UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Activity report

April 2024

"Monetary policy: The ECB left its intervention rates unchanged. The deposit facility, refinancing and marginal rates therefore remained at respectively 4%, 4.50% and 4.75%. The central bank considers that the present level of interest rates contributes strongly to disinflation and that inflation continues to slow thanks to the fall in the price of foods and goods. Christine Lagarde hinted that an interest-rate cut was possible in June while saying that the ECB would have new macroeconomic projections by then. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of six days at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period. At the short end of the curve, they stood at respectively ?STR +6bp to ?STR +28bp on maturities of three months to one year. Note that in the country allocation, puttables appear based on final maturities, not the redemption-at-par option attached to this type of product. At month-end, the bond weighting was about 11% of fund assets. BBB rated issuers represented about 13% of the portfolio at month-end.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 141 days. Its average long-term rating remains good at A+. The portfolio is rated 'Af/S1,' reflecting the fund's high credit quality and very low volatility.- SRI profile: The portfolio had an average SRI rating of C at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers (D)."

May 2024

"Monetary Policy: The interest rates for the main refinancing operations as well as those for the marginal lending facility and the deposit facility remain unchanged at 4.50%, 4.75%, and 4.00% respectively. The latest Eurozone inflation figures published by Eurostat at the end of the month show an increase for May, at 2.6% against an expectation of 2.5%. Following this publication, markets have reduced their expectations of rate cuts by the ECB. While the expected decrease in June remains highly anticipated, the Central Bank's next actions will depend on the data. The next meeting of the Governing Council will take place on June 6. Management Policy: - Liquidity: Instant liquidity was primarily ensured through overnight operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio stands at 5 days at the end of the period.- Credit Risk: Short-term spreads tightened at the end of the period, they stand for maturities of 3 months to 1 year at respective levels of ?str + 5 to ?str + 25 bps. It should be noted that the country allocations show the puttable securities based on final maturities and not on the option of repayment at par attached to this type of product. The weighting in bonds stands at about 12% of the fund's assets at the end of the month. The share of BBB-rated issuers represents about 14% of the portfolio at the end of the month. - Average Life and Average Rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 138 days. The portfolio maintains an average long-term rating at a good level of A+. The portfolio benefits from the 'Af/S1' rating which attests to the high credit quality of the fund and its very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe minus the 20% of issuers rated D."

June 2024

"Monetary Policy: The European Central Bank lowered its intervention rates by 25 basis points on June 6 (effective June 12), bringing the refi rate to 4.25%, with the deposit facility rate and the marginal rate set at 3.75% and 4.50% respectively. Consequently, the level of the Estr settled around 3.65% compared to 3.90% during the month of May. During the meeting, Christine Lagarde reaffirmed that inflation remains the ECB's primary objective. Inflation projections have been updated, averaging 2.5% in 2024 and 2.2% in 2025. Inflation is not expected to fall below 2% before 2026. The next actions of the Central Bank will remain dependent on the data. The next meeting of the Governing Council will take place on July 18. Management Policy: - Liquidity: Instant liquidity was primarily provided by day-to-day operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio is established at 5 days at the end of the period.- Credit Risk: Short-term spreads remained stable at the end of the period, except for the 3-month which appreciated, they are at levels of €str + 9 to €str + 28 bps for maturities from 3 months to 1 year. It should be noted that country allocations show puttable securities based on final maturities and not on the par repayment option attached to this type of product. The weighting in bond securities at the end of the month amounts to about 13% of the fund's assets. The share of BBB-rated issuers represents about 15% of the portfolio at the end of the month. - Average Life and Average Rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 131 days. The average long-term rating of the portfolio remains at a good level of A+. The portfolio benefits

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

from the 'Af/S1' rating which attests to the high credit quality of the fund and its very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe minus the 20% of the least well-rated issuers D."

July 2024

"Monetary policy: The interest rate on the main refinancing operations and the interest rates on the marginal lending facility and the deposit facility remain unchanged at respectively 4.25%, 4.50% and 3.75%. For its part, the €STR stands at around 3.66%. At its meeting on July 18, the ECB left its monetary policy unchanged. Eurozone inflation stood at 2.5% year-on-year in June, after 2.6% in May, according to final figures published by Eurostat. The ECB pointed out that domestic price pressures remain strong, service prices are rising at a high pace and headline inflation is likely to remain above target well into next year. That said, Christine Lagarde stated that the Governing Council is not pre-committing to a particular rate path. The ECB will continue to follow a data-dependent, meeting-by-meeting approach to determining the appropriate level and duration of restrictions. The central bank wants to keep all options open, so the market will be paying particular attention to the next meeting of the Board of Governors on September 12. Investment policy: - Liquidity: Instantaneous liquidity was essentially provided by overnight transactions.- Interest rate risk: The portfolio's weighted average maturity (WAM) was of five days at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period, with the exception of the 3-month, which widened. For maturities from 3 months to 1 year, they stood at respectively ?STR +10bp to ?STR +28bp. Note that in the country allocation, puttables appear based on final maturities, not the redemption-at-par option attached to this type of product. At month-end, the bond weighting was about 13% of fund assets. BBB-rated issuers represented about 15% of the portfolio at month-end.- Average life and average rating: The weighted average life (WAL) of this money-market portfolio is 134 days. Its average long-term rating remains good at A+. The portfolio is rated 'Af/S1,' reflecting the fund's high credit quality and very low volatility.- SRI profile: The portfolio had an average SRI rating of C at month-end, which is better than that of its investment universe adjusted for 20% of the worst-rated issuers (D)."

August 2024

"Monetary Policy: The interest rates for the main refinancing operations as well as those for the marginal lending facility and the deposit facility remain unchanged at respectively 4.25%, 4.50%, and 3.75%. The €str has also remained stable during the review period around 3.66%. The ECB is preparing to further reduce its interest rates at its next meeting on September 12, encouraged by the confirmation of the slowdown in inflation in the Eurozone. A 25 basis point rate cut is already fully priced into the short-term rate levels recorded at the end of August. Portfolio Management Policy: - Liquidity: Instant liquidity was primarily provided through overnight operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio stands at 4 days at the end of the period.- Credit Risk: Short-term spreads remained stable at the end of the period, coming out at levels of €str + 10 to ?str + 28 bps for maturities of 3 months to 1 year. It should be noted that the country allocations show puttable securities based on final maturities and not on the par repayment option attached to this type of product. The weighting in bonds amounts to about 14% of the fund's assets at the end of the month. The share of issuers rated BBB represents about 14% of the portfolio at the end of the month.- Weighted Average Life and Average Rating: The weighted average life (WAL) of this portfolio belonging to the money market category is 125 days. The portfolio maintains an average long-term rating at a good level of A+. The portfolio benefits from the 'Af/S1' rating which attests to the high credit quality of the fund and its very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe minus the 20% of issuers with the lowest D rating."

September 2024

"Monetary Policy: The European Central Bank lowered its key interest rates on September 12 (effective September 18), bringing the refi rate to 3.65%, with the deposit facility rate and the marginal rate standing at 3.50% and 3.90%, respectively. As announced on March 13, the spread between the main refinancing operations rate and the deposit rate has been reduced from 50 to 15 basis points. The level of the ?str has settled around 3.41% compared to 3.66% over the course of the month. During its meeting, the ECB confirmed that the decision on the extent of the deposit rate cut was unanimous. The main concern remains domestic inflation and wage developments. The ECB will continue to follow a data-dependent approach, wishing to keep all options available. Therefore, the market will pay particular attention to the next Governing Council meeting scheduled for October 17. Asset Management Policy: - Liquidity: Instant liquidity was primarily ensured through overnight operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio stands at 5

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

days at the end of the period.- Credit Risk: Short-term spreads remained stable at the end of the period, with levels on maturities of 3 months to 1 year at respective levels of $\text{?str} + 10$ to $\text{?str} + 28$ bps. It should be noted that the country allocations show puttable securities based on final maturities and not on the par repayment option attached to this type of product. The weighting in bonds stands at about 14% of the fund's assets at the end of the month. The share of BBB-rated issuers represents about 14% of the portfolio at the end of the month.- Average Life and Average Rating: The weighted average life (WAL) of this portfolio belonging to the 'monetary' category is 121 days. The portfolio's average long-term rating remains at a good level of A+. The portfolio benefits from the 'Af/S1' rating, which attests to the fund's high credit quality and very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe minus the 20% of issuers with the lowest D rating."

October 2024

"Monetary Policy: The ECB, as expected, has lowered its interest rates by 25 bp, marking its third cut this year following those in June and September. This decision comes in a context of weak economic growth across the eurozone and a slowdown in inflation. According to Madame Lagarde, "The disinflation process is well underway, fueled by a sluggish economy." Thus, the rates for the deposit facility, main refinancing operations, and marginal lending facility have been reduced to 3.25%, 3.40%, and 3.65% respectively as of October 23, 2024. Management Policy: - Liquidity: Instant liquidity was primarily ensured through overnight operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio stands at 5 days at the end of the period.- Credit Risk: Short-term spreads remained stable at the end of the period, with levels for maturities of 3 months to 1 year at respective levels of $\text{?str} + 10$ to $\text{?str} + 26$ bps. It should be noted that the country allocations show puttable securities based on final maturities and not on the option of repayment at par attached to this type of product. The weighting in bond securities amounts to about 14% of the fund's assets at the end of the month. The share of issuers rated BBB represents about 15% of the portfolio at the end of the month. - Average Life and Average Rating: The weighted average life (WAL) of this portfolio, belonging to the 'monetary' category, is 125 days. The portfolio's average long-term rating remains at a good level of A+. The portfolio benefits from the 'Af/S1' rating, which attests to the fund's high credit quality and very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe minus the 20% of issuers with the lowest rating of D."

November 2024

"Monetary Policy: The ECB has left its intervention rates unchanged during the month of November. Thus, the deposit facility rate, refinancing rate, and marginal lending rate have been maintained at 3.25%, 3.40%, and 3.65% respectively. The ECB is navigating between global uncertainties and risks, and financial markets seem convinced of a further reduction in key interest rates at the next monetary policy meeting scheduled for December 12. Management Policy: - Liquidity: Instant liquidity was primarily provided by overnight operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio stands at 3 days at the end of the period.- Credit Risk: Short-term spreads remained stable at the end of the period, showing levels from 3 months to 1 year at respective levels of $\text{?str} + 11$ to $\text{?str} + 28$ bps. It should be noted that country allocations show puttable securities based on final maturities and not on the par repayment option attached to this type of product. The weighting in bond securities at the end of the month amounts to about 13% of the fund's assets. The share of BBB-rated issuers represents about 15% of the portfolio at the end of the month. - Average Duration and Average Rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 126 days. The average long-term rating of the portfolio remains at a good level of A+. The portfolio benefits from the 'Af/S1' rating which attests to the high credit quality of the fund and its very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe minus the 20% of the least well-rated issuers D."

December 2024

"Monetary Policy: The Governing Council of the European Central Bank has lowered the three key interest rates by 25 basis points. This is the fourth rate cut since June 2024. This decision is based on the updated assessment of inflation prospects, the dynamics of underlying inflation, and the strength of the transmission of monetary policy. The interest rates for the deposit facility, the main refinancing operations, and the marginal lending facility have been reduced to 3.00%, 3.15%, and 3.40% respectively. Asset Management Policy: - Liquidity: Instant liquidity was essentially provided by overnight operations.- Interest Rate Risk: The weighted average maturity (WAM) of the portfolio stands at 4 days at the end of the period.- Credit Risk: Short-term spreads remained stable at the end of the period, with levels for maturities of 3 months to 1 year at respective

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

levels of €str + 12 to €str + 29 bps. It should be noted that the country allocations show puttable securities based on final maturities and not on the option of repayment at par attached to this type of product. The weighting in bonds stands at about 13% of the fund's assets at the end of the month. The share of BBB-rated issuers represents about 15% of the portfolio at the end of the month. - Average Life and Average Rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 110 days. The portfolio maintains an average long-term rating at a good level of A+. The portfolio benefits from the 'Af/S1' rating, which attests to the high credit quality of the fund and its very low volatility.- Socially Responsible Dimension: The portfolio has an average SRI rating of C (1.129) at the end of the month, which is a higher level than that of its investment universe minus the 20% least well-rated issuers (0.452)."

January 2025

"Monetary policy: The ECB has lowered its interest rates by 25 basis points, marking its fifth cut since June and the fourth in a row. This decision comes during a period of low economic growth across the eurozone and a slowdown in inflation (2.4% in December).The deposit facility, refinancing, and marginal lending rates are reduced to 2.75%, 2.90%, and 3.15%, respectively. Management policy: - Liquidity: Instant liquidity has been primarily ensured through overnight operations.- Interest rate risk: The weighted average maturity (WAM) of the portfolio stands at 3 days at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period, showing levels of €str + 12 to €str + 30 bps for maturities of 3 months to 1 year. It is worth noting that the country distributions reveal puttable securities based on final maturities and not on the par redemption option attached to this type of product. The weighting in bond securities stands at about 12% of the fund's assets at the end of the month. The share of issuers rated BBB represents about 16% of the portfolio at the end of the month. - Average life and average rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 109 days. The average long-term rating of the portfolio remains at a good level of A+. The portfolio benefits from the rating 'Af/S1', which attests to the high credit quality of the fund and its very low volatility.- Socially responsible dimension: The portfolio has an average SRI rating of C at the end of the month, which is a level higher than that of its investment universe, excluding 25% of the lowest-rated issuers C."

February 2025

"Monetary policy: The European Central Bank kept its intervention rates unchanged in February. The deposit facility, refinancing, and marginal lending rates remained stable at 2.75%, 2.90%, and 3.15%, respectively. Wage growth in the eurozone eased at the end of 2024, reinforcing the likelihood of the ECB continuing to lower its rates. Market expectations fully incorporate a new decrease of 25 basis points for next month. Management policy: - Liquidity: Instant liquidity has been primarily ensured through overnight operations. - Interest rate risk: The weighted average maturity (WAM) of the portfolio stands at 2 days at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period, showing levels of €str + 14 to €str + 30 bps for maturities of 3 months to 1 year. It should be noted that the country distributions reveal puttable securities based on final maturities and not on the par redemption option attached to this type of product. The weighting in bond securities at the end of the month is approximately 12% of the fund's assets. The share of issuers rated BBB represents about 17% of the portfolio at the end of the month.- Average life and average rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 109 days. The average long-term rating of the portfolio remains at a good level of A+. The portfolio benefits from the rating 'Af/S1', which attests to the high credit quality of the fund and its very low volatility.- Socially responsible dimension: The portfolio has an average SRI score of C (1.150) at the end of the month, which is a level higher than that of its investment universe reduced by 25% of the lowest-rated issuers C (0.950)."

March 2025

"Monetary policy: The European Central Bank lowered its intervention rates on March 6 (effective March 12), bringing the refi rate to 2.65%, with the deposit facility rate and the marginal rate set at 2.50% and 2.90%, respectively. The level of the €str was around 2.41% during the month. As expected, the ECB softened the tone of its discourse on the restriction of monetary policy but maintained it. The ECB did not commit to the trajectory of its policy and will continue to follow a data-dependent and meeting-based approach to maintain flexibility and optionality in calibrating the policy. The next monetary policy meeting will be held on April 17, 2025.Management policy: - Liquidity: Instant liquidity has been primarily ensured through overnight operations.- Interest rate risk: The weighted average maturity (WAM) of the portfolio stands at 2 days at the end of the period.- Credit risk: Short-term spreads remained stable at the end of the period, showing levels of €str + 12 to €str + 30 bps for maturities of 3 months to 1 year. It should be noted that the country distributions show puttable securities based on final maturities and not on the option of repayment at par attached to this

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

type of product. The weighting in bond securities stands at about 12% of the fund's assets at the end of the month. The share of issuers rated BBB represents about 18% of the portfolio at the end of the month.- Average life and average rating: The weighted average life (WAL) of this portfolio belonging to the monetary category is 118 days. The average long-term rating of the portfolio remains at a good level of A+. The portfolio benefits from the rating 'A+/S1', which attests to the high credit quality of the fund and its very low volatility.- Socially responsible dimension: The portfolio has an average SRI score of C (1.096) at the end of the month, which is a level higher than that of its investment universe reduced by 25% of the lowest-rated issuers C (0.921)."

e) Type and quality (collateral)

Amundi Asset Management undertakes to accept only securities of a high credit quality and to increase the value of its collateral by applying valuation discounts to securities loaned to it. This process is regularly reviewed and updated.

i) Data on reuse of collateral

« The regulations governing UCIT forbid the reuse of collateral securities. Cash collateral received is:

- o reinvested in short-term money market funds (as defined by ESMA in its 'Guidelines on ETFs and other UCITS issues')
- o placed on deposit;
- o reinvested in high-quality long-term government bonds
- o reinvested in high-quality short-term government bonds
- o used for the purpose of reverse repurchase transactions.»

The maximum proportion of received collateral that may be reused is 0% in the case of securities and 100% in the case of cash.

The effective usage amounts to 0% for collateral securities and 100% for cash collateral.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

k) Data on safekeeping of collateral granted by the collective investment undertaking

Amundi Asset Management undertakes to do business with a limited number of depositaries, selected to ensure the adequate custody of securities received and cash.

l) Data on return and cost broken down

For securities lending transactions and repurchase agreements, Amundi Asset Management has entrusted Amundi Intermédiation, acting on behalf of the UCIs, with the following responsibilities: selecting counterparties, ordering the implementation of market agreements, monitoring counterparty risk, performing qualitative and quantitative monitoring of collateralisation (dispersion checks, ratings, liquid assets), repurchase agreements and securities lending. Income generated from these transactions is paid into the UCIs. Costs generated by these transactions are incurred by the UCIs. Charges by Amundi Intermédiation must not exceed 50% of the income generated by these transactions.

Specific details

Voting rights

The exercise of voting rights attached to the securities included in the fund's assets and the decision on the contribution in securities are defined in the fund regulations.

Group funds and instruments

In order to obtain information on the financial instruments held in the portfolio that are issued by the Management Company or by its affiliates, please refer to the sections:

- Additional information,
- Group financial instruments held in the portfolio in the annual financial statements for the year ended, attached hereto.

Calculating overall risk

Specify the method used to measure the overall risk:

- Commitment calculation method

Futures contracts are recorded at their market value as off-balance-sheet commitments, at the settlement price. Conditional forward transactions are translated to the underlying equivalent. Over-the-counter interest rate swaps are evaluated based on the nominal amount, plus or minus the corresponding estimation difference.

- Overall risk calculation method: the mutual fund uses the commitment calculation method to calculate the mutual fund's overall exposure to financial contracts.

- Leverage - Funds to which the risk calculation method is applied.

Indicative leverage level: 24.83%.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Regulatory information

Selection procedure for brokers and counterparties

Our Management Company and its "Trading" subsidiary attaches great importance to the selection of transactional service providers that are brokers or counterparties.

Its selection methods are as follows:

- Brokers are selected by geographical area and then by business. Counterparties are selected by business.
- Brokers and counterparties are provided with a quarterly internal memorandum. The company departments involved in the rating process are directly concerned by the services rendered by these service providers.

The "Trading" subsidiary organises and determines this rating based on the scores provided by each team leader concerned, using the following criteria:

For teams of managers, financial analysts and strategists:

- general commercial relations, understanding of needs, relevance of contracts,
- quality of market and opportunities advice, consultancy monitoring,
- quality of research and publications,
- universe of securities covered, company and management visits.

For teams of traders:

- quality of personnel, market knowledge and information on companies, confidentiality,
- price proposals,
- quality of execution,
- quality of transactions processing, connectivity, technical standards and responsiveness.

Our Company's Compliance and Middle Office departments have a right of veto.

Accreditation of a new transactional service provider (broker or counterparty)

The Trading subsidiary is in charge of processing authorisation dossiers and obtain approval from the Risk and Compliance departments. When the transactional service provider (broker or counterparty) is authorised, it is rated in the following quarter.

Monitoring committees for transactional service providers (brokers and counterparties)

These monitoring committees meet every quarter under the chairmanship of the Trading subsidiary manager. The purpose of the meetings is to:

- validate past activity and the new selection to be implemented in the following quarter,
- decide on whether service providers will form part of a group that will be assigned a certain number of transactions,
- define the business outlook.

In this perspective, the monitoring committees review the statistics and ratings assigned to each service provider and take decisions accordingly.

Report on broking fees

A report on broking fees is available for bearers. It can be viewed at the following web address: www.amundi.com.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Remuneration Policy

1. Remuneration policy and practices of the AIFM/Management company

The remuneration policy implemented by Amundi Asset Management is compliant with the rules in terms of remuneration specified in the Directive 2011/61/UE of the European Parliament and of the Council of June 8th 2011 on Alternative Investment Fund Managers (the “*AIFM Directive*”), and in the Directive 2014/91/UE of July 23rd 2014 on undertakings for collective investment in transferable securities (the “*UCITS V Directive*”). These rules, about remuneration policies and practices, have for objective to promote sound and effective risk management of fund managers and the funds they manage.

Moreover, the remuneration policy is compliant with Regulation (EU) 2019/2088 (“*SFDR*”), integrating sustainability risk and ESG criteria in Amundi control framework, with responsibilities spread between the first level of controls performed by the Investment teams and second level of controls performed by the Risk teams, that can verify the compliance with ESG objectives and constraints of a fund at all time.

This policy is incorporated within the framework of the remuneration policy of Amundi reviewed each year by its Remuneration Committee. The latter checked the application of the remuneration policy in relation to the 2023 fiscal year, its compliance with the AIFM/UCITS Directives’ principles and approved the policy applicable for the 2024 exercise at its meeting held on February 1st 2024.

In 2024, the implementation of the Amundi remuneration policy was subject to an internal, central and independent audit, driven by the Amundi Internal Audit.

1.1 Amounts of remuneration paid by the Management companies to its employees

During fiscal year 2024, the total amount of compensation (including fixed, deferred and non-deferred variable compensation) paid by Amundi Asset Management to its employees (1 988 beneficiaries¹) is EUR 214 708 329. This amount is split as follows:

- Total amount of fixed remuneration paid by Amundi Asset Management in 2024: EUR 150 552 656, which represents 70% of the total amount of compensation paid by Amundi Asset Management to its staff, were in the form of fixed remuneration.
- Total amount of variable compensation deferred (including performance shares) and non-deferred paid by Amundi Asset Management in 2024: EUR 64 155 672, which represents 30% of the total amount of compensation paid by Amundi Asset Management to its staff, were in this form. The entire staff is eligible for variable compensation.

Additionally, no amount corresponding to a return on investment in shares of carried interests was paid with respect to fiscal year 2024.

Of the total amount of remuneration (fixed and variable compensation deferred and non-deferred) paid during the fiscal year, EUR 23 746 888 were paid to the ‘executives and senior managers’ of Amundi Asset Management (50 beneficiaries), and EUR 17 290 937 were paid to the ‘senior investment managers’ whose professional activities have a material impact on Amundi Asset Management’s risk profile (59 beneficiaries).

1.2 Alignment of remuneration policy and practices with risk profile of the AIFs/UCITS

The Amundi Group has adopted and implemented remuneration policy and practices compliant with the latest norms, rules, and guidelines issued from the regulatory authorities for its management companies (AIFM/UCITS).

The Amundi Group has also identified all of its ‘Identified Staff’, that include all the employees of the Amundi Group having a decision authority on the UCITS/AIFM management companies or the UCITS/AIFs managed and consequently likely to have a significant impact on the performance or the risk profile.

The variable remuneration awarded to the Amundi Group staff takes into account the performance of the employee, its business unit and the Amundi Group as a whole, and is based on quantitative and qualitative criteria as well as the respect of sound risk management rules.

¹ Number of permanent and fixed-term employees paid during the year, whether or not they were still present on 31/12/2024.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

The criteria taken into account for performance assessment and remuneration award depends on the nature of the employee's functions:

1. Management and selection of AIFs/UCITS functions

Quantitative criteria:

- IR/Sharpe over 1, 3, 5 years
- Gross/absolute/relative performance of the investment strategies (based on GIPS composites) over 1, 3, 5 years, outlook mainly focused on 1 year, adjusted with long-term figures (3,5 years)
- Performance risk adjusted based on IR/Sharpe over 1, 3, 5 years
- Competitive positioning through Morningstar rankings
- Net inflows / Successful requests for proposals, mandates
- Performance fees generation
- ESG rating of the funds according to different providers when applicable (Morningstar, CDP...
- Respect of ESG beat the benchmark, ESG exclusion policies and climate transition index

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Quality of management
- Innovation/product development
- Collaboration/Sharing of best practices
- Commercial engagement – including the ESG component of commercial effort and flows
- ESG
 - o Compliance with ESG policy and participation to the ESG and net-zero offering
 - o Integration of ESG into investment processes
 - o Capacity to promote and project ESG knowledge internally and externally
 - o Extent of proposition and innovation in the ESG space
 - o Demonstrates capacity to manage well the combination of risk return and ESG (the risk and ESG adjusted return)

2. Sales and marketing functions

Quantitative criteria:

- Net inflows, notably on ESG and impact denominated products
- Revenues
- Gross Inflows
- Client base development and retention; product mix
- Number of commercial activities per year, notably prospection activities
- Number of clients approached on their net zero strategy

Qualitative criteria:

- Compliance with risk policy, compliance and legal rules
- Joint consideration of Amundi's interests and of client's interests
- Securing/developing the business
- Client satisfaction
- Quality of management
- Cross-functional approach and sharing of best practices
- Entrepreneurial spirit
- Capacity to explain and promote ESG policies and capabilities as well as solutions of the firm

3. Control and support functions

For control and support functions, performance assessment and remuneration award are independent from the performance of the business they oversee.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Common criteria taken into account are:

- Mainly criteria related to the meeting of objectives linked to their functions (risk management, quality of controls, completion of projects, tools and systems improvement etc.)
- When financial criteria are used, these are mainly related to management/ optimization of expenses.

The above-mentioned performance criteria, and specifically those applicable to Identified staff in charge of the management of AIFs/UCITS, comply with the applicable regulation as well as to the AIF's/UCITS investment policy. These internal rules of Amundi Group contribute to a sound and effective risk management.

Furthermore, Amundi Group has adopted and implemented, for its entire staff, measures aiming to align remuneration with long-term performance and risks in order to avoid conflicts of interest.

In this respect, notably:

- The deferral policy has been adapted to comply with the AIFM and UCITS V Directives' requirements.
- The deferred portion of variable compensation for identified staff members is awarded at 100% in instruments indexed on the performance of a representative basket of AIFs and/or UCITS funds.
- The actual payment of the deferred portion is linked to the financial situation of Amundi Group, to the continued employment within the group and to a sound and effective risk management over the vesting period.

Fund Compliance with criteria relating to environmental, social, and governance quality (ESG) objectives

- Amundi produces an ESG analysis that generates an ESG rating for over 20,000 companies worldwide² on a scale ranging from "A" (for issuers with the best ESG practices) to "G" (for the worst ESG practices). The ESG score obtained measures an issuer's ESG performance: ability to anticipate and manage sustainability risks along with the potential negative impact of its activities on sustainability factors. This analysis is complemented by a policy of active commitment among issuers, in particular on major challenges regarding sustainable development within their sectors.
- As part of its fiduciary responsibility, Amundi has set minimum standards and exclusion policies for critical sustainability issues³. The Minimum Standards and Exclusion Policy apply to actively-managed portfolios and passive ESG portfolios, and are always in compliance with applicable laws and regulations.

For passive management, the exclusion policy is applied differently between ESG and non-ESG products⁴:

- For passive ESG funds: All ESG ETFs and ESG index funds apply Amundi's Minimum Standards and Exclusion Policy,
- For passive non-ESG funds: The fiduciary duty consists in replicating an index as faithfully as possible. Limited flexibility is thus afforded to the portfolio manager, who is required to comply with the contractual objectives such that the passive management is entirely in line with the requested benchmark index. Since Amundi's index funds/ETFs replicate standard (non-ESG) benchmarks, they do not apply systematic exclusions beyond those imposed by the regulations.

² Sources: Amundi, Decembre 2024

³ For more information, please see Amundi's responsible investment policy, available at www.amundi.fr

⁴ For a comprehensive view of the scope of Amundi's exclusion policy, please see the tables presented in the annex, page 35 of Amundi's Responsible Investment Policy

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Normative exclusions related to international conventions:

- **anti-personnel mines and cluster munitions**⁵,
- **chemical and biological weapons**⁶,
- **violation of the principles of the United Nations Global Compact**⁷.

Sectoral exclusions:

- **nuclear weapons**,
- **depleted uranium weapons**,
- **thermal coal**⁸,
- **unconventional hydrocarbons (exploration and production representing more than 30% of turnover)**⁹,
- **tobacco** (*whole tobacco products generating more than 5% of a company's turnover*).

Concerning the sectoral exclusion policies:

- Thermal coal

Since 2016, Amundi has implemented a special sectoral policy leading to the exclusion of certain companies and issuers. Amundi has strengthened its coal exclusion policy (rules and thresholds) every year since 2016, as its phase-out (between 2030 and 2040) is essential to achieve the decarbonisation of our economies. These commitments stem from the Crédit Agricole Group's climate strategy.

Amundi excludes:

- Mining, utilities, and transport infrastructure companies that develop thermal coal projects, have an authorisation and are in the construction phase,
Companies whose thermal coal projects are at earlier development stages, including those that have been announced or proposed, or that have been pre-authorised, are monitored on a yearly basis.

With respect to mining, Amundi excludes:

- Companies that generate more than 20% of their income from thermal coal mining,
- Companies that extract 70 million tonnes or more of thermal coal annually.

For companies deemed too exposed to be able to exit from thermal coal at an appropriate pace, Amundi excludes:

- All companies that generate more than 50% of their turnover from the extraction of thermal coal and the production of electricity from thermal coal,
- All companies that generate between 20% and 50% of their turnover from thermal coal-based electricity generation and thermal coal extraction, and have an insufficient transition track¹⁰.

- Unconventional hydrocarbons

Investing in companies that are highly exposed to fossil fuels entails increasing social, environmental, and economic risks. Unconventional oil and gas exploration and production are exposed to acute climatic risks. This policy applies to all active management strategies and all passive ESG strategies on which Amundi practices discretionary management.

Amundi excludes:

- Companies whose activity related to the exploration and production of unconventional hydrocarbons represents more than 30% of turnover.

⁵ Ottawa (12/03/1997) and Oslo (12/03/2008) Conventions.

⁶ Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction - 26/03/1972

⁷ Issuers that seriously and repeatedly violate one or more of the ten principles of the United Nations Global Compact without taking credible corrective action

⁸ Developers, mining, companies deemed too exposed to be able to exit from thermal coal at the expected pace

⁹ Oil sands, shale oil, shale gas

¹⁰ Amundi conducts an analysis to assess the quality of the phase-out plan.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

- Tobacco

Amundi penalises issuers exposed to the tobacco value chain by limiting their ESG rating, and has implemented an exclusion policy for cigarette-producing companies. This policy affects the entire tobacco sector, including suppliers, cigarette manufacturers, and retailers. It is applicable to all active management strategies and all passive ESG strategies on which Amundi practices discretionary management.

The ESG rating of the tobacco sector is capped at E (on a scale from A to G). This policy applies to companies involved in tobacco manufacturing, supply, and distribution activities (threshold: turnover greater than 10%).

Amundi excludes:

- Companies that manufacture whole tobacco products (threshold: turnover greater than 5%), including cigarette manufacturers, as no product can be considered free from child labour.

This policy applies to all active management strategies and all passive ESG strategies on which Amundi practices discretionary management.

- Nuclear weapons

Amundi restricts investments in companies exposed to nuclear weapons and in particular those involved in the production of key components or components dedicated to nuclear weapons.

Amundi excludes:

- Issuers involved in the production, sale, and stockpiling of nuclear weapons from States that have not ratified the Treaty on the Non-Proliferation of Nuclear Weapons or from signatory States of the Treaty on the Non-Proliferation of Nuclear Weapons that are not members of NATO,
- Issuers involved in the production of nuclear warheads and/or entire nuclear missiles, or components that have been significantly developed and/or modified for exclusive use in nuclear weapons,
- Issuers that generate more than 5% of their turnover from the production or sale of nuclear weapons (excluding dual-use components and launch platforms).

- Depleted uranium weapons

Although there is no international treaty banning or restricting them, depleted uranium weapons are deemed to cause the release of toxic chemical and radioactive particles, representing a long-term environmental and human health hazard.

Amundi therefore excludes issuers that generate significant revenue (i.e. more than 5% of their total revenue) from the production or sale of depleted uranium weapons. This policy applies to all active management strategies and all passive ESG strategies over which Amundi has full discretion.

For more information on how environmental issues (in particular those related to climate change) and corporate and governance (ESG) issues are taken into account in its investment policy, Amundi provides investors with the “Application of Article 29” report available on <https://legroupe.amundi.com> (Legal Documentation section).

SFDR and Taxonomy Regulations

Article 8 – concerning Taxonomy

In accordance with its investment objective and policy, the Fund promotes environmental characteristics as defined under Article 6 of the Taxonomy Regulation. It may partially invest in economic activities that contribute to one or more of the environmental objective(s) set out in Article 9 of the Taxonomy Regulation. However, the Fund does not currently make any commitment in terms of a minimum proportion.

The Taxonomy aims to identify economic activities considered to be environmentally sustainable. The Taxonomy identifies such activities according to their contribution to six major environmental objectives:

(i) climate change mitigation, (ii) climate change adaptation, (iii) the sustainable use and protection of water and marine resources, (iv) the transition to a circular economy (waste, prevention, and recycling) (v) pollution prevention and reduction, and (vi) the protection and restoration of biodiversity and ecosystems.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

In order to determine an investment's degree of environmental sustainability, an economic activity is considered to be environmentally sustainable where it contributes substantially to one or more of the environmental objectives set out in the Taxonomy Regulation, where it does no significant harm (the "do no significant harm" or "DNSH" principle) to one or more of these environmental objectives, where it is carried out in accordance with the minimum safeguards provided for in Article 18 of the Taxonomy Regulation and where it complies with the technical screening criteria established by the European Commission in accordance with the Taxonomy Regulation.

In accordance with the current iteration of the Taxonomy Regulation, the Asset Manager ensures that investments do no significant harm to any other environmental objective by implementing exclusion policies covering issuers with controversial environmental and/or social and/or governance practices.

Notwithstanding the preceding, the "Do No Significant Harm" (DNSH) principle is applied solely to the underlying investments incorporating European Union criteria for environmentally sustainable economic activities.

The investments underlying this financial product do not incorporate European Union criteria for environmentally sustainable economic activities.

Although the Fund may already hold investments in economic activities qualified as sustainable activities without currently undertaking to observe a minimum proportion, the Asset Manager will do everything it can to communicate the proportion invested in sustainable activities as soon as it is reasonably possible after the entry into force of the Regulatory Technical Standards ("RTS") governing the content and presentation of communications in accordance with Articles 8(4), 9(6) and 11(5) of the Disclosure Regulation, as amended by the Taxonomy Regulation.

This effort will be gradually and continuously rolled out, incorporating the requirements of the Taxonomy Regulation in the investment process as soon as it is reasonably possible. This will lead to a minimum level of portfolio alignment with sustainable activities, and this information will then be made available to investors. Until then, the degree of alignment with sustainable activities will not be disclosed to investors.

Once all the data is available and the appropriate calculation methodologies are finalised, the description of the proportion of underlying investments in sustainable activities will be made available to investors. This information, along with information on the proportion of enabling and transitional activities, will be indicated in a subsequent version of the prospectus.

Article 8 – concerning Article 11 of the SFDR

In accordance with Article 50 of the SFDR Level 2 Delegated Regulation, information on the achievement of environmental or social characteristics promoted by the financial product forming part of this management report is available in the annex to this report.

ON THE FINANCIAL STATEMENTS
For the year ended 31 March 2025**

AMUNDI EURO LIQUIDITY RATED RESPONSIBLE
OPCVM CONSTITUE SOUS FORME DE FONDS COMMUN DE PLACEMENT
Governed by the French Monetary and Financial Code (*Code monétaire et financier*)

Management company
AMUNDI ASSET MANAGEMENT
90, boulevard Pasteur
75015 PARIS

Opinion

In compliance with the assignment entrusted to us by the management company, we conducted an audit of the accompanying financial statements of **AMUNDI EURO LIQUIDITY RATED RESPONSIBLE** for the year ended 31 March 2025.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the fund at ended 31 March 2025 and of the results of its operations for the year then ended, in accordance with French accounting principles.

Basis of our opinion

Audit standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion. Our responsibilities under these standards are described in the section "*Statutory Auditor's responsibilities for the audit of the financial statements*" in this report.

Independence

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (*Code de commerce*) and the French Code of Ethics (*code de déontologie*) for statutory auditors, from 29/03/2023 and up to the date of this report.

AMUNDI EURO LIQUIDITY RATED RESPONSIBLE

Observation

Without qualifying the opinion expressed above, we draw your attention to the change in accounting methods set out in the notes to the financial statements.

Justification of our assessments

In accordance with the requirements of articles L.821-53 and R.821-180 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following assessments that, in our professional judgement, were the most significant for the audit of the financial statements.

These assessments were made in the context of our audit of the financial statements, taken as a whole, and of the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

Specific verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by laws and regulations.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report prepared by the management company.

AMUNDI EURO LIQUIDITY RATED RESPONSIBLE

Responsibilities of the management company for the financial statements

It is the management company's responsibility to prepare the fund's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, the management company is responsible for assessing the fund's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the fund or to cease operations.

These financial statements have been prepared by the management company.

Statutory auditor's responsibilities for the audit of the financial statements

Audit purpose and approach

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As indicated in article L.821-55 of the French Commercial Code, our statutory audit of the financial statements is not to guarantee the viability or the quality of your management.

AMUNDI EURO LIQUIDITY RATED RESPONSIBLE

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor uses professional judgement throughout the entire audit.

He also:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the fund's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

In accordance with the law, we inform you that we were not able to issue the present report within the statutory deadlines given the late receipt of some necessary documents to finalize our work.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Notes to the annual financial statements

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

A. General information

A1. Characteristics and activity of the open-ended uci

A1a. Management strategy and profile

The fund's management objective is to outperform the compounded €STR benchmark after taking into account ongoing costs, while integrating ESG criteria into the fund's stock selection and analysis process. Nevertheless, in times of negative returns in the money market, the fund's performance can be negatively affected. In addition, after taking into account current costs, the fund's performance may be lower than that of the capitalized €STR.

The prospectus / regulation of the CIU shall fully and precisely describe these characteristics.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

A2. Accounting policies

The annual accounts are presented for the first time in the form provided for in NCA Regulation No. 2020-07 as amended by NCA Regulation 2022-03.

1 Changes in accounting policies, including presentations, in connection with the application of the new accounting regulation on the annual accounts of undertakings for collective investment with variable capital (ANC Regulation 2020-07 as amended).

This new regulation imposes changes in accounting methods, including changes in the presentation of the annual accounts. Comparability with the accounts of the previous year cannot therefore be achieved.

NB: the statements concerned are (in addition to the balance sheet and the income statement): B1. Evolution of equity and financing liabilities; D5a. Allocation of distributable amounts relating to net income and D5b. Allocation of distributable sums relating to net realised capital gains and losses.

Thus, in accordance with the 2nd paragraph of Article 3 of the ANC Regulation 2020-07, the financial statements do not present the data of the previous financial year; the N-1 financial statements are included in the notes.

These changes focus on:

- the structure of the balance sheet, which is now presented by types of eligible assets and liabilities, including loans and borrowings;
- the structure of the income statement, which has been profoundly modified; the income statement including, in particular: exchange differences on financial accounts, unrealised capital gains or losses, realised capital gains and losses and transaction costs;
- the abolition of the off-balance sheet table (part of the information on the items in this table is now included in the notes);
- the abolition of the option to account for costs included in the cost price (with no retroactive effect for funds formerly applying the costs included method);
- the distinction between convertible bonds and other bonds, as well as their respective accounting records;
- a new classification of the target funds held in the portfolio according to the model: UCITS / AIFs / Others;
- the accounting of forward exchange commitments, which is no longer done at the balance sheet level but at the off-balance sheet level, with forward exchange information covering a specific part;
- the addition of information relating to direct and indirect exposures to the various markets;
- the presentation of the inventory, which now distinguishes between eligible assets and liabilities and forward financial instruments;
- the adoption of a single presentation template for all types of UCIs;
- the abolition of the aggregation of accounts for funds with compartments.

2 Accounting policies and policies applied during the year

The general principles of accounting apply (subject to the changes described above):

- true and fair view, comparability, business continuity,
- regularity, sincerity,
- caution
- Permanence of methods from one exercise to the next.

The method of accounting for fixed income income is accrued interest.

Securities inflows and disposals are accounted for on an exclusive basis.

The reference currency for portfolio accounting is in euros.

The duration of the exercise is 12 months.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Asset Valuation Rules

Financial instruments are recorded in accounting using the historical cost method and recorded in the balance sheet at their current value, which is determined by the last known market value or, in the absence of a market, by any external means or by using financial models.

The differences between the current values used in the calculation of the net asset value and the historical costs of the securities when they enter the portfolio are recorded in "Unrealised capital gains or losses" accounts.

Securities that are not in the currency of the portfolio are valued in accordance with the principle set out below and then converted into the currency currency currency according to the currency rate on the day of valuation.

Deposits:

Deposits with a residual life of less than or equal to 3 months are valued according to the straight-line method.

Shares, bonds and other securities traded on a regulated market or similar:

Shares and other securities traded on a regulated market or similar are valued at the opening price of the day called D-of the markets, i.e. according to the area to which the market belongs:

- Asia Zone: Closing Market Price
- Europe Zone: Opening Course J
- Americas: closing price (D-1).

Bonds and similar securities are valued at the opening price communicated by various financial service providers.

Accrued interest on bonds is calculated up to the date of the net asset value.

For the valuation of fixed-rate bonds backed by an interest rate swap and FRN bonds, materiality thresholds rigorously defined by the valuation policy are integrated.

Shares, bonds and other securities not traded on a regulated market or similar market:

Securities not traded on a regulated market are valued under the responsibility of the management company using methods based on asset value and yield, taking into account the prices used in recent significant transactions.

Negotiable debt securities:

The assets of the money market funds of the management company Amundi are valued daily. They are valued whenever possible at the mark-to-market and when this is not, from a market spread. In order to validate the relevance of the prices used to value the assets, a regular measurement of the difference between the prices recorded and the sale prices processed is carried out by the Risk Department.

Negotiable Debt Securities and similar securities that are not the subject of significant transactions are actuarially valued on the basis of a reference rate defined below, increased, where applicable, by a difference representative of the intrinsic characteristics of the issuer and after integration of materiality thresholds rigorously defined by the valuation policy: TCN with a maturity of less than or equal to 1 year: Interbank Offered Rate in euros (Euribor); TCN with a maturity of more than 1 year: Rate on Normalised Annual Interest Treasury Bills (BTAN) or OAT (Assimilable Treasury Bonds) rates with a similar maturity for the longest maturities.

UCIs held:

Units or shares of mutual funds will be valued at the last known net asset value.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Temporary transactions in securities:

Securities received under repurchase agreement are capitalized under the heading "receivables representing securities received under repurchase agreement" for the amount provided for in the contract, plus accrued interest receivable.

Securities given under repurchase agreements are recorded in the long portfolio at their current value. The debt representing the securities given under repurchase agreement is recorded in the seller's portfolio at the value set out in the contract plus accrued interest payable.

The securities lent are valued at their current value and are recorded as assets under the heading "receivables representing securities loaned" at the present value plus accrued interest receivable.

The securities borrowed are recorded as assets under the heading "securities borrowed" for the amount provided for in the contract, and as liabilities under the heading "debts representing securities borrowed" for the amount provided for in the contract plus accrued interest payable.

Forward Financial Instruments:

Forward financial instruments traded on a regulated market or similar market:

Futures financial instruments traded on regulated or similar markets are valued for the calculation of the net asset value of the day (D):

- Asia zone: at the clearing price of the day
- Europe zone: at the opening price of the day (D)
- Americas zone: at the clearing price of (D-1).

Forward financial instruments not traded on a regulated market or similar market:

Swaps:

Interest rate and/or currency swaps are valued at their market value based on the price calculated by discounting future interest flows at interest rates and/or market currencies. This price is corrected for signature risk.

Index swaps are actuarially measured on the basis of a benchmark rate provided by the counterparty.

The other swaps are valued at their market value or at an estimated value in accordance with the terms and conditions adopted by the management company.

Direct exposure to credit markets: principles and rules used for the breakdown of the UCI's portfolio items (Table C1f.):

All elements of the CIU's portfolio that are directly exposed to the credit markets are included in this table.

For each item, the various ratings are retrieved: issue and/or issuer rating, long-term and/or short-term rating. These ratings are recovered from 3 rating agencies. The rules for determining the rating used are then: 1st level: if there is a rating for the issue, it is retained to the detriment of the issuer's rating. 2nd level: the lowest long-term rating is retained among those available from the 3 rating agencies. If there is no long-term rating, the lowest Short-Term rating is retained among those available from the 3 rating agencies. If no rating is available, the item will be considered as "Not Rated". Finally, depending on the rating chosen, the categorization of the item is carried out according to market standards defining the notions "Investment Grade" and "Non-Investment Grade".

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Management fees

Management and operating costs cover all costs relating to the UCI: financial, administrative, accounting management, custody, distribution, audit costs, etc.

These costs are charged to the profit and loss account of the mutual fund.

The management fee does not include transaction fees. For more information on the fees actually charged to the UCI, please refer to the prospectus.

They are recorded on a pro rata temporis basis with each NAV calculation.

This fee covers all fees charged directly to the UCI, with the exception of transaction fees. Part of the management fee may be passed on to marketers with whom the management company has entered into marketing agreements. These are marketers who may or may not belong to the same group as the management company. These commissions are calculated on the basis of a percentage of the financial management fee and are invoiced to the management company.

Transaction fees correspond to the intermediation fees (brokerage, stock exchange taxes, etc.) levied on the UCI when transactions are carried out.

Operating costs and other services are levied on a flat-rate basis. As a result, the flat rate mentioned below may be deducted when the actual costs are lower than this; conversely, if the actual costs are higher than the posted rate, the management company will cover the overrun of this rate.

In addition to these costs, the following may be added:

- performance commissions. These remunerate the management company as soon as the UCI has exceeded its objectives. They are therefore invoiced to the OPC;
- Costs related to the acquisition and temporary sale of securities.

Exceptional legal costs related to the recovery of the UCI's claims may be added to the fees billed to the latter and displayed above.

Operating and management costs are charged directly to the profit and loss account of the UCI.

List of operating costs and other services

- Registration and referral fees and costs
- Costs and costs of informing customers and distributors (including in particular the costs related to the constitution and distribution of regulatory documentation and reports and the costs related to the communication of regulatory information to distributors, etc.)
- Fees and data costs
- Statutory audit fees
- Custodian and account keeper fees
- Costs related to the delegation of administrative and accounting management
- Audit costs, tax costs (including lawyer and external expert - recovery of withholding taxes on behalf of the fund, local tax agent, etc.) and legal fees and costs specific to the UCI
- Fees and costs related to compliance with regulatory obligations and reporting to the regulator (including in particular costs related to reporting, contributions to mandatory professional associations, operating costs for monitoring threshold crossings, operating costs for the deployment of voting policies at General Meetings, etc.)
- Fees and operational costs
- Fees and costs related to customer knowledge

All or part of these fees and costs may or may not apply depending on the characteristics of the UCI and/or the class of unit in question.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Performance fee:

The calculation of the performance fee applies at the level of each unit concerned and on each date of establishment of the Net Asset Value. This is based on the comparison (hereinafter the "Comparison") between:

- Net assets calculated at the share level (before deduction of the performance fee) and
- The reference asset (hereinafter referred to as the "Reference Asset") which represents and replicates the net asset calculated at the share level (before deduction of the performance fee) on the 1st day of the observation period, restated for subscriptions/redemptions at each valuation, to which the performance of the capitalised €STR benchmark indicator is applied.

Thus, as of 01/04/2022, the Comparison is carried out over an observation period of up to five years, the anniversary date of which corresponds to the day of establishment of the last net asset value of the month of March. All observation periods that begin on or after 01/04/2022 include the new terms and conditions below.

During the life of the share, a new observation period of up to 5 years begins:

- In the event of payment of the annual provision on an anniversary date.
- In the event of cumulative underperformance observed at the end of a period of 5 years.

In this case, any underperformance of more than 5 years will no longer be taken into account during the new observation period; conversely, any underperformance generated over the last 5 years will continue to be taken into account.

The performance fee will be a maximum of 30% of the difference between the net assets calculated at the unit level (before deduction of the performance fee) and the Reference Asset if the following cumulative conditions are met:

- This gap is positive
- The relative performance, since the beginning of the observation period as defined above, of the share in relation to the reference asset is positive or zero.

Past underperformance over the last 5 years must therefore be compensated for before a provision can be recorded again.

This commission will be subject to a provision when calculating the Net Asset Value.

In the event of redemption during the observation period, the share of the provision constituted, corresponding to the number of shares repurchased, is definitively acquired by the management company. This can be paid to the management company on each anniversary date.

If, during the observation period, the calculated net assets of the unit (before deduction of the performance fee) are lower than those of the Reference Asset, the performance fee will be zero and will be subject to a provision reversal when calculating the Net Asset Value. Reversals of provisions are capped at the level of previous allocations.

During the observation period, all provisions as defined above become due on the anniversary date and will be paid to the Management Company.

The performance fee is received by the management company even if the performance of the share over the observation period is negative, while remaining higher than the performance of the Reference Asset.

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

For the current observation period, the actual rate of the performance fee is:

- 10% for the E-C share;
- 10% for the I-C share;
- 10% for the I2-C share;
- None for the M-C share;
- 10% for the P-C share;
- 10% for the R&C share;
- 10% for the U-C share;
- 10% for the S-C share;
- 10% for the Z-C share.

Allocation of distributable amounts

Definition of distributable sums

The distributable sums are made up of:

Income:

Net income plus the carry-forward again and increased or decreased by the balance of the income accrual account.

Capital gains and losses:

Realized capital gains, net of expenses, less realized capital losses, net of expenses, recognized during the financial year, increased by net capital gains of the same nature recognized during previous financial years that have not been distributed or capitalized and reduced or increased by the balance of the capital gains accrual account.

The sums referred to as "income" and "capital gains and losses" may be distributed, in whole or in part, independently of each other.

In accordance with the regulations for distributive shares:

The payment of distributable sums shall be made within a maximum period of five months following the end of the financial year.

Where the UCI is authorised under Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on MMFs, by way of derogation from the provisions of paragraph I, the distributable sums may also include unrealised capital gains.

Notes to the annual accounts

1. Accounting rules and methods

The annual financial statements are presented in the form prescribed by ANC regulation 2014-01, as amended.

The following general accounting principles apply:

- true and fair view, comparability, and going concern,
- compliance, accuracy,
- prudence,
- consistency of accounting methods from one year to the next.

Revenues from fixed-income securities are recognised on the basis of accrued interest.

Securities bought and sold are recognised excluding costs.

The portfolio's accounting currency is the euro.

The financial year lasts 12 months.

Asset valuation rules

Financial instruments are recognised according to the historical cost method and are entered in the balance sheet at their present value, which is determined by the last-known market value or, if no market exists, by any external means or through the use of financial models.

Differences between the present values used to calculate net asset values and the historical costs of securities when they are first included in the portfolio are recorded under "Valuation differences".

Securities that are not denominated in the portfolio currency are valued in accordance with the principle described below and then converted into the portfolio currency at the exchange rate applicable on the day of the valuation.

Deposits:

Deposits with a remaining term of up to 3 months are valued according to the straight-line method.

Equities, bonds, and other securities traded on a regulated or similar market:

Equities and other securities traded on a regulated or similar market are valued at their opening price on the day known as "D" on each market, depending on the market's region:

- Asia: closing price on trading day "D"
- Europe: opening price on trading day "D"
- Americas: closing price on trading day "D-1".

Bonds and equivalent securities are measured at the closing price supplied by various financial service providers.

Interest accrued on bonds and similar securities is calculated up to the net asset value date.

Materiality thresholds that have been rigorously defined in the valuation policy are included for the valuation of fixed-rate bonds backed by an interest-rate swap and FRN bonds.

Equities, bonds, and other securities not traded on a regulated or similar market:

Securities not traded on a regulated market are valued under the responsibility of the asset manager using methods based on the asset value and the yield, taking into consideration the prices applied in recent significant transactions.

Negotiable debt securities:

The assets of Amundi's money market funds are valued on a daily basis. They are valued using market prices wherever possible, and, where market prices are unavailable, using a market spread. In order to validate the relevance of the prices used to determine asset valuations, the discrepancy between recorded prices and selling prices is regularly measured by the Risk Department.

Negotiable debt securities and similar securities not subject to material transactions are measured using an actuarial method based on a benchmark interest rate as defined below, and may be adjusted upward to take account of the intrinsic features of the issuer after integrating the materiality thresholds rigorously defined in the valuation policy:

Negotiable debt securities with a maturity of up to 1 year: Interbank rate in euros (Euribor);

Negotiable debt securities with a maturity of more than 1 year: Rate on coupon-bearing French government bonds (BTANs) and French OATs with a similar maturity for longer periods.

UCI holdings:

UCI units or shares are measured at their last known net asset value.

Temporary securities transactions:

Securities borrowed under repurchase agreements are recorded as assets under “Receivables representing securities held under repurchase agreements” for the amount specified in the contract plus accrued interest receivable.

Securities lent under repurchase agreements are booked in the long portfolio at their present value. The liability representing these securities is recorded in the short portfolio at the value fixed in the contract plus accrued interest payable.

Lent securities are valued at their present value and are recorded as assets under “Receivables representing lent securities” at their present value plus accrued interest receivable.

Borrowed securities are booked to assets under “Borrowed securities” at the amount provided for in the agreement, and to liabilities under “Payables representing borrowed securities” at the amount provided for in the agreement, plus accrued interest payable.

Forward financial instruments:

Forward financial instruments traded on a regulated or equivalent market:

Forward financial instruments traded on a regulated or similar market are measured as follows for the calculation of net asset value at trading day “D”:

- Asia: at the daily clearing price
- Europe: at the opening price on day “D”
- Americas: at the clearing price on day “D-1”.

Forward financial instruments not traded on a regulated or similar market:

Swaps:

Interest rate and/or currency swaps are marked to market based on the price calculated by discounting future interest flows at the market interest and/or exchange rates. This price is adjusted to take into account the issuer’s creditworthiness risk.

Index swaps are valued using an actuarial method on the basis of a reference interest rate provided by the counterparty.

Other swaps are either marked to market or assessed at an estimated value using a method established by the asset manager.

Off-balance-sheet commitments:

Futures appear in off-balance-sheet commitments for their market value at the price used in the portfolio.

Options are translated into the equivalent underlying asset.

Commitments on swaps are shown at their nominal value or, in the absence of a nominal value, for an equivalent amount.

Management fees

Management fees and operating costs include all UCI-related costs: financial management, administrative, accounting, custody, distribution, auditing fees, etc.

These fees are charged to the UCI's profit and loss account.

Management fees do not include transaction fees. Further information about the fees charged to the UCI can be found in the prospectus.

They are recorded on a pro-rata basis at each net asset value calculation.

The aggregate of these fees complies with the maximum fee rate as a percentage of net asset value indicated in the prospectus or the rules of the fund:

FR0013508942 - AMUNDI EURO LIQUIDITY-RATED SRI R2 unit: Maximum fee rate 0.50% incl. tax,
FR0013345774 - AMUNDI EURO LIQUIDITY-RATED SRI S unit: Maximum fee rate 0.10% incl. tax,
FR0013289386 - AMUNDI EURO LIQUIDITY-RATED SRI R unit: Maximum fee rate 0.50% incl. tax,
FR0013289402 - AMUNDI EURO LIQUIDITY-RATED SRI U unit: Maximum fee rate 0.15% incl. tax,
FR0013221181 - AMUNDI EURO LIQUIDITY-RATED SRI M unit: Maximum fee rate 0.15% incl. tax,
FR0013016607 - AMUNDI EURO LIQUIDITY-RATED SRI I2 unit: Maximum fee rate 0.15% incl. tax,
FR0011408764 - AMUNDI EURO LIQUIDITY-RATED SRI P unit: Maximum fee rate 1.00% incl. tax,
FR0011408798 - AMUNDI EURO LIQUIDITY-RATED SRI E unit: Maximum fee rate 0.15% incl. tax,
FR0011307065 - AMUNDI EURO LIQUIDITY-RATED SRI DP unit: Maximum fee rate 0.25% incl. tax,
FR0007038138 - AMUNDI EURO LIQUIDITY-RATED SRI I unit: Maximum fee rate 0.15% incl. tax,
FR0014004701 - AMUNDI EURO LIQUIDITY-RATED SRI R1 unit: Maximum fee rate 0.50% incl. tax,
FR0014005XN8 - AMUNDI EURO LIQUIDITY-RATED SRI Z unit: Maximum fee rate 1.00% (incl. tax).

Performance fee:

The performance fee is calculated for each unit concerned each time the net asset value is calculated. It is based on a comparison (hereinafter the "Comparison") between: The net assets calculated per unit (before deduction of the performance fee), and

The reference asset (hereinafter the "Reference Asset"), representing and replicating the net assets calculated per unit (before deduction of the performance fee) on the 1st day of the observation period, adjusted for subscriptions/redemptions at each valuation, to which is applied the performance of the reference indicator (Capitalised €STR).

Starting on 01/04/2022, the comparison is made over an observation period of at most five years, whose anniversary date corresponds to the last NAV calculation date for March. All observation periods opening from 1 April 2022 on will have the following new terms and conditions.

During the lifetime of the unit, a new observation period of at most five years begins:

If the annual provision is paid on an anniversary date.

In the event of cumulative under-performance observed at the end of a five year period.

In such case, no under-performance beyond 5 years will be considered during the new observation period; conversely, all under-performance generated over the last 5 years will still be considered.

The performance fee will be at most 30% of the difference between the net assets calculated per unit (before the deduction of the performance fee) and the Reference Asset if all the following conditions are met:

The difference is positive

the relative performance of the unit compared to the Benchmark NAV, since the beginning of the observation period defined above, is positive or zero.

Under-performance during the past five years must thus be offset before a new provision can be recorded.

This fee will be provisioned when the Net Asset Value is calculated.

In the event of redemptions during the observation period, the share of the provision recorded for the number of units redeemed permanently accrues to the asset manager. It may be paid to the asset manager on each anniversary date.

If, during the observation period, the net assets calculated per unit (before deduction of the performance fee) is below that of the Reference Assets defined above, the performance fee will be zero, and the provision will be reversed when the Net Asset Value is calculated. Provision reversals are capped at the level of previous allocations.

During the observation period, all provisions, as defined above, become payable on the anniversary date and will be paid to the asset manager.

The Asset Manager is paid the performance fee even if the performance of the unit over the observation period is negative, as long as it remains higher than the performance of the Reference Assets.

For the current observation period, the actual performance fee rate is:

10% for DP-C units;
10% for E-C units;
10% for I-C units;
10% for I2-C units;
0% for M-C units;
10% for P-C units;
10% for RC units;
10% for the U-C unit;
10% for S-C units;
10% for Z-C units.

Allocation of amounts available for distribution

Definition of amounts available for distribution

Amounts available for distribution consist of:

Income:

Net income added to retained earnings, plus or minus the balance of accrued income as appropriate.

The net income for the reporting period is equal to the amount of interest, arrears, dividends, premiums and bonuses, remuneration, and any income arising from the UCI portfolio securities, plus income from any amounts temporarily available, less management fees and borrowing costs.

Capital gains and losses:

Realised capital gains, net of costs, less realised capital losses, net of costs, recorded during the financial year, plus net capital gains of the same nature recorded in previous financial years that were not distributed or accumulated, plus or minus the balance of the capital gains adjustment account.

Procedure for the allocation of amounts available for distribution:

UCIT AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

Note(s)

Product

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - I (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies. FR0007038138 - Currency: EUR

Management Company's website: www.amundi.fr

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 06/01/2025.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for more than 1 month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€9,950
	Average return each year	-0.5%
Unfavourable Scenario	What you might get back after costs	€9,990
	Average return each year	-0.1%
Moderate Scenario	What you might get back after costs	€10,000
	Average return each year	0.0%
Favourable Scenario	What you might get back after costs	€10,040
	Average return each year	0.4%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

Investment EUR 10,000	
Scenarios	If you exit after more than 1 month*
Total costs	€1
Cost impact**	0.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. We do not charge an entry fee

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than 1 month
Entry costs	We do not charge an entry fee for this product.	Up to EUR 0
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.11% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 0.93
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
Incidental costs taken under specific conditions		
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.02

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last ten years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 06/01/2025.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€9,960
	Average return each year	-0.4%
Unfavourable Scenario	What you might get back after costs	€9,990
	Average return each year	-0.1%
Moderate Scenario	What you might get back after costs	€10,000
	Average return each year	0.0%
Favourable Scenario	What you might get back after costs	€10,030
	Average return each year	0.3%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/07/2017 and 31/08/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

Investment EUR 10,000	
Scenarios	If you exit after more than 1 month*
Total costs	€3
Cost impact**	0.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. We do not charge an entry fee

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than 1 month
Entry costs	We do not charge an entry fee for this product.	Up to EUR 0
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.43% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 3.60
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
Incidental costs taken under specific conditions		
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.00

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last ten years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 06/01/2025.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for more than 1 month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - I2 (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies.
FR0013016607 - Currency: EUR

Management Company's website: www.amundi.fr

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 06/01/2025.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€9,950
	Average return each year	-0.5%
Unfavourable Scenario	What you might get back after costs	€9,990
	Average return each year	-0.1%
Moderate Scenario	What you might get back after costs	€10,000
	Average return each year	0.0%
Favourable Scenario	What you might get back after costs	€10,040
	Average return each year	0.4%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment EUR 10,000	
Scenarios	If you exit after more than 1 month*
Total costs	€0
Cost impact**	0.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. We do not charge an entry fee

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than 1 month
Entry costs	We do not charge an entry fee for this product.	Up to EUR 0
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.08% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 0.65
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
Incidental costs taken under specific conditions		
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.02

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last ten years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

Product

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - M (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies.
FR0013221181 - Currency: EUR

Management Company's website: www.amundi.fr
Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document. Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.
Key Information Document production date: 20/12/2024.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for more than 1 month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€9,850
	Average return each year	-1.5%
Unfavourable Scenario	What you might get back after costs	€9,890
	Average return each year	-1.1%
Moderate Scenario	What you might get back after costs	€9,900
	Average return each year	-1.0%
Favourable Scenario	What you might get back after costs	€9,940
	Average return each year	-0.6%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

	Investment EUR 10,000
Scenarios	If you exit after more than 1 month*
Total costs	€101
Cost impact**	1.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. These figures include the maximum distribution fee that the person selling you the product may charge (1.00% of amount invested/EUR 100). This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

	One-off costs upon entry or exit	If you exit after more than 1 month
Entry costs	This includes distribution costs of 1.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 100
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
	Ongoing costs taken each year	
Management fees and other administrative or operating costs	0.14% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 1.18
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
	Incidental costs taken under specific conditions	
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.00

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - R (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies. FR0013289386 - Currency: EUR

Management Company's website: www.amundi.fr

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 06/01/2025.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - U (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies.
FR0013289402 - Currency: EUR

Management Company's website: www.amundi.fr

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 20/12/2024.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

 - exclusion of issuers rated F and G on purchase;

 - legal exclusions on controversial weapons;

 - exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

 - and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for more than 1 month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€9,850
	Average return each year	-1.5%
Unfavourable Scenario	What you might get back after costs	€9,890
	Average return each year	-1.1%
Moderate Scenario	What you might get back after costs	€9,900
	Average return each year	-1.0%
Favourable Scenario	What you might get back after costs	€9,940
	Average return each year	-0.6%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

	Investment EUR 10,000
Scenarios	If you exit after more than 1 month*
Total costs	€101
Cost impact**	1.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. These figures include the maximum distribution fee that the person selling you the product may charge (1.00% of amount invested/EUR 100). This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

	One-off costs upon entry or exit	If you exit after more than 1 month
Entry costs	This includes distribution costs of 1.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 100
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
	Ongoing costs taken each year	
Management fees and other administrative or operating costs	0.14% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 1.17
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
	Incidental costs taken under specific conditions	
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.01

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last ten years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 20/12/2024.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for more than 1 month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€8,960
	Average return each year	-10.4%
Unfavourable Scenario	What you might get back after costs	€8,990
	Average return each year	-10.1%
Moderate Scenario	What you might get back after costs	€9,000
	Average return each year	-10.0%
Favourable Scenario	What you might get back after costs	€9,030
	Average return each year	-9.7%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

	Investment EUR 10,000
Scenarios	If you exit after more than 1 month*
Total costs	€1,001
Cost impact**	10.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. These figures include the maximum distribution fee that the person selling you the product may charge (10.00% of amount invested/EUR 1,000). This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

	One-off costs upon entry or exit	If you exit after more than 1 month
Entry costs	This includes distribution costs of 10.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 1,000
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.10% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 0.76
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.17
Incidental costs taken under specific conditions		
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.07

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last ten years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - R2 (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies.
FR0013508942 - Currency: EUR

Management Company's website: www.amundi.fr

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 20/12/2024.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€9,850
	Average return each year	-1.5%
Unfavourable Scenario	What you might get back after costs	€9,890
	Average return each year	-1.1%
Moderate Scenario	What you might get back after costs	€9,900
	Average return each year	-1.0%
Favourable Scenario	What you might get back after costs	€9,940
	Average return each year	-0.6%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

Investment EUR 10,000	
Scenarios	If you exit after more than 1 month*
Total costs	€100
Cost impact**	1.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. These figures include the maximum distribution fee that the person selling you the product may charge (1.00% of amount invested/EUR 100). This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than 1 month
Entry costs	This includes distribution costs of 1.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 100
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.06% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 0.47
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	EUR 0.00

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last five years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

Product

AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE - R1 (C)

Management Company: Amundi Asset Management (hereinafter: "we" or the "Management Company"), a member of the Amundi Group of companies.
FR0014004701 - Currency: EUR

Management Company's website: www.amundi.fr

Call +33 143233030 for more information.

The AMF ("Autorité des Marchés Financiers") is responsible for supervising Amundi Asset Management in relation to this Key Information Document.

Amundi Asset Management is authorised in France under number GP-04000036 and regulated by the AMF.

Key Information Document production date: 20/12/2024.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Standard Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE, you are investing in money market instruments with a maximum maturity of 2 years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "Rating improvement" approach (the portfolio's average ESG rating must be higher than the ESG rating of the investment universe—75% ICE BOFA 1-3 YEAR EURO FINANCIAL + 25% ICE BOFA 1-3 YEAR EURO NON-FINANCIAL—after eliminating at least 25% of the lowest-rated securities. From 01/01/2026, this percentage of lowest-rated securities will increase to 30%);

- Normative through the exclusion of certain issuers:

- exclusion of issuers rated F and G on purchase;

- legal exclusions on controversial weapons;

- exclusion of companies that seriously and repeatedly contravene one or more of the 10 principles of the United Nations Global Compact;

- and sector exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

Moreover, the UCI does not invest in companies related to activities considered not to be in line with the Paris Climate Agreement (gas, oil etc.) or who do not meet the eligibility criteria of the French SRI label.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life. These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The fund is entitled to the SRI label.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

Intended retail investors: This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are able to bear a loss of up to the full amount invested.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

Distribution Policy: As this is a non-distributing unit class, investment income is reinvested.

More information: Further information regarding this product, including the prospectus and financial reports, is available free of charge on request from: Amundi Asset Management, 91-93 boulevard Pasteur, 75015 Paris, France.

The net asset value of the product is available at www.amundi.fr

Depository: CACEIS Bank.

What are the risks and what could I get in return?

RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: more than 1 month		
Investment EUR 10,000		
Scenarios		If you exit after more than 1 month
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	
Stress Scenario	What you might get back after costs	€8,960
	Average return each year	-10.4%
Unfavourable Scenario	What you might get back after costs	€8,990
	Average return each year	-10.1%
Moderate Scenario	What you might get back after costs	€9,000
	Average return each year	-10.0%
Favourable Scenario	What you might get back after costs	€9,030
	Average return each year	-9.7%

The figures shown include all the costs of the product itself, but may or may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable Scenario: This type of scenario occurred for an investment made between 28/02/2022 and 31/03/2022.

Moderate scenario: This type of scenario occurred for an investment made between 31/05/2017 and 30/06/2017.

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

	Investment EUR 10,000
Scenarios	If you exit after more than 1 month*
Total costs	€1,001
Cost impact**	10.0%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. These figures include the maximum distribution fee that the person selling you the product may charge (10.00% of amount invested/EUR 1,000). This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than 1 month
Entry costs	This includes distribution costs of 10.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 1,000

Favourable scenario: This type of scenario occurred for an investment made between 29/12/2023 and 31/01/2024

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

Investment EUR 10,000	
Scenarios	If you exit after more than 1 month*
Total costs	€591
Cost impact**	5.9%

* Recommended holding period.

** This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other products. These figures include the maximum distribution fee that the person selling you the product may charge (3.00% of amount invested/EUR 300). This person will inform you of the actual distribution fee.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than 1 month
Entry costs	This includes distribution costs of 3.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 300
Exit costs	You may be charged up to a maximum of 3.00% of your investment before it is paid out to you. The person selling you the product will inform you of the actual charges.	EUR 291.00
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.08% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 0.63
Transaction costs	0.02% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.19
Incidental costs taken under specific conditions		
Performance fees	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.	EUR 0.03

How long should I hold it and can I take money out early?

Recommended holding period: more than 1 month. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for short-term investment; you should be prepared to stay invested for at least more than 1 month. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Redemption orders must be received before 12:25 (Paris time) on the net asset value calculation date. Please refer to the AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE prospectus for more information about redemptions.

How can I complain?

If you have any complaints, you may:

- Mail Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France
- E-mail to complaints@amundi.com

In the case of a complaint you must clearly indicate your contact details (name, address, phone number or email address) and provide a brief explanation of your complaint. More information is available on our website www.amundi.fr.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

You may find the prospectus, key information documents, notices to investors, financial reports, and further information documents relating to the product including various published policies of the product on our website www.amundi.fr. You may also request a copy of such documents at the registered office of the Management Company.

When this product is used as a unit-linked vehicle in a life insurance or capitalisation contract, additional information about this contract, such as the costs of the contract, which are not included in the costs mentioned in this document, the contact details for complaints and the procedures in the event of default of the insurance company are provided in the key information document of the contract, which must be provided to you by your insurer or broker or any other insurance intermediary in compliance with their legal obligation.

Past performance: You can download the past performance of the Fund over the last five years at www.amundi.fr.

Performance scenarios: You can find previous performance scenarios updated on a monthly basis at www.amundi.fr.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
AMUNDI EURO LIQUIDITY-RATED RESPONSIBLE

<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This product is a certified SRI (Socially Responsible Investment) Throughout the year, it sought to promote all three dimensions (environmental, social, and corporate governance), taking into account the ESG rating of issuers in the construction of the portfolio.

The ESG rating of issuers is intended to evaluate their ability to manage the potential negative impact of their activities on sustainability factors. This analysis assesses their Environmental, Social, and Corporate Governance behaviour and assign them an ESG rating from A (highest rating) to G (lowest rating), in order to conduct a more inclusive assessment of the risks.

1. The portfolio consistently implemented the following Amundi exclusion policy:
- legal exclusions on controversial weapons
 - companies that seriously and repeatedly violate one or more of the Ten Principles of the UN Global Compact without implementing credible corrective measures

- Amundi's sectoral exclusions on Coal and Tobacco (the details of this policy are available in Amundi's Responsible Investment Policy available on www.amundi.fr)

2. No investment was made in issuers with "F" or "G" ratings. For issuers whose ratings were downgraded to "F" or "G", the securities already present in the portfolio are sold within the time period stipulated in the commitments set out in the product's prospectus.

3. The portfolio's weighted average ESG rating was consistently higher than that of the product's investment universe once at least 20% of the lowest-rated issuers were eliminated

4. The product favoured the issuers with the highest ratings in their sector of activity according to the ESG criteria identified by the asset manager's non-financial analysis team ("Best in Class" approach). With the exception of the above exclusions, all economic sectors are represented in this approach and the fund could, as a result, be exposed to certain controversial sectors.

● *How did the sustainability indicators perform?*

Amundi has developed its own internal ESG rating process based on the best-in-class approach. Ratings adapted to each industry sector aim to assess the dynamics in which companies operate.

The sustainability indicator used is the product's average ESG rating, which must be higher than the ESG rating of its investment universe.

At the end of the period:

- The portfolio's weighted average ESG rating is: 1.096 (C).
- The weighted average ESG rating of the reference universe is: 0.921 (C).

To determine ESG ratings, the Amundi ESG scoring system uses a quantitative ESG rating translated into seven scores ranging from A (the highest scores in the universe) to G (the lowest). Amundi's ESG scoring system gives securities on the exclusion list a G rating.

The ESG performance of corporate issuers is assessed globally and takes account of relevant criteria via comparison to the average performance of their business sector through a combination of all three ESG dimensions:

- the environmental dimension: this examines the ability of issuers to control their direct and indirect impact on the environment by limiting their energy consumption, reducing their greenhouse gas emissions, combating resource depletion, and protecting biodiversity;
- the social dimension: this measures the way an issuer operates on two different concepts: its strategy on developing human capital and respecting human rights in general;
- the governance dimension: this assesses the issuer's ability to provide the bases for an effective corporate governance framework and generate long-term value.

The ESG rating methodology used by Amundi is based on 38 criteria, either generic (common to all companies regardless of their activity), or sectoral, weighted by sector and considered according to their impact on reputation, operational efficiency, and issuer regulations. Amundi's ESG ratings can either be expressed as a general score covering all three dimensions: E, S, and G, or individually on any environmental or social factor.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***...and compared to previous periods?***

At the end of the previous period, the portfolio's weighted average ESG score was 0.762 (C), and that of the investment universe was 0.057 (D).

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in companies that met two criteria:

1. follow best environmental and social practices; and
2. do not generate products and services that harm the environment and society.

The definition of a "best performing" company is based on a proprietary Amundi ESG methodology that is designed to measure a company's ESG performance. To be considered as the "best performing", a company must obtain the best rating among the top three (A, B or C, on a rating scale ranging from A to G) in its sector on at least one important environmental or social factor. Significant environmental and social factors are identified at the sector level. The identification of these factors is based on Amundi's ESG analysis framework, which combines extra-financial data with a qualitative analysis of the related sector and sustainability themes. Factors identified as material have a contribution of more than 10% to the overall ESG rating. For the energy sector, for example, material factors are: emissions and energy, biodiversity and pollution, health and safety, local communities, and human rights.

In order to contribute to the above objectives, the investee company should not have significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticides, single-use plastic production) that are not compatible with these criteria.

The sustainable nature of an investment is assessed at the level of the investee company. Concerning external UCIs, the criteria for determining the sustainable investments that these underlying UCIs may hold and their objectives depend on each company's own management approach.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure that sustainable investments do not cause significant harm, Amundi uses two tests:

- The first "DNSH" ("Do No Significant Harm") test is based on the monitoring of the mandatory indicators of the Main Negative Impacts in Annex 1, Table 1 of Delegated Regulation (EU) 2022/1288 when reliable data is available (for example, the GHG intensity or greenhouse gas intensity of beneficiary companies) via a combination of indicators (e.g. carbon intensity) and specific thresholds or rules (e.g. The carbon intensity of beneficiary companies is not within the sector's last decile). Amundi already considers specific indicators of the Main Negative Impacts in its exclusion policy as part of the Amundi Responsible Investment Policy (e.g. exposure to controversial weapons). These exclusions, which apply in addition to the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of the principles of the UN Global Compact, coal and tobacco.
- In addition to the specific sustainability factors covered by the first filter, Amundi has defined a second filter that does not consider the mandatory indicators of the Main Negative Impacts above, so as to verify that a company's overall environmental or social performance is not worse than other companies in its sector, corresponding to an environmental or social rating of E or higher according to Amundi's ESG rating system.

Concerning external UCIs, the consideration of the "do no significant harm" principle and the impact of sustainable investments depends on each underlying UCI manager's own methodologies.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

As detailed above, the negative impact indicators were taken into account in the first DNSH filter (Do No Significant Harm):

This is based on the monitoring of the mandatory indicators of the Main Negative Impacts in Appendix 1, Table 1 of Delegated Regulation (EU) 2022/1288 when reliable data is available via the combination of the following indicators and specific thresholds or rules:

- has a CO2 intensity that is not within the last decile of companies in the sector (only applicable to high-intensity sectors), and
- has board diversity that is not within the last decile of companies in its sector, and
- is free from any controversy regarding working conditions and human rights
- is free from any controversy regarding biodiversity and pollution.

Amundi already takes into account the specific Negative Main Impacts in its exclusion policy as part of its Responsible Investment Policy. These exclusions, which apply in addition to the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of the principles of the United Nations Global Compact, coal and tobacco.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes. The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights have been incorporated into Amundi's ESG rating methodology. The proprietary ESG rating tool evaluates issuers using data available from data providers. For example, the model includes a dedicated criterion called "Community inclusion and Human rights" that is applied to all sectors in addition to other Human rights criteria, including socially responsible supply chains, working conditions and professional relations. In addition, we monitor controversies at least on a quarterly basis, which includes companies identified for Human rights violations. When controversies arise, analysts assess the situation and give a score to the controversy (using an exclusive, proprietary rating methodology) and determine the best steps to follow. Controversy scores are updated quarterly to track trends and remediation efforts.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory indicators of the Negative Main Impacts set out in Appendix 1, Table 1 of Delegated Regulation (EU) 2022/1288 were taken into account by implementing exclusion policies (normative and sectoral) and integrating ESG rating into the investment process, engagement and voting approaches:

- **Exclusion:** Amundi has defined normative exclusion rules, by activity and by sector, covering some of the main sustainability indicators listed in the “Disclosure” Regulation.
- **Incorporation of ESG factors:** Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G-rated issuers and best weighted average ESG rating above the applicable benchmark). The 38 criteria used in Amundi's ESG rating approach were also designed to take into account key impacts on sustainability factors along with the quality of mitigation.
- **Engagement:** engagement is an ongoing and targeted process aimed at influencing companies' activities or behaviour. The objective of the engagement can be divided into two categories: engaging an issuer to improve the way in which it integrates the environmental and social dimension and engaging an issuer to improve its impact on environmental, social and Human rights issues or other sustainability issues that are important to society and the global economy.
- **Voting:** Amundi's voting policy relies on a holistic analysis of all long-term issues that may influence value creation, including material ESG issues (Amundi's voting policy can be consulted on its website).
- **Monitoring controversies:** Amundi has developed a controversy monitoring system that relies on three external data providers to systematically monitor controversies and their level of severity. This quantitative approach is then enhanced by an in-depth assessment of each severe controversy conducted by ESG analysts and a periodic review of its developments. This approach applies to all Amundi funds.

For additional information on how the mandatory indicators of Key Negative Impacts are used, please see the SFDR Statement available at www.amundi.fr.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

<i>Sector</i>	<i>Sub-sector</i>	<i>% Assets</i>
<i>Corporate</i>	<i>Banking</i>	<i>50.54%</i>
<i>Other</i>	<i>Other</i>	<i>9.93%</i>
<i>Government bonds</i>	<i>Government bonds</i>	<i>7.89%</i>
<i>Finance</i>	<i>Funds</i>	<i>4.08%</i>
<i>Corporate</i>	<i>Electricity</i>	<i>3.25%</i>
<i>Quasi-States</i>	<i>Agencies</i>	<i>2.89%</i>
<i>Corporate</i>	<i>Consumer Discretionary</i>	<i>1.76%</i>

<i>Corporate</i>	<i>Other utilities</i>	<i>1.61%</i>
<i>Corporate</i>	<i>Consumer Staples</i>	<i>1.38%</i>
<i>Secured</i>	<i>Mortgage assets</i>	<i>1.34%</i>
<i>Corporate</i>	<i>Natural gas</i>	<i>1.21%</i>
<i>Corporate</i>	<i>Other financial institutions</i>	<i>0.99%</i>
<i>Corporate</i>	<i>Capital goods</i>	<i>0.74%</i>
<i>Corporate</i>	<i>Financial institutions</i>	<i>0.60%</i>
<i>Corporate</i>	<i>Technology</i>	<i>0.28%</i>
<i>Corporate</i>	<i>Real estate investment trusts (REIT)</i>	<i>0.28%</i>
<i>Corporate</i>	<i>Communications</i>	<i>0.21%</i>
<i>Corporate</i>	<i>Transportation</i>	<i>0.21%</i>
<i>Quasi-States</i>	<i>Supranationals</i>	<i>0.20%</i>
<i>Corporate</i>	<i>Basic industries</i>	<i>0.06%</i>
<i>Liquid capital</i>	<i>Liquid capital</i>	<i>10.55%</i>

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. Although the fund does not commit to making Taxonomy-aligned investments, it nevertheless invested 2.18% in Taxonomy-aligned sustainable investments during the period under review. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the aforementioned objectives of the EU taxonomy is measured using data on turnover (or revenue) and/or the use of green bond proceeds.

Neither the fund's auditors nor a third party has verified the percentage alignment of the fund's investments with the EU taxonomy.

companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

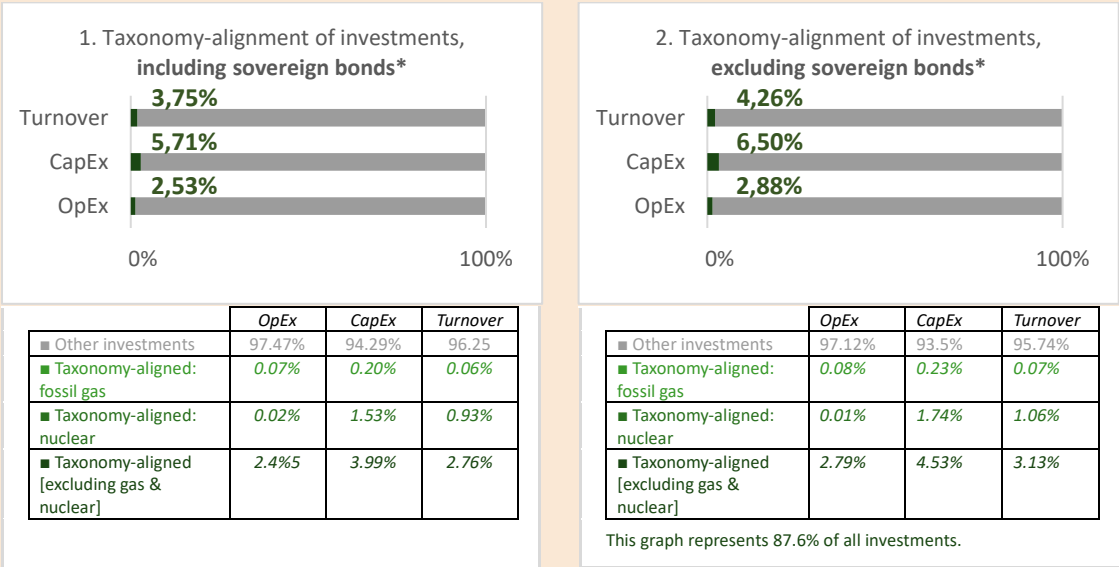

☒ Yes:

☒ In fossil gas ☒ In nuclear energy

☐ No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Using data relating to turnover and/or the use of green bond proceeds as an indicator, 0.10% of the fund’s investments were in transitional activities and 0.88% were in enabling activities as at 31/03/2025. Neither the fund's auditors nor a third party has verified the percentage alignment of the fund's investments with the EU taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

At the end of the previous period, the percentage of investments aligned with the Taxonomy was 0.13%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the Taxonomy was **53.08%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR but some of their activities are not aligned with Taxonomy standards, or data is not yet available for them to perform such an assessment.

What was the share of socially sustainable investments?

The portion of socially sustainable investments at the end of the period was **3.89%**.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash and/or other instruments held for liquidity and portfolio risk management purposes were included in category “#2 Other”. For non-rated bonds and equities, minimum environmental and social guarantees are applied by filtering for controversial issues in relation to the principles of the United Nations Global Compact. Instruments not covered by an ESG analysis may also include securities for which the data necessary to measure the achievement of environmental or social characteristics were not available. Moreover, minimum environmental or social guarantees have not been defined.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are made available in the portfolio management system, allowing managers to instantly assess the impact of their investment decisions on the portfolio.

These indicators are integrated into Amundi's control framework, with responsibilities being divided between the first level of control carried out by the investment teams themselves and the second carried out by the risk teams, which constantly monitor compliance with the environmental or social characteristics promoted by the product.

In addition, Amundi's responsible investment policy defines an active engagement approach that promotes dialogue with investee companies, including those in this portfolio. The annual engagement report, available on <https://legroupe.amundi.com/documentation-esg>, provides detailed information on this engagement and its results.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are

This product does not have an ESG benchmark.

indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

This product does not have an ESG benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG benchmark.

- ***How did this financial product perform compared with the reference benchmark?***

This product does not have an ESG benchmark.

- ***How did this financial product perform compared with the broad market index?***

This product does not have an ESG benchmark.

Article 29 LEC fund reporting

This document lists the information expected for funds exceeding €500 million in assets under management (net assets) pursuant to Article 29 of the LEC

The decree implementing Article 29 of the Energy-Climate Law of 8 November 2019, which clarifies and strengthens the extra-financial transparency system for market players, was published in the Official Journal on 27 May 2021.

At the end of the financial year, the portfolio did not take into account in its strategy either the alignment of assets under management with the long-term objectives of Articles 2 and 4 of the Paris Agreement, aimed at limiting the increase in the average temperature of the planet to well below 2°C compared to pre-industrial levels, nor the alignment of the outstanding amounts with the long-term biodiversity-related objectives contained in the Convention on Biological Diversity adopted on 5 June 1992. However, Amundi has included non-financial indicators in the report to assess the biodiversity footprint of the assets held as well as the portfolio's temperature score. The information, indicators and methodologies described are subject to change over time. Although this report has been prepared and reviewed with care and vigilance, Amundi and its data providers accept no responsibility for any errors or omissions contained in this document and disclaim any liability if a third party person or organisation uses the content of this report and suffers any loss or damage directly or as a result. Amundi has also included continuous improvement plans in the report, including the identification of improvement opportunities and information on corrective actions and strategic and operational changes made.

This document meets the requirements of Article 29 of the Energy-Climate Law of 8 November 2019 (known as LEC) on the extra-financial reporting of market participants.

The document presents:

1. The portfolio's climate strategy, especially if it has a strategy to align with the temperature objectives of the Paris Agreement;
2. The strategy for aligning the portfolio with long-term biodiversity-related objectives;
3. Approaches to taking into account environmental, social and governance quality criteria in risk management.

More information is available in Amundi's Responsible Investment Policy and in our climate report available on our website <https://legroupe.amundi.com/documentation-esg>.

1. The strategy of alignment with the international objectives of limiting global warming provided for in the Paris Agreement

The fund does not take into account in its strategy the alignment of assets under management with the long-term objectives of Articles 2 and 4 of the Paris Agreement concerning the limitation of global warming.

The fund benefits from the SRI label and publishes an environmental performance indicator

The SRI label was created in 2016 by the Ministry of the Economy and Finance, and aims to make SRI products more visible to savers in France and Europe. The SRI Label is a unique benchmark for savers, as well as professional investors, and distinguishes investment funds implementing a robust socially responsible investment (SRI) methodology, leading to measurable and concrete results. The fund reports monthly on four performance indicators to assess the ESG quality of the portfolio, including an environmental performance indicator, particularly in terms of the portfolio's carbon measurement. The fund is also committed to achieving a better result compared to the benchmark index on 2 of the 4 indicators.

The fund has selected the environmental indicator on which it will have to perform better than the benchmark index while maintaining a 90% coverage of the investment universe. The fund characterises this performance through the production of an indicator on the direct (scope 1) and indirect greenhouse gas (GHG) emissions linked to the energy consumption required to manufacture a product (scope 2) in its portfolio (in tonnes of CO2 equivalents), in absolute or relative value (by reference, for example, to the benchmark index or to the assets under management).

ESG reports are published every month for SRI open-ended funds. In particular, they compare the portfolio's ESG score to that of its benchmark or investment universe, which should perform better compared to the benchmark/starting universe. Comments on the ESG performance of the issuers in the portfolio complement this information. Amundi also complies with the European Transparency Code every year. This code is designed and approved by the AFG, the FIR and the EUROSIF (European Sustainable Investment Forum) and allows asset managers to provide transparent and precise information on the management of SRI funds to their clients.

Non-financial indicators

Amundi integrates, where relevant, extra-financial indicators to assess the portfolio's temperature score.

Amundi uses three data providers to calculate the portfolios' temperature score: Iceberg Data Lab, Trucost and CDP. Their methodologies are similar: they analyze historical data and/or targets published by emitters on carbon reduction in order to obtain an average temperature score.

There are, however, notable differences between the three methodologies:

- The three suppliers analyse the issuer's ambition. However, Trucost and Iceberg Data Lab incorporate past emissions into their trajectory estimates.
- Iceberg Data Lab is the only provider that proactively considers issuer credibility. They analyse the actions put in place in relation to the commitments of the issuers.
- Many emitters have not yet published a carbon emission reduction target. As a result, CDP has chosen to apply a default 3.2°C trajectory for these issuers.
- Trucost has developed a more accurate methodology for aggregating temperatures at the portfolio level. Instead of using a weighted average, Trucost takes into account each company's carbon budgets against a baseline scenario and aggregates them at the portfolio level.

Method 1 – Iceberg Data Lab Temperature (°C)

	Wallet	Index
Temperature (°C)	2,8	2,8

Exclusion Policies

Thermal coal exclusion policy

Coal combustion is the largest individual contributor to human-induced climate change. In 2016, Amundi implemented a sectoral policy dedicated to thermal coal, triggering the exclusion of certain companies and emitters. Every year since then, Amundi has gradually tightened the rules and thresholds of its thermal coal policy.

Amundi excludes:

Mining, utility and transport infrastructure companies that develop coal projects with an authorised status and that are in the construction phase, as defined in the list of coal developers established by the Crédit Agricole Group.
Companies whose coal projects are in the early stages of development, including announced, proposed, with pre-approved status, are monitored annually.
All companies with revenue from thermal coal mining and thermal coal power generation of more than 50% of total revenue without analysis;
All coal-fired power generation and coal mining companies with a threshold between 20% and 50% of total revenue and with an insufficient transition trajectory (Amundi conducts an analysis to assess the quality of the exit plan);
Companies that generate more than 20% of their turnover in thermal coal mining;
Companies with an annual thermal coal extraction of 70 MT or more, with no intention of reduction.

The phase-out of coal is paramount to achieving the decarbonization of our economies. This is why Amundi has committed to phasing out thermal coal from its investments by 2030 in OECD countries and by 2040 in other countries. In line with the United Nations Sustainable Development Goals (SDGs) and the 2015 Paris Agreement, this strategy is based on the research and recommendations of Crédit Agricole's Scientific Committee, which takes into account the scenarios designed by the International Energy Agency (IEA), the Climate Analysis Report and the Science Based Targets.

Scope of the exclusion policy

This policy is applicable to all companies but mainly affects mining companies, utilities and transport infrastructure companies. This policy applies to all active management strategies and all passive ESG strategies over which Amundi has full discretion for the following entities of the Amundi Group: Amundi Asset Management, BFT IM, CPR AM and SGG.

Using our position as an investor to incentivize emitters to phase out coal

Amundi has established a commitment to companies exposed to thermal coal. We call on them to publicly publish a thermal coal phase-out policy in line with Amundi's 2030/2040 phase-out schedule.

For companies:

- (i) Excluded from Amundi's active investment universe, according to our policy and those of the
 - (ii) Whose thermal coal policies are such that Amundi considers them to be lagging behind
- Amundi's policy is to vote against the discharge of the Board or Management or the re-election of the Chairman and certain Directors.

Policy on the exclusion of unconventional fossil fuels

Since 31 December 2022, Amundi has also excluded companies whose activity is more than 30% exposed to the exploration and extraction of unconventional oil and gas (covering "shale oil and gas" and "oil sands").

The case of ESG ETFs and index funds

All ESG ETFs and index funds apply, as far as possible, Amundi's exclusion policy (with the exception of highly concentrated indices).

Continuous improvement plan

Given the wide spectrum of asset classes and regions of the world in which Amundi invests on behalf of third parties, some of which do not yet have the analytical frameworks or data necessary to determine an alignment strategy with the objectives of the Paris Agreement, the implementation of such alignment strategies across all management activities remains a challenge.

In addition, Amundi is an asset management company on behalf of third parties. Its management activity is governed by contracts between Amundi and its clients that determine the investment objective of the management portfolios that clients delegate to Amundi, in particular in terms of the expected level of risk, expected return and diversification constraints and sustainability preferences. Adopting constraints linked to a trajectory of alignment with the Paris Agreement requires the agreement of our representatives to this end. This is why Amundi has initiated a strategy of active dialogue with its clients in order to offer them the opportunity to invest in products that integrate into their strategy characteristics aligned with the objectives of the Paris Agreement and to advise them in this decision-making.

1. Amundi Group's Climate Strategy in support of the Carbon Neutrality Objectives of the Paris Agreement

Since the end of 2020, the Board of Directors of the parent company of the management company has been integrating social and environmental issues into its governance and has been analysing progress on a quarterly basis via key indicators related to climate and ESG;

A dedicated day of strategic seminar allowed the members of the Board to define the strategy to be deployed and the concrete axes for the implementation of the new "Ambition 2025" Societal Plan;

A monthly ESG & Climate Strategy Committee, chaired by the Chief Executive Officer, defines and validates the ESG and climate policy applicable to investments and steers the main strategic projects;

Commitments made as part of the *Net Zero Asset Managers initiative*, to which Amundi joined in July 2021:

A target of 18% of Amundi's assets under management aligned with Net Zero by 2025 (i.e., this 18% will only be made up of funds and mandates with objectives compatible with a Net Zero trajectory by 2050);

-30% carbon intensity (tCO2e/€m revenue) by 2025 and -60% by 2030 for all portfolios subject to the NZIF (*Net Zero Investment Framework*)

- A set of actions, metrics and methodologies through which investors can maximize their contribution to achieving the Net Zero alignment goal;

By 2025, Amundi will also offer open-ended funds for the transition to Net Zero 2050 across all major asset classes; Reach €20 billion in assets under management in so-called impact funds (including funds that make a positive contribution to the objectives of the Paris Agreement);

Strengthening of targeted sectoral exclusion rules;

Amundi invests significant resources to enable climate issues to be better taken into account in portfolio management: Significant increase in the size of its ESG team;

Launch of ALTO* Sustainability, a technological solution for analysis and decision support for investors on environmental and societal issues.

2. Actions deployed and strategic and operational changes introduced in order to integrate climate into the strategy in a sustainable way

Gradual integration of ESG objectives into the performance evaluation of sales representatives and portfolio managers to integrate this dimension into variable compensation. Development of a training program on climate and ESG built with Amundi experts for all staff so that each employee receives appropriate training; Implementation of a rating methodology, in order to assess, in a best-in-class approach, the transition efforts of issuers compared to a Net Zero scenario. The portfolios concerned will have the stated objective of having a better environmental transition profile than that of their reference investment universe by 2025; The transition to a low-carbon economy is one of the strategic pillars of our engagement policy and Amundi has made a commitment to extend to 1,000 additional companies the scope of companies with which we engage in an ongoing dialogue on climate, with the aim of ensuring that these companies define credible strategies to reduce their carbon footprint. to have them voted on at the General Meeting and for their managers to commit part of their remuneration to these strategies.

Amundi will continue to evolve its climate strategy in the coming years, according to the scientific reference scenarios and in close connection with its clients' objectives, both by investing in solutions to accelerate the transition and by gradually aligning its portfolios with the 2050 neutrality objective.

2. The strategy of alignment with long-term objectives related to biodiversity

The fund does not take into account in its strategy the alignment of assets under management with the long-term objectives related to biodiversity set out in the Convention on Biological Diversity adopted on 5 June 1992.

Non-financial indicators

The question of the impact of companies on biodiversity is fundamental. In 2022, Amundi was able to begin the deployment of data that will allow it to calculate the biodiversity footprint of its portfolios.

The metric used to display the biodiversity footprint is the **MSAppb* per bEUR** (1). This makes it possible to quantify the impact of companies' activities and their value chain on their environment. The biodiversity footprint of an entity is obtained by dividing the impact value (**MSA.ppb***) by the enterprise value: the "**MSAppb*/EURb**" is obtained. To allocate a company's impact to a portfolio, this footprint is multiplied by the amount held in the portfolio.

To quantify the biodiversity impacts of each company, the upstream physical inventories necessary for the conduct of its activities are modelled from regionalised and sectorialised turnover, using the EXIOBASE input-output model. These physical flows generate pressures on biodiversity, pressures modelled via the Commotools suite of tools (raw materials analysis tool) developed by CDC Biodiversité. Finally, the **GLOBIO model** (2) makes it possible to translate these pressures into impacts, thanks to **MSA data in %** (3) on different ecosystems.

The output is impacts expressed in **MSA.km²** (4), the surface equivalent of the MSA and a key metric of the **GBS model** (5). These impacts are distinguished into 4 "compartments" according to the biome (terrestrial, aquatic, freshwater) and the temporality of the impact (static, dynamic). To arrive at an aggregated metric, the **MSA.km²** undergoes a double standardization:

the normalization of the differential between land surface (~130 million km²) and freshwater aquatic surface (~10 million km²), at the end of which we obtain an **MSAppb - MSA.km²** translated into parts per billion and expressed as the surface fraction of their respective biome.

the normalization of the differential between static impacts (produced from the initial state to the present day) and dynamic impacts (products over the year of exercise), at the end of which the **MSAppb*** is obtained - a metric that integrates the static impact into the footprint of the year of analysis by amortizing it over the time needed to reconstitute biodiversity on the surface in question (6).

This double standardisation makes it possible to have an indicator that takes into account all the dimensions of the impact of a company's activities on biodiversity.

	Wallet	Index		Wallet	Index
Biodiversity footprint (MSAppb* /€bn)	27	30	Notable (companies and states)	89,04%	100%
			Noted	71,85%	91,96%

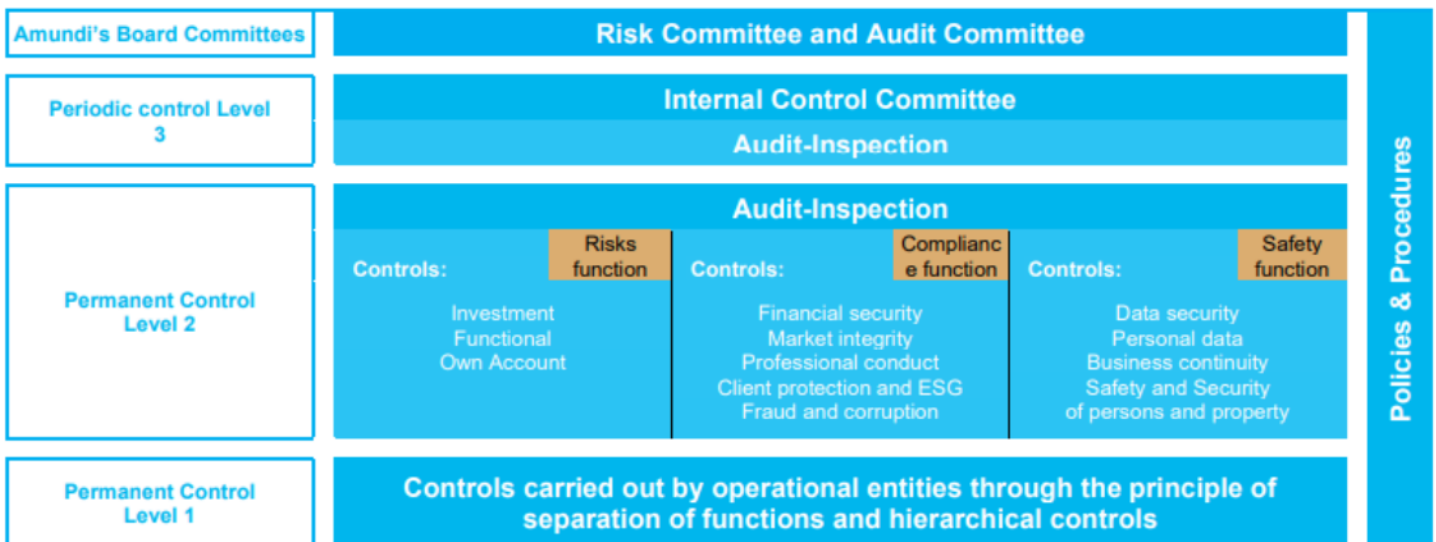

3. Approaches to taking into account environmental, social and governance criteria in risk management

3.1 Identification of environmental, social and governance risks

Within Amundi, the Responsible Investment department is the centre of expertise dedicated to the identification and assessment of risks and opportunities related to ESG issues. This department provides the various entities of the group with the ESG assessments of listed issuers as well as climate data, which are used by portfolio managers.

The table below presents the general mapping of the various ESG risks identified by Amundi, the approach used to assess them and the data providers used to assess and manage the various risks identified. These risks can result in several types of consequences, including but not limited to reputational risks, depreciation of asset value, litigation or portfolio underperformance.

Diagram of the internal control system

3.2 Risk and opportunity assessment

The assessment of the environmental, social and governance risks and opportunities presented in the tables above is done through a proprietary ESG rating assigned to issuers by Amundi's Responsible Investment teams.

Rating of private issuers

Our ESG analysts are specialized by industry. To identify ESG criteria that represent the risks and opportunities within each business sector, they are responsible for:

Track emerging and established ESG topics, as well as trends in each sector;
Assess sustainability risks and opportunities as well as negative exposure to sustainability factors; Select the relevant indicators (KPIs) and assign them the associated weights.

Our ESG analysis methodology is based on a 38-criteria framework that allows us to establish the ESG profile of each sector of activity. Of the 38 criteria considered, 17 are generic, which can be applied to companies regardless of their sector of activity, and 21 are specific, specific to the challenges of certain sectors.

The weighting of ESG criteria is a key element of ESG analysis. The weight attribution model is based on a materiality assessment that can influence the value of a company through 4 vectors: regulation, reputation, the company's development model and operational efficiency.

To weight ESG criteria, the ESG analyst considers the likelihood and magnitude of the impact of each vector on the following 2 materialities (detailed in the table at the end of the section):

1st materiality: Ability of the company to anticipate and manage the risks and opportunities for sustainable development inherent to its industry and its individual circumstances;

2nd materiality: Ability of the management team to manage the potential negative impact of their activities on sustainability factors.

This approach to analysis through both materialities allows analysts to prioritize risks by taking into account the particularities and events specific to each sector.

The weights take into account the intensity of the risk incurred, but also its emerging or established nature as well as its time horizon. Thus, the stakes considered the most material will receive the highest weight.

ESG ratings are calculated based on ESG criteria and weightings determined by analysts, combining them with ESG scores obtained from our external data providers. At each step of the calculation process, the scores are normalized into Z-scores. Z-scores make it possible to compare the results to a "normal" population (deviation of the issuer's score from the average score of the sector, in number of standard deviations). Each issuer is evaluated with a score that is based on the average of its sector, distinguishing the best practices from the worst practices at the industry level. At the end of the process, each company is assigned an ESG score (between -3 and +3) and its equivalent on a scale from A to G, where A is the best score and G is the worst. The D score represents the average scores (from -0.5 to +0.5); Each letter corresponds to a standard deviation.

There is only one ESG rating for each issuer, regardless of the reference universe chosen. The ESG rating is therefore "sector neutral", i.e. no sector is privileged or, on the contrary, disadvantaged.

As part of the implementation of the SFDR regulation, Amundi has drawn up a map of environmental and social factors deemed material in various sectors. This mapping is presented in Amundi Asset Management's LEC 29 report.

		Regulation	Reputation	Development model	Operational effectiveness
1 st materiality	Ability of the company to anticipate and manage the risks and opportunities inherent to its industry and its particular circumstances in the area of sustainable development	✓	✓	✓	✓
2 nd materiality	The management team's ability to manage the potential negative impact of their activities on sustainability factors	✓		✓	

Sovereign Issuer Rating

The objective of the government rating methodology is to assess the ESG performance of sovereign issuers. The E, S and G factors can have an impact on the ability of governments to repay their debts in the medium and long term. They can also reflect how countries are addressing the broad sustainability issues that affect global stability. Amundi's methodology is based on some fifty ESG indicators deemed relevant by Amundi's ESG research to address sustainability risks and sustainability factors. Each indicator can combine multiple data points, from different sources, including open international databases (such as those of the World Bank Group, the United Nations, etc.) or proprietary databases. Amundi has defined the weights of each ESG indicator contributing to the final ESG scores and the different components (E, S and G). The indicators come from an independent supplier. The indicators have been grouped into 8 categories to ensure greater clarity, with each category falling into one of the E, S or G pillars. Similar to the corporate ESG rating scale, the issuer ESG score translates into an ESG rating ranging from A to G.

3.3 Sustainability Risk Management

Amundi's approach to sustainability risk management is based on the following three pillars:

- The exclusion policy, which addresses the most significant ESG risks;
- The integration of ESG ratings into investment processes, which provides a holistic understanding of the company and helps identify its own ESG risks. A benchmark index representative of the investment universe is defined for this purpose. The goal of the portfolio is to have an average ESG score that is higher than the average ESG score of its benchmark. In addition, many individual products or ranges of funds also benefit from greater ESG integration, via greater selectivity, a higher rating level or extra-financial indicators, or thematic selection, etc. ;
- The voting and engagement policy, which helps trigger positive changes in the way companies manage their impact on key sustainability-related topics, and thus mitigate the associated risks.

3.4 Integration of sustainability risks into the entity's conventional risk management framework

Sustainability risks are integrated into Amundi's internal control and risk management framework.

Regarding sustainability risk management, responsibilities are divided between:

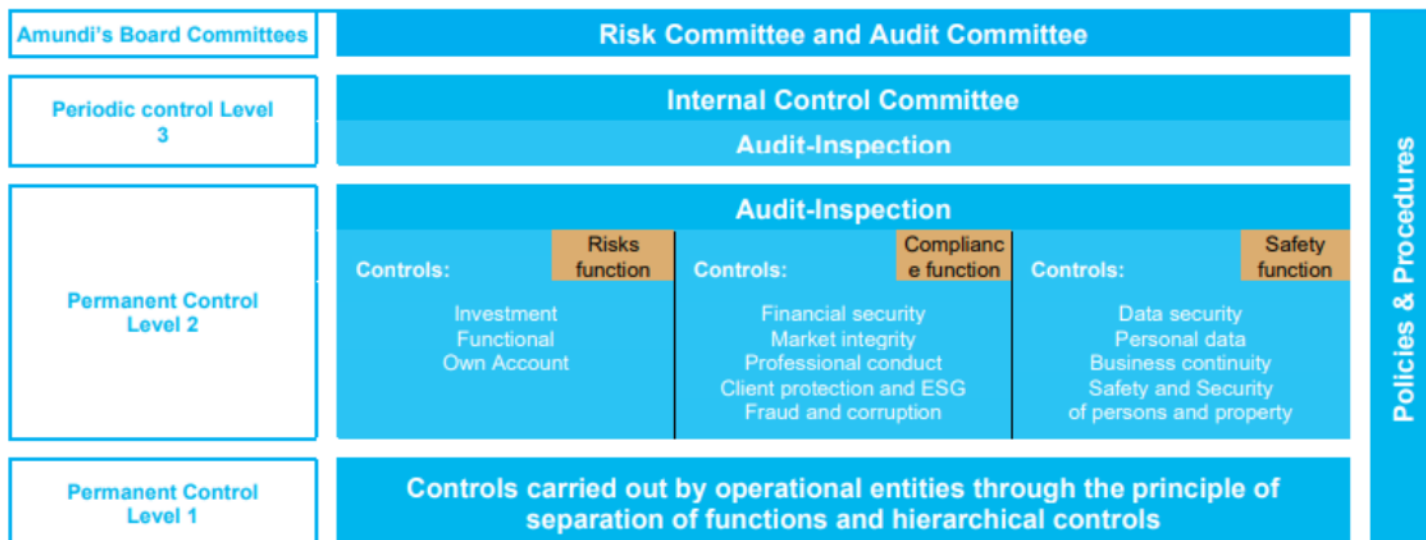

- The first level of control, carried out by the management teams themselves, and
- The second level is carried out by risk management teams, who can continuously check that funds comply with their ESG objectives and constraints.

The Risk Department participates in Amundi's "Responsible Investment" governance system. They monitor compliance with regulatory requirements and risk management related to these topics.

ESG rules are followed by risk management teams, as are other management constraints. They are based on the same tools and procedures and cover our exclusion policies as well as eligibility criteria and fund-specific rules. These rules are tracked in an automated manner from a proprietary control tool. The latter makes it possible to trigger:

- Pre-trade alerts or blocking alerts, especially for exclusion policies;
- Post-trade alerts: managers receive a notification on any exceedances in order to regularise them quickly. The table below details the

internal control system put in place by Amundi.

Diagram of the internal control system

3.5 Frequency of Risk Management Scope Review

Every 18 months, our ESG analysts review the selection and weighting of Amundi's 38 criteria for each sector of activity. This makes it possible to check that the criteria and their weightings remain relevant. We are continually looking to improve our analysis by assessing their materiality.

Amundi's Responsible Investment Policy is updated every year.

3.6 Continuous improvement plan

Amundi strives to improve the assessment and integration of sustainability risks, including climate and environmental risks, in the management of its funds. The aim is to move from a qualitative to a more quantitative approach by identifying the key indicators that represent the most relevant impacts for portfolios, taking into account climate, environmental, social and governance factors.

The project is structured in three stages:

Define a list of sustainability risk indicators, focusing on material risks and their financial impacts on issuers; Progressively implement monitoring of these indicators, assessing their results and setting boundaries on the basis of these indicators;
Improve the ESG risk management framework, including the integration of indicators into risk strategies and investment restrictions.

Our current work consists of identifying the main sustainability risk factors and mapping them to the issuers' financial variables. This work will be completed with the validation and approval of the new framework in line with Amundi's ESG governance.

Preliminary indicators considered include measures that quantify the potential impacts of sustainability risks in terms of financial materiality and the use of "proxies" for reputational risk. The next step, scheduled for the second half of the current year, is to monitor the defined sustainability risk indicators and assess their impact on the portfolios managed. This monitoring will feed into discussions with the portfolio management teams and will be included in the various risk management reports. The final step will focus on improving the ESG risk management framework and possibly setting internal risk alerts or limits based on the indicators. This step is expected to be completed in the first half of 2025.

It should be noted that timelines, indicators and implementation targets are subject to change throughout the project.
