Sub-funds, sub-fund managers and launch dates

As at the financial year ended 31 December 2024, the following sub-funds are available for investment. Please note the sub-fund managers are employed by M&G FA Limited.

M&G European Credit Investment Fund

Launched: 12 April 2011
Sub-fund manager: Gaurav Chatley

M&G European High Yield Credit Investment Fund

Launched: 6 March 2013
Co-sub-fund managers: David Fancourt and Richard Ryan

M&G Investment Grade ABS Fund

Launched: 26 September 2024
Sub-fund manager: Matthew Wardle

M&G Senior Asset Backed Credit Fund

Launched: 28 August 2020
Co-sub-fund managers: Joseph Rice, Matthew Wardle and Scott Ellerby

M&G Sustainable European Credit Investment Fund

Launched: 7 October 2021
Sub-fund manager: Gaurav Chatley

Management and administration

M&G Sustainable Total Return Credit Investment Fund

Launched: 14 October 2021

Sub-fund manager: Richard Ryan

M&G Total Return Credit Investment Fund

Launched: 4 March 2013

Co-sub-fund managers: Richard Ryan and David Fancourt

Important Information

The events in Ukraine continue to bring uncertainty. The Directors continue to monitor the associated risks that are posed to the Fund.

As at the date of this report, the most recent Visa Stamped Prospectus was approved by the CSSF on 20 December 2024.

The sub-funds below are launched and available for investment:

M&G European Credit Investment Fund

M&G European High Yield Credit Investment Fund

M&G Investment Grade ABS Fund

M&G Senior Asset Backed Credit Fund

M&G Sustainable European Credit Investment Fund

M&G Sustainable Total Return Credit Investment Fund

M&G Total Return Credit Investment Fund

Please note that an explanation of key investment terminology is available on our website at mandg.com/private-investor/glossary

Please note there have been share class launches during the year for numerous sub-funds within the umbrella. Please see the long-term performance table in each sub-fund's Financial highlights for the share class launch details.

Directors' report

Directors of the Fund

Philip Jelfs

Mr Jelfs has been a director of the Fund since 23 October 2020. He joined M&G in 2006 and now is Global Head of Product. He is responsible for products throughout the product life-cycle. He is also a Director of M&G Securities Limited, a UK based Authorised Corporate Director. Mr Jelfs has an honours degree in Geography & War Studies from Kings College, London University and an MBA.

Laurence Mumford

Mr Mumford has been a director of the Fund since 28 October 2019 and is Chair of the Fund Board. He is Distribution Governance Director and currently Chair of M&G Securities Limited, a UK based Authorised Corporate Director. Mr Mumford is a member of the Investment Association's Investment Funds Committee which aims to facilitate strategic understanding and issue resolutions across the industry. Mr Mumford is a chartered accountant and joined M&G in 2000 having previously worked at PricewaterhouseCoopers.

Susanne van Dootingh – Independent Director

Ms van Dootingh has been an independent non-executive director of the Fund since 12 January 2023. Ms van Dootingh is an independent non-executive director of several Luxembourg domiciled investment funds and management companies. Ms van Dootingh was previously at State Street Global Advisors (SSGA) from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy EMEA. Prior to this she held various senior positions at SSGA in Global Product Development and Global Fixed Income Strategy. Before joining SSGA in 2002 she was a fixed income strategist and portfolio manager at Fortis Investment Management, Barclays Global Investors, and ABN AMRO Asset Management.

Yves Wagner – Independent Director

Dr. Wagner has been an independent non-executive director of the Fund since inception. Dr. Wagner started his non-academic career with Banque Générale du Luxembourg where he became Director of Asset Management, before becoming the Chief Executive Officer and Board member of Fortis Investments, Luxembourg. He founded 'The Directors' Office' and is today an independent director for several financial institutions. He has been an advisor to the Luxembourg School of Finance (LSF), a business school of the University of Luxembourg.

Dr. Wagner holds a 'Doctorat ès Sciences Economiques' (PhD) from the University of Aix-Marseille III, France.

Dr. Wagner was for many years the Chairman of the Luxembourg Society of Financial Analysts (ALGAFI) and Board Member of the European Federation of Financial Analysts Societies (EFFAS).

Directors' responsibilities

The Directors are responsible for the overall management and control of the Fund in accordance with the Articles. The Directors are further responsible for the implementation of each sub-fund's investment objective and policies, as well as for oversight of the administration and operations of each sub-fund.

The Directors shall have the broadest powers to act in any circumstances on behalf of the Fund, subject to the powers reserved by law to the Shareholders.

The following persons have been appointed as Directors of the Fund:

Philip Jelfs, Director.

Laurence Mumford, Director.

Susanne van Dootingh, Independent Director.

Yves Wagner, Independent Director.

The Directors may appoint one or more committees, authorised delegates or agents to act on their behalf.

Directors' report

Delegation of functions

Management Company

The Fund has appointed M&G Luxembourg S.A., pursuant to the Management Agreement, to serve as its management company within the meaning of the UCI Law.

The Management Company performs certain functions, subject to the overall supervision of the Directors, for the provision of investment management services, administrative services and marketing services to the Fund.

The Management Company acts as the management company of the Fund under the freedom to provide services organised by the UCITS Directive. In accordance with the relevant provisions of the UCI Law, the Management Company will be required to comply with the CSSF Rules (being the rules of the Management Company's 'home member state' for the purposes of the UCI Law) in relation to the organisation of the Management Company, including its delegation arrangements, risk management procedures, prudential rules and supervision, applicable prudential rules regarding the Management Company's management of UCITS authorised under the UCITS Directive and the Management Company's reporting requirements. The Management Company shall comply with the UCI Law as regards the constitution and functioning of the Fund.

The Fund has appointed the Management Company as its corporate and domiciliary agent. The Management Company will be responsible for the domiciliation of the Fund and will perform, inter alia, the functions as foreseen in the Luxembourg law of 31 May 1999 on the domiciliation of companies, as amended from time to time, and, in particular, allow the Fund to establish its registered office at the registered office of the Management Company, and provide facilities necessary for the meetings of the Fund's Directors, officers and/or of the Shareholders of the Fund.

Distributor

M&G Luxembourg S.A. acts as the distributor of Shares.

Investment manager

The Management Company has appointed M&G Investment Management Limited as investment manager to manage and invest the assets of the sub-funds pursuant to their respective investment objectives and policies.

The Investment Manager was appointed pursuant to the Investment Management Agreement. Under the Investment Management Agreement, the Investment Manager has full discretion, subject to the overall review and control of the Management Company and the Directors, to purchase and sell securities and otherwise to manage the assets of the Fund on a discretionary basis. The Investment Manager is also entitled to delegate investment management under the terms set out in the Investment Management Agreement.

Registrar and transfer agent

The Management Company has appointed State Street Bank International GmbH, Luxembourg Branch as registrar and transfer agent of the Fund on behalf of the Board of Directors.

Under the Registrar and Transfer Agency Agreement, the registrar and transfer agent is responsible for processing the issue, redemption and transfer of shares, as well as for the keeping of the register of Shareholders, subject to the overall review and control of the Management Company and the Directors.

Administrator

The Management Company has appointed State Street Bank International GmbH, Luxembourg Branch as the Administrator of the Fund on behalf of the Board of Directors. The Administrator will carry out certain administrative duties related to the administration of the Fund, including the calculation of the Net Asset Value of the shares and the provision of accounting services to the Fund, subject to the overall review and control of the Management Company and the Directors.

Directors' report

Depositary

The Management Company in conjunction with the Board of Directors has appointed State Street Bank International GmbH, Luxembourg Branch as the Depositary.

The Depositary shall perform all of the duties and obligations of a depositary under the UCITS Directive and the Luxembourg implementing laws and regulations with respect to each sub-fund.

The Depositary has been entrusted with the following main functions:

- ensuring that the sale, issue, repurchase, redemption and cancellation of shares are carried out in accordance with applicable law and the Articles;
- ensuring that the value of the shares is calculated in accordance with applicable law and the Articles;
- carrying out the instructions of the Management Company or the Fund (as the case may be), unless such instructions conflict with applicable law or the Articles;
- ensuring that, in transactions involving the assets of the Fund, any consideration is remitted to the Fund within the usual time limits;
- ensuring that the income of the Fund is applied in accordance with applicable law and the Articles;
- monitoring and oversight of the Fund's cash and cashflows in accordance with the UCITS Directive and the Luxembourg implementing laws and regulations; and
- safe-keeping of the Fund's assets, including the safe-keeping of financial instruments that can be held in custody and ownership verification and record-keeping in relation to other assets.

Fair Valuation and liquidity

There have not been any significant difficulties in valuing the portfolios during and since the year end.

Directors' statement

This report has been prepared in accordance with the requirements of the UCITS Directive 2009/65/EC of the European Parliament and Council of 13 July 2009.

Grand Duchy of Luxembourg

REPORT OF THE *RÉVISEUR D'ENTREPRISES AGRÉÉ*

Opinion

We have audited the financial statements of European Specialist Investment Funds (the "Fund") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at December 31, 2024 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at December 31, 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (Law of July 23, 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "*Commission de Surveillance du Secteur Financier*" (CSSF). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "*Responsibilities of the réviseur d'entreprises agréé*" for the Audit of the Financial Statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the *réviseur d'entreprises agréé* for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law dated July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, *Cabinet de révision agréé*

Jean-Philippe Bachelet, *Réviseur d'entreprises agréé*
Partner

April 17, 2025

Market review

2024 was characterised by stronger-than-expected economic growth, prompting significant gains across many asset classes, most notably US equities. Inflation eased across major economies, punctuated by occasional upside surprises at both the beginning and end of the year. Central banks, after a prolonged period of monetary tightening, began to cut interest rates, which significantly bolstered financial markets. This policy shift contributed to a favourable investment environment, despite initial delays in rate cuts that had tempered market optimism earlier in the year.

Inflation stayed above central bank targets but showed a general easing across major economies. In the US, headline inflation inched up to 2.7% annualised in November, down from its peak of 3.5% in March. The UK's 12-month headline inflation rate hit an eight-month high of 2.6% in November, although this still represented a significant reduction from the 4% rate recorded at the start of the year. The eurozone's inflation rate remained below 3% throughout the year, reaching 2.2% year-on-year in November.

Switzerland initiated the rate easing cycle among major central banks in March, followed by the European Central Bank (ECB) in June, which implemented a total of four rate cuts over the course of the year. The Bank of England (BoE) and the Federal Reserve (Fed) kept rates unchanged until August and September, respectively. The Fed implemented three rate cuts over the last two quarters, concluding the year with a benchmark rate of 4.25-4.5%. The BoE enacted two rate cuts, with borrowing costs ending the year at 4.75%. Meanwhile, the Bank of Japan (BoJ) ended its negative interest rate policy in March, raising rates for the first time in 17 years from -0.1% to a range of 0%-0.1% in response to rising consumer prices and wages. In July, with inflation picking up, the BoJ further increased its short-term target to 0.25%, a decision that precipitated a sharp market sell-off.

Global stockmarkets registered significant gains during the 12 months under review, although there were some bumps along the way. Investor sentiment was largely buoyed by receding inflationary pressures, robust macroeconomic indicators, the prospect of oncoming

rate cuts and ongoing excitement about the growth of artificial intelligence (AI). For example, chipmaker Nvidia, which is considered to be a key player in the development of AI, saw its share price rise over 170% in 2024, driven by healthy demand for its chips. After a positive start to the year, political and geopolitical events introduced some market volatility. Tensions in the Middle East increased in April, and in June political uncertainty in France following a snap election weighed on market performance.

During the period, economic data points heavily influenced investor sentiment and in July weak economic data in the US fuelled fears of a recession. This situation came to a head in August when disappointing jobs figures combined with an unexpected rate hike in Japan to trigger a sudden and sharp market sell-off, particular in Japanese assets. The turmoil proved to be short-lived, however. Markets were calmed by more encouraging economic data and reassurances from central bankers. Notably, Jerome Powell, Fed Chair, stated it was time for policy to adjust; the Fed proceeded to cut interest rates in September.

The other major event in the review period was the US presidential election in November. Donald Trump's convincing victory spurred a significant equity rally, despite ongoing geopolitical and fiscal policy concerns. The year ended on a weak note, however, as markets fell in November when the Fed forecast smaller amounts of rate cuts for the year ahead due to persistent inflation.

Against this backdrop, the global equity market, represented by the MSCI All Country World Index, registered gains of 18.0% in the 12 months, in US dollars, rising 25.9% in euros. The US equity market led the way, with the S&P 500 Index delivering a total return of 25.0% over the period, in US dollars, marking the first instance since the late 1990s of consecutive annual returns exceeding 20% (in US dollars). This remarkable performance was largely fuelled by the so-called 'Magnificent Seven' (Mag 7) stocks, a group of mega-cap US stocks which soared nearly 70% (in US dollars). Japan's stockmarket also performed well, despite the volatility in August. The Nikkei broke its

Market review

1989 record and returned 21.3%, in local currency. Returns for overseas investors were diminished by significant weakening of the yen against other currencies, particularly the dollar.

European, Asian ex Japan and Emerging Market equities delivered positive returns in the review period but were behind the broader global index and US equities. In Europe, Italy, Germany and Spain returned double-digits gains (in euros). Asian equities were bolstered by strong performances from China and Taiwan. After a sluggish first half of the year, Chinese equities rallied in October following a stimulus package announcement by the government to support the economy, while Taiwan's stockmarket benefited from strong performance by technology stocks. In emerging markets, Argentina emerged as the standout performer with an impressive annual return of 117.1% (in US dollars) as investors were cheered by the economic policies of President Milei.

From a sector perspective, information technology, driven by the AI boom, delivered strong returns. Financials and consumer discretionary followed suit, with financials benefiting from a strong economy, improving fundamentals and potential deregulation following Trump's election, while resilient consumer spending boosted consumer discretionary. Conversely, energy and materials were notable laggards, while defensive areas such as consumer staples and healthcare were also among the weakest areas.

While stockmarkets rallied, it was a less positive year for bonds. The rally that had invigorated bond markets towards the end of 2023 lost momentum in the first quarter, as the strength of the US economy and persistent inflation led market participants to push back their anticipated timeline for central bank rate cuts. The prospect of 'higher for longer' interest rates pushed bond yields higher. (Bond yields and prices move in opposite directions). US government bonds (Treasuries) returned 0.5%, with the yield on the 10-year benchmark Treasury ultimately closing the year at 4.6%, up from 3.9% 12 months earlier. German government bonds also

returned 0.5% in the period, whereas UK government bonds (gilts) fell 3.5% over the year (returns in local currency).

Corporate bonds generally outperformed their government counterparts. Global corporate bonds ended the period up 3.4%, as credit spreads, the amount of compensation investors expect for buying corporate debt compared to a risk-free government bond, narrowed. Higher risk high yield bonds were the best performers, delivering a return of 8.9% over the 12-month period. In emerging markets, US dollar-denominated bonds, both corporate and government, rose, whereas government bonds in local currencies declined, on account of the appreciation of the US dollar.

Commodities largely underperformed in 2024, but gold stood out as a 'safe haven', achieving its strongest annual gain since 2010. This 27.1% rise was driven by heightened investor demand amid geopolitical tensions and market volatility. Brent crude oil prices marked their second consecutive annual decline in 2024 – they initially rose in the first quarter due to supply concerns but ultimately fell by 4% over the year (in US dollars).

In terms of currencies, the US dollar appreciated against all major currencies, supported by the prospect of sustained high interest rates in the US.

M&G Investment Management Limited
31 December 2024

Investment review (unaudited)

For the year ended 31 December 2024

The M&G European Credit Investment Fund ('the sub-fund') aims to take advantage of opportunities primarily in investment grade corporate bonds denominated in Euros. The sub-fund may also invest in GBP, USD and CHF denominated debt, and use futures and swaps for efficient portfolio management. The sub-fund utilises M&G's global research and fund management capabilities to identify fundamental value in corporate and asset backed bonds. The sub-fund focuses on credit management; currency, interest rate, and other macro-economic risks are closely controlled. The sub-fund aims to outperform the ICE BofA Euro Corporate Index.

The sub-fund outperformed the benchmark by 77 basis points in Q1 2024. The portfolio benefitted from being overweight in the real estate, banking and covered bond sectors relative to the benchmark, however being underweight the telecommunications, consumer goods and healthcare sectors was a detractor to performance. In terms of individual positions, overweight exposure to CPI Property, Heimstaden Bostad and AroundTown were positive contributors to performance, whilst an underweight position in Axa, was a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

The sub-fund outperformed the benchmark by 15 basis points in Q2 2024. The portfolio benefitted from being overweight in the real estate, banking and covered bond sectors relative to the benchmark, however being overweight the asset backed sector was a detractor to performance. In terms of individual positions, overweight exposure to SBB, CPI Property Group and AroundTown were positive contributors to performance, whilst an overweight position in Thames Water was a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

The sub-fund outperformed the benchmark by 48 basis points in Q3 2024. The portfolio benefitted from being overweight in the real estate sector, and underweight the automotive sector, relative to the benchmark, however being overweight the asset backed security sector, and underweight the telecommunications and healthcare sectors were detractors to performance. In terms of individual positions, overweight exposure to CPI Property Group, AroundTown and Heimstaden Bostad were positive contributors to performance, whilst an overweight position in Thames Water and Adler Group were a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

The sub-fund underperformed the benchmark by 3 basis points in Q4 2024. The sub-fund benefitted from being overweight the utility, covered bond and real estate sectors relative to the benchmark, however being underweight the telecommunications, consumer goods and basic industry sectors were a detractor to performance. In terms of individual positions, overweight exposure to CPI Property Group and AroundTown were positive contributors to performance, whilst an overweight position in SBB was a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

Credit markets are uniformly expensive across asset classes relative to historical spreads, with very little downside risk being priced in. Simultaneously, we have seen increased political uncertainty in Germany and France, whilst concerns regarding high levels of global government debt, future borrowing and broader geopolitical tensions remain. We believe that a patient and highly selective approach to fixed income investing is the best strategy to take advantage of opportunities in today's market.

Investment review (unaudited)

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

^a Fair valued.

All securities are on an official stock exchange listing or dealt on another regulated market except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the preredempted date for those types of securities.

Counterparty exposure

Counterparty exposure

Counterparty	Counterparty exposures		
	Forward currency contracts €'000	Futures €'000	Cash collateral pledged €'000
Barclays Bank London	20	0	0
HSBC Bank PLC	29	0	310
JPMorgan London	0	9,299	0
State Street Bank and Trust Company	2,005	0	0

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

Investment review (unaudited)

For the year ended 31 December 2024

The M&G European High Yield Credit Investment Fund ('the sub-fund') invests in a diversified portfolio of high yield bonds primarily denominated in Euros whilst meeting ESG criteria. The sub-fund utilises M&G's global research and fixed income fund management capabilities to identify fundamental value in Euro corporate and asset backed bonds, and may allocate to non-Euro denominated debt (USD, GBP and CHF). The sub-fund aims to outperform the benchmark ICE BofA European Currency Developed Markets Non-Financial High Yield 2% Constrained Index. The sub-fund focuses on credit management, while currency, interest rate, and other macroeconomic risks are closely controlled.

The sub-fund outperformed the index by 72 basis points (Euro 'E' Accumulation share class, gross of fees) in Q1 2024. From a sector perspective, the sub-fund's underweight position relative to the benchmark in the technology & electronics sector contributed positively to performance, whilst underweight positions to the basic industry, services and leisure sectors were negative contributors. From a stock selection perspective, the manager's overweight position in Heimstaden Bostad and CPI Property Group and underweight positions in ATOS were positive contributors to performance, whilst overweight positions in Thames Water and Grifolds detracted from performance.

The sub-fund outperformed the index by 26 basis points (Euro 'E' Accumulation share class, gross of fees) in Q2 2024. From a sector perspective, the sub-fund's overweight position relative to the benchmark in the telecommunication sector contributed positively to performance, whilst underweight positions in the leisure, basic industry, and retail sectors were negative contributors. From a stock selection perspective, the manager's overweight position in SBB, AroundTown and DDMRE were positive contributors to performance, whilst overweight positions in Thames Water and Adler Group detracted from performance.

The sub-fund outperformed the index by 29 basis points (Euro 'E' Accumulation share class, gross of fees) in Q3 2024. From a sector perspective, the sub-fund's overweight position relative to the benchmark in the telecommunication sector contributed positively to performance, whilst underweight positions in the real estate, basic industry, and services sectors were negative contributors. From a stock selection perspective, the manager's overweight positions in Heimstaden and CPI Property Group and underweight position in SBB were positive contributors to performance, whilst the overweight position in Adler Group and Thames Water detracted from performance.

The sub-fund outperformed the index by 40 basis points (Euro 'E' Accumulation share class, gross of fees) in Q4 2024. From a sector perspective, the sub-fund's overweight position relative to the benchmark in the telecommunication and automotive sectors contributed positively to performance, whilst the underweight position in basic industry was a negative contributor. From a stock selection perspective, the manager's underweight positions in Heimstaden and Altice (both France and International) were positive contributors to performance, whilst the underweight position in SBB detracted from performance.

Credit markets are uniformly expensive across asset classes relative to historical spreads, with very little downside risk being priced in. Simultaneously, we have seen increased political uncertainty in Germany and France, whilst concerns regarding high levels of global government debt, future borrowing and broader geopolitical tensions remain. We believe that a patient and highly selective approach to fixed income investing is the best strategy to take advantage of opportunities in today's market.

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Investment review (unaudited)

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

^a Defaulted bond.

^b Fair valued.

All securities are on an official stock exchange listing or dealt on another regulated market except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

Counterparty exposure

Counterparty exposure

Counterparty	Counterparty exposures		
	Forward currency contracts €'000	Futures €'000	Cash collateral pledged €'000
Barclays Bank London	61	0	0
HSBC Bank PLC	11	0	0
JPMorgan London	0	72	660
State Street Bank and Trust Company	1	0	0
State Street Bank and Trust Company, London Branch	4	0	0

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

Investment review (unaudited)

For the period from 26 September 2024 (launch date of the sub-fund) to 31 December 2024

The M&G Investment Grade ABS Fund aims to provide a higher total return (capital growth plus income) than that of the Benchmark over any three-year period, net of fees while applying ESG Criteria. The sub-fund invests in a diversified pool of investment grade Asset-Backed securities (ABS) and other floating rate instruments denominated in any currency. The types of ABS the sub-fund invests in may include, but are not limited to, Residential Mortgage-Backed Securities (RMBS), Commercial Mortgage-Backed Securities (CMBS), Collateralised Loan Obligations (CLO), Whole-Business Securitisations (WBS), Consumer ABS backed by such receivables as consumer loans, credit card debt, auto or equipment loans and leases and student loans. Other ABS may be backed by loans or receivables to corporates. For more information on the ESG Criteria of the sub-fund, please refer to the prospectus.

The sub-fund outperformed cash by 0.61% (Sterling 'EI' Accumulation share class, gross of fees) during Q4 2024. This was primarily driven by the sub-fund's exposure to UK RMBS, European CLOs, Consumer ABS and CMBS which performed well during the quarter.

Following a record year of issuance in 2024, supported by healthy demand for bonds, the investment thesis remains very much intact looking ahead to 2025 with European ABS continuing to look attractive due to its low correlation with other asset classes, very defensive credit characteristics, floating rate income and strong relative value to fixed income comparable assets. Looking ahead to Q1, early conversations with arranging banks suggests a continuation of healthy and diverse primary market supply.

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

Investment review (unaudited)

For the year ended 31 December 2024

The M&G Senior Asset Backed Credit Fund aims to provide a higher total return (capital growth plus income) than that of the Benchmark over any three-year period, net of fees while applying ESG Criteria. The sub-fund invests in a diversified pool of investment grade Asset-Backed Securities (ABS) and other floating rate instruments denominated in any currency. The types of ABS the sub-fund invests in may include, but are not limited to, Residential Mortgage Backed Securities (RMBS), Commercial Mortgage Backed Securities (CMBS), Collateralised Loan Obligations (CLO), Whole Business Securitisations (WBS), Consumer ABS backed by such receivables as consumer loans, credit card debt, auto or equipment loans and leases and student loans. Other ABS may be backed by loans or receivables to corporates. In usual market conditions, the sub-fund will invest predominantly in senior tranches of ABS, with 80% expected to be of a credit rating of at least AA- or higher. For more information on the ESG Criteria of the sub-fund, please refer to the prospectus.

The sub-fund outperformed cash by 0.65% (Sterling 'A' Accumulation share class, gross of fees) during Q1 2024. This was primarily driven by the sub-fund's exposure to European CLOs and UK RMBS which performed well during the quarter.

The sub-fund outperformed cash by 0.59% (Sterling 'A' Accumulation share class, gross of fees) during Q2 2024. This was primarily driven by the sub-fund's exposure to European CLOs and UK RMBS which performed well during the quarter.

The sub-fund outperformed cash by 0.29% (Sterling 'A' Accumulation share class, gross of fees) during Q3 2024. This was primarily driven by the sub-fund's exposure to UK RMBS, European CLOs and Consumer ABS which performed well during the quarter.

The sub-fund outperformed cash by 0.32% (Sterling 'A' Accumulation share class, gross of fees) during Q4 2024. This was primarily driven by the sub-fund's

exposure to UK and Australian RMBS, European CLOs and Consumer ABS which performed well during the quarter.

Following a record year of issuance in 2024, supported by healthy demand for bonds, the investment thesis remains very much intact looking ahead to 2025 with European ABS continuing to look attractive due to its low correlation with other asset classes, very defensive credit characteristics, floating rate income and strong relative value to fixed income comparable assets. Looking ahead to Q1, early conversations with arranging banks suggests a continuation of healthy and diverse primary market supply.

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

Statement of investments

Statement of investments (continued)

Portfolio summary	Market value £'000	% of net assets
Investment assets		
Debt securities	776,154	96.11
Unrealised gains on forward currency contracts	8,420	1.02
Total Investment assets	784,574	97.13
Investment liabilities		
Unrealised losses on forward currency contracts	(4,935)	(0.59)
Total Investment liabilities	(4,935)	(0.59)
Portfolio of investments	779,639	96.54
Cash equivalents	16,907	2.10
Net other assets/(liabilities)	10,997	1.36
Net assets	807,543	100.00

All securities are on an official stock exchange listing or dealt on another regulated market except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

Counterparty exposure

Counterparty exposure

Counterparty	Counterparty exposures
	Forward currency contracts £'000
Barclays Bank London	3,057
State Street Bank and Trust Company	974
State Street Bank and Trust Company, London Branch	4,494

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class
Euro					
Class 'A-H' Accumulation	+5.5	+3.3	n/a	+2.8	14.06.21
Class 'A-H' Distribution	+5.5	+3.4	n/a	+3.1	27.09.21
Class 'B-H' Accumulation	n/a	n/a	n/a	+0.6 ^a	21.11.24

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios^a (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 5 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 December 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 9 to the Financial Statements (also known as the price per share) at 31 December 2024 and Total Expense Ratios^a (TER) for the year ended to 31 December 2024.

Investment review (unaudited)

For the year ended 31 December 2024

The M&G Sustainable European Credit Investment Fund ('the sub-fund') aims to take advantage of opportunities primarily in investment grade corporate bonds denominated in Euros and applies a number of ESG focused exclusions to ensure all securities meet our minimum ESG and sustainability criteria. The sub-fund may also invest in GBP, USD and CHF denominated debt, and use futures and swaps for efficient portfolio management. The sub-fund utilises M&G's global research and fund management capabilities to identify fundamental value in corporate and asset backed bonds. The sub-fund focuses on credit management; currency, interest rate and other macro-economic risks are closely controlled. The sub-fund aims to outperform the benchmark Bloomberg Barclays MSCI Euro Corporate ESG BB+ Sustainable SRI Bond Index.

The sub-fund outperformed the benchmark by 93 basis points in Q1 2024. The portfolio benefitted from being overweight in the real estate, banking and covered bond sectors relative to the benchmark, however being underweight the telecommunications, consumer goods and healthcare sectors was a detractor to performance. In terms of individual positions, overweight exposure to CPI Property, Heimstaden Bostad and AroundTown were positive contributors to performance, whilst an underweight position in Generali, was a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

The sub-fund outperformed the benchmark by 6 basis points in Q2 2024. The portfolio benefitted from being overweight in the real estate and covered bonds, as well as being underweight the healthcare sector relative to the benchmark, however being overweight the asset backed was a detractor to performance. In terms of individual positions, overweight exposure to SBB, CPI Property Group and Grand City Properties were positive contributors to performance, whilst an overweight position in Thames Water was a drag on

returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

The sub-fund outperformed the benchmark by 40 basis points in Q3 2024. The portfolio benefitted from being overweight in the real estate and covered bond sectors relative to the benchmark, however being overweight the asset backed sector, and underweight the healthcare and telecommunication sectors were detractors to performance. In terms of individual positions, overweight exposure to Heimstaden Bostad, CPI Property Group and AroundTown were positive contributors to performance, whilst an overweight position in Thames Water was a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

The sub-fund underperformed the benchmark by 3 basis points in Q4 2024. The portfolio benefitted from being overweight the utility, covered bond and real estate sectors relative to the benchmark, however being underweight the telecommunications, consumer goods and basic industry sectors were a detractor to performance. In terms of individual positions, overweight exposure to CPI Property Group and AroundTown were positive contributors to performance, whilst an overweight position in SBB was a drag on returns. As yield curve, duration and currency exposures are fully hedged to benchmark levels, there was no material impact on performance from these factors.

Credit markets are uniformly expensive across asset classes relative to historical spreads, with very little downside risk being priced in. Simultaneously, we have seen increased political uncertainty in Germany and France, whilst concerns regarding high levels of global government debt, future borrowing and broader geopolitical tensions remain. We believe that a patient and highly selective approach to fixed income investing is the best strategy to take advantage of opportunities in today's market.

Investment review (unaudited)

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

^a Fair valued.

All securities are on an official stock exchange listing or dealt on another regulated market except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

Counterparty exposure

Counterparty exposure

Counterparty	Counterparty exposures	
	Forward currency contracts €'000	Futures €'000
Barclays Bank London	5	0
HSBC Bank PLC	6	0
JPMorgan London	0	2,881
State Street Bank and Trust Company	7	0
State Street Bank and Trust Company, London Branch	2	0

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

Investment review (unaudited)

For the year ended 31 December 2024

The M&G Sustainable Total Return Credit Investment Fund ('the sub-fund') aims to maximise total return principally by exploiting long term risk premia. The sub-fund will aim to provide investors with attractive returns from capital and income from a diversified pool of debt and debt like assets, and applies a number of ESG focused exclusions to ensure all securities meet our minimum ESG and sustainability criteria. These will include, but are not limited to, debt instruments with a fixed, variable or floating rate coupon. The investment manager will identify opportunities at the market, sector, issuer or security level to enhance returns amongst fixed income asset classes, such as investment grade and high yield corporate bonds and on occasion, government bonds. Duration, yield curve and currency investment strategies may also be used. There is no geographic limitation to the investment universe. The sub-fund aims to outperform the benchmark 1 – Month EURIBOR.

The sub-fund delivered a 2.00% return above its cash benchmark (Sterling 'AIH' Accumulation share class, gross of fees) during Q1 2024. The primary contributors to performance were exposures to bonds in the industrial and financial sectors, whilst negative contributors to performance were exposure to bonds in the utility sector. The largest individual positive contributors were CPI Property Group, Heimstaden Bostad and AroundTown. Notable detractors were Thames Water, Grifols and Intrum.

The sub-fund delivered a 0.57% return above its cash benchmark (Sterling 'AIH' Accumulation share class, gross of fees) during Q2 2024. The primary contributors to performance were exposures to bonds in the industrial and financial sectors, whilst exposure to the utility sector contributed negatively. The largest individual positive contributors were SBB, AroundTown and Triodos Bank. Notable detractors were Thames Water, Southern Water and Paramount Global.

The sub-fund delivered a 1.01% return above its cash benchmark (Sterling 'AIH' Accumulation share class, gross of fees) during Q3 2024. The primary contributors to performance were exposures to bonds in the industrial and financial sectors, whilst exposure to the securitised sector contributed negatively. The largest individual positive contributors were CPI Property, Heimstaden Bostad and AroundTown. A notable detractor was Thames Water.

The sub-fund delivered a 1.03% return above its cash benchmark (Sterling 'AIH' Accumulation share class, gross of fees) during Q4 2024. All sectors contributed positively, but the primary contributors to performance were exposures to bonds in the industrial and financial sectors, of which, the largest individual positive contributors were Spirit IP Cayman, CPI Property and AroundTown. A notable detractor was SBB.

Credit markets are uniformly expensive across asset classes relative to historical spreads, with very little downside risk being priced in. Simultaneously, we have seen increased political uncertainty in Germany and France, whilst concerns regarding high levels of global government debt, future borrowing and broader geopolitical tensions remain. We believe that a patient and highly selective approach to fixed income investing is the best strategy to take advantage of opportunities in today's market.

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Investment review (unaudited)

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 8 fund under SFDR. Information related to environmental and social characteristics promoted by the sub-fund required to be disclosed under SFDR is available in Annex 1.

^a Defaulted bond.

All securities are on an official stock exchange listing or dealt on another regulated market except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

The accompanying notes to the financial statements are an integral part of these financial statements.

Counterparty exposure

Counterparty exposure

Counterparty	Counterparty exposures		
	Forward currency contracts €'000	Futures €'000	Cash collateral pledged €'000
Barclays Bank London	30	0	600
HSBC Bank PLC	0	0	1,300
JPMorgan London	0	7,638	0
State Street Bank and Trust Company	13,403	0	0

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

	One year %	Three years % pa	Five years % pa	Since launch % pa	Launch date of the sub-fund share class

Financial highlights

Shares in issue, Net Asset Values (NAV) and Total Expense Ratios^a (TER)

The various classes of shares in issue have equivalent rights in the Fund, but carry different features and charging structures detailed in note 5 which are more fully described in the Fund's Prospectus.

The following table shows shares in issue at 31 December 2024, Net Asset Values (NAV) inclusive of any swing price adjustment as described in note 9 to the Financial Statements (also known as the price per share) at 31 December 2024 and Total Expense Ratios^a (TER) for the year ended to 31 December 2024.

Investment review (unaudited)

For the year ended 31 December 2024

The M&G Total Return Credit Investment Fund ('the sub-fund') aims to maximise total return principally by exploiting long-term risk premia. The sub-fund will aim to provide investors with attractive returns from capital and income from a diversified pool of debt and debt like assets. These will include, but are not limited to, debt instruments with a fixed, variable or floating rate coupon. The investment manager will identify opportunities at the market, sector, issuer or security level to enhance returns amongst fixed income asset classes, such as investment grade and high yield corporate bonds and on occasion, government bonds. Duration, yield curve and currency investment strategies may also be used. There is no geographic limitation to the investment universe. The sub-fund aims to outperform the benchmark 1 – Month EURIBOR.

The sub-fund delivered a 2.20% return above its cash benchmark (Sterling 'A' Accumulation share class, gross of fees) during Q1 2024. The primary contributors to performance were exposures to bonds in the industrial and financial sectors, whilst negative contributors to performance were exposure to bonds in the utility sector. The largest individual positive contributors were CPI Property Group, AroundTown and Heimstaden Bostad. Notable detractors were Intrum, Grifols and Thames Water.

The sub-fund delivered a 0.65% return above its cash benchmark (Sterling 'A' Accumulation share class, gross of fees) during Q2 2024. The primary contributors to performance were exposures to bonds in the industrial and financial sectors, whilst exposure to the utility sector contributed negatively. The largest individual positive contributors were SBB, AroundTown and DEMIRE. Notable detractors were Thames Water, Southern Water and Paramount Global.

The sub-fund delivered a 1.02% return above its cash benchmark (Sterling 'A' Accumulation share class, gross of fees) during Q3 2024. The primary contributors to performance were exposures to bonds in the industrial and financial sectors, whilst exposure to the securised

sector contributed negatively. The largest individual positive contributors were CPI Property, Heimstaden Bostad and AroundTown. A notable detractors was Thames Water.

The sub-fund delivered a 1.10% return above its cash benchmark (Sterling 'A' Accumulation share class, gross of fees) during Q4 2024. All sectors contributed positively, but the primary contributors to performance were exposures to bonds in the industrial and financial sectors, of which, the largest individual positive contributors were Spirit Airlines, CPI Property Group and AroundTown. A notable detractor was SBB.

Credit markets are uniformly expensive across asset classes relative to historical spreads, with very little downside risk being priced in. Simultaneously, we have seen increased political uncertainty in Germany and France, whilst concerns regarding high levels of global government debt, future borrowing and broader geopolitical tensions remain. We believe that a patient and highly selective approach to fixed income investing is the best strategy to take advantage of opportunities in today's market.

Investment review information as at 31 December 2024.

Please note that the views expressed in this Report should not be taken as a recommendation or advice on how the sub-fund or any holding mentioned in the Report is likely to perform. If you wish to obtain financial advice as to whether an investment is suitable for your needs, you should consult a Financial Adviser.

Compliance of the sub-fund with the Sustainable Finance Disclosure Regulation ('SFDR') and the EU Taxonomy Regulation

The sub-fund is categorised as an Article 6 fund under SFDR. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

^a Defaulted bond.

^b Fair valued.

All securities are on an official stock exchange listing or dealt on another regulated market except where referenced.

Interest rates represent the stated coupon rate.

Maturity dates represent either the stated date on the security or the prerefunded date for those types of securities.

Counterparty exposure

Counterparty exposure

Counterparty	Counterparty exposures		
	Forward currency contracts €'000	Futures €'000	Cash collateral pledged €'000
Barclays Bank London	52	0	1,455
BNP Paribas	0	0	4,890
JPMorgan London	0	23,143	0
State Street Bank and Trust Company	21,419	0	0

Exposure represents the sub-fund's exposure to that counterparty.

Financial highlights

Sub-fund performance (unaudited)

Please note past performance is not a guide to future performance and the value of investments, and the income from them, will fluctuate. This will cause the sub-fund price to fall as well as rise and you may not get back the original amount you invested.

To give an indication of the performance of the sub-fund, the following table shows the compound rate of return, per annum, over the period. Calculated on a price to price basis with income reinvested.

Long-term performance by share class as at 31 December 2024

Notes to the financial statements

1 General information

European Specialist Investment Funds (the 'Fund') is an investment company organised as a *société anonyme* under the laws of the Grand Duchy of Luxembourg and qualifies as a *société d'investissement à capital variable* ('SICAV'). The Fund was incorporated in Luxembourg on 8 March 2011. The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities ('UCITS') under Part I of the amended Law of 17 December 2010 relating to UCITS and is registered with the Luxembourg Trade and Company Register under number B159397.

2 Basis of preparation

These financial statements have been prepared and presented in accordance with generally accepted accounting principles in Luxembourg and with the legal and regulatory requirements relating to the preparation and presentation of the financial statements as prescribed by the Luxembourg authorities for Luxembourg investment funds including the following significant accounting policies.

The financial statements have been prepared under a going concern assumption as deemed appropriate by the Board of Directors.

3 Significant accounting policies

a) Security valuation

The value of transferable securities, money market instruments and any other assets which are listed or dealt in on any stock exchange are based on the latest available closing price. Transferable securities, money market instruments and any other assets traded on any other regulated market are valued in a manner as similar as possible to that provided for listed securities.

For non-listed assets or assets not traded or dealt in on any stock exchange or other regulated market, as well as listed or non-listed assets on such other market for which no valuation price is available, or assets for which the listed prices are not representative of the fair market value, the value thereof shall be determined as the appropriate fair value of the asset by the Board of Directors.

b) Forward currency contracts

Open forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the relevant valuation date. The fair value of open forward foreign exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the valuation date. The unrealised appreciation/(depreciation) on open forward foreign exchange contracts is reported under 'Investment assets' and 'Investment liabilities' as appropriate in the Statement of net assets.

When the contracts are closed, realised gains/(losses) arising from closed contract transactions and change in unrealised gains/(losses) as a result thereof are recorded as 'Forward currency contracts' under each respective section in the Statement of operations and changes in net assets.

c) Futures contracts

Upon entering into a futures contract, a sub-fund is required to deposit with its futures broker, an amount of cash or securities in accordance with the initial margin requirements of the broker or exchange. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. The sub-fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract (variation margin).

Notes to the financial statements

For open futures, changes in the value of the contract are recognised under 'Investment assets' and 'Investment liabilities' by 'marking-to market' the value of the contract at the Statement of net assets date. When a contract is closed, the difference between the proceeds (or cost) of the closing transaction and the original transaction is recorded as a realised gains/(losses) in the Statement of operations and changes in net assets. Change in unrealised gains/(losses) as a result thereof is included in the Statement of operations and changes in net assets under 'Futures contracts'.

d) Credit default swaps and credit default index swaps

Credit default swaps and credit default index swaps are marked-to-market upon daily prices obtained from third party pricing agents and verified against the value from the counterparty. The unrealised appreciation/(depreciation) on credit default swaps and on credit default index swaps is reported under 'Investment assets' and 'Investment liabilities' as appropriate in the Statement of net assets. The swap premium is recorded as part of the cost of the swap contract.

When the contracts are closed, realised gains/(losses) arising from such transactions and net change in unrealised gains/(losses) as a result thereof are recorded under 'Swap contracts' of respective sections.

e) Interest rate swaps

Interest rate swaps are marked-to-market upon daily prices obtained from third party pricing agents and verified against the value from the counterparty. The unrealised appreciation/(depreciation) on interest rate swaps are reported under 'Investment assets' and 'Investment liabilities' as appropriate in the Statement of net assets.

When the contracts are closed, realised gains/(losses) arising from such transactions and net change in unrealised gains/(losses) as a result thereof are recorded under 'Swap contracts' of respective sections.

f) Reverse repurchase and repurchase agreement transactions

The Fund may enter into repurchase agreement transactions which consist of the purchase and sale of securities with a clause reserving the seller the right or the obligation to repurchase from the acquirer the securities sold at a price and term specified by the two parties in their contractual arrangement. The Fund can act either as purchaser or seller in repurchase agreement transactions or a series of continuing repurchase transactions.

As at and during the year ended 31 December 2024, the sub-funds did not enter into reverse repurchase and repurchase agreement transactions.

g) Foreign currency translation

The reference currency of the Fund is the Euro ('€'). The financial statements comprise the combined financial statements of the Fund expressed in Euro as well as individual information on each sub-fund expressed in the reference currency of each sub-fund. The reference currency of M&G European Credit Investment Fund, M&G European High Yield Credit Investment Fund, M&G Sustainable European Credit Investment Fund, M&G Sustainable Total Return Credit Investment Fund and M&G Total Return Credit Investment Fund is the Euro ('€') and for M&G Investment Grade ABS Fund and M&G Senior Asset Backed Credit Fund is the UK sterling ('£').

Assets and liabilities expressed in currencies other than the reference currency of the sub-fund are converted into that currency at the exchange rate prevailing on the period end date.

The market value of investments and other assets and liabilities denominated in currencies other than the reference currency of the sub-funds have been translated at the rate of exchange ruling at the year end. The cost of investments, income and expenditure denominated in currencies other than the reference currency of the sub-funds have been translated at the exchange rates ruling on the day of the transaction. The following exchange rates were used to translate the assets and liabilities of the sub-funds at 31 December 2024:

Notes to the financial statements

1 Euro € = 1.489256169 Canadian dollar (CA\$)

1 Euro € = 162.739187567 Japanese yen (¥)

1 Euro € = 11.760536472 Norwegian krone (NOK)

1 Euro € = 11.441498907 Swedish krona (SEK)

1 Euro € = 0.938421919 Swiss franc (CHF)

1 Euro € = 0.826812617 UK sterling (£)

1 Euro € = 1.035500048 US dollar (US\$)

1 UK sterling £ = 1.209463885 Euro (€)

1 UK sterling £ = 196.827170065 Japanese yen (¥)

1 UK sterling £ = 1.134987420 Swiss franc (CHF)

1 UK sterling £ = 1.252399911 US dollar (US\$)

h) Expenses

Expenses are recorded on an accrual basis. In addition, any Value Added Tax ('VAT') associated with any fees and expenses is charged to the Fund. The Fund's formation expense and the expenses relating to the creation of new sub-funds are capitalised and amortised over a period of five years.

i) Cash and cash equivalents

Cash and other liquid assets are valued at their face value with interest accrued, where applicable. All cash at bank balances are held either by State Street Bank International GmbH, Luxembourg Branch, on overnight deposit with a third party institution approved by the Board of Directors or directly with a sub-depositary. Cash and cash equivalents can also include amounts on deposit for the futures contracts initial and variation margin and the cash collateral held with counterparties for interest rate swaps, credit default swaps and credit default index swaps.

j) Interest income and interest expense

Interest income, adjusted for the accretion of discounts and amortisation of premiums, is recorded net on the accruals basis. Interest expense is also recorded on the accruals basis. Both are recognised in the Statement of operations and changes in net assets.

Any negative yield on cash deposit relates to negative interest incurred by the placing of the € balances out on overnight sweep.

k) Net realised gains and losses on sales of investments

Net realised gains/(losses) on the sales of investments are calculated on the basis of average cost of the investments sold.

l) Accounting estimates

The preparation of financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements requires the Board of Directors to make certain estimates and assumptions that affect the carrying amount of assets and liabilities and the reported amount of income and expenses during the year. Actual results could differ from those estimates. At the date of these financial statements no estimates and assumptions had a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities.

Notes to the financial statements

4 Transaction costs

Direct portfolio transaction costs include broker execution commission and taxes and are incremental costs that are directly attributable to the transaction. Indirect portfolio transaction costs represent the difference between the buying and selling prices of the sub-fund's investments (portfolio dealing spread); some types of investment, such as fixed interest securities, have no direct transaction costs and only the portfolio dealing spread is paid. Transaction costs are incorporated as part of realised gain/(loss) in the Statement of operations and changes in net assets.

Direct portfolio transaction costs	For the year ended 31 December 2024
M&G European Credit Investment Fund	€177,005
M&G European High Yield Credit Investment Fund	€4,687
M&G Investment Grade ABS Fund	nil
M&G Senior Asset Backed Credit Fund	nil
M&G Sustainable European Credit Investment Fund	€64,673
M&G Sustainable Total Return Credit Investment Fund	€57,554
M&G Total Return Credit Investment Fund	€166,424

5 Annual Charge

The Fund pays an annual charge calculated as a percentage of the average daily net assets of each sub-fund or share class under its management (the 'Annual Charge'). The Annual Charge accrues daily and is payable quarterly in arrears at the rate specified in the following table and includes:

- Management fees
- Audit fees
- Directors' fees and expenses
- *Taxe d'abonnement*
- Service provider fees
- Other expenses as specified in the Prospectus

In addition, the Fund or any sub-fund may bear any extraordinary expenses including, without limitation, litigation expenses and the full amount of any tax, levy, duty or similar charge imposed on the Fund or sub-fund that would not be considered as ordinary expenses ('Extraordinary Expenses').

The Annual Charge rate has changed during the financial year for the following share classes:

	Before change	Date of change	After change
M&G Sustainable European Credit Investment Fund			
Euro			
Class 'D'	0.18%	20.12.2024	Up to 0.22%
Class 'DI'	0.14%	20.12.2024	Up to 0.18%

6 Audit fees

Audit fees for the financial year ended 31 December 2024 were €121,000 (including VAT).

The Audit fees form part of the Annual Charge. Please refer to note 5.

Notes to the financial statements

7 Directors' fees and expenses

The Directors are entitled to receive fees of €30,000 per director per annum. Philip Jelfs and Laurence Mumford have waived their entitlement to Director's fees. The Management Company shall also reimburse certain expenses of the Directors, in accordance with the Articles.

The Directors' Fees and Expenses form part of the Annual Charge. Please refer to note 5.

8 Tax status

As a Luxembourg SICAV, the Fund is not subject, under present tax laws, to income, withholding or capital gains taxes in Luxembourg. The Fund is subject to the Luxembourg *taxe d'abonnement* at the rate of 0.01% per annum on the net assets of all classes restricted to institutional investors and 0.05% for all other classes, such tax being payable quarterly and calculated on the total net assets of the class in issue at the end of the relevant quarter. A detailed listing of all available share classes can be found in the latest Prospectus.

Dividends, interest and capital gains on securities issued may be subject to withholding or capital gains taxes imposed in certain countries.

The *taxe d'abonnement* forms part of the Annual Charge. Please refer to note 5.

9 Swing pricing

A sub-fund may suffer a reduction in value, known as 'dilution' when trading the underlying investments as a result of net inflows or net outflows of the respective sub-fund. This is due to transaction charges and other costs that may be incurred by liquidating and purchasing the underlying assets and the spreads between the buying and selling prices. In order to counter this effect and to protect Shareholders' interests the Board of Directors will adopt a swing pricing mechanism as part of its valuation policy.

If on any Valuation Day, the aggregate net investor(s) transactions in a sub-fund exceed a threshold pre-determined by the Board of Directors, the net asset value per share may be adjusted upwards or downwards to reflect the costs attributable to the net inflows and net outflows respectively. Typically, such adjustments will increase the net asset value per share when there are net subscriptions into the sub-fund and decrease the net asset value per share when there are net redemptions out of the sub-fund. The Board of Directors is responsible for setting the threshold, which will be a percentage of the net assets of the respective sub-fund. The threshold is based on objective criteria such as the size of a sub-fund and the dealing costs for a sub-fund, and may be revised from time to time.

The swing pricing mechanism will be applied across all sub-funds of the Fund and it is not aimed at addressing the specific circumstances of each individual investor transaction. The amount of the swing factor will be up to a maximum of 2% of the NAV per share. The swing factors are determined on the basis of the sub-funds' objectives and investment profiles, the markets in which they invest and the various cost components which amongst others may include market spread.

Investors are advised that the volatility of the sub-funds' net asset value might not reflect the true portfolio performance as a consequence of the application of swing pricing.

The swing pricing was applied for all the sub-funds during the financial year, but the disclosed NAV was not swung for any of them at 31 December 2024.

Notes to the financial statements

10 Distribution policy

The Board of Directors have the option to declare a payment of a distribution to shareholders, out of all or part of the sub-funds' or classes' current net investment income. If the distribution declared is less than €50 (or its equivalent in any other currency), the Directors reserve the right to reinvest the distribution into the same class in the relevant sub-fund (free of any initial sales charges). In any event, no distribution may be made if, as a result thereof, the Net Asset Value of the Fund would fall below the equivalent of €1,250,000.

The following table summarises the dividends declared by the sub-funds during the year ended 31 December 2024:

Notes to the financial statements

11 Events occurred during the year

The following sub-fund was launched on 26 September 2024:

- M&G Investment Grade ABS Fund

On 27 September 2024 a contribution in kind represented by cash and securities in the M&G Investment Grade ABS Fund was subscribed to the total value of £170,990,049 in exchange for shares of the same value.

12 Subsequent events

The following sub-funds were launched on 19 March 2025:

- M&G All Stocks Sterling Credit Fund,
- M&G Long Dated Sterling Credit Fund.

On 20 March 2025, the following contributions in kind represented by cash and securities happened:

- M&G All Stocks Sterling Credit Fund was subscribed for a total value of £522,177,930 and
- M&G Long Dated Sterling Credit Fund was subscribed for a total value of £558,883,061

in exchange for shares of the same value.

Risk management policies (unaudited)

The sub-funds' investment activities expose them to various types of risk which are associated with the financial instruments and markets in which they invest.

These financial statements are designed to enable users to evaluate the nature and extent of those risks and how they are managed.

Market risk

Market risk is the risk of loss resulting from fluctuations in the market value of positions in a sub-fund's portfolio attributable to changes in market variables, such as interest rates, foreign exchange rates, equity and commodity prices or an issuer's creditworthiness.

In measuring and monitoring market risk, the global exposure of the sub-funds is calculated on a daily basis, using a 'Value at Risk' (VaR) approach.

'Value at Risk' approach

There are two forms of VaR approaches, absolute and relative, which are described below:

Absolute VaR

The absolute VaR is used where a sub-fund seeks to estimate the potential loss it could experience in a month (20 trading days) under normal market conditions. The requirement is that, 99% of the time, such sub-fund's worst outcome is no worse than a 20% decline in NAV.

Relative VaR

The relative VaR of a sub-fund is expressed as a multiple of a benchmark or reference portfolio and cannot, under the same circumstances as above, exceed twice the VaR of the relevant benchmark or reference portfolio.

VaR limit

When VaR is calculated as a percentage of the net asset value to assess a sub-fund's market risk, it may not be greater than the VaR limit set for the sub-fund.

For the financial year from 1 January 2024 to 31 December 2024 the tables below show the VaR limits set for the sub-funds, together with the lowest, highest and average VaR (note these numbers are actual

absolute and relative VaR numbers and do not represent utilisation levels of the regulatory limit) calculated for each sub-fund during the year.

For the year to 31 December 2024	Absolute VaR			
	VaR limit %	Lowest %	Highest %	Average %
M&G Investment Grade ABS Fund	10.00	0.24	0.30	0.27
M&G Senior Asset Backed Credit Fund	10.00	0.16	0.33	0.24
M&G Sustainable Total Return Credit Investment Fund	10.00	0.53	1.66	0.89
M&G Total Return Credit Investment Fund	10.00	0.56	1.72	0.90

For the year to 31 December 2024	Relative VaR			
	VaR limit %	Lowest %	Highest %	Average %
M&G European Credit Investment Fund	200.00	94.69	105.30	99.39
M&G European High Yield Credit Investment Fund	200.00	95.60	109.04	100.75
M&G Sustainable European Credit Investment Fund	200.00	94.01	103.99	97.91

For the sub-funds utilising relative VaR calculation please find details of the benchmark in the table below:

Benchmark by sub-fund
M&G European Credit Investment Fund
ICE BofA Euro Corporate Index (Total Return Gross)
M&G European High Yield Credit Investment Fund
ICE BofA European Currency Developed Markets High Yield Index ex Financials 2% Constrained (EUR-Hedged) (Total Return Gross)
M&G Sustainable European Credit Investment Fund
Bloomberg MSCI Euro Corporate ESG BB+ Sustainable SRI Bond Index (Total Return Gross)

Risk management policies (unaudited)

Leverage risk

Derivatives can be used by the sub-fund to generate market exposure to investments exceeding the net asset value. As a result of this exposure, positive or negative movement in markets may have a more significant effect on the net asset value of the sub-fund.

Derivatives can also be employed to hedge exposure. Consequently, higher derivative usage will not necessarily imply a higher level of risk for the sub-fund.

For sub-funds using VaR approaches we disclose the level of this leverage employed during the financial reporting year on a 'sum of notionals' basis. The lowest, highest and average level of leverage employed and utilisation of the leverage level calculated during the financial year from 1 January 2024 to 31 December 2024 are shown in the table below.

For the year to 31 December 2024 ^a	Lowest	Highest	Average
M&G European Credit Investment Fund (€'000)	1,431,399	2,325,518	1,776,675

M&G Sustainable European Credit Investment Fund (%)	19.40	32.54	24.60

For the year to 31 December 2024 ^a	Lowest	Highest	Average
M&G Sustainable Total Return Credit Investment Fund (€'000)	1,800,491	4,787,229	2,181,559
M&G Sustainable Total Return Credit Investment Fund (%)	140.86	392.59	177.84
M&G Total Return Credit Investment Fund (€'000)	5,008,950	9,716,346	6,167,031
M&G Total Return Credit Investment Fund (%)	132.88	269.85	161.90

^a Global Exposure Stated as Gross Notional. Expressed as a % over sub-fund Valuation.

Other regulatory disclosures (unaudited)

Remuneration

The below disclosure is made in accordance with Undertakings for Collective Investments in Transferable Securities ('UCITS') V and the Guidelines on sound remuneration policies under the UCITS issued by the European Securities and Markets Authority ('ESMA Guidelines').

M&G Luxembourg S.A. (the 'UCITS Management Company') is subject to a remuneration policy which is consistent with the principles outlined in the ESMA Guidelines.

The remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times and that the remuneration of employees is in line with the risk policies and objectives of the UCITS funds managed by the UCITS Management Company. Further details of the remuneration policy can be found on our website: mandgplc.com/our-business/mandg-investments/mandg-investments-business-policies

The remuneration policy and its implementation is reviewed on an annual basis, or more frequently where required, and is approved by the M&G plc Board Remuneration Committee. The most recent review found no fundamental issues with no material changes made to the policy.

M&G Luxembourg S.A. is required under UCITS law to make quantitative disclosures of remuneration. These disclosures are made in line with M&G's interpretation of currently available guidance on quantitative remuneration disclosures. As market or regulatory guidance evolves, M&G may consider it appropriate to make changes to the way in which quantitative disclosures are calculated.

The 'Identified Staff' of M&G Luxembourg S.A. are those who could have a material impact on the risk profile of M&G Luxembourg S.A. or the UCITS funds it manages and generally includes senior management, risk takers and control functions. 'Identified Staff' typically provide both UCITS and non-UCITS related services and have a number of areas of responsibility.

Therefore, only the portion of remuneration for those individuals' services which may be attributable to UCITS is included in the remuneration figures disclosed. Accordingly the figures are not representative of any individual's actual remuneration. The information needed to provide a further breakdown of remuneration is not readily available and would not be relevant or reliable.

The amounts shown below reflect payments made in respect of the calendar year 1 January 2024 to 31 December 2024.

	Fixed Remuneration €'000	Variable Remuneration €'000	Total €'000	Beneficiaries
Senior Management	2,047	3,332	5,379	13
Other Identified Staff	4,105	19,250	23,355	33
Staff Member	23,007	12,464	35,471	205
Total	29,159	35,046	64,205	251

Securities Financing Transactions Regulation (SFTR)

Under the Regulation on Transparency of Securities Financing Transactions and of Reuse (2015/2365) (the 'SFTR'), the Fund is required to disclose certain information in relation to its use of Securities Financing Transactions ('SFTs') including Total Return Swaps ('TRSs'). SFTs include various types of transactions, however, the Fund did not enter into any transactions in scope of SFTR during the year ended 31 December 2024.

Annex 1: Sustainable Finance Disclosure Regulation (unaudited)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: European Specialist Investment Funds - M&G European Credit Investment Fund
Legal Entity Identifier: 5493007H6U0V9QP44023

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.17% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach by excluding certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments, such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology. Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

All investments made by the Fund to attain the environmental or social characteristics were assessed for good governance and have passed the Investment Manager's test for good governance. The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager, as a minimum, has regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

No derivatives were used to attain the environmental or social characteristics.

While the Fund did not have as its objective a sustainable investment, it had a proportion of 76.17% in sustainable

investments, 38.58% of them with an environmental objective and 37.59% with a social objective. For further details of the sustainable investments, please see the relevant sections below.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach was met at all times during the reporting period.

- Exclusionary approach: Percentage (%) of NAV held in excluded investments: 0%
- Exclusionary approach: Percentage (%) of ABS below the Investment Manager's threshold for alignment: 0%.

The indicators shown were not subject to assurance/review provided by an external party.

The indicators mentioned above apply to the entire 12-month reporting period, ending 31 December 2024.

● **...and compared to previous periods?**

As with the previous period when 0% of NAV was held in excluded investments, in this reporting period 0% of NAV was held in excluded investments.

As for the previous reporting period, 0% of ABS were below the Investment Manager's threshold for alignment.

Compared to the previous reporting period, the proportion of sustainable investments held by the Fund was slightly higher.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund's commitment to sustainable investments is outlined in the Fund Prospectus. This states that the Fund will have a minimum proportion of 20% of sustainable investments, comprising those with an environmental objective and/or a social objective. Those with an environmental objective do not need to qualify as environmentally sustainable under the EU Taxonomy. During the reporting period, the Fund held 76.17% investments that the Investment Manager deemed sustainable. These investments met at least one of the thresholds, defined by the Investment Manager, for positive contribution to a sustainable objective. The Fund held 38.58% of sustainable investments contributing to one or more environmental objective.

3.07% of the Fund's sustainable investments with an environmental objective were positively assessed for Taxonomy alignment.

35.51% of the Fund's sustainable investments related to investments with other environmental characteristics, and 37.59% were in socially sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as set out in the following section.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Fund took the mandatory principal adverse impact (PAI) indicators, as set out in table 1 of Annex 1 of the SFDR Regulatory Technical Standards, and any relevant opt-in indicators from tables 2 and 3, into account to ensure that the Fund's sustainable investments did not do significant harm to any sustainability factor. PAIs 1-6 relating to carbon emissions were taken into account by way of applying the exclusions set out in the Manager's Thermal Coal Policy as well as the Manager's DNSH test which also includes a revenue-based exclusion relating to fossil fuel activities. PAI 14 on controversial weapons was taken into account by applying the Manager's Controversial Weapons Policy. PAI 7 on biodiversity was taken into account by applying a controversy-based exclusion which forms part of the Manager's DNSH test. The Fund also excluded any company which did not pass the Managers' Global Norms Process. The Fund may have applied additional exclusions, as outlined in the Fund Prospectus, some of which may be relevant to addressing PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Where investments are reported as Taxonomy aligned, the economic activities invested in also met the do no significant harm criteria as set out in Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (EU Taxonomy Regulation).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All sustainable investments were subject to the Manager's Global Norms Process which assesses adherence to the OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager received principal adverse impact research data to identify the Fund's principal adverse impacts prior to investing. Consideration of certain principal adverse impacts was reinforced by applying the exclusions as set out in M&G house Policies; fund-specific exclusions as set out in the Fund Prospectus; or were screened out as a result of the Fund Manager's Global Norms Process. Where no exclusions were applied, principal adverse impacts were assessed qualitatively and monitored by the Fund Manager on an ongoing basis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 to 31/12/2024

Largest investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	2.77%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.71%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.09%	DE
ING GROEP NV	Financial and insurance activities	0.67%	NL
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	0.63%	DE
JPMORGAN CHASE & CO	Financial and insurance activities	0.62%	US
VOLKSWAGEN INTERNATIONAL FINANCE N	Financial and insurance activities	0.57%	NL
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	0.52%	DE
NORTHWESTERN MUTUAL GLOBAL FUNDING	Financial and insurance activities	0.51%	US
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	0.50%	DE
MASSMUTUAL GLOBAL FUNDING II	Financial and insurance activities	0.49%	US
ABN AMRO BANK NV	Financial and insurance activities	0.47%	NL

ARION BANKI HF	Financial and insurance activities	0.46%	IS
CREDIT AGRICOLE SA	Financial and insurance activities	0.42%	FR

These investments represent an annual average of four quarters measured over the reporting period.

Please note that the Investment Manager identifies separate company issues when compiling this table of Top 15 holdings rather than grouping issuers at a company (issuer) level.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures are calculated as an annual average of four quarterly measurements for the period ending 31 December 2024. The % of investments that were aligned to the environmental or social characteristics promoted was 95.92% of NAV. This comprised 76.17% of NAV in sustainable investments, and the remaining 19.75% of NAV in investments with other environmental and or social characteristics.

Sustainable investments allocated to 'Taxonomy-aligned' economic activities are reported under 'Taxonomy-aligned'. The remainder of the sustainable investments is allocated to 'sustainable – other environmental' and/or 'sustainable – social', based on the following two criteria:

- I. Whether they pass the sustainable investment test on the basis of environmental and/or social contribution (in line with the sustainable investment methodology outlined above); and
- II. The attribution to environmental and/or social as set out by the Fund's pre-contractual commitment to invest in sustainable investments with environmental and/or social objectives.

Where Funds are not committed to any specific type of sustainable investment in the pre-contractual commitment, the investment is split in equal parts between 'sustainable – other environmental' and 'sustainable – social'.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 3.07% were aligned to the EU Taxonomy. 35.51% related to investments with other environmental characteristics (sustainable), and 37.59% related to socially sustainable investments.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned and/or sustainable investment proportion of the Fund.

Historic Asset Allocation (the methodology has changed from the previous reference period and as such the data is not an exact comparison):

FY 2023: #1 Aligned with E/S Characteristics 96.6%; #2 Other 3.4%; #1A Sustainable 73.94%; #1B Other E/S Characteristics 22.66%; Taxonomy-Aligned 1.29%; Other Environmental 33.15%; Social 39.5%

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities), as developed by the European Union, and is expressed as a % of Net Asset Value (NAV).

The table shows a breakdown of the sectors and sub-sectors to which the Fund is exposed.

The investment breakdown shown represents an annual average of four quarterly measurements taken over the reporting period.

Economic Sector	% Assets
Financial and insurance activities	63.15%
Insurance, reinsurance and pension funding, except compulsory social security	2.08%
Activities auxiliary to financial services and insurance activities	3.51%
Financial service activities, except insurance and pension funding	57.56%

*These investments are investments for which no NACE code is available.

Sectors of the economy that derive revenues from economic activities related to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The EU Taxonomy aligned investments made during this reporting period are incidental and may be lower or 0% in future periods.

The Fund held 3.07% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter-end figure for each quarter in the reference period and averaging it.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

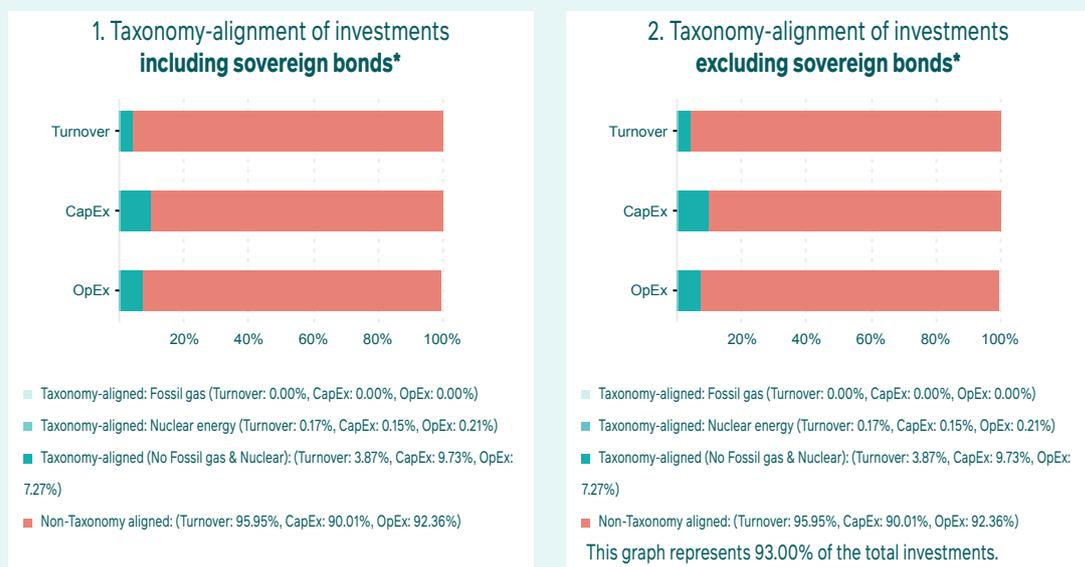

- Yes: In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
The above graph and below table describes the Taxonomy alignment of all investments the Fund has made.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	3.86%
Climate Change Adaption	0.07%
Use and Protection of Water and Marine Resources	0.09%
Transition to a Circular Economy	0.15%
Pollution Prevention and Control	0.18%
Protection and Restoration or Biodiversity and Ecosystems	0.01%

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.37% and in enabling activities was 2.28%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.37%
Share of Enabling Activities	2.28%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period, the Fund held more Taxonomy-aligned investments in this reference period than in the previous reference period.

A number of factors may contribute to the changes since the previous year and a comparison may not be like for like. The changes may be due to, amongst others, an increase or decrease in the Fund's size, a change in data coverage or a change in the proportion of the Fund invested in a particular asset class.

Reference period	Including sovereign bonds			Excluding sovereign bonds		
	Turnover	CapEx	OpEx	Turnover	CapEx	OpEx
As at - 31 December 2024	4.05%	9.99%	7.64%	4.05%	9.99%	7.64%
As at - 31 December 2023	4.93%	8.39%	6.30%	4.93%	8.39%	6.30%

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35.51%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

Corporate disclosure of Taxonomy alignment is still in a nascent phase and reported Taxonomy alignment data remains low for the time being. We expect the numbers to increase as corporates gain further experience with the reporting of Taxonomy alignment, and as more corporates align their economic activities to the criteria of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 37.59%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, term deposits and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied. Data was sourced at each quarter end over the full reference period, which ended on 31 December 2024.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied a set of exclusions to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

- **How did this financial product perform compared with the reference benchmark?**

N/A.

- **How did this financial product perform compared with the broad market index?**

N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: European Specialist Investment Funds - M&G European High Yield Credit Investment Fund
Legal Entity Identifier: 549300FH80NGSGJZ6T14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.10% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach by excluding certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments, such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring. Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

All investments made by the Fund to attain the environmental or social characteristics were assessed for good governance and have passed the Investment Manager's test for good governance. The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

No derivatives were used to attain the environmental or social characteristics.

While the fund did not have as its objective a sustainable investment, it had a proportion of 58.10% in sustainable investments, 25.21% of them with a social objective and 32.89% with an environmental objective. For details of the Fund's sustainable investments, please see the relevant sections below.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

Exclusionary approach: Percentage (%) of NAV held in excluded investments: 0%

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Exclusionary approach: Percentage (%) of ABS below the Investment Manager's threshold for alignment: 0%

The indicators shown were not subject to assurance/review provided by an external party.

The indicators mentioned above apply to the whole reporting period, ending 31 December 2024.

- **...and compared to previous periods?**

As with the previous period when 0% of NAV was held in excluded investments, in this reporting period 0% of NAV was held in excluded investments.

As for the previous reporting period, 0% of ABS were below the Investment Manager's threshold for alignment.

Compared to the previous reference period, the proportion of sustainable investments was slightly higher.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund's commitment to sustainable investments is outlined in the Fund Prospectus. This states that the Fund will have a minimum proportion of 20% of sustainable investments, comprising those with an environmental objective and/or a social objective. Those with an environmental objective do not need to qualify as environmentally sustainable under the EU Taxonomy. During the reporting period, the Fund held 58.10% investments that the Investment Manager deems sustainable. These investments have met at least one of the thresholds, defined by the Investment Manager, for positive contribution to a sustainable objective.

The Fund held 32.89% of sustainable investments contributing to one or more environmental objectives.

3.34% of the Fund's sustainable investments with environmental objective were positively assessed for Taxonomy alignment.

29.55% of the Fund's sustainable investments related to investments with other environmental characteristics, and 25.21% in socially sustainable investments.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as set out in the following section.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Fund took the mandatory principal adverse impact (PAI) indicators, as set out in table 1 of Annex 1 of the SFDR Regulatory Technical Standards, and any relevant opt-in indicators from tables 2 and 3, into account to ensure that the Fund's sustainable investments do not do significant harm to any sustainability factor. PAIs 1-6 relating to carbon emissions were taken into account by way of applying the exclusions set out in the Manager's Thermal Coal Policy as well as the Manager's DNSH test which also includes a revenue-based exclusion relating to fossil fuel activities. PAI 14 on controversial weapons was taken into account by applying the Manager's Controversial Weapons Policy. PAI 7 on biodiversity was taken into account by applying a controversy-based exclusion which forms part of the Manager's DNSH test. The Fund also excluded any company which did not pass the Managers' Global Norms Process. The Fund may have applied additional exclusions, as outlined in the Fund Prospectus, some of which may be relevant to addressing PAIs.

Where investments are reported as Taxonomy aligned, the economic activities invested in also met the do no significant harm criteria as set out in Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (EU Taxonomy Regulation).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

All sustainable investments are subject to the manager's Global Norms Process which assesses adherence to the OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager received principal adverse impact research data to identify the Fund's principal adverse impacts prior to investing. Consideration of certain principal adverse impacts was reinforced by applying the exclusions as set out in M&G house Policies; fund-specific exclusions as set out in the Fund Prospectus; or were screened out as a result of the Fund Manager's Global Norms Process. Where no exclusions were applied, principal adverse impacts were assessed qualitatively and monitored by the Fund Manager on an ongoing basis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 to 31/12/2024

Largest investments	Sector	% Assets	Country
VZ VENDOR FINANCING II BV	Financial and insurance activities	1.19%	NL

These investments represent an annual average of four quarters measured over the reporting period.

Please note that the Investment Manager identifies separate company issues when compiling this table of Top Investments rather than grouping issuers at a company (issuer) level.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 20% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures are calculated as an annual average of four quarterly measurements for the period ending 31 December 2024. The % of investments that were aligned to the environmental or social characteristic promoted was 94.29% of NAV. This comprised 58.10% of NAV in sustainable investments, and the remaining 36.19% of NAV in investments with other environmental and/or social characteristics.

Sustainable investments allocated to 'Taxonomy-aligned' economic activities are reported under 'Taxonomy-aligned'. The remainder of the sustainable investments is allocated to 'sustainable – other environmental' and/or 'sustainable – social', based on the following two criteria:

- I. Whether they pass the sustainable investment test on the basis of environmental and/or social contribution (in line with the sustainable investment methodology outlined above); and
- II. The attribution to environmental and/or social as set out by the Fund's pre-contractual commitment to invest in sustainable investments with environmental and/or social objectives.

Where Funds are not committed to any specific type of sustainable investment in the pre-contractual commitment, the investment is split in equal parts between 'sustainable – other environmental' and 'sustainable – social'.

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 3.34% were aligned to the EU Taxonomy. 29.55% related to investments with other environmental characteristics (sustainable), and 25.21% related to socially sustainable investments.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned and/or sustainable investment proportion of the Fund.

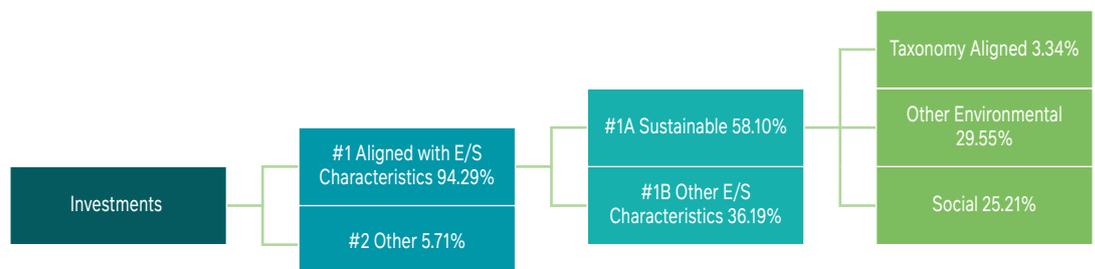

Historic Asset Allocation (the methodology has changed from the previous reference period and as such the data is not an exact comparison):

FY 2023: #1 Aligned with E/S Characteristics 92.34%; #2 Other 7.66%; #1A Sustainable 57.69%; #1B Other E/S Characteristics 34.65%; Taxonomy-Aligned 0.93%; Other Environmental 25.39%; Social 31.37%

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities), as developed by the European Union, and is expressed as a % of Net Asset Value (NAV).

The table shows a breakdown of the sectors and sub-sectors to which the Fund is exposed.

The investment breakdown shown represents an annual average of four quarterly measurements taken over the reporting period.

Economic Sector	% Assets
Financial and insurance activities	41.75%
Activities auxiliary to financial services and insurance activities	0.92%
Financial service activities, except insurance and pension funding	40.83%
Manufacturing	19.51%

Other*	0.43%

*These investments are investments for which no NACE code is available.

Sectors of the economy that derive revenues from economic activities related to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The EU Taxonomy aligned investments made during this reporting period are incidental and may be lower or 0% in future periods.

The Fund held 3.34% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter-end figure for each quarter in the reference period and averaging it.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes: In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

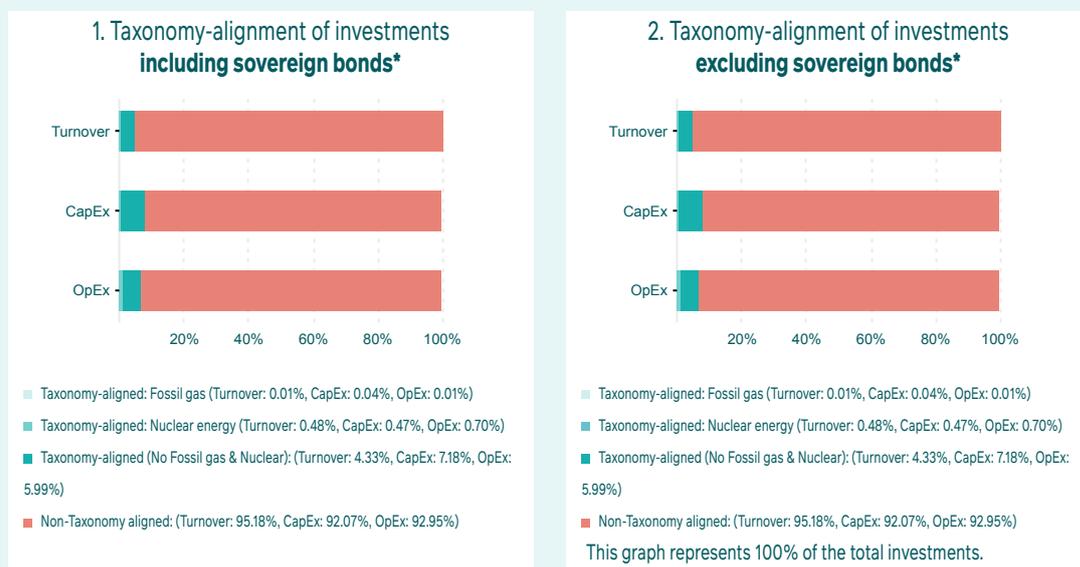

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The above graph and below table describes the Taxonomy alignment of all investments the Fund has made.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	4.63%
Climate Change Adaption	0.06%
Use and Protection of Water and Marine Resources	0.01%
Transition to a Circular Economy	0.01%
Pollution Prevention and Control	0.14%
Protection and Restoration or Biodiversity and Ecosystems	0.00%

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.48% and in enabling activities was 2.54%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.48%
Share of Enabling Activities	2.54%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period, the Fund held more Taxonomy-aligned investments in this reference period.

A number of factors may contribute to the changes since the previous year and a comparison may not be like for like. The changes may be due to, amongst others, an increase or decrease in the Fund's size, a change in data coverage or a change in the proportion of the Fund invested in a particular asset class.

Reference period	Including sovereign bonds			Excluding sovereign bonds		
	Turnover	CapEx	OpEx	Turnover	CapEx	OpEx
As at - 31 December 2024	4.82%	7.93%	7.05%	4.82%	7.93%	7.05%
As at - 31 December 2023	1.67%	2.85%	3.07%	1.67%	2.85%	3.07%

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29.55%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

Corporate disclosure of Taxonomy alignment is still in a nascent phase and reported Taxonomy alignment data remains low for the time being. We expect the numbers to increase as corporates gain further experience with the reporting of Taxonomy alignment, and as more corporates align their economic activities to the criteria of the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 25.21%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period the Fund held varying levels of cash, term deposits and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied. Data was sourced at each quarter end over the full reference period, which ended on 31 December 2024.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied a set of exclusions to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

- **How did this financial product perform compared with the reference benchmark?**

N/A.

- **How did this financial product perform compared with the broad market index?**

N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: European Specialist Investment Funds - M&G Investment Grade ABS Fund
Legal Entity Identifier: 254900ZLW1WO0NWWUD79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes
 No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach by excluding certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments, such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology. Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

All investments made by the Fund to attain the environmental or social characteristics were assessed for good governance and have passed the Investment Manager's test for good governance. The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

No derivatives were used to attain the environmental or social characteristics.

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period, following the launch of the Fund on 26 September 2024. The figure calculated represents an average of two quarters for the period ending 31 December 2024. The first of these is a partial quarter, ending 30 September, which is the nearest quarter end following the Fund's launch.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

• How did the sustainability indicators perform?

- Exclusionary approach: Percentage (%) of NAV held in excluded investments: 0%

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

- Exclusionary approach: Percentage (%) of ABS below the Investment Manager's threshold for alignment: 0%

The indicators shown were not subject to assurance/review provided by an external party.

The indicators mentioned above apply to the whole reporting period, ending 31 December 2024, following the launch of the Fund on 26 September 2024.

- **...and compared to previous periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first periodic reporting under SFDR. The Fund will provide historic comparison in the next periodic report.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period, following the launch of the fund on 26 September 2024.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period, following the launch of the Fund on 26 September 2024.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period, following the launch of the Fund on 26 September 2024.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period, following the launch of the Fund on 26 September 2024.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager received principal adverse impact research data to identify the Fund's principal adverse impacts prior to investing. Consideration of certain principal adverse impacts was reinforced by applying the exclusions as set out in M&G house Policies; fund-specific exclusions as set out in the Fund Prospectus; or were screened out as a result of the Fund Manager's Global Norms Process. Where no exclusions were applied, principal adverse impacts were assessed qualitatively and monitored by the Fund Manager on an ongoing basis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 30/09/2024 to 31/12/2024

Largest investments	Sector	% Assets	Country
TOGET 2024 1ST2 (A)	Other	1.19%	GB

These investments represent an average of two quarters for the period ending 31 December 2024. The first of these is a partial quarter, ending 30 September, which is the nearest quarter end following the Fund's launch.

Please note that the Investment Manager identifies separate company issues when compiling this table of Top Investments rather than grouping issuers at a company (issuer) level.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics. The Fund does not target investment in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures are calculated represent an average of two quarters for the period ending 31 December 2024. The first of these is a partial quarter, ending 30 September, which is the nearest quarter end following the Fund's launch.

The % of investments that were aligned to the environmental or social characteristic promoted was 95.28% of NAV. The fund held 0% of sustainable investments over the reference period.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned proportion of the Fund.

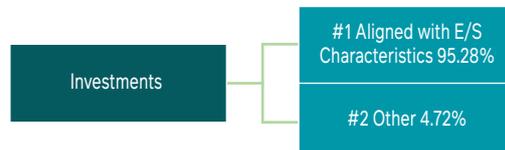

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures are calculated represent an average of two quarters for the period ending 31 December 2024. The first of these is a partial quarter, ending 30 September, which is the nearest quarter end following the Fund's launch.

The % of investments that were aligned to the environmental or social characteristic promoted was 95.28% of NAV. The fund held 0% of sustainable investments over the reference period.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned proportion of the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities), as developed by the European Union, and is expressed as a % of Net Asset Value (NAV).

The table shows a breakdown of the sectors and sub-sectors to which the Fund is exposed.

The investment breakdown shown represents an average of the two relevant quarterly measurements taken over the reporting period.

Economic sector	% Assets
Other	92.55%
Financial and insurance activities	6.52%
Financial service activities, except insurance and pension funding	6.52%
Administrative and support service activities	0.69%
Office administrative, office support and other business support activities	0.69%
Transportation and storage	0.19%

*These investments are investments for which no NACE code is available.

Sectors of the economy that derive revenues from economic activities related to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

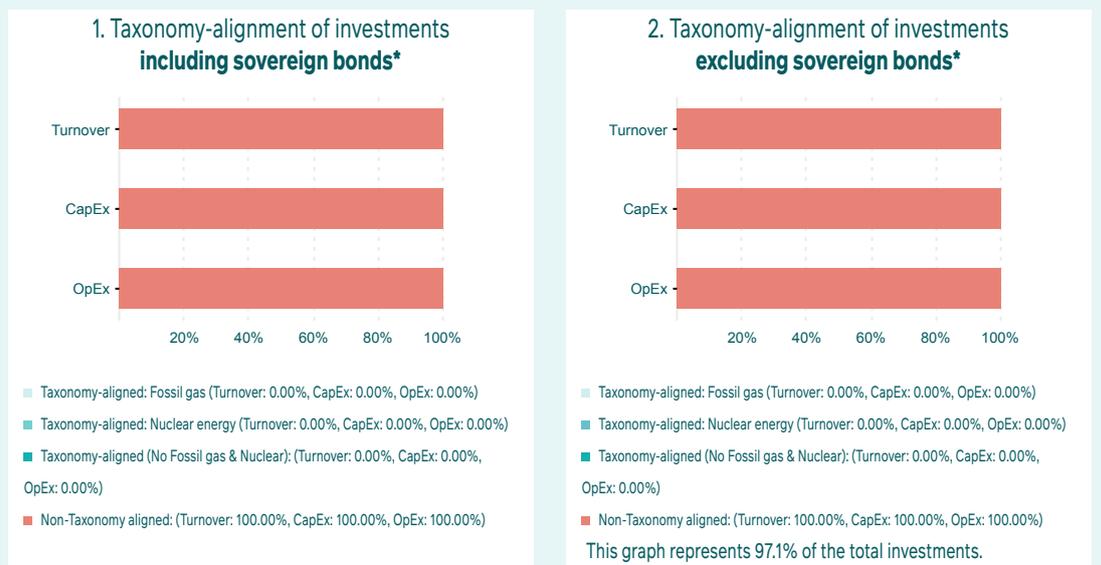

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes:
 - In fossil gas
 - In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The above graph and below table describes the Taxonomy alignment of all investments the Fund has made.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.00%
Climate Change Adaption	0.00%
Use and Protection of Water and Marine Resources	-%
Transition to a Circular Economy	-%
Pollution Prevention and Control	-%
Protection and Restoration or Biodiversity and Ecosystems	-%

- **What was the share of investments made in transitional and enabling activities?**

The Fund did not set a minimum share of investments in transitional and enabling activities and the percentage of the Fund's investments in transitional and enabling activities over the reference period was 0%.

Activity	Percentage Investments
Share of Transitional Activities	-%
Share of Enabling Activities	-%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund is not yet able to provide comparison to a previous reporting period as this is the Fund's first periodic reporting under SFDR. The Fund will provide historic comparison in the next periodic report.

Reference period	Including sovereign bonds			Excluding sovereign bonds		
	Turnover	CapEx	OpEx	Turnover	CapEx	OpEx
As at - 31 December 2024	0%	0%	0%	0%	0%	0%

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period.

- **What was the share of socially sustainable investments?**

The Fund does not target investment in sustainable investments, as stated in the Fund Prospectus, and did not hold any sustainable investments during the reference period.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash, money market funds and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied. Data was sourced at each quarter end following the fund launch on 26 September 2024 until the end of the reference period on 31 December 2024.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied a set of exclusions to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Fund's environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

- **How did this financial product perform compared with the reference benchmark?**

N/A.

- **How did this financial product perform compared with the broad market index?**

N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: European Specialist Investment Funds - M&G Senior Asset Backed Credit Fund
Legal Entity Identifier: 25490036P711C6KJIQ72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach by excluding certain potential investments from its investment universe to mitigate potential negative effects on the environment and society. For securitised investments, such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring. Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to be detrimental to ESG Factors.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

All investments made by the Fund to attain the environmental or social characteristics were assessed for good governance and have passed the Investment Manager's test for good governance. The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager will, as a minimum, have regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

No derivatives were used to attain the environmental or social characteristics.

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

Exclusionary approach: Percentage (%) of NAV held in excluded investments: 0%

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met at all times during the reporting period.

Exclusionary approach: Percentage (%) of ABS below the Investment Manager's threshold for alignment: 0%

The indicators shown were not subject to assurance/review provided by an external party.

The indicators mentioned above apply to the whole reporting period, ending 31 December 2024.

- **...and compared to previous periods?**

As with the previous period when 0% of NAV was held in excluded investments, in this reporting period 0% of NAV was held in excluded investments.

As for the previous reporting period, 0% of ABS were below the Investment Manager's threshold for alignment.

Compared to the previous reference period, the proportion of sustainable investments was the same, namely 0%.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager received principal adverse impact research data to identify the Fund's principal adverse impacts prior to investing. Consideration of certain principal adverse impacts was reinforced by applying the exclusions as set out in M&G house Policies; fund-specific exclusions as set out in the Fund Prospectus; or were screened out as a result of the Fund Manager's Global Norms Process. Where no exclusions were applied, principal adverse impacts were assessed qualitatively and monitored by the Fund Manager on an ongoing basis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 to 31/12/2024

Largest investments	Sector	% Assets	Country
TWIN 2022-1 (A)	Other	1.97%	GB
EAST1 2024 1 (A)	Other	1.66%	GB
PLRS 2023 2 (A)	Other	1.58%	GB
NDFT 2024 1 (A)	Other	1.54%	GB
TIKEH 5X (A)	Other	1.43%	NL
ELSTR 4 (A)	Other	1.38%	IE
PCLF 2024 1 (A)	Other	1.36%	GB
TOGET 24 1ST1X (A)	Other	1.31%	GB
TOGET 2024 1ST2 (A)	Other	1.28%	GB
PERMM 2024-1X (1A1)	Other	1.26%	GB

PLRS 2024 1 (A)	Financial and insurance activities	1.20%	GB
TWIN 23 2 (A)	Other	1.17%	GB
DRVUK 8 (A)	Other	1.15%	LU
PLRS 2023_1 (A)	Other	1.15%	GB

These investments represent an annual average of four quarters measured over the reporting period.

Please note that the Investment Manager identifies separate company issues when compiling this table of Top Investments rather than grouping issuers at a company (issuer) level.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures are calculated as an annual average of four quarterly measurements for the period ending 31 December 2024.

The % of investments that were aligned to the environmental or social characteristics promoted was 99.32% of NAV. The fund held no sustainable investments over the reference period.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned proportion of the Fund.

Historic Asset Allocation (the methodology has changed from the previous reference period and as such the data is not an exact comparison):

FY 2023: #1 Aligned with E/S Characteristics 93.89%; #2 Other 6.11%; #IB Other E/S Characteristics 93.89%

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

The investment breakdown uses NACE (Nomenclature of Economic Activities), as developed by the European Union, and is expressed as a % of Net Asset Value (NAV).

The table shows a breakdown of the sectors and sub-sectors to which the Fund is exposed.

The investment breakdown shown represents an annual average of four quarterly measurements taken over the reporting period.

Economic Sector	% Assets
Financial and insurance activities	4.43%
Activities auxiliary to financial services and insurance activities	0.12%
Financial service activities, except insurance and pension funding	4.31%
Other*	95.57%

*These investments are investments for which no NACE code is available.

Sectors of the economy that derive revenues from economic activities related to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

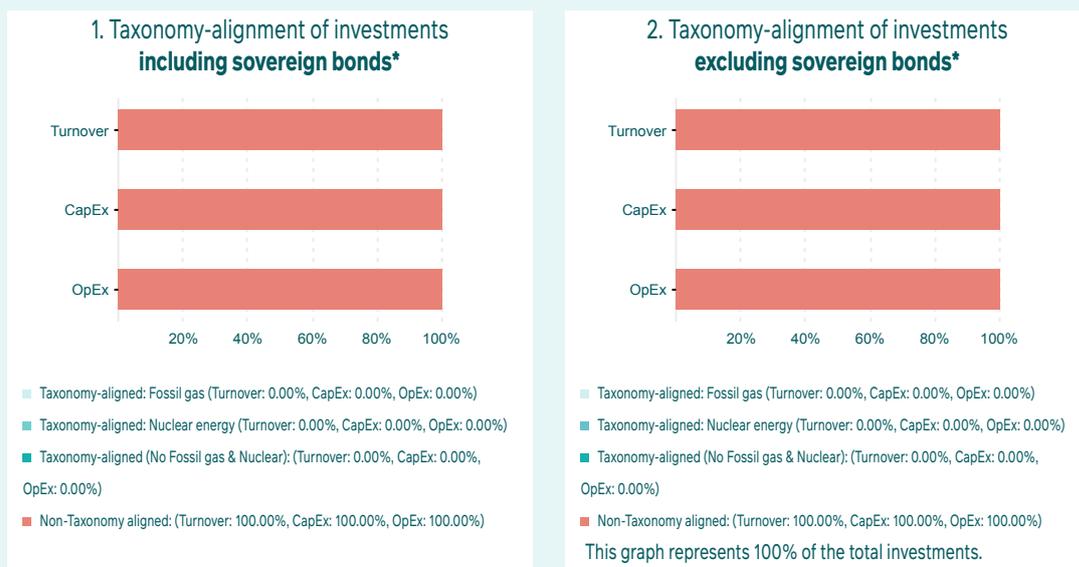

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes: In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.
The above graph and below table describes the Taxonomy alignment of all investments the Fund has made.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	0.00%
Climate Change Adaption	0.00%
Use and Protection of Water and Marine Resources	-%
Transition to a Circular Economy	-%
Pollution Prevention and Control	-%
Protection and Restoration or Biodiversity and Ecosystems	-%

- **What was the share of investments made in transitional and enabling activities?**

The Fund did not set a minimum share of investments in transitional and enabling activities and the percentage of the Fund's investments in transitional and enabling activities over the reference period was 0%.

Activity	Percentage Investments
Share of Transitional Activities	-%
Share of Enabling Activities	-%

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

Compared to the previous reference period, the proportion of sustainable investments was the same, namely 0%.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

- **What was the share of socially sustainable investments?**

The Fund does not target investment in Sustainable Investments, as stated in the Fund Prospectus and held 0% of sustainable investments during the reference period, ending 31 December 2024.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash, money market funds and FX derivatives as “Other” investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards are applied. Data was sourced at each quarter end over the full reference period, which ended on 31 December 2024.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund applied a set of exclusions to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above.

- **How did this financial product perform compared to the reference benchmark?**

N/A. No reference benchmark was designated for the purpose of attaining the Fund's environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

N/A.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

- **How did this financial product perform compared with the reference benchmark?**
N/A.
- **How did this financial product perform compared with the broad market index?**
N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: European Specialist Investment Funds - M&G Sustainable European Credit Investment Fund
Legal Entity Identifier: 2549000WVVSQ1VU6ZB54

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes
 No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 86.21% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach and applied a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund excluded certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology. Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to do significant harm to environmental and/or social objectives.

The Fund typically had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

All investments made by the Fund to attain the environmental or social characteristics were assessed for good governance and have passed the Investment Manager's test for good governance. The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager, as a minimum, has regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

No derivatives were used to attain the environmental or social characteristics.

While the Fund did not have as its objective a sustainable investment, it had a proportion of 86.21% in sustainable investments, 45.45% of them with a social objective and 39.76% with an environmental objective. For details of the Fund's sustainable investments, please see the relevant sections below.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Outcome were met all of the time during the reporting period.

The sustainability indicators selected to demonstrate the attainment of the promoted environmental and/or social characteristics are:

- Exclusionary approach: Percentage (%) of NAV held in excluded investments: 0%
- Exclusionary approach: Percentage (%) of ABS below the Investment Manager's threshold for alignment: 0%
- Positive ESG Outcome: Portfolio weighted average ESG score versus investment universe weighted average ESG score: The manager maintained the Fund's weighted average ESG score above that of the weighted average ESG score of the investment universe.
- Positive ESG Outcome: Portfolio weighted average carbon intensity versus investment universe weighted average carbon intensity: The manager maintained the Fund's weighted average carbon intensity below that of the Investment universe throughout the period.

Please note that the sustainability indicators were not subject to an external review.

The table for the Key Sustainability Indicators shown below shows "eligibility" and "coverage". "Eligibility" means what percentage of the fund's assets are eligible to be measured under this sustainability indicator while "coverage" indicates the percentage of the fund's eligible assets for which we have data available.

The indicators shown were not subject to assurance/review provided by an external party.

The indicators mentioned above apply to the whole reporting period, ending 31 December 2024.

Sustainability indicator name	Value	Eligibility	Coverage
As at - 31 December 2024			
Portfolio weighted average ESG score for the fund	7.30 ESG Score	88.79%	93.35%
Portfolio weighted average ESG score for the investment universe	7.26 ESG Score	100.00%	94.01%
Weighted average carbon intensity (WACI) for the fund	39.94 tCO2e / €m sales	88.79%	96.77%
Weighted average carbon intensity (WACI) for the investment universe	110.70 tCO2e / €m sales	100.00%	96.89%

Sustainability indicator name	Value	Eligibility	Coverage
As at - 31 December 2023			
Portfolio weighted average ESG score for the fund	7.39 ESG Score	85.56%	89.89%
Portfolio weighted average ESG score for the investment universe	7.26 ESG Score	-	-
Weighted average carbon intensity (WACI) for the fund	48.37 tCO2e / €m sales	85.56%	93.53%
Weighted average carbon intensity (WACI) for the investment universe	109.05 tCO2e / €m sales	-	-

Sustainability indicator name	Value	Eligibility	Coverage
As at - 31 December 2022			
Portfolio weighted average ESG score for the fund	7.42 ESG Score	81.31%	91.62%
Portfolio weighted average ESG score for the investment universe	7.35 ESG Score	-	-
Weighted average carbon intensity (WACI) for the fund	63.32 tCO2e / €m sales	81.31%	92.44%
Weighted average carbon intensity (WACI) for the investment universe	133.22 tCO2e / €m sales	-	-

- **...and compared to previous periods?**

As with the previous period when 0% of NAV was held in excluded investments, in this reporting period 0% of NAV was held in excluded investments.

As for the previous reporting period, 0% of ABS were below the Investment Manager's threshold for alignment.

The proportion of the Fund's sustainable investments was slightly lower in the current reference period compared to the previous period.

As it did in the previous references periods, in the current reference period the Fund maintained a higher weighted average ESG score/rating and lower weighted average carbon intensity (WACI) than an index used as a proxy for its investment universe to achieve a "Positive ESG Outcome".

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund's commitment to sustainable investments is outlined in the Fund Prospectus. This states that the Fund will have a minimum proportion of 51% of sustainable investments, comprising those with an environmental objective and/or a social objective. Those with an environmental objective do not need to qualify as environmentally sustainable under the EU Taxonomy. During the reporting period, the Fund held 86.21% investments that the Investment Manager deemed sustainable. These investments met at least one of the thresholds, defined by the Investment Manager, for positive contribution to a sustainable objective. The Fund held 39.76% of sustainable investments contributing to one or more environmental objectives and 46.45% in socially sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as set out in the following section.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Fund took the mandatory principal adverse impact (PAI) indicators, as set out in table 1 of Annex 1 of the SFDR Regulatory Technical Standards, and any relevant opt-in indicators from tables 2 and 3, into account to ensure that the Fund's sustainable investments did not do significant harm to any sustainability factor. PAIs 1-6 relating to carbon emissions were taken into account by way of applying the exclusions set out in the Manager's Thermal Coal Policy as well as the Manager's DNSH test which also includes a revenue-based exclusion relating to fossil fuel activities. PAI 14 on controversial weapons was taken into account by applying the Manager's Controversial Weapons Policy. PAI 7 on biodiversity was taken into account by applying a controversy-based exclusion which forms part of the Manager's DNSH test. The Fund also excluded any company which did not pass the Managers' Global Norms Process. The Fund may have applied additional exclusions, as outlined in the Fund Prospectus, some of which may be relevant to addressing PAIs.

Where investments are reported as Taxonomy aligned, the economic activities invested in also met the do no significant harm criteria as set out in Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (EU Taxonomy Regulation).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All sustainable investments were subject to the Manager's Global Norms Process which assesses adherence to the OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager received principal adverse impact research data to identify the Fund's principal adverse impacts prior to investing. Consideration of certain principal adverse impacts was reinforced by applying the exclusions as set out in M&G house Policies; fund-specific exclusions as set out in the Fund Prospectus; or were screened out as a result of the Fund Manager's Global Norms Process. Where no exclusions were applied, principal adverse impacts were assessed qualitatively and monitored by the Fund Manager on an ongoing basis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 to 31/12/2024

Largest investments	Sector	% Assets	Country
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	2.79%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.49%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.42%	DE
ING GROEP NV	Financial and insurance activities	0.95%	NL
JPMORGAN CHASE & CO	Financial and insurance activities	0.85%	US
ABN AMRO BANK NV	Financial and insurance activities	0.74%	NL
CREDIT SUISSE GROUP AG	Financial and insurance activities	0.62%	CH
UNICREDIT SPA	Financial and insurance activities	0.59%	IT
CREDIT AGRICOLE SA	Financial and insurance activities	0.58%	FR
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	0.57%	DE
DEUTSCHE BANK AG	Financial and insurance activities	0.57%	DE
BPCE SA	Financial and insurance activities	0.54%	FR
BANCO SANTANDER SA	Financial and insurance activities	0.54%	ES
MASSMUTUAL GLOBAL FUNDING II	Financial and insurance activities	0.53%	US
INTESA SANPAOLO SPA	Financial and insurance activities	0.49%	IT

These investments represent an annual average of four quarterly measurements taken over the reporting period.

Please note that the Investment Manager identifies separate company issues when compiling this table of top investments rather than grouping issuers at a company (issuer) level.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 51% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures were calculated as an annual average of four quarterly measurements for the period ending 31 December 2024. The % of investments that were aligned to the environmental or social characteristics promoted was 96.31% of NAV. This comprised 86.21% of NAV in sustainable investments, and the remaining 10.10% of NAV in investments with other environmental and or social characteristics.

Sustainable investments allocated to 'Taxonomy-aligned' economic activities are reported under 'Taxonomy-aligned'. The remainder of the sustainable investments is allocated to 'sustainable – other environmental' and/or 'sustainable – social', based on the following two criteria:

- I. Whether they pass the sustainable investment test on the basis of environmental and/or social contribution (in line with the sustainable investment methodology outlined above); and
- II. The attribution to environmental and/or social as set out by the Fund's pre-contractual commitment to invest in sustainable investments with environmental and/or social objectives.

Where Funds are not committed to any specific type of sustainable investment in the pre-contractual commitment, the investment is split in equal parts between 'sustainable – other environmental' and 'sustainable – social'

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 1.60% were aligned to the EU Taxonomy. 38.16% related to investments with other environmental characteristics (sustainable), and 46.45% related to socially sustainable investments.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned and/or sustainable investment proportion of the Fund.

Historic Asset Allocation (the methodology has changed from the previous reference period and as such the data is not an exact comparison):

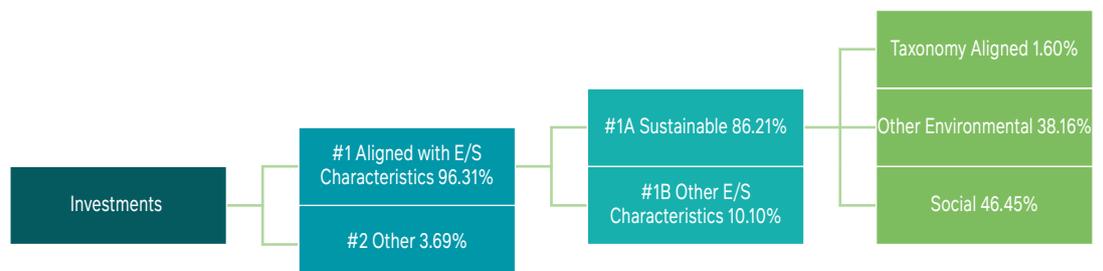

FY 2022: #1 Aligned with E/S Characteristics 97.53%; #2 Other 2.47%; #1A Sustainable 82.61%; #IB Other E/S Characteristics 14.92%; Taxonomy-Aligned 0.24%; Other Environmental 41.77%; Social 40.6%

FY 2023: #1 Aligned with E/S Characteristics 97.55%; #2 Other 2.45%; #1A Sustainable 86.98%; #IB Other E/S Characteristics 10.58%; Taxonomy-Aligned 1.00%; Other Environmental 37.12%; Social 48.87%

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities), as developed by the European Union, and is expressed as a % of Net Asset Value (NAV).

The table shows a breakdown of the sectors and sub-sectors to which the Fund is exposed.

The investment breakdown shown represents an annual average of four quarterly measurements taken over the reporting period.

Economic Sector	% Assets
Financial and insurance activities	69.04%
Financial service activities, except insurance and pension funding	62.86%
Insurance, reinsurance and pension funding, except compulsory social security	2.78%
Activities auxiliary to financial services and insurance activities	3.41%
Public administration and defence; compulsory social security	7.19%
Manufacturing	5.62%

Other*	0.33%

*These investments are investments for which no NACE code is available.

Sectors of the economy that derive revenues from economic activities related to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The EU Taxonomy aligned investments made during this reporting period are incidental and may be lower or 0% in future periods.

The Fund held 1.60% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter-end figure for each quarter in the reference period and averaging it.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

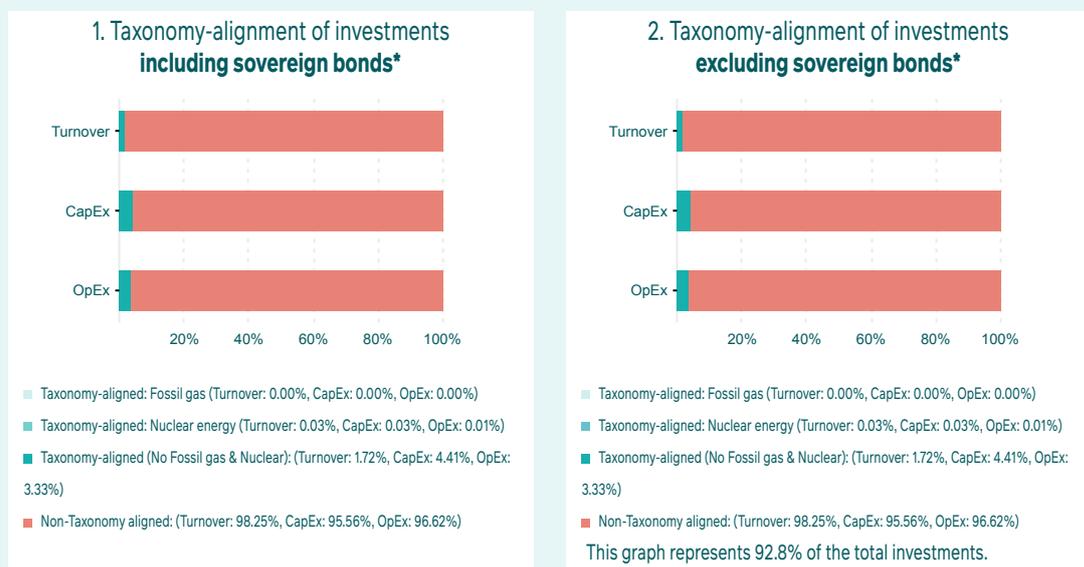

- Yes: In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
The above graph and below table describes the Taxonomy alignment of all investments the Fund has made.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	1.65%
Climate Change Adaption	0.03%
Use and Protection of Water and Marine Resources	0.00%
Transition to a Circular Economy	0.01%
Pollution Prevention and Control	0.04%
Protection and Restoration or Biodiversity and Ecosystems	0.00%

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.15% and in enabling activities was 0.94%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.15%
Share of Enabling Activities	0.94%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference period, the Fund held more Taxonomy-aligned investments in this reference period than in previous periods.

A number of factors may contribute to the changes since the previous year and a comparison may not be like for like. The changes may be due to, amongst others, an increase or decrease in the Fund's size, a change in data coverage or a change in the proportion of the Fund invested in a particular asset class.

Reference period	Including sovereign bonds			Excluding sovereign bonds		
	Turnover	CapEx	OpEx	Turnover	CapEx	OpEx
As at - 31 December 2024	1.75%	4.44%	3.38%	1.75%	4.44%	3.38%
As at - 31 December 2023	1.08%	2.25%	1.71%	1.22%	2.52%	1.92%
As at - 31 December 2022	0.19%	0.12%	0.14%	0.19%	0.12%	0.14%

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38.16%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

Corporate disclosure of Taxonomy alignment is still in a nascent phase and reported Taxonomy alignment data remains low for the time being. We expect the numbers to increase as corporates gain further experience with the reporting of Taxonomy alignment, and as more corporates align their economic activities to the criteria of the EU Taxonomy.

 **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 46.45%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash, term deposits and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy. No minimum environmental or social safeguards were applied. Data was sourced at each quarter end over the full reference period, which ended on 31 December 2024.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund applied a set of exclusions to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above. It also applied a Positive ESG Tilt as reported above.

How did this financial product perform compared to the reference benchmark?

N/A. No reference benchmark was designated for the purpose of attaining the Sub-Fund's sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

N/A.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A.

● **How did this financial product perform compared with the reference benchmark?**

N/A.

- **How did this financial product perform compared with the broad market index?**
N/A.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: European Specialist Investment Funds - M&G Sustainable Total Return Credit Investment Fund
Legal Entity Identifier: 25490084CBA1PTW2A983

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes
 No

It made **sustainable investments with an environmental objective:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.53% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the use of an Exclusionary Approach by excluding certain potential investments from its investment universe to mitigate potential negative effects on the environment and society and to assist it in delivering more sustainable outcomes. For securitised investments, such as asset-backed securities (ABS), this also included assessing them against the Investment Manager's proprietary scoring methodology. Accordingly, the Investment Manager promoted environmental and/or social characteristics by excluding certain investments that are considered to do significant harm to environmental and/or social objectives.

It also applied a strategy to achieve a Positive ESG Outcome (as defined below):

The Fund typically had a higher weighted average ESG rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe ("Positive ESG Outcome"). The Fund's calculation methodology did not include those securities that do not have carbon intensity data respectively, or cash, near cash, some derivatives and some collective investment schemes.

In constructing a portfolio which favours investments with better ESG characteristics, the Investment Manager may nonetheless invest in investments across the full spectrum of ESG ratings remaining within the narrowed universe. At an individual security level, the Investment Manager favours investments with better ESG characteristics where this is not detrimental to the pursuit of the financial investment objective.

No reference benchmark has been designated for the purpose of attaining the Fund's promoted environmental and/or social characteristics.

All investments made by the Fund to attain the environmental or social characteristics were assessed for good governance and have passed the Investment Manager's test for good governance. The Investment Manager operates a data-driven quantitative good governance test used to consider investments into companies. M&G excludes investments in securities that are considered as failing the Investment Manager's good governance test. When assessing good governance practice the Investment Manager, as a minimum, has regard to matters it sees relevant to the four identified pillars of good governance (sound management structures, employee relations, remuneration of staff and tax compliance).

No derivatives were used to attain the environmental or social characteristics.

While the fund did not have as its objective a sustainable investment, it had a proportion of 60.53% in sustainable investments, 27.16% of them with a social objective and 33.37% with an environmental objective. For details of the Fund's sustainable investments, please see the relevant sections below.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The Fund's sustainability indicators to test its compliance with its Exclusionary Approach and Positive ESG Outcome were met nearly all of the time during the reporting period.

There was one passive breach after Italian natural gas operator SNAM was removed from our list of permitted energy holdings that have a credible climate transition plan, meaning it was no longer a permitted holding. Trades were made to bring the Fund back into compliance.

The sustainability indicators selected to demonstrate the attainment of the promoted environmental and/or social characteristics are:

- Exclusionary approach: Percentage (%) of NAV held in excluded investments: The Fund's sustainability indicators to test its compliance with its Exclusionary Approach were met nearly all of the time during the reporting period.
- Exclusionary approach: Percentage (%) of ABS below the Investment Manager's threshold for alignment: 0% below alignment
- Positive ESG Outcome: Portfolio weighted average ESG score versus investment universe weighted average ESG score: The manager maintained the Fund's weighted average ESG score above that of the weighted average ESG score of the investment universe throughout the reference period.
- Positive ESG Outcome: Portfolio weighted average carbon intensity versus investment universe weighted average carbon intensity: The manager maintained the Fund's weighted average carbon intensity below that of the Investment universe throughout the reference period.

Please note that the sustainability indicators were not subject to an external review.

The table for the Key Sustainability Indicators shown below shows "eligibility" and "coverage". "Eligibility" means what % of the fund's assets are eligible to be measured under this sustainability indicator while "coverage" indicates the % of the fund's eligible assets for which we have data available.

The indicators shown were not subject to assurance/review provided by an external party.

The indicators mentioned above apply to the whole reporting period, ending 31 December 2024.

Sustainability indicator name	Value	Eligibility	Coverage
As at - 31 December 2024			
Portfolio weighted average ESG score for the fund	7.28 ESG	-	-
Portfolio weighted average ESG score for the Investment Universe	6.28 ESG	-	-
Weighted average carbon intensity (WACI) for the fund	56.89 tCO ₂ e / €m sales	63.49%	94.94%
Weighted average carbon intensity (WACI) for the Investment Universe	239.75 tCO ₂ e / €m sales	-	-

Sustainability indicator name	Value	Eligibility	Coverage
As at - 31 December 2023			
Portfolio weighted average ESG score for the fund	7.14 ESG Score	77.86%	94.19%
Portfolio weighted average ESG score for the Investment Universe	6.27 ESG Score	-	-
Weighted average carbon intensity (WACI) for the fund	80.95 tCO ₂ e / €m sales	77.86%	88.02%
Weighted average carbon intensity (WACI) for the Investment Universe	238.18 tCO ₂ e / €m sales	-	-

Sustainability indicator name	Value	Eligibility	Coverage
As at - 31 December 2022			
Portfolio weighted average ESG score for the fund	7.08 ESG-score	81.60%	92.54%
Portfolio weighted average ESG score for the Investment Universe	6.10 ESG-score	-	-
Weighted average carbon intensity (WACI) for the fund	90.21 tCO ₂ e / €m sales	81.60%	93.31%
Weighted average carbon intensity (WACI) for the Investment Universe	267.12 tCO ₂ e / €m sales	-	-

- **...and compared to previous periods?**

Compared with the previous reporting period when no breaches occurred in the exclusionary approach, there was one passive breach during the reference period.

As for the previous reporting period, 0% of ABS were below the Investment Manager's threshold for alignment.

The proportion of the Fund's sustainable investments was lower in the current reference period compared to the previous period. As it did in the previous reference periods, in the current period the Fund maintained a higher weighted average ESG score/rating and lower weighted average carbon intensity than an index used as a proxy for its investment universe to achieve a "Positive ESG Outcome".

A number of factors may contribute to the changes since the previous year and a comparison may not be like for like. The changes may be due to, amongst others, an increase or decrease in the Fund's size, a change in data coverage or a change in the proportion of the Fund invested in a particular asset class.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund's commitment to sustainable investments is outlined in the Fund's Prospectus. This states that the Fund will have a minimum proportion of 51% of sustainable investments, comprising those with an environmental objective and/or a social objective. Those with an environmental objective do not need to qualify as environmentally sustainable under the EU Taxonomy. During the reporting period, the Fund held 60.53% investments that the Investment Manager deems sustainable. These investments have met at least one of the thresholds, defined by the Investment Manager, for positive contribution to a sustainable objective. The Fund held 33.37% of sustainable investments contributing to one or more environmental objectives and 27.16% in socially sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Sustainable investments that the Fund made did not cause significant harm to any environmental or social sustainable investment objective as set out in the following section.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

The Fund took the mandatory principal adverse impact (PAI) indicators, as set out in table 1 of Annex 1 of the SFDR Regulatory Technical Standards, and any relevant opt-in indicators from tables 2 and 3, into account to ensure that the Fund's sustainable investments did not do significant harm to any sustainability factor. PAIs 1-6 relating to carbon emissions were taken into account by way of applying the exclusions set out in the Manager's Thermal Coal Policy as well as the Manager's DNSH test which also includes a revenue-based exclusion relating to fossil fuel activities. PAI 14 on controversial weapons was taken into account by applying the Manager's Controversial Weapons Policy. PAI 7 on biodiversity was taken into account by applying a controversy-based exclusion which forms part of the Manager's DNSH test. The Fund also excluded any company which did not pass the Managers' Global Norms Process. The Fund may have applied additional exclusions, as outlined in the Fund Prospectus, some of which may be relevant to addressing PAIs.

Where investments are reported as Taxonomy aligned, the economic activities invested in also met the do no significant harm criteria as set out in Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (EU Taxonomy Regulation).

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

All sustainable investments were subject to the Manager's Global Norms Process which assesses adherence to the OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager received principal adverse impact research data to identify the Fund's principal adverse impacts prior to investing. Consideration of certain principal adverse impacts was reinforced by applying the exclusions as set out in M&G house Policies; fund-specific exclusions as set out in the Fund Prospectus; or were screened out as a result of the Fund Manager's Global Norms Process. Where no exclusions were applied, principal adverse impacts were assessed qualitatively and monitored by the Fund Manager on an ongoing basis.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/01/2024 to 31/12/2024

Largest investments	Sector	% Assets	Country
FRANCE (REPUBLIC OF)	Public administration and defence; compulsory social security	1.65%	FR
INTERNATIONAL BANK FOR RECONSTRUCT	Activities of extraterritorial organisations and bodies	1.15%	SP
EUROPEAN INVESTMENT BANK	Financial and insurance activities	1.12%	SP
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	1.03%	DE
AFRICAN DEVELOPMENT BANK	Financial and insurance activities	1.00%	SP
ASIAN DEVELOPMENT BANK	Activities of extraterritorial organisations and bodies	1.00%	SP
EUROPEAN BANK FOR RECONSTRUCTION A	Activities of extraterritorial organisations and bodies	0.83%	SP
INTER-AMERICAN DEVELOPMENT BANK	Activities of extraterritorial organisations and bodies	0.82%	SP
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	0.80%	DE
GERMANY (FEDERAL REPUBLIC OF)	Public administration and defence; compulsory social security	0.76%	DE
KFW	Financial and insurance activities	0.71%	DE
RESEAU FERRE DE FRANCE	Transportation and storage	0.61%	FR
SPAREBANKEN VEST BOLIGKREDITT AS	Financial and insurance activities	0.43%	NO
NORDEA KIINNIITYSLUOTTOPANKKI OYJ	Financial and insurance activities	0.42%	FI
DEUTSCHE PFANDBRIEFBANK AG	Financial and insurance activities	0.40%	DE

These investments represent an annual average of four quarters measured over the reporting period.

Please note that the Investment Manager identifies separate company issues when compiling this table of Top 15 holdings rather than grouping issuers at a company (issuer) level.

What was the proportion of sustainability-related investments?

In the SFDR Level 2 Pre-Contractual Disclosure (annex to the Fund Prospectus) the Fund committed to 70% of the Fund to be aligned to the promoted E/S characteristics and a minimum of 51% in Sustainable Investments.

Asset allocations below are expressed as a percentage of Net Asset Value (NAV). The figures are calculated as an annual average of four quarterly measurements for the period ending 31 December 2024. The % of investments that were aligned to the environmental or social characteristics promoted was 76.25% of NAV. This comprised 60.53% of NAV in sustainable investments, and the remaining 15.73% of NAV in investments with other environmental and/or social characteristics.

Sustainable investments allocated to 'Taxonomy-aligned' economic activities are reported under 'Taxonomy-aligned'. The remainder of the sustainable investments is allocated to 'sustainable – other environmental' and/or 'sustainable – social', based on the following two criteria:

- I. Whether they pass the sustainable investment test on the basis of environmental and/or social contribution (in line with the sustainable investment methodology outlined above); and
- II. The attribution to environmental and/or social as set out by the Fund's pre-contractual commitment to invest in sustainable investments with environmental and/or social objectives.

Where Funds are not committed to any specific type of sustainable investment in the pre-contractual commitment, the investment is split in equal parts between 'sustainable – other environmental' and 'sustainable – social'

Whilst the Fund did not commit to invest in investments aligned to the EU Taxonomy, 1.14% were aligned to the EU Taxonomy. 32.23% related to investments with other environmental characteristics (sustainable), and 27.16% related to socially sustainable investments.

All sovereign assets, including those held for liquidity purposes, have been assessed against the manager's sovereign framework and have been allocated to the E/S aligned and/or sustainable investment proportion of the Fund.

Historic Asset Allocation (the methodology has changed from the previous reference period and as such the data is not an exact comparison):

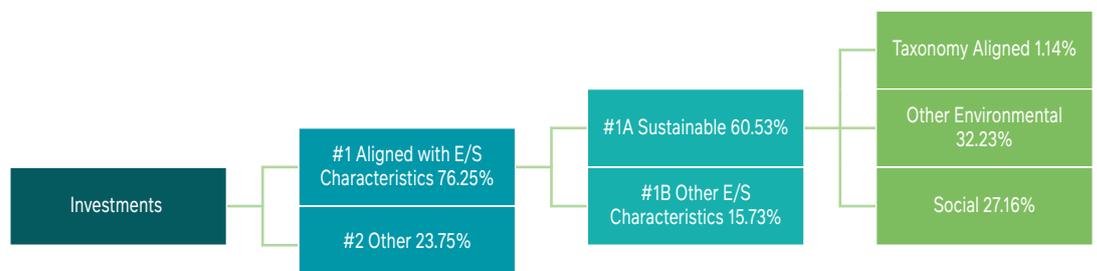

FY 2022: #1 Aligned with E/S Characteristics 83.19%; #2 Other 16.81%; #1A Sustainable 59.99%; #1B Other E/S Characteristics 23.20%; Taxonomy-Aligned 0.10%; Other Environmental 28.51%; Social 31.37%

FY 2023: #1 Aligned with E/S Characteristics 88.42%; #2 Other 11.58%; #1A Sustainable 70.97%; #1B Other E/S Characteristics 17.45%; Taxonomy-Aligned 0.63%; Other Environmental 33.40%; Social 36.94%

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The graphic below provides an overview of the asset allocation.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **In which economic sectors were the investments made?**

The investment breakdown uses NACE (Nomenclature of Economic Activities), as developed by the European Union, and is expressed as a % of Net Asset Value (NAV).

The table shows a breakdown of the sectors and sub-sectors to which the Fund is exposed.

The investment breakdown shown represents an annual average of four quarterly measurements taken over the reporting period.

Economic Sector	% Assets
Financial and insurance activities	65.00%
Activities auxiliary to financial services and insurance activities	1.62%
Financial service activities, except insurance and pension funding	61.62%

*These investments are investments for which no NACE code is available.

Sectors of the economy that derive revenues from economic activities related to fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to Taxonomy-aligned sustainable investments is 0%, the Fund is permitted to allocate to such investments, which would form part of its overall allocation to sustainable investments with environmental objectives. The EU Taxonomy aligned investments made during this reporting period are incidental and may be lower or 0% in future periods.

The Fund held 1.14% in Taxonomy-aligned sustainable investments during the reference period. This percentage is determined by taking the quarter-end figure for each quarter in the reference period and averaging it.

No assurance from an auditor, third party or review was undertaken on the EU Taxonomy data.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes: In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

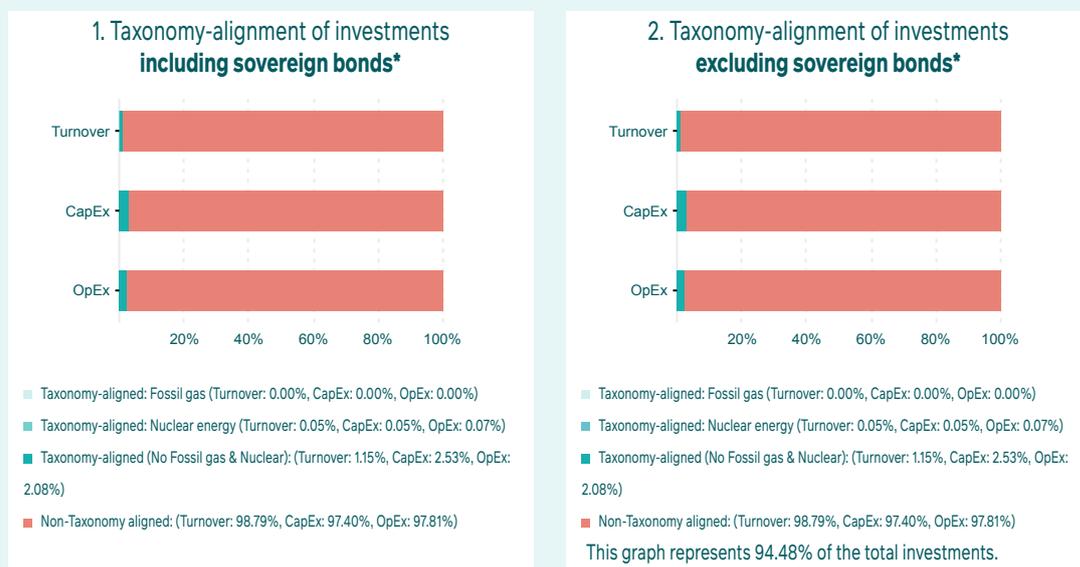

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The above graph and below table describes the Taxonomy alignment of all investments the Fund has made.

Taxonomy Environmental Objective	Percentage of Contribution
Climate Change Mitigation	1.10%
Climate Change Adaption	0.01%
Use and Protection of Water and Marine Resources	0.03%
Transition to a Circular Economy	0.25%
Pollution Prevention and Control	0.26%
Protection and Restoration or Biodiversity and Ecosystems	0.03%

● **What was the share of investments made in transitional and enabling activities?**

The share of the Fund's investments made in transitional activities over the period was 0.05% and in enabling activities was 0.59%. This compares to a minimum percentage commitment of 0% stated in the Fund's precontractual disclosure.

Activity	Percentage Investments
Share of Transitional Activities	0.05%
Share of Enabling Activities	0.59%

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Compared to the previous reference periods, the Fund held more Taxonomy-aligned investments in this reference period.

A number of factors may contribute to the changes since the previous year and a comparison may not be like for like. The changes may be due to, amongst others, an increase or decrease in the Fund's size, a change in data coverage or a change in the proportion of the Fund invested in a particular asset class.

Reference period	Including sovereign bonds			Excluding sovereign bonds		
	Turnover	CapEx	OpEx	Turnover	CapEx	OpEx
As at - December 2024	1.21%	2.60%	2.19%	1.21%	2.60%	2.19%
As at - December 2023	0.96%	1.84%	1.60%	1.00%	1.95%	1.71%
As at - December 2022	0.30%	0.51%	0.39%	0.30%	0.51%	0.39%

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32.23%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

Corporate disclosure of Taxonomy alignment is still in a nascent phase and reported Taxonomy alignment data remains low for the time being. We expect the numbers to increase as corporates gain further experience with the reporting of Taxonomy alignment, and as more corporates align their economic activities to the criteria of the EU Taxonomy.

 **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 27.16%. This compares to a minimum percentage commitment of 5% stated in the Fund's precontractual disclosure.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

During the reference period the Fund held varying levels of cash, term deposits and FX derivatives as "Other" investments, for any purpose permitted by the Fund's investment policy.

No minimum environmental or social safeguards were applied. Data was sourced at each quarter end over the full reference period, which ended on 31 December 2024.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund applied a set of exclusions to achieve its Exclusionary Approach. Its compliance with the same is reported in the sustainability indicators section above. It also applied a strategy to achieve a Positive ESG Outcome as reported above.
