in the issuer Darling Ingredients Inc (US2372661015). The breach was caused by market fluctuations. Breach closed as of NAV date 26/02/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (40.0006%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 03/03/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 06/03/2026, the fund was invested for 10.09% in the issuer CF Industries Holdings Inc (US1252691001). The breach was caused by market fluctuations. Breach closed as of NAV date 09/03/2026 (T+1).

The 10% limit on a single issuer has been in breach twice for DPAM B EQUITIES SUSTAINABLE FOOD TRENDS. Indeed, exposure to Darling Ingredients Inc (ISIN US2372661015) represented 10.161% of the net assets and exposure to CF Industries Holdings Inc (ISIN US1252691001) represented 10.050% of the fund's TNA as of 11/03/2026. The percentage increase compared to the previous day is explained by the price increase of the shares (+5.63% for Darling Ingredients and + 9.16% for CF Industries Holdings) and the EUR/USD FX variation (+0.70% effect on USD assets) so the breach is deemed passive. Breach closed as of NAV date 13/03/2026 (T+2).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 26/03/2026, the fund was invested for 10.26% in the issuer CF Industries Holdings Inc (US1252691001). The breach was caused by market fluctuations. Breach closed as of NAV date 30/03/2026 (T+2).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 02/04/2026, the fund was invested for 10.03% in the issuer Darling Ingredients Inc (US2372661015). The breach was caused by market fluctuations. Breach closed as of NAV date 07/04/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (45.031%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 27/04/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (40.048%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 30/04/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 05/05/2026, the fund was invested for 10.248% in the issuer DARLING INGREDIENTS INC (US2372661015). The breach was caused by an outflow on NAV date 04/05/2026 which entered the fund on NAV date 05/05/2026 (T+1). As the fund already had a weight of 9.978% in DARLING INGREDIENTS INC (US2372661015) on NAV date 04/05/2026, the PM could have foreseen this breach and make the necessary actions to prevent it. Financial Impact: EUR -174.61. Breach closed as of NAV date 06/05/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (42.984%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 08/05/2026 (T+3).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 12/05/2026, the fund was invested for 10.193% in the issuer CF INDUSTRIES HOLDINGS INC (US1252691001). The breach was caused by market fluctuations. Breach closed as of NAV date 13/05/2026 (T+1).

The sum of issuers representing more than 5% each represented more than 40% (40.116%) of the fund's TNA. The breach was caused by market fluctuations. Breach closed as of NAV date 05/06/2026 (T+2).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 24/06/2026, the fund was invested for 10.101% in the issuer DSM-Firmenich AG (CH1216478797). The breach was caused by market fluctuations. Breach closed as of NAV date 26/06/2026 (T+2).

12 . INFORMATION ON SUBFUND DPAM B BONDS EUR GOVERNMENT IG

12.1 . MANAGEMENT REPORT

12.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 30/06/2010
Subscription price during this period: EUR 50.00

12.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

12.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to the bond market.

The portfolio of the sub-fund consists essentially of short-, medium- and long-term instruments such as bonds and other debt securities or equivalent securities denominated in EUR, at fixed or floating rates, offering periodic or capitalized income and issued or guaranteed by Member States of the European Union.

The portfolio may also comprise government bonds (fixed-rate and variable-rate) issued by government agencies and by local authorities, government bonds denominated in a currency other than the country's local currency, and supranational agencies.

The issuers of the instruments in which the portfolio is invested must have a minimum rating corresponding to Investment grade* with each ratings agency (including Standards & Poor's, Moody's and Fitch) proposing the monitoring of the issuer.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

* Investment Grade: is an interpretation of the rating of the bond issuer in terms of the financial risks. Rating agencies each use their own scale to evaluate the notion of risk. Investment grade ratings are situated between AAA and BBB according to the Standard & Poor's and Fitch scales and between Aaa an Baa3 according to the Moody's scale.

Investment policy

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

As a result of an exemption granted by the Autorité des Services et Marchés Financiers, the sub-fund may invest up to 100% of its assets in the various issues of transferable securities and money market instruments issued or guaranteed by a Member State of the European Economic Area which has adopted the euro as its currency (listed below(*)) and by its regional public bodies. These undertakings for collective investment must hold transferable securities and money market instruments belonging to at least six different issues, and transferable securities and money market instruments belonging to a single issue must not exceed 30% of the total value of their assets.

(*) Belgium, Germany, Finland, France, Greece, Luxembourg, Ireland, Italy, Netherlands, Austria, Portugal, Spain, Slovenia, Cyprus, Malta, Slovakia, Estonia.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

12.1.4 . Financial management of the portfolio

12.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

12.1.6 . Index and benchmark

JPM EMU Government Investment Grade Total Return

The sub-fund uses the following index as a benchmark: JPM EMU Government Investment Grade Total Return.
This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency, rated "investment grade" by each of the three major rating agencies (Standard & Poor's, Moody's and Fitch). Performance is calculated by reinvesting the coupons paid by the debt securities making up the index.

J.P. Morgan Securities PLC is listed in the register held by ESMA (European Securities and Markets Authority)

The benchmark is used to compare performance.
The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

12.1.7 . Policy followed during the year

The first half of 2026 was characterized by a clear shift from a disinflationary, stable macroeconomic backdrop to a much more volatile and uncertain environment dominated by geopolitical shocks and renewed inflation risks. The early part of the year supported European government bonds through declining yields and tightening spreads, but this trend reversed sharply from March onwards following the outbreak of war in the Middle East.

Energy prices became the central driver of markets, triggering a reassessment of inflation expectations and forcing central banks, particularly the ECB, to adopt a more cautious and eventually more hawkish stance. While bond markets initially sold off amid rising inflation concerns, later months saw a partial recovery as markets repriced the persistence of the energy shock and its implications for monetary policy.

Market developments

At the start of the year, markets were driven by geopolitical uncertainty linked to US policy actions and trade tensions, which contributed to increased volatility but supported European rates as yields declined across most maturities.

This constructive environment continued into February, with a broad-based rally in European government bonds. Yields declined across the curve and spreads tightened, supported by improving macroeconomic data and a stable ECB policy stance.

However, the macro regime shifted abruptly in March following the escalation of the war in the Middle East. The surge in oil and gas prices triggered a rapid reassessment of inflation dynamics, with markets moving away from a disinflation narrative toward expectations of more persistent inflation. This led to higher rates and flatter curves, while spreads widened amid renewed risk aversion.

Elevated geopolitical tensions persisted into April, keeping both inflation and growth risks in focus. Bond markets experienced heightened volatility, with yields moving higher overall and central banks emphasizing the increased uncertainty surrounding the outlook.

In May, markets began to stabilize, although the fundamental backdrop remained dominated by high energy prices and persistent inflation concerns. Economic data remained mixed, and while yields declined somewhat, expectations for further monetary tightening strengthened as the ECB signaled its readiness to act in response to inflation risks.

By June, a perceived easing of geopolitical tensions, particularly linked to developments in the Middle East, contributed to a decline in energy prices and supported a meaningful rally in European government bonds. Yields declined across most maturities as markets repriced the inflation outlook toward normalization. Nevertheless, the ECB adopted a more assertive stance, highlighting that inflation remained above target and that further tightening could still be required.

Performance drivers

Performance over the period was driven primarily by three key factors: duration positioning, curve strategies, and country allocation.

Duration was initially a positive contributor during the early months of the year as yields declined, particularly in January and February. However, the sharp rise in yields in March following the energy-driven inflation shock led to a change in positioning, with the portfolio moving from a duration overweight to an underweight stance in order to mitigate downside risks.

Curve positioning also played an important role. The portfolio's overweight to the intermediate segment of the curve and underweight to shorter maturities contributed positively in periods of curve flattening, particularly during the later phase of the period.

Country allocation was a significant source of performance, especially during periods of spread tightening early in the year. Exposure to peripheral markets such as Italy, Spain, and Romania contributed positively during February, although these positions detracted during the spread widening observed in March. In the subsequent months, selective reallocation toward higher-yielding countries helped capture carry and benefit from renewed spread compression.

Portfolio positioning

Portfolio positioning evolved significantly over the period in response to changing market conditions.

At the beginning of the year, the strategy maintained a constructive stance, with a duration overweight and a focus on the belly of the curve to enhance carry and roll-down. This positioning was complemented by selective exposure to peripheral sovereigns to capture spread compression opportunities
Following the geopolitical shock in March, positioning shifted decisively. Duration exposure was reduced and ultimately turned into an underweight as the outlook for interest rates moved toward higher levels driven by persistent inflation. At the same time, exposure to higher-beta countries was reduced to protect the portfolio from spread widening in a risk-off environment.

In the following months, positioning became more balanced. While the underweight duration stance was largely maintained given expectations of further monetary tightening, the portfolio gradually reintroduced selective spread exposure, particularly in Southern European markets, to improve carry and benefit from potential spread compression.

By June, the portfolio remained positioned for a complex macro environment, with cautious duration exposure and a diversified allocation across countries. The combination of curve strategies, selective country positioning, and active duration management continued to reflect the need to navigate both inflation risks and geopolitical uncertainty.

12.1.8 . Future policy

Looking ahead, the key focus for markets will be on how the situation in the Middle East evolves and how this feeds through into energy prices and broader inflation dynamics. While recent developments have led to a rapid normalization in oil prices, uncertainty remains elevated regarding the sustainability of this move, particularly given the fragility of supply conditions and the risk of renewed tensions. In this respect, several factors will be critical to monitor, including the pace at which oil flows through key chokepoints are genuinely recovering, whether the rebound in supply is driven by a durable restart in production or merely the release of existing inventories, and the relative contribution of key producers such as Iran versus the Gulf states. These elements will determine whether the recent decline in energy prices can be sustained.

In this context, the reaction of the ECB will be crucial. The Governing Council has already signaled a more assertive stance, reflecting concerns that the energy shock could continue to broaden into underlying inflation. As such, the interplay between geopolitical developments, oil market normalization, and monetary policy responses will be the main determinant of the trajectory of interest rates and as such portfolio positioning going forward.

12.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

12.2 . BALANCE SHEET

12.4.2 . Asset Allocation (% of portfolio)

By Country	
Germany	30.44%
Italy	21.53%
France	15.49%
Spain	8.17%
Belgium	3.95%
Romania	3.76%
Slovakia	3.41%
Netherlands	2.78%
Lithuania	2.17%
Portugal	1.55%
Ireland	1.25%
Greece	1.25%
Finland	1.24%
Austria	0.95%
Poland	0.89%
Latvia	0.74%
Slovenia	0.43%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Countries And Central Governments	92.67%
Cantons, Federal States, Provinces Etc.	3.94%
Transportation	2.92%
Other	0.47%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

12.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	51,433,844.77
Sales	72,628,923.97
Total 1	**124,062,768.74**
Subscriptions	15,467,759.59
Redemptions	39,148,758.18
Total 2	**54,616,517.77**
Reference average of the total net asset	162,273,650.87
Rotation Percentage	**42.80%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

12.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

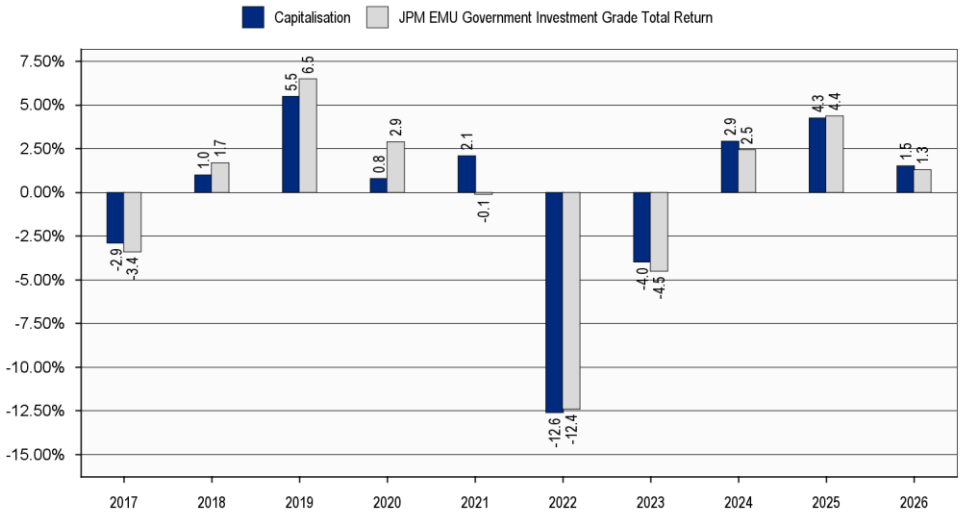

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 june 2026:

12.4.7 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE0935123431	0.58%	0.04%
Class B (CAP) - BE0935124447	0.57%	0.04%
Class F (CAP) - BE0935126467	0.33%	0.04%
Class M (DIS) - BE6299419455	0.44%	0.04%
Class P (CAP) - BE6254412461	0.13%	0.04%
Class W (CAP) - BE6246071474	0.32%	0.04%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 6.09%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

12.4.8 . Notes to the financial statements and other information

2025	class A 1,43 EUR
	class M 1,44 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

13 . INFORMATION ON SUBFUND DPAM B REAL ESTATE EUROPE DIVIDEND SUSTAINABLE

13.1 . MANAGEMENT REPORT

13.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 28/12/2010
Subscription price during this period: EUR 100.00

13.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

13.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders the highest long-term return through a balanced management policy by investing its assets in securities representing the real estate sector in the broad sense of the term in Europe, mainly with higher distributable income than the average of the investment universe. These securities include, but are not limited to, shares of Real Estate Investment Trusts (REITs), real estate certificates, real estate companies and companies active in the promotion and development of real estate, as well as shares of real estate debt investment companies, etc. These companies are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

50% of the net assets must be composed of securities with a prospective yield over 3 years higher than the average of the investment universe.

The average is defined as being the dividend yield of the FTSE EPRA/NAREIT Developed Europe index.
This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given to the compartment or its participants.

Investment policy

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV’s assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

See 1. General information about the investment company, 1.1. Organization of the investment company

13.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment compa

13.1.6 . Index and benchmark

The sub-fund uses the following index as benchmark: FTSE EPRA/NAREIT Developed Europe Net Return.

This index is representative of the market for listed real estate companies in developed countries (as defined in the index methodology) in Europe. The performance of this index is calculated by reinvesting net dividends (Net Return).

FTSE International Limited is registered with the European Securities and Markets Authority (ESMA). The benchmark is used to compare performance and to select a large portion of the securities in the portfolio.

The sub-fund's risk and return profile may be aligned with that of the benchmark as the sub-fund invests primarily in the same securities as the benchmark. This could result in a tracking error of less than 3%.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

13.1.7 . Policy followed during the year

At the start of the year; the European listed real estate portfolios benefited from favorable capital market conditions as interest rates eased and markets were heading to a consensus of controlled inflation and stable rates. We saw strong debt issuance activity and compressed financing spreads. These conditions supported refinancing initiatives and shareholder return programs, including share buybacks. Better performing sub-sectors were logistics demonstrating strong operating fundamentals, healthcare, and the rate sensitive residential sector.

Also, as markets feared AI disruption in many sectors, heavy assets with low obsolescence risk (“HALO stocks”) were favored, amongst others real estate companies. In this environment residential real estate proved particularly resilient as investors gravitated toward business models offering greater predictability and stability.

Market conditions became significantly more challenging in March, after the start of the war in the middle east. Higher oil prices meant higher expected inflation and rates were on the rise again, challenging the capital-intensive real estate sector that is generally seen as a bond proxy by many strategists and generalist equity investors.

These escalating geopolitical concerns, combined with higher interest rates, triggered a broad pullback across risk assets. Against this backdrop, portfolio construction became more defensive, prioritizing companies with solid balance sheets and carefully selected exposures. We remained vigilant regarding inflationary developments, and changes in interest-rate expectations, maintaining allocations to areas offering defensive characteristics and greater inflation resilience, including healthcare and selected retail segments with attractive income profiles. Meanwhile we didn’t radically change the portfolios as the duration of this war could be short lived and a reversion to previous themes had a significant probability.

Operational execution remained a key differentiator throughout the first half which made us increase holdings in companies raising fresh equity to invest in highly profitable projects like Data Centers for Merlin Properties or assets devoted to the defense sector for Sirius Real Estate and VGP in brownfield logistics projects.

Transaction markets remained relatively subdued, with many companies financing growth through asset sales and portfolio optimization rather than large-scale acquisitions. Although financing costs increased and geopolitical risks persisted, underlying fundamentals across the European listed real estate market continued to hold up well. At the same time, refinancing activity improved, easing concerns around forced deleveraging.

13.1.8 . Future policy

Looking ahead, our investment approach will remain centered on operational quality and accretive growth opportunities. We continue to favor businesses with strong financial positions, visible earnings trajectories, and attractive risk-adjusted return potential. In our view, the market has largely incorporated the implications of a prolonged higher-interest-rate environment, and potential future valuation adjustments are more likely to occur gradually through inflationary effects than through a significant correction in asset prices.

In this dividend and income-oriented fund we will continue to select higher dividend paying companies, and we will also continue to lower the volatility of the portfolio compared to the benchmark. Therefor we will favor lower beta companies with attractive risk adjusted return expectations.

We find these characteristics mainly in the retail and logistic sub-sectors and expect to remain overweight in them compared to the benchmark. Meanwhile we’ll closely monitor interest rate evolutions and inflation expectations that could impact our portfolio construction, mainly in residential. For offices we expect to remain underweight as fundamental headwinds persist.

On the real estate market, tenant demand and leasing markets are expected to remain broadly supportive, while management teams are likely to maintain their focus on organic growth and operational performance. Capital allocation discipline will continue to be critical, with asset recycling and targeted disposals serving as important sources of funding for new investments. M&A and transaction activity should remain measured, constrained by leverage considerations and

balance sheet management priorities. But if share prices increase, implying a lower cost of capital, companies could become more aggressive buyers financed through issuance of new equity.

Overall, we maintain a constructive but measured outlook. Access to funding has improved, earnings trends are becoming more stable, and sector valuations continue to present attractive opportunities. Our dividend strategy will remain focused on identifying companies capable of delivering sustainable operational performance while selectively capitalizing on growth opportunities. At the same time, we will mitigate downside asymmetry by focusing on companies with robust fundamentals and consistently high dividend sustainability.

13.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

13.4.2 . Asset Allocation (% of portfolio)

By Country	
France	26.18%
United Kingdom	21.35%
Belgium	17.04%
Germany	14.15%
Netherlands	6.01%
Spain	5.24%
Switzerland	4.22%
Guernsey	2.02%
Sweden	1.71%
Luxembourg	1.31%
Jersey	0.77%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Real Estate companies	96.57%
Investment funds	2.03%
Miscellaneous services	1.40%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	67.70%
GBP	26.38%
CHF	4.21%
SEK	1.71%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

13.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	16,773,971.17
Sales	41,599,706.26
Total 1	**58,373,677.43**
Subscriptions	18,835,619.40
Redemptions	47,441,842.67
Total 2	**66,277,462.07**
Reference average of the total net asset	189,282,080.02
Rotation Percentage	**-4.18%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

13.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

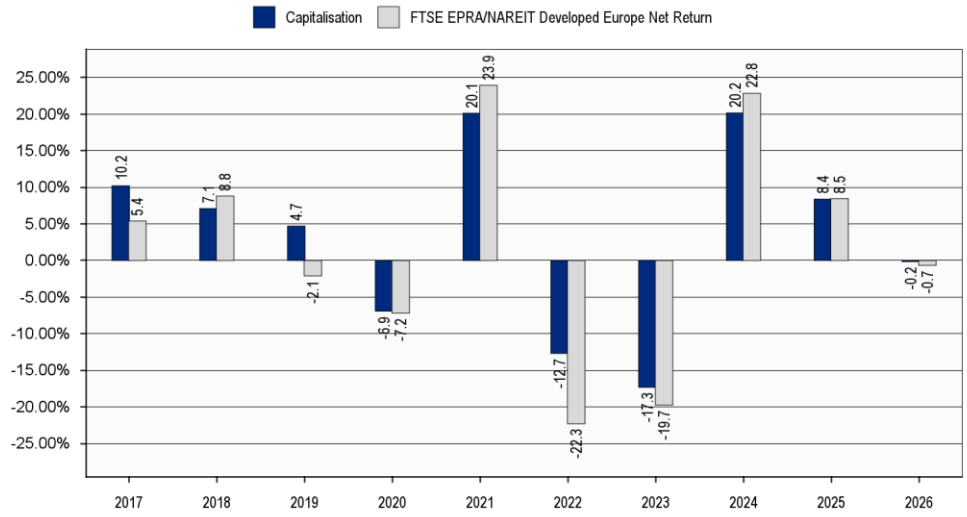

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 june 2026:

Class L (CAP) BE6330741362 not yet having a full accounting period, there is too little data to provide useful insights on performance.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 33.70%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.13.4.7 . Notes to the financial statements and other information

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

14 . INFORMATION ON SUBFUND DPAM B EQUITIES DRAGONS SUSTAINABLE

14.1 . MANAGEMENT REPORT

14.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: from 30/11/2020 to 15/12/2020
Subscription price during this period: EUR 100.00

14.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

14.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer investors exposure to equities and/or equity-equivalent securities issued by companies whose registered office is located in the Asia-Pacific region or which have a majority of their economic activities in the Asia-Pacific region*, and to all securities giving entitlement to the capital of these companies, selected on the basis of their compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

*Asia-Pacific or APAC is the part of the world located in or near the Western Pacific Ocean. Asia-Pacific includes East Asia, South Asia, Southeast Asia and Oceania.

Investment policy

The sub-fund principally invests in the equities and/or other securities giving access to the equity capital so-called “companies of the future” located in the Asia-Pacific region.

Companies of the future are identified by the acronym DRAGONS (Disruptive Technology, Rising Middle Class, Ageing & Health, Generation Z, O² & Ecology, Nanotechnology, Security) for:
- Disruptive Technologies (artificial intelligence, robotics, computer-aided design software, etc.),
- Rising Middle Class (luxury, travel, retail chains, etc.),
- Ageing & Health (healthcare, healthy eating, animal health, etc.),
- Generation Z (social media, cell phones, game consoles, etc.),
- O² &Ecology (renewable energies, water management, energy efficiency, etc.),
- Nanotechnologies (biotechs, advanced materials, semiconductors, etc.),
- Security (physical security, cyber-security, etc.).

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment. The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV’s assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

14.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

14.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

14.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI AC Asia Pacific Net Return
This index is representative of the large and mid-cap equity markets of 5 developed countries and 9 emerging countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the Asia-Pacific region. The performance of this index is calculated in reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the investment strategy in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

14.1.7 . Policy followed during the year

Asian equity markets performed exceptionally well during the first half of the year, primarily driven by the IT sector, which nearly doubled in value. Our portfolio significantly outperformed the broader market, largely due to our strategic overweight in IT, maintained at approximately 8%, and strong stock selection.

From a country perspective, performance was led by South Korea and Taiwan, both of which benefited from their substantial exposure to the AI supply chain. Thailand, Japan, and Australia also delivered solid returns, while China/Hong Kong and India experienced negative performance. Our results were further enhanced by overweight positions in South Korea, Taiwan, and Japan, whereas India remained one of our key underweights.

Although we maintained a neutral stance in China/Hong Kong, we outperformed in the region by limiting exposure to large-cap internet stocks such as Tencent, Meituan, and Baidu, which faced intense competition, weak domestic consumption, and, in some cases, uncertain returns on AI-related capital expenditures. Conversely, we were overweight in China IT, holding AMEC and adding Luxshare Precision Industry and Foxconn Industrial Internet, all of which delivered robust performance.

We also outperformed in South Korea, Taiwan, and Japan, driven by our overweight to the AI theme in these markets. In South Korea, SK Hynix and Samsung Electronics were our top contributors. In Taiwan, Elite Material, Accton Technology, and Mediatek led performance. In Japan, Renesas Electronics, Ajinomoto, Tokyo Electron, Mizuho Financial, and Panasonic Holdings (added during the year) were key contributors.

We continued to implement our barbell strategy, focusing on “growth stories” on one side and “improvement and capital return stories” on the other. We kept our overweight in IT steady, while rotating from stocks that we think have become expensive, to those where we think there is still value left.

Later in the period, proceeds from profit-taking in IT were increasingly reinvested into more defensive names, such as OCBC, or into growth names that had become attractively valued and were showing signs of inflection, such as Sea Ltd.

14.1.8 . Future policy

Shareholders have been notified on the proposed early dissolution and liquidation of the DPAM B Equities DRAGONS Sustainable sub-fund.

14.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

14.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	4,228,054.67
Sales	9,889,785.68
Total 1	**14,117,840.35**
Subscriptions	1,542,281.40
Redemptions	6,974,807.27
Total 2	**8,517,088.67**
Reference average of the total net asset	17,951,678.78
Rotation Percentage	**31.20%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 50.73%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

14.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2024 class A 0.32 EUR
class M 0.34 EUR
class V 0.34 EUR
2025 class A 1.20 EUR
class V 1.25 EUR
class M 1.25 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Investment restrictions and overruns

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 19/01/2026, the fund was invested for 10.01% in the issuer TSMC (TW0002330008). The breach was caused by market fluctuations. Breach closed as of NAV date 20/01/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 13/02/2026, the fund was invested for 11.64% in the issuer TSMC (TW0002330008). The breach was caused by market fluctuations. Due to closure of the Taiwain Stock Exchange related to holidays the necessary trades to close the breach could only be executed after the exchange reopened. Breach closed as of NAV date 24/02/2026 (T+7).

15 . INFORMATION ON SUBFUND DPAM B EQUITIES EUROLAND SUSTAINABLE

15.1 . MANAGEMENT REPORT

15.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: from 30 November 2020 to 15 December 2020.
Subscription price during this period: EUR 100.00.

15.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

15.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to enable shareholders to benefit from the growth of shares of European companies or other equivalent securities having their registered office in one of the Member States of the European Union, which use the euro as their national currency and that are selected on the basis of environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

To achieve the objective, the sub fund invests mainly in shares of European companies or other similar securities, having their registered office in one of the member states of the European Union, which use the euro as a national currency, and which meet certain environmental, social, and governance (ESG) criteria.

The following are considered to be equivalent companies: other companies that have a significant proportion of their assets, activities and profit or decision-making centres in the aforementioned countries.

More specifically, at least two-thirds of the sub-fund’s investments are invested in stocks of companies which have their registered office or which carry out their primary economic activity in one of the European Union Member States which use the Euro as their national currency and any securities giving entitlement to the capital of these companies.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities. The sub fund invests up to 10% of its assets in open ended undertakings for collective investment.

The sub fund may invest in units of another UCITS or other fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect participation of more than 10% of the capital or votes. No issue or redemption fees of the target funds or management fees may be debited from the SICAV’s assets where such investments have been made.

The sub fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

15.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

15.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

15.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

This index is representative of the large- and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section of the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

15.1.7 . Policy followed during the year

In a context of sharp oil price volatility on the back of the Iran conflict, as well as ongoing strong momentum in AI infrastructure buildout, the fund had a positive return over the first half. With the exception of healthcare and consumer discretionary, all sectors added to the performance.

Within IT leading edge semiconductor equipment companies ASML and ASMI, as well as analog power semiconductor holding Infineon saw strong performances thanks to accelerating demand from AI applications.

In this context of AI infrastructure buildout and its requirements for power grid reinforcement, holdings in utilities (Iberdrola, EON) benefited performance as well, further reinforced by ongoing strong earnings reports.

Positions in Materials had a positive impact. Symrise and Air Liquide were the main contributors. The former posted resulted better than expected results while the latter started to see an improving order outlook helped by its electronics division as well as ongoing decarbonization projects after a period of normalization.

Finaly the banking sector extended its positive trajectory from last year. Interest income is benefitting from a pickup in loan demand and high interest rates. Moreover, company specific capital and cost efficiency measures as well as M&A strategies from banks held in the fund like Bawag, Santander and ABN Amro contributed positively to performance.

Important changes to stock selection were made across several sectors, driven by market volatility and changes in conviction.

Within consumer discretionary the decision was taken to exit automobile manufacturers (Stellantis) and increase other parts of the value chain (Continental, Infineon). Whereas manufacturers are facing an increasing global oversupply, this is not the case for the high-end tires segment and analog chips.

In utilities, new positions were started in Terna and Veolia. Terna, post a derating versus peers in the latter part of 2025, offered good valuation upside while offering attractive asset growth. Veolia, from is part, is gradually changing its business mix which will result in higher and more profitable growth over the medium to long term. According to our analysis, this transition is still not correctly reflected in valuation.

In financials new holdings were added in Bawag, AIB Group and Piraeus. Our research suggested further value creation potential from Bawag’s acquisition strategy. AIB Group was expected to benefit from ECB rate increases. Piraeus was added based on the view that growth in the Greek banking industry is set to outpace that of European peers. On the other hand, the remaining holding in BNP was sold due to lack of conviction in its capital allocation strategy.

Finally, in industrials new positions were added in Metso and Legrand, at the detriment of Interpump and Getlink. Metso, a midcap mining equipment company, should see its order growth supported by increasing investments in copper capacity. Legrand from its part, through targeted M&A over the past couple of years, has improved its growth potential vs peers while still trading at relatively interesting levels of valuation. Conviction in Interpump and Getlink decreased following mixed execution of their strategies. Staying within cyclicals, profit was taken in building materials company Heidelberg materials after a strong performance.

15.1.8 . Future policy

For the remainder of the year, fund managers will continue to look for opportunities to add weight to companies with good business models that stand to benefit from developing structural growth trends (modernization of infrastructure, energy efficiency, climate change, aging society, technological disruption, innovative therapies etc.). At the same time the goal is to retain a healthy level of portfolio diversification.

15.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5
With the exception of classes (F CHF HEDGED, F USD HEDGED) : 4

TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

15.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	31,598,948.04
Sales	89,641,794.79
Total 1	**121,240,742.83**
Subscriptions	7,539,009.99
Redemptions	67,062,160.88
Total 2	**74,601,170.87**
Reference average of the total net asset	135,827,108.42
Rotation Percentage	**34.34%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

15.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

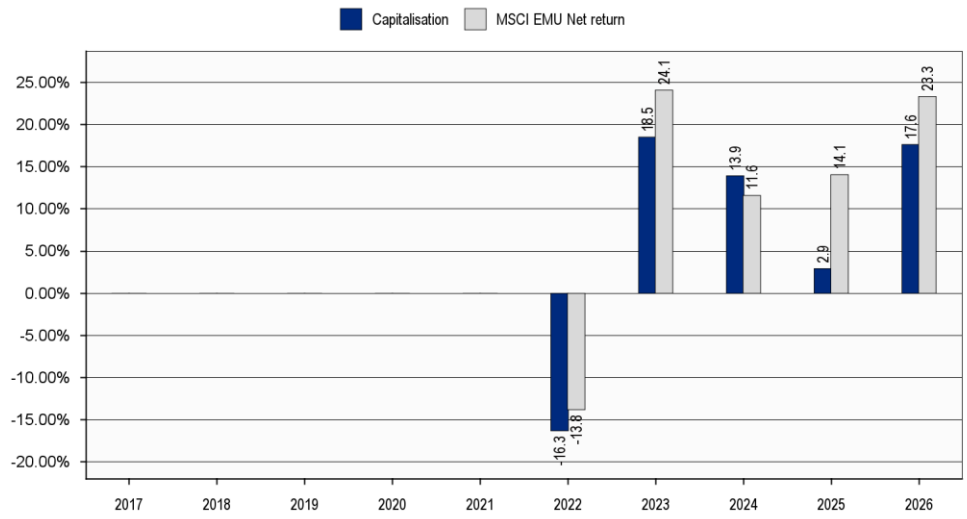

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes

15.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6324121126	1.83%	0.16%
Class B (CAP) - BE6324122132	1.71%	0.16%
Class F (CAP) - BE6324125168	0.92%	0.16%
Class P (CAP) - BE6324133246	0.13%	0.16%
Classe W (CAP) - BE6324131224	0.92%	0.16%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 66.74%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

15.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2021 class A 0.49 EUR
2023 class A 1.41 EUR
2024 class A 1.78 EUR
2025 class A 1,47 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Investment restrictions and overruns

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 22/05/2026, the fund was invested for 10.273% in the issuer ASML Holding NV (NL0010273215). The breach was caused by market fluctuations. Breach closed as of NAV date 26/05/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 02/06/2026, the fund was invested for 10.123% in the issuer ASML Holding NV (NL0010273215). The breach was caused by market fluctuations. Breach closed as of NAV date 03/06/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 08/06/2026, the fund was invested for 10.032% in the issuer ASML Holding NV (NL0010273215). The breach was caused by market fluctuations. Breach closed as of NAV date 09/06/2026 (T+1).

An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 11/06/2026, the fund was invested for 10.142% in the issuer ASML

Holding NV (NL0010273215). The breach was caused by market fluctuations. Breach closed as of NAV date 15/06/2026 (T+2).
An undertaking for collective investment invests a maximum of 10% of its assets in transferable securities or money market instruments issued by the same issuer. As of NAV date 30/06/2026, the fund was invested for 10.082% in the issuer ASML Holding NV (NL0010273215). The breach was caused by market fluctuations. Breach closed as of NAV date 01/07/2026 (T+1).

16 . INFORMATION ON SUBFUND DPAM B BONDS EUR CORPORATE SUSTAINABLE

16.1 . MANAGEMENT REPORT

16.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 16 August 2021.
Subscription price during this period: EUR 100.00.

16.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

16.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders exposure to debt securities denominated in euros with at least an investment grade rating*. These securities are selected on the basis of a strict methodology for compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

The sub-fund's shareholders do not benefit from any capital protection or guarantee.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

* Investment Grade: is an interpretation in terms of financial risk of the quality of the bond's issuer. The rating agencies each use their own scale to assess the notion of risk. Investment grade ratings are between AAA and BBB- on the Standard & Poor's and Fitch scale and between Aaa and Baa3 on the Moody's scale.

Investment policy

The sub-fund invests mainly in bonds and/or other debt securities (including, but not limited to, perpetual bonds and zero-coupon bonds), at a fixed or floating rate, denominated in euro, issued by companies and benefiting (or, failing that, their issuers) from an investment grade rating.

Stock-picking is based on economic and financial analyses and on a rigorous methodology of exclusions, integration of ESG factors, active shareholding and engagement with companies.

The sub-fund invests a maximum of 10% of its assets in open-ended undertakings for collective investment.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits or securities and in the form of undertakings for collective investment.

The sub-fund may invest in units of another UCITS or another fund managed directly or indirectly by DPAM or by a company with which DPAM is linked by common management or control or by a direct or indirect holding of more than 10% of the capital or votes. No issue or redemption fees for target funds or management fees may be debited from the SICAV's assets where such investments have been made.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of Regulation SFDR 2019/2088.

16.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

16.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

16.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: iBoxx Euro Corporate Bond All Maturities index.

This index reflects the market performance of bonds denominated in EUR and issued by companies with an investment grade rating. The performance of the index is calculated by reinvesting gross coupons (Total Return index).

IHS Markit Benchmark Administration Limited is listed in the registered held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the sub-fund's environmental and social characteristics. Please refer to the "Investment Strategy" section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

16.1.7 . Policy followed during the year

Since the start of the year, the net asset value of capitalization shares has increased by 1.01 %.
During the year, we have selectively participated in new issues, favoring defensive stocks and A-rated names. The first half of 2026 was characterized by resilient investment grade credit markets, despite ongoing geopolitical tensions—particularly in the Middle East—and a more hawkish stance from the Federal Reserve. EUR IG spreads remained stable and tight, supported by strong investor demand, attractive all-in yields, and robust technicals. Primary market activity was notably strong, with Eurozone issuance reaching record levels, driven in part by large technology issuers raising capital for AI-related investments. While volatility increased during periods of heightened geopolitical risk, overall market sentiment benefited from solid corporate earnings and resilient macroeconomic data, especially from the US.

16.1.8 . Future policy

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

16.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

16.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	25,540,173.00
Sales	14,499,438.49
Total 1	**40,039,611.49**
Subscriptions	12,519,686.47
Redemptions	1,484,724.90
Total 2	**14,004,411.37**
Reference average of the total net asset	125,596,412.65
Rotation Percentage	**20.73%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

16.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

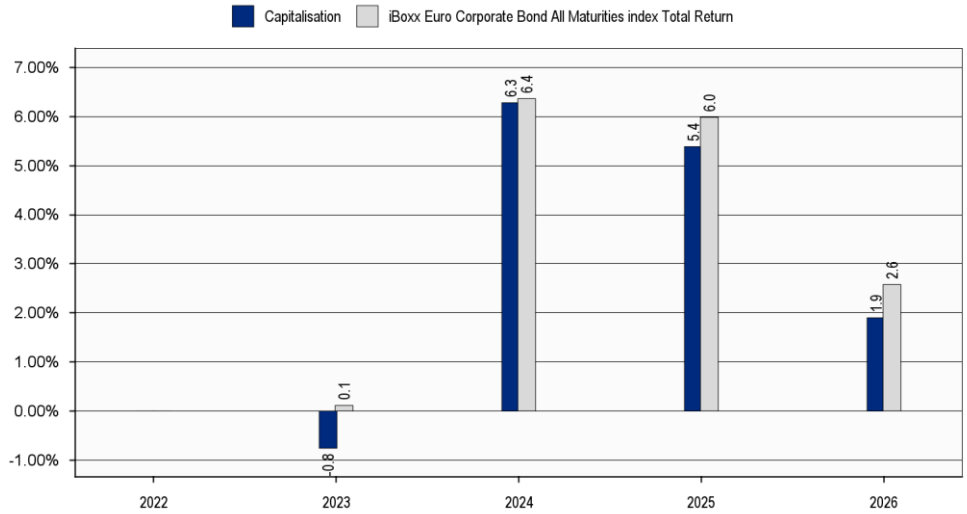

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 31 December 2025

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns				Since	
	1 year		3 year			
	Share	Benchmark	Share	Benchmark	Year	Value
Class B	1.90% (in EUR)	2.58% (in EUR)	4.51% (in EUR)	4.96% (in EUR)	24/09/2021	-0.25% (in EUR)
Class F	2.26% (in EUR)	2.58% (in EUR)			18/12/2024	2.20% (in EUR)
Class A	1.84% (in EUR)	2.58% (in EUR)			16/01/2024	3.74% (in EUR)

16.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6328642713	0.73%	0.05%
Class B (CAP) - BE6328643729	0.73%	0.05%
Class F (CAP) - BE6328645740	0.37%	0.05%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 51.90%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

16.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2024 class A 0.80 EUR
2025 class A 2,61 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

17 . INFORMATION ON SUBFUND DPAM B EQUITIES EUROPE INDEX

17.1 . MANAGEMENT REPORT

17.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities Europe Index sub-fund of the DPAM CAPITAL B Sicav. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities Europe Index sub-fund of the DPAM CAPITAL B Sicav on 1 April 2022.

17.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

17.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in European equities.

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

17.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

17.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

17.1.6 . Index and benchmark

MSCI Europe Net Return. This benchmark is used in managing of the sub fund.
MSCI Europe Net Return covers approximately 85% of the floating market capitalisation of the countries in EUROPE included in the index. Additional information on this index and its composition can be found at www.msci.com.

The performance of the benchmark index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The tracking error is of the order of 1.3%.

17.1.7 . Policy followed during the year

The benchmark of the DPAM B Equities Europe Index sub-fund is the MSCI Europe Net DTR Index. The MSCI Europe Net DTR Index, dividends net of local withholding tax reinvested, covers European countries and is established by MSCI. All the countries of Europe are included in this index, except Luxembourg given its low market capitalization. Greece is classified as an emerging country by the MSCI index since end of 2013.

As of the end of the semester, the index had 396 positions. The index value can be viewed on MSCI's website, *www.msci.com/end-of-day-data-search*. The composition of its indices can be viewed on the MSCI's website, *www.msci.com/constituents*.

The objective of the fund is to physically and fully replicate the composition of the underlying index. As in the past, full investment continued in this compartment. The level of liquidity, after deduction of futures contracts on stock market indices, was kept at a very low level. The use of futures on the MSCI Europe index supplemented positions in equities and allowed to be fully invested through liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions.

During the semester, the sub-fund closely followed the movement of the index.

17.1.8 . Future policy

As in the past, the DPAM B Equities Europe Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the MSCI Europe Net DTR Index published by MSCI.

17.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

17.2 . BALANCE SHEET

17.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	34,662,079.56
Sales	67,379,337.56
Total 1	**102,041,417.12**
Subscriptions	55,221,713.13
Redemptions	106,436,039.36
Total 2	**161,657,752.49**
Reference average of the total net asset	1,027,999,401.57
Rotation Percentage	**-5.80%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

17.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

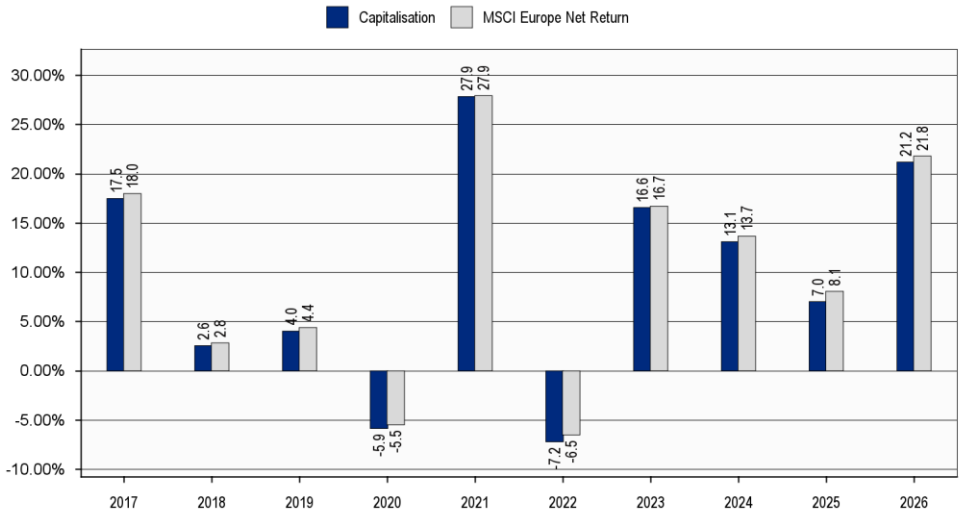

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Class N (CAP) - BE6299533628	0.46%	0.09%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 14.05%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

17.4.8 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2016/2017	2.75 EUR
2018	class A 3.15 EUR
	class M 3.15 EUR
2019	class A 2.53 EUR

2021	class A 2.79 EUR
	class M 2.81 EUR
2023	class A 2.39 EUR
	class M 2.67 EUR
2024	class A 3.36 EUR
	class M 3.64 EUR
2025	class A 3,42 EUR
	class M 3,46 EUR

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Not applicable

18 . INFORMATION ON SUBFUND DPAM B EQUITIES US INDEX

18.1 . MANAGEMENT REPORT

18.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities US Index sub-fund of the DPAM CAPITAL B Sicav. On 1 April 2022, the sub-fund was launched following the merger. Initial subscription price: Subscription price during this period.
The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities US Index sub-fund of the DPAM CAPITAL B Sicav on 1 April 2022.

18.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

18.1.3 . Objective and main aspects of the investment policy

Objective

The objective is to obtain the highest possible overall return for shareholders, with emphasis on investments in US equities.

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

18.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

18.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

18.1.6 . Index and benchmark

MSCI USA Net Return

This benchmark is used in the managing of the sub-fund.
MSCI USA Net Return covers approximately 85% of the free float market capitalisation of the countries in the USA included in the index. Additional information on this index and its composition is available at www.msci.com

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The tracking error is about 1.5%

18.1.7 . Policy followed during the year

The benchmark of the Equities US Index sub-fund is the MSCI Daily Net Total Return USA Euro index.

The MSCI Daily Net Total Return USA Euro, dividends net of local withholding tax reinvested, covers the United States and is established by MSCI.

At the end of the semester, the index had 527 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying index (MSCI USA). As in the past, full investment continued in this compartment. The level of cash, after deduction of futures contracts on stock market indices, was kept at a very low level. The use of futures on the S&P 500 index supplemented positions in equities and allowed to be fully invested through liquid instruments without disrupting the portfolio structure during daily subscriptions and redemptions.

During the semester, the sub-fund closely followed the movement of the index.

18.1.8 . Future policy

As in the past, the Equities US Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the USA index published by MSCI.

18.1.9 . Synthetic risk indicator

The summary risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and Reward Profile: 4.

18.2 . BALANCE SHEET

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
USD	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

18.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	539,638,523.50
Sales	8,694,639.92
Total 1	**548,333,163.42**
Subscriptions	572,605,958.62
Redemptions	36,532,291.28
Total 2	**609,138,249.90**
Reference average of the total net asset	338,155,003.91
Rotation Percentage	**-17.98%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively

in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

18.4.4 . Liabilities relating to the positions on financial derivative instruments

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

18.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

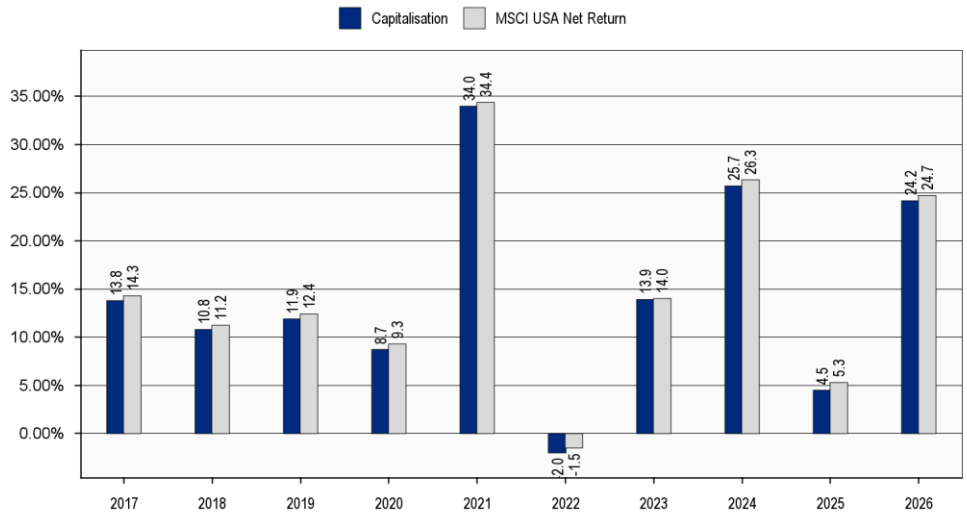

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 8.34%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

19 . INFORMATION ON SUBFUND DPAM B EQUITIES JAPAN INDEX

19.1 . MANAGEMENT REPORT

19.1.1 . Subfund launch date and subscription price of shares

Initial subscription period:1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities Japan Index sub-fund of the DPAM CAPITAL B Sicav. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities Japan Index sub-fund of the DPAM CAPITAL B Sicav on 1 April 2022.

19.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

19.1.3 . Objective and main aspects of the investment policy

Objective
The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in Japanese equities.
This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

19.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

19.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

19.1.6 . Index and benchmark

MSCI Japan Net Return by MSCI Inc

This benchmark is used in managing the sub-fund.
MSCI Japan Net Return covers approximately 85% of the floating market capitalization of the countries in the JAPAN zone included in the index. Additional information on this index and its composition can be found at www.msci.com.
The performance of the benchmark index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The tracking error is of the order of 2.0%.

19.1.7 . Policy followed during the year

The benchmark of the DPAM B Equities Japan Index sub-fund is the MSCI Japan Net DTR Index. The MSCI Japan Net DTR Index, Net Dividends Reinvested, covers Japan and is established by MSCI.

As of the end of the semester, the index had 168 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying. The use of futures on the Nikkei 225 index supplemented positions in equities and allowed to be fully invested through a liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions. The Nikkei 225 Index correlates well with the MSCI Japan Net DTR Index. The results obtained on these futures are therefore close to those which would have been obtained directly in securities.

During the semester, the sub-fund closely followed the movement of the index.

19.1.8 . Future policy

The DPAM B Equities Japan Index sub-fund, whose vocation is to be representative of the Japanese market, will continue its investment policy based on broad sector diversification with the MSCI Japan Net DTR Index published by MSCI as a benchmark.

19.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

Miscellaneous services	0.31%
Coal mining and steel industry	0.30%
Miscellaneous consumer goods	0.27%
Photographic And Optics	0.22%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
JPY	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

19.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	4,033,904.02
Sales	6,777,650.16
Total 1	**10,811,554.18**
Subscriptions	5,274,543.45
Redemptions	8,413,442.20
Total 2	**13,687,985.65**
Reference average of the total net asset	101,337,568.55
Rotation Percentage	**-2.84%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

19.4.4 . Liabilities relating to the positions on financial derivative instruments

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

19.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

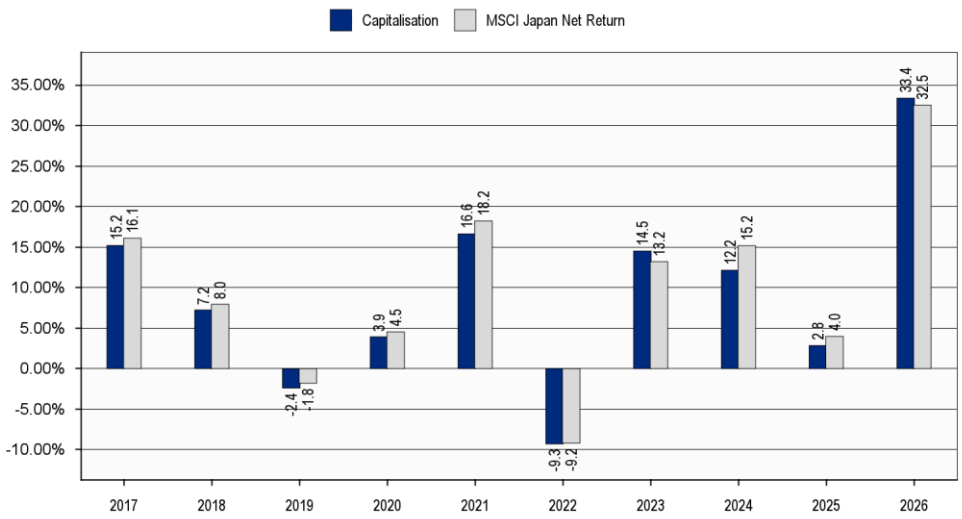

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026.

19.4.7 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6289154625	0.74%	0.08%
Class B (CAP) - BE6278394695	0.73%	0.08%
Class F (CAP) - BE0947568722	0.38%	0.08%
Class M (DIS) - BE6299536654	0.49%	0.08%
Class N (CAP) - BE6299537660	0.43%	0.08%
Class P (CAP) - BE6249812056	0.13%	0.08%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 23.44%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

19.4.8 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2016/2017	1.67 EUR
2018	class A 2.15 EUR

2019	class A 1.57 EUR
	class M 1.86 EUR
2021	class A 2.20 EUR
	class M 2.21 EUR
2022	class A 1.15 EUR
	class M 1.45 EUR
2023	class A 2.32 EUR

	class M 2.34 EUR
2024	class A 2.54 EUR
	class M 2.57 EUR
2025	class A 2,39 EUR
	class M 2,42 EUR

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

20 . INFORMATION ON SUBFUND DPAM B EQUITIES EMU INDEX

20.1 . MANAGEMENT REPORT

20.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: April 1, 2022.

On March 24, 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities EMU Index sub-fund of the DPAM CAPITAL B mutual fund. On April 1, 2022, the sub-fund was launched following the merger.
Subscription price during this period: The initial subscription price corresponds to the net asset value of the shares of the DPAM CAPITAL B Equities EMU Index subfund of the DPAM CAPITAL B mutual fund on April 1, 2022.

20.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

20.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in equities from European Union member countries participating in the European Monetary Union (EMU).
This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

20.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

20.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

20.1.6 . Index and benchmark

MSCI EMU Net Return by MSCI Inc

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.
This benchmark is used in managing the sub-fund.
MSCI EMU Net Return covers approximately 85% of the floating market capitalization of the countries in the EMU zone included in the index. Additional information on this index and its composition can be found at www.msci.com.

The performance of the benchmark index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The tracking error is of the order of 0.80%.

20.1.7 . Policy followed during the year

The benchmark of the DPAM B Equities EMU Index sub-fund is the MSCI EMU Net DTR Index. The MSCI EMU Net DTR Index, dividends net of local withholding tax reinvested, covers Eurozone countries and is established by MSCI. All the countries of Eurozone are included in this index, except Luxembourg given its low market capitalization. Greece was classified as an emerging country by the MSCI index at the end of 2013.

As of the end of the semester, the index had 220 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying index. As in the past, full investment continued in this compartment. The level of cash, after deduction of futures contracts on stock market indices, was kept at a very low level. The use of futures on the Dow Jones EuroStoxx 50 index supplemented positions in equities

and allowed to be fully invested through liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions.

During the semester, the sub-fund closely followed the movement of the index.

20.1.8 . Future policy

As in the past, the DPAM B Equities EMU Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the MSCI EMU Net DTR Index published by MSCI.

20.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

20.2 . BALANCE SHEET

	As at 30.06.26 (in EUR)	As at 30.06.25 (in EUR)

20.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	22,426,887.41
Sales	18,517,349.94
Total 1	**40,944,237.35**
Subscriptions	27,371,520.33
Redemptions	30,310,589.72
Total 2	**57,682,110.05**
Reference average of the total net asset	220,789,996.08
Rotation Percentage	**-7.58%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

20.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

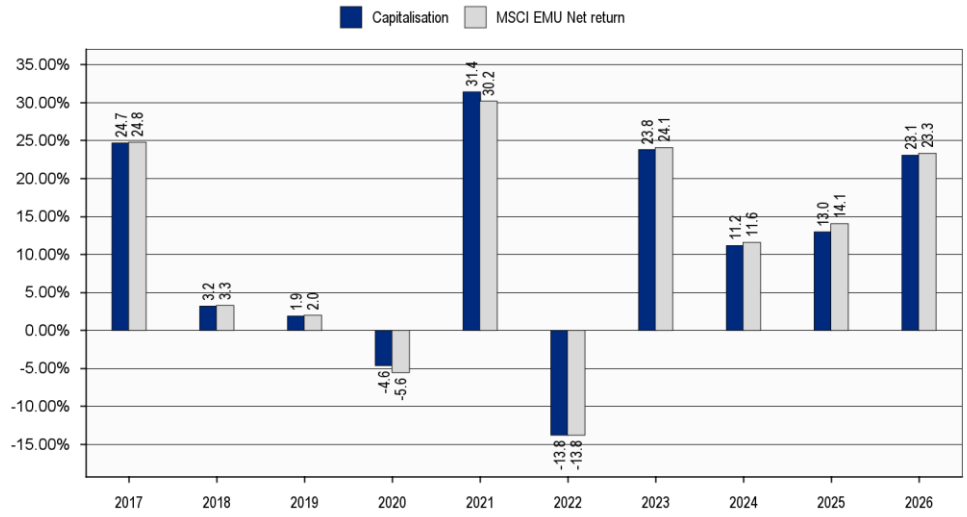

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

20.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6289162701	0.73%	0.06%
Class B (CAP) - BE6278392673	0.70%	0.06%
Class F (CAP) - BE0947573771	0.37%	0.06%
Class M (DIS) - BE6299528578	0.48%	0.06%
Class N (CAP) - BE6299529584	0.48%	0.06%
Class P (CAP) - BE6249813062	0.11%	0.06%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 39.00%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

20.4.7 . Notes to the financial statements and other information

2025	class A 3,94 EUR
	class M 3,98 EUR

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

21 . INFORMATION ON SUBFUND DPAM B EQUITIES WORLD EX JAPAN, EUROPE & USA INDEX

21.1 . MANAGEMENT REPORT

21.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities World ex Japan, Europe & USA Index sub-fund of the DPAM CAPITAL B Sicav. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities World ex Japan, Europe & USA Index sub-fund of the DPAM CAPITAL B Sicav on 1 April 2022.

21.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

21.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in equities from Pacific Basin countries (ex-Japan), Canada and Israel.
This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Investment policy

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

21.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

21.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

21.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: MSCI World ex JEU Net Return

MSCI World ex JEU Net Return: Composite index based on the MSCI Australia, Canada, Hong Kong, New Zealand, Singapore and Israel [Daily Total Return Net] indices of MSCI Inc. This benchmark is used for the management of the sub-fund.
MSCI World ex JEU Net Return covers approximately 85% of the floating market capitalization of the countries in the zone Australia, Canada, Hong Kong, New Zealand, Singapore and Israel included in the index.

Additional information on the index and its composition is available at www.msci.com.
The performance of the benchmark is calculated by reinvesting net dividends (Net Return).

MSCI Limited is registered with the European Securities and Markets Authority (ESMA).

The “tracking error” is of the order of 1.4%

21.1.7 . Policy followed during the year

The benchmark of the DPAM B Equities World Ex-JEU Index sub-fund is the MSCI Daily Net Total Return Index Australia, Canada, Hong Kong, New Zealand, Singapore and Israel. The benchmark, dividends net of local withholding tax reinvested, is based on the market capitalization of the MSCI indices for Australia, Canada, Hong Kong, New Zealand, Singapore and Israel.

As of the end of the semester, the index had 191 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying index. As in the past, full investment continued in this compartment. The level of cash was kept at a very low level.

During the semester, the sub-fund closely followed the movement of the index.

21.1.8 . Future policy

As in the past, the DPAM B Equities World Ex-JEU Index sub-fund will pursue an investment policy based on geographic and sector indexation. The benchmark remains the same.

21.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

21.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	6,794,875.31
Sales	2,482,984.89
Total 1	**9,277,860.20**
Subscriptions	5,210,060.45
Redemptions	1,660,131.05
Total 2	**6,870,191.50**
Reference average of the total net asset	74,505,315.01
Rotation Percentage	**3.23%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

21.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

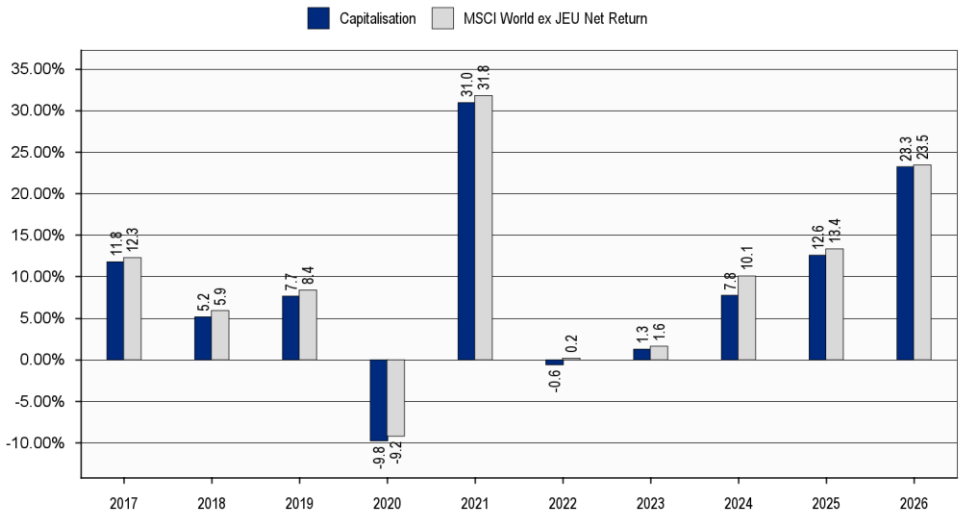

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an passively managed fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026.

21.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6289164723	0.76%	0.06%
Class B (CAP) - BE6278413883	0.76%	0.06%
Class F (CAP) - BE0947574787	0.40%	0.06%
Class N (CAP) - BE6299342657	0.50%	0.06%
Class P (CAP) - BE6249814078	0.15%	0.06%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 30.29%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

21.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2016/2017	2.51 EUR
2018	class A 3.90 EUR

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

22 . INFORMATION ON SUBFUND DPAM B EQUITIES EMU BEHAVIORAL VALUE

22.1 . MANAGEMENT REPORT

22.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities EMU Behavioral Value sub-fund of the DPAM CAPITAL B Sicav. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: The initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Equities EMU Behavioral Value sub-fund of the DPAM CAPITAL B Sicav on 1 April 2022.

22.1.2 . Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

22.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide the shareholders with as high a global return as possible. The sub-fund invests at least 50% in listed equities (without sector limitation) from the European Union member countries participating in the European Monetary Union (EMU). The investment policy is based on the principles of Behavioral Finance, an academic field which analyses financial markets with the aid of psychology.

The sub-fund invests in considered undervalued and showing good momentum. The risks are widely spread, among others by a broad sector diversification.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

22.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

22.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

22.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI EMU Net Return.

This index is representative of the large- and mid-cap equity market of developed countries (as defined by MSCI and mainly according to the country of incorporation and the country of primary listing of its securities) in the EMU zone.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.

The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the “Investment Strategy” section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

22.1.7 . Policy followed during the year

Eurozone equity markets were weighed down by Middle East tensions through March but recovered strongly during the second quarter, ending the semester on a particularly strong note. The regional economy remained resilient despite the oil price shock and an exceptionally uncertain geopolitical environment. While Europe is less directly exposed to the AI investment theme than other regions, it continues to benefit from rising capital expenditure expectations in electricity generation and distribution, defense, and broader strategic resilience initiatives.

The Information Technology sector delivered an outstanding performance, driven primarily by the semiconductor industry. The Energy sector initially benefited from higher oil prices and geopolitical tensions, although momentum faded during the final month of the semester. Utilities were also among the key beneficiaries of the AI theme, given the expected increase in power demand. Cyclical sectors such as Industrials and Materials gained support from the resilient macroeconomic backdrop and expectations of increased investment in production capacity. In contrast, more defensive sectors, including Communication Services, as well as consumer-oriented sectors such as Consumer Staples, Healthcare, and Consumer Discretionary, underperformed the broader market.

Over the semester, the strategy's performance was driven primarily by stock selection, while sector allocation had a broadly neutral impact. The overweight position in Information Technology contributed positively, whereas the underweight position in Financials detracted from performance. At the same time, some of the strongest stock-picking contributions came from the Financials sector, notably through holdings in Raiffeisen Bank (which return 49.5% over the period), BNP Paribas, or ABN AMRO, and insurers such as Unipol and NN Group. Within Consumer Staples, AB InBev and Carrefour were among the largest contributors. In the Materials sector, DSM-Firmenich and ArcelorMittal delivered strong returns. STMicroelectronics was the top contributor driven by steady upgrade and benefiting from AI investment frenzy. DIeteren was also among the top contributor of the semester with outperformance fuelled by strategic developments around stake in Belron.

Among others, significant detractors came from the transportation sector, where holdings in airline stocks such as IAG and Ryanair suffered following the escalation of the conflict in the Middle East. Both positions have since been sold. Within capital goods, Kion lost dearly weaker results than expected, as did Alstom, which has since been sold from the portfolio’

Throughout the semester, the fund maintained meaningful exposure to value-oriented sectors such as Financials and Utilities, while remaining underweight in less value-oriented segments including Technology, Industrials, and Consumer Discretionary, particularly the luxury goods industry.

We continue to adhere to our valuation- and momentum-driven investment process, gradually rotating out of relatively expensive companies and into more attractively valued opportunities within the same sectors.

22.1.8 . Future policy

The value investment style is expected to continue benefiting from its attractive relative valuations, as well as solid earnings growth and positive momentum. We will maintain our systematic behavioral value strategy, which involves replacing relatively expensive stocks within each sector with more attractively valued alternatives. This approach avoids value traps, financially weaker companies, and those with significant ESG controversies. We place strong emphasis on balance sheet quality and leverage. The fund will maintain a diversified sector allocation, with a preference for value-oriented sectors such as financials, utilities, real estate, and communication services, while also maintaining selective exposure to defensives like healthcare and consumer staples. In general, we will continue to keep a reduced exposure to cyclical sectors - including industrials and consumer discretionary - where valuations and earnings visibility remain less compelling - while technology will be kept overweighted against the value benchmark but underweight vs. general market.

22.1.9 . Synthetic risk indicator

The summary risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5

22.2 . BALANCE SHEET

22.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	28,374,130.38
Sales	28,841,543.58
Total 1	**57,215,673.96**
Subscriptions	116,105.42
Redemptions	1,178,674.67
Total 2	**1,294,780.09**
Reference average of the total net asset	22,263,190.35
Rotation Percentage	**251.18%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased Turnover Rate

The management process (value selection and portfolio construction) is quantitative and systematic in its implementation.

Each month, the universe is screened and ranked sector by sector based on valuation and earnings momentum indicators (revisions over the last three months of earnings per share for the next twelve months). Quality filters are also applied (default risk, debt, ESG score, earnings momentum, etc.). Securities in the first or second quartiles of each sector are eligible for purchase, while those in the third or fourth quartiles are sold and replaced by better-ranked securities. Exceptions are necessary in order to manage sector deviations and active risk. As a result, some securities in the third or fourth quartiles may need to be purchased or retained. In terms of weighting, the target weighting per security is to be 'equally overweighted'. The weighting in each security therefore depends not only on the number of securities selected in each sector, but also on the weighting in the benchmark for each security. Replacing one security with another may therefore require arbitrage across all other securities in a sector. Qualitative filters sometimes require complete sales of positions despite recent purchases or improvements in the screening process. The funds are Article 8 SFDR funds with the objective of achieving better ESG scores than the benchmark. Arbitrage may be necessary to eliminate or reduce certain stocks with poor scores and increase the best ones.

Furthermore, the fund's turnover has increased significantly since June 2025 because we changed the benchmark index from the 'standard' MSCI to the 'value' index for each region. The weightings of sectors in the value indices are very different, and we have had to execute a large number of trades to bring the portfolio closer to the sector weightings of the respective benchmarks. For example, the weightings of industrials and technology have fallen sharply, while the weighting of financials has increased by more than 50%. We also decided to reduce the number of target positions and concentrate the portfolios on fewer stocks. In addition, market volatility and internal rotations have been quite violent for months, and we have had to frequently adjust the weighting of certain stocks whose momentum has been changing very rapidly. - The sensitivity of our ranking has been significantly impacted by market volatility and significant sector and factor rotations in recent months, requiring certain position adjustments in order to manage the risk of deviation from the new benchmark as well as the portfolio's non-systematic risk.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

22.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

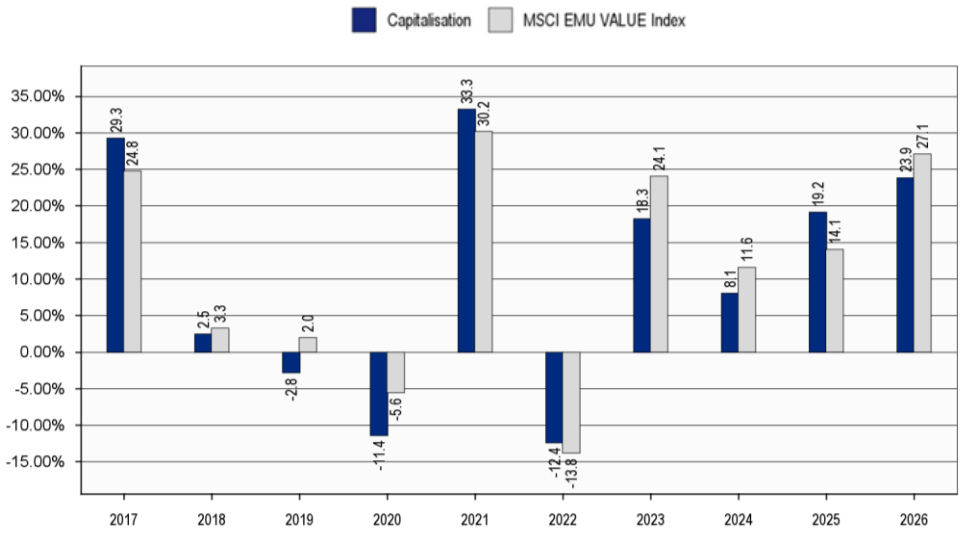

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026

Class B

Annual return

The benchmark presented was the MSCI EMU Net Return until 07/01/25, and from 07/01/25 the benchmark used is MSCI EMU Value.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 47.29%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

23 . INFORMATION ON SUBFUND DPAM B EQUITIES US BEHAVIORAL VALUE

23.1 . MANAGEMENT REPORT

23.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Equities US Behavioral Value sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: The initial subscription price corresponds to the net asset value of the shares of the DPAM CAPITAL B Equities US Behavioral Value sub-fund of the DPAM CAPITAL B Sicav on 1 April 2022.

23.1.2 . Stock exchange listing

The shares of the sub-fund are not listed on an exchange.

23.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide the shareholders with as high a global return as possible. The sub-fund invests in American listed equities. The investment policy is based on the principles of Behavioral Finance, an academic field which analyses financial markets with the aid of psychology.

The sub-fund invests in equities considered undervalued and showing good momentum. The risks are widely spread, among others by a broad sector diversification.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

23.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

23.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

23.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI USA Net Return.

This index is representative of the large- and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the United States.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.
The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment strategy" section of the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

23.1.7 . Policy followed during the year

US equities had a strong first half of 2026, only briefly interrupted in March due to the US-Iran conflict and the closure of the Strait of Hormuz. The geopolitical event sent oil prices soaring and stoked inflation fears. As hostilities ceased and corporate earnings remained supportive, equities rebounded quickly. Value companies outperformed growth companies while also mid-cap companies outperformed larger market capitalizations. This is also reflected in the performance of the fund, which significantly outperformed both the standard and the value index.

Best performances were delivered within financials, energy and healthcare while materials, industrials and communication services weighed on performance.

Within financials, the fund benefited from its overweight in State Street, Bank of New York Mellon and Citigroup. Energy was supported by our overweight in Valero Energy and Baker Hughes and our underweight in Chevron and Exxon Mobil. Healthcare was helped by our overweight in Royalty Pharma and CVS Health and our underweight in Abbott Laboratories.

On the other hand, materials suffered from our overweight in CRH and Newmont. Industrials were hit by our overweight in Xylem and Uber and our underweight in Caterpillar. Communication services were hurt by our underweight in Alphabet and our overweight in Walt Disney ant AT&T.

23.1.8 . Future policy

We will continue to implement the behavioral value systematic strategy by replacing relatively more expensive stocks (within sectors) by cheaper ones, avoiding value trapped, more financially challenged stocks, as well as highly controversial companies in terms of ESG. The funds will keep a diversified and close to neutral allocation at the sector level.

23.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

23.4.2 . Asset Allocation (% of portfolio)

By Country	
United States of America	94.07%
Ireland	3.62%
Netherlands	1.77%
United Kingdom	0.54%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Internet and Internet services	15.32%
Banks And Other Credit Institutions	14.99%
Pharmaceuticals and cosmetics	9.57%
Electronics and semiconductors	7.01%
Utilities	6.15%
Machine and apparatus construction	5.05%
Communications	4.78%
Retail trade and department stores	4.51%
Petroleum	4.47%
Electrical engineering and electronics	3.96%

By sector	
Insurance Companies	3.48%
Biotechnology	3.45%
Foods and non-alcoholic drinks	2.98%
Real Estate companies	2.96%
Graphic art and publishing	2.91%
Financial, Investment and Other Diversified Comp.	2.69%
Building materials and trade	1.79%
Precious metals and stones	1.37%
Transportation	1.10%
Road vehicles	0.81%
Hotels and restaurants	0.65%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
USD	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

23.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	3,845,384.82
Sales	4,109,487.22
Total 1	**7,954,872.04**
Subscriptions	449,250.28
Redemptions	586,520.52
Total 2	**1,035,770.80**
Reference average of the total net asset	11,950,620.95
Rotation Percentage	**57.90%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased Turnover Rate

The investment process for the Behavioral Value funds is quantitative and systematic. Each month, the universe is screened and ranked based on valuation indicators and earnings momentum, coupled with quality filters. In each sector, the fund buys in the first quartile but has to sell companies dropping to the second half of the screening. The volatile nature of the screening can thus lead to above average turnover. Moreover, on June 30th, the benchmark changed from MSCI USA to MSCI USA Value, leading to additional turnover. This is clearly visible in the table whereby turnover in the 1st semester is significantly above turnover in the second semester.

23.4.4 . Subscriptions, redemptions and net asset value

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

23.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

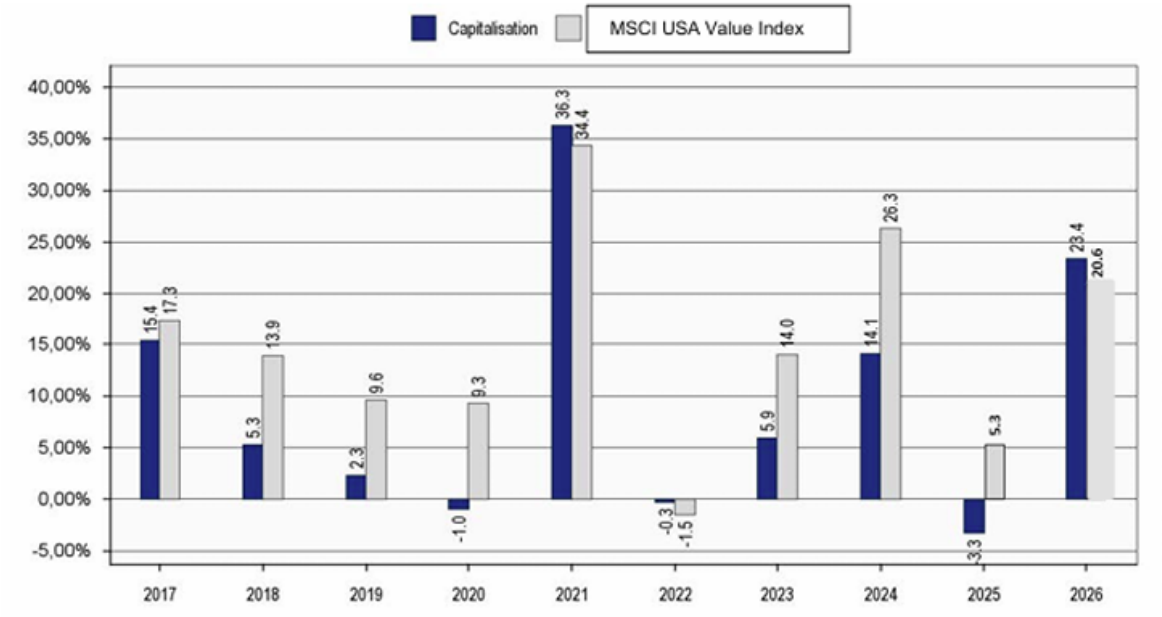

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

The benchmark presented was the MSCI USA Net Return until 07/01/25, and from 07/01/25 the benchmark used is MSCI USA Value.

23.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6289193045	2.10%	0.55%
Class B (CAP) - BE6278396716	2.08%	0.55%
Class B USD (CAP) - BE6278399744	2.09%	0.55%
Class F (CAP) - BE0947579836	1.18%	0.55%
Class L (CAP) - BE0945682293	2.78%	0.55%
Class N (CAP) - BE6299542710	1.30%	0.55%
Class W (CAP) - BE6289204156	1.18%	0.55%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Class P (CAP) BE6249816099 doesn't yet have a full accounting period, so there is too little data to provide useful guidance on recurring fees.

Fee sharing

As at 30 June 2026, 54.00%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

24 . INFORMATION ON SUBFUND DPAM B REAL ESTATE EMU DIVIDEND SUSTAINABLE

24.1 . MANAGEMENT REPORT

24.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Real Estate EMU Dividend Sustainable sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Real Estate EMU Dividend Sustainable sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

24.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

24.1.3 . Objective and main aspects of the investment policy

Objective

The objective of this sub-fund is to offer shareholders the highest long-term return by investing its assets in securities representative of the real estate sector in the broad sense in the EMU zone.
The weighted average dividend yield of the sub-fund's assets must exceed the dividend yield of the FTSE EPRA/NAREIT Eurozone Capped Net Return Index. These companies are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund will not invest more than 10% of its assets in units of other collective investment.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

24.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

24.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

24.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: FTSE EPRA/NAREIT Eurozone Capped Net Return index.
This index is representative of the market for listed real estate companies in developed countries (as defined in the index methodology) in the EMU zone.
The performance of this index is calculated by reinvesting net dividends (Net Return).

FTSE International Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance and select a large proportion of the securities in the portfolio.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

24.1.7 . Policy followed during the year

During the opening months of the year, our Eurozone listed real estate portfolio navigated an environment marked by shifting macroeconomic conditions and elevated geopolitical uncertainty. We entered the period benefiting from favorable capital market conditions, taking advantage of strong debt issuance activity and compressed financing spreads. These conditions supported refinancing initiatives and shareholder return programs, including share buy-backs. Portfolio positioning was concentrated in segments demonstrating strong operating fundamentals, notably logistics, healthcare, and residential assets, where healthy leasing trends and prudent capital management contributed positively to performance.

As market sentiment evolved, investor attention increasingly shifted toward sectors less exposed to potential technological disruption. In response, we increased our emphasis on real estate businesses characterized by tangible assets, durable cash flows, and low obsolescence risk. Residential real estate proved particularly resilient as investors gravitated toward business models offering greater predictability and stability.

Market conditions became significantly more challenging in March. Escalating geopolitical concerns, combined with higher interest rates, triggered a broad pullback across risk assets. Against this backdrop, portfolio construction became more defensive, prioritizing companies with solid balance sheets and carefully selected exposures. We remained vigilant regarding supply-side pressures, inflationary developments, and changes in interest-rate expectations, maintaining allocations to areas offering defensive characteristics and greater inflation resilience, including healthcare and selected retail segments with attractive income profiles.

Operational execution remained a key differentiator throughout the second quarter. We favored companies capable of delivering earnings growth through internal initiatives, supported by stable occupier demand and disciplined capital deployment. Transaction markets remained relatively subdued, with many companies financing growth through asset sales and portfolio optimization rather than large-scale acquisitions. Although financing costs remained higher and geopolitical risks persisted, underlying fundamentals across the Eurozone listed real estate market continued to hold up well. At the same time, refinancing activity improved, easing concerns around forced deleveraging.

24.1.8 . Future policy

Looking ahead, our investment approach will remain centered on operational quality and selective expansion opportunities. We continue to favor businesses with strong financial positions, visible earnings trajectories, and attractive risk-adjusted return potential. In our view, the market has largely incorporated the implications of a prolonged higher-interest-rate environment, and future valuation adjustments are more likely to occur gradually through inflationary effects than through a significant correction in asset prices.

Tenant demand and leasing markets are expected to remain broadly supportive, while management teams are likely to maintain their focus on organic growth and operational performance. Capital allocation discipline will continue to be critical, with asset recycling and targeted disposals serving as important sources of funding for new investments. M&A and transaction activity should remain measured, constrained by leverage considerations and balance sheet management priorities.

Risks remain, particularly within more highly leveraged and economically sensitive areas such as residential and office real estate. However, current market pricing already reflects substantial risk premia and meaningful discounts to underlying asset values. Should macroeconomic conditions become more favorable, these segments may offer significant upside potential.

Overall, we maintain a constructive but measured outlook. Access to funding has improved, earnings trends are becoming more stable, and sector valuations continue to present attractive opportunities. Our dividend strategy will remain focused on identifying companies capable of delivering sustainable operational performance while selectively capitalizing on growth opportunities. At the same time, we will mitigate downside asymmetry by focusing on companies with robust fundamentals and consistently high dividend sustainability.

24.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5

24.4.2 . Asset Allocation (% of portfolio)

By Country	
France	31.89%
Belgium	24.52%
Germany	17.75%
Spain	10.66%
Netherlands	8.95%
Luxembourg	4.42%
Finland	1.07%
Ireland	0.74%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Real Estate companies	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

24.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	35,068,905.16
Sales	24,539,154.55
Total 1	**59,608,059.71**
Subscriptions	13,827,949.66
Redemptions	7,079,389.74
Total 2	**20,907,339.40**
Reference average of the total net asset	93,261,552.69
Rotation Percentage	**41.50%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the seurities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

24.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

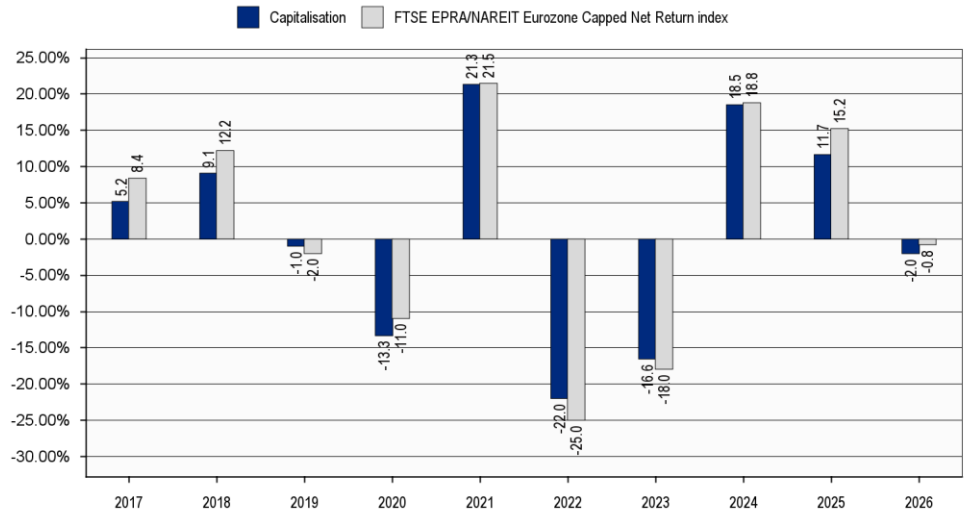

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

24.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6289205161	1.83%	0.20%
Class B (CAP) - BE0942186256	1.82%	0.20%
Class E (DIS) - BE0947578820	0.92%	0.20%
Class F (CAP) - BE0947577814	0.92%	0.20%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 59.33%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

24.4.7 . Notes to the financial statements and other information

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Investment restrictions and overruns

The sum of issuers representing more than 5% each represented more than 40% (58.12%) of the fund's TNA. And the fund held more than the maximum of 10% in the same issuer, 10.16% in UNIBAIL-RODAMCO-WESTFIELD (FR0013326246). Both breaches were caused by an inflow in the fund which is reflected on T +1 in the NAV and the purchase transactions following the inflow that were reflected on T in the NAV. Both the inflow and purchase transactions followed the correct accounting rules and standards and therefore the breaches were unavoidable and caused by accounting practices. Breaches closed as of NAV date 07/04/2026 (T+1).

25 . INFORMATION ON SUBFUND DPAM B BONDS EUR GOVERNMENT MEDIUM TERM

25.1 . MANAGEMENT REPORT

25.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Bonds EUR Medium Term sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Bonds EUR Medium Term sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

25.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

25.1.3 . Objective and main aspects of the investment policy

Objective

The objective is to obtain the highest overall return possible for its shareholders by investing mainly in bonds (with limitation as to sector) denominated in one or more European currencies and issued or guaranteed by investment grade entities.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.benchmark.

25.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

25.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

25.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: JPM EMU Government Investment Grade 1-10 years.
This index is a bond index representing bonds issued by the governments of European countries where the euro is the official currency, rated "investment grade" by each of the three major rating agencies (Standard & Poor's, Moody's and Fitch). The performance is calculated by reinvesting the coupons paid by the debt securities included in the index. The index contains bonds with a residual maturity between a minimum of 1 year and a maximum of 10 years.

J.P. Morgan Securities PLC is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment strategy" section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

25.1.7 . Policy followed during the year

The first half of 2026 was characterized by a clear shift from a disinflationary, stable macroeconomic backdrop to a much more volatile and uncertain environment dominated by geopolitical shocks and renewed inflation risks. The early part of the year supported European government bonds through declining yields and tightening spreads, but this trend reversed sharply from March onwards following the outbreak of war in the Middle East.

Energy prices became the central driver of markets, triggering a reassessment of inflation expectations and forcing central banks, particularly the ECB, to adopt a more cautious and eventually more hawkish stance. While bond markets initially sold off amid rising inflation concerns, later months saw a partial recovery as markets repriced the persistence of the energy shock and its implications for monetary policy.

Market developments

At the start of the year, markets were driven by geopolitical uncertainty linked to US policy actions and trade tensions, which contributed to increased volatility but supported European rates as yields declined across most maturities.

This constructive environment continued into February, with a broad-based rally in European government bonds. Yields declined across the curve and spreads tightened, supported by improving macroeconomic data and a stable ECB policy stance.

However, the macro regime shifted abruptly in March following the escalation of the war in the Middle East. The surge in oil and gas prices triggered a rapid reassessment of inflation dynamics, with markets moving away from a disinflation narrative toward expectations of more persistent inflation. This led to higher rates and flatter curves, while spreads widened amid renewed risk aversion.

Elevated geopolitical tensions persisted into April, keeping both inflation and growth risks in focus. Bond markets experienced heightened volatility, with yields moving higher overall and central banks emphasizing the increased uncertainty surrounding the outlook.

In May, markets began to stabilize, although the fundamental backdrop remained dominated by high energy prices and persistent inflation concerns. Economic data remained mixed, and while yields declined somewhat, expectations for further monetary tightening strengthened as the ECB signaled its readiness to act in response to inflation risks.

By June, a perceived easing of geopolitical tensions, particularly linked to developments in the Middle East, contributed to a decline in energy prices and supported a meaningful rally in European government bonds. Yields declined across most maturities as markets repriced the inflation outlook toward normalization. Nevertheless, the ECB adopted a more assertive stance, highlighting that inflation remained above target and that further tightening could still be required.

Performance drivers

Performance over the period was driven primarily by three key factors: duration positioning, curve strategies, and country allocation.

Duration was initially a positive contributor during the early months of the year as yields declined, particularly in January and February. However, the sharp rise in yields in March following the energy-driven inflation shock led to a change in positioning, with the portfolio moving from a duration overweight to an underweight stance in order to mitigate downside risks.

Curve positioning also played an important role. The portfolio’s overweight to the intermediate segment of the curve and underweight to shorter maturities contributed positively in periods of curve flattening, particularly during the later phase of the period.

Country allocation was a significant source of performance, especially during periods of spread tightening early in the year. Exposure to peripheral markets such as Italy, Spain, and Romania contributed positively during February, although these positions detracted during the spread widening observed in March. In the subsequent months, selective reallocation toward higher-yielding countries helped capture carry and benefit from renewed spread compression.

Portfolio positioning

Portfolio positioning evolved significantly over the period in response to changing market conditions.

At the beginning of the year, the strategy maintained a constructive stance, with a duration overweight and a focus on the belly of the curve to enhance carry and roll-down. This positioning was complemented by selective exposure to peripheral sovereigns to capture spread compression opportunities
Following the geopolitical shock in March, positioning shifted decisively. Duration exposure was reduced and ultimately turned into an underweight as the outlook for interest rates moved toward higher levels driven by persistent inflation. At the same time, exposure to higher-beta countries was reduced to protect the portfolio from widening spread in a risk-off environment.

In the following months, positioning became more balanced. While the underweight duration stance was largely maintained given expectations of further monetary tightening, the portfolio gradually reintroduced selective spread exposure, particularly in Southern European markets, to improve carry and benefit from potential spread compression.

By June, the portfolio remained positioned for a complex macro environment, with cautious duration exposure and a diversified allocation across countries. The combination of curve strategies, selective country positioning, and active duration management continued to reflect the need to navigate both inflation risks and geopolitical uncertainty.

25.1.8 . Future policy

Looking ahead, the key focus for markets will be on how the situation in the Middle East evolves and how this feeds through into energy prices and broader inflation dynamics. While recent developments have led to a rapid normalization in oil prices, uncertainty remains elevated regarding the sustainability of this move, particularly given the fragility of supply conditions and the risk of renewed tensions. In this respect, several factors will be critical to monitor, including the pace at which oil flows through key chokepoints are genuinely recovering, whether the rebound in supply is driven by a durable restart in production or merely the release of existing inventories, and the relative contribution of key producers such as Iran versus the Gulf states. These elements will determine whether the recent decline in energy prices can be sustained.

In this context, the reaction of the ECB will be crucial. The Governing Council has already signaled a more assertive stance, reflecting concerns that the energy shock could continue to broaden into underlying inflation. As such, the interplay between geopolitical developments, oil market normalization, and monetary policy responses will be the main determinant of the trajectory of interest rates and as such portfolio positioning going forward.

25.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

25.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	121,240,083.41
Sales	71,857,884.67
Total 1	**193,097,968.08**
Subscriptions	74,197,325.29
Redemptions	26,097,791.84
Total 2	**100,295,117.13**
Reference average of the total net asset	161,422,553.06
Rotation Percentage	**57.49%**

he rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

This is an actively managed fund that generally has a biased turnover rate due to the calculation method used.

25.4.4 . Liabilities relating to the positions on financial derivative instruments

Liabilities on futures

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

25.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

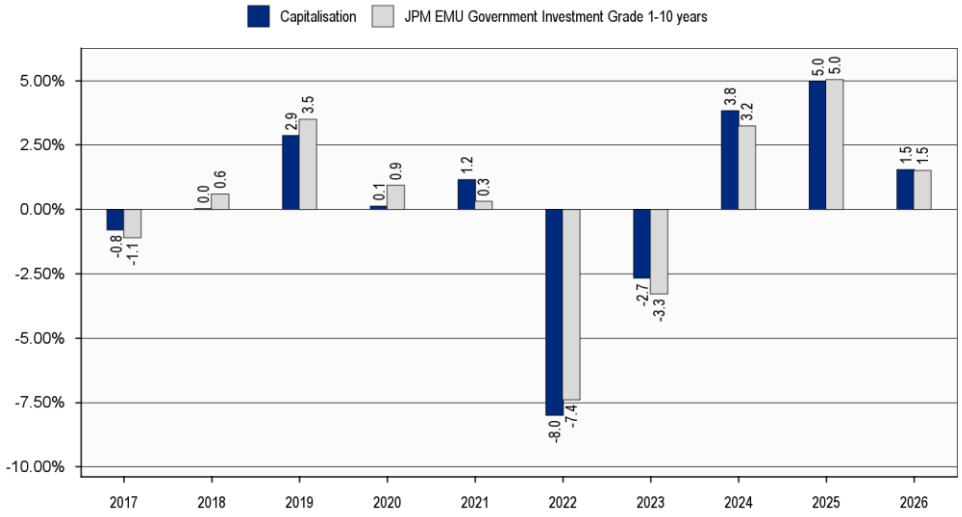

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class E (DIS) BE6289206177 not yet having a full accounting period, there is too little data to provide useful insights on performance.

Class B

25.4.7 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6261452054	0.63%	0.03%
Class B (CAP) - BE0944432401	0.61%	0.03%
Class F (CAP) - BE0947567716	0.34%	0.03%
Class J (CAP) - BE6299509388	0.23%	0.03%
Class M (DIS) - BE6299510394	0.39%	0.03%
Class N (CAP) - BE6299511400	0.33%	0.03%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Class E (DIS) BE6289206177 doesn't yet have a full accounting period, so there is too little data to provide useful guidance on recurring fees.

Fee sharing

As at 30 June 2026, 3.38%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

26.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub fund received the entire assets of the sub fund DPAM CAPITAL B Equities US Dividend Sustainable de la sicav DPAM CAPITAL B. On 1 April 2022, the sub fund was launched following the takeover effect of the merger.

Subscription price during this period: The initial subscription price corresponds to the Net Asset Value shares of the sub fund DPAM CAPITAL B Equities US Dividend Sustainable of the SICAV DPAM CAPITAL B dated of 1 April 2022

26.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

26.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide the shareholders with as high a global return as possible. The sub-fund invests in American listed equities as well as any security giving entitlement to the capital of these companies, selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

The risks are widely spread, among others by a broad sector diversification. The allocation of the portfolio will change depending on the assessment of the macroeconomic outlook and the situation on the financial markets. The sub-fund can for example prefer or avoid certain sectors or investment styles based among others on the economic outlook.

At least 50% of the portfolio must be composed of equities and other securities referred to above generating a higher actual or expected dividend yield than the market average.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

26.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

26.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

26.1.6 . Index and benchmark

The sub-fund uses the following index as its benchmark: MSCI USA Net Return.
This index is representative of the large- and mid-cap equity market of developed countries (as defined by MSCI and mainly based on the country of incorporation and the country of primary listing of its securities) in the United States.

The performance of this index is calculated by reinvesting net dividends (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance.
The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment strategy" section above for an explanation of how the sub-fund promotes environmental and social characteristics.

26.1.7 . Policy followed during the year

DPAM B Equities US Dividend Sustainable is an equity fund that invests exclusively in US dividend-paying and publicly traded companies. The objective of the strategy is to invest in high quality companies with a strong dividend profile, together with a solid balance-sheet and cash flow generation to maintain and grow the dividend over time. The fund is diversified, invests across most sectors and follows a sustainable approach composed with selective exclusions, a best-in class ESG screening and fundamental extra-financial analysis.

During the first 6 months of the year, the fund slightly underperformed the market which was largely driven by a very strong performance of the IT sector while more traditional sectors such as healthcare and financials underperformed. The energy and industrials sectors also performed very well with energy supported by the Middle East conflict.

Companies that ended in negative territory included Microsoft, Otis, AT&T, Ares and Abbott while we noted a strong positive performance of Applied Materials, Comfort Systems, Texas Instruments, Cisco and Morgan Stanley.

We added positions in Dell, Salesforce, Gilead, Citigroup, Micron, Coca-Cola, Littelfuse and Alcoa while exiting Procter & Gamble, KKR and Amdocs. We also reduced the weight of a.o. Exelon, Ares, Martin Marietta, Amgen and Tractor Supply while adding to other positions such as Alphabet and United Health.

26.1.8 . Future policy

We will continue our focus on investing in well-positioned and well-managed companies across different sectors that have the capability to grow their sales, earnings and dividends over the medium term. We expect the market performance to broaden with less focus on IT/AI as uncertainty persists around final demand and profitability of planned investments.

26.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

26.4.2 . Asset Allocation (% of portfolio)

By Country	
United States of America	96.34%
Ireland	3.66%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Office supplies and computing	15.74%
Pharmaceuticals and cosmetics	12.40%
Internet and Internet services	12.00%
Banks And Other Credit Institutions	9.84%
Electronics and semiconductors	8.86%
Machine and apparatus construction	7.72%
Retail trade and department stores	5.24%
Utilities	3.44%
Insurance Companies	2.78%
Real Estate companies	2.71%
Chemicals	2.45%
Financial, Investment and Other Diversified Comp.	2.21%
Graphic art and publishing	2.08%
Building materials and trade	1.79%
Electrical engineering and electronics	1.60%
Communications	1.59%
Environmental services and recycling	1.59%
Foods and non-alcoholic drinks	1.50%
Miscellaneous consumer goods	1.20%

By sector	
Healthcare and social services	0.91%
Biotechnology	0.76%
Precious metals and stones	0.61%
Hotels and restaurants	0.57%
Coal mining and steel industry	0.21%
Transportation	0.20%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
USD	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

26.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	41,154,544.22
Sales	34,644,690.44
Total 1	**75,799,234.66**
Subscriptions	26,644,376.72
Redemptions	29,126,171.83
Total 2	**55,770,548.55**
Reference average of the total net asset	304,720,695.54
Rotation Percentage	**6.57%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

26.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

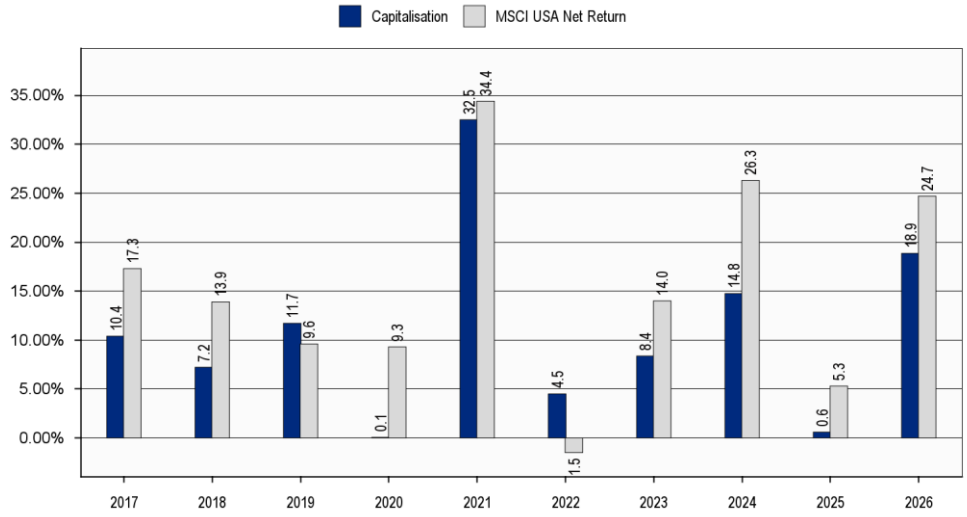

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

The B EUR Hedged (CAP) class BE6328637663 doesn't yet have a full financial year, so there’s too little data to give any useful performance insights.

Class P (CAP) - BE6289222331	0.14%	0.16%
Class V (DIS) - BE6289226373	0.93%	0.16%
Class W (CAP) - BE6289227389	0.93%	0.16%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

The Class B EUR Hedged (CAP) BE6328637663 doesn’t yet have a full accounting year, so there’s too little data to provide useful information on recurring fees.

Fee sharing

As at 30 June 2026, 44.78%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

27 . INFORMATION ON SUBFUND DPAM B REAL ESTATE EMU SUSTAINABLE

27.1 . MANAGEMENT REPORT

27.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM CAPITAL B Real Estate EMU sub-fund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM CAPITAL B Real Estate EMU Sustainable sub-fund of the DPAM CAPITAL B SICAV dated 1 April 2022.

27.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

27.1.3 . Objective and main aspects of the investment policy

Objective

The objective is to provide its shareholders with the highest possible overall return over the long term, with a focus on representative investments in the real estate sector in the euro zone. The sub-fund will not invest more than 40% of its assets in receivables of any kind. The companies in which the sub-fund invests are selected on the basis of compliance with environmental, social and governance (ESG) criteria.

The sub-fund uses a rigorous ESG methodology and strict exclusions in order not to undermine other environmental and social objectives and to ensure the required good governance practices.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

The sub-fund will not invest more than 10% of its assets in other units for collective investment.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

27.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

27.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

27.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: FTSE EPRA/NAREIT Eurozone Capped Net Return index.

This index is representative of the market for listed real estate companies in developed countries (as defined in the index methodology) in the EMU zone.
The performance of this index is calculated by reinvesting net dividends (Net Return).
FTSE International Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance and to select a large proportion of the securities in the portfolio.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

27.1.7 . Policy followed during the year

During the first quarter, our Eurozone listed real estate strategy was shaped by a dynamic macroeconomic and geopolitical backdrop. We began the year capitalizing on robust capital markets momentum, leveraging successful bond issuances and tight credit spreads to optimize refinancing and share buybacks. The focus was on sectors demonstrating operational resilience—logistics, healthcare, and residential—where leasing dynamics and disciplined capital deployment supported outperformance.

As the year progressed, we responded to market rotations driven by concerns over AI disruption, favoring asset-intensive, low-obsolescence (HALO) real estate. Residential assets emerged as standout performers, benefiting from investor preference for durable business models.

March brought a pronounced downturn, triggered by geopolitical tensions and rising interest rates. Our approach shifted to defensive positioning, emphasizing balance sheet strength and selective asset allocation. We closely monitored supply shocks, inflation, and interest rate repricing, maintaining exposure to segments with inflation protection and value preservation (healthcare, high-yield retail).

Throughout the second quarter, operational resilience became paramount. We prioritized organic growth, stable tenant demand, and disciplined capital allocation. Transaction activity was selective, with companies relying on asset disposals and capital recycling to fund growth. Despite more elevated rates and ongoing conflicts, eurozone listed real estate fundamentals remained stable, and refinancing activity resumed, reducing deleveraging risk.

27.1.8 . Future policy

Looking ahead, our Eurozone listed real estate strategy will continue to emphasize operational resilience and selective growth. We will focus on companies with strong balance sheets, earnings visibility, and attractive total return profiles. The “higher-for-longer” interest rate environment looks largely priced in, and we anticipate a gradual adjustment in valuations due to inflation rather than a sharp reset.

We expect tenant demand and leasing activity to remain stable, with management teams concentrating on organic growth and asset-level execution. Capital allocation will remain disciplined, with asset disposals and capital recycling supporting growth initiatives. Transaction activity is likely to stay selective, constrained by leverage and balance sheet limitations.

While downside risks persist—particularly in leveraged and high-beta segments such as residential and offices—current valuations reflect substantial risk premiums and implied asset value declines. Upside scenarios could drive strong rebounds in these areas if macro conditions stabilize.

Our outlook is cautiously optimistic: funding markets are open, earnings are stabilizing, and the sector offers a compelling risk/reward profile. We will continue to filter out macroeconomic noise, prioritize operational excellence, and position portfolios to capture selective growth opportunities while mitigating downside asymmetry.

27.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5

27.2 . BALANCE SHEET

27.4.2 . Asset Allocation (% of portfolio)

By Country	
France	33.51%
Belgium	21.43%
Germany	19.93%
Spain	9.76%
Netherlands	7.42%
Luxembourg	4.21%
Ireland	1.77%
Finland	1.42%
Italy	0.55%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Real Estate companies	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

27.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	19,528,937.11
Sales	24,752,896.57
Total 1	**44,281,833.68**
Subscriptions	8,333,103.23
Redemptions	16,405,022.08
Total 2	**24,738,125.31**
Reference average of the total net asset	100,686,498.80
Rotation Percentage	**19.41%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

27.4.4 . Subscriptions, redemptions and net asset value

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

27.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

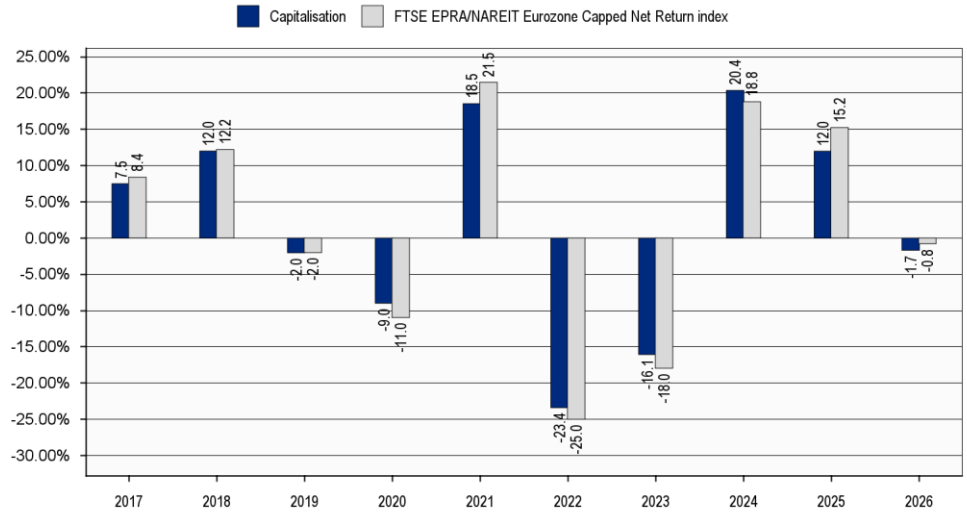

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 54.32%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

27.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2019 class A 1.74 EUR
class E 2.26 EUR
class M 2.21 EUR
2021 class A 1.90 EUR
class M 1.92 EUR
2022 class A 0.68 EUR
class M 1.17 EUR
2023 class A 1.86 EUR
class M 1.90 EUR
2024 nihil
2025 class E 1.32 EUR
class M 0.46 EUR

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

Investment restrictions and overruns

The sum of issuers representing more than 5% each represented more than 40% (43.337%) of the fund's TNA. The breach was mainly caused by a purchase transaction of COVIVIO (FR0000064578). Differences in cash and fees between Bloomberg and the official NAV data caused that the pre-trade control failed to identify the breach. These differences have been corrected in the meantime. Financial impact: EUR +436. Breach closed as of NAV date 27/02/2026 (T+1).

28 . INFORMATION ON SUBFUND DPAM B EQUITIES US SELECTION MSCI INDEX

28.1 . MANAGEMENT REPORT

28.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On March 24, 2022, the sub-fund received all the assets of the DPAM CAPITAL B Real Estate EMU Sustainable subfund of the DPAM CAPITAL B SICAV. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period. Initial subscription price: The initial subscription price corresponds to the net asset value of the shares of the DPAM CAPITAL B Real Estate EMU Sustainable sub-fund of the DPAM CAPITAL B on 1 April 2022.

28.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

28.1.3 . Objective and main aspects of the investment policy

Objective

The objective is to obtain the highest possible overall return for shareholders, with emphasis on investments in US equities.

The sub-fund is a tracker fund implementing a passive investment management strategy whose objective is to replicate physically and not synthetically the “Net Dividends Reinvested” performance of the MSCI USA Selection (formerly MSCI USA ESG Leaders Net Return) Index in Euro.

This is a passively managed sub-fund, which means that the portfolio manager's objective is to replicate the performance of a benchmark.

Investment policy

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

28.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

28.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

28.1.6 . Index and benchmark

MSCI USA Selection Net Total Return

This benchmark is used in the management of the sub-fund.
Further information on the Index, its composition, calculation and the rules governing its periodic review and rebalancing, as well as on the general methodology of the MSCI indices, is available at www.msci.com.

The performance of the benchmark index is calculated with net dividends reinvested (Net Return).

MSCI Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The tracking error is around 1.5%.

28.1.7 . Policy followed during the year

The benchmark of the Equities US Selection MSCI Index sub-fund is the MSCI Daily Net Total Return USA Selection Euro index.

The MSCI Daily Net Total Return USA Selection Euro index, Net Dividends Reinvested, provides exposure to companies with a high ESG performance in the United States and is established by MSCI.

At the end of the semester, the index had 263 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI’s website, www.msci.com/constituents.

The almost full physical replication policy has been followed throughout the semester.

During the semester, the sub-fund closely followed the movement of the index.

28.1.8 . Future policy

The Equities US Selection MSCI Index sub-fund, whose vocation is to be representative of American companies with a high ESG performance, will continue its investment policy based on broad sector diversification with the USA Selection index published by MSCI as a benchmark.

28.1.9 . Synthetic risk indicator

The summary risk indicator gives an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 5
With the exception of classes (A USD, B USD, M USD, N USD) : 4

By currency	
USD	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

28.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	161,237,495.86
Sales	672,230,182.73
Total 1	**833,467,678.59**
Subscriptions	109,650,235.94
Redemptions	624,698,091.58
Total 2	**734,348,327.52**
Reference average of the total net asset	1,156,062,366.41
Rotation Percentage	**8.57%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

28.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the fiscal year.

By annual yield, we mean the total yield achieved over one year. For the semi-annual report, the fiscal year covers the 12-month period leading up to the end of the semester.

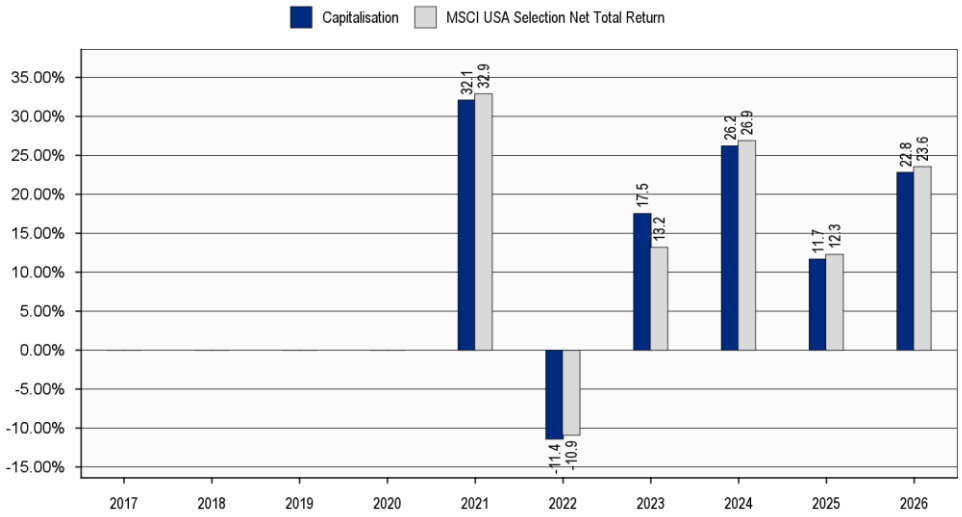

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an passively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 0.09%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

29 . INFORMATION ON SUBFUND DPAM B BALANCED GROWTH

29.1 . MANAGEMENT REPORT

29.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Growth sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: The initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Balanced Growth sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

29.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

29.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors, by means of a balanced managed portfolio, a long-term capital gain by investing in equity securities and/or debt securities of issuers throughout the world. No formal guarantee has been given either to the sub-fund or to its investors.

The sub-fund is actively managed. No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

Investment policy

The sub-fund invests mainly, without sector or geographical restriction, but mainly in Europe in (i) shares and/or other securities giving access to capital of companies and (ii) in fixed or floating rate short, medium and long-term bonds and/or debt securities.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund is a sub-fund within the meaning of Article 6 of the SFDR 2019/2088.

29.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

29.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

29.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

29.1.7 . Policy followed during the year

The portfolio construction is based on bottom-up stock selection and macro-awareness. We started 2026 with around 90% equities, evenly split between Europe and US. In fixed income is 40% invested in corporate credit while the rest is invested in government bonds. 2026 has been eventful in the first half: started with correction in Tech and broadening out while end of February the US and Israel engaged in a war with Iran, that created the largest energy shock since the 70's. We made some tactical changes in the portfolio (barbell between quality growth and value) but kept the Tech exposure and added some first and second derivative stocks to the building out of DC's.

The portfolio reflects our convictions, and we apply a buy & hold strategy. Through fundamental analysis and conviction is key in this process. Hence, sector composition is entirely the result of this approach. Sometimes we try to market time, but this is rather limited and very opportunistic. We trimmed the Bank exposure at the onset of the conflict and upped the Staples & Healthcare exposure to render the portfolio more defensive. At the same time, we increased the Energy and Utilities exposure (added more DC exposure with Vistra Corp, NRG Energy and Sempra). To benefit from an eventual ceasefire in the Gulf we added some Luxury.

In bonds we kept credit exposure at 40-ish %. The carry is the reason we hold on to the position but spread levels refrain us from buying more. We wait for a correction on LT rates to reduce the duration exposure. We are still long duration as

we believe that LT interest rates will decline as a ceasefire in the Gulf becomes a fact. The positions are the reflection of our fixed income teams' convictions.

29.1.8 . Future policy

The two dominant forces shaping markets in the first half of the year, accelerating earnings growth and changing inflation expectations, are set to remain the key drivers of risk sentiment and asset prices in the second half. The former helped equities in reaching record highs following a particularly strong earnings season. Although momentum is broad-based, a large share of this growth can be traced back to the inflection we are seeing in artificial intelligence. We continue to see opportunities here, but we also recognize that a lot of earnings growth has already been priced in at the index level. This means that a single stumble could be enough to derail market sentiment and cause volatility. Overall, we remain constructive on equities, particularly in the US and Emerging Markets, but would be cautious about blindly chasing momentum.

For bond markets, the focus is likely to remain on the second driver, inflation. Although energy prices quickly retraced to pre-conflict levels following the signing of the Memorandum of Understanding (MOU), there are reasons to believe the correction has been overdone. On the supply side, it will take time to bring production back on stream and to deliver it into end markets, while on the demand side, it is not only a question of when countries will refill their strategic reserves, but also of how many will build new reserves to reduce energy insecurity going forward, as already discussed in India, Australia and Pakistan. Beyond these supply and demand fundamentals, the addition of a risk premium to prices also appears warranted given how fragile the situation remains. The MOU seems to lack detail on every key element, leaving scope for renewed tension during the negotiation phase. Taken together, this suggests that current energy prices sit toward the lower end of the range likely to prevail in the coming months. However, looking further ahead, the market could drift back into oversupply absent any further geopolitical escalation, particularly as OPEC+ faces increasing pressure to raise quotas, with the recent exit of the UAE contributing to higher global supply.

With the transitory impact of energy prices on inflation in mind, the key question for central bankers is the extent to which indirect price effects will still materialize. Core inflation in the Eurozone remains closer to 3% than to the 2% target. However, in line with Christine Lagarde's comments, current dynamics are not comparable to 2022, when a supply shock unfolded on top of an existing demand shock. Against this backdrop, we believe any "risk management" hikes should be clearly distinguished from the initiation of a new tightening cycle. In the US, we see upside risks to inflation that extend beyond the energy crisis. Labor markets have recently shown renewed strength, while industrial activity is regaining momentum. On top of that, it will be important to monitor the potential inflationary implications of AI. Recent pricing actions by Apple are just one illustration of how AI-related dynamics may prove inflationary in the near term, as capacity constraints emerge and investment cycles demand adequate returns. More indirectly, AI has also been a key driver of strong equity markets, reinforcing a wealth effect that continues to support consumption, at least among asset holders. Taken together, inflation concerns could gradually shift from Europe towards the US, thereby underpinning the recent breakout in the dollar.

29.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

29.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	7,985,224.50
Sales	8,365,607.05
Total 1	**16,350,831.55**
Subscriptions	
Redemptions	
Total 2	
Reference average of the total net asset	39,528,187.21
Rotation Percentage	**41.36%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

29.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

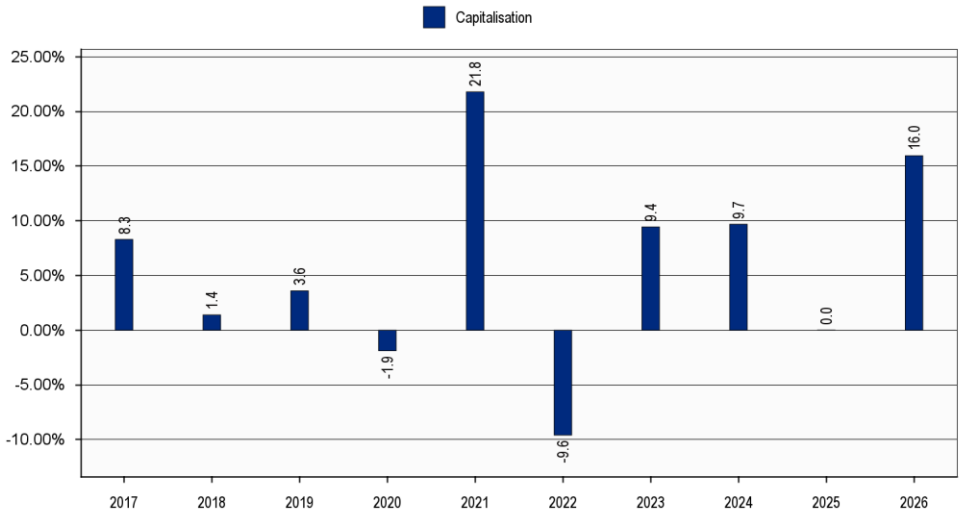

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
	Share	Share	Share	Share	Year	Value
Class B	15.96% (in EUR)	8.35% (in EUR)	4.71% (in EUR)	5.52% (in EUR)	31/07/1999	4.01% (in EUR)
Class A	15.97% (in EUR)	8.39% (in EUR)	4.76% (in EUR)	5.56% (in EUR)	31/03/2000	3.63% (in EUR)

29.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE0171618250	0.49%	0.14%
Class B (CAP) - BE0171619266	0.49%	0.14%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 0.08%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

29.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2019 class A 192.97 EUR
2020 class A 189.87 EUR
2021 class A 227.02 EUR
2022 class A 236.99 EUR
2023 class A 402.22 EUR
2024 class A 386.26 EUR
2025 class A 484.62 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the SICAV must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

30 . INFORMATION ON SUBFUND DPAM B BALANCED FLEXIBLE

30.1 . MANAGEMENT REPORT

30.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Flexible sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Balanced Flexible sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

30.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

30.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors a long-term capital gain by investing in equity securities, fixed income securities of issuers from all parts of the world or undertakings for collective investment.

This is an actively managed sub-fund.

No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal guarantee has been given either to the sub-fund or to its investors.

Investment policy

The sub-fund invests principally in shares and/or other securities giving access to capital (to a maximum amount of 60% of its net assets) and in bonds and/or other fixed-rate or floating-rate debt securities with an investment grade* rating on the scale used by one of the three rating agencies, Standard & Poor's (S&P)/Moody's/Fitch, and offering a periodic or capitalised yield. The sub-fund invests a maximum of 3% of its net assets in bonds and/or other fixed-rate or floating-rate debt securities with an inferior rating to investment grade.

In the event that the aforementioned investment criteria are exceeded passively, an adjustment will be made, taking into consideration the interests of the investors.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts, deposits, money market instruments and/or short-term instruments with an investment grade rating. Liquid assets are considered to be fixed rate.

The sub-fund may invest up to 10% of its assets in open-ended undertakings for collective investment in EUR in order to indirectly achieve the objectives listed above or to invest its liquidity.
*Investment Grade: is an interpretation of the rating of the bond issuer in terms of the financial risks. Rating agencies use their own scale to assess the notion of risk. Investment grade ratings are situated between AAA and BBB- according to the Standard & Poor's (S&P) and Fitch scale and between Aaa and Baa3 according to the Moody's scale. For bonds without an external rating, the manager is responsible for determining whether the issuer satisfies the requirements of an investment grade rating.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

30.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

30.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

30.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

30.1.7 . Policy followed during the year

At the start of the year, we invested in the broadening theme and oriented the portfolio towards real assets and sectors less prone to being disrupted by the Artificial Intelligence team. The war between the US and Iran changed that narrative abruptly and we turned the portfolio more defensive while keeping the equity weight steady as market indicators still pointed at a short conflict. Towards the end of March, we decided to take money off the table due to the lingering escalation that finally stalled. We reinvested the cash opportunistically but remain vigilant, given that the increased macro uncertainty did not stop the equity rally even though oil prices remain stubbornly high and continues to remain a risk to valuation and profit growth. Transaction-wise, Over the month of January we switched part of our European exposure to the US and further accumulation delivered a slight overweight position in US equities vs Europe. We feel comfortable with the regional position because the US economy remains resilient and Europe will feel the brunt of the conflict. We increased exposure to Energy, Utilities and trimmed Financials, IT and real estate.

30.1.8 . Future policy

The two dominant forces shaping markets in the first half of the year, accelerating earnings growth and changing inflation expectations, are set to remain the key drivers of risk sentiment and asset prices in the second half. The former helped equities in reaching record highs following a particularly strong earnings season. Although momentum is broad-based, a large share of this growth can be traced back to the inflection we are seeing in artificial intelligence. We continue to see opportunities here, but we also recognize that a lot of earnings growth has already been priced in at the index level. This means that a single stumble could be enough to derail market sentiment and cause volatility. Overall, we remain constructive on equities, particularly in the US and Emerging Markets, but would be cautious about blindly chasing momentum.

For bond markets, the focus is likely to remain on the second driver, inflation. Although energy prices quickly retraced to pre-conflict levels following the signing of the Memorandum of Understanding (MOU), there are reasons to believe the correction has been overdone. On the supply side, it will take time to bring production back on stream and to deliver it into end markets, while on the demand side, it is not only a question of when countries will refill their strategic reserves, but also of how many will build new reserves to reduce energy insecurity going forward, as already discussed in India, Australia and Pakistan. Beyond these supply and demand fundamentals, the addition of a risk premium to prices also appears warranted given how fragile the situation remains. The MOU seems to lack detail on every key element, leaving scope for renewed tension during the negotiation phase. Taken together, this suggests that current energy prices sit toward the lower end of the range likely to prevail in the coming months. However, looking further ahead, the market could drift back into oversupply absent any further geopolitical escalation, particularly as OPEC+ faces increasing pressure to raise quotas, with the recent exit of the UAE contributing to higher global supply.

With the transitory impact of energy prices on inflation in mind, the key question for central bankers is the extent to which indirect price effects will still materialize. Core inflation in the Eurozone remains closer to 3% than to the 2% target. However, in line with Christine Lagarde’s comments, current dynamics are not comparable to 2022, when a supply shock unfolded on top of an existing demand shock. Against this backdrop, we believe any “risk management” hikes should be clearly distinguished from the initiation of a new tightening cycle. In the US, we see upside risks to inflation that extend beyond the energy crisis. Labor markets have recently shown renewed strength, while industrial activity is regaining momentum. On top of that, it will be important to monitor the potential inflationary implications of AI. Recent pricing actions by Apple are just one illustration of how AI-related dynamics may prove inflationary in the near term, as capacity constraints emerge and investment cycles demand adequate returns. More indirectly, AI has also been a key driver of strong equity markets, reinforcing a wealth effect that continues to support consumption, at least among asset holders. Taken together, inflation concerns could gradually shift from Europe towards the US, thereby underpinning the recent breakout in the dollar.

30.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

30.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	14,019,804.47
Sales	20,801,771.02
Total 1	**34,821,575.49**
Subscriptions	
Redemptions	6,451,243.93
Total 2	**6,451,243.93**
Reference average of the total net asset	45,943,086.56
Rotation Percentage	**61.75%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

Tactical shift

The fund was European focused for many years. The fund manager decided early this year to alter the geographical allocation and put more weight on US equities given the more solid economic situation and the presence of monetary, fiscal and deregulation catalysts. On top AI capex will continue to dominate and support the economic growth. US companies delivered DD earnings growth last year and is proposed to deliver it in 2026 too. European economy will benefit from the German fiscal policy (investments in infra and defence) but tariff impact potentially will compensate while earnings growth was negative last year and will be MSD for this year.

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

30.4.5 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

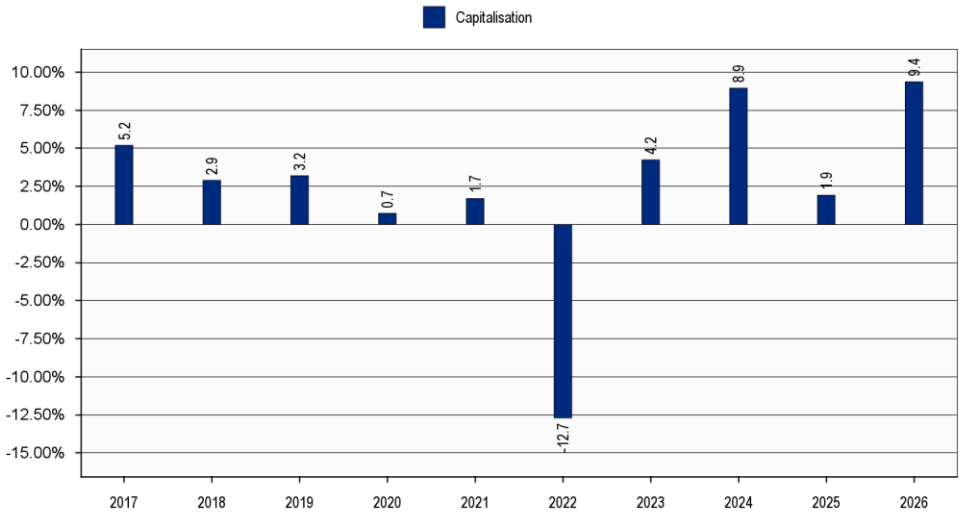

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
	Share	Share	Share	Share	Year	Value
Class B	9.37% (in EUR)	6.69% (in EUR)	2.02% (in EUR)	3.15% (in EUR)	07/04/2003	4.78% (in EUR)
Class F	10.38% (in EUR)	7.69% (in EUR)	2.98% (in EUR)	4.11% (in EUR)	02/04/2013	4.64% (in EUR)

30.4.6 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class B (CAP) - BE0940785794	1.25%	0.14%
Class F (CAP) - BE6248455063	0.30%	0.14%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 17.52%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

30.4.7 . Notes to the financial statements and other information

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

31 . INFORMATION ON SUBFUND DPAM B BONDS GLOBAL INFLATION LINKED

31.1 . MANAGEMENT REPORT

31.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Bonds Global Inflation Linked sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM HORIZON Bonds Global Inflation Linked sub-fund of the DPAM HORIZON B SICAV dated 1 April 2022.

31.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

31.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors exposure to debt securities denominated in any currency, whose interest payments and/or capital redemption depend on the movement in inflation in a given country or geographical region.

No formal guarantee has been given either to the sub-fund or to its investors.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark.

Investment policy

The sub-fund invests principally, without any form of sector restriction, a minimum of 75% of its net assets , in fixed or floating rate bonds and/or other debt securities, denominated in any currency and for which the payment of interest and/or redemption of capital depends on the movement in inflation in a given country or a geographical region, which may include, but is not limited to the following list: credit-linked notes* and fiduciary notes** with underlying instruments that have identical characteristics.

The sub-fund may, on an ancillary basis, invest in money market instruments such as for example, certificates of deposit, treasury notes and/or promissory notes, and bonds and/or other debt securities, including fixed or floating rate credit-linked notes and fiduciary notes denominated in any currency and on which the payment of interest and/or the redemption of principal is not dependent on the movement in inflation in a given country or geographical region.

In order to be eligible, those marketable securities forming the principal part and the ancillary part of the portfolio, must be (i) issued or guaranteed by a country, including, where applicable, its regional public authorities or by international or supranational public bodies, or (ii) issued by (governmental, public, semi public or private) institutions held or financed by one or several public players, such as countries, regional public authorities or public international law or supranational bodies and undertakings entrusted with the provision of services of public or general interest, or (iii) benefit from a mechanism guaranteeing a priority redemption in the event of default by the issuer.

The payment flows from bonds and/or other debt or equivalent securities, whose interest payments and/or redemption of principle are determined by inflation, generally have the following configuration:
Coupon payment = coupon in % * nominal amount * (Index t/Index°)
Reimbursement = nominal amount * (Index T/Index°) in which:
Coupon in % = fixed coupon of the bond (which is normally equal to the actual yield on the issue date of the bond)
Index° = a 3-month inflation index before the issue date of the bond (base index)
Index T = a 3-month inflation index before the payment date
Index T = a 3-month inflation index before the due date

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund may invest a maximum of 10% of its assets in open-ended undertakings for collective investment in order to indirectly achieve the above-mentioned target or place its liquidity.

* Credit-Linked Note: financial instrument issued by a financial institution in the form of a debt security on which the payment is connected to another bond or loan.
** Fiduciary Note: differs from a credit linked note in that the buyer does not bear risk of the financial institution which issues it.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

31.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

31.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

31.1.6 . Index and benchmark

The sub-fund uses the following index as a benchmark: Bloomberg Barclays Universal Inflation Linked GDP Weighted IG.

This index is representative of the global inflation-linked bond market. It is a custom index for DPAM calculated by Bloomberg Index Services Limited. The index includes inflation-linked bonds issued by countries with an investment grade rating. Countries are weighted according to their GDP (gross domestic product). Performance is calculated by reinvesting the coupons paid by the debt securities making up the index.

Bloomberg Index Services Limited is listed in the register held by ESMA (European Securities and Markets Authority).

The benchmark is used to compare performance. The selection and weighting of assets in the sub-fund's portfolio may differ significantly from the composition of the benchmark.

The benchmark is not aligned with the promotion of the environmental and social characteristics of the sub-fund. Please refer to the "Investment Strategy" section in the prospectus for an explanation of how the sub-fund promotes environmental and social characteristics.

31.1.7 . Policy followed during the year

The first half of 2026 was characterised by a clear shift from a stable economy with inflation moving back to target towards a much more volatile and uncertain environment. Driven by the start of the war in the Middle-East, the environment is now dominated by geopolitical shocks and renewed inflation risks.

The first months of the year were supportive for government bonds through declining yields and tightening country spreads, but this trend reversed sharply from March onwards following the war in the Middle East. Energy prices became the central driver of markets, triggering a sharp reassessment of inflation expectations and forcing central banks to adopt a more cautious or hawkish stance. Early and more hawkish movers, were the RBA and Norges Bank, both of which raised rates quickly. In the case of the RBA, the policy rate was increased three times as inflation was already above target, and in light of this energy shock, they did not see a reason to wait any longer. For the Norges Bank, it was the first rate hike of the year and was primarily due to the central bank’s desire to contain inflation expectations and bring down core inflation, which continued to increase since last year. The ECB and the Fed also shifted to a more hawkish bias over this period. Their communication increasingly emphasized upside inflation risks, particularly from higher energy prices and geopolitical uncertainty, signaling reduced confidence that disinflation would continue smoothly. Consequently, the ECB decided to increase its policy rate in June, while the fed stayed on hold, but has moved towards a more hawkish bias.

From May onwards, market participants began to recognize a growing willingness on the part of the US to pursue some form of deal with Iran, which helped contain further deterioration in sentiment even as the broader geopolitical backdrop remained fragile. By June, the memorandum of understanding which the market interpreted as a final peace deal between mainly Iran and the US, contributed to a sharp decline in energy prices and supported a meaningful rally in government bonds. Yields declined across most maturities as markets repriced the inflation outlook from strongly deteriorating towards normalization.

In terms of positive performance drivers, the fund’s overweight position in European government bonds prior to the onset of the conflict contributed positively to performance. Following the start of the conflict, we acted promptly to reduce duration and shifted from an overweight to a modest underweight in Europe, which further supported returns. An overweight duration position in New Zealand and an underweight duration position in Japan were both positive contributors and have been relatively unchanged since the start of the year.

On the other hand, the fund’s overweight duration exposure to the UK detracted from performance over the period. Although the positioning initially outperformed, the sharp sell-off in UK rates led to a net negative impact, as losses more than offset earlier gains. The fund’s overweight to short-term French inflation-linked bonds tied to European inflation was also a detractor from performance. Additionally, exposure to Italian linkers in the belly and long end of the curve detracted from returns, as spreads widened mainly in these maturities.

31.1.8 . Future policy

Fixed income markets enter the second half of 2026 with a broadly supportive backdrop, but also clear risks. Growth remains resilient and credit fundamentals remain solid.

The key focus for markets will be on how the situation in the Middle East evolves and how this feeds through into energy prices and broader inflation dynamics. While recent developments have led to a rapid normalisation in oil prices, uncertainty remains elevated regarding the sustainability of this move, particularly given the fragility of supply conditions and the risk of renewed tensions. In this respect, several factors will be critical to monitor, including the pace at which oil flows through key chokepoints are genuinely recovering, whether the rebound in supply is driven by a durable restart in production or merely the release of existing inventories, and the relative contribution of key producers such as Iran versus the Gulf states. These elements will determine whether the recent decline in energy prices can be sustained.

In this context, the reaction of central banks will be crucial. Most central banks have already indicated they remain determined to bring inflation down. As such, the interplay between geopolitical developments, oil market normalisation, and monetary policy responses will be the main determinant of the trajectory of interest rates and, consequently, portfolio positioning going forward.

31.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

31.2 . BALANCE SHEET

31.4.2 . Asset Allocation (% of portfolio)

By Country	
United States of America	51.01%
France	11.17%
Germany	7.70%
United Kingdom	6.63%
Spain	4.30%
Mexico	4.23%
Canada	3.08%
Australia	2.94%
New Zealand	2.76%
Italy	2.31%
Poland	1.58%
Japan	1.34%
Thailand	0.59%
Sweden	0.36%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Countries And Central Governments	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
USD	51.01%
EUR	25.49%
GBP	6.63%
MXN	4.23%
CAD	3.08%
AUD	2.94%
NZD	2.76%
PLN	1.58%
JPY	1.34%
THB	0.59%
SEK	0.35%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

31.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	61,658,784.26
Sales	20,136,213.14
Total 1	**81,794,997.40**
Subscriptions	38,683,963.16
Redemptions	5,613,154.42
Total 2	**44,297,117.58**
Reference average of the total net asset	47,543,201.48
Rotation Percentage	**78.87%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

Increased turnover rate

The turnover has exceeded 50% due to the nature of the fund management (active management). We decided to increase the proportion of periphery and rotate Australia exposure into UK exposure. This has led to some turnover in the fund

31.4.4 . Liabilities relating to the positions on financial derivative instruments

Liabilities on futures

Description	Currency	In currency	in EUR	Lot-size	Date of transaction

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

31.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

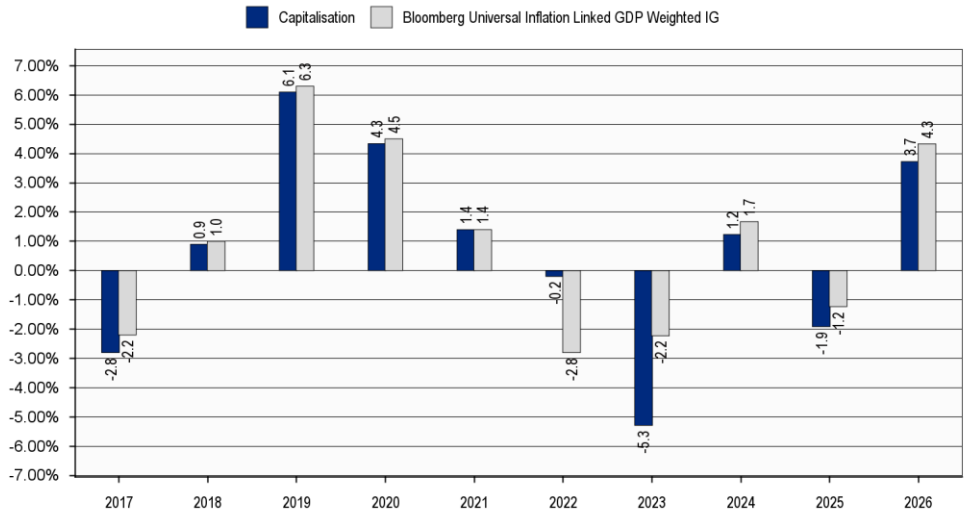

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is an actively managed fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. The benchmark is used for performance comparison purposes.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 14.23%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

32 . INFORMATION ON SUBFUND DPAM B BONDS EUR QUALITY SHORT TERM

32.1 . MANAGEMENT REPORT

32.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Bonds EUR Quality Short Term sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM HORIZON B Bonds EUR Quality Short Term sub-fund of the DPAM HORIZON B SICAV dated 1 April 2022

32.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

32.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors exposure to debt securities denominated in euros, whose issuers have (i) a minimum investment grade rating* and (iii) a residual term of no more than three years.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal guarantee has been given either to the sub-fund or to its investors.

* Investment Grade: is an interpretation of the rating of the bond issuer in terms of the financial risks. Rating agencies use their own scale to assess the notion of risk. "Investment grade" ratings are situated between AAA and BBB- according to the Standard & Poor's (S&P) scale and between Aaa and Baa3 according to the Moody's scale.

Investment policy

The sub-fund invests mainly, without sector or geographical restriction, in fixed or floating rate bonds and/or debt securities, or equivalents denominated in euros. The securities or, failing this, the issuers, must have a minimum rating of BBB-/Baa3 ('investment grade') on the scale used by S&P and Moody's rating agencies and the residual term of which does not exceed 3 years at the time of acquisition.

The sub-fund may also hold liquid assets on a secondary or temporary basis in the form of current accounts and deposits in a maximum of 25%.

The sub-fund may invest a maximum of 10% of its assets in open-ended undertakings for collective investment in order to indirectly achieve the above-mentioned target or place its liquidity.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of the Regulation SFDR 2019/2088.

32.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

32.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

32.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

32.1.7 . Policy followed during the year

As of the end of June 2026, the net asset value of DPAM B – Bonds EUR Quality Short Term (Class B) stood at EUR 111.99.

The fund seeks to deliver a stable and predictable income stream by investing in the European Investment Grade corporate bond market, with securities having a maximum maturity of three years.

The investment process is primarily driven by a bottom-up approach, supported by the extensive expertise of our credit research team. Credit selection is based on fundamental analysis and relative value assessment, with a strong focus on identifying issuers with solid credit profiles while avoiding credits that exhibit weak or deteriorating fundamentals.

The portfolio is broadly diversified across corporate issuers and invests predominantly in bonds rated between AAA and BBB-, aiming to combine capital preservation with attractive risk-adjusted returns.

32.1.8 . Future policy

We still advocate that corporate bonds with strong balance sheets can go through this period of turbulence. Selectivity and credit selection are key here since that the recovery is likely to be uneven across and within sectors. Our internal credit analysis is essential and will remain the cornerstone of the investment process so that the fund can best withstand episodes of strong volatility.

32.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 2

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

32.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	1,861,947.00
Sales	4,077,716.55
Total 1	**5,939,663.55**
Subscriptions	1,517,661.24
Redemptions	4,047,003.43
Total 2	**5,564,664.67**
Reference average of the total net asset	10,696,182.79
Rotation Percentage	**3.51%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at Banque Degroof Petercam S.A with its registered office at Rue de l'Industrie 44 - B-1040 Brussels which provides the financial services.

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

32.4.7 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2019	class A 0.90 EUR
	class M 1.06 EUR
2020	class A 0.80 EUR
	class M 0.15 EUR
2023	class A 0.81 EUR
	class M 0.81 EUR
2024	class A 1.88 EUR
	class M 1.88 EUR
2025	class A 1.74 EUR
	class M 1.75 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

33 . INFORMATION ON SUBFUND DPAM B DEFENSIVE STRATEGY

33.1 . MANAGEMENT REPORT

33.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Defensive Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Defensive Strategy sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

33.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

33.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities a medium-term capital gain by investing in debt securities of issuers from throughout the world.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal capital protection or guarantee is given to the investors of the sub-fund.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bond investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment and on an ancillary basis in other investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment).

The sub fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub fund aims to limit its investments (direct or indirect) in shares and other equity securities to approximately 30% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, as well as in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

33.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

33.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

33.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

33.1.7 . Policy followed during the year

The first half of 2026 was shaped by significant geopolitical and macroeconomic shifts, with portfolio performance demonstrating resilience and adaptability. Global equity markets began strongly, rising 1.6% in EUR terms, while Eurozone government and corporate bonds benefited from stable credit spreads. European banking and small-cap equities contributed positively, though US equity selection lagged due to a rotation away from technology. Defence stocks surged amid Greenland tensions, and emerging markets gained 7.46% from dollar devaluation. Portfolio adjustments included reducing US exposure and increasing gold allocations for diversification. February continued emerging market strength,

while US indices declined on technology weakness. Defensive sectors outperformed, and European equities benefited from robust macro trends and fiscal policy. Commodities rallied, notably Brent crude, gold, and silver. The fund gained from emerging markets but lagged in high yield. Risks centered on Middle East escalations, prompting increased gold exposure and a focus on cyclical European sectors.

March saw heightened volatility from Iran conflict escalation, with global equities down 6.3%. US equities were more resilient, and the dollar appreciated. Energy stocks rallied, while government bonds faced losses as yields rose. Inflation-linked bonds outperformed, and portfolio actions included reducing equity and high yield exposure, reallocating to inflation-linked bonds. April brought a strong recovery, with global equities up over 8%, led by technology and AI stocks. Emerging markets outperformed, and fixed income generated positive returns. Oil prices stayed elevated, sustaining inflationary pressures. The portfolio increased inflation-linked bonds and trimmed equities for stability.

May continued upward momentum, with emerging market equities up over 10% and US markets nearly 6%. Growth stocks, especially in AI and IT, outperformed. Fixed income benefited from positive carry, and European government bonds rose 1.2%. The portfolio increased European value equities and reduced US growth equities, selling short-dated German bonds. June saw easing geopolitical tensions and positive returns. European equities led, US quality stocks outperformed, and small caps gained. Yield curves flattened, oil prices receded, and credit spreads remained stable. The AI trade dominated, though volatility highlighted valuation risks. Central banks maintained a data-dependent stance.

33.1.8 . Future policy

Looking ahead to the second half of 2026, the fund maintains a cautiously optimistic stance. Equities remain an important return driver, driven by strong earnings momentum - particularly in technology and AI-related sectors - and the ongoing fear of missing out that continues to propel markets higher. Our current strategy involves opportunistically trimming equity positions after strong rallies, while maintaining exposure to sectors and themes with robust earnings prospects.

Government bonds are viewed as less attractive due to weak fiscal positions and declining growth prospects, while corporate bonds and inflation-linked securities are preferred for their relative robustness and yield potential. Flexibility and active management remain central, with the ability to adjust sector and regional exposures as macroeconomic and geopolitical conditions evolve. The focus will continue to be on balancing growth opportunities with prudent risk management, leveraging strong earnings trends while remaining vigilant to potential market headwinds and volatility.

33.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

33.4.2 . Asset Allocation (% of portfolio)

By Country	
Luxembourg	63.27%
Belgium	32.91%
Ireland	3.71%
France	0.11%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Investment funds	97.17%
Financial, Investment and Other Diversified Comp.	2.83%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	93.71%
USD	6.29%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

33.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	9,057,330.01
Sales	13,895,921.22
Total 1	**22,953,251.23**
Subscriptions	4,417,337.23
Redemptions	8,927,391.97
Total 2	**13,344,729.20**
Reference average of the total net asset	82,418,238.19
Rotation Percentage	**11.66%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

33.4.4 . Liabilities relating to the positions on financial derivative instruments

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

33.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

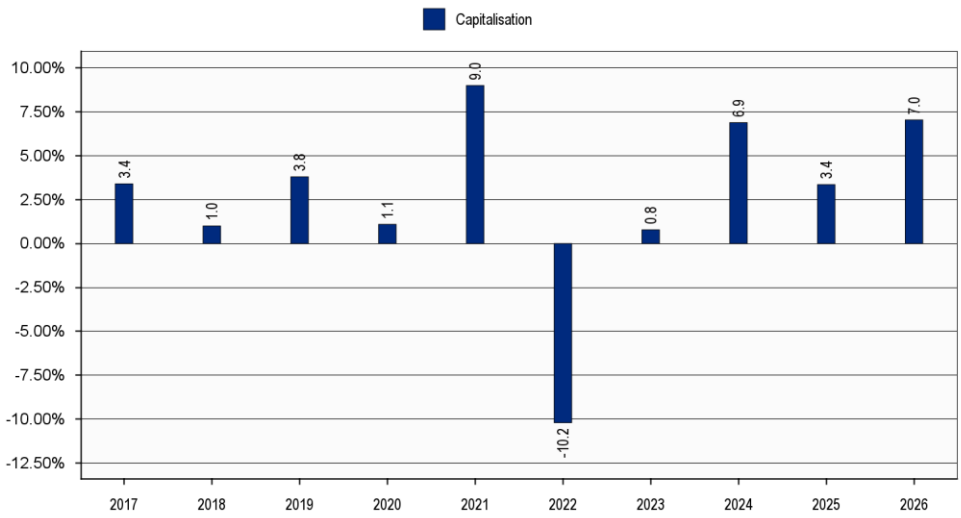

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
	Share	Share	Share	Share	Year	Value
Class B	7.04% (in EUR)	5.75% (in EUR)	1.37% (in EUR)	2.48% (in EUR)	02/11/2011	3.33% (in EUR)
Class F	7.52% (in EUR)	6.21% (in EUR)	1.79% (in EUR)		18/04/2018	2.86% (in EUR)
Class A	7.04% (in EUR)	5.75% (in EUR)	1.37% (in EUR)	2.48% (in EUR)	02/11/2011	3.32% (in EUR)

33.4.7 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6227491915	1.24%	0.01%
Class B (CAP) - BE6227492921	1.25%	0.01%
Class F (CAP) - BE6299350734	0.73%	0.01%
Class M (DIS) - BE6299351740	0.72%	0.01%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 18.87%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

33.4.8 . Notes to the financial statements and other information

Gross dividends paid in the financial year

class M 1.40 EUR
2025 classe A 3.62 EUR
classe M 3.69 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

34 . INFORMATION ON SUBFUND DPAM B BALANCED LOW STRATEGY

34.1 . MANAGEMENT REPORT

34.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.
On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Low Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.
Subscription price during this period: the initial subscription price corresponds to the Net Asset Value of the shares of the DPAM HORIZON B Balanced Low Strategy sub-fund of the DPAM HORIZON B SICAV dated 1 April 2022.

34.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

34.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities, a moderate medium-term and long-term capital gain by investing in equities and/or debt securities of issuers from throughout the world.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal capital protection or guarantee is given to the investors of the sub-fund.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bonds and equities investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment) and on an ancillary basis in other investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 50% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

34.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

34.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

34.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

34.1.7 . Policy followed during the year

The first half of 2026 was shaped by significant geopolitical and macroeconomic shifts, with portfolio performance demonstrating resilience and adaptability. Global equity markets began strongly, rising 1.6% in EUR terms, while Eurozone government and corporate bonds benefited from stable credit spreads. European banking and small-cap equities contributed positively, though US equity selection lagged due to a rotation away from technology. Defence stocks surged amid Greenland tensions, and emerging markets gained 7.46% from dollar devaluation. Portfolio adjustments included reducing US exposure and increasing gold allocations for diversification. February continued emerging market strength, while US indices declined on technology weakness. Defensive sectors outperformed, and European equities benefited from robust macro trends and fiscal policy. Commodities rallied, notably Brent crude, gold, and silver. The fund gained from emerging markets but lagged in high yield. Risks centered on Middle East escalations, prompting increased gold exposure and a focus on cyclical European sectors.

March saw heightened volatility from Iran conflict escalation, with global equities down 6.3%. US equities were more resilient, and the dollar appreciated. Energy stocks rallied, while government bonds faced losses as yields rose. Inflation-linked bonds outperformed, and portfolio actions included reducing equity and high yield exposure, reallocating to inflation-linked bonds. April brought a strong recovery, with global equities up over 8%, led by technology and AI stocks. Emerging markets outperformed, and fixed income generated positive returns. Oil prices stayed elevated, sustaining inflationary pressures. The portfolio increased inflation-linked bonds and trimmed equities for stability.

May continued upward momentum, with emerging market equities up over 10% and US markets nearly 6%. Growth stocks, especially in AI and IT, outperformed. Fixed income benefited from positive carry, and European government bonds rose 1.2%. The portfolio increased European value equities and reduced US growth equities, selling short-dated German bonds. June saw easing geopolitical tensions and positive returns. European equities led, US quality stocks outperformed, and small caps gained. Yield curves flattened, oil prices receded, and credit spreads remained stable. The AI trade dominated, though volatility highlighted valuation risks. Central banks maintained a data-dependent stance.

34.1.8 . Future policy

Looking ahead to the second half of 2026, the fund maintains a cautiously optimistic stance. Equities remain an important return driver, driven by strong earnings momentum - particularly in technology and AI-related sectors - and the ongoing fear of missing out that continues to propel markets higher. Our current strategy involves opportunistically trimming equity positions after strong rallies, while maintaining exposure to sectors and themes with robust earnings prospects.

Government bonds are viewed as less attractive due to weak fiscal positions and declining growth prospects, while corporate bonds and inflation-linked securities are preferred for their relative robustness and yield potential. Flexibility and active management remain central, with the ability to adjust sector and regional exposures as macroeconomic and geopolitical conditions evolve. The focus will continue to be on balancing growth opportunities with prudent risk management, leveraging strong earnings trends while remaining vigilant to potential market headwinds and volatility.

34.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

34.4.2 . Asset Allocation (% of portfolio)

By Country	
Luxembourg	61.74%
Belgium	33.11%
Ireland	3.61%
United States of America	1.40%
France	0.14%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Investment funds	96.34%
Financial, Investment And Other Diversified Comp.	2.26%
Countries And Central Governments	1.40%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	91.74%
USD	8.26%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

34.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	7,111,258.60
Sales	16,029,596.24
Total 1	**23,140,854.84**
Subscriptions	1,305,979.53
Redemptions	7,278,101.59
Total 2	**8,584,081.12**
Reference average of the total net asset	95,817,219.78
Rotation Percentage	**15.19%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

34.4.4 . Liabilities relating to the positions on financial derivative instruments

Liabilities on futures

Description	Currency	In currency	in EUR	Lot-size	Date of transaction

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

34.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

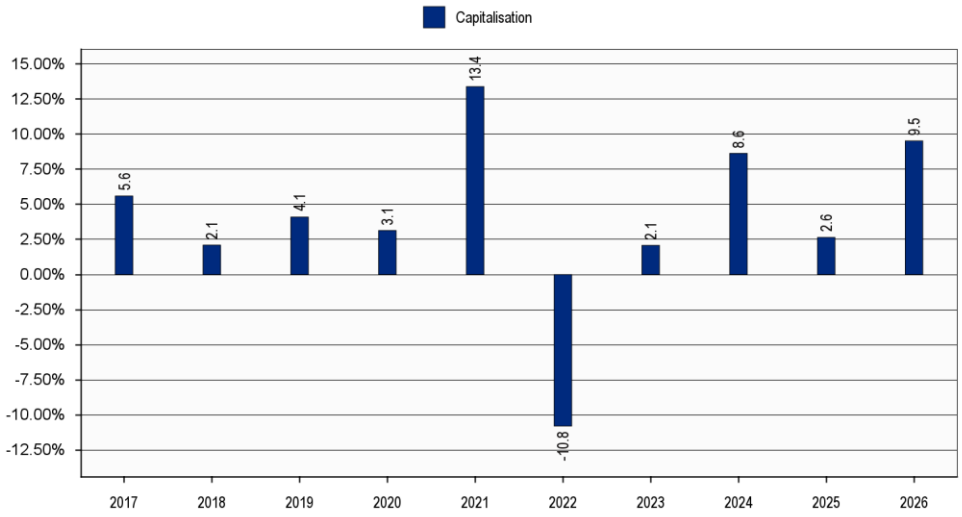

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns				Since

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 19.95%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

35 . INFORMATION ON SUBFUND DPAM B BALANCED STRATEGY

35.1 . MANAGEMENT REPORT

35.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Balanced Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Balanced Strategy sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

35.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

35.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities a moderate medium-term and long-term capital gain by investing in equities and/or debt securities of issuers from throughout the world.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

No formal capital protection or guarantee is given to the investors of the sub-fund.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bonds and equities investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment) and on an ancillary basis in other investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 65% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

35.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

35.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

35.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

35.1.7 . Policy followed during the year

The first half of 2026 was shaped by significant geopolitical and macroeconomic shifts, with portfolio performance demonstrating resilience and adaptability. Global equity markets began strongly, rising 1.6% in EUR terms, while Eurozone government and corporate bonds benefited from stable credit spreads. European banking and small-cap equities contributed positively, though US equity selection lagged due to a rotation away from technology. Defence stocks surged amid Greenland tensions, and emerging markets gained 7.46% from dollar devaluation. Portfolio adjustments included reducing US exposure and increasing gold allocations for diversification. February continued emerging market strength, while US indices declined on technology weakness. Defensive sectors outperformed, and European equities benefited from robust macro trends and fiscal policy. Commodities rallied, notably Brent crude, gold, and silver. The fund gained from emerging markets but lagged in high yield. Risks centered on Middle East escalations, prompting increased gold exposure and a focus on cyclical European sectors.

March saw heightened volatility from Iran conflict escalation, with global equities down 6.3%. US equities were more resilient, and the dollar appreciated. Energy stocks rallied, while government bonds faced losses as yields rose. Inflation-linked bonds outperformed, and portfolio actions included reducing equity and high yield exposure, reallocating to inflation-linked bonds. April brought a strong recovery, with global equities up over 8%, led by technology and AI stocks. Emerging markets outperformed, and fixed income generated positive returns. Oil prices stayed elevated, sustaining inflationary pressures. The portfolio increased inflation-linked bonds and trimmed equities for stability.

May continued upward momentum, with emerging market equities up over 10% and US markets nearly 6%. Growth stocks, especially in AI and IT, outperformed. Fixed income benefited from positive carry, and European government bonds rose 1.2%. The portfolio increased European value equities and reduced US growth equities, selling short-dated German bonds. June saw easing geopolitical tensions and positive returns. European equities led, US quality stocks outperformed, and small caps gained. Yield curves flattened, oil prices receded, and credit spreads remained stable. The AI trade dominated, though volatility highlighted valuation risks. Central banks maintained a data-dependent stance.

35.1.8 . Future policy

Looking ahead to the second half of 2026, the fund maintains a cautiously optimistic stance. Equities remain an important return driver, driven by strong earnings momentum - particularly in technology and AI-related sectors - and the ongoing fear of missing out that continues to propel markets higher. Our current strategy involves opportunistically trimming equity positions after strong rallies, while maintaining exposure to sectors and themes with robust earnings prospects.

Government bonds are viewed as less attractive due to weak fiscal positions and declining growth prospects, while corporate bonds and inflation-linked securities are preferred for their relative robustness and yield potential. Flexibility and active management remain central, with the ability to adjust sector and regional exposures as macroeconomic and geopolitical conditions evolve. The focus will continue to be on balancing growth opportunities with prudent risk management, leveraging strong earnings trends while remaining vigilant to potential market headwinds and volatility.

35.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

35.4.2 . Asset Allocation (% of portfolio)

By Country	
Luxembourg	59.35%
Belgium	36.14%
Ireland	4.18%
France	0.33%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Investment funds	97.53%
Financial, Investment and Other Diversified Comp.	2.47%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	90.17%
USD	9.83%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

35.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	97,659,077.55
Sales	185,375,169.42
Total 1	**283,034,246.97**
Subscriptions	8,045,763.99
Redemptions	75,719,045.48
Total 2	**83,764,809.47**
Reference average of the total net asset	888,389,819.08
Rotation Percentage	**22.43%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

35.4.4 . Liabilities relating to the positions on financial derivative instruments

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

35.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

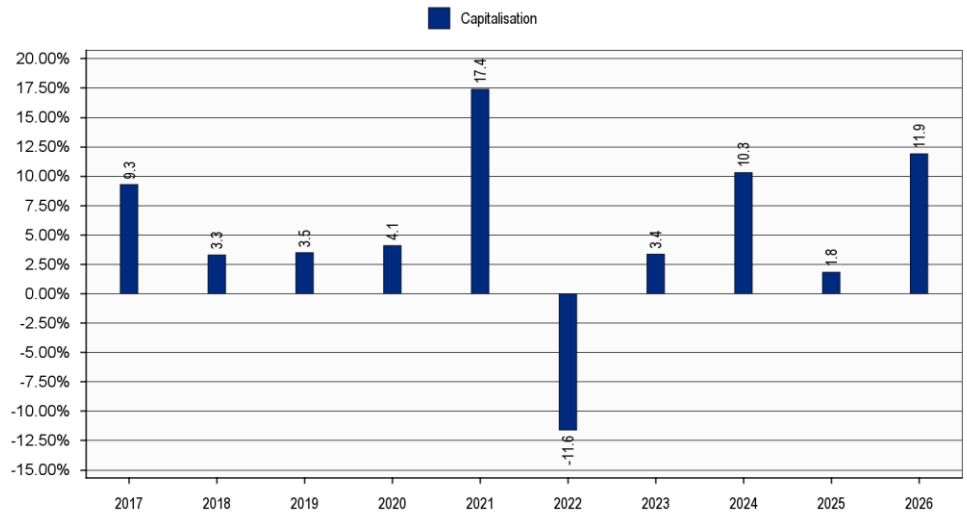

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class N (CAP) - BE6299374973	0.94%	0.05%
Class W (CAP) - BE6309882320	0.90%	0.05%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 20.38%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

35.4.8 . Notes to the financial statements and other information

class M 1.80 EUR

2025 classe A 2.44 EUR
classe M 2.52 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

36 . INFORMATION ON SUBFUND DPAM B ACTIVE STRATEGY

36.1 . MANAGEMENT REPORT

36.1.1 . Subfund launch date and subscription price of shares

Initial subscription period: 1 April 2022.

On 24 March 2022, the sub-fund received all the assets of the DPAM HORIZON B Active Strategy sub-fund of the DPAM HORIZON B SICAV. On 1 April 2022, the sub-fund was launched following the merger.

Subscription price during this period: the initial subscription price corresponds to the net asset value of the shares of the DPAM HORIZON B Active Strategy sub-fund of the DPAM HORIZON B SICAV on 1 April 2022.

36.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

36.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to offer investors, through investment respectively in undertakings for collective investment in debt securities, undertakings for collective investments in equity securities and/or debt securities, undertakings for collective investment in equity securities and/or debt or real estate securities a long-term capital gain by investing in equities and/or debt securities of issuers from throughout the world. No formal capital protection or guarantee is given to the investors of the sub-fund.

This is an actively managed sub-fund, which means that the portfolio manager does not aim to replicate the performance of a benchmark. No benchmark is used in the management of the sub-fund. Quantitative information from a broader market can be used for risk management and evaluation by the manager.

Investment policy

The sub-fund principally invests, without any sector or geographical restriction, in bond investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment) and on an ancillary basis in other investment funds (undertakings for collective investment in marketable securities and/or other undertakings for collective investment).

The sub-fund may also invest directly in shares, bonds or other debt securities up to a maximum of 20% of its net assets.

The sub-fund aims to limit its (direct and indirect) investments in shares and other equity securities to approx. 85% of its net assets. Under certain circumstances relating to market conditions or the efficiency of the investment strategy, the sub-fund may be justified in exceeding this threshold.

The sub-fund may hold liquid assets on a secondary or temporary basis in the form of current accounts or deposits, and in the form of undertakings for collective investment.

The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of SFDR Regulation 2019/2088.

36.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

36.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

36.1.6 . Index and benchmark

No benchmark is used in the management of the sub-fund.

36.1.7 . Policy followed during the year

The first half of 2026 was shaped by significant geopolitical and macroeconomic shifts, with portfolio performance demonstrating resilience and adaptability. Global equity markets began strongly, rising 1.6% in EUR terms, while Eurozone government and corporate bonds benefited from stable credit spreads. European banking and small-cap equities contributed positively, though US equity selection lagged due to a rotation away from technology. Defence stocks surged amid Greenland tensions, and emerging markets gained 7.46% from dollar devaluation. Portfolio adjustments included reducing US exposure and increasing gold allocations for diversification. February continued emerging market strength, while US indices declined on technology weakness. Defensive sectors outperformed, and European equities benefited from robust macro trends and fiscal policy. Commodities rallied, notably Brent crude, gold, and silver. The fund gained from emerging markets but lagged in high yield. Risks centered on Middle East escalations, prompting increased gold exposure and a focus on cyclical European sectors.

March saw heightened volatility from Iran conflict escalation, with global equities down 6.3%. US equities were more resilient, and the dollar appreciated. Energy stocks rallied, while government bonds faced losses as yields rose. Inflation-linked bonds outperformed, and portfolio actions included reducing equity and high yield exposure, reallocating to inflation-linked bonds. April brought a strong recovery, with global equities up over 8%, led by technology and AI stocks. Emerging markets outperformed, and fixed income generated positive returns. Oil prices stayed elevated, sustaining inflationary pressures. The portfolio increased inflation-linked bonds and trimmed equities for stability.

May continued upward momentum, with emerging market equities up over 10% and US markets nearly 6%. Growth stocks, especially in AI and IT, outperformed. Fixed income benefited from positive carry, and European government bonds rose 1.2%. The portfolio increased European value equities and reduced US growth equities, selling short-dated German bonds. June saw easing geopolitical tensions and positive returns. European equities led, US quality stocks outperformed, and small caps gained. Yield curves flattened, oil prices receded, and credit spreads remained stable. The AI trade dominated, though volatility highlighted valuation risks. Central banks maintained a data-dependent stance.

36.1.8 . Future policy

Looking ahead to the second half of 2026, the fund maintains a cautiously optimistic stance. Equities remain an important return driver, driven by strong earnings momentum - particularly in technology and AI-related sectors - and the ongoing fear of missing out that continues to propel markets higher. Our current strategy involves opportunistically trimming equity positions after strong rallies, while maintaining exposure to sectors and themes with robust earnings prospects.

Government bonds are viewed as less attractive due to weak fiscal positions and declining growth prospects, while corporate bonds and inflation-linked securities are preferred for their relative robustness and yield potential. Flexibility and active management remain central, with the ability to adjust sector and regional exposures as macroeconomic and geopolitical conditions evolve. The focus will continue to be on balancing growth opportunities with prudent risk management, leveraging strong earnings trends while remaining vigilant to potential market headwinds and volatility.

36.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 3

36.4.2 . Asset Allocation (% of portfolio)

By Country	
Luxembourg	53.10%
Belgium	42.17%
Ireland	4.37%
France	0.36%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Investment funds	97.41%
Financial, Investment And Other Diversified Comp.	2.59%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
EUR	88.62%
USD	11.38%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

36.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	31,896,666.03
Sales	45,865,968.83
Total 1	**77,762,634.86**
Subscriptions	9,117,685.23
Redemptions	13,532,061.41
Total 2	**22,649,746.64**
Reference average of the total net asset	279,033,275.02
Rotation Percentage	**19.75%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

36.4.4 . Liabilities relating to the positions on financial derivative instruments

Liabilities on futures

Description	Currency	In currency	in EUR	Lot-size	Date of transaction

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

36.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

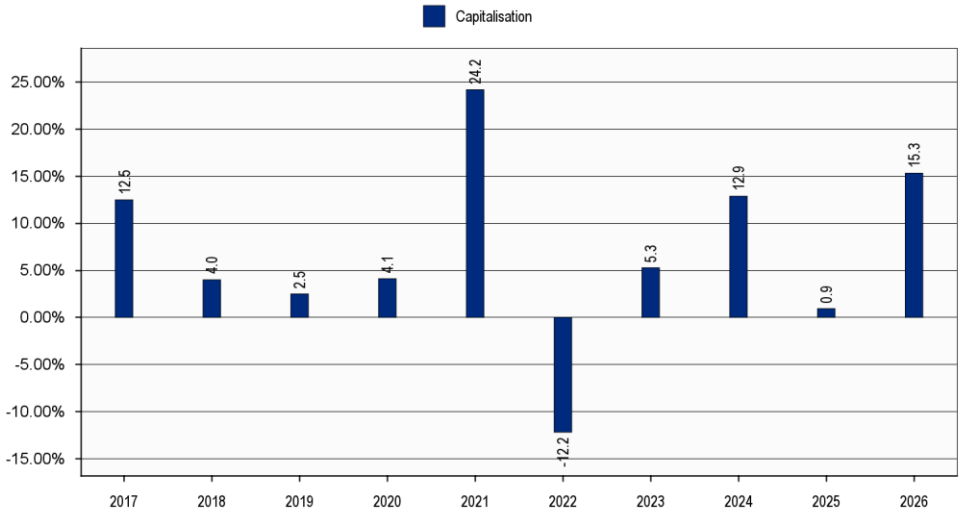

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

No benchmark is used in the management of the sub-fund.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns				Since	
	1 year	3 year	5 year	10 year		
	Share	Share	Share	Share	Year	Value
Class B	15.33% (in EUR)	9.53% (in EUR)	3.97% (in EUR)	6.54% (in EUR)	02/11/2011	6.95% (in EUR)
Class F	16.13% (in EUR)	10.24% (in EUR)	4.63% (in EUR)		28/12/2017	6.40% (in EUR)

36.4.7 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class A (DIS) - BE6227495957	1.73%	0.10%
Class B (CAP) - BE6227496963	1.73%	0.10%
Class F (CAP) - BE6299358810	0.98%	0.10%
Class M (DIS) - BE6299361848	1.08%	0.10%
Class N (CAP) - BE6299365880	0.99%	0.10%
Class W (CAP) - BE6309878286	0.96%	0.10%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 44.02%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

36.4.8 . Notes to the financial statements and other information

Gross dividends paid in the financial year

2019 class A 0.94 EUR
class M 1.91 EUR
2020 class A 0.73 EUR
class M 0.73 EUR
2021 class A 1.77 EUR
class M 1.79 EUR
2022 class A 2.5 EUR
class M 2.54 EUR
2023 class A 2.25 EUR
class M 2.25 EUR
2024 class A 2.10 EUR
class M 2.15 EUR
2025 class A 2.12 EUR
class M 2.19 EUR

Valuation of financial instruments

Bonds and other debt securities as well as money market instruments in the portfolio were valued at their average price. The valuations have not been adjusted to approximate bid prices, as the difference between bid and ask prices changed significantly over the period, both over time and depending on the nature of the security.

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.

37 . INFORMATION ON SUBFUND DPAM B EQUITIES JAPAN SELECTION MSCI INDEX

37.1 . MANAGEMENT REPORT

37.1.1 . Subfund launch date and subscription price of shares

Initial subscription period : 21 August 2023.
Subscription price during this period: EUR 100.

37.1.2 . Stock exchange listing

The sub-fund's shares are not listed on the stock market.

37.1.3 . Objective and main aspects of the investment policy

Objective

The objective of the sub-fund is to provide shareholders with as high a global return as possible, with an accent on investments in Japanese equities.

The Sub-fund is a tracker fund whose objective is to replicate physically and not synthetically the “Net Dividends Reinvested” performance of the cap-weighted MSCI Japan Selection Index in Euros.

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

* A cap-weighted index is a type of stock market index that is constructed based on the market capitalization of each of the securities that make up the index.

Investment policy
The sub-fund promotes environmental and social characteristics within the meaning of Article 8 of Regulation SFDR 2019/2088.

37.1.4 . Financial management of the portfolio

See 1. General information about the investment company, 1.1. Organization of the investment company

37.1.5 . Distributors

See 1. General information about the investment company, 1.1. Organization of the investment company

37.1.6 . Index and benchmark

Indice MSCI Japan Selection Net Total Return (anciennement MSCI Japan ESG Leaders Net Total Return). Ce benchmark est utilisé dans le cadre de la gestion du compartiment.

De plus amples informations à propos de l'Indice, de sa composition, de son calcul et des règles régissant son examen périodique et son rééquilibrage, ainsi que sur la méthodologie générale des indices MSCI, sont disponibles sur le site www.msci.com.

La performance de l’indice de référence est calculée en réinvestissant les dividendes nets (Net Return).

MSCI Inc est inscrit au registre tenu par l’ESMA (European Securities and Markets Authority).

Le tracking error (erreur de suivi) par rapport au benchmark de référence est de l’ordre de 1,50%.

37.1.7 . Policy followed during the year

The benchmark of the DPAM B Equities Japan Selection MSCI Index sub-fund is the MSCI Japan Selection Net EUR Index. The benchmark covers Japan and is established by MSCI.

As of the end of the semester, the index had 91 positions. The index value can be viewed on MSCI's website, www.msci.com/end-of-day-data-search. The composition of its indices can be viewed on the MSCI's website, www.msci.com/constituents.

The objective of the fund is to physically and fully replicate the composition of the underlying. The use of futures on the Nikkei 225 index supplemented positions in equities and allowed to be fully invested through a liquid instrument without disrupting the portfolio structure during daily subscriptions and redemptions. The Nikkei 225 Index correlates well with the MSCI Japan Selection Net EUR Index. The results obtained on these futures are therefore close to those which would have been obtained directly in securities.

During the semester, the sub-fund closely followed the movement of the index.

37.1.8 . Future policy

The DPAM B Equities Japan Selection MSCI Index sub-fund, whose vocation is to be representative of the Japanese market, will continue its investment policy based on broad sector diversification with the MSCI Japan Selection Net EUR Index published by MSCI as a benchmark.

37.1.9 . Synthetic risk indicator

The summary risk indicator give an indication of the risk associated with investing in a sub-fund. It places this risk on a scale ranging from one (lowest risk) to seven (highest risk).

Risk and reward profile : 4

37.4.2 . Asset Allocation (% of portfolio)

By Country	
Japan	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By sector	
Electronics and semiconductors	31.48%
Financial, Investment and Other Diversified Comp.	17.50%
Internet and Internet services	5.49%
Retail trade and department stores	5.22%
Machine and apparatus construction	4.36%
Chemicals	4.05%
Various commercial companies	3.67%
Graphic art and publishing	3.58%
Communications	3.00%
Pharmaceuticals and cosmetics	2.83%
Office supplies and computing	2.28%
Real Estate companies	2.06%
Transportation	1.83%
Building materials and trade	1.66%
Electrical engineering and electronics	1.50%
Insurance Companies	1.35%
Foods and non-alcoholic drinks	1.27%
Non-ferrous metals	0.91%
Banks And Other Credit Institutions	0.82%
Tires and rubber	0.81%
Utilities	0.78%
Road vehicles	0.75%
Textiles and garments	0.66%
Hotels and restaurants	0.57%
Coal mining and steel industry	0.57%
Miscellaneous services	0.55%
Miscellaneous consumer goods	0.45%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

By currency	
JPY	100.00%
TOTAL	**100.00%**

These allocations of assets were established on basis of data (gross) used by the entity responsible for the administration and bookkeeping and do not reflect inevitably the economic analysis which directed the assets selection.

37.4.3 . Change in composition of the assets (in EUR)

Turnover

	1st semester
Purchases	28,427,798.65
Sales	37,077,200.41
Total 1	**65,504,999.06**
Subscriptions	12,730,252.98
Redemptions	21,397,621.43
Total 2	**34,127,874.41**
Reference average of the total net asset	115,191,401.21
Rotation Percentage	**27.24%**

The rotation rate gives the annual average of the transactions. A figure close to 0% shows that the transactions relating to the securities or the assets with the exception of deposits and liquid assets during a given period, were done exclusively in function of the subscriptions and redemptions. A negative percentage indicates that the subscriptions and redemptions give rise to only few or, as the case may be, no transactions in the portfolio.

A detailed list of the transactions carried out during the financial year can be consulted, free of charge, at CA Indosuez Funds Solutions S.A. with its registered office at Rue Eugène Ruppert - L-2453 Luxembourg which provides the financial services.

37.4.4 . Liabilities relating to the positions on financial derivative instruments

Liabilities on futures

As of the date of publication of this report, the net asset value per share is published on the following websites: https://www.funds.dpaminvestments.com/funds.html and http://www.beama.be. This information is also available at the counters of the financial department.

37.4.6 . Performance

Figures reflect past performance and are not an indicator of future performance. These figures do not include any restructuring.

Yields are determinated at the end of the financial year.

By annual yield, it means the absolute yield obtained over a year. For the semi-annual report, the financial year covers the 12-month period preceding the end of the semester.

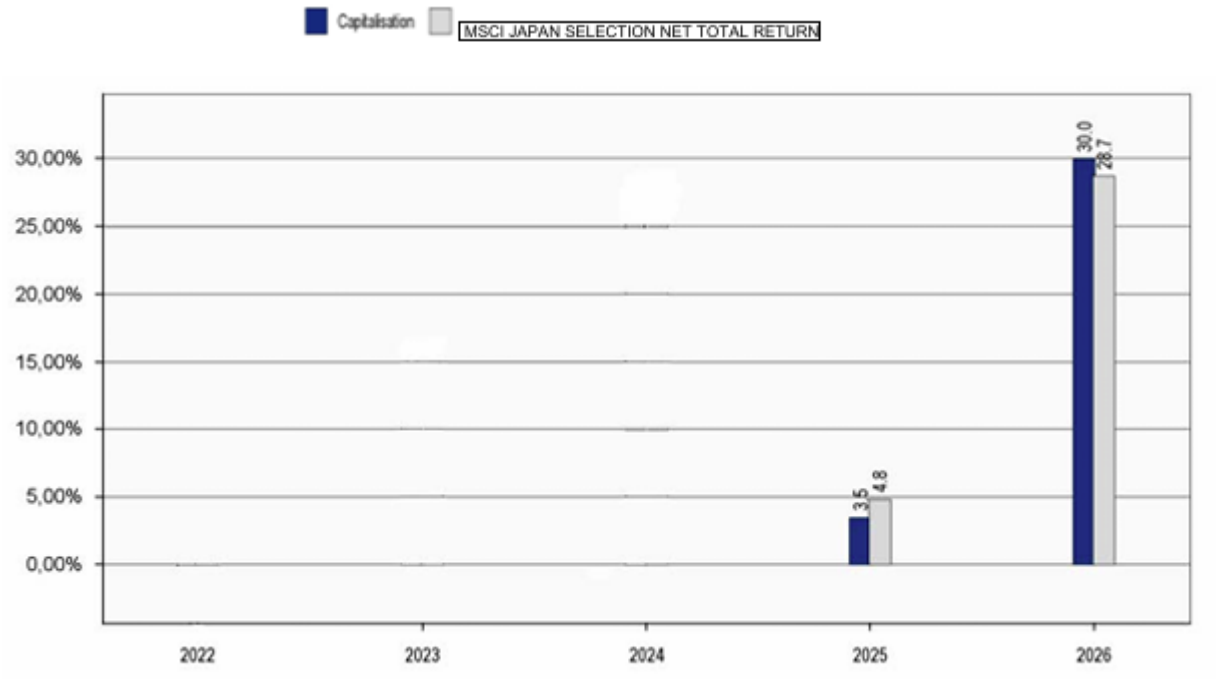

The performance of accumulation units is calculated in a similar way to distribution units. Only the performance (in the form of bar charts) of class B shares is shown in this report. The performance of other share classes may differ, in particular as a result of charges specific to each class (management fees, currency hedging fees, subscription taxes, etc.). Information on the past performance of all share classes is published on the https://www.funds.dpaminvestments.com/funds.html website. ("Overview" tab).

This is a passively managed sub-fund, which means that the portfolio manager aims to replicate the performance of a benchmark.

Bar chart showing annual returns of the last 10 years (in % and calculated in EUR) as of 30 June 2026:

Class B

Annual return

* Table of historical benchmark performance (actuarial returns)

	Average cumulated returns		Since	
	1 year			
	Share	Benchmark	Year	Value
Class B	29.98% (in EUR)	28.70% (in EUR)	20/03/2024	13.24% (in EUR)
Class F	30.86% (in EUR)	28.70% (in EUR)	21/08/2023	17.92% (in EUR)
Class J	31.07% (in EUR)	28.70% (in EUR)	21/08/2023	18.12% (in EUR)
Class N	30.86% (in EUR)	28.70% (in EUR)	21/08/2023	17.94% (in EUR)
Class P	31.24% (in EUR)	28.70% (in EUR)	11/03/2024	15.53% (in EUR)

37.4.7 . Charges

Recurring costs

Isin Code	Management fees and other administrative and operating expenses *	Transaction costs **
Class B (CAP) - BE6344900335	0.83%	0.07%
Class F (CAP) - BE6344905383	0.43%	0.07%
Class J (CAP) - BE6344907405	0.27%	0.07%
Class N (CAP) - BE6344909427	0.43%	0.07%
Class P (CAP) - BE6344910433	0.13%	0.07%

* These are the costs of managing the sub-fund's portfolio, including the costs of the subfund's service provider and operations. This estimate is based on actual costs over the past year.

** These are the costs of buying and selling investments held by the sub-fund. They are an estimate of the costs incurred when buying and/or selling the investments underlying the product. The actual amount varies according to the quantity bought and sold.

Fee sharing

As at 30 June 2026, 8.26%* of the remuneration due to the Fund Manager was retroceded to some other distributors, third parties and the Banque Degroof Petercam or one of its subsidiaries. The third parties are either end clients with a retrocession agreement, or institutional clients under discretionary management with a management agreement. Bank Degroof Petercam or one of its subsidiaries are distributors in the same way as external distributors.

* The percentage reported in the half-year report as of 30.06.26 is the one published in the annual report as of 31.12.25, due to a lack of sufficiently available data at the date of this report.

37.4.8 . Notes to the financial statements and other information

Transparency of the securities financing transactions and of reuse

In accordance with Article 13 and Section A of the Annex to Regulation EU 2015/2365, the Sicav must inform investors of its use of securities financing transactions and total return swaps in the annual report and the half-yearly report.
