Audited Annual Report
For the year ended 28 February 2025

(R.C.S. Luxembourg B34457)

Annual Report

Registered Office:

2-4 rue Eugène Ruppert, L-2453 Luxembourg

No subscription can be accepted on the basis of financial reports alone. Subscriptions, in order to be valid, must be made on the basis of the current Prospectus supplemented by a copy of the latest available Audited Annual Report and a copy of the latest Unaudited Interim Report, if later than such Audited Annual Report.

Copies of the Prospectus, Audited Annual Report and Unaudited Interim Report may be obtained at the Registered Office of the Company (Invesco Funds), 2-4 rue Eugène Ruppert, L-2453 Luxembourg, as well as from the offices of the Invesco Management S.A. in Luxembourg. Notices of all General Meetings will be published to the extent required by law, in the Mémorial, Recueil des Sociétés et Associations ("Mémorial") and will be sent to holders of registered Shares at their address in the Register of Shareholders by post at least 8 days prior to meetings. In the event of any discrepancy between translations from English text into foreign languages, please note that the English text will prevail.

Equalisation is calculated for tax reporting purposes and is not disclosed in the Audited Annual or Interim Report.

Report of the Board of Directors

Dear Shareholders,

The following report provides a summary of the financial results of the Invesco Funds for the year ended 28 February 2025 together with a market review for that year.

Invesco Funds (the "SICAV") is a UCITS under Part I of the Law of 17 December 2010 on undertakings for collective investment as amended or supplemented from time to time (the "2010 Law") authorised and supervised by the CSSF in Luxembourg. The SICAV is an umbrella investment company with variable capital having segregated liability between its sub-funds (the "Funds").

The SICAV complies with the principles set out in the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct Revision 2022 (the "Code").

The Assets Under Management decreased from USD 36,541,707,832 on 29 February 2024 to USD 36,445,291,606 28 February 2025.

- The Net Payments from redemption of shares was USD (1,789,137,918) for the year.
- The Net Income for the year ended 28 February 2025 was USD 916,305,576 compared with USD 970,949,067 on 29 February 2024.

The following report covers the year from 1 March 2024 to 28 February 2025.

Market Overview

Global equities had a positive 12-month period, with the MSCI All Country World Index delivering double-digit returns, buoyed by waning inflationary pressures, interest rate cuts in developed economies, Donald Trump's election victory, and Chinese fiscal stimulus. The top performing sectors in terms of returns included communication services, financials, utilities, and information technology.

The S&P 500 performed well, with key market drivers being the performance of US technology stocks which were supported by enthusiasm about Artificial Intelligence (AI), economic growth and earnings, interest rate cuts from the Federal Reserve (Fed), and Donald Trump's election victory.

Chipmaker Nvidia was among the top performers, benefitting from increased demand for AI-related products. Nvidia extended record highs, most notably in mid-2024 when it briefly became the largest company globally by market capitalisation reaching \$3.34 trillion. It wasn't all smooth sailing though. Chinese AI company DeepSeek caused a moment of significant volatility in January 2025, impacting US tech stocks. Nvidia saw a record \$589 billion of its market capitalisation erased, driven by investor concern surrounding DeepSeek's low-cost AI model, rivalling those of the US tech companies. Although markets recovered quickly, this moment once again brought close attention to tech-stock valuations.

The US presidential election held in November 2024 produced an election victory for Donald Trump. This triggered the "Trump-trade" in markets which reflected optimism and expectations that the new administration would deregulate key industries, cut taxes, reduce immigration, and impose higher tariffs on imports into the US.

Staying with the US, after much speculation about when the Fed would begin to cut interest rates – it finally happened. First in September, by 50 basis points from 5.50% to 5.00%, followed by two more additional cuts of 25 basis points each time. This came after the inflation rate in the US eased significantly from its peak. However, in December the Fed signalled that there would be fewer rate cuts in 2025, as inflation remained stubborn for the second half of 2024. Elsewhere, we also saw central banks cutting interest rates to varying degrees, with the Bank of England lowering borrowing rates three times over the period, the European Central Bank five, and the Bank of Canada six.

It wasn't all one way traffic. The Bank of Japan (BoJ) raised borrowing rates three times over the period, ending an eight-year negative interest rate policy. The increase in March 2024 marked the first hike from the BoJ since 2007, which reflected the central bank's belief at the time that inflation was heading in the right direction. This, along with additional monetary policy actions like removing yield curve controls, drove Japanese equity markets higher.

That being said, the second interest rate hike (+25bps) in late July caused a dramatic sell-off in global markets. The yen "carry trade" (borrowing yen at low interest rates and investing in higher-rate currencies), 'unwound' when the BoJ raised its interest rate. The yen strengthened and investors reversed these trades, selling off foreign investments to repay yen loans. This resulted in falling investment prices and increased global market volatility. After the sell off, the Nikkei recovered a significant portion of the ground lost, however it still fell short of the early July highs.

In China, equity markets gained over the period buoyed by fiscal and monetary policy measures announced by the government in late September, in an attempt to bolster its economy. The Chinese economy has been impacted by the effects of a sluggish recovery from the country's zero-COVID lockdown, a property downturn, and weaker consumer confidence. The stimulus measures aimed to boost domestic consumption and investment, leading to a positive impact on Chinese equity markets. The policies reinforced investor sentiment and highlighted China's role as a key player in the global economy.

The stimulus measures aimed to boost domestic consumption and investment, leading to a positive impact on Chinese equity markets. The policies reinforced investor sentiment and highlighted China's role as a key player in the global economy.

Dated: 24 June 2025

²Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund. Effective 15 March 2024, Invesco Global Targeted Returns Fund (i.e. "A1" Share class) was put into liquidation.

[^]Combined aggregate of all sub-funds. Investments by one sub-fund into another are not eliminated, and are thus accounted twice in the combined figures. See Note 2(s) on the Notes to the Financial Statements.

^{^^}With the exchange rates prevailing as at 29 February 2024, this amount was equal to USD 36,541,707,832.

The accompanying notes form an integral part of these financial statements.

Notes to the Financial Statements

1. General

Invesco Funds (the "Fund") is an investment company organised under part I of the Luxembourg Law on collective investment of 17 December 2010, as amended, as a Société Anonyme qualifying as a Société d'Investissement à Capital Variable ("SICAV"). The Fund is an umbrella fund, comprising 74 active sub-funds with each sub-fund being treated as a separate entity.

(a) Classes of Shares

The following table lists the classes of Shares within the Fund as at 28 February 2025:

Shares	Available currency	Available to	Distribution policy
A	AUD, CAD, CHF, CNH, CZK, EUR, GBP, HKD, JPY, NZD, SEK, SGD, USD	All investors.	Accumulation or Distribution
A1	USD	Reserved to Shareholders which have invested during the Initial Offering Period and a limited period of time thereafter at the discretion of the Management Company.	Accumulation or Distribution
B	EUR, JPY, USD	Customers of distributors or intermediaries appointed specifically for the purpose of distributing the B Shares.	Accumulation or Distribution
C	CHF, CNH, EUR, GBP, HKD, JPY, SGD, USD	Distributors (contracted with the Management Company or an Invesco Sub-Distributor) and their clients who have a separate fee arrangement between them, other institutional investors or any other investor at the Management Company's discretion.	Accumulation or Distribution
E	AUD, EUR, USD	All investors.	Accumulation or Distribution
E1	EUR	Reserved to Shareholders which have invested during the Initial Offering Period and a limited period of time thereafter at the discretion of the Management Company.	Accumulation or Distribution
FA	EUR, USD	Investors and financial intermediaries, who have an agreement with the Management Company (covering the fee structure relevant to the investors).	Accumulation or Distribution
I	AUD, CAD, CNH, EUR, GBP, HKD, USD	Investors: (i) who, at the time the relevant subscription order is received, are clients of Invesco with an agreement covering the charging structure relevant to the investors' investments in such Shares; and (ii) who are institutional investors. The SICAV may also allow affiliated funds access the I shares for which no management fee/agreement will be necessary.	Accumulation or Distribution
P1/P11	CHF, CNH, EUR, GBP, JPY, SGD, USD	Investors and financial intermediaries, who have an agreement with the Management Company (covering the fee structure relevant to the investors). "P11" shares will be reserved for institutional investors.	Accumulation or Distribution
R	EUR, JPY, USD	All investors.	Accumulation or Distribution
S	CHF, EUR, GBP, JPY, SGD, USD	Investors who, at the time the relevant subscription order is received, are institutional investors.	Accumulation or Distribution
T1/T11	EUR, GBP, JPY, USD	Financial intermediaries, which according to regulatory requirements or based on individual fee arrangements with their clients are not allowed to accept and keep commissions on management fee, subject to the approval of the Management Company. "T1" Shares will be reserved for institutional investors, who have an agreement with the Management Company. The relevant management fee applicable to each "T1" or "T11" Share will be published on the Website of the Management Company and in the annual report. No commission on management fee may be paid to any financial intermediary in relation to any of the "T1" or "T11" Shares.	Accumulation or Distribution
Z	AUD, CHF, CNH, EUR, GBP, HKD, JPY, SGD, USD	Financial intermediaries, which according to regulatory requirements or based on individual fee arrangements with their clients, are not allowed to accept and keep commissions on management fee, subject to the approval of the Management Company. No commissions on management fee may be paid to any financial intermediary in relation to any of the "Z" Shares.	Accumulation or Distribution

Notes to the Financial Statements (continued)

1. General (continued)

(a) Classes of Shares (continued)

Hedged Share Classes are available to investors on several sub-funds. For such classes of Shares, the Fund may hedge the currency exposure of classes of Shares denominated in a currency other than the base currency of the relevant sub-fund, in order to attempt to mitigate the effect of fluctuations in the exchange rate between the Share Class currency and the base currency.

(b) Activity of the Fund

Effective 30 October 2024, the following share classes were launched:

- Invesco Emerging Markets Equity Fund E (EUR) Accumulation
- Invesco Sustainable Global Structured Equity Fund A (RMB Hedged) Monthly Distribution 1
- Invesco Pan European Small Cap Equity Fund S Accumulation
- Invesco Global Founders & Owners Fund Z (EUR) Accumulation
- Invesco Global Founders & Owners Fund Z (EUR Hedged) Accumulation
- Invesco Global Flexible Bond Fund C (EUR Hedged) Accumulation
- Invesco Global Flexible Bond Fund E (EUR Hedged) Accumulation
- Invesco Global Flexible Bond Fund S (EUR Hedged) Accumulation
- Invesco Global Flexible Bond Fund Z (EUR Hedged)

Share Class Launch

Effective 4 December 2024, the following share classes were launched:

- Invesco Global Equity Income Fund S (EUR) Accumulation
- Invesco Global Equity Income Fund S (GBP) Gross Quarterly Distribution
- Invesco Global Founders & Owners Fund A (HKD) Accumulation
- Invesco Metaverse and AI Fund A (HKD) Accumulation
- Invesco Global Income Fund A (JPY Hedged) Monthly Distribution 1
- Invesco Global Income Fund A (NZD Hedged) Monthly Distribution 1
- Invesco Pan European High Income Fund A (JPY Hedged) Monthly Distribution 1

New Prospectus

Effective 20 January 2025, a new Prospectus was issued.

Sub-Fund Merger

Effective 21 February 2025, Invesco Real Return (EUR) Bond Fund merged into Invesco Global Flexible Bond Fund.

Share Class Launch

Effective 26 February 2025, the following share classes were launched:

- Invesco UK Equity Fund Z (EUR) Accumulation
- Invesco India Equity Fund S (USD) Semi-Annual Distribution 3
- Invesco USD Ultra-Short Term Debt Fund A (USD) Gross Monthly Distribution
- Invesco Pan European High Income Fund Z (USD Hedged) Monthly Distribution 1

Notes to the Financial Statements (continued)

1. General (continued)

(c) Activity of the Fund since 28 February 2025:

Management Fee Increase

Effective 1 March 2025, Invesco Balanced-Risk Allocation 12% Fund had a management fee increase as follows:

Share Class	Management Fee	New Management Fee
P11	0.47%	0.54%

Cap Change

Effective 1 March 2025, Invesco Balanced-Risk Allocation 12% Fund had a cap increase as follows:

Share Class	Cap	New Cap
P11	0.55%	0.62%

Cap Change

Effective 1 March 2025, the ongoing charge cap on the Invesco Metaverse and AI Fund was lifted.

Sub-Fund Name Changes

Effective 24 March 2025, the following Sub-Funds were renamed:

- Invesco Sustainable Global Structured Equity Fund was renamed to Invesco Sustainable Global Systematic Equity Fund.
- Invesco Sustainable Eurozone Equity Fund was renamed to Invesco Transition Eurozone Equity Fund.
- Invesco Sustainable Pan European Structured Equity Fund was renamed to Invesco Sustainable Pan European Systematic Equity Fund.
- Invesco Energy Transition Fund was renamed to Invesco Energy Transition Enablement Fund.
- Invesco Responsible Global Real Assets Fund was renamed to Invesco Global Real Assets Fund.
- Invesco Global Total Return (EUR) Bond Fund was renamed to Invesco Global Total Return Bond Fund.
- Invesco Sustainable Global High-Income Fund was renamed to Invesco Global High Yield Fund.
- Invesco Sustainable Multi-Sector Credit Fund was renamed to Invesco Multi-Sector Credit Fund.
- Invesco Sustainable Global Income Fund was renamed to Invesco Transition Global Income Fund.

Sub-Fund Merger

Effective 11 April 2025, Invesco UK Investment Grade Bond Fund merged into Sterling Bond Fund.

Share Class Launch

Effective 28 April 2025, the following share classes were launched:

- Invesco Emerging Markets Equity Fund J Monthly Distribution 1
- Invesco Global Equity Income Fund Z (EUR) Accumulation
- Invesco US Value Equity Fund J Monthly Distribution 1
- Invesco Continental European Small Cap Equity Fund Z (USD) Annual Distribution
- Invesco Pan European Focus Equity Fund Z (EUR) Annual Distribution
- Invesco Japanese Equity Advantage Fund Z (EUR) Annual Distribution

Invesco Asian Flexible Bond Fund A (RMB Hedged) Monthly Distribution 1
Invesco Global Total Return Bond Fund Z (USD Hedged) Accumulation
Invesco USD Ultra-Short Term Debt Fund I Accumulation

2. Summary of Significant Accounting Policies

(a) The accompanying financial statements have been prepared in accordance with the format prescribed by Luxembourg regulations. Combined figures appearing in the Statement of Net Assets are for statistical purposes only and should not be used by investors with holdings in one or more sub-funds.

(b) Valuation of investments

Investments, including financial derivative instruments, are valued on the basis of the latest dealing price or the latest available midmarket quotation (the midpoint between the latest quoted bid and offer prices) of the securities on the relevant securities market on which the investments of the Fund are traded, quoted or dealt as at the Valuation Point on that day. Where investments of a sub-fund are both listed on a stock exchange and dealt by market makers outside the stock exchange on which the investments are listed, then the SICAV will determine the principal market for the investments in question and they are valued at the latest available price in that market. Securities which are not quoted or dealt in any stock exchange but which are dealt in on any other regulated market are valued in a manner as near as possible to that described above. If no price quotation is available for any of the securities held by a sub-fund or if the value as determined pursuant to the points above is not representative of the fair market value of the relevant securities, the value of such securities is based on the reasonably foreseeable sales price determined prudently and in good faith. Short-term money-market instruments are valued based on amortised cost method. Commercial papers and certificates of deposit may be valued at nominal values plus any accrued interest or on an amortised cost basis, which approximates their fair market value. The financial statements of sub-funds liquidated after closing are prepared on a non-going concern basis.

The financial statements have been prepared on the basis of the last Net Asset Values ("NAVs") determined in the accounting period. In accordance with the Prospectus, NAVs were calculated by reference to the latest available prices at 1.00 p.m. (Luxembourg time) on 28 February 2025 for all sub-funds of the Fund.

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(c) Impact on values

By way of information, if the Fund had calculated the NAVs solely with a view to publication, the market prices used to value the investment portfolio would have been the closing prices on 28 February 2025 for the entire investment portfolio, including the American and European equities. However, these NAVs would not have been significantly different from those shown in these audited financial statements except for the following sub-funds:

Invesco Global Equity Income Advantage Fund; an increase in the Net Asset Value of approximately 0.61% would have been observed.
 Invesco Sustainable Global Structured Equity Fund; an increase in the Net Asset Value of approximately 0.71% would have been observed.
 Invesco US Value Equity Fund; an increase in the Net Asset Value of approximately 1.02% would have been observed.
 Invesco Asia Consumer Demand Fund; an increase in the Net Asset Value of approximately 0.62% would have been observed.
 Invesco Asia Opportunities Equity Fund; an increase in the Net Asset Value of approximately 0.55% would have been observed.
 Invesco China New Perspective Equity Fund; a decrease in the Net Asset Value of approximately 0.65% would have been observed.
 Invesco Global Consumer Trends Fund; an increase in the Net Asset Value of approximately 1.06% would have been observed.
 Invesco Global Founders & Owners Fund; an increase in the Net Asset Value of approximately 0.70% would have been observed.
 Invesco Global Health Care Innovation Fund; an increase in the Net Asset Value of approximately 0.96% would have been observed.
 Invesco Sustainable Allocation Fund; an increase in the Net Asset Value of approximately 0.59% would have been observed.
 Invesco Metaverse and AI Fund; an increase in the Net Asset Value of approximately 0.59% would have been observed.

(d) Cost of sales of investments

Any surplus or deficit on sales of investments is determined on the basis of average cost.

(e) Income from investments

Dividend income is accounted for on an ex-dividend basis. Income arising on fixed interest securities and deposit interest is accrued on a day-to-day basis. Amortisation/Accretion of Premium/Discount is disclosed under the Income section on the Statement of Operations and Changes in Net Assets. Amortisation is the process of decreasing the book value of a bond purchased at a premium until the book value is equal to the par value at the time of maturity. As the book value is reduced, it is accounted for as a reduction in net investment income. Accretion is the process of writing up the book value of a bond purchased at a discount. As the book value is increased, it is accounted for as an increase in net investment income. The Amortisation /Accretion approach provides a consistent accounting treatment over the life of bond-like assets of the capital gain or loss associated with holding these assets.

(f) Foreign exchange

Transactions in currencies other than the designated currency for each sub-fund are translated at the rates of exchange ruling at the time of the transactions. The market value of the investments and other assets and liabilities in currencies other than the designated currency for each sub-fund are translated at the rates of exchange ruling at the year end.

The main exchange rates used as at 28 February 2025:

Currency	USD 1.00	Currency	USD 1.00	Currency	USD 1.00
ARS	1062.0005	HKD	7.7793	RUB	88.4001
AUD	1.6081	HUF	384.8928	SAR	3.7503
BRL	5.8346	IDR	16580.0010	SEK	10.7534
CAD	1.4431	ILS	3.5943	SGD	1.3483
CHF	0.9027	INR	87.5038	THB	34.1725
CLP	954.3501	JPY	150.4000	TRY	36.5175
CNH	7.2865	KRW	1462.9000	TWD	32.8125
CNY	7.2832	MXN	20.3935	USD	1.0000
COP	4130.0005	MYR	4.4625	UYU	42.4651
CZK	24.0764	NOK	11.2728	VND	25555.0050
DKK	7.1721	NZD	1.7846	ZAR	18.4625
DOP	62.4001	PEN	3.6944		
EGP	50.6500	PHP	57.9925		
EUR	0.9617	PLN	3.9888		
GBP	0.7939	RON	4.7854		

(g) Expenses allocation

Where the Fund incurs an expense which relates to a particular sub-fund, such expense is allocated to the relevant sub-fund. In cases where an expense cannot be considered as being attributable to a particular sub-fund, such expense is allocated between sub-funds on the basis of their respective NAV.

(h) Preliminary expenses

The preliminary expenses will, if any, be borne by the Management Company.

(i) Forward foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract and is disclosed in the Statement of Net Assets (see note 8 for details). Realised gains or losses include net results on contracts which have been settled or offset on other contracts and are recorded in the Statement of Operations and Changes in Net Assets. The unrealized appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on forward foreign exchange contracts" (see note 8 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies / purchased at market value and other" and "Net change in unrealised appreciation/depreciation on forward foreign exchange contracts".

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(i) Forward foreign exchange contracts (continued)

Non-Deliverable Forwards ("NDF") are short-term forward contracts on thinly traded or non-convertible foreign currencies. Those contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from NDF are included in the Statement of Net Assets. The NDF are normally quoted and settled in USD. The NDF are disclosed together with other forward foreign exchange contracts in note 8.

(j) Futures contracts

A futures contract is a legal agreement to buy or sell a particular commodity or financial instrument at a predetermined price at a specified time in the future. Futures contracts are initially recognised at cost and subsequently are re-measured at market value. Market values are obtained from quoted market prices and exchange rates. All futures contracts are carried in assets when amounts are receivable by the Fund and in liabilities when amounts are payable by the Fund. Changes in market values of futures contracts are included in the Statement of Net Assets (see note 9 for details). The unrealised appreciation /depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on futures contracts" (see note 9 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on futures contracts".

(k) Credit default swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset occurs. If such an event occurs, the party will then make a payment to the first party and the swap will terminate. The credit default swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Net Assets (see note 10 for details). The unrealised appreciation /depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on credit default swaps" (see note 10 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on credit default swaps".

(l) Interest rate swaps

An interest rate swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged. The interest rate swaps are marked-to-market daily based upon quotations from market makers and recorded in the Statement of Net Assets (see note 11 for details). The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on interest rate swaps" (see note 11 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation /depreciation on interest rate swaps".

(m) Commodity swaps

A commodity swap is similar to a Fixed-Floating interest rate swap. The difference is that in an interest rate swap the floating leg is based on standard interest rates such as SOFR, SONIA, €STR etc., but in a commodity swap the floating leg is based on the price of underlying commodity index. No commodities are exchanged during the trade. Commodity swaps are marked-to-market using valuation sources/methods and the fair value is recorded on the Statement of Net Assets under "Unrealised gain/(loss) on commodity swaps" (see note 12 for details). The realised gains/(losses) and change in unrealised gains and losses are shown in the "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and the "Net change in unrealised appreciation/depreciation on commodity swaps" respectively in the Statement of Operations and Changes in Net Assets.

(n) Total return swaps

A total return swap is a financial contract whereby one party agrees to pay another party the total return of a defined asset in return for receiving a floating rate return. The Fund enters into unfunded swap agreements on behalf of the particular sub-fund. Total return swaps are marked-to-market using valuation sources/methods and fair value is recorded in the Statement of Net Assets. Total return swap positions are valued using models which utilise observable data to the extent practicable and contain assumptions on the application of this data. Changes in data inputs and assumptions about these factors could affect the reported fair value of the total return swaps. The unrealised appreciation/depreciation is disclosed in the Statement of Net Assets under "Unrealised gain/(loss) on total return swaps" (see note 13 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on total return swaps".

(o) Options

A purchaser of a put option has the right, but not the obligation, to sell the underlying instrument at an agreed upon price ("strike price") to the option seller. A purchaser of a call option has the right, but not the obligation, to purchase the underlying instrument at the strike price from the option seller.

Purchased options - Premiums paid by the Fund for purchased options are included in the Statement of Net Assets as an investment. The option is adjusted daily to reflect the current market value of the option and the change is recorded as unrealised appreciation or depreciation. If the option is allowed to expire the Fund will lose the entire premium it paid and record a realised loss for the premium amount. Premiums paid for purchased options which are exercised or closed are added to the amounts paid or offset against the proceeds on the underlying investment transaction to determine the realised gain/loss or cost basis of the security.

Written options - Premiums received by the Fund for written options are included in the Statement of Net Assets. The amount of the liability is adjusted daily to reflect the current market value of the written option and the change in market value is recorded as unrealised appreciation or depreciation. Premiums received from written options that expire are treated as realised gains. The Fund records a realised gain or loss on written options based on whether the cost of the closing transaction exceeds the premium received. If a call option is exercised by the option buyer, the premium received by the Fund is added to the proceeds from the sale of the underlying security to the option buyer and compared to the cost of the closing transaction to determine whether there has been a realised gain or loss. If a put option is exercised by an option buyer, the premium received by the option seller reduces the cost basis of the purchased security. Written uncovered call options subject the Fund to unlimited risk of loss. Written covered call options limit the upside potential of a security above the strike price. Written put options subject the Fund to risk of loss if the value of the security declines below the exercise price minus the put premium.

Notes to the Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

(o) Options (continued)

Outstanding options traded on a regulated market are valued based on the closing price or the last available market price of the instruments. OTC options are marked-to-market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

The market value is disclosed in the Statement of Net Assets under "Options written at market value" (see note 14 for details). Realised gains/(losses) and changes in unrealised appreciation/depreciation as a result thereof are included in the Statement of Operations and Changes in Net Assets respectively under "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" and "Net change in unrealised appreciation/depreciation on options/swaptions".

(p) Equity Linked Notes

At the year end, the Invesco Global Equity Income Advantage Fund held a number of Equity Linked Notes. A principal amount is paid to a broker at the market price of an underlying equity at an agreed date in return for a fixed coupon payment or payments. At maturity the Fund will receive the principal plus (up to an agreed cap level per the agreement) or minus any movements in the value of the underlying equity.

(q) To Be Announced securities

To Be Announced ("TBA") securities are related to mortgage backed securities issued by US government sponsored agencies. These agencies usually pool mortgage loans and sell interests in the pools created. TBAs relate to future pools of these agencies that are bought and sold for future settlement for which either the interest rate or the maturity date is not yet fixed. The specific mortgage pools are announced and allocated just before the delivery date. Certain Funds may enter into TBA purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds' other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities.

(r) Margin Accounts

Margin accounts represent the variation margin held at brokers for futures contracts, credit default swaps, inflation linked swaps and interest rate swaps. Margin is only applicable to centrally cleared positions.

(s) Cross investments

Cross sub-fund investment holdings were not eliminated from the combined figures. At 28 February 2025, the total cross sub-fund investment holdings are as mentioned below:

Invesco Asian Flexible Bond Fund amounted to USD 245,439 into Invesco Global Flexible Bond Fund.

Invesco Developing Initiatives Bond Fund amounted to USD 7,062,658 into Invesco Asian Flexible Bond Fund.

Invesco Developing Initiatives Bond Fund amounted to USD 2,588,794 into Invesco Global Flexible Bond Fund.

Invesco Sustainable Global High Income Fund amounted to USD 6,006,831 into Invesco Sustainable Multi-Sector Credit Fund.

Taking into account the above mentioned cross sub-fund investments the total combined net assets at year-end without cross sub-fund investments would have amounted to USD 36,429,387,884.

(t) Capital gains tax on investment

Indian Capital Gains Tax:

The Finance Bill 2024 (No. 2) has received Presidential assent on 16 August 2024 and becomes the Finance Act 2024.

The following tax changes are effective as of 23 July 2024 for sale transactions:

An increase in the long-term capital gains tax (CGT) rate applicable on sale of listed shares, equity oriented mutual funds, real estate investment trusts (REITs) and infrastructure investment trusts (INVTs) from 10% to 12.5% (plus applicable surcharge and cess). An increase in the short-term CGT rate applicable sale of listed shares, equity oriented mutual funds, real estate investment trusts (REITs) and infrastructure investment trusts (INVTs) from 15% to 20% (plus applicable surcharge and cess).

In The Finance Bill 2025, the tax rate for long-term capital gains on securities (other than equity including debt and derivatives) is proposed to be increased to 12.5% (current rate of tax 10%). This increase aligns with the long-term capital gain tax rate applicable for other investor classed including resident investors. The effective date is 1 April 2025, however, it is important to note that the Finance Bill 2025 is yet to be passed by the Parliament of Indian and receive the President's assent to become law.

Thailand Capital Gains Tax:

On 31 March 2022 Thailand signed and deposited its instrument of ratification of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting ("MLI"). The MLI entered into force from 1 July 2022, however for withholding taxes the MLI applies on or after 1 January 2023. Measures to prevent treaty abuse are supported by a new provision, the Principal Purpose Test ("PPT"), to deny tax benefits if one of the principal purposes is to obtain the tax benefits under the treaty. Therefore, Thailand should apply the PPT to cover tax treaties going forward. Due to the MLI, the Thai Revenue Department ("TRD") has contacted certain custodians/brokers to ask about how this position might work going forward and, therefore, the foreign investors are concerned as to whether the current position (rely on the registered owner) will be sustained after PPT applies to Thailand's treaties. The TRD currently has no clear position on whether, as a result of the MLI entering into force, it will change its interpretation to apply the concept of the beneficial owner of income, as opposed to merely the recipient of income (registered owner), on Thai CGT for foreign investors.

(u) Other debtors/Other creditors

The Other debtors line on the Statement of Net Assets can include prepaid sundry fees, accrued income, prepayments, spot contracts and contingent assets.

The Other creditors line on the Statement of Net Assets can include distributions payable, management fees payable, accrued expenses, accrued capital gains tax payable, accrued sundry fees and spot contracts.

Notes to the Financial Statements (continued)

3. Management Fees

The Directors of the Fund (the "Directors") are responsible for the investment policy, management and administration of the Fund. The Directors delegate the day-to-day investment management of the securities portfolio of the Fund to Invesco Management S.A. (the "Management Company").

In following the investment policy, the Management Company may delegate the investment management services, as appropriate, to Invesco Advisers Inc. in the United States, Invesco Asset Management Deutschland GmbH in Germany, Invesco Asset Management Limited in the United Kingdom, Invesco Canada Ltd, Invesco Hong Kong Limited, Invesco Asset Management (Japan) Limited and Invesco Asset Management Singapore Ltd. Each such investment manager may then in turn have sub-delegated the investment management services to any of the aforementioned entities.

For its services the Management Company is paid by the Fund a percentage of the NAV of each share class of each sub-fund as set out in the table below:

Sub-fund	Class A %	Class A1 %	Class B % (includes Distribution fee ⁵)	Class C %	Class E %	Class E1 %	Class FA %	Class P1/P11 %	Class R % (includes Distribution fee ⁶)	Class S %	Class T1/T11 %	Class Z %

There are no annual management fees charged for "I" Shares.

The management fees are calculated daily based on the Net Asset Value of each sub-fund on each business day and paid monthly. The fees of the Investment Manager are paid out of the Management Company's remuneration.

At its discretion the Management Company has agreed to the capping of operational expenses and total expenses, where a fund exceeds the cap an amount will be waived, this cost will be borne by the Management Company. Waived amounts are reflected in the Total Waived Expense line in the Statement of Operations and Changes in Net Assets. Refer to note 4 for details of capped funds.

¹ Effective 12 April 2024, Invesco Sustainable US Structured Equity Fund merged into Invesco Sustainable Allocation Fund.
² Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund.
³ Effective 9 August 2024, Invesco Responsible Japanese Equity Value Discovery Fund merged into Invesco Japanese Equity Advantage Fund.
⁴ Effective 21 February 2025, Invesco Real Return (EUR) Bond Fund merged into Invesco Global Flexible Bond Fund.

² Management fee in respect of share class for the noted sub-funds incorporates a management fee waiver implemented on 8 April 2020.

³ Effective 15 July 2024, Invesco PRC Equity Fund was renamed to Invesco China New Perspective Equity Fund.
⁴ Effective 14 October 2024, Invesco Belt and Road Debt Fund repositioned and was renamed to Invesco Developing Initiatives Bond Fund.

⁴ Class T1 is 0.70% and Class T11 is 0.60%.

⁵ Management fee for Class B includes a Distribution fee not exceeding 1%.

⁶ Management fee for Class R includes a Distribution fee not exceeding 0.70%.

There is no annual service agent fee charged for "I" shares.

¹ Effective 12 April 2024, Invesco Sustainable US Structured Equity Fund merged into Invesco Sustainable Allocation Fund.

Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund.

Effective 9 August 2024, Invesco Responsible Japanese Equity Value Discovery Fund merged into Invesco Japanese Equity Advantage Fund.

Effective 21 February 2025, Invesco Real Return (EUR) Bond Fund merged into Invesco Global Flexible Bond Fund.

Notes to the Financial Statements (continued)

4. Other Fees (continued)

Service Agent Fees (continued)

² Effective 15 July 2024, Invesco PRC Equity Fund was renamed to Invesco China New Perspective Equity Fund.

Effective 14 October 2024, Invesco Belt and Road Debt Fund repositioned and was renamed to Invesco Developing Initiatives Bond Fund.

³ Out of this Service Agent Fee, the Management Company discharges the fees of the Administration Agent, the Domiciliary & Corporate Agent and the Registrar & Transfer Agent as well as fees of service providers. Each of these fees shall be calculated on each Business Day on the NAV of the sub-funds (at a rate which shall be agreed from time to time with the Management Company) and paid monthly.

⁴ Class T1 is 0.06% and Class T11 is 0.05%.

The Depositary will be paid a fee calculated on a monthly basis at a rate of up to a maximum of 0.0075% per annum of the NAV of each sub-fund on the last Business Day of each calendar month (or at such higher rate as the Custodian and the SICAV may at any time agree), plus VAT (if any) and will be paid monthly. In addition, the Depositary will charge each sub-fund safekeeping and servicing fees at varying rates, depending on the country in which the assets of a sub-fund are held and currently ranging from 0.001% to 0.45% of the NAV of the assets invested in such country, plus VAT (if any), together with charges at normal commercial rates in respect of investment transactions, as agreed with the SICAV from time to time. Sub-custodian fees are paid out of these safekeeping and servicing fees.

Capped Funds

The Management Company has agreed to cap total expenses charged to the following sub-funds, at its discretion at the following ongoing rates. The other share classes not disclosed below are subject to different capping rates on total expenses based on the share class fee differentials.

² Class P1 0.65% and Class P11 0.61%. There are no other classes capped on the sub-fund.

³ Class PI is 0.59%, Class P11 is 0.55% and Class T11 is 0.69%. There are no other classes capped on the sub-fund.

⁴ Class A is 2.00% and Class A1 is 1.90%.

⁵ Only on Class P11. There are no other classes capped on the sub-fund.

⁶ The Total Expense Level Cap (A Class) includes the following expenses as detailed in the Statement of Operations and Changes in Net Assets: Management fees, Service Agent's fee, Custodian fee, Tax, Administration expenses and Other Operating Expenses.

Notes to the Financial Statements (continued)

5. Tax Status

Luxembourg

The Fund is registered under Luxembourg law as a collective investment undertaking. Accordingly, no Luxembourg income or capital gains tax is at present payable by the Fund. It is, however, subject to an annual "Taxe d'abonnement" calculated at an annual rate of 0.05% of the NAV. "I", "PI", "S" and "TI" share classes are subject to a reduced annual rate of 0.01% of the NAV, such tax being payable quarterly on the basis of the NAV of the sub-funds at the end of the relevant quarter.

No subscription tax is held on underlying Luxembourg funds already submitted to "Taxe d'abonnement". As at 28 February 2025, USD 2,365,276 Luxembourg tax was payable while USD 14,278,188 was charged in relation to Luxembourg tax for the year ended 28 February 2025.

Belgium

The Fund is registered with the Belgium Financial Services and Markets Authority in accordance with Article 154 of the Law of 3 August 2012 relating to financial markets. Funds registered for public distribution in Belgium are subject to an annual tax ("Belgian subscription tax") of 0.0925% on the NAV of shares distributed in Belgium via Belgian intermediaries as at 31 December of the previous year, with effect from 1 January 2014. As a precautionary measure, the Fund has filed claims with the Belgian tax authority and the Brussels Court of First Instance for the tax to be refunded.

The Court of Cassation ruled against the plaintiff on 25 March 2022. The Court of Cassation (French Speaking Chamber) considers that the Brussels Court of Appeal wrongly qualified the Belgian subscription tax as a capital tax, and did not rule on whether the tax falls within the scope of the double taxation convention between Belgium and Luxembourg (the "Treaty"). The case is referred back to the Court of Appeal of Liège.

Another decision of the Court of Cassation (Dutch speaking Chamber) of 21 April 2022 does not dispute that the Belgian subscription tax is a capital tax, but considers that the Belgian subscription tax does not fall within the scope of the double taxation convention between Belgium and Luxembourg Treaty. The case is referred back to the Court of Appeal of Ghent.

The Ghent Court of Appeal issued its decision on 5 November 2024, which was aligned with decisions rendered by the Brussels Court of Appeal on 25 April 2023, holding that the Belgian tax qualifies as a net wealth tax within the meaning of the Treaty and that consequently, Luxembourg SICAVs may invoke the provisions of the treaty to avoid the imposition of the Belgian subscription tax. However the day after, on 6 November 2024, the Court of Appeal of Liège ruled in the opposite direction aligning itself with the Court of Cassation (French speaking Chamber) that the Belgian subscription tax does not qualify as a net wealth tax within the meaning of the Treaty. Consequently, Luxembourg SICAVs may not invoke the provisions of the Treaty to avoid the imposition of the Belgian subscription tax.

At this stage, considering the uncertainty created by the divergence in jurisprudence between the Belgian Supreme Court and Court of Appeal in Belgium, it is not possible to prejudge the final outcome of the dispute or any reimbursement which may result in favour of the Fund. As at 28 February 2025, USD 360,387 Belgian tax was payable while USD 346,566 was charged in relation to Belgian tax for the year ended 28 February 2025.

Withholding Tax

Further to a number of rulings of the European Court of Justice regarding taxation withheld on overseas dividends, the Management Company has taken steps to make claims with certain European Tax Authorities for repayment of taxation suffered on foreign dividend income. Due to the uncertainty regarding the likely success of the claims, it is not possible to estimate the potential amount of overseas withholding tax that may be received and these are recorded on cash basis.

Pillar II analysis

Invesco has assessed the applicability of the OECD's Pillar II model rules and concluded that these rules do not apply to Invesco Funds SICAV and its sub-funds for the financial year ended 28 February 2025.

The sub-funds of Invesco Funds SICAV meet the definition of an Investment Entity for Pillar II purposes and thus is not expected to be subject to Qualified Domestic Minimum Top-up Tax ("QDMTT"), Undertaxed Profit Rule ("UTPR") and/or the Income Inclusion Rule ("IIR") in Luxembourg.

6. Reimbursement of Withholding tax claim

The sub-fund on the table below received cash payments corresponding to the reimbursements of formerly overpaid withholding tax on dividends during the year ended 28 February 2025. €1,133,340 of this reimbursement has been posted to the "Other Income" caption of the Statement of Operations and Changes in Net Assets for the sub-fund. €3,591,508 of this reimbursement was accrued in prior periods.

Sub-fund	Currency of reimbursement	Amount of reimbursement	Base currency of sub-fund	Amount of reimbursement in Base currency of sub-fund
Invesco Pan European Equity Fund	EUR	4,724,848	EUR	4,724,848

Notes to the Financial Statements (continued)

7. Dividends

In accordance with the distribution policy of the Fund, income is distributed by way of a dividend payment, only to holders of Distribution Shares.

The Fund at its absolute discretion has the power to issue certain classes of Shares that offer a fixed distribution. The following table lists the sub-funds and these classes of shares available at 28 February 2025:

Sub-fund	Class Currency	Share Class	Fixed Distribution Rate/Yield	Fixed Distribution Rate/Yield effective during the period 1 March 2024 to 28 February 2025
Invesco Global Equity Income Fund	USD	A-MD1	5.60 cents per share	5.60 cents per share from 1 March 2024 to 28 February 2025

Notes to the Financial Statements (continued)

15. Swing Pricing Policy

Securities are valued as outlined in note 2(b). However, in order to mitigate the effects of dilution, the Fund has implemented a policy of "Swing Pricing" as from 18 December 2007. The Swing Pricing mechanism may be applied against all sub-funds of the Invesco Funds.

In the best interest of Shareholders, the Directors may allow for the NAV to be adjusted, using bid or ask market quotation rather than mid, depending on the net share activity arising from subscriptions, redemptions or switching in a sub-fund for a given business day.

The sub-funds operate partial swing only. That is, the sub-funds will not swing to either a bid or ask price basis daily, but only when a pre-determined level of shareholder activity is exceeded. In such circumstances the NAV of the relevant sub-fund may be adjusted by an amount not exceeding 2.00%. High redemption level triggers a swing to a bid price basis, whereas high subscription level triggers a swing to ask price basis. The Directors have the ability to place a sub-fund on constant swing depending on the recent trends in a sub-fund.

The reconciliation on 28 February 2025 of MID to BID/ASK pricing is as follows:

	Ccy	Mid	Bid	Ask
Invesco Emerging Markets Equity Fund (USD)

16. Changes in Investments

A list, specifying for each investment the total purchases and sales which occurred during the period under review, may be obtained, upon request and free of charge, at the Registered Office and the Hong Kong Representative Office of the Fund.

17. Securities Lending

The SICAV, on behalf of each Sub-Fund (if specified in Appendix A of the Prospectus) and in furtherance of efficient portfolio management, may enter into securities lending for the purposes of efficient portfolio management in accordance with the provisions of the UCITS Regulations. The securities lending agent appointed pursuant to the Securities Lending Authorisation Deed is The Bank of New York Mellon SA/NV.

At 28 February 2025, there was securities lending on the sub-funds listed in the tables below. The tables below show the securities lending income earned. This securities lending income earned is net of the lending agent fee. Further details on the securities lending are disclosed in the Securities Financing Transactions Appendix.

As per the Securities Lending Authorisation Deed, The Bank of New York Mellon SA/NV is authorised and directed to invest and re-invest all or substantially all of the collateral received in any approved investment. All approved investments shall be for the account and risk of the lender. To the extent any loss arising out of approved investments results in a deficiency in the amount of collateral available to return to a borrower, the lender agrees to pay The Bank of New York Mellon SA/NV on demand cash an amount equal to such deficiency. As at 28 February 2025, there was no collateral re-invested.

Sub-Fund	Base Currency	Gross Earnings	Direct Costs (Paid to The Bank of New York Mellon SA/NV) (10%)	Indirect Cost (Tax)	Net Earnings to Fund

18. Soft Commissions & Related Party Transactions

Certain subsidiaries of Invesco Ltd (the "Group") consistent with obtaining the best net result, including best execution, may enter into agreements with counterparties whereby those counterparties may make payments for investment services provided to the Group.

Investment services are used by the Group to improve or add to the services provided to its clients. Although each and every service may not be used to service each and every account managed by the Group, the Group considers that those investment services received are, in the aggregate, of significant assistance in fulfilling its investment responsibilities and are of demonstrable benefit to all clients. Only services that assist in the provision of investment services to the Group's clients will be paid for by counterparties.

Allowable investment services include services that provide assistance to the Group in its investment performance. Those services include, but are not necessarily limited to, furnishing analysis, research and advisory services including economic factors and trends, portfolio valuation and analysis, performance measurement, market prices services and the use of specialised computer software and hardware or other information facilities.

The Group will ensure adherence to its investment decision making responsibilities to its clients in accordance with the laws of the countries that have jurisdiction over its clients or business. This may vary in application with respect to the appropriateness of those investment services provided.

The Group selects counterparties to execute transactions on the basis that transactions will only be executed provided the placing of orders will not operate against the best interest of the Group's clients and that the multiple is at a level which is generally accepted market practice. The Group will endeavour to obtain best execution on all transactions for all clients.

The Group will endeavour to maintain the highest possible regulatory standards worldwide.

The Administrator, Depositary, Registrar and Transfer Agent, Corporate and Paying Agent, Domiciliary Agent and Investment Managers are considered as connected parties to the sub-funds by Invesco Management S.A. We have performed the necessary enquiries to identify potential transactions with connected parties to ensure they have been negotiated at arm's length and in the best interests of the shareholders. Any such transactions would have been entered into in the ordinary course of business and on normal conditions.

The amount paid to Independent Directors in the financial year 28 February 2025 was €85,000. The Directors who are employees of the Invesco Group are not entitled to receive Director's fees.

As at 28 February 2025, the Fund has investments in other Invesco Funds. Please see the Statement of Investments for details by sub-fund.

Seed Capital

Invesco Investments (Bermuda) Limited holds the following Redeemable Participating Shares in the below sub-funds:

For the Period from 1 March 2024 to 28 February 2025	Number of shares acquired in the period	Number of shares redeemed in the period	Number of shares at the period end	Percentage of total Shares%

Notes to the Financial Statements (continued)

20. Transaction Costs

Transaction fees incurred by the Fund relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of commissions/broker fees. Transaction fees are included in the transaction price used to calculate the realised and unrealised gain/(loss) on securities.

For the year from 1 March 2024 until 28 February 2025, these transactions costs amount to:

Sub-Fund	Ccy	Transaction Fees

¹Effective 21 March 2024, Invesco China A-Share Quant Equity Fund was put into liquidation.

Effective 3 April 2024, Invesco Global High Yield Short Term Bond Fund was put into liquidation.

²Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund.

Effective 12 April 2024, Invesco Sustainable US Structured Equity Fund merged into Invesco Sustainable Allocation Fund.

Effective 9 August 2024, Invesco Responsible Japanese Equity Value Discovery Fund merged into Invesco Japanese Equity Advantage Fund.

Effective 21 February 2025, Invesco Real Return (EUR) Bond Fund merged into Invesco Global Flexible Bond Fund.

³Effective 15 July 2024, Invesco PRC Equity Fund was renamed to Invesco China New Perspective Equity Fund.

Effective 14 October 2024, Invesco Belt and Road Debt Fund repositioned and was renamed to Invesco Developing Initiatives Bond Fund.

For the year end 28 February 2025, the Fund did not pay broker fees/commissions on bond transactions. In accordance with bonds market practice, a "bid-offer" spread is applied on the transaction prices. According to this principle, the sale price applied by the broker is not the same as the purchase price, the difference corresponding to the remuneration of the broker.

21. Other Operating Expenses

For the sub-funds with "Other Operating Expenses" above 10% of total expenses, please see the breakdown below:

	Invesco Global Equity Income Advantage Fund USD	Invesco Global High Yield Short Term Bond Fund ¹ USD
Buffer Expenses	–	4,853
Capital Expenses	1,022	2,690
Capital Waiver	11,896	–
Other Expenses	(20)	(281)
	12,898	7,262

¹Effective 3 April 2024, Invesco Global High Yield Short Term Bond Fund was put into liquidation.

22. Sustainable Finance Disclosure Regulation (SFDR)

Information on sub-funds promoting environmental and/or social characteristics or having sustainable investments as their objective are available under the (unaudited) Sustainable Finance Disclosure Regulation section and its relevant annexes where applicable.

Notes to the Financial Statements (continued)

23. Sub-Funds in Liquidation

For the sub-funds which have been put into liquidation, the assets held on these sub-funds cannot be traded due to events beyond the control of the Investment Manager and have been fair valued. For this reason, the sub-funds that have been put into liquidation are being presented in the table below to show the current value of these assets and will remain until such time that the assets can be traded.

The following sub-funds were liquidated during the year ended 28 February 2025:

Balances presented as at 28 February 2025:

Sub-Funds in liquidation holding assets	Date of liquidation	Cash	Bank overdraft	Investment description	Nominal/Shares	Currency	Market value
Invesco Global Targeted Returns Fund ¹	15 March 2024	–	–	Sberbank of Russia PJSC Russian Federal Bond - OFZ 6.9% RUB 23/07/2031	20,460 28,976,000	EUR EUR	– –

¹Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund. Effective 15 March 2024, Invesco Global Targeted Returns Fund (i.e. "A1" Share class) was put into liquidation.

The following sub-funds were put into liquidation prior to year ended 28 February 2025:

Balances presented as at 28 February 2025:

Sub-Funds in liquidation holding assets	Date of liquidation	Cash	Bank overdraft	Investment description ¹	Nominal/Shares	Currency	Market value

¹Relates to investments which are subject to sanctions and trading restrictions at the financial year end. As a result, the investments are currently not tradable.

²Effective 17 June 2024, Polymetal International plc changed its name to Solidcore Resources plc.

³Payable for shares redeemed USD 768,575 to be paid.

24. Credit Suisse AT1 Bond

Following the write down of the Credit Suisse AT1s on 19 March 2023, the Fund and Management Company boards continue to review the Fund's position in respect of the claim that was subsequently filed on behalf of the Fund to preserve its legal right to challenge the write down and recover losses. Subsequently, a private market for the sale and purchase of Credit Suisse AT1 claims has emerged that provides an interim mechanism for the partial realisation of value for the legacy Credit Suisse AT1 positions. Although this market for Credit Suisse AT1 claims is illiquid, certain brokers are providing daily pricing and trades have been executed on an OTC basis under Loan Market Association style sub-participation documentation in line with that pricing. Consequently, the boards have determined that the prudent approach is to treat the Credit Suisse AT1 claims as a contingent asset within the financial statements at a valuation that is derived from market data and observable transactions, mirroring the fair market value as of 28 February 2025. There can be no guarantee that the Fund will be able to realise any value in respect of these claims in the future and the board reserves the ability to deal with the claims as it deems appropriate in the future as information changes.

*The amounts have been disclosed in Other debtors in the Statement of Net Assets (page 274 to 287). The movement in unrealised gain/loss in respect of these positions have been disclosed in "Increase in receivable from AT1 bonds" and "Decrease in receivable from AT1 bonds" in the Statement of Operations and Changes in Net Assets (page 310 to 323) for the above impacted sub-funds.

**Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund.

25. Significant Events

The Invesco India Bond Fund ("the Fund") purchased securities of two issuers (the "Securities") between 2018 and 2019 and sold them on or before 28 February 2020 (the "Holding Period"). An independent review commissioned by Invesco determined that internal investment processes that supported the trading of the Securities had some weaknesses and that such processes should be strengthened. Given the determination of the independent review, in this specific instance, the Directors decided that the Fund and impacted investors should be reimbursed for any realised losses incurred in relation to the acquisition of the Securities. The reimbursement of compensation to impact investors was completed at the end of 2024.

There were no other significant events for the financial period ended 28 February 2025.

26. Subsequent Events

On 5 April 2025 President Trump imposed trade tariffs which caused adverse market conditions and uncertainty on the political and economic front.

The impact on economies, markets and industries continues to evolve. The Directors are monitoring the situation during this period of uncertainty to assess any impact the situation may have on Invesco funds.

There were no other subsequent events after the financial period ended 28 February 2025.

Audit Report

To the Shareholders of
Invesco Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Invesco Funds (the "Fund") and of each of its sub-funds as at 28 February 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the statement of net assets as at 28 February 2025;
- the statement of investments as at 28 February 2025;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s or any of its sub-funds’ ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Calculation Methods of the Risk Exposure

Following the assessment of the Investment and Policy of each Fund and its exposure to financial derivatives instruments, Risk Management Function (RMF) decides the methodology to apply for global exposure calculation. For Funds under commitment approach, RMF calculates Value-at-Risk (VaR) as internal risk measurement to monitor the Fund's market risk exposure in depth; For Funds under Value-at-Risk approach (VaR), RMF calculates the Commitment exposure in case of requirement from the local regulators where the Funds are registered and distributed. Commitment exposure is calculated as the sum of the equivalent positions in the underlying assets of the derivatives held in the Fund, where the equivalent positions are calculated using the conversion methodologies outlined in Box 2 of ESMA Guideline 10-788 and additional arrangements to adjust the exposure are taken into account.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref:10-788) ("ESMA Guidelines").

The Absolute VaR of a UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UCITS cannot be more than 2 times the VaR of the reference portfolio. Invesco Management S.A. monitors that the VaR of the UCITS / 2* VaR of the reference portfolio is not greater than 100%.

The calculation is carried out with the following parameters:

- historical simulation;
- 6 years history of 5 days returns (4 days overlap);
- time weighted / 1 year half life;
- 20 days horizon period;
- 99% confidence interval.

In line with box 25 of ESMA Guidelines, as the sub-funds use the VaR approach to monitor the global exposure, Invesco Management S.A. calculates the leverage for each sub-fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the sub-funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

The overleaf table details the VaR approach for each sub-fund and for those sub-funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 28 February 2025, as well as the daily average level of leverage for each sub-fund during the one year period ending 28 February 2025.

Global exposure using VaR approach

	Period of Observation	Global Exposure									Leverage	
		Method Used to Calculate Global Exposure (Commitment, Absolute VaR, Relative VaR)^	Method Used to Calculate VaR		Reference Portfolio for Using Relative VaR	VaR Limits Reached for last Financial Year			VaR Limits		Leverage Level Reached During the Financial Year (Average levels as a percentage of NAV, calculated at least twice per month)	Leverage Calculation Method Used

Effective 21 February 2025, Invesco Real Return (EUR) Bond Fund merged into Invesco Global Flexible Bond Fund.

³ Effective 15 July 2024, Invesco PRC Equity Fund was renamed to Invesco China New Perspective Equity Fund.
Effective 14 October 2024, Invesco Belt and Road Debt Fund repositioned and was renamed to Invesco Developing Initiatives Bond Fund.

Remuneration Policy

Invesco Management S.A. (the "Management Company") has adopted a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines on sound remuneration policies under the UCITS Directive.

The policy was revised in 2024, to include specificities for some Invesco EU regulated Management Companies. The Management Company was not impacted by the changes.

The purpose of the remuneration policy is to ensure the remuneration of the staff of the Management Company is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Management Company's compliance with its duty to act in the best interests of the UCITS it manages. The Management Company's summary remuneration policy is available on our website (www.invescomanagementcompany.lu). The Management Company's full remuneration policy is available for free from the registered office (see address page 466) upon request.

The remuneration policy is reviewed annually by the Compliance, Human Resources and Risk Management functions who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Management Company is responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the remuneration policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The aggregate total remuneration for the staff of the Management Company during performance year 2024 (1st January 2024 to 31st December 2024) is EUR 30.51m of which EUR 23.40m is fixed remuneration and EUR 7.11m is variable remuneration. The number of beneficiaries is 118.

The Management Company has identified individuals considered to have a material impact on the risk profile of the Management Company or the UCITS it manages (Identified Staff), who include board members of the Management Company, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers.

The aggregate total remuneration paid to the Identified Staff of the Management Company for UCITS related activities for the performance year 2024 (1st January 2024 to 31st December 2024) is EUR 22.94m of which EUR 6.6m is paid to Senior Management and EUR 16.34m is paid to other Identified Staff. Please note the total remuneration for Identified Staff of the Management Company for UCITS related activities includes remuneration for staff employed by delegates.

Securities Financing Transactions

Total Return Swaps

The following tables detail the unrealised for Total Return Swaps analysed by counterparty, as at the Statement of Net Assets date.

All the collateral received during the period is in form of cash.

All the collateral received in relation to Total Return Swaps is in custody at The Bank of New York Mellon SA/NV.

Collateral is settled on Invesco's main custody accounts for their sub-funds, they do not have separate collateral accounts used for the movement of cash collateral.

All Total Return Swaps transactions are bilateral.

Invesco Sustainable Multi-Sector Credit Fund

Counterparty	Counterparty's country of incorporation	Total Return Swaps* EUR	% of Total Net Assets
Morgan Stanley	United States	108,291	0.30%

* Sum of the absolute unrealised value

The market value of Open Total Return Swaps as a proportion of the sub-fund's NAV, as at the Statement of Net Assets date, was 0.30%.

The Interest earned on Total Return Swaps is included in the Total Net Profit and Loss account figure for interest on swaps of EUR (182,348) (disclosed at year end only).

Invesco Balanced-Risk Allocation Fund

Counterparty	Counterparty's country of incorporation	Total Return Swaps* EUR	% of Total Net Assets
BNP Paribas	France	(646,472)	(0.09)%
Citigroup	United States	234,557	0.03%
JP Morgan Chase	United States	(851,552)	(0.12)%
Merrill Lynch	United States	6,643	0.00%

* Sum of the absolute unrealised value

The market value of Open Total Return Swaps as a proportion of the sub-fund's NAV, as at the Statement of Net Assets date, was (0.18)%.

The Interest earned on Total Return Swaps is included in the Total Net Profit and Loss account figure for interest on swaps of EUR (8,563,985) (disclosed at year end only).

Invesco Balanced-Risk Select Fund

Counterparty	Counterparty's country of incorporation	Total Return Swaps* EUR	% of Total Net Assets
BNP Paribas	France	(55,582)	(0.08)%
Citigroup	United States	26,916	0.04%
JP Morgan Chase	United States	(79,867)	(0.12)%
Merrill Lynch	United States	673	0.00%

* Sum of the absolute unrealised value

The market value of Open Total Return Swaps as a proportion of the sub-fund's NAV, as at the Statement of Net Assets date, was (0.16)%.

The Interest earned on Total Return Swaps is included in the Total Net Profit and Loss account figure for interest on swaps of EUR (638,836) (disclosed at year end only).

Other Information (unaudited) (continued)

Securities Financing Transactions (continued)

Total Return Swaps (continued)

The following tables provide an analysis of the maturity tenor of open OTC derivative transactions and associated collateral received/provided, as at the Statement of Net Assets date:

Invesco Sustainable Multi-Sector Credit Fund

Maturity tenor	Total Return Swaps (net exposure) EUR
one week to one month	–
1 month to 3 months	–
3 months to 1 year	108,291
over 1 year	–
Total	108,291

The above maturity tenor analysis has been based on the contractual maturity date of the relevant OTC derivative transaction.

Invesco Balanced-Risk Allocation Fund

Maturity tenor	Total Return Swaps (net exposure) EUR
one week to one month	9,241
1 month to 3 months	(626,935)
3 months to 1 year	(639,130)
over 1 year	–
Total	(1,256,824)

The above maturity tenor analysis has been based on the contractual maturity date of the relevant OTC derivative transaction.

Invesco Balanced-Risk Select Fund

Maturity tenor	Total Return Swaps (net exposure) EUR
one week to one month	673
1 month to 3 months	(57,162)
3 months to 1 year	(51,371)
over 1 year	–
Total	(107,860)

The above maturity tenor analysis has been based on the contractual maturity date of the relevant OTC derivative transaction.

The table on page 448 provides the cash collateral in relation to derivative contracts (including Total Return Swaps) held as at 28 February 2025.

As at the Statement of Net Assets date, all of the cash collateral received in respect of OTC derivative transactions was re-invested in money market funds managed by the sub-fund as disclosed in the sub-fund's Statement of Investments.

The following tables provide a currency analysis of the cash received/provided by the sub-fund(s), in respect of OTC derivative transactions (including Total Return Swaps) as at the Statement of Net Assets date:

Invesco Balanced-Risk Allocation Fund

Currency	Collateral Counterparties	Cash collateral received EUR	Cash collateral provided EUR
OTC derivative transactions (including Total Return Swaps)			
EUR	BNP Paribas, Canadian Imperial Bank of Commerce, JP Morgan Chase, Macquarie, Morgan Stanley	–	6,990,000
Total		–	6,990,000

Other Information (unaudited) (continued)

Securities Financing Transactions (continued)

Total Return Swaps (continued)

Income earned / (paid) by the sub-fund from the reinvestment of cash collateral in money market funds amounted to EUR (17,286) for the period ended 28 February 2025 and is presented within "Other income and Other interest paid" in the Statement of Operations and Changes in Net Assets (disclosed at year end only).

Invesco Balanced-Risk Select Fund

Currency	Collateral Counterparties	Cash collateral received EUR	Cash collateral provided EUR
OTC derivative transactions (including Total Return Swaps)			
EUR	Canadian Imperial Bank of Commerce, Morgan Stanley	–	540,000
Total		–	540,000

Income earned / (paid) by the sub-fund from the reinvestment of cash collateral in money market funds amounted to EUR 5,453 for the period ended 28 February 2025 and is presented within "Other income and Other interest paid" in the Statement of Operations and Changes in Net Assets (disclosed at year end only).

Unrealised Gains and Losses on Total Return Swaps can be seen in the Statement of Operations and Changes in Net Assets (disclosed at year end only).

On the Statement of Operations (disclosed at year end only) there is one line, "Net realised gain/(loss) on investments, derivatives and foreign currencies and other" which includes all Realised Gains and Losses on Derivatives. Within the tables below, the Realised gains and losses on Total Return Swaps are disclosed:

Fund	Currency	Total Return Swaps Realised (Losses)
Invesco Global Total Return (EUR) Bond Fund	EUR	790,082
Invesco Sustainable Multi-Sector Credit Fund	EUR	149,628
Invesco Balanced-Risk Allocation Fund	EUR	32,609,726
Invesco Balanced-Risk Allocation 12% Fund	EUR	3,691,160
Invesco Balanced-Risk Select Fund	EUR	3,326,416
Invesco Global Targeted Returns Fund*	EUR	985,474

Costs are not identified separately as they are either embedded in spreads or form part of other costs disclosed in the Statement of Operations and Changes in Net Assets (disclosed at year end only) and it is not possible to allocate such costs retrospectively.

*Effective 15 March 2024, the share classes of Invesco Global Targeted Returns Fund (except "A1" Share class) merged into Invesco Sustainable Global Income Fund. Effective 15 March 2024, Invesco Global Targeted Returns Fund (i.e. "A1" Share class) was put into liquidation.

Securities lending

All securities lending transactions entered into by the Funds are subject to a written legal agreement between the Funds and the Securities Lending Agent, The Bank of New York Mellon SA/NV, a related party to the Company, and separately between the Securities Lending Agent and the approved borrowing counterparty.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund's NAV as at 28 February 2025:

The collaterals are held in the name of the Lending Agent to the order of its clients; the actual segregation to underlying client level is done with the Lending Agent's books and records. The collaterals are held on account at the tri-party agent, who acts as a custodian for securities and collateral between the lender and the borrower. The tri-party agents used but not limited to, The Bank of New York Mellon, London Branch, JPMorgan Chase Bank N.A, Euroclear Bank and Clearstream Bank Luxembourg. For bilateral transactions, the collaterals are held on account at the Agent Lender.

The type and quality of collateral obtained in respect of securities lending transactions are as follows:

- (1) Debt obligations and securities issued by a government where such government is a ratified member of the Organization for Economic Co-Operation and Development, or by the government of Singapore. Debt obligations and securities issued by agencies and instrumentalities of these same governments are also acceptable. In each case, the issuer of the debt obligation or security shall be rated (i) A or better by Standard & Poor's, or (ii) A or better by Fitch, or (iii) A2 or better by Moody's, or (iv) A or better by DBRS.
- (2) Debt obligations issued by the following supranational issuers, where such issuer has a rating of (i) AA or better by Standard & Poor's, or (ii) AA or better by Fitch, or (iii) Aa2 or better by Moody's, or (iv) AA or better by DBRS.**: European Bank for Reconstruction and Development; European Investment Bank; European Union; European Stability Mechanism, Inter-American Development Bank; International Bank for Reconstruction and Development; International Finance Corporation; European Financial Stability Facility; Eurofima; Council of Europe Development Bank; Eutelsat; Organisation for Economic Co-operation and Development; African Development Bank; Asian Development Bank; Bank of International Settlements; Euratom; European Coal and Steel Community; International Development Association; International Monetary Fund; Nordic Investment Bank;
- (3) equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America);
- (4) FTSE100 DBV (Class F10) as defined in the Crest Reference Manual; and
- (5) unstripped British Government Stock (Class UBG) as defined in the CREST Reference Manual.

** Instruments which are eligible at the time of acceptance, but with respect to which the issuer of the instrument or the instrument itself (as applicable) is subsequently downgraded below the minimum applicable rating level, will be replaced in a prudent manner, but will remain eligible until replaced.

Invesco China Health Care Equity Fund	Invesco UK Investment Grade Bond Fund
Invesco Emerging Markets Ex-China Equity Fund	Invesco USD Ultra-Short Term Debt Fund
Invesco Greater China Equity Fund	Invesco US High Yield Bond Fund
Invesco India Equity Fund	Invesco US Investment Grade Corporate Bond Fund
Invesco China New Perspective Equity Fund ³	Invesco Asia Asset Allocation Fund
Invesco Global Consumer Trends Fund	Invesco Global Income Fund
Invesco Global Founders & Owners Fund	Invesco Pan European High Income Fund
Invesco Global Income Real Estate Securities Fund	Invesco Sustainable Allocation Fund ²

¹ Effective 21 March 2024, Invesco China A-Share Quant Equity Fund was put into liquidation.
Effective 3 April 2024, Invesco Global High Yield Short Term Bond Fund was put into liquidation.

² Effective 12 April 2024, Invesco Sustainable US Structured Equity Fund merged into Invesco Sustainable Allocation Fund.
Effective 9 August 2024, Invesco Responsible Japanese Equity Value Discovery Fund merged into Invesco Japanese Equity Advantage Fund.
Effective 21 February 2025, Invesco Real Return (EUR) Bond Fund merged into Invesco Global Flexible Bond.

³ Effective 15 July 2024, Invesco PRC Equity Fund was renamed to Invesco China New Perspective Equity Fund.
Effective 14 October 2024, Invesco Belt and Road Debt Fund repositioned and was renamed to Invesco Developing Initiatives Bond Fund.

The following sub-funds are classified as financial products which have sustainable investment as their objectives pursuant to Article 9 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on SFDR:

- Invesco Energy Transition Fund
- Invesco Net Zero Global Investment Grade Corporate Bond Fund
- Invesco Social Progress Fund
- Invesco Sustainable Global Income Fund

(together the "Funds" and each, a "Fund")

SFDR and Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending SFDR (the "Taxonomy Regulation") require certain information to be disclosed in the audited financial statements where a Fund is classified under Article 8 or Article 9 of SFDR. This information is required to be presented in the form of the template set out in the annexes to Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amending and correcting the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288, which supplement SFDR. Further information on the environmental and/or social characteristics or the sustainable investment objective promoted by the Funds the during the year can therefore be found in the annexes to these financial statements (the "SFDR Annexes").

Please note that the SFDR Annexes for the Funds cover the full financial year.

Other Information (unaudited) (continued)

Sustainable Finance Disclosure Regulation ("SFDR") (continued)

The data used to complete the disclosures set out in the SFDR Annexes for the Funds is provided by the relevant third-party sources. The data used is the data available as at the date at which the disclosures were produced and is based on backward-looking analysis. The analysis is dependent on the underlying investee entities disclosing relevant data and the availability of this data can be limited. Data may also be incomplete, inaccurate and/or contain errors that may not be detected by the Investment Managers. It has been observed that the availability and accuracy of data, from the relevant third party data providers and underlying investee entities, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the SFDR Annexes should consequently be read and understood in light of these continuing challenges. The Management Company, the board of Invesco Funds and the Investment Managers continue to monitor the ongoing development and evolution of sustainability-related regulation, including SFDR and the Taxonomy Regulation, and associated guidance and the availability of relevant third party and investee entities' data in this regard.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Developed Small and Mid-Cap Equity Fund

Legal entity identifier: 5493005G86T8HM0JIS86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Developed Small and Mid-Cap Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	2,427.63	96.66	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		667.39	96.66	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		56,398.09	96.66	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		59,493.11	96.66	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	9,291.96	96.66	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,223.68	96.72	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.67	97.45	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	79.18	35.87	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	10.25	14.07	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.06	2.90	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.34	24.84	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.01	0.75		
Transportation & Storage	2.60	1.44		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.71	1.81		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.17	3.88	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	96.56	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.39	94.81	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.56	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	73.20	95.57	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	13.19	2.24	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	31.72	94.51	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.37	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TENET HEALTHCARE	Health Care	1.67%	United States
9336 JP COM	Industrials	1.59%	Japan
WFRD US COM	Energy	1.43%	United States
BUFAB AB	Industrials	1.41%	Sweden
PIPER SANDLER CO	Financials	1.40%	United States
PLNW FP COM	Information Technology	1.25%	France
CACTUS INC- A	Energy	1.24%	United States
COFACE SA	Financials	1.22%	France
HYPOPORT SE	Financials	1.20%	Germany
CTS EVENTIM AG &	Communication Services	1.20%	Germany
VNT AU COM	Industrials	1.19%	Australia
PINNACLE FINL	Financials	1.19%	United States
TMX GROUP LTD	Financials	1.16%	Canada
SWISSQUOTE G-REG	Financials	1.15%	Switzerland
SHO-BOND HD	Industrials	1.14%	Japan

What was the proportion of sustainability-related investments?

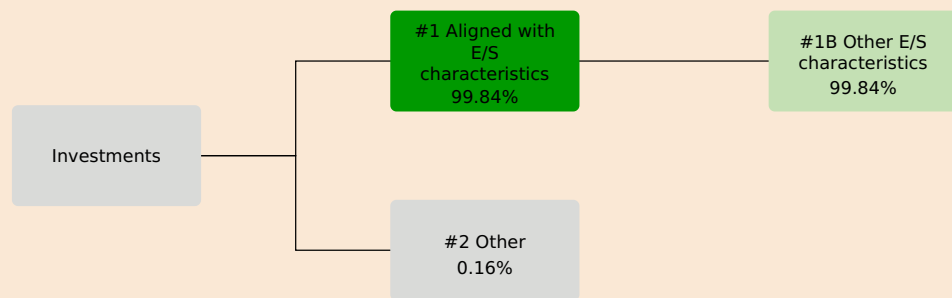

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.84% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.16% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management and investment purposes, cash that was held for ancillary liquidity purposes, or investments in other funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102050	Coal & Consumable Fuels	0.00
Total		2.67

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.16% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Emerging Markets Equity Fund

Legal entity identifier: 549300V2UKPIKMJX4L71

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Emerging Markets Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	23,200.69	94.32	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		5,201.30	94.32	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		82,053.50	94.32	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		110,455.49	94.32	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	13,791.79	94.32	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	932.52	94.27	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.00	98.13	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	82.66	75.48	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	6.68	38.91	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	1.22	
	Electricity, Gas, Steam & Air Conditioning Supply	0.08	0.91	
	Manufacturing	0.71	36.23	
Mining & Quarrying	1.03	4.55		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.33	0.80		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.10	1.98	
	7. Activities negatively affecting biodiversity-sensitive areas	8.40	98.05	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	9.12	97.52	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.05	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	59.80	98.05	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	24.99	84.31	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.06	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	8.62%	Taiwan
HDFC BANK LTD	Financials	4.30%	India
SAMSUNG ELECTRON	Information Technology	4.18%	South Korea
KASIKORNBANK-FOR	Financials	4.04%	Thailand
TENCENT	Communication Services	4.02%	China
SAMSUNG FIRE & M	Financials	3.68%	South Korea
JD-SW	Consumer Discretionary	3.02%	China
BABA-SW	Consumer Discretionary	2.44%	China
MEDIATEK	Information Technology	2.19%	Taiwan
ASTRA INTERNATIO	Industrials	2.19%	Indonesia
JARDINE MATHESON	Industrials	2.17%	Hong Kong
AMBEV SA	Consumer Staples	2.17%	Brazil
AIA	Financials	2.04%	Hong Kong

CREDICORP LTD	Financials	1.89%	Peru

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

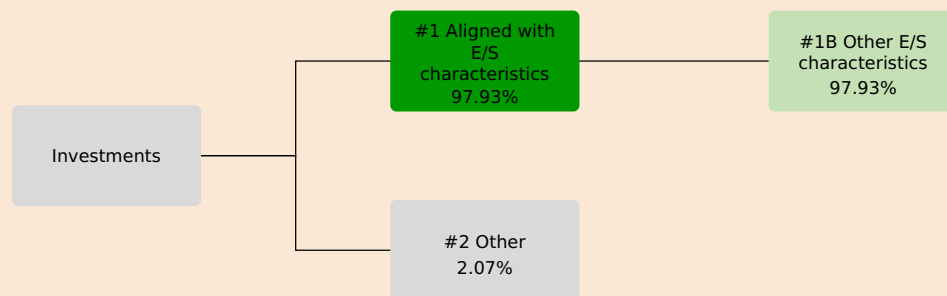

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

97.93% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.07% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	25.25
Communication Services	11.28
Consumer Discretionary	15.67
Information Technology	19.09

10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.35
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		2.35

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.07% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Equity Income Fund

Legal entity identifier: 549300JSUPG41J2TBK47

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Global Equity Income Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	9,640.49	98.79	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,098.76	98.79	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		130,830.19	98.79	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		142,569.44	98.79	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	179.97	73.74	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	756.16	98.79	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.43	98.11	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	68.48	73.56	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	24.05	30.08	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.34	33.72	
Mining & Quarrying	0.41	2.05		
Real Estate Activities	0.36	2.56		
Transportation & Storage	1.65	3.40		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.13	4.59	
	7. Activities negatively affecting biodiversity-sensitive areas	1.25	98.11	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.13	71.24	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.11	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	54.92	97.53	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	9.58	2.33	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.64	95.03	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.79	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
3I GROUP PLC	Financials	5.41%	United Kingdom
UNITEDHEALTH GRP	Health Care	4.27%	United States
ROLLS-ROYCE HOLD	Industrials	4.20%	United Kingdom
MICROSOFT CORP	Information Technology	4.16%	United States
TEXAS INSTRUMENT	Information Technology	3.78%	United States
COCA-COLA EUROPA	Consumer Staples	3.50%	United Kingdom
UNION PAC CORP	Industrials	3.40%	United States
LONDON STOCK EX	Financials	3.23%	United Kingdom
AZE COM	Industrials	3.14%	Belgium
AIA	Financials	3.05%	Hong Kong
STANDARD CHARTER	Financials	2.91%	United Kingdom

AMERICAN TOWER C	Real Estate	2.56%	United States
RECORDATI SPA	Health Care	2.52%	Italy
VERALLIA	Materials	2.48%	France

What was the proportion of sustainability-related investments?

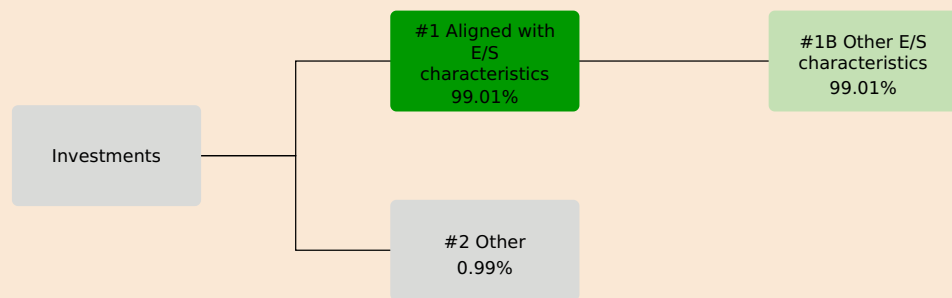

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.01% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.99% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		2.05

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.99% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Equity Income Advantage Fund

Legal entity identifier: 549300SBK31KZNEE5D69

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.94 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global Equity Income Advantage Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (for example by exclusion of companies involved in fossil fuel, thermal coal, oil and gas production and generation). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding controversial activities issuers involved in (but not limited to) manufacturing or sale of conventional weapons or production and distribution of tobacco.

Social features were considered by excluding companies with controversial business behaviours.

Finally, the Fund included only issuers that score in the top 85% based on region and sector based on the MSCI ESG score.

The environmental and social characteristics of the Fund were achieved by applying the exclusion criteria and best-in-class approach described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicator to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
Coal, excluded if - Revenue derived from thermal coal extraction >=5% - Revenue derived from thermal coal power generation >=5% - thermal coal power generation capacity as a % of total production capacity >=5%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Oil & Gas, excluded if: - Revenue derived from oil and gas production >=5% - Revenue derived from oil and gas supporting products and services >=5% - Revenue derived from oil and gas generation >=5%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 0% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if Military contracting weapons- related product and services >=5% Military contracting - non weapon related products and services >=5% Controversial weapons 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Revenue from products related to products and services >=5% Revenue from products retail >=5% Revenue from production >=5%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of labour relations	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of social supply chain	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of forced child labour	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of endangering biodiversity	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of preventing and managing of accidental pollution or soil pollution	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of community involvement (including e.g. impact of operations on the local economy, responsible tax strategy, transfer of technology and skills)	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in Labour Rights including the supply chain, forced or child labour and discrimination	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Corruption related controversies	During the reference period, there were no active breaches of the Fund's exclusion criteria.
A best-in-class approach is also implemented and measured based on a holistic ESG score selecting the companies in the top 85% based on the MSCI ESG scoring from both a region and sector perspective	25.8% of the universe was excluded after application of this criteria.

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicator used, please

refer to the table below for a comparison with the previous period.

	As of 29th of February 2024	As of 28th of February 2025
A best-in-class approach is also implemented and measured based on a holistic ESG score selecting the companies in the top 85% based on the MSCI ESG scoring from both a region and sector perspective	22.6% of the universe was excluded after application of this criteria.	25.8% of the universe was excluded after application of this criteria.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

From the 15th of July 2024:

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as gender equality, action to make cities sustainable).

The Fund sought to achieve those objectives by investing in issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer’s revenue) that relates to the above objectives. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

From the 15th of July 2024:

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the “sustainable investments” within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

During the reference period, although the Fund did not commit to a minimum of sustainable investments, the Fund made sustainable investments aligned with EU Taxonomy complying with the “do not significant harm” principle as set out in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

From the 15th of July 2024:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager’s proprietary analysis and research.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	696.92	89.65	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		257.64	92.53	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		11,370.48	92.53	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		12,584.07	92.53	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	3,111.58	92.53	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,011.38	94.96	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	95.11	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	66.83	74.52	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	14.53	30.00	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.27	0.01	
	Construction	0.08	0.51	
	Electricity, Gas, Steam & Air Conditioning Supply	0.09	0.26	
	Manufacturing	0.33	30.20	
	Mining & Quarrying	1.11	1.03	
Real Estate Activities	0.36	0.89		
Transportation & Storage	1.15	1.90		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.60	0.27		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	3.77	
	7. Activities negatively affecting biodiversity-sensitive areas	2.57	94.90	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.29	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	23.25	92.39	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	94.90	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	51.32	94.74	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	15.29	1.31	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	30.89	92.98	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	94.94	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	3.76%	United States
MICROSOFT CORP	Information Technology	3.16%	United States
AMAZON.COM INC	Consumer Discretionary	2.32%	United States
APPLE INC	Information Technology	1.87%	United States
TESLA INC	Consumer Discretionary	0.97%	United States
BROADCOM INC	Information Technology	0.88%	United States
WALMART INC	Consumer Staples	0.84%	United States
TAIWAN SEMIC-ADR	Information Technology	0.69%	Taiwan
ROYAL BANK OF CA	Financials	0.66%	Canada
BKNG US COM	Consumer Discretionary	0.66%	United States
ELI LILLY & CO	Health Care	0.65%	United States
BANK NY MELLON	Financials	0.63%	United States
GOLDMAN SACHS GP	Financials	0.63%	United States
JOHNSON&JOHNSON	Health Care	0.58%	United States
MOTOROLA SOLUTIO	Information Technology	0.57%	United States

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

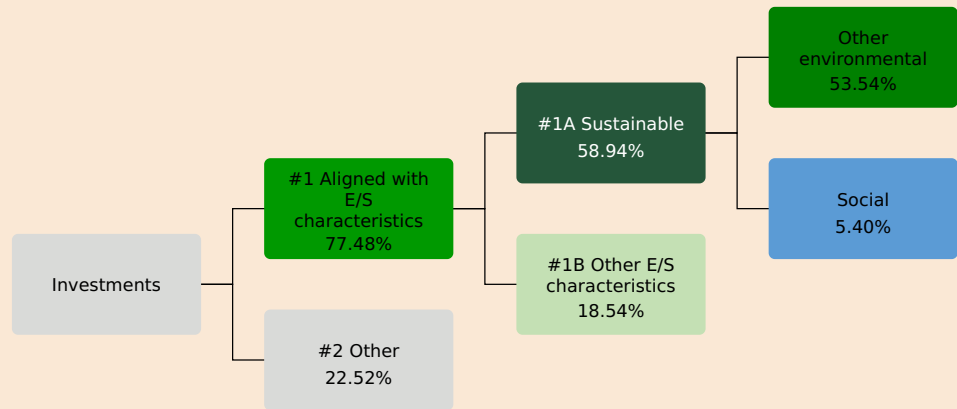

The exclusions were screened to the full investment universe, representing at least 70% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

77.48% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

22.52% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions.

58.94% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Total		0.06

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

53.54% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Investment Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment.

What was the share of socially sustainable investments?

5.40% of the Fund NAV was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

22.52% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Focus Equity Fund

Legal entity identifier: 549300ZX5MCP56UX3B53

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Global Focus Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	195.12	99.51	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		178.47	99.51	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		3,019.03	99.51	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,392.62	99.51	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	2,184.25	99.51	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	286.77	99.77	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.78	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	42.15	78.91	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	32.36	39.89	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.13	35.46	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.03	0.28	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.74	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.34	99.53	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.74	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	69.29	99.74	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	24.05	10.15	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.56	97.84	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.75	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
META PLATFORMS-A	Communication Services	9.44%	United States
ALPHABET INC-A	Communication Services	6.82%	United States
AMAZON.COM INC	Consumer Discretionary	6.74%	United States
HERMES INTL	Consumer Discretionary	5.34%	France
MASTERCARD INC-A	Financials	4.84%	United States
UBER US COM	Industrials	4.14%	United States
SERVICENOW INC	Information Technology	3.91%	United States
COM	Health Care	3.87%	Denmark
THERMO FISHER	Health Care	3.61%	United States

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

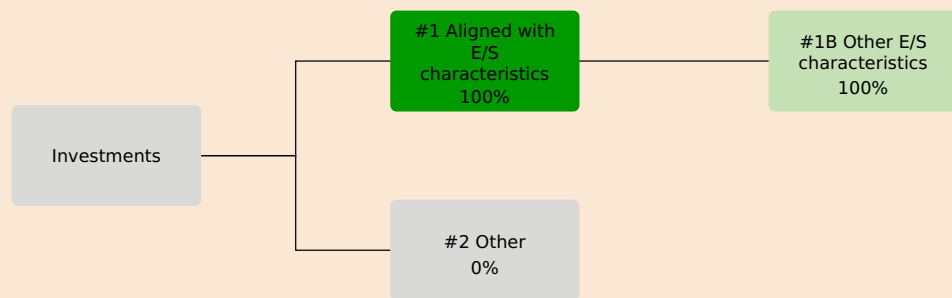

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Small Cap Equity Fund

Legal entity identifier: 549300XXOIP2K445HG60

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Global Small Cap Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	9,628.17	95.51	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,481.75	95.51	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		179,353.48	95.51	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		192,463.41	95.51	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	16,499.72	95.51	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,049.65	95.14	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.56	96.03	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	83.00	35.81	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	14.25	14.49	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.10	2.53	
	Electricity, Gas, Steam & Air Conditioning Supply	0.01	0.12	
	Manufacturing	0.34	26.71	
Mining & Quarrying	0.70	0.97		
Real Estate Activities	0.14	0.55		
Transportation & Storage	1.14	1.46		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.68	0.70		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.21	3.84	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	95.65	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	6.84	93.78	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	95.54	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	75.13	93.97	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.86	2.86	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	28.45	93.85	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.45	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CACTUS INC- A	Energy	1.27%	United States

What was the proportion of sustainability-related investments?

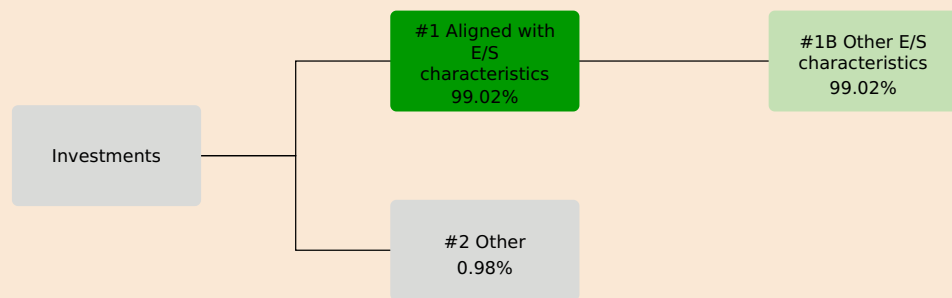

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.02% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.98% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Total		3.11

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.98% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sustainable Global Structured Equity Fund

Legal entity identifier: 549300EP6JAIYSZ5Y657

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 80.02 % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It made **sustainable investments with a social objective**: _____ %

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Sustainable Global Structured Equity Fund (the "Fund") aimed to promote environmental characteristics related to climate change mitigation (such as carbon emissions) as well as natural resource utilization and pollution (for example by exclusion of companies involved in fossil fuel, coal, nuclear power or activities generating pollution).

The Fund also promoted social characteristics related to human rights by excluding companies in violation of any UN Global Compact's principles (based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding controversial activities issuers involved in (but not limited to) manufacturing or sale of conventional weapons or production and distribution of tobacco. The Fund aimed to select companies and issuers that display superior sustainable management and sustainable products or processes, fulfilling ecological and social requirements particularly well, ranging from climate efficiency and low water consumption to labour safety and satisfaction. Ecological characteristics were assessed using an energy transition score. Social features were considered by excluding companies with controversial business behaviours.

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

The Fund is managed systematically. In every rebalancing, it is ensured that the Fund meets the environmental and social characteristics.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
Turnover derived from thermal coal mining, excluded if $\geq 5\%$ Turnover derived from burning coal for power generation, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from coal, excluded if $\geq 5\%$ Structural increase of thermal coal activities over 3 years, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues that comes from projects or the extraction of tar sands, excluded if 0% and oil shale, as well as the proportion of reserves in tar sands or oil shale Involvement in fracking activities, excluded if Yes Involvement in arctic drilling activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues are derived from fossil fuel industries, excluded if $\geq 5\%$ Structural increase of fossil activities over 3 year, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Company's commitment to define clear objectives and appropriate measures to ensure management of the environmental impacts of products and services, excluded if insufficient environmental strategy	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of restricted chemicals, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of endangering biodiversity, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of preventing and managing of accidental pollution or soil pollution, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of community involvement (including e.g, impact of operations on the local economy, responsible tax strategy, transfer of technology and skills), excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from nuclear power, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sale of civilian firearms or related products, excluded if $\geq 5\%$ Manufacture of civilian firearms or related products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sales that are related to military sales including key parts or services, for conventional weapons, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons, excluded if $>0\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Fail to pass the global compact screening, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in labour rights including the supply chain, forced or child labour and discrimination, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in pollution or lack of protection of water resources, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in recreational cannabis, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in corruption, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Energy Transition Score	48

% of issuers that are in the Top 75% of universe based on the energy transition score	100%
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (MSCI World Index) GHG Scope 1 and 2 GHG emission intensity	60.2 vs 88.9

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
Energy Transition Score	47	48
% of issuers that are in the Top 75% of universe based on the energy transition score	100%	100%
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (MSCI World Index) GHG Scope 1 and 2 GHG emission intensity	62.8 vs. 89.7	60.2 vs. 88.9

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality)

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) companies which generate a material part of the revenue from environmental impact themes such as energy transition (by selecting companies in the top 25% based on the energy transition score within its region and sector), healthcare (by selecting companies part of the GICS Sector 35) and food (by selecting companies part of the GICS Industry 302020). The Fund also used a best-in-class approach, utilizing the investment manager's proprietary scoring methodology and selecting companies in the top 75% within the respective peer group for either score eligible. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based

on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	7,525.48	95.88	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,086.04	95.88	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		97,899.62	95.88	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		107,511.14	95.88	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	277.32	71.44	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	763.12	95.92	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	96.04	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.75	70.49	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	18.30	35.16	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.04	0.30	
	Electricity, Gas, Steam & Air Conditioning Supply	0.01	0.63	
	Manufacturing	0.33	36.58	
	Mining & Quarrying	0.56	0.81	
Real Estate Activities	0.15	0.13		
Transportation & Storage	1.03	2.57		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.71	1.68		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.06	6.75	
	7. Activities negatively affecting biodiversity-sensitive areas	2.11	96.04	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.66	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.53	71.22	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.04	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	47.53	96.04	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	6.04	1.82	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.78	95.38	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.04	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
APPLE INC	Information Technology	2.10%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

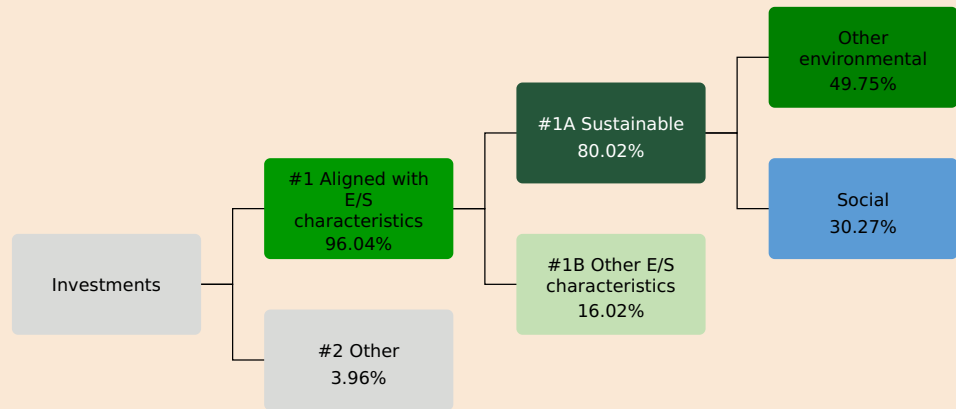

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

96.04% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.96% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

80.02% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Total		0.36

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

49.75% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

30.27% of the fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Continental European Small Cap Equity Fund Legal entity identifier: 54930053MTSPNB716871

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Continental European Small Cap Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	24,484.29	95.94	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,694.14	95.94	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		202,348.79	95.94	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		230,527.23	95.94	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	21,837.37	95.94	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	877.42	96.37	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	93.10	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	70.64	53.35	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	12.59	19.87	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	2.31	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.56	27.43	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.10	2.22		
Transportation & Storage	0.09	1.24		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	3.42	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	92.00	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	27.43	90.87	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	92.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	52.84	91.24	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	12.81	0.67	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.38	89.23	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.90	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BG AV COM	Financials	3.95%	Austria

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other fund that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	15.23
Communication Services	9.26
Consumer Discretionary	5.49

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

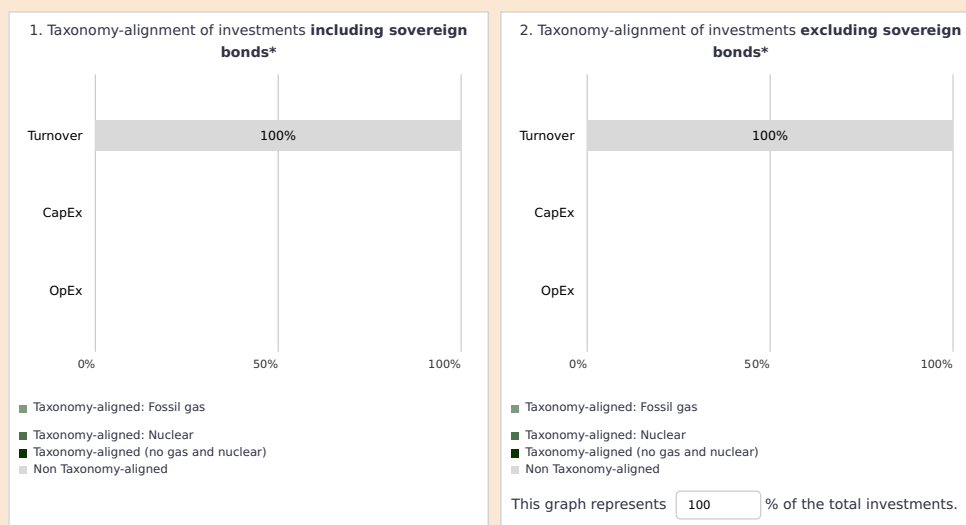

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Euro Equity Fund

Legal entity identifier: 549300JQJG4W18I2FS44

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.42 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Euro Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made sustainable investments aligned with EU Taxonomy complying with the “do not significant harm” principle as set out in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to above.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please refer to above.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	26,425.75	100.32	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		9,585.84	100.32	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		398,647.32	100.32	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		434,658.91	100.32	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	803.87	75.35	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,323.05	100.73	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.73	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	56.51	83.26	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	19.83	32.86	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	1.89	6.26	
	Manufacturing	0.47	44.63	
Mining & Quarrying	0.74	6.75		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.25	3.50		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.06	2.40	
	7. Activities negatively affecting biodiversity-sensitive areas	8.65	100.69	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	3.41	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	11.84	75.35	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.69	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	15.65	100.69	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.13	1.61	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.65	99.07	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.63	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SANOFI	Health Care	4.07%	France
DEUTSCHE TELEKOM	Communication Services	3.88%	Germany

THALES SA	Industrials	2.44%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

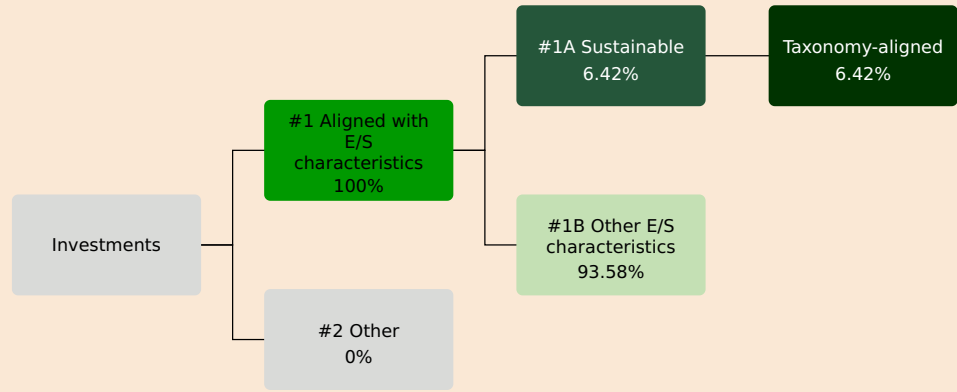

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was invested in investments that aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

6.42% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	19.66
Communication Services	5.89

10102030	Oil & Gas Refining & Marketing	1.30
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		6.74

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

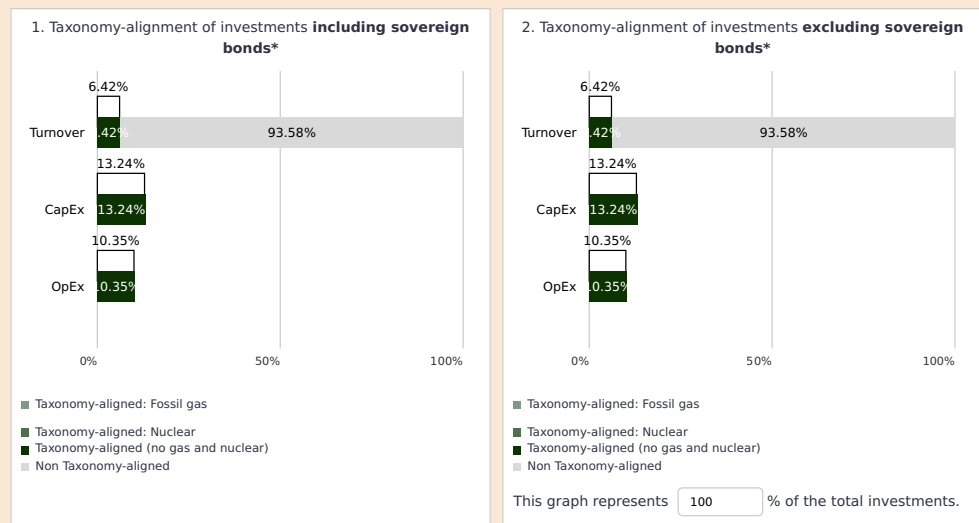

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU taxonomy, 6.42% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	2.67%
Transition	1.85%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Pan European Equity Fund

Legal entity identifier: 549300TQKITRB2UV0T42

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.46 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Pan European Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as gender equality, action to make cities sustainable).

The Fund sought to achieve those objectives by investing in issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relates to the above objectives. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

During the reference period, although the Fund did not commit to a minimum of sustainable investments aligned with EU Taxonomy, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

During the reference period, although the Fund did not commit to a minimum of sustainable investments, the Fund made sustainable investments aligned with EU Taxonomy complying with the "do not significant harm" principle as set out in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	161,376.23	99.37	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		20,398.99	99.37	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		1,127,770.91	99.37	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		1,309,546.13	99.37	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	40,136.81	99.37	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,435.70	98.82	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.87	99.20	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	58.89	79.41	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.93	34.40	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.29	
	Electricity, Gas, Steam & Air Conditioning Supply	1.94	7.68	
	Manufacturing	0.86	48.57	
Mining & Quarrying	0.69	8.03		
Real Estate Activities	0.00	0.00		
Transportation & Storage	1.85	3.00		
Water Supply, Sewerage, Waste Management &	0.00	0.00		

	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	3.20	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	9.60	99.82	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	2.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	33.81	97.82	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.17	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	15.76	97.74	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	16.09	2.03	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	42.23	96.75	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.84	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TOTALENERGIES SE	Energy	3.14%	France

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

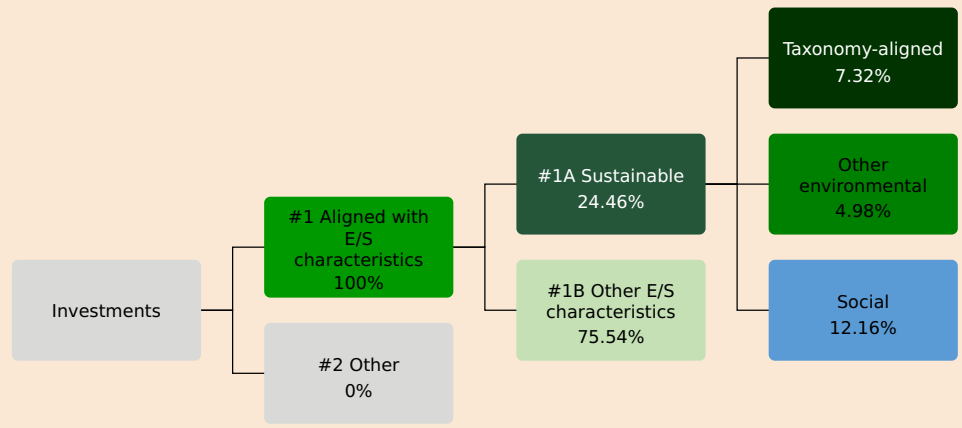

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

24.46% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	1.87
10102010	Integrated Oil & Gas	4.79
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	1.37
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		8.03

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 7.32% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	4.07%
Transition	0.18%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

4.98% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

12.16% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Pan European Equity Income Fund

Legal entity identifier: 5493001F6A7MEXLKZ036

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____ %

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.70 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Pan European Equity Income Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made sustainable investments aligned with EU Taxonomy complying with the “do not significant harm” principle as set out in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to above.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please refer to above.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	2,782.79	99.51	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,040.78	99.51	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		36,812.68	99.51	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		40,636.25	99.51	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	107,306.25	99.51	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,152.48	99.56	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.72	99.56	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.23	69.56	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	35.24	35.41	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.33	
	Electricity, Gas, Steam & Air Conditioning Supply	1.32	7.78	
	Manufacturing	0.56	39.39	
	Mining & Quarrying	0.70	9.01	
	Real Estate Activities	0.00	0.00	
	Transportation & Storage	0.54	1.84	
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.08	6.99		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	11.70	99.55	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	2.46	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	134.02	99.51	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.55	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	20.35	99.55	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	23.37	4.79	
	13. Board gender diversity	41.76	98.28	Weighted Average of all issuers in the portfolio unadjusted gender pay gap of investee companies
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.56	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
				Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SANOFI	Health Care	3%	France
RELX PLC	Industrials	2.80%	United Kingdom
ASTRAZENECA PLC	Health Care	2.79%	United Kingdom
ROCHE HLDG-GENUS	Health Care	2.65%	Switzerland
DEUTSCHE TELEKOM	Communication Services	2.65%	Germany
ALLIANZ SE-REG	Financials	2.52%	Germany
INTESA SANPAOLO	Financials	2.43%	Italy
ANGLO AMER PLC	Materials	2.30%	United Kingdom
BAE SYSTEMS PLC	Industrials	2.17%	United Kingdom
INFINEON TECH	Information Technology	2.07%	Germany
AXA	Financials	2.06%	France
UPM-KYMMENE OYJ	Materials	2.04%	Finland
E.ON SE	Utilities	1.99%	Germany
KONINKLIJKE PHIL	Health Care	1.97%	Netherlands
TOTALENERGIES SE	Energy	1.92%	France

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

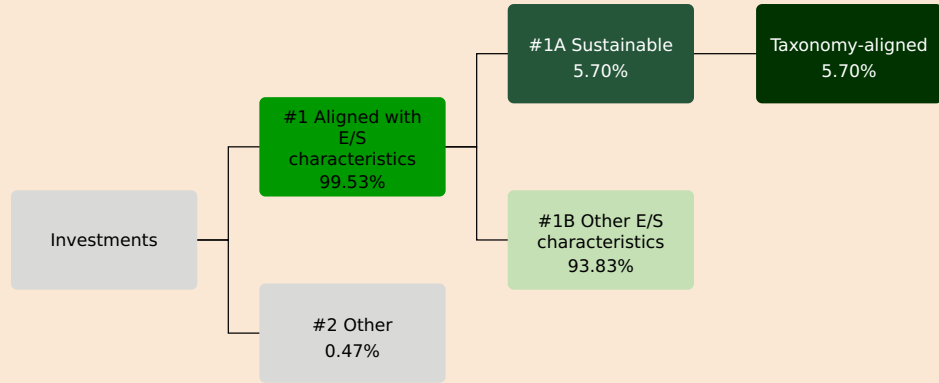

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.53% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.47% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

5.70% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	15.17
Communication Services	6.01
Consumer Discretionary	7.90
Information Technology	6.76
Industrials	18.69
Consumer Staples	8.28
Energy	7.40
Real Estate	0.00
Health Care	12.75
Materials	8.80
Utilities	7.77
Cash	0.47
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.69
10102010	Integrated Oil & Gas	5.74
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.97
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		7.40

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 5.70% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

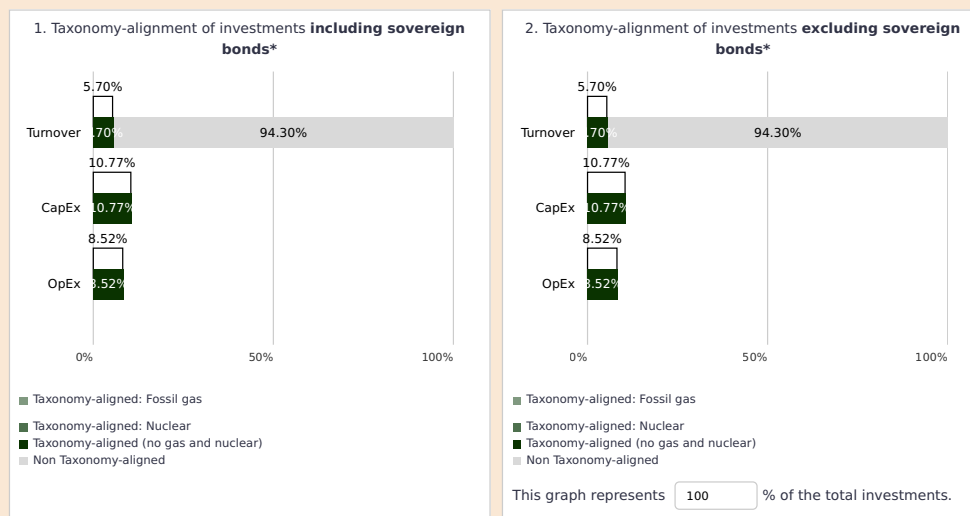

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	2.74%
Transition	1.63%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.47% of the Fund’s asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusion framework, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Pan European Focus Equity Fund

Legal entity identifier: 5493004JNL3QS8BUWS23

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.27 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Pan European Focus Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: >=5% of revenue, Thermal Coal Power Generation: >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 5% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production >=5% revenue, Tobacco-related products and services >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made sustainable investments aligned with EU Taxonomy complying with the “do not significant harm” principle as set out in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to above.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please refer to above.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	4,055.31	97.89	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		807.74	97.89	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		44,050.91	97.89	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		48,913.96	97.89	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	746.53	73.54	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,476.71	97.46	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.19	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.71	81.41	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	33.30	37.08	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	2.12	
	Electricity, Gas, Steam & Air Conditioning Supply	1.89	8.81	
	Manufacturing	0.58	40.50	
	Mining & Quarrying	0.72	8.55	
	Real Estate Activities	0.00	0.00	
Transportation & Storage	1.71	3.85		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.00	0.00		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	6.85	99.96	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	2.62	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	10.31	72.46	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.19	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	6.56	95.37	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	30.49	5.29	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	43.47	95.21	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.96	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TOTALENERGIES SE	Energy	4.18%	France
UNICREDIT SPA	Financials	4.04%	Italy
BARCLAYS PLC	Financials	3.83%	United Kingdom
SSE PLC	Utilities	3.80%	United Kingdom
RECKITT BENCKISE	Consumer Staples	3.39%	United Kingdom
SIEMENS AG-REG	Industrials	3.37%	Germany
VEOLIA ENVIRONNE	Utilities	3.24%	France
ASTRAZENECA PLC	Health Care	3.10%	United Kingdom
HEINEKEN NV	Consumer Staples	3.10%	Netherlands
AXA	Financials	2.95%	France
INFINEON TECH	Information Technology	2.89%	Germany
SYENS BB COM	Materials	2.88%	Belgium
UPM-KYMMENE OYJ	Materials	2.82%	Finland
SAINT GOBAIN	Industrials	2.78%	France
AZE COM	Industrials	2.78%	Belgium

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

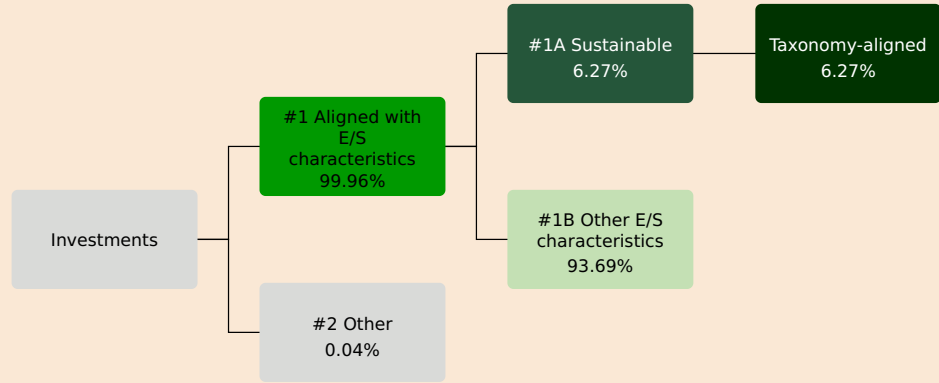

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.96% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.04% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

6.27% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102050	Coal & Consumable Fuels	0.00
Total		7.69

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

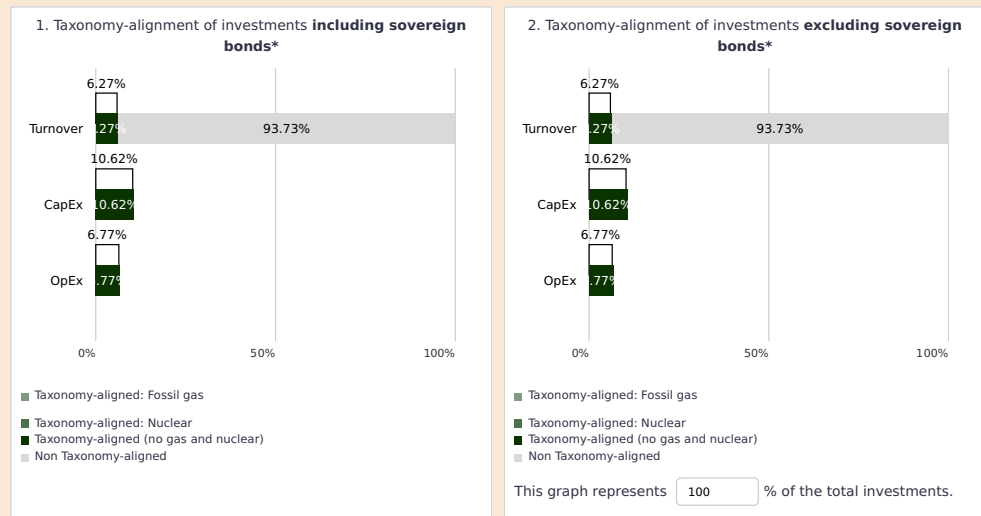

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 6.27% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	3.39%
Transition	0.27%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.04% of the Fund’s asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Pan European Small Cap Equity Fund

Legal entity identifier: 549300H6YNCBWKONWA98

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Pan European Small Cap Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: >=5% of revenue, Thermal Coal Power Generation: >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 5% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production >=5% of revenue, Tobacco-related products and services >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	3,565.36	96.43	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		464.55	96.43	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		35,395.41	96.43	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		39,425.31	96.43	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	13,765.29	96.43	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,236.71	96.68	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.59	93.09	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	71.09	45.25	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	15.10	15.64	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	2.40	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.61	24.93	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.05	3.56		
Transportation & Storage	2.01	2.75		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.01	1.41		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	91.11	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	10.77	90.13	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	91.11	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	56.27	90.33	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	13.57	9.49	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.13	88.31	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.24	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BG AV COM	Financials	3.52%	Austria

What was the proportion of sustainability-related investments?

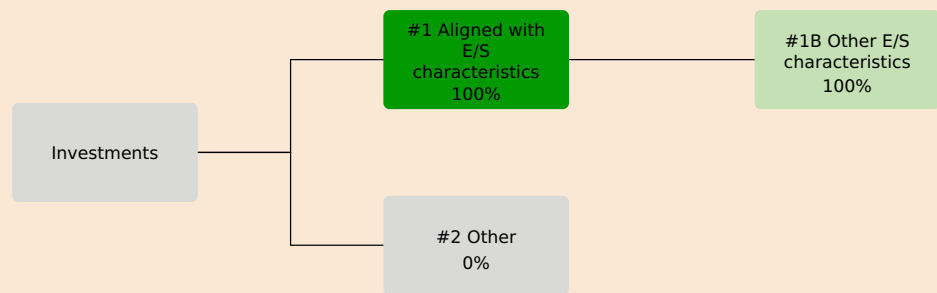

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Total		3.99

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sustainable Eurozone Equity Fund

Legal entity identifier: 549300B1JWYSP2H0XK58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 98.38 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco sustainable Eurozone Equity Fund (the "Fund") invested in companies transitioning to a low carbon economy. By focusing on, and engaging with higher carbon emitting companies, the aim is for the Fund to remove more carbon than the benchmark (MSCI EMU index) on a three-year rolling basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
Overall Global Compact Compliance, excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Country sanctions, companies with severe violations are excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Good governance, companies scoring 5, the lowest score, on our internal ESG proprietary system, ESGIntel will be excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Socially responsible, companies scoring 5, the lowest score, on our internal ESG proprietary system, ESGIntel will be excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if > 0% of revenue including companies in countries not part of the non-proliferation treaty	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal Extraction >=5% of revenue; Thermal Coal Power Generation >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 5% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco, excluded if Tobacco Products production: >=5% of revenue, Tobacco related products and services: >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis: >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

The target of the Fund is to decarbonise more than the benchmark on a 3-year rolling basis. As the Fund only launched on 29th March 2023 and data for the year ended December 2023 was made available in Spring 2025, the data below is based on less than 1 year. As further data is made available for the end of 2024 and beyond, we will continue to update the benchmark against the Fund over the longer noted time period.

We will measure the reduction in the combined scope 1, 2 and 3 emissions (as measured in tonnes of CO2) weighted to the period of ownership of the individual holdings and aggregated at a Fund level. Based on the period from launch up to 31st December 2023, the last date for which information is available the Scope 1, 2 and 3 emissions reduction relative to its Benchmark, the MSCI EMU, the results are as follows:

YoY weighted Avg. change in Scope 1+2+3 emissions (Based on the period from launch to 31st December 2023):

	Fund	Benchmark
Data	-2,801,325	-397,707
Coverage	98.65	99.99

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to the environmental objective of climate change mitigation within the meaning of EU Taxonomy.

The Fund sought to achieve this objective by selecting companies that are able and willing to de-carbonise more than the benchmark, MSCI EMU Index, on a three year rolling basis utilizing the Investment Manager's proprietary methodology, the carbon transition framework. Under this framework a company's ability to reduce its carbon emissions was assessed using a theoretical carbon liability which was calculated by applying the EU Emission

Trading System (ETS) non-compliance fine of Co2 to the total carbon emitted for each company. The company's ability to cover this theoretical liability was assessed by looking at the cross-cycle Free Cash Flow that can be sustainably generated by the company going forward.

A company's willingness to reduce its carbon emissions is determined by qualitative analysis by the Investment Manager which will include engagement with the company.

It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	9,098.93	99.18	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		4,436.71	99.18	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		154,283.89	99.18	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		167,819.53	99.18	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,011.88	99.18	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,226.50	99.18	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.18	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.88	84.43	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	22.39	35.37	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.17	7.79	
	Manufacturing	0.53	45.00	
	Mining & Quarrying	0.75	6.99	
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.22	3.50		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.06	2.58	
	7. Activities negatively affecting biodiversity-sensitive areas	8.93	99.18	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	4.76	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	12.78	99.18	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.18	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	13.16	99.18	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.00	1.87	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.93	98.00	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.18	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
SANOFI	Health Care	4.07%	France
DEUTSCHE TELEKOM	Communication Services	3.95%	Germany
SIEMENS AG-REG	Industrials	3.63%	Germany
UNICREDIT SPA	Financials	3.55%	Italy
TOTALENERGIES SE	Energy	3.53%	France
INFINEON TECH	Information Technology	3.11%	Germany
1923506D GR COM	Industrials	3.06%	Germany
ENEL SPA	Utilities	3.01%	Italy
CAIXABANK SA	Financials	2.97%	Spain
SAP SE	Information Technology	2.83%	Germany
UPM-KYMMENE OYJ	Materials	2.79%	Finland
MERCK KGAA	Health Care	2.68%	Germany
THALES SA	Industrials	2.61%	France
HEINEKEN NV	Consumer Staples	2.57%	Netherlands
AXA	Financials	2.55%	France

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

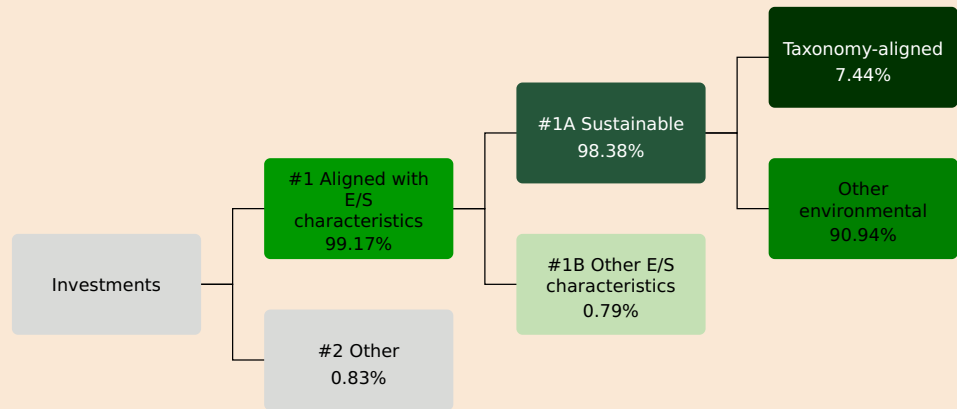

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

99.17% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.83% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

98.38% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

Materials	7.63
Utilities	7.78
Cash	0.83
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	5.55
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	1.44
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		6.99

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 7.44% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	3.15%
Transition	2.02%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

90.94% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold up to 10% in ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sustainable Pan European Structured Equity Fund Legal entity identifier: 549300QJF188JY01X117

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 80 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Sustainable Pan European Fund (the "Fund") aimed to promote environmental characteristics related to climate change mitigation (such as carbon emissions) as well as natural resource utilization and pollution (for example by exclusion of companies involved in fossil fuel, coal, nuclear power or activities generating pollution).

The Fund also promoted social characteristics related to human rights by excluding companies in violation of any UN Global Compact's principles (based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding controversial activities issuers involved in (but not limited to) manufacturing or sale of conventional weapons or production and distribution of tobacco. The Fund aimed to select companies and issuers that display superior sustainable management and sustainable products or processes, fulfilling ecological and social requirements particularly well, ranging from climate efficiency and low water consumption to labour safety and satisfaction. Ecological characteristics were assessed using an energy transition score. Social features were considered by excluding companies with controversial business behaviours.

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

The Fund is managed systematically. In every rebalancing, it is ensured that the Fund meets the environmental and social characteristics.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
Turnover derived from thermal coal mining, excluded if $\geq 5\%$ Turnover derived from burning coal for power generation, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from coal, excluded if $\geq 5\%$ Structural increase of thermal coal activities over 3 years, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues that comes from projects or the extraction of tar sands, excluded if 0% and oil shale, as well as the proportion of reserves in tar sands or oil shale Involvement in fracking activities, excluded if Yes Involvement in arctic drilling activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues are derived from fossil fuel industries, excluded if $\geq 5\%$ Structural increase of fossil activities over 3 year, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Company's commitment to define clear objectives and appropriate measures to ensure management of the environmental impacts of products and services, excluded if insufficient environmental strategy	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of restricted chemicals, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of endangering biodiversity, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of preventing and managing of accidental pollution or soil pollution, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of community involvement (including e.g, impact of operations on the local economy, responsible tax strategy, transfer of technology and skills), excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from nuclear power, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sale of civilian firearms or related products, excluded if $\geq 5\%$ Manufacture of civilian firearms or related products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sales that are related to military sales including key parts or services, for conventional weapons, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons, excluded if $> 0\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Fail to pass the global compact screening, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in labour rights including the supply chain, forced or child labour and discrimination, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in pollution or lack of protection of water resources, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.

Involvement in recreational cannabis, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in corruption, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Energy Transition Score	61
% of issuers that are in the Top 75% of universe based on the energy transition score	100%
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (MSCI Europe Index) GHG Scope 1 and 2 GHG emission intensity	54.3 vs 81.3

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
Energy Transition Score	61	61
% of issuers that are in the Top 75% of universe based on the energy transition score	100%	100%
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (MSCI Europe Index) GHG Scope 1 and 2 GHG emission intensity	71.6 vs. 105.0	54.3 vs 81.3

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) companies which generate a material part of the revenue from environmental impact themes such as energy transition (by selecting companies in the top 25% based on the energy transition score within its region and sector), healthcare (by selecting companies part of the GICS Sector 35) and food (by selecting companies part of the GICS Industry 302020). The Fund also used a best-in-class approach, utilizing the investment manager's proprietary scoring methodology and selecting companies in the top 75% within the respective peer group for either score eligible. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	34,493.88	96.64	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		5,625.34	96.64	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		547,291.53	96.64	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		587,410.75	96.64	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	481.71	72.56	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	966.88	96.64	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	96.72	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.51	78.37	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	15.19	33.76	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.12	1.25	
	Electricity, Gas, Steam & Air Conditioning Supply	1.41	1.56	
	Manufacturing	0.40	39.34	
Mining & Quarrying	0.40	1.23		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.83	4.04		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.46	0.67		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	5.31	
	7. Activities negatively affecting biodiversity-sensitive areas	2.82	96.72	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.52	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.47	72.64	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.72	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	19.52	96.58	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	13.18	6.64	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.90	96.23	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.72	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NOVARTIS AG-REG	Health Care	2.34%	Switzerland
UNILEVER PLC	Consumer Staples	1.87%	United Kingdom
ABB LTD-REG	Industrials	1.81%	Switzerland
DANONE	Consumer Staples	1.78%	France
GIVAUDAN-REG	Materials	1.69%	Switzerland
HENKEL AG -PREF	Consumer Staples	1.68%	Germany
ROCHE HLDG-GENUS	Health Care	1.63%	Switzerland
AXA	Financials	1.62%	France
ML FP COM	Consumer Discretionary	1.59%	France
DEUTSCHE TELEKOM	Communication Services	1.56%	Germany
LOGITECH INTER-R	Information Technology	1.55%	Switzerland
MUENCHENER RUE-R	Financials	1.53%	Germany
TELIA CO AB	Communication Services	1.42%	Sweden
COCA-COLA EUROPA	Consumer Staples	1.39%	United Kingdom
GSK LN COM	Health Care	1.39%	United Kingdom

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

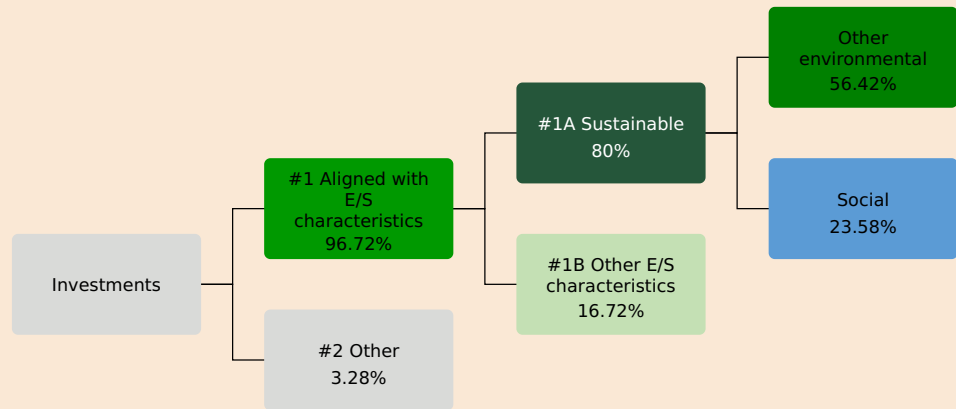

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

96.72% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.28% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

80% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

56.42% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

23.58% of the Fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco UK Equity Fund

Legal entity identifier: 549300YW6DBGECR4K708

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.55 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco UK Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, although the Fund did not commit to a minimum of sustainable investments, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	7,602.12	98.98	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,274.49	98.98	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		82,063.38	98.98	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		90,939.99	98.98	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	907.10	98.98	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,095.19	96.88	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.08	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	62.23	63.26	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	36.93	39.10	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.37	
	Electricity, Gas, Steam & Air Conditioning Supply	0.74	12.11	
	Manufacturing	3.17	29.56	
	Mining & Quarrying	0.68	16.61	
	Real Estate Activities	0.03	0.25	
Transportation & Storage	3.40	2.02		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.81	1.62		
Wholesale & Retail	0.07	8.98		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	19.37	99.08	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.49	99.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.08	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.14	99.08	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.34	27.51	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	43.13	99.05	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.08	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SHEL LN COM	Energy	6.56%	United Kingdom
ASTRAZENECA PLC	Health Care	5.69%	United Kingdom
UNILEVER PLC	Consumer Staples	4.72%	United Kingdom
BP PLC	Energy	4.52%	United Kingdom
ANGLO AMER PLC	Materials	4%	United Kingdom
SSE PLC	Utilities	3.53%	United Kingdom
LLOYDS BANKING	Financials	3.30%	United Kingdom
NATIONAL GRID PL	Utilities	3.21%	United Kingdom
SANOFI	Health Care	3.19%	France
PRUDENTIAL PLC	Financials	3.10%	Hong Kong
NATWEST GROUP PL	Financials	3.04%	United Kingdom
BARCLAYS PLC	Financials	2.91%	United Kingdom
DRAX GROUP PLC	Utilities	2.76%	United Kingdom

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

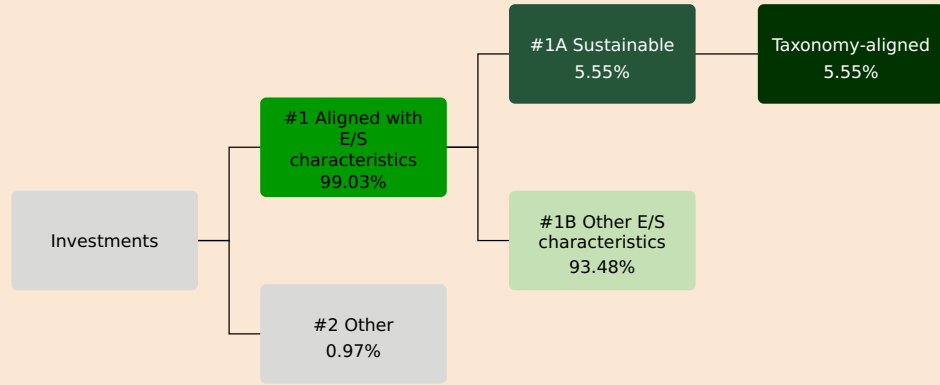

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.03% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.97% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

5.55% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 5.55% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	2.15%
Transition	0.00%

Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.97% of the Fund’s asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Japanese Equity Advantage Fund

Legal entity identifier: 7HZG5DK7IZ5EQYYCJG54

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Japanese Equity Advantage Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty and military contracting.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ of revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	6,754.69	99.12	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		10,574.99	99.12	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		269,966.20	99.12	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		287,295.89	99.12	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	528.90	99.12	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	793.34	99.12	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.53	99.12	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	88.93	28.82	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	12.00	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.50	34.04	
	Mining & Quarrying	0.52	0.53	
	Real Estate Activities	0.00	0.00	
Transportation & Storage	0.87	2.59		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.07	4.42		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	98.14	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	4.61	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.21	98.14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.14	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	79.96	98.14	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	17.45	96.04	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.12	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SANRIO CO LTD	Consumer Discretionary	4.77%	Japan
CANON INC	Information Technology	4.60%	Japan
USS CO LTD	Consumer Discretionary	4.42%	Japan
KEYENCE CORP	Information Technology	4.27%	Japan
ORIX CORP	Financials	4.16%	Japan
HOYA CORP	Health Care	3.97%	Japan
TREND MICRO INC	Information Technology	3.53%	Japan
NIFCO INC	Consumer Discretionary	3.50%	Japan
YOKOGAWA ELEC	Information Technology	3.41%	Japan
TOYOTA TSUSHO	Industrials	3.32%	Japan
OBIC BUSINESS	Information Technology	3.25%	Japan
ITO EN LTD	Consumer Staples	3.22%	Japan
SMFG	Financials	3.18%	Japan
SHIN-ETSU CHEM	Materials	3%	Japan

What was the proportion of sustainability-related investments?

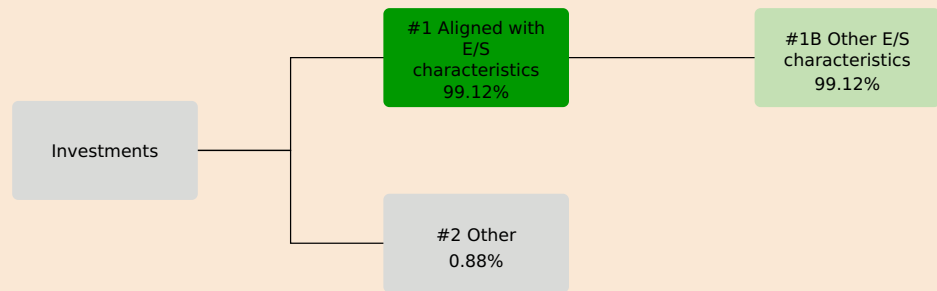

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.12% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.88% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102050	Coal & Consumable Fuels	0.00
Total		0.52

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.88% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Responsible Japanese Equity Value Discovery Fund Legal entity identifier: 5493004JIP8R724AMM46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: _____ %</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: _____ %</p>	<p><input type="radio"/> <input checked="" type="radio"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of <u>91.15</u> % of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Responsible Japanese Equity Value Discovery Fund (the "Fund") aimed to invest in companies which have sound environmental, social and governance (ESG) practices. The ESG assessment of those companies considered environmental characteristics such as climate (by considering carbon emission, water, waste management), and social characteristics (such as human rights, labour safety, gender diversity on the board).

The Fund excluded certain sectors being considered controversial such as (but not limited to) activities involved in fossil fuel, tobacco, gambling, adult entertainment and weapons. The Fund also excluded issuers in violation of the UN Global Compact, based on third-party data and the Investment Manager's proprietary analysis and research.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 9th of August 2024. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
Thermal Coal Extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Artic oil & gas exploration extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Oil sands extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Shale energy extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Conventional oil and gas, oil and gas extraction companies with renewable energy $\geq 10\%^*$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Electricity generation, Max. Carbon emission intensity (gCO ₂ /kWh) ≥ 393 , If carbon intensity data is not available then: Thermal coal power generation $\geq 10\%$ of revenue Oil & gas generation $\geq 25\%$ of revenue Nuclear production $\geq 25\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons tailor-made and essential, excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons related products and/or services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Civilian customers (Assault Weapons) , excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Military / Law Enforcement, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Key Components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco products production, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products Related Products / Services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products retail, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Production, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Distribution, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling operations, excluded if $> 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling specialised equipment, excluded if $> 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling supporting products and services, excluded if $> 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Overall global compact compliance, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
% of issuers that are in the Top 70% of the universe based on the proprietary ESG score	100%

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2024 to August 2024). For the other sustainability indicators used, please refer to the

table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 28-Feb-24	Indicator Performance 09-Aug-24
% of issuers that are in the Top 70% of the universe based on the proprietary ESG score	100%	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing (i) in issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer’s revenue) that relates to the above objectives, or (ii) using a best-in-class approach and retaining companies scoring higher, when compared to their peers, utilizing the investment manager’s proprietary scoring methodology. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the “sustainable investments” within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet, UN Global Compact principles, based on third-party data and the Investment Manager’s proprietary analysis and research.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider

the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	2,295.93	98.41	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,539.80	98.41	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		107,426.19	98.41	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		111,261.93	98.41	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,015.48	98.41	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,382.69	98.41	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.18	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	82.98	59.53	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.04	34.51	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.24	51.99	
	Mining & Quarrying	0.66	1.52	
	Real Estate Activities	0.07	3.34	
	Transportation & Storage	0.00	0.00	
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.20	1.61		
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	4.42	99.18	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.32	Adjusted weighted average per issuer in the fund's emissions to water

				generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.39	99.18	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.18	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	50.60	99.18	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	18.13	97.16	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.18	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Asset Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to the 9th of August 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
HITACHI LTD	Industrials	4.98%	Japan
mitsubishi UFJ F	Financials	4.94%	Japan
MITSUBISHI CORP	Industrials	4.42%	Japan
RECRUIT HOLDINGS	Industrials	4.28%	Japan
FUJITSU LTD	Information Technology	4.27%	Japan
YAMAHA MOTOR CO	Consumer Discretionary	3.97%	Japan
SOMPO HOLDINGS I	Financials	3.87%	Japan
KAO CORP	Consumer Staples	3.80%	Japan
SUZUKI MOTOR	Consumer Discretionary	3.76%	Japan
ORIX CORP	Financials	3.68%	Japan
MURATA MFG CO	Information Technology	3.61%	Japan
SANWA HOLDINGS	Industrials	3.61%	Japan
TERUMO CORP	Health Care	3.41%	Japan

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

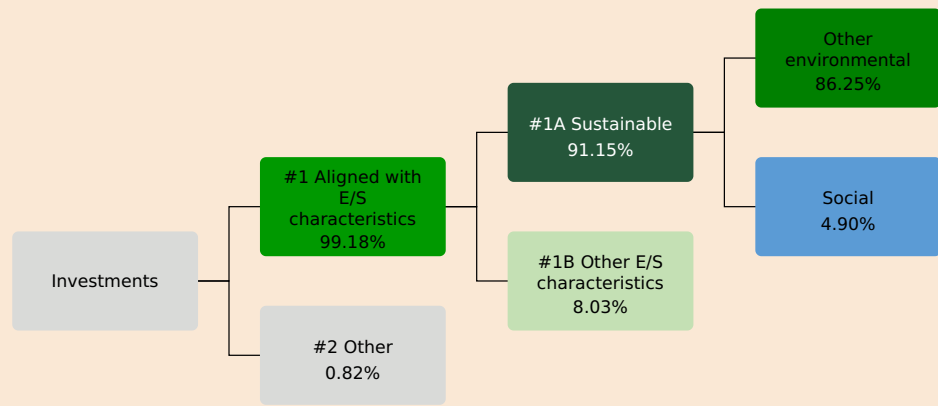

The Fund made investments aligned with the E/S characteristics for a minimum of 99.18% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 0.82% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

99.18% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.82% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

91.15% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

86.25%. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

4.90% of the Fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

As described above, the Fund could hold up to 10% maximum in ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Nippon Small/Mid Cap Equity Fund

Legal entity identifier: 5493007LQNCU3HZSFM42

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Nippon Small/Mid Cap Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	853.40	85.67	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,110.46	85.67	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		46,031.86	85.67	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		47,995.71	85.67	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	849.48	85.67	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,221.82	85.67	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	91.43	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	95.71	11.51	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	10.13	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.50	10.57	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.09	1.63		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.78	3.35		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	77.83	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.33	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.35	77.83	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	77.83	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	69.90	74.25	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	15.04	77.17	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	94.69	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
BIPROGY INC	Information Technology	3.70%	Japan
9336 JP COM	Industrials	3.35%	Japan
7163 JP COM	Financials	3.07%	Japan
SWCC CORP	Industrials	2.98%	Japan
CYBERAGENT INC	Communication Services	2.84%	Japan
TECHMATRIX CORP	Information Technology	2.83%	Japan
M-UP HOLDINGS IN	Information Technology	2.68%	Japan
SEIREN CO LTD	Consumer Discretionary	2.66%	Japan

TAIYO HOLDINGS	Materials	2.43%	Japan
JAPAN MATERIAL	Information Technology	2.38%	Japan
MARUWA CO LTD	Information Technology	2.36%	Japan
RESORTTRUST INC	Consumer Discretionary	2.30%	Japan
BAYCURRENT CONS	Industrials	2.24%	Japan
BUYSELL TECHNOLO	Consumer Discretionary	2.18%	Japan

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

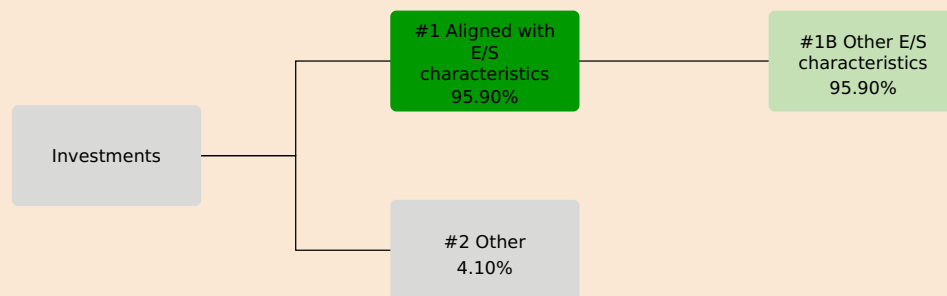

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

95.90% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

4.10% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds that were not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

4.10% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco ASEAN Equity Fund

Legal entity identifier: 549300E3W50HQ7G30618

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco ASEAN Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: >=5% of revenue, Thermal Coal Power Generation: >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 5% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production >=5% revenue, Tobacco-related products and services >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	1,199.61	98.72	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		907.86	98.72	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		12,914.06	98.72	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		15,021.52	98.72	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	12,475.75	98.72	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,213.45	98.89	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.11	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	72.00	44.64	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	25.51	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.02	1.78	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.23	5.61	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.36	4.87		
Transportation & Storage	0.93	1.65		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.14	4.04	
	7. Activities negatively affecting biodiversity-sensitive areas	0.39	99.08	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.39	98.94	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.08	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	77.93	97.70	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.26	0.51	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	24.56	94.93	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.10	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
DBS GROUP HLDGS	Financials	9.50%	Singapore
UNITED OVERSEAS	Financials	9.46%	Singapore
SEA LTD-ADR	Communication Services	7.94%	Singapore
BANK CENTRAL ASI	Financials	5.85%	Indonesia
OCBC BANK	Financials	5.15%	Singapore
BANK RAKYAT INDO	Financials	5.12%	Indonesia
SATS LTD	Industrials	4.69%	Singapore
CIMB GROUP HOLDI	Financials	4.63%	Malaysia

What was the proportion of sustainability-related investments?

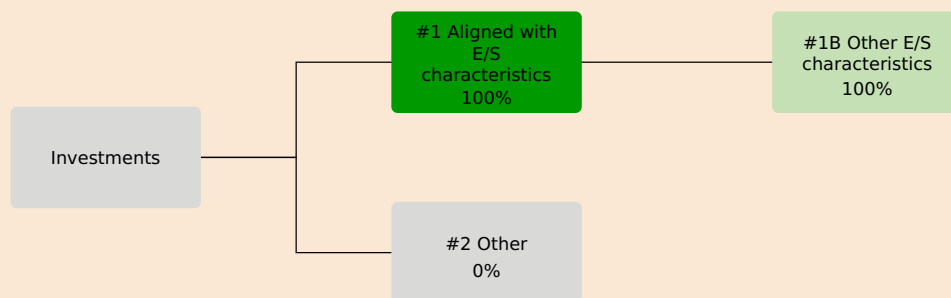

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Asia Consumer Demand Fund

Legal entity identifier: 549300TUG6R8C5LLSL96

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Asia Consumer Demand Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,960.60	96.77	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		16,752.63	96.77	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		99,707.05	96.77	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		118,420.28	96.77	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	7,377.21	96.77	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	823.80	97.30	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.08	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	90.02	73.32	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.01	41.27	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.18	34.44	
Mining & Quarrying	0.00	0.00

Transportation & Storage	0.17	0.12		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.14	10.15	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	97.76	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.85	97.33	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.76	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	77.58	97.76	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	19.70	81.24	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.09	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	9.35%	Taiwan
TENCENT	Communication Services	8.02%	China
PHILIPP SEVEN	Consumer Staples	4.86%	Philippines
MEDIATEK	Information Technology	4.85%	Taiwan
ASUSTEK COMPUTER	Information Technology	4.42%	Taiwan
SAMSUNG ELECTRON	Information Technology	4.32%	South Korea
BABA-SW	Consumer Discretionary	4.02%	China
DBS GROUP HLDGS	Financials	3.88%	Singapore
MITRA ADIPERKASA	Consumer Discretionary	3.37%	Indonesia
SUN ART RETAIL	Consumer Staples	2.90%	China
ICICI BANK LTD	Financials	2.89%	India

What was the proportion of sustainability-related investments?

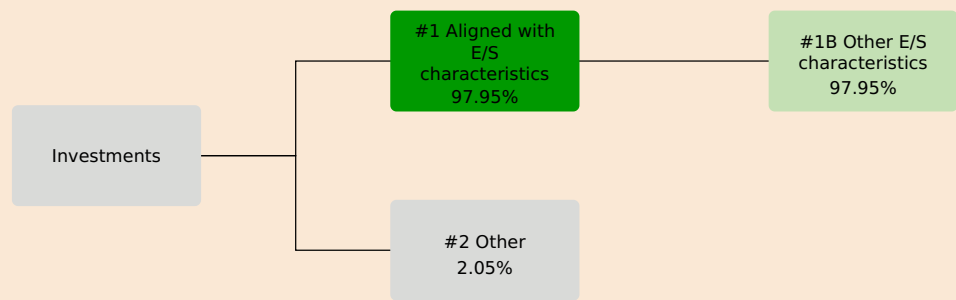

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.95% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.05% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.05% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Asia Opportunities Equity Fund

Legal entity identifier: 54930018YUXD5XWKWS48

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Asia Opportunities Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	33,022.30	95.88	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		7,562.52	95.88	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		78,123.43	95.88	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		118,708.24	95.88	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	4,327.95	95.88	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	784.70	96.97	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	88.99	72.82	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.01	40.65	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.11	1.64	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.42	37.33	
	Mining & Quarrying	0.47	1.05	
	Real Estate Activities	0.10	1.53	
	Transportation & Storage	0.17	0.36	
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.14	3.19		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	97.68	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.90	96.78	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.68	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	75.47	97.68	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.08	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	19.15	83.01	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.94	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	9.20%	Taiwan
TENCENT	Communication Services	7.91%	China
MEDIATEK	Information Technology	4.85%	Taiwan
SAMSUNG ELECTRON	Information Technology	4.28%	South Korea
ASUSTEK COMPUTER	Information Technology	4.26%	Taiwan
BABA-SW	Consumer Discretionary	3.95%	China
DBS GROUP HLDGS	Financials	3.95%	Singapore
ICICI BANK LTD	Financials	2.86%	India
QUANTA COMPUTER	Information Technology	2.69%	Taiwan
INFOSYS LTD	Information Technology	2.54%	India
KB FINANCIAL GRO	Financials	2.45%	South Korea
TENCENT MUSI-ADR	Communication Services	2.18%	China

What was the proportion of sustainability-related investments?

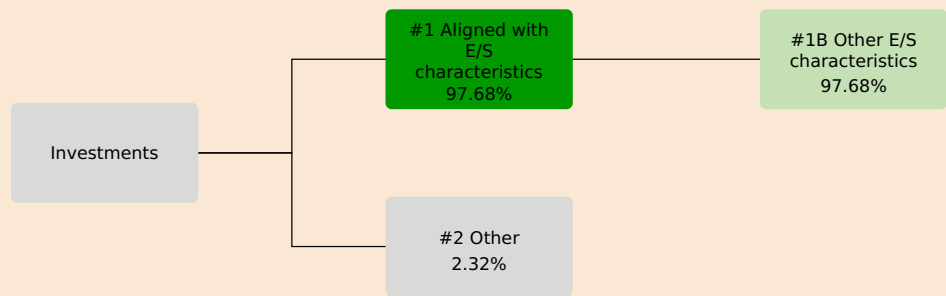

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.68% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.32% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.32% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Asian Equity Fund

Legal entity identifier: 549300R8SVY06001QH51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Asian Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ of revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI scores for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	199,125.64	95.92	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		53,998.63	95.92	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		868,053.84	95.92	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		1,121,178.11	95.92	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	81,874.20	95.92	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,016.37	96.38	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.83	98.68	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	86.75	70.50	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	1.58	47.11	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.11	
	Electricity, Gas, Steam & Air Conditioning Supply	0.06	2.17	
	Manufacturing	0.62	33.64	
	Mining & Quarrying	1.34	2.79	
	Real Estate Activities	0.14	2.66	
Transportation & Storage	0.58	1.89		
Water Supply, Sewerage, Waste Management &	0.00	0.00		

Biodiversity	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	4.88	98.62	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	63.79	98.20	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.62	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	71.96	98.62	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.02	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	22.79	82.22	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.61	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	9.45%	Taiwan
TENCENT	Communication Services	7.51%	China
SAMSUNG ELECTRON	Information Technology	5.29%	South Korea
HDFC BANK LTD	Financials	4.70%	India
AIA	Financials	3.35%	Hong Kong
BABA-SW	Consumer Discretionary	3.15%	China
KASIKORNBANK-FOR	Financials	3.01%	Thailand
JD-SW	Consumer Discretionary	2.93%	China
SAMSUNG FIRE & M	Financials	2.74%	South Korea
UNITED OVERSEAS	Financials	2.72%	Singapore
YMM US ADR	Industrials	2.43%	China
LARGAN PRECISION	Information Technology	2.23%	Taiwan
MEDIATEK	Information Technology	2.01%	Taiwan

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.83

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco China A-Share Quality Core Equity Fund

Legal entity identifier: 549300NXQTB5OR2LKF04

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective**: _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco China A-Share Quality Core Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to above.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please refer to above.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	300.14	92.52	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		241.44	92.52	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		5,001.96	92.52	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		5,543.54	92.52	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	494.11	68.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,764.96	93.33	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.05	96.60	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	82.66	31.54	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	29.07	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.06	0.25	
	Electricity, Gas, Steam & Air Conditioning Supply	0.37	3.74	
	Manufacturing	0.95	31.92	
Mining & Quarrying	0.49	12.42		
Real Estate Activities	0.02	2.07		
Transportation & Storage	1.48	0.71		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.01	0.50	
	7. Activities negatively affecting biodiversity-sensitive areas	0.62	93.24	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.84	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.32	69.64	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	93.24	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	77.94	91.88	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	16.60	93.24	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap- ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.60	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ZIJIN MINING-A	Materials	5.88%	China
KWEICHOW MOUTA-A	Consumer Staples	5.33%	China
CHINA YANGTZE-A	Utilities	4.22%	China

Asset allocation describes the share of investments in specific assets.

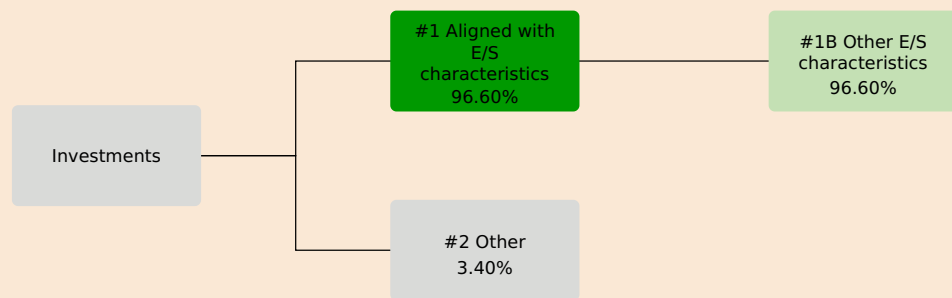

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.60% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.40% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds that were not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	11.08
Communication Services	4.23

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.40% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco China A-Share Quant Equity Fund

Legal entity identifier: 549300Z19O50EYUWQV67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco China A-Share Quant Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 21st of March 2024. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to above.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please refer to above.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	626.04	88.42	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		215.47	88.42	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,456.58	88.42	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		5,298.10	88.42	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	856.97	88.42	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,769.91	90.79	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.25	96.24	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	97.60	22.41	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	4.58	13.56	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.24	0.56	
	Manufacturing	1.79	27.79	
	Mining & Quarrying	0.51	3.43	
	Real Estate Activities	0.01	0.37	
	Transportation & Storage	3.09	1.13	
	Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.48	
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.01	0.88	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	0.00	92.11	
Water	8. Emissions to water	0.00	0.88	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)

Waste	9. Hazardous waste and radioactive waste ratio	1.10	87.87	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	92.11	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	84.54	86.85	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	13.75	90.23	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.09	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Asset Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to the 21st of March 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
KWEICHOW MOUTA-A	Consumer Staples	5.91%	China

Asset allocation
describes the share of
investments in specific
assets.

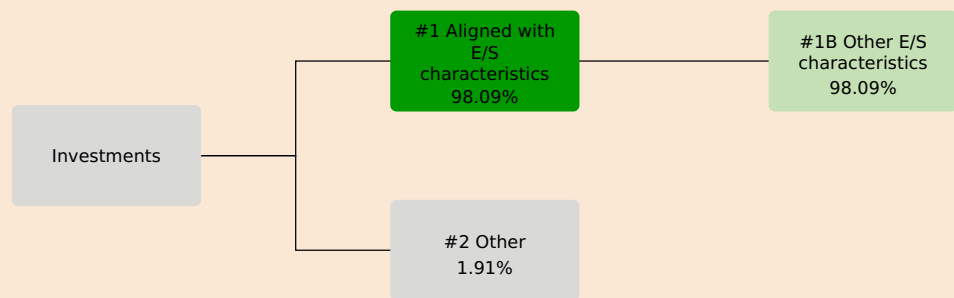

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.09% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.91% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	17.29

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.49
10102050	Coal & Consumable Fuels	0.00
Total		1.97

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy decreased to 0% compared to 6.83% for the previous reference period.

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was aligned with the EU Taxonomy during the previous period but not for the reference period reported in this document.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.91% of the Fund’s asset allocation was included under “Other”. As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco China Focus Equity Fund

Legal entity identifier: 549300KQG1UIM0EQLU08

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco China Focus Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	30,275.96	95.48	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		8,082.44	95.48	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		80,188.70	95.48	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		118,547.10	95.48	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	5,337.61	95.48	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	703.10	96.86	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.20	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	90.63	54.78	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.01	29.37	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.06	1.44	
	Manufacturing	0.42	27.20	
Mining & Quarrying	0.47	2.64		
Real Estate Activities	0.00	1.87

Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.22	2.26	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	97.74	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.09	96.58	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.74	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	87.51	97.74	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.09	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	18.48	88.74	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.02	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TENCENT	Communication Services	9.49%	China
BABA-SW	Consumer Discretionary	9.16%	China
BANK OF CHINA-H	Financials	5.56%	China
JD-SW	Consumer Discretionary	4.62%	China
MEDIATEK	Information Technology	4.54%	Taiwan
LENOVO GROUP	Information Technology	3.89%	China
ASUSTEK COMPUTER	Information Technology	3.40%	Taiwan
NETEASE INC	Communication Services	3.36%	China
TENCENT MUSI-ADR	Communication Services	3.30%	China
9987 HK COM	Consumer Discretionary	3.30%	China

Asset allocation describes the share of investments in specific assets.

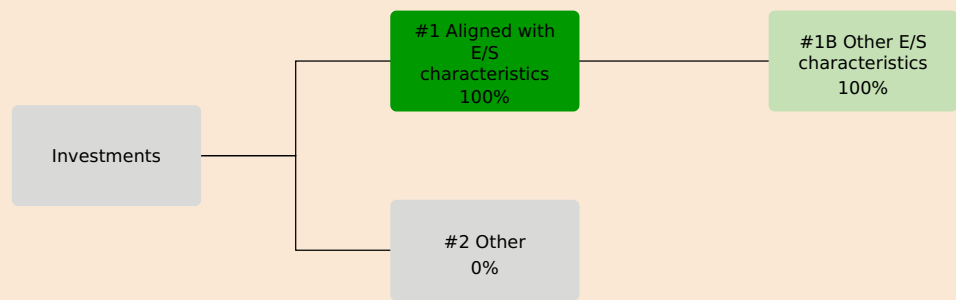

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco China Health Care Equity Fund

Legal entity identifier: 5493000N12ZQIQ7HJ442

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco China Health Care Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	542.15	54.40	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		371.44	54.40	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,932.58	54.40	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,846.16	54.40	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	101.33	41.24	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	532.79	61.16	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	73.84	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	99.58	21.72	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	6.81	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.46	34.75	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	52.57	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.97	38.21	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	52.57	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	47.92	47.92	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	15.48	52.57	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	95.92	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
JIANGSU HENGRU-A	Health Care	5.77%	China
301363 C2 COM	Health Care	5.54%	China
HUMANWELL HEAL-A	Health Care	5.30%	China

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

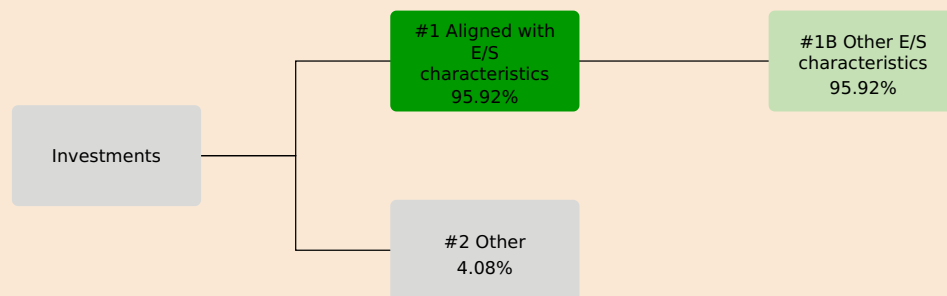

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

95.92% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

4.08% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

4.08% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Pacific Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ of revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	13,821.70	94.63	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,241.96	94.63	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		48,688.04	94.63	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		65,751.70	94.63	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	15,621.62	94.63	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,082.53	95.10	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.65	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	85.50	76.83	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	7.81	41.77	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.18	
	Electricity, Gas, Steam & Air Conditioning Supply	0.08	1.84	
	Manufacturing	0.55	38.99	
	Mining & Quarrying	0.94	6.81	
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.30	2.77		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.18	3.42		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	6.19	98.57	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	14.01	98.08	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.57	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	53.63	98.57	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	23.44	87.69	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.56	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	9.19%	Taiwan
SAMSUNG ELECTRON	Information Technology	5.49%	South Korea
HDFC BANK-ADR	Financials	4.57%	India
ICICI BANK-ADR	Financials	3.49%	India
KASIKORNBANK-FOR	Financials	3.15%	Thailand
NPN SJ COM	Consumer Discretionary	3.14%	South Africa
YAGEO	Information Technology	2.86%	Taiwan
MEDIATEK	Information Technology	2.82%	Taiwan
SAMSUNG FIRE & M	Financials	2.76%	South Korea
RICHTER GEDEON N	Health Care	2.44%	Hungary
ANGLO AMER PLC	Materials	2.43%	United Kingdom
SAUDI NATIONAL B	Financials	2.42%	Saudi Arabia
LARGAN PRECISION	Information Technology	2.14%	Taiwan
KB FINANCIAL GRO	Financials	2.08%	South Korea
FOMENTO ECON-ADR	Consumer Staples	2.07%	Mexico

What was the proportion of sustainability-related investments?

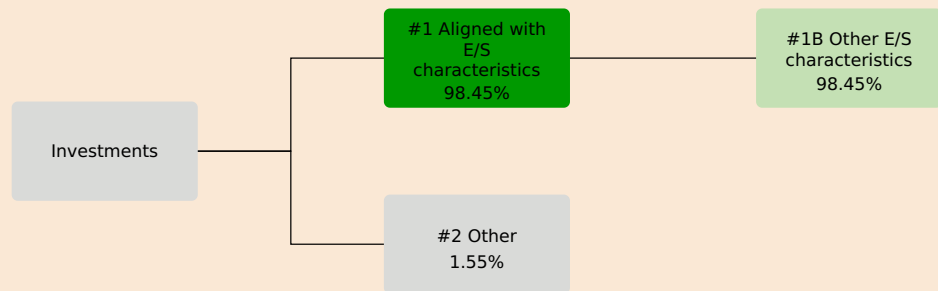

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.45% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.55% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

10102050	Coal & Consumable Fuels	0.00
Total		3.48

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.55% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Greater China Equity Fund

Legal entity identifier: 54930002LY1J35GNQ537

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Greater China Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	6,447.41	95.65	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		5,230.32	95.65	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		130,615.50	95.65	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		142,293.22	95.65	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	8,044.22	95.65	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	920.88	97.34	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.76	97.54	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	89.99	58.42	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.01	36.75	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	4.00	2.51	
	Manufacturing	1.67	31.35	
Mining & Quarrying	0.45	2.74		
Real Estate Activities	0.06	1.98		
Transportation & Storage	0.17	0.08		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.86	0.13		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	2.57	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	96.26	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	3.60	95.72	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.26	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	86.18	96.02	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	17.40	81.24	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.66	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TENCENT	Communication Services	9.74%	China

PRESIDENT CHAIN	Consumer Staples	1.37%	Taiwan

What was the proportion of sustainability-related investments?

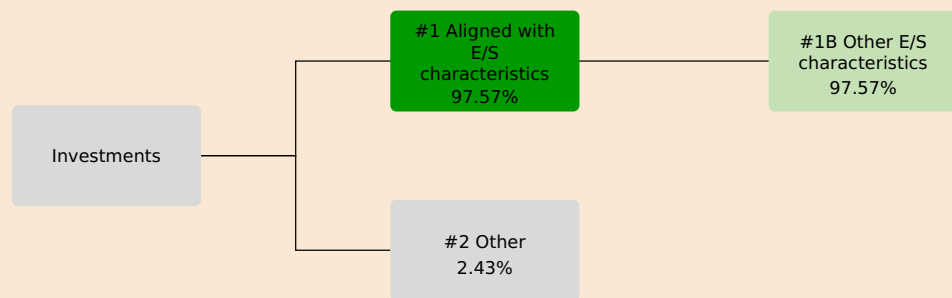

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.57% of the Fund was invested in investments that aligned with the environmental and social characteristics of the Fund.

2.43% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

Total		0.76

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.43% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco India Equity Fund

Legal entity identifier: 549300WNXIA0RYDF0K66

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco India Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%*$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

*From 20th of February 2025, this exclusion is no longer applicable

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	22,788.02	83.08	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		6,235.88	83.08	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		239,329.99	83.08	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		268,353.88	83.08	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	230.81	61.83	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,612.89	83.08	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	92.78	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	82.61	69.75	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.33	30.38	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.14	2.06	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.46	37.44	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.39	2.50		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	2.38	
	7. Activities negatively affecting biodiversity-sensitive areas	0.85	92.18	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.15	66.21	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	2.98	91.46	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	66.68	88.25	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.89	89.31	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.28	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BHARTI AIRTEL	Communication Services	4.11%	India
REC LTD	Financials	3.54%	India
ICICI BANK LTD	Financials	3.54%	India

LARSEN & TOUBRO	Industrials	1.83%	India
POLYCAB INDIA LT	Industrials	1.80%	India

What was the proportion of sustainability-related investments?

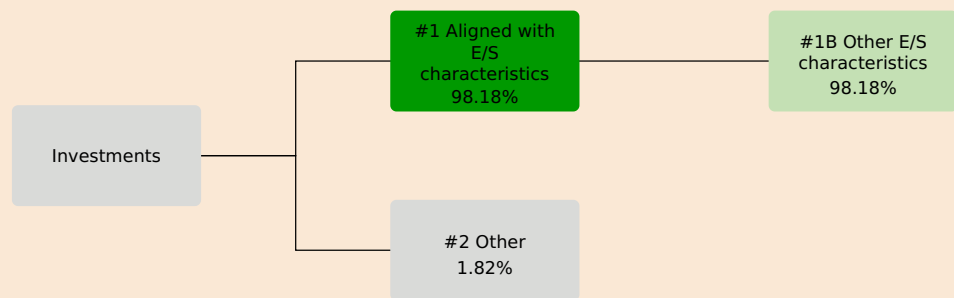

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.18% of the Fund was invested in investments that aligned with the environmental and social characteristics of the Fund.

1.82% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.82% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco China New Perspective Equity Fund

Legal entity identifier: 549300F46FTM1QF1YP44

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco PRC Equity Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	3,337.18	94.41	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,405.15	94.41	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		74,169.21	94.41	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		80,911.54	94.41	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	10,208.12	94.41	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	908.14	96.43	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.82	96.76	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	91.14	46.27	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.01	27.25	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.04	2.38	
	Manufacturing	3.63	17.10	
	Mining & Quarrying	0.45	3.01	
Real Estate Activities	0.03	1.65		
Transportation & Storage	0.17	0.08		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.86	0.10		
Wholesale & Retail	0.10	2.17		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	95.31	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.04	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	3.60	94.55	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations to UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	95.31	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	88.73	94.99	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.06	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	18.29	88.31	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.82	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
TENCENT	Communication Services	9.77%	China
BABA-SW	Consumer Discretionary	8.82%	China
ICBC-H	Financials	6.56%	China
3690 HK COM	Consumer Discretionary	4.08%	China
NETEASE INC	Communication Services	3.32%	China
CM BANK-H	Financials	3.31%	China
XIAOMI CORP-W	Information Technology	2.86%	China
ZIJIN MINING-H	Materials	2.68%	China
PDD HOLDINGS INC	Consumer Discretionary	2.22%	Ireland
TRIP.COM GROUP L	Consumer Discretionary	1.98%	China
JD-SW	Consumer Discretionary	1.93%	China
CHINA LIFE-H	Financials	1.87%	China
TENCENT MUSI-ADR	Communication Services	1.66%	China

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

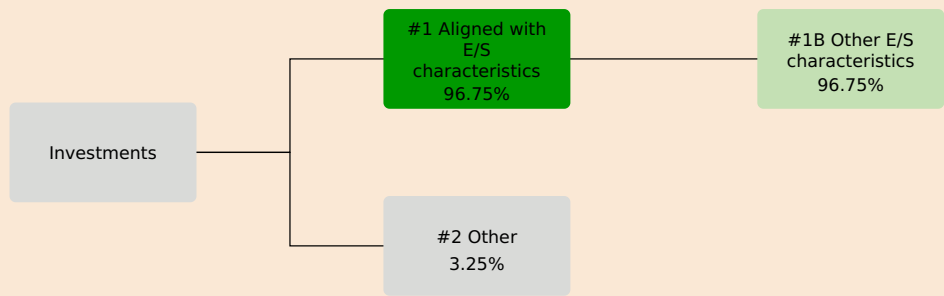

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

96.75% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.25% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.82

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.25% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Consumer Trends Fund

Legal entity identifier: 549300H8AC48B24Q5722

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.04 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global Consumer Trends Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Although the Fund did not commit to a minimum of sustainable investments, the Fund made sustainable investments aligned with EU Taxonomy complying with the “do not significant harm” principle as set out in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to above.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Please refer to above.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	7,770.01	97.35	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		6,447.76	97.35	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		153,344.75	97.35	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		167,562.51	97.35	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	57.30	73.25	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	297.73	97.56	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.66	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	51.07	49.39	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.97	21.99	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.25	20.91	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	3.88	
	7. Activities negatively affecting biodiversity-sensitive areas	6.96	98.58	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.02	72.94	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.58	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	72.68	95.97	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.70	1.83	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	30.84	97.94	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.08	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
AMAZON.COM INC	Consumer Discretionary	9.85%	United States
META PLATFORMS-A	Communication Services	7.88%	United States
TESLA INC	Consumer Discretionary	6.95%	United States
NVIDIA CORP	Information Technology	5.40%	United States
MERCADOLIBRE INC	Consumer Discretionary	4.62%	Uruguay
DKNG US COM	Consumer Discretionary	4.32%	United States
NETFLIX INC	Communication Services	4.20%	United States
SG US COM	Consumer Discretionary	3.32%	United States
BKNG US COM	Consumer Discretionary	3.27%	United States
MICROSOFT CORP	Information Technology	3.11%	United States

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

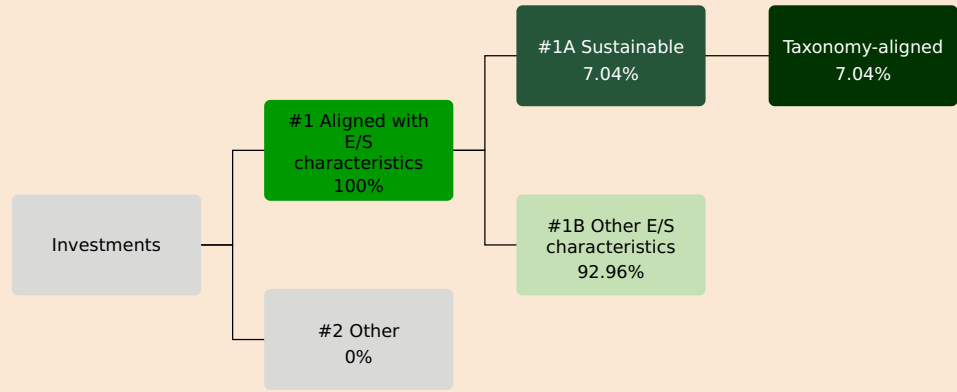

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

7.04% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	0.24

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 7.04% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	6.83%
Transition	0.21%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Founders & Owners Fund

Legal entity identifier: 5493003PUU6BVO20JS36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Global Founders & Owners Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. \

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	459.69	97.86	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		166.11	97.86	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		15,175.49	97.86	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		15,801.28	97.86	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	114.15	72.87	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	401.25	98.02	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.50	97.62	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	61.46	53.54	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	9.40	20.13	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.06	28.57	
Mining & Quarrying	0.19	1.50		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.16	1.94	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	97.60	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.07	71.52	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.60	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	62.01	97.60	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	18.16	2.84	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.51	96.12	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.97	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CONSTELLATION SO	Information Technology	6.84%	Canada
3I GROUP PLC	Financials	5.78%	United Kingdom
MICROSOFT CORP	Information Technology	5.49%	United States
RECORDATI SPA	Health Care	4.95%	Italy
THERMO FISHER	Health Care	4.55%	United States
UNITEDHEALTH GRP	Health Care	4.32%	United States
OLD DOMINION FRT	Industrials	4%	United States
REPLY SPA	Information Technology	3.86%	Italy
O'REILLY AUTOMOT	Consumer Discretionary	3.46%	United States
AMAZON.COM INC	Consumer Discretionary	3.45%	United States
MEDPACE HOLDINGS	Health Care	3.11%	United States
DUMMYLIFCO COM	Industrials	2.83%	Sweden

What was the proportion of sustainability-related investments?

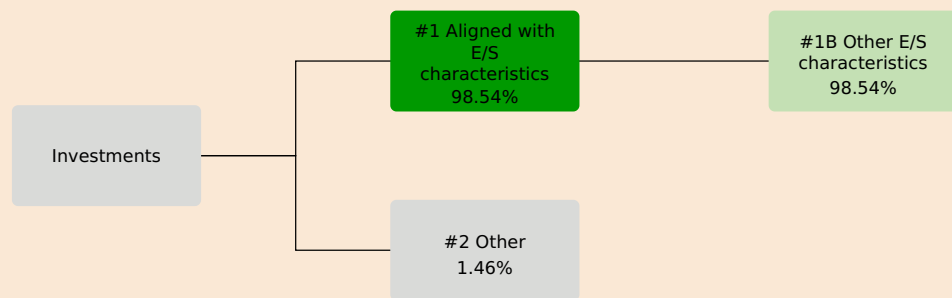

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.54% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.46% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	17.85
Communication Services	3.86

10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	3.10
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		3.10

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.46% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Income Real Estate Securities Fund Legal entity identifier: 54930009WITO40WAGD22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global Income Real Estate Securities Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	134.09	80.02	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		370.64	80.02	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		3,488.60	80.02	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,993.34	80.02	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	772.77	80.02	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	520.30	81.23	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	80.79	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	70.49	42.79	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.57	27.26	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.41	0.27	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.59	57.61		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	81.61	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.02	75.75	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	81.61	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	59.91	77.82	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	41.12	1.90	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	33.11	79.13	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	81.71	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
PROLOGIS INC	Real Estate	5.14%	United States
EQUINIX INC	Real Estate	4.37%	United States
IPT 2018-INDP E	Financials	3.77%	United States
DIGITAL REALTY	Real Estate	2.98%	United States
PUBLIC STORAGE	Real Estate	2.97%	United States
HILT 2016-HHV E	Financials	2.96%	United States
SIMON PROPERTY	Real Estate	2.95%	United States
WELLTOWER INC	Real Estate	2.90%	United States
AVMT 2018-AVM D	Financials	2.65%	United States
REALTY INCOME	Real Estate	2.58%	United States
MITSUI FUDOSAN	Real Estate	2.57%	Japan
BMARK 2020-IG2 UBR	Financials	2.17%	United States

ALEXANDRIA REAL	Real Estate	1.80%	United States
LEG IMMOBILIEN S	Real Estate	1.69%	Germany

What was the proportion of sustainability-related investments?

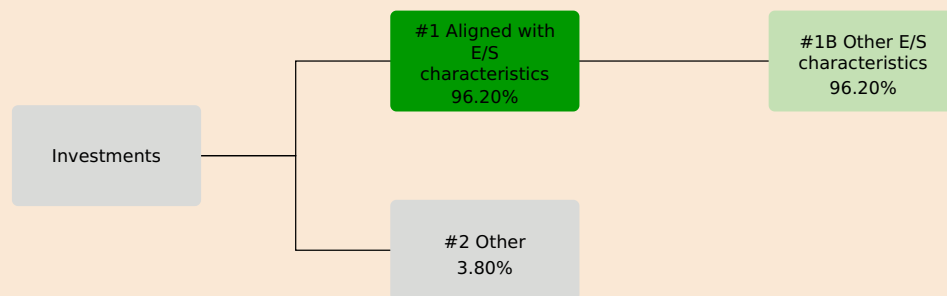

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.20% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.80% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.80% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Gold & Special Minerals Fund

Legal entity identifier: 5493005U007CCQ5JUJ86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Gold & Special Minerals Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	3,528.88	90.57	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,137.99	90.57	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		11,695.54	90.57	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		17,362.41	90.57	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	145,127.71	90.57	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,836.14	84.38	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	93.42	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	79.13	70.98	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	67.32	31.47	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.97	0.26	
	Manufacturing	0.22	0.01	
Mining & Quarrying	5.29	71.36		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	12.81	90.31	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	58,071.04	86.53	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	90.31	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	36.10	86.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.02	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.68	89.03	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.99	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NORTHERN STAR RE	Materials	4.94%	Australia

Asset allocation describes the share of investments in specific assets.

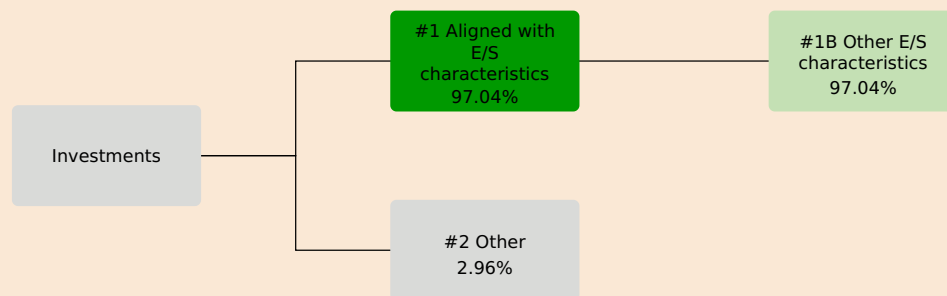

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.04% of the Fund was invested in investments that aligned with the environmental and social characteristics of the Fund.

2.96% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

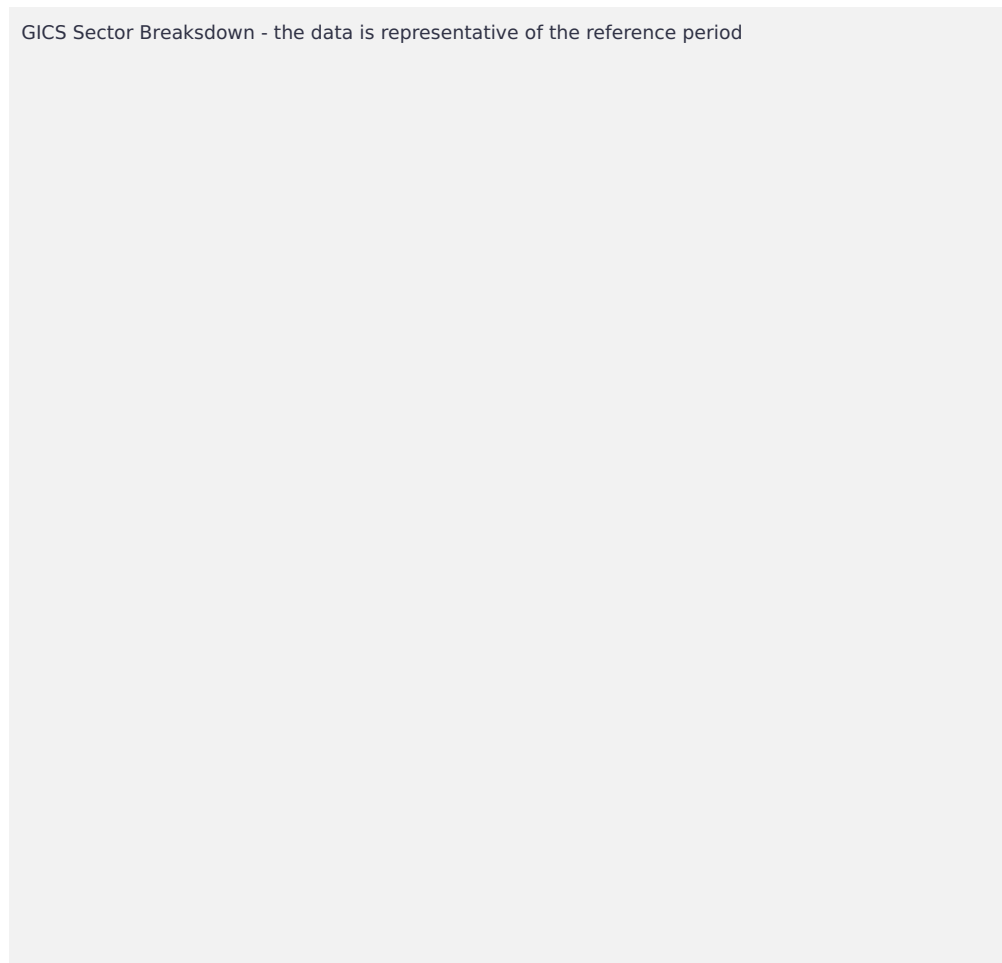

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Total		1.23

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.96% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Metaverse Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting, excluded if military contracting overall $\geq 10\%$; small arms overall $\geq 10\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	672.84	96.69	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,439.47	96.69	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		10,753.09	96.69	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		12,865.40	96.69	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	39.99	72.78	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	233.23	96.69	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	96.93	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.84	74.26	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	11.55	35.29	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.24	40.97	
	Mining & Quarrying	0.00	0.00	
	Real Estate Activities	0.36	1.46	
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.00	0.00		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	96.67	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.15	72.77	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.67	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	60.49	96.67	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.70	4.28	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	32.20	91.63	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.93	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	7.05%	United States
MICROSOFT CORP	Information Technology	6.70%	United States
META PLATFORMS-A	Communication Services	6.50%	United States
AMAZON.COM INC	Consumer Discretionary	6.24%	United States
TSMC	Information Technology	4.82%	Taiwan
BROADCOM INC	Information Technology	4.32%	United States
ALPHABET INC-A	Communication Services	4.27%	United States
ACCENTURE PLC-A	Information Technology	4.17%	Ireland
SONY GROUP CORP	Consumer Discretionary	3.68%	Japan
APPLE INC	Information Technology	3.56%	United States

Asset allocation describes the share of investments in specific assets.

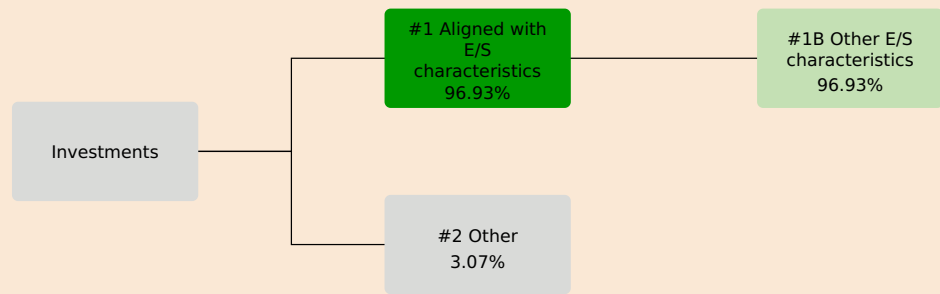

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.93% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.07% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.07% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Responsible Global Real Assets Fund

Legal entity identifier: 549300QYGWDCWQW63798

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _____ % <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _____ %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of <u>29.64</u> % of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Responsible Global Real Assets Fund (the "Fund") aimed to invest in companies which have sound environmental, social and governance (ESG) practices. The ESG assessment of those companies considered environmental characteristics such as climate (by considering for example carbon emission and clean energy use), and social characteristics (by considering, for example, companies with higher standard of health and safety and employee welfare and relations and corporate diversity).

The Fund also excluded certain sectors being considered controversial for the environment (such as activities involved in coal and unconventional oil and gas).

The Fund excluded certain sectors considered socially controversial (such as manufacturing or sale of conventional weapons, production and distribution of tobacco and gambling). The Fund also excluded issuers in violation of the UN Global Compact, based on third-party data and the Investment Manager's proprietary analysis and research.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
UN Global Compact Compliance principles, excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues derived from Thermal Coal Mining, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Proportion of Power production from Thermal Coal, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from 1) Arctic oil & gas extraction, 2) Oil sands extraction, 3) Shale energy extraction, excluded if $> 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from illegal & controversial weapons (anti-personnel mines, cluster munition, depleted uranium, biological/chemical weapons etc.), excluded if $> 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sales of nuclear weapons or components of nuclear weapons to countries that have not signed the Nuclear Non-Proliferation Treaty, excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from small arms sales, including assault weapons, to military, law enforcement or civilian customers or key components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military contracting weapons and related services, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from production of tobacco, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from products containing tobacco, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from wholesale trading of tobacco, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from the operation or provision of equipment or services or supporting products connected with gambling, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from the production or distribution of products or services related to adult entertainment, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from the production, product and services or sale of alcoholic beverages, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Any company with a Sustainalytics controversy score of 4 or 5 will be excluded	During the reference period, there were no active breaches of the Fund's exclusion criteria.
% of issuers with proprietary ESG score better than 5 (on a scale of 1-10)	100%

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
% of issuers with proprietary ESG score better than 5 (on a scale of 1-10)	100%	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as gender equality, action to make cities sustainable).

The Fund sought to achieve those objectives by investing in issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relates to the above objectives. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact

violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	649.02	99.24	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		266.47	99.24	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		5,457.34	99.24	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		6,372.82	99.24	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	235.74	74.43	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,249.97	99.24	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	6.19	99.11	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	72.55	64.43	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	22.94	38.76	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	2.24	2.31	
	Construction	0.15	3.76	
	Electricity, Gas, Steam & Air Conditioning Supply	0.17	9.45	
	Manufacturing	2.73	5.80	
	Mining & Quarrying	1.05	3.92	
Real Estate Activities	0.44	40.91		
Transportation & Storage	1.18	10.97		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.56	2.77		
Wholesale & Retail	0.00	0.00		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	4.15	99.44	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	7.68	72.94	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.44	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	64.66	97.99	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.94	3.45	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.34	98.42	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.44	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

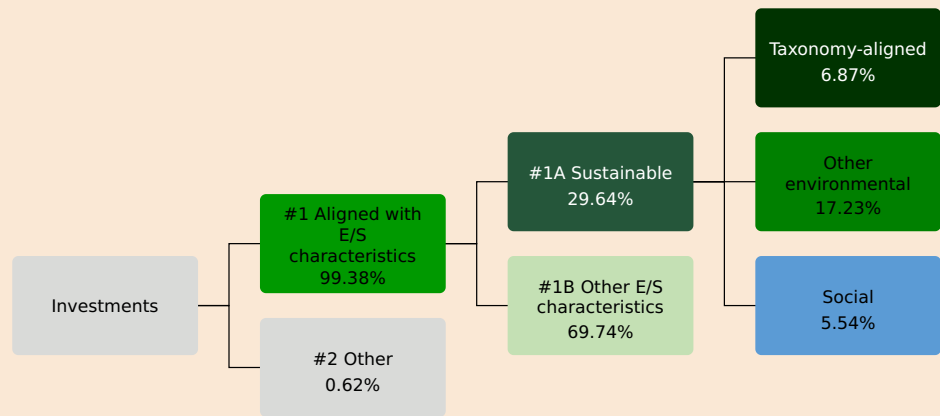

The Fund made investments aligned with the environmental and social characteristics of the Fund for a minimum 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

99.38% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.62% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

29.64% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Total		14.30

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 6.87% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	5.99%
Transition	0.02%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

17.23%. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

5.54% of the fund was invested in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold up to 10% maximum in ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

The Fund could enter into financial derivative instruments only for efficient portfolio management and hedging purposes, and as such the derivatives may not have been fully aligned with the ESG guidelines in terms of negative and positive screening.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Asian Flexible Bond Fund

Legal entity identifier: 549300YF1L00W2ODGV62

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Asian Flexible Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex 1 of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,864.46	55.93	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		446.39	55.93	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		10,022.74	55.93	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		12,333.58	55.93	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	5,458.40	55.93	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,515.37	72.24	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.29	81.70	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	85.07	49.11	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.10	22.47	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.25	1.68	
	Electricity, Gas, Steam & Air Conditioning Supply	0.24	2.83	
	Manufacturing	1.64	10.75	
	Mining & Quarrying	4.49	2.80	
	Real Estate Activities	0.07	2.70	
Transportation & Storage	0.98	0.50		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.00	0.26		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	3.01	78.74	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	60.59	61.25	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	78.74	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	58.76	77.26	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	27.26	0.12	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	22.76	67.03	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	81.64	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
INVHFI 5.85 29	Financials	1.82%	Mauritius

What was the proportion of sustainability-related investments?

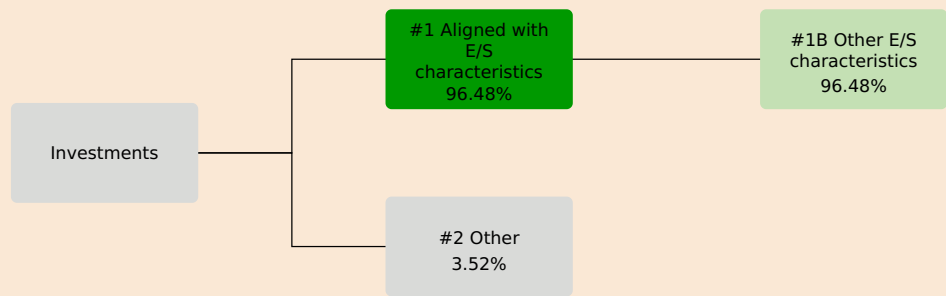

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.48% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.52% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.52% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Asian Investment Grade Bond Fund

Legal entity identifier: 549300GGZ5J1IVESS03

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Asian Investment Grade Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: >=5% of revenue, Thermal Coal Power Generation: >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 5% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production >=5% revenue, Tobacco-related products and services >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	132.08	39.68	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		46.71	39.68	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		1,599.02	39.68	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		1,777.80	39.68	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	3,076.60	39.68	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,066.28	62.11	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	79.09	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	88.69	37.07	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.02	16.63	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.01	0.40	
	Manufacturing	0.61	7.04	
	Mining & Quarrying	1.05	1.83	
Real Estate Activities	0.02	2.10		
Transportation & Storage	5.55	1.79		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	1.82	
	7. Activities negatively affecting biodiversity-sensitive areas	3.26	69.92	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.77	45.63	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	69.92	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	48.61	69.92	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.06	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	21.81	52.10	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	77.29	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SBSN INDO III	Sovereign	2.73%	Indonesia
CNSHAN 6.5 59	Financials	2.35%	Hong Kong
TELPN 2.5 1/23/2031	Communication Services	1.97%	Philippines
POHANG 5.75 28	Materials	1.88%	South Korea
CCAMCL 5.75 29	Financials	1.87%	Hong Kong
HYUELE 5.5 1/16/2029	Information Technology	1.87%	South Korea
LGELEC 5.625 27	Consumer Discretionary	1.86%	South Korea
ANZ FLT 9/18/2034	Financials	1.86%	Australia
FRESHK 6.625 27	Financials	1.86%	Hong Kong
MEIJI YASUDA LIF	Financials	1.84%	Japan
FRIDPT 5.315 32	Materials	1.82%	Indonesia
BOCAVI 3.25 25	Industrials	1.82%	Singapore
GSCCOR 1.625 7/27/20	Energy	1.79%	South Korea
ICBCIL FINANCE	Financials	1.79%	China
MISCMK 3.75 4/6/2027	Industrials	1.78%	Malaysia

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	3.61
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		5.84

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	641.90	25.90	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		171.02	25.90	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,797.52	25.90	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		5,610.43	25.90	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	156.83	18.25	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,013.04	35.74	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	43.73	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.54	16.70	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	18.37	5.46	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.14	0.74	
	Electricity, Gas, Steam & Air Conditioning Supply	1.54	0.34	
	Manufacturing	0.08	2.30	
Mining & Quarrying	0.87	1.08		
Real Estate Activities	0.00	0.00		
Transportation & Storage	2.10	1.18		
Water Supply, Sewerage, Waste Management & Remediation Activities	3.43	0.35		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	1.95	41.37	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.19	17.44	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	41.37	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	26.43	41.37	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	24.29	3.55	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	32.45	36.61	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	38.85	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CHINA GOVT BOND	Sovereign	4.50%	China
FR 5.5 11/1/2052	Financials	3.28%	United States

US TREASURY N/B	Sovereign	1.42%	United States

What was the proportion of sustainability-related investments?

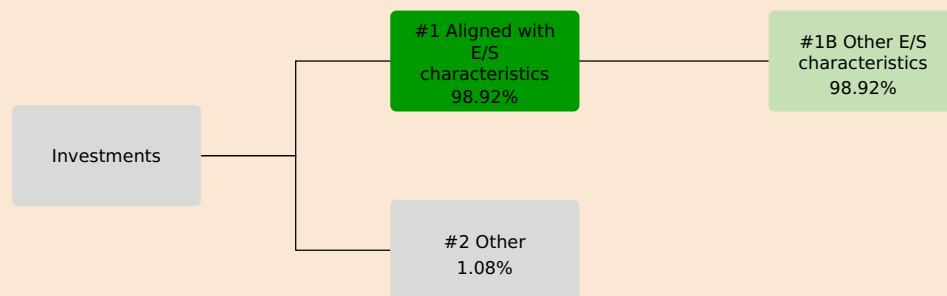

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.92% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.08% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown – the data is representative of the reference period

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.08% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Developing Initiatives Bond Fund

Legal entity identifier: 549300C02OHHMG0BCYK19

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Belt and Road Debt Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: >=5% of revenue, Thermal Coal Power Generation: >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >= 5% of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production >=5% revenue, Tobacco-related products and services >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	12,151.85	46.20	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,327.63	46.20	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		99,432.23	46.20	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		113,911.71	46.20	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	5,133.43	46.20	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,699.34	66.66	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	4.27	74.92	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	76.63	38.34	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	8.10	16.11	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.18	0.96	
	Electricity, Gas, Steam & Air Conditioning Supply	3.62	3.06	
	Manufacturing	1.70	6.25	
Mining & Quarrying	4.73	1.73		
Real Estate Activities	0.04	2.51		
Transportation & Storage	0.79	0.94		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.40	
	7. Activities negatively affecting biodiversity-sensitive areas	1.43	67.33	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	6.83	47.23	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	67.33	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	48.29	67.29	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	25.79	0.06	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	24.43	57.05	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	77.90	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
GASBCM 6.129 38	Energy	2.44%	Luxembourg
UOBSP FLT 10/7/2032	Financials	1.91%	Singapore
MEITUAN	Consumer Discretionary	1.85%	China
ABU DHABI CRUDE	Energy	1.75%	United Arab Emirates
SHNHAN 5.75 34	Financials	1.53%	South Korea
MIZUHO FLT 5/26/2035	Financials	1.48%	Japan
MAGYAR 6.5 6/29/2028	Sovereign	1.44%	Hungary

NAB FLT 8/2/2034	Financials	1.12%	Australia

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

95.92% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

4.08% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	46.41

Health Care	0.01
Materials	3.78
Utilities	3.94
Sovereign	13.72
Others/Derivatives	4.08
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.09
10102010	Integrated Oil & Gas	1.01
10102020	Oil & Gas Exploration & Production	2.18
10102030	Oil & Gas Refining & Marketing	0.24
10102040	Oil & Gas Storage & Transportation	5.29
10102050	Coal & Consumable Fuels	0.00
Total		8.81

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

4.08% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Emerging Markets Bond Fund

Legal entity identifier: 549300PFHWS32B8EES49

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Emerging Markets Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	3,579.99	11.89	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		998.21	11.89	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		18,595.32	11.89	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		23,173.52	11.89	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,895.80	8.48	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	2,208.89	17.71	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.16	26.13	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	73.81	10.45	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	14.71	4.31	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.30	1.13	
	Manufacturing	2.58	1.76	
Mining & Quarrying	2.74	3.51		
Real Estate Activities	0.04	0.08		
Transportation & Storage	1.29	0.75		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.08	0.16	
	7. Activities negatively affecting biodiversity-sensitive areas	3.87	21.43	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	27.97	9.29	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	21.43	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	14.02	21.13	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	2.83	0.54	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	21.15	13.05	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	33.59	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BHRAIN 5.625 31	Sovereign	0.90%	Bahrain
OMAN 6 8/1/2029	Sovereign	0.89%	Oman
IVORY COAST-PDI	Sovereign	0.88%	Ivory Coast
ANGOL 8.75 4/14/2032	Sovereign	0.87%	Ango
DOMREP 5.875 60	Sovereign	0.86%	Dominican Republic
CHILE 2.75 1/31/2027	Sovereign	0.82%	Chile
ARGENT 0 7/9/2046	Sovereign	0.81%	Argentina
CHILE	Sovereign	0.80%	Chile
COLOM 8 11/14/2035	Sovereign	0.78%	Colombia

ROMANI 6.375 33	Sovereign	0.73%	Romania
PERU 1.862 12/1/2032	Sovereign	0.71%	Peru
LIQTEL 5.5 9/4/2026	Communication Services	0.71%	United Kingdom
KENINT 8 5/22/2032	Sovereign	0.69%	Kenya
TURKIYE REP OF	Sovereign	0.69%	Turkey

What was the proportion of sustainability-related investments?

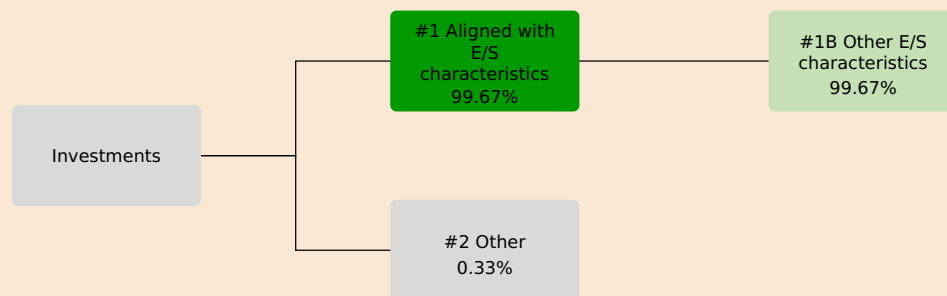

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

99.67% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.33% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	8.36

10102050	Coal & Consumable Fuels	0.00
Total		4.48

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.33% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Emerging Market Corporate Bond Fund

Legal entity identifier: 549300B231TRH220LB65

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Emerging Market Corporate Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	5,597.06	55.38	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,056.59	55.38	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		29,543.49	55.38	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		36,197.15	55.38	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,478.40	55.38	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,847.87	68.15	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	7.47	83.89	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	74.43	50.64	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	10.38	22.23	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	1.82	0.12	
	Electricity, Gas, Steam & Air Conditioning Supply	0.76	5.34	
	Manufacturing	1.95	12.82	
Mining & Quarrying	2.74	9.50		
Real Estate Activities	0.20	0.82		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	1.07	
	7. Activities negatively affecting biodiversity-sensitive areas	7.20	79.13	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	61.13	57.34	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	79.13	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	45.61	78.23	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	15.26	1.19	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	22.57	60.25	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	78.40	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
AFREXI 3.798 31	Financials	1.26%	Egypt
MPEL 5.375 12/4/2029	Consumer Discretionary	1.15%	Hong Kong

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	1.73
10102040	Oil & Gas Storage & Transportation	3.12
10102050	Coal & Consumable Fuels	0.00
Total		13.54

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Emerging Market Flexible Bond Fund

Legal entity identifier: 549300V3VZY61NJ1M107

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Emerging Market Flexible Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise. This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	3,078.15	18.78	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		408.45	18.78	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		8,677.64	18.78	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		12,164.25	18.78	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	8,099.97	18.78	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,912.49	26.73	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.46	29.74	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	71.70	18.63	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	9.28	10.29	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.11	0.67	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	3.23	5.95	
	Mining & Quarrying	0.19	0.15	
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.78	1.46		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	3.46	29.60	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	5.30	18.84	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	29.60	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	12.60	26.70	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.08	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	25.01	23.78	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	30.19	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
COLOMBIA TES	Sovereign	6.81%	Colombia
POLAND GOVT BOND	Sovereign	4.61%	Poland
PERU B SOBERANO	Sovereign	4.22%	Peru
BRAZIL NTN-F	Sovereign	3.61%	Brazil

ROMANIA GOVT	Sovereign	1.37%	Romania
CZECH REPUBLIC	Sovereign	1.37%	Czech Republic

What was the proportion of sustainability-related investments?

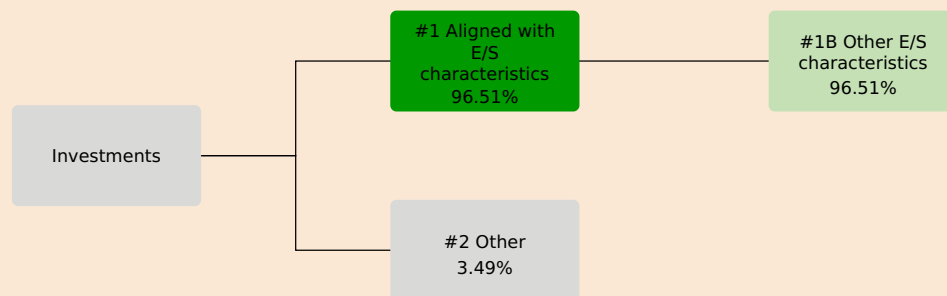

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.51% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.49% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.34
10102040	Oil & Gas Storage & Transportation	1.08
10102050	Coal & Consumable Fuels	0.00
Total		1.70

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.49% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Emerging Markets Local Debt Fund

Legal entity identifier: 549300CKJEPTNIOLPT07

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Emerging Markets Local Debt Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	0.25	0.39	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		0.45	0.39	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		491.90	0.39	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		492.60	0.39	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	69.93	0.39	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,550.53	5.92	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	6.46	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	23.32	1.00	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.43	0.11	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.03	0.01	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	6.02	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	0.41	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	6.02	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	4.44	5.27	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.03	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	24.41	1.67	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	5.18	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BRAZIL NTN-F	Sovereign	6.02%	Brazil
REP SOUTH AFRICA	Sovereign	4.08%	South Africa

COLOMBIA TES	Sovereign	1.69%	Colombia
POLAND GOVT BOND	Sovereign	1.65%	Poland

What was the proportion of sustainability-related investments?

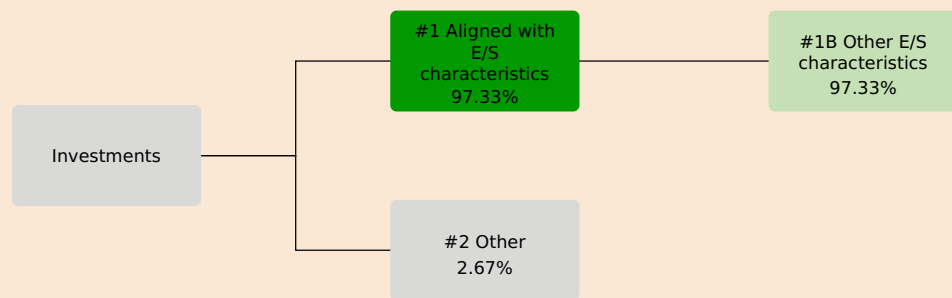

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.33% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.67% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	4.60
Communication Services	0.00
Consumer Discretionary	0.00

Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.67% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Environmental Climate Opportunities Bond Fund

Legal entity identifier: JAPH2ZF2OTY1LYWVIO59

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: _____%**

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.68 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Environmental Climate Opportunities Bond Fund (the "Fund") has various environmental and social characteristics. Screening was employed to exclude issuers depending on their level of involvement in certain activities considered controversial (such as (but not limited to) activities involved in coal, arctic oil & gas exploitation, oil sands extraction, shale energy extraction, conventional oil and gas, tobacco, recreational cannabis). The Fund also excluded issuers in violation of the UN Global Compact, based on third-party data and the Investment Manager's analysis and research.

The Fund supported the transition to a low carbon economy by funding companies in high carbon emitting sectors that show progress towards lowering their carbon footprint as well as low carbon sectors.

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
Revenue derived from thermal coal mining, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue derived from arctic oil and gas exploitation; oil sands extraction; and shale energy extraction excluded if each $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue derived from oil and gas exploration, production, refining, transportation and/or storage, excluded if $\geq 25\%$ of revenue ¹	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons, excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from production of tobacco products, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from tobacco related products and services, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies not compliant with the Ten Principles of the UN Global Compact Initiative, excluded if not compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue derived from the manufacture and sale of nuclear weapons to companies that have not signed the Nuclear Non-Proliferation Treaty, excluded if $\geq 0\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue derived from recreational cannabis, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
The Fund's climate change score vs. overall climate comparator score	1.88 vs 2.49
% of Non-scored issuers, qualitative comment from investment team	21% - When companies are not covered by the climate comparator, the investment team conducts quantitative and qualitative analysis to determine if these companies meet their definition of sustainable. The majority of unscored issuers are in areas essential to the transition such as low carbon electricity generation or distribution or in quasi government/inter government institutions.

● **...and compared to previous periods?**

The Fund's climate change score has slightly increased due to restatements of carbon emissions data. However, the Fund was still significantly outperforming the overall climate comparator score and contributed to its goal of supporting the transition to a low carbon economy. Please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
The Fund's climate change score vs. overall climate comparator score	1.73 vs. 2.40	1.88 vs 2.49
% of Non-scored issuers, qualitative comment from investment team	16% - When companies are not covered by the climate comparator, the investment team conducts quantitative and qualitative analysis to determine if these companies meet their definition of sustainable. The majority of unscored issuers are in areas essential to the transition such as low carbon electricity generation or distribution or in quasi government/inter government institutions.	21% - When companies are not covered by the climate comparator, the investment team conducts quantitative and qualitative analysis to determine if these companies meet their definition of sustainable. The majority of unscored issuers are in areas essential to the transition such as low carbon electricity generation or distribution or in quasi government/inter government institutions.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives such as climate change.

The Fund sought to achieve the above objective by investing in green, sustainability-linked and transition bonds or by using a best-in-class approach and selecting companies that score higher, when compared to their peers, on environmental scores utilizing the Investment Manager's proprietary scoring methodology (Issuers that score 2 using a proprietary climate comparator that combines external ESG data and industry specific metrics to create a sector relative score between 1-5 for each issuer). Finally, the Fund could also invest in issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above climate objective. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,302.78	64.47	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		290.53	64.47	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		20,158.44	64.47	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		21,751.75	64.47	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	702,608.68	64.47	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,101.35	90.13	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	91.38	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	50.67	67.03	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.53	37.20	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.17	
	Electricity, Gas, Steam & Air Conditioning Supply	1.90	11.81	
	Manufacturing	0.27	18.98	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.21	4.08		
Transportation & Storage	0.63	0.94		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.60	2.44		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	3.81	
	7. Activities negatively affecting biodiversity-sensitive areas	2.23	87.44	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.39	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	162.13	64.56	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	87.44	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31.45	86.88	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.67	13.78	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.35	78.04	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	88.53	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
US TREASURY N/B	Sovereign	3.60%	United States
EUROPEAN INVT BK	Financials	2.73%	Luxembourg
EDPPL 1.71 1/24/2028	Utilities	2.14%	Netherlands

NATIONWIDE BLDG	Financials	1.32%	United Kingdom
BWA 2.65 7/1/2027	Consumer Discretionary	1.31%	United States
NEXT GROUP PLC	Consumer Discretionary	1.30%	United Kingdom
ENELIM 5.5 6/15/2052	Utilities	1.24%	Netherlands

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

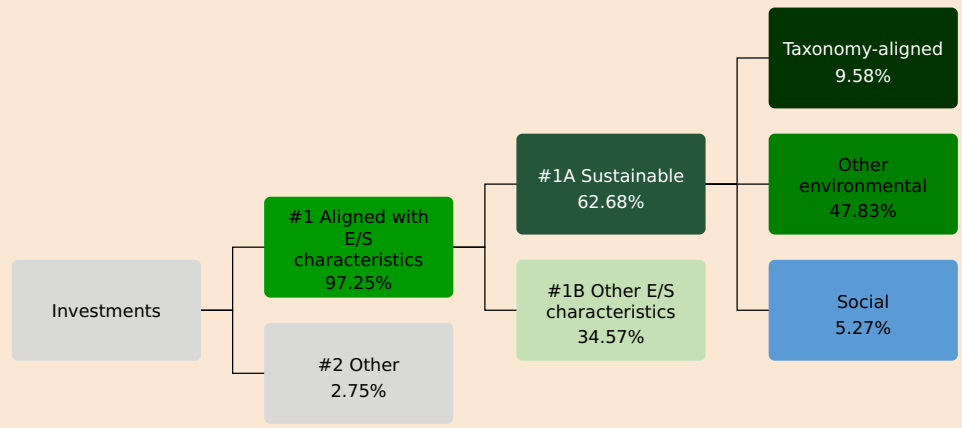

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

97.25% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.75% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

62.68% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 9.58% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	1.96%
Transition	0.01%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

47.83% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitored closely the evolution of the dataset and their reliance and increased the portion of sustainable investments aligned with EU Taxonomy as the case may be, which decreased the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

5.27% of the fund was invested in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, under normal market circumstances, the Fund could hold up to 30% maximum in liquid assets, government debt or money market instruments for cash management/liquidity/ duration management purposes which was not assessed for compliance with the Fund’s ESG criteria. Long exposure to derivatives (such as index CDS) did not conform to the climate methodology.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Euro Bond Fund

Legal entity identifier: HH36MQAZCGE98HNSVD57

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.33 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Euro Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	6,125.40	40.08	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		774.09	40.08	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		59,752.76	40.08	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		66,652.25	40.08	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	32,351.08	40.08	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,233.81	59.73	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.42	61.78	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	56.01	42.82	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	32.47	17.21	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.08	0.04	
	Electricity, Gas, Steam & Air Conditioning Supply	2.22	3.54	
	Manufacturing	0.36	6.67	
Mining & Quarrying	0.80	3.49		
Real Estate Activities	0.75	1.70		
Transportation & Storage	1.89	1.07		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.16	0.03		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	5.44	60.31	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.35	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	17.28	40.30	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	60.31	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	22.69	59.98	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	25.24	2.83	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.77	49.31	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	59.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BTPS	Sovereign	2.66%	Italy
BUNDESUBL-187	Sovereign	2.08%	Germany

BTPS	Sovereign	1.13%	Italy
FRTR 1.5 5/25/2050	Sovereign	1.04%	France
INDON 1.45 9/18/2026	Sovereign	0.97%	Indonesia
DEUTSCHLAND REP	Sovereign	0.96%	Germany

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

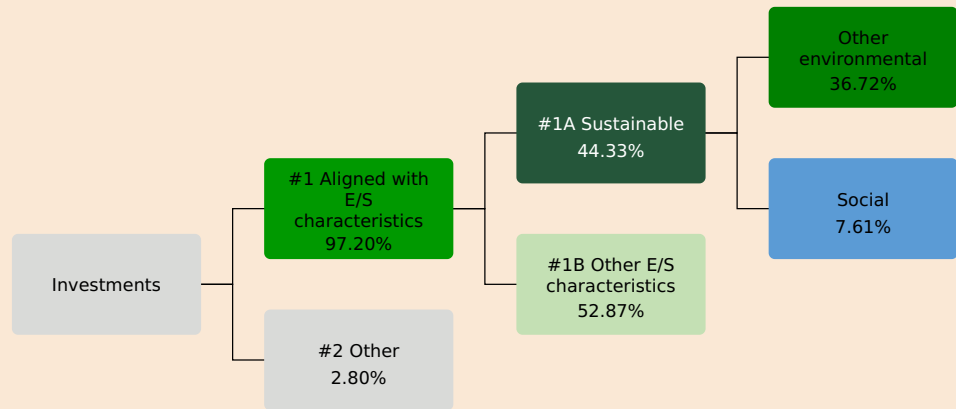

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.20% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.80% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

44.33% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		3.05

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

36.72% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

7.61% of the Fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.80% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Euro Corporate Bond Fund

Legal entity identifier: 549300JTZH9W8F23MF74

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.08 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Euro Corporate Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

During the reference period, although the Fund did not commit to a minimum of sustainable investments aligned with EU Taxonomy, the Fund made some sustainable investments aligned with EU Taxonomy and contributed to Climate Change mitigation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	74,673.73	73.18	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		17,364.21	73.18	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		975,178.30	73.18	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		1,067,216.23	73.18	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	5,146.59	73.18	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,202.62	93.89	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.24	95.29	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	55.30	67.90	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	31.56	34.98	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	1.68	6.87	
	Manufacturing	0.28	23.02	
	Mining & Quarrying	0.86	3.92	
Real Estate Activities	0.58	2.72		
Transportation & Storage	0.16	0.43		
Water Supply, Sewerage, Waste Management &	0.63	0.77		

Biodiversity	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	1.35	
	7. Activities negatively affecting biodiversity-sensitive areas	6.18	94.29	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.46	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	3.05	74.53	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	94.29	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	30.72	93.92	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	25.06	5.17	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.27	86.77	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	95.22	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

**What were the top investments of this financial product?**

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

**What was the proportion of sustainability-related investments?**

Asset allocation describes the share of investments in specific assets.

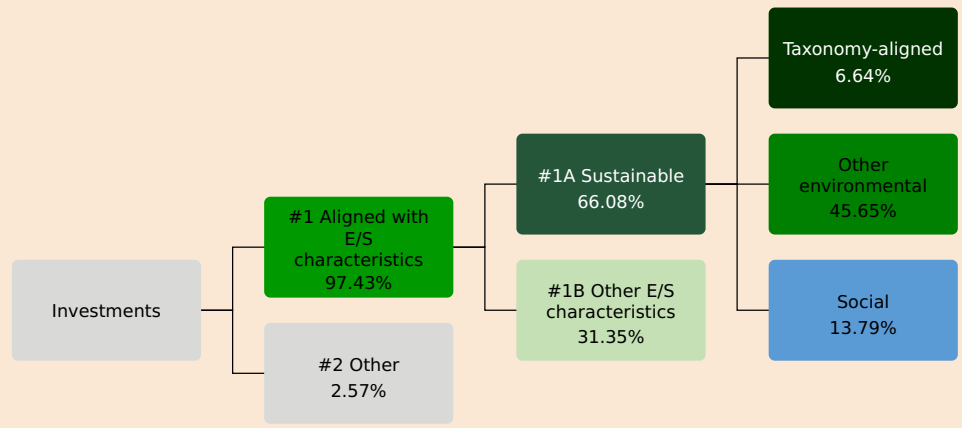

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

- **What was the asset allocation?**

97.43% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.57% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and 0% cash was held for ancillary liquidity purposes.

66.08% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102050	Coal & Consumable Fuels	0.00
Total		4.22

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, 6.64% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	1.95%
Transition	0.12%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

45.65% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

13.79% of the fund was invested in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.57% of the Fund’s asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Euro Short Term Bond Fund

Legal entity identifier: 549300ECHQF3TB00MV66

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.32 % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It made **sustainable investments with a social objective:** _____ %

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Euro Short Term Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	4,893.49	33.18	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		560.57	33.18	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		85,859.07	33.18	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		91,313.13	33.18	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	639.19	33.18	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,542.78	48.70	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	50.26	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	55.04	33.89	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	24.49	15.55	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.54	2.57	
	Manufacturing	0.23	7.13	
	Mining & Quarrying	0.92	2.42	
Real Estate Activities	0.21	0.55		
Transportation & Storage	0.08	0.59		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.16	0.06		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	3.32	49.63	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.62	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.40	33.40	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	49.63	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	16.65	49.25	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	29.91	3.61	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.75	42.80	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	48.63	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BTPS 3.85 9/15/2026	Sovereign	3.64%	Italy

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

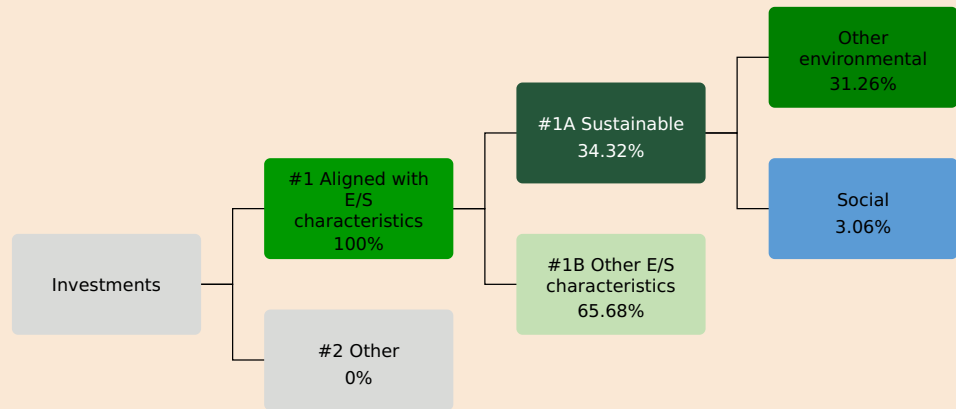

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

34.32% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.26% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

3.06% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Euro Ultra-Short Term Debt Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,368.83	49.04	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		204.93	49.04	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		47,556.81	49.04	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		49,130.57	49.04	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	2,006.78	49.04	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,666.56	92.60	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	90.85	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.69	58.91	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	6.64	17.97	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	3.18	2.16	
	Manufacturing	0.15	23.46	
Mining & Quarrying	0.27	0.39		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.10	0.42		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.39	89.62	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.17	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.23	50.22	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	89.62	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31.04	89.62	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	31.87	3.17	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.97	75.58	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	87.73	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
EFSF	Financials	2.01%	Luxembourg
ANZ 3.652 1/20/2026	Financials	1.67%	Australia
MOTABILITY OPS	Industrials	1.44%	United Kingdom
TOYOTA 3.434 26	Consumer Discretionary	1.25%	Australia
TOYOTA 3.375 26	Consumer Discretionary	1.25%	Netherlands

SGOFP 3.75 26	Industrials	1.05%	France
ENGIFP 3.625 26	Utilities	1.05%	France
ABNANV FLT 1/15/2027	Financials	1.04%	Netherlands

What was the proportion of sustainability-related investments?

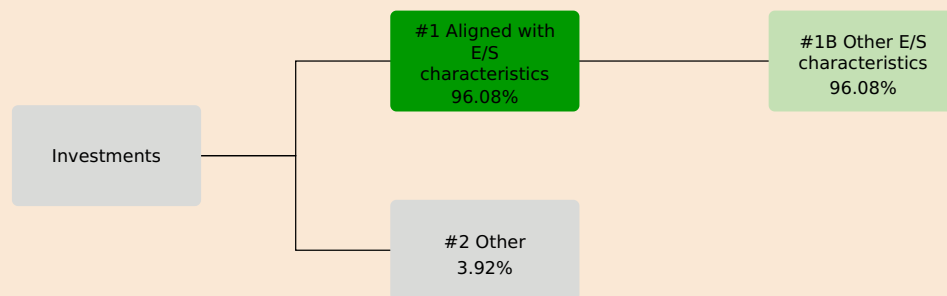

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.08% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.92% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown – the data is representative of the reference period

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.92% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Flexible Bond Fund

Legal entity identifier: 549300J4D4FCQQ7CRC52

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Global Flexible Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	560.13	35.33	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		67.93	35.33	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,961.07	35.33	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		5,589.12	35.33	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	7,518.71	35.33	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	913.06	44.87	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.48	54.51	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	55.10	19.40	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	19.71	7.63	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.13	0.62	
	Electricity, Gas, Steam & Air Conditioning Supply	1.42	0.38	
	Manufacturing	0.17	2.69	
Mining & Quarrying	0.87	1.97		
Real Estate Activities	0.14	0.33		
Transportation & Storage	1.74	1.02		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	3.52	49.19	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	5.75	30.52	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	49.19	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	30.68	49.19	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	22.25	2.97	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.79	43.57	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	49.63	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
US TREASURY N/B	Sovereign	4.34%	United States

What was the proportion of sustainability-related investments?

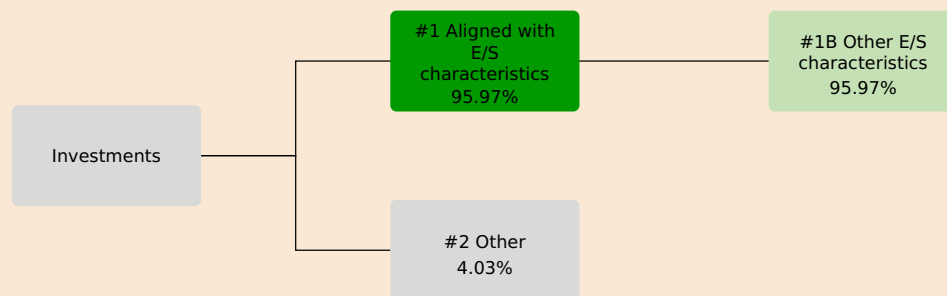

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

95.97% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

4.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Total		3.48

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

4.03% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Real Return (EUR) Bond Fund

Legal entity identifier: IYNJ5U042E8GYC3R6550

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Real Return (EUR) Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 21st of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sovereigns, Sovereign issuers rated E (on a scale of A-E) by the investment managers qualitative assessment	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric	
Greenhouse gas emissions	1. GHG Emissions	139.54	28.58	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)	
		31.23	28.58	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)	
		2,022.69	28.58	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)	
		2,193.47	28.58	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)	
	2. Carbon footprint	7,079.66	28.58	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)	
	3. GHG Intensity of investee companies	1,311.27	36.08	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)	
	4. Exposure to companies active in the fossil fuel sector	0.00	36.32	% of the fund exposed to any fossil fuels revenue	
	5. Share of non-renewable energy consumption	44.15	24.49	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)	
	5. Share of non-renewable energy production	17.95	8.56		
	6. Energy consumption intensity per high impact climate sector				
	Agriculture, Forestry & Fishing	0.00	0.00		
	Construction	0.01	0.53		
	Electricity, Gas, Steam & Air Conditioning Supply	1.87	1.51		
	Manufacturing	0.34	3.26		
	Mining & Quarrying	0.74	2.28		
	Real Estate Activities	0.43	1.73		
Transportation & Storage	0.12	0.58			
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00			
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.63			
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	3.38	35.35		Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00		Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste	7.11	28.59		Tonnes of hazardous waste and

	and radioactive waste ratio			radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	35.35	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	14.19	35.35	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	22.92	3.80	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.00	32.73	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	46.68	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Asset Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to the 21st of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BTPS I/L	Sovereign	11.13%	Italy
SPAIN I/L BOND	Sovereign	9.20%	Spain
DEUTSCHLAND I/L	Sovereign	7.24%	Germany
DEUTSCHLAND I/L	Sovereign	6.84%	Germany
FRANCE O.A.T.I/L	Sovereign	5.89%	France
BTPS I/L	Sovereign	4.74%	Italy
FRANCE O.A.T.I/L	Sovereign	4.26%	France
BTPS I/L	Sovereign	3.82%	Italy

Asset allocation describes the share of investments in specific assets.

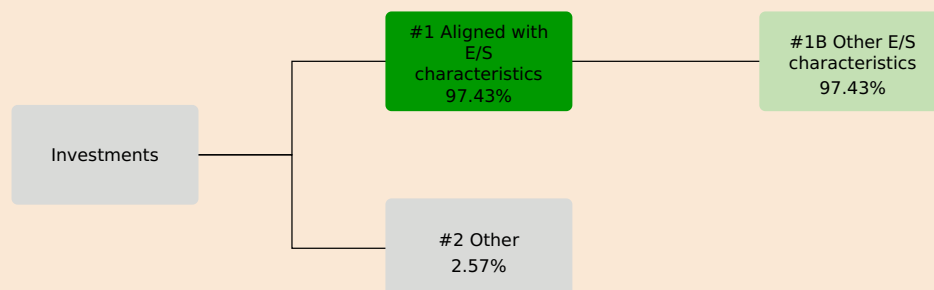

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

What was the asset allocation?

97.43% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.57% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds that were not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.57% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global High Yield Short Term Bond Fund

Legal entity identifier: 549300DYS8LWU15Z0036

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global High Yield Short Term Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 3rd of April 2024. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sovereigns, Sovereign issuers rated E (on a scale of A-E) by the investment managers qualitative assessment	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	4,097.88	59.86	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		950.54	59.86	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		40,123.44	59.86	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		45,171.85	59.86	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,108.04	59.86	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,777.61	82.13	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	5.81	90.54	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	85.34	41.19	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.92	9.21	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing			
	Construction	0.15	1.06	
	Electricity, Gas, Steam & Air Conditioning Supply			
	Manufacturing	0.68	14.33	
	Mining & Quarrying	1.58	3.51	
Real Estate Activities	0.31	1.30		
Transportation & Storage	3.89	3.07		
Water Supply, Sewerage, Waste Management & Remediation Activities				
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	4.26		
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	2.62	75.92	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer

				in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.11	60.85	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	75.92	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	46.29	74.37	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	9.76	2.36	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	27.93	71.09	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	92.88	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Asset Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to the 3rd of April 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
AMPBEV 6 6/15/2027	Materials	2.14%	United States
LITHIA MOTORS	Consumer Discretionary	1.92%	United States
CCL 10.375 5/1/2028	Consumer Discretionary	1.90%	Bermuda
RIG 8.375 2/1/2028	Energy	1.89%	Cayman Islands

What was the proportion of sustainability-related investments?

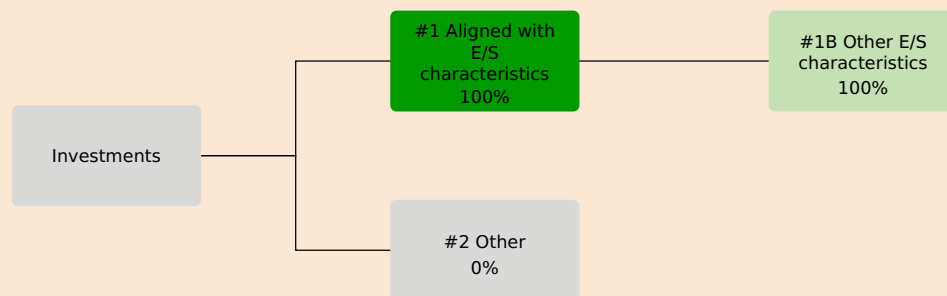

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

100.00% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.65
10102040	Oil & Gas Storage & Transportation	5.42
10102050	Coal & Consumable Fuels	0.00
Total		12.29

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.00% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Investment Grade Corporate Bond Fund Legal entity identifier: 54930001G4R8ZUCFAT61

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.42 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global Investment Grade Corporate Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	33,658.45	64.04	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		4,315.78	64.04	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		276,642.13	64.04	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		314,616.36	64.04	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	8,244.48	64.04	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,237.33	85.73	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.61	88.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	58.94	60.94	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.82	26.86	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.08	0.10	
	Electricity, Gas, Steam & Air Conditioning Supply	2.59	3.97	
	Manufacturing	0.32	12.58	
Mining & Quarrying	0.88	4.59		
Real Estate Activities	0.64	1.68		
Transportation & Storage	2.46	2.53		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.16	0.03		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	1.03	
	7. Activities negatively affecting biodiversity-sensitive areas	8.24	85.71	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.41	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	5.46	64.93	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	85.71	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	34.52	84.56	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	23.70	5.05	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.27	77.37	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	90.01	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

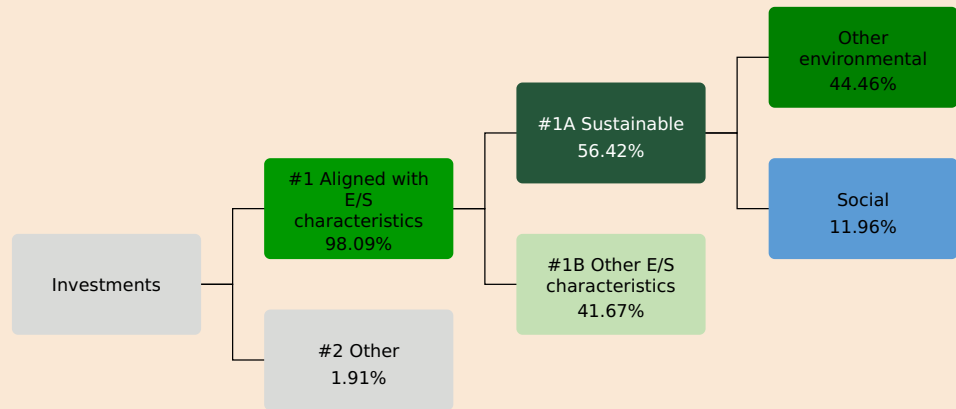

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.09% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.91% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in other funds not subject to the same restrictions.

56.42% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

44.46% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

11.96% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.91% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Total Return (EUR) Bond Fund

Legal entity identifier: ZMS4P807673WXDEHOJ12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.38 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global Total Return (EUR) Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered

for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	39,147.14	35.37	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		4,958.51	35.37	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		160,809.95	35.37	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		204,915.60	35.37	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	17,817.88	35.37	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,050.56	44.51	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	44.66	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.34	30.91	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	37.58	17.12	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	3.00	2.34	
	Manufacturing	0.43	6.94	
Mining & Quarrying	0.80	1.20		
Real Estate Activities	0.93	1.53		
Transportation & Storage	0.03	0.08		
Water Supply, Sewerage, Waste Management &	0.00	0.00		

Biodiversity	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.04	0.23	
	7. Activities negatively affecting biodiversity-sensitive areas	2.98	44.63	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	16.43	36.14	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	44.63	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	14.17	44.63	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	29.41	2.55	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.85	41.25	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	44.78	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

**What were the top investments of this financial product?**

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
US TREASURY N/B	Sovereign	7.09%	United States

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

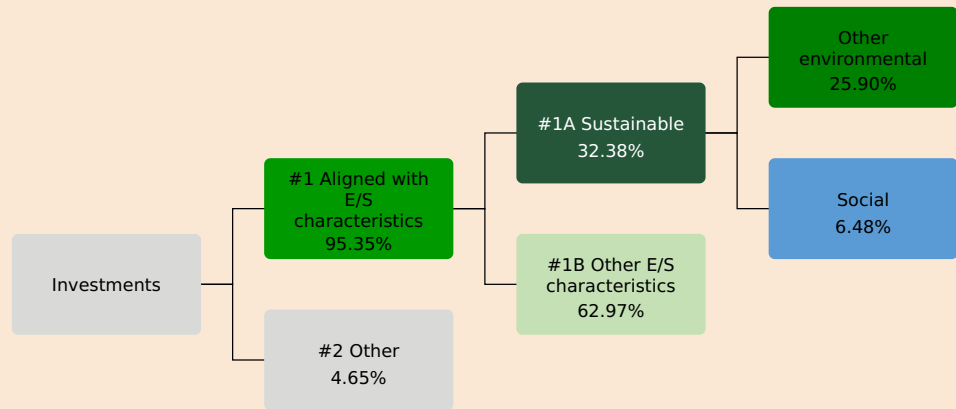

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

- **What was the asset allocation?**

95.35% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

4.65% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

32.38% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.19
10102020	Oil & Gas Exploration & Production	0.32
10102030	Oil & Gas Refining & Marketing	0.29
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		1.80

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.90% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

6.48% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

4.65% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco India Bond Fund

Legal entity identifier: 5493000GXHC1IJXU1N37

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco India Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ of revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	213.95	8.23	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		53.30	8.23	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,375.98	8.23	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,643.24	8.23	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	394.92	8.23	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,213.71	15.41	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	19.88	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	76.44	6.83	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	2.26	4.23	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.33	16.39	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.05	8.27	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	16.39	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	13.90	16.39	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	28.62	8.61	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	15.70	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
IGB 7.23 4/15/2039	Sovereign	10.37%	India
INDIA GOVT BOND	Sovereign	8.90%	India
INDIA GOVT BOND	Sovereign	8.17%	India
IGB 7.1 4/8/2034	Sovereign	6.77%	India
INDIA GOVT BOND	Sovereign	6.59%	India
INDIA GOVT BOND	Sovereign	6.18%	India
INDIA GOVT BOND	Sovereign	3.64%	India

What was the proportion of sustainability-related investments?

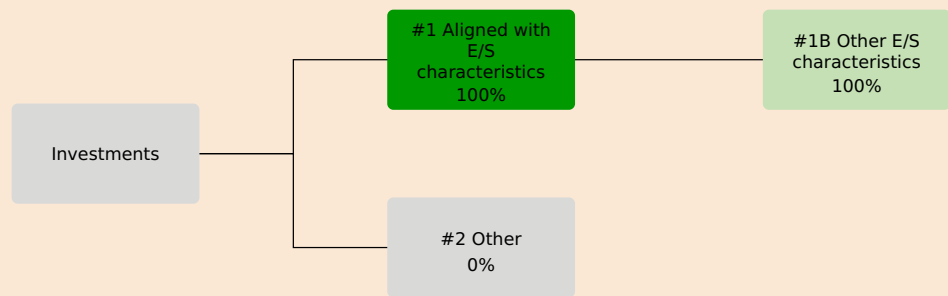

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund was invested in investments that aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Total		0.61

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sterling Bond Fund

Legal entity identifier: 5493005RJNIGLSTGV36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.71 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Sterling Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	10,237.45	55.91	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,033.38	55.91	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		304,528.80	55.91	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		317,799.63	55.91	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	553.62	55.91	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,294.41	87.77	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	88.72	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	49.60	59.20	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.89	33.20	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.05	0.19	
	Electricity, Gas, Steam & Air Conditioning Supply	1.76	6.45	
	Manufacturing	0.16	8.96	
	Mining & Quarrying	0.63	4.00	
	Real Estate Activities	0.50	4.27	
Transportation & Storage	0.23	1.47		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.64	2.24		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	2.38	
	7. Activities negatively affecting biodiversity-sensitive areas	7.02	84.54	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.52	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.10	57.94	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	84.54	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31.17	84.07	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	22.87	19.98	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.71	76.42	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	85.72	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

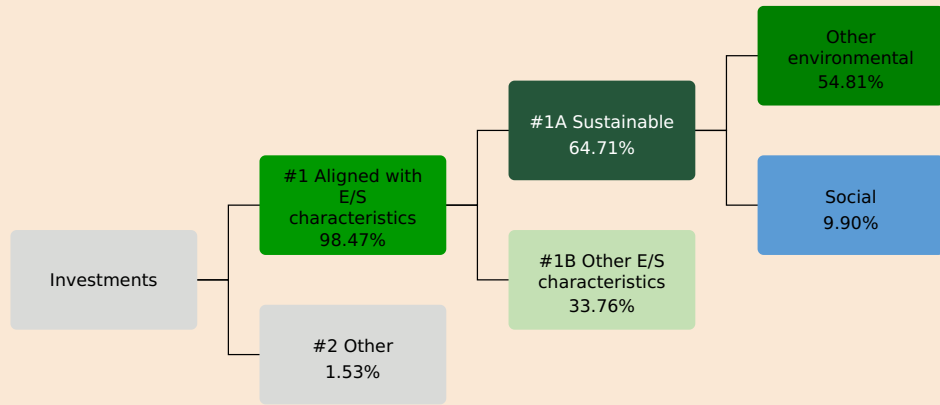

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.47% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.53% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions.

64.71% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

54.81% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

9.90% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.53% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sustainable China Bond Fund

Legal entity identifier: 5493008KKBAFK6W73042

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.34 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Sustainable China Bond Fund ("the Fund") has various environmental and social characteristics. The Fund excluded certain sectors being considered controversial such as (but not limited to) activities involved in fossil fuel, gambling, adult entertainment, tobacco. The Fund also excluded issuers in violation of the UN Global Compact, based on third-party data and the Investment Manager's analysis and research. The Investment Manager aimed to select issuers which in its view are better positioned than their global sector peers in terms of addressing environmental, social and governance issues. The environmental and social characteristics included consideration of ESG factors such as environmental commitment, human capital management, privacy and data security, business ethics and board engagement. The Fund intended to allocate a higher portion of the portfolio into sustainability labelled bonds, such as green bonds, social bonds, sustainability linked bonds, etc., than the Fund's benchmark (J.P. Morgan Asia Credit China and HK Index).

Finally, the Fund also considered carbon emission with a view to ensuring that the Fund maintained a lower carbon intensity than the Fund's benchmark (as per above).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
UN Global Compact principles excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Power Generation, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from: 1) Arctic oil & gas exploration extraction, 2) Oil sands extraction, 3) Shale energy extraction, excluded if $\geq 5\%$ of revenue on each component	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from illegal & controversial weapons (anti-personnel mines, cluster munition, depleted uranium, biological / chemical weapons etc.), excluded if $> 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons related products and services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Civilian customers (Assault Weapons) , excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Military / Law Enforcement, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Key Components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Retail / Distribution, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT), excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco products production, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products Related Products / Services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in the recreational cannabis industry, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling operations, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling specialised equipment, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling supporting products and services, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Production, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Distribution, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
% of issuers in each proprietary ESG score	A - 2.68%; B - 27.78%; C - 59.00%; D - 2.03%; E - 0%
% of issuers with an improving ESG trend	19.53%

● **...and compared to previous periods?**

The sustainability indicators of the Fund have been improving with ESG score and trend aligning towards the higher quality end compared to previous period. Please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
% of issuers in each proprietary ESG score	A - 0%; B - 31.4%; C - 55.5%; D - 2.7%; E - 0%	A - 2.68%; B - 27.78%; C - 59.00%; D - 2.03%; E - 0%
% of issuers with an improving ESG trend	15.90%	19.53%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) companies which generate a material part of their revenue, or (iii) green, sustainability and social bonds. The Fund also used a best-in-class approach and selected companies that score higher (scores of 1 or 2 on either environmental or social factors were considered as long as the issuer did not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet, UN Global Compact principles.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	431.00	68.98	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		228.99	68.98	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		10,438.78	68.98	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		11,098.77	68.98	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	21,307.13	68.98	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,281.29	79.45	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	92.72	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	88.09	39.83	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.14	26.22	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.08	1.63	
	Electricity, Gas, Steam & Air Conditioning Supply	0.10	3.79	
	Manufacturing	14.34	16.93	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.10	7.32		
Transportation & Storage	0.67	2.20		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.08	0.26		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	1.62	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	86.09	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.78	72.52	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	86.09	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	72.31	86.09	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.74	73.33	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	89.55	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BABA 2.7 2/9/2041	Consumer Discretionary	2.27%	China
LINK CB LTD	Real Estate	1.95%	Hong Kong
CHMEDA 1.875 25	Consumer Staples	1.85%	China
LENOVO 6.536 32	Information Technology	1.83%	China
MEITUAN	Consumer Discretionary	1.77%	China

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

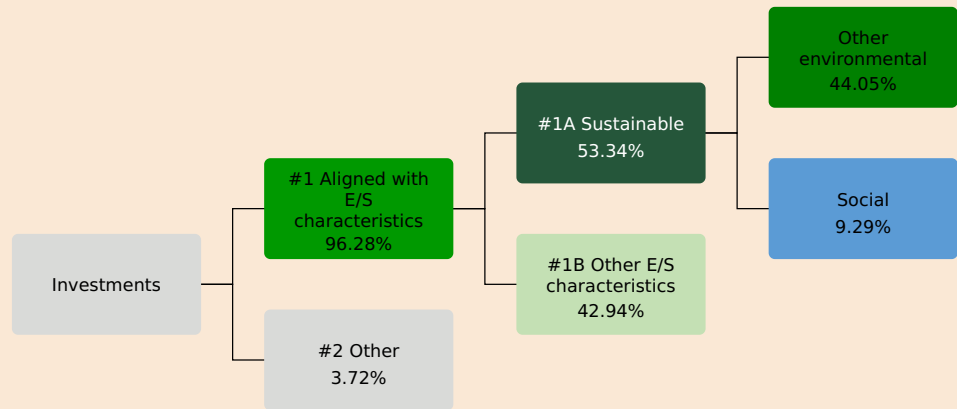

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

96.28% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.72% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

53.34% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	40.76
Communication Services	2.65
Consumer Discretionary	11.52
Information Technology	3.41
Industrials	9.67
Consumer Staples	6.53
Energy	1.35
Real Estate	8.97
Health Care	0.00
Materials	3.83
Utilities	4.96
Sovereign	2.63
Others/Derivatives	3.72
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	1.35
10102050	Coal & Consumable Fuels	0.00
Total		1.35

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

44.05%. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

9.29% of the fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold up to 30% maximum ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the Fund’s ESG criteria.

Under normal market conditions, it was expected that the Fund would hold less than 10% in money market instruments and ancillary liquid assets for liquidity purposes.

Due to the neutral nature of the assets, no minimum safeguards were put in place.

The Fund could use derivatives for hedging, efficient portfolio management (EPM) and investment position-taking. Derivatives on indices and counterparties used by the Fund were exempt from the ESG criteria set out above.

This included instruments and counterparties used in the management of the portfolio’s duration or yield curve positions, the hedging of non-base currency exposures and the Fund’s overall credit risk, as well as active investment exposures taken through derivatives. This is not an exhaustive list but the intention was to ensure that efficient management of the portfolio’s risks as well as desired investment exposures delivered efficiently for investors using exchange traded and OTC instruments. The Investment Manager will continue to monitor market developments on sustainability-aligned derivative instruments and will evaluate new instruments as they arise.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the best-in-class approach and the exclusion framework, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sustainable Global High Income Fund

Legal entity identifier: 549300GOGETC5000740

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.97 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Sustainable Global High Income Fund (the "Fund") has various environmental and social characteristics. The Fund excluded certain sectors being considered controversial (such as (but not limited to) activities involved in fossil fuel, gambling, adult entertainment, tobacco). The Fund also excluded issuers in violation of the UN Global Compact based on third-party data and the Investment Manager's proprietary analysis and research. The Investment Manager aimed to select issuers which in its view are better positioned than their global sector peers in terms of addressing environmental, social and governance (ESG) issues. The environmental and social characteristics could include consideration of ESG factors such as environmental commitment, human capital management, privacy and data security, business ethics and board engagement. Finally, the Fund also considered carbon emissions with a view to ensuring that the Fund maintains a lower carbon intensity than the Fund's benchmark (Bloomberg Global High Yield Corporate Index).

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
UN Global Compact principles, excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Power Generation, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from: 1) Arctic oil & gas exploration extraction, 2) Oil sands extraction, 3) Shale energy extraction, excluded if $\geq 5\%$ of revenue on each component	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from illegal & controversial weapons (anti-personnel mines, cluster munition, depleted uranium, biological / chemical weapons etc.), excluded if $> 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons related products and services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Civilian customers (Assault Weapons) , excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Military / Law Enforcement, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Key Components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Retail / Distribution, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT), excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco products production, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products Related Products / Services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in the recreational cannabis industry, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Production, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Distribution, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling operations, excluded if excluded if $> 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling specialised equipment, excluded if excluded if $> 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling supporting products and services, excluded if excluded if $> 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
The Fund's Scope 1 and 2 Carbon intensity (defined as carbon emissions per USD million of revenues) vs the Fund's benchmark (Bloomberg Global High Yield Corporate Index) carbon emission intensity	Fund vs Bmk: 227.14 vs 257.81
% of issuers in each proprietary ESG score	IFI ESG A - 1.55% IFI ESG B - 14.38% IFI ESG C - 75.99% IFI ESG D - 4.07% Other - 4.02%
% of issuers with an improving ESG trend	19.51%,

● ...and compared to previous periods?

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
The Fund's Scope 1 and 2 Carbon intensity (defined as carbon emissions per USD million of revenues) vs the Fund's benchmark (Bloomberg Global High Yield Corporate Index) carbon emission intensity	Fund vs Bmk: 215.41 vs 275.95	Fund vs Bmk: 227.14 vs 257.81
% of issuers in each proprietary ESG score	IFI ESG A - 3.28%	IFI ESG A - 1.55%
	IFI ESG B - 20.25%	IFI ESG B - 14.38%
	IFI ESG C - 67.58%	IFI ESG C - 75.99%
	IFI ESG D - 5.13%	IFI ESG D - 4.07%
	IFI ESG E - Not Reported	IFI ESG E - Not Reported
Other - 3.80%	Other -4.02 %	
% of issuers with an improving ESG trend	24.28%	19.51%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors could be considered as long as the issuer did not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	9,001.95	53.14	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,675.93	53.14	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		67,048.00	53.14	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		78,725.89	53.14	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	3,249.24	53.14	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,478.10	71.15	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	6.11	80.84	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	70.36	35.34	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	23.41	10.24	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	0.61	
	Electricity, Gas, Steam & Air Conditioning Supply	13.93	0.64	
	Manufacturing	0.75	8.92	
Mining & Quarrying	1.48	3.52		
Real Estate Activities	0.27	3.06		
Transportation & Storage	3.97	2.03		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.67	0.58		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	3.63	
	7. Activities negatively affecting biodiversity-sensitive areas	2.81	71.89	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	11.53	58.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	71.70	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	43.81	70.20	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.83	1.67	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	29.13	67.70	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	79.25	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
AAL 5.75 4/20/2029	Industrials	1.23%	United States
AIRCASTLE LTD	Industrials	1.11%	United States
CSV 4.25 5/15/2029	Consumer Discretionary	1.07%	United States
BERTELSMANN SE	Communication Services	1.03%	Germany
IQV 2.25 1/15/2028	Information Technology	1.03%	United States
VOD FLT 8/27/2080	Communication Services	0.92%	United Kingdom
TELEFO FLT 59	Communication Services	0.92%	Netherlands
MAGLLC 8.25 8/1/2031	Consumer Discretionary	0.88%	United States
JANEST 7.125 31	Financials	0.88%	United States
ZIGGO 3.5 1/15/2032	Communication Services	0.83%	Netherlands
VMED 5.25 5/15/2029	Communication Services	0.83%	United Kingdom
PHIN 6.75 4/15/2029	Consumer Discretionary	0.81%	United States
WEPAHY 5.625 31	Materials	0.80%	Germany
FIRSTCASH INC	Financials	0.79%	United States
TGE 9 8/1/2029	Energy	0.78%	United States

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

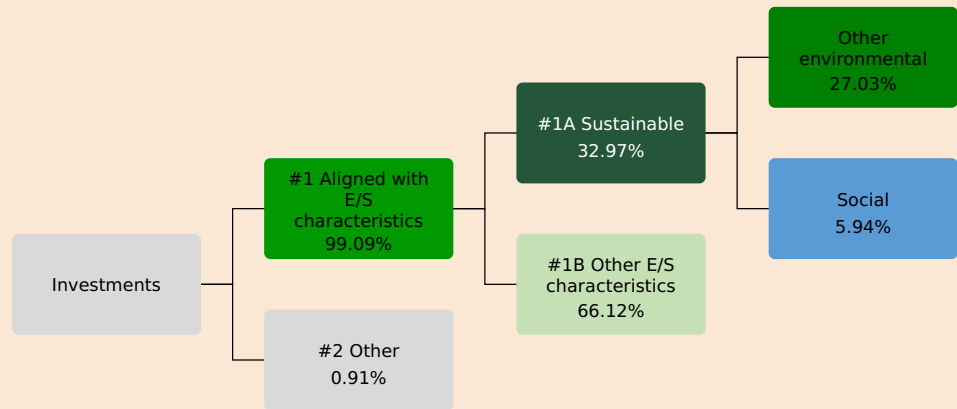

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

99.09% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.91% of the Fund was invested in financial derivative instruments for investment and hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

32.97% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	2.69
10101020	Oil & Gas Equipment & Services	0.13
10102010	Integrated Oil & Gas	0.18
10102020	Oil & Gas Exploration & Production	0.99
10102030	Oil & Gas Refining & Marketing	1.24
10102040	Oil & Gas Storage & Transportation	6.16
10102050	Coal & Consumable Fuels	0.00
Total		11.39

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

27.03% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

5.94% of the fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold up to 30% maximum ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the Fund’s ESG criteria. Under normal market conditions, it was expected that the Fund would hold less than 10% in money market instruments and ancillary liquid assets for liquidity purposes. Due to the neutral nature of the assets, no minimum safeguards were put in place. The Fund could use derivatives for hedging, efficient portfolio management (EPM) and investment position-taking. Derivatives on indices and counterparties used by the Fund were exempt from the ESG criteria set out above. This included instruments and counterparties used in the management of the portfolio’s duration or yield curve positions, the hedging of non-base currency exposures and the Fund’s overall credit risk, as well as active investment exposures taken through derivatives. This is not an exhaustive list but the intention was to ensure that efficient management of the portfolio’s risks as well as desired investment exposures could be delivered efficiently for investors using exchange traded and OTC instruments. The Investment Manager continued to monitor market developments on sustainability-aligned derivative instruments and evaluated new instruments as they arose.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 35.70 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Invesco Sustainable Multi-Sector Credit Fund (the "Fund") has various environmental and social characteristics. The Fund excluded certain sectors being considered controversial (such as (but not limited to) activities involved in fossil fuel, gambling, adult entertainment, tobacco). The Fund also excluded issuers in violation of the UN Global Compact based on third-party data and the Investment Manager's proprietary analysis and research. The Investment Manager aimed to select issuers which in its view are better positioned that their global sector peers in terms of addressing environmental, social and governance (ESG) issues. The environmental and social characteristics could include consideration of ESG factors such as environmental commitment, human capital management, privacy and data security, business ethics and board engagement.

Finally, the Fund also considered carbon emission with a view to ensuring that the Fund maintains a lower carbon intensity than the Fund's universe. The Fund's investment universe was defined as its strategic asset allocation inclusive of only those asset classes where there is sufficient data on corporate carbon emission metrics.

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
UN Global Compact principles excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Power Generation, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from: 1) Arctic oil & gas exploration extraction, 2) Oil sands extraction, 3) Shale energy extraction, excluded if $\geq 5\%$ of revenue on each component	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from illegal & controversial weapons (anti-personnel mines, cluster munition, depleted uranium, biological / chemical weapons etc.), excluded if $> 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons related products and services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Civilian customers (Assault Weapons) , excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Military / Law Enforcement, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Key Components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Retail / Distribution, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT), excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco products production, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products Related Products / Services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in the recreational cannabis industry, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling operations, excluded if excluded if $\geq 10\%$ of revenue	1 active breach occurred to the gambling restriction during the reference period. The breach occurred between 13-May and 19-Oct 2022. Remedial actions were undertaken to ensure the breach does not reoccur.
Gambling specialised equipment, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling supporting products and services, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Production, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Distribution, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
% of issuers in each proprietary ESG score	IFI ESG A - 1.65% IFI ESG B - 20.57% IFI ESG C - 71.32% IFI ESG D - 4.76% Other - 1.70%
% of issuers with an improving ESG trend	22.49%
The Fund's Scope 1 and 2 Carbon intensity (defined as carbon emissions per USD million of revenues) vs that of the Fund's investment universe	Fund vs Bmk: 192.16 vs 272.57

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
% of issuers in each proprietary ESG score	IFI ESG A - 2.48%	IFI ESG A - 1.65%
	IFI ESG B - 23.18%	IFI ESG B - 20.57%
	IFI ESG C - 67.53%	IFI ESG C - 71.32%
	IFI ESG D - 5.53%	IFI ESG D - 4.76%
	IFI ESG E - Not Reported	IFI ESG E - Not Reported
	Other - 1.28%	Other - 1.70%
% of issuers with an improving ESG trend	27.13%	22.49%
The Fund's Scope 1 and 2 Carbon intensity (defined as carbon emissions per USD million of revenues) vs that of the Fund's investment universe	Fund vs Bmk: 201.60 vs 302.73	Fund vs Bmk: 192.16 vs 272.57

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors could be considered as long as the issuer did not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for

investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,964.44	38.51	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		305.79	38.51	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		8,803.01	38.51	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		11,073.24	38.51	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	758.66	38.51	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,418.20	57.60	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.17	77.08	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.79	34.02	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	25.21	12.05	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	0.31	
	Electricity, Gas, Steam & Air Conditioning Supply	12.04	0.27	
	Manufacturing	1.40	7.94	
	Mining & Quarrying	1.10	2.75	
	Real Estate Activities	0.16	2.05	
Transportation & Storage	3.20	4.40		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.67	0.29		
Wholesale & Retail	0.04	1.46		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	3.67	68.87	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.77	41.62	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	68.80	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	40.76	68.27	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	20.34	1.06	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	30.31	58.10	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	62.94	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

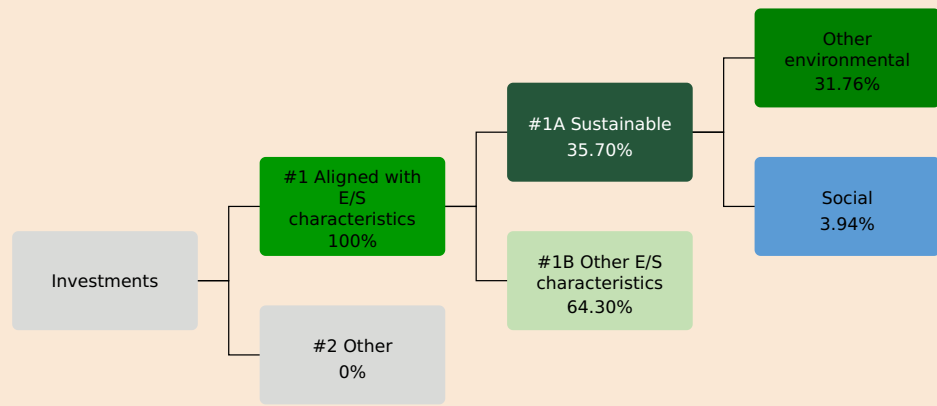

The Fund made investments aligned with the E/S characteristics for a minimum of 70% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 30% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management and investment purposes, cash that was held for ancillary liquidity purposes, or investments in other funds not subject to the same restrictions.

35.70% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

10102050	Coal & Consumable Fuels	0.00
Total		5.72

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.76% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

3.94% of the fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold up to 30% maximum ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the Fund’s ESG criteria. Under normal market conditions, it was expected that the Fund would hold less than 10% in money market instruments and ancillary liquid assets for liquidity purposes. Due to the neutral nature of the assets, no minimum safeguards were put in place. The Fund could use derivatives for hedging, efficient portfolio management (EPM) and investment position-taking. Derivatives on indices and counterparties used by the Fund were exempt from the ESG criteria set out above. This included instruments and counterparties used in the management of the portfolio’s duration or yield curve positions, the hedging of non-base currency exposures and the Fund’s overall credit risk, as well as active investment exposures taken through derivatives. This is not an exhaustive list but the intention was to ensure that efficient management of the portfolio’s risks as well as desired investment exposures could be delivered efficiently for investors using exchange traded and OTC instruments. The Investment Manager continued to monitor market developments on sustainability-aligned derivative instruments and evaluated new instruments as they arose.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund’s consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco UK Investment Grade Bond Fund

Legal entity identifier: T33C6053YJ2DCYJD0F76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco UK Investment Grade Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	182.94	27.22	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		37.80	27.22	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,826.03	27.22	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,046.76	27.22	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	282.63	27.22	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,321.12	40.52	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	41.03	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	46.39	27.79	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.11	12.12	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.05	0.35	
	Electricity, Gas, Steam & Air Conditioning Supply	2.23	2.70	
	Manufacturing	0.09	2.55	
	Mining & Quarrying	0.79	2.30	
	Real Estate Activities	0.66	0.25	
Transportation & Storage	0.12	0.29		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.77	0.32		
Wholesale & Retail	0.04	0.00		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	4.11	39.99	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.13	27.64	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	39.99	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	13.46	39.97	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	24.70	5.49	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.13	36.04	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	41.26	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
UK TSY GILT	Sovereign	9.08%	United Kingdom
UK TSY GILT	Sovereign	6.79%	United Kingdom
UK TSY GILT	Sovereign	6.05%	United Kingdom
UK TSY GILT	Sovereign	5.96%	United Kingdom
UK TSY GILT	Sovereign	4.80%	United Kingdom
UK TSY GILT	Sovereign	4.28%	United Kingdom
UK TSY GILT	Sovereign	3.73%	United Kingdom
UK TSY GILT	Sovereign	3.70%	United Kingdom
UK TSY GILT	Sovereign	3.47%	United Kingdom
UK TSY GILT	Sovereign	2.67%	United Kingdom

What was the proportion of sustainability-related investments?

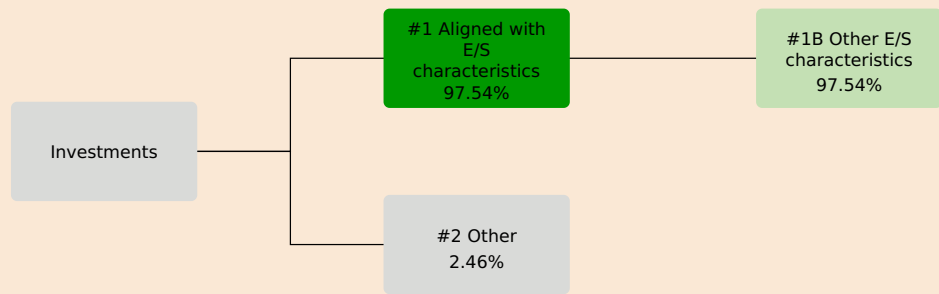

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.54% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.46% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

Total		2.30

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.46% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco USD Ultra-Short Term Debt Fund

Legal entity identifier: 5493000U7PCN0UKHYF42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** _____%

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _____%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco USD Ultra-Short Term Debt Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	1,433.44	69.11	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		471.74	69.11	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		27,817.75	69.11	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		29,722.92	69.11	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	400.23	50.89	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,075.51	94.03	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	97.17	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	64.51	59.72	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	21.00	34.33	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.76	4.15	
	Manufacturing	0.18	24.34	
	Mining & Quarrying	0.28	2.35	
	Real Estate Activities	0.33	7.13	
Transportation & Storage	1.42	1.36		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.16	0.47		
Wholesale & Retail	0.02	1.23		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	2.41	96.05	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.05	51.42	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.05	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	54.87	95.92	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.38	0.40	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.27	91.06	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.60	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ANZ FLT 1/18/2027	Financials	1.13%	Australia
ATH FLT 3/25/2027	Financials	1.13%	United States
BNS FLT 6/12/2025	Financials	1.13%	Canada
RY FLT 1/19/2027	Financials	0.94%	Canada
NRUC 5.1 5/6/2027	Utilities	0.91%	United States
AAPL 4.421 5/8/2026	Information Technology	0.86%	United States
US TREASURY N/B	Sovereign	0.86%	United States
BAC 5.526 8/18/2026	Financials	0.85%	United States

NEE FLT 1/29/2026	Utilities	0.81%	United States
KINDER MORGAN	Energy	0.80%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.90% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.10% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds that were not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	45.05
Communication Services	2.81
Consumer Discretionary	12.30
Information Technology	4.88
Industrials	7.26
Consumer Staples	5.13
Energy	1.74
Real Estate	6.42
Health Care	2.68
Materials	3.02
Utilities	6.30
Sovereign	1.31
Cash	1.10
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.40
10102040	Oil & Gas Storage & Transportation	1.34
10102050	Coal & Consumable Fuels	0.00
Total		1.74

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.10% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco US High Yield Bond Fund

Legal entity identifier: 549300JKQJETQ34ZFZ22

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco US High Yield Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	1,281.15	56.16	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		279.87	56.16	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		10,690.14	56.16	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		12,251.16	56.16	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	8,491.43	56.16	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,419.15	73.65	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	6.70	85.93	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	81.75	34.05	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	11.20	12.74	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	14.25	0.86	
	Manufacturing	0.73	7.56	
	Mining & Quarrying	1.48	3.48	
	Real Estate Activities	0.29	2.94	
Transportation & Storage	4.34	2.36		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.67	0.62		
Wholesale & Retail	0.04	4.70		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	2.03	74.46	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	9.22	62.93	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	74.09	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	52.15	72.35	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	33.56	0.33	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	27.38	73.57	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	82.38	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most

accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
AAL 5.75 4/20/2029	Industrials	1.87%	United States

What was the proportion of sustainability-related investments?

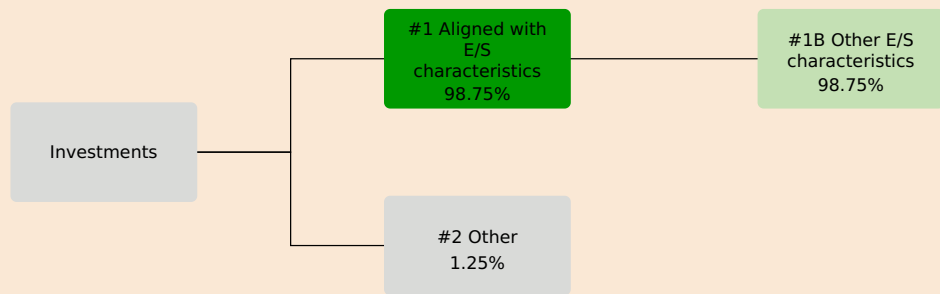

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

98.75% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

1.25% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Total		13.63

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

1.25% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco US Investment Grade Corporate Bond Fund

Legal entity identifier: 549300EL8T1SPPYVEA25

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: _____%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective: _____%**

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco US Investment Grade Corporate Bond Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	394.75	79.59	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		52.27	79.59	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,952.65	79.59	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,399.67	79.59	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	250.11	60.42	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,255.29	93.42	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.02	96.25	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.95	64.10	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	27.72	31.25	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	6.12	4.01	
	Manufacturing	0.21	17.97	
	Mining & Quarrying	1.17	1.49	
	Real Estate Activities	0.47	6.79	
Transportation & Storage	2.94	7.05		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.78	0.16		
Wholesale & Retail	0.05	2.23		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	4.39	94.22	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.22	61.62	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations to UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	94.22	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	65.40	93.34	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	2.11	0.55	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.61	89.74	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.05	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most

accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
RY FLT 5/2/2084	Financials	1.56%	Canada

What was the proportion of sustainability-related investments?

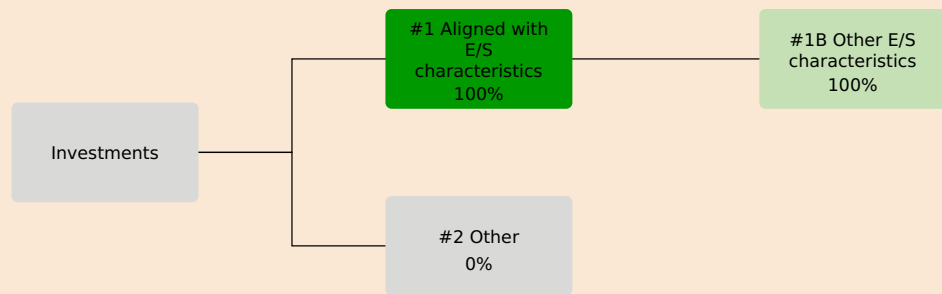

Asset allocation describes the share of investments in specific assets.

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

100% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

Total		6.78

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Asia Asset Allocation Fund

Legal entity identifier: 549300222HFSD3ZKQL92

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Asia Asset Allocation Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,473.99	71.74	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,117.31	71.74	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		34,209.98	71.74	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		36,801.27	71.74	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	7,405.50	71.74	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	958.43	80.89	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.03	86.95	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	88.04	56.45	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.12	27.91	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.09	0.94	
	Electricity, Gas, Steam & Air Conditioning Supply	0.01	0.25	
	Manufacturing	0.24	24.47	
	Mining & Quarrying	1.15	2.86	
	Real Estate Activities	0.06	1.66	
Transportation & Storage	4.86	0.91		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	1.61	
	7. Activities negatively affecting biodiversity-sensitive areas	2.01	84.38	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.03	74.33	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	84.38	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	62.27	84.38	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.95	0.05	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.24	69.43	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	88.52	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	5.13%	Taiwan
TENCENT	Communication Services	4.64%	China
MEDIATEK	Information Technology	2.63%	Taiwan
ASUSTEK COMPUTER	Information Technology	2.41%	Taiwan
SAMSUNG ELECTRON	Information Technology	2.29%	South Korea
BABA-SW	Consumer Discretionary	2.29%	China
DBS GROUP HLDGS	Financials	1.92%	Singapore
JD-SW	Consumer Discretionary	1.70%	China
ICICI BANK LTD	Financials	1.46%	India
KB FINANCIAL GRO	Financials	1.42%	South Korea
QUANTA COMPUTER	Information Technology	1.40%	Taiwan
TENCENT MUSI-ADR	Communication Services	1.32%	China
EXIMBK 3.25 30	Sovereign	1.23%	India
BANK OF CHINA-H	Financials	1.11%	China
AIA	Financials	1.04%	Hong Kong

Asset allocation describes the share of investments in specific assets.

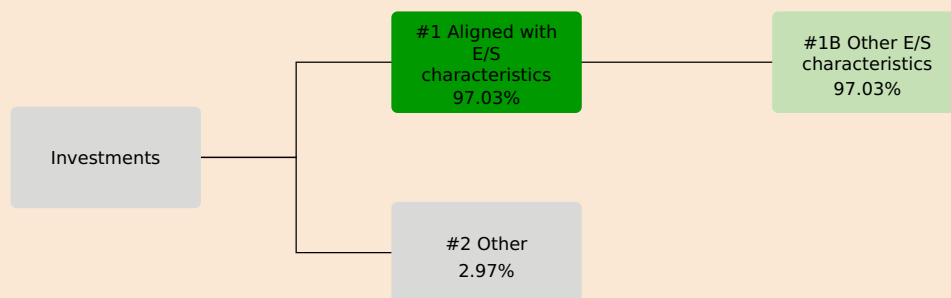

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.03% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.97% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	30.88
Communication Services	8.40
Consumer Discretionary	8.27
Information Technology	21.13

Consumer Staples	2.63
Energy	4.05
Real Estate	2.64
Health Care	0.74
Materials	2.38
Utilities	0.41
Sovereign	9.71
Cash	2.97
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.99
10102020	Oil & Gas Exploration & Production	1.29
10102030	Oil & Gas Refining & Marketing	1.77
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		4.05

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.97% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Income Fund

Legal entity identifier: 549300PUP73JHFHWCR12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** _____ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.78 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Global Income Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	55,056.36	65.56	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		7,575.09	65.56	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		466,848.97	65.56	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		529,480.42	65.56	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	8,465.95	65.56	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,087.18	76.84	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.35	78.22	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	63.61	53.50	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	26.04	23.89	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.08	0.10	
	Electricity, Gas, Steam & Air Conditioning Supply	2.37	0.86	
	Manufacturing	0.41	19.79	
Mining & Quarrying	0.70	2.58		
Real Estate Activities	0.44	1.89		
Transportation & Storage	1.44	2.43		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.65	0.53		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.12	2.14	
	7. Activities negatively affecting biodiversity-sensitive areas	3.36	73.89	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	3.64	64.64	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	73.89	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	36.40	73.54	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	21.98	6.16	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.84	68.58	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	80.43	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
3I GROUP PLC	Financials	2.19%	United Kingdom
UNITEDHEALTH GRP	Health Care	1.75%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

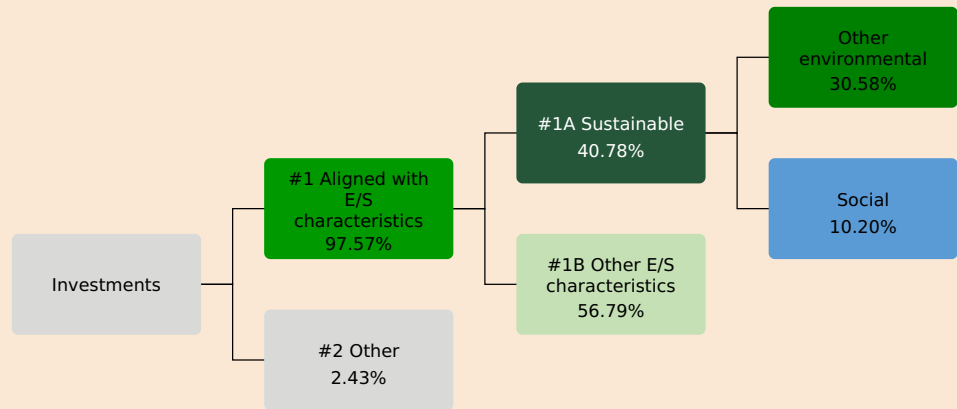

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

97.57% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

2.43% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investments in other funds not subject to the same restrictions.

40.78% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.05
10102040	Oil & Gas Storage & Transportation	0.10
10102050	Coal & Consumable Fuels	0.00
Total		3.40

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

30.58% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

10.20% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

2.43% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Pan European High Income Fund

Legal entity identifier: 549300M8GW9ZCHKQX27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.78 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____%

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Pan European High Income Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction: $\geq 5\%$ of revenue, Thermal Coal Power Generation: $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if $\geq 5\%$ of revenue on each of the following: - Arctic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco production $\geq 5\%$ revenue, Tobacco-related products and services $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational cannabis excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

● **...and compared to previous periods?**

As per the previous year, the Fund was managed with no breaches to the exclusions set out above.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund intended to make sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contributed positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) green, sustainability-linked and social bonds. The Fund could also use a best-in-class approach and select companies that score higher (scores of 1 or 2 on either environmental or social factors can be considered as long as the issuer does not lag on the other pillar), when compared to their peers, on environmental or social factors utilizing the Investment Manager's proprietary scoring methodology. It should be noted that the full weight in the portfolio will count as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of sustainable investments excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	247,637.11	63.89	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		41,397.66	63.89	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,396,490.89	63.89	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,685,525.66	63.89	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	11,727.47	63.89	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,218.65	81.02	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.95	85.96	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	56.33	56.43	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	35.52	27.54	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	1.86	4.55	
	Manufacturing	0.39	18.35	
	Mining & Quarrying	0.84	4.10	
	Real Estate Activities	0.57	1.67	
Transportation & Storage	1.20	2.09		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.63	0.75		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	1.02	
	7. Activities negatively affecting biodiversity-sensitive areas	6.20	79.03	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.74	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	10.21	64.09	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	78.92	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	20.74	78.41	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	24.02	6.43	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.70	71.82	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	88.06	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

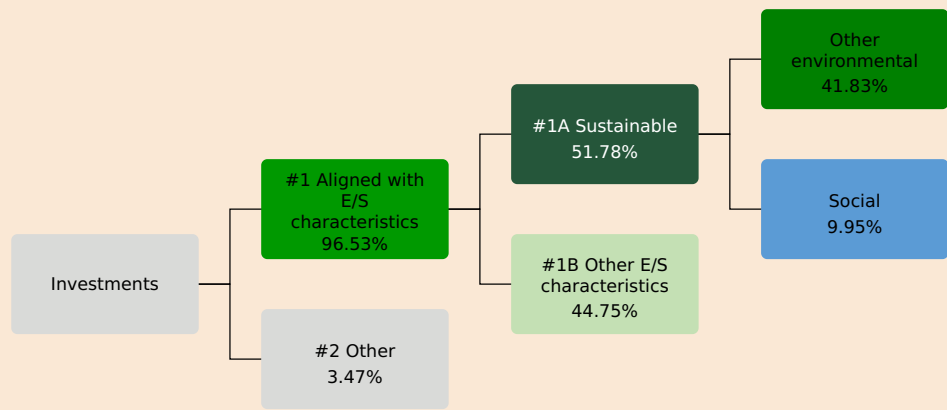

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

● What was the asset allocation?

96.53% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

3.47% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and investment in funds that are not subject to the same restrictions.

51.78% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

41.83% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

9.95% of the fund was invested in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

3.47% of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes. The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, investment teams, with support from the ESG Research Team, monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.36 % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It made **sustainable investments with a social objective:** _____ %

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Sustainable Allocation Fund (the "Fund") aimed to promote environmental characteristics related to climate change mitigation (such as carbon emissions) as well as natural resource utilization and pollution (for example by exclusion of companies involved in fossil fuel, coal, nuclear power or activities generating pollution)

The Fund also promoted social characteristics related to human rights by excluding companies in violation of any UN Global Compact's principles (based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding controversial activities issuers involved in (but not limited to) manufacturing or sale of conventional weapons or production and distribution of tobacco. The Fund aimed to select companies and issuers that display superior sustainable management and sustainable products or processes, fulfilling ecological and social requirements particularly well, ranging from climate efficiency and low water consumption to labour safety and satisfaction. Ecological characteristics were assessed using an energy transition score. Social features were considered by excluding companies with controversial business behaviours.

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

The Fund is managed systematically. In every rebalancing, it is ensured that the Fund meets the environmental and social characteristics.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
Turnover derived from thermal coal mining, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover derived from burning coal for power generation, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Proportion in electricity generation fuel mix from coal, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Structural increase of thermal coal activities over 3 years, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues that comes from projects or the extraction of tar sands and oil shale, as well as the proportion of reserves in tar sands or oil shale, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in fracking activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in arctic drilling activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues are derived from fossil fuel industriess including upstream $\geq 5\%$ (exploration and production), midstream (processing and transport) and power generation from fossil sources, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Structural increase of fossil activities over 3 year, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of restricted chemicals, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of endangering biodiversity, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of preventing and managing accidental pollution or soil pollution, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of community involvement (including e.g., impact of operations on the local economy, responsible tax strategy, trasnfer of technology and skills), excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Proportion in electricity generation fuel mix from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of genetically modified organisms, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sale of civilian firearms or related products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sales that are related to military sales including key parts or services for conventional weapons , excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production of tobacco, excluded	During the reference period, there were no active breaches

if >=5%	of the Fund's exclusion criteria.
Fail to pass the global compact screening, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in Labour Rights including the supply chain, forced or child labour and discrimination, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in Pollution or lack of protection of water resources, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in recreational cannabis, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in corruption, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Animal testing and extensive farming operations (proportion of turnover (expressed as a threshold) that comes from the production of cosmetics tested on animals and/or from intensive farming operations), excluded if >=5%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of genetically modified organisms, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted benchmark's (MSCI World index) Scope 1 and 2 GHG emission intensity	61.2 vs 88.9
% of issuers that are in the Top 75% of universe based on the energy transition score	100%

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted benchmark's (MSCI World index) Scope 1 and 2 GHG emission intensity	62.4 vs 89.7	61.2 vs 88.9
% of issuers that are in the Top 75% of universe based on the energy transition score	100%	100%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) companies which generate a material part of the revenue from environmental impact themes such as energy transition (by selecting companies in the top 25% based on the energy transition score within its region and sector), healthcare (by selecting companies part of the GICS Sector 35) and food (by selecting companies part of the GICS Industry 302020). The Fund also used a best-in-class approach, utilizing the

investment manager's proprietary scoring methodology and selecting companies in the top 75% within the respective peer group for either score eligible. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	2,767.06	72.25	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		623.26	72.25	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		48,132.54	72.25	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		51,522.85	72.25	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	2,718.66	72.25	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,207.05	73.33	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	73.25	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	62.85	57.79	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	18.27	30.05	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.08	1.26	
	Electricity, Gas, Steam & Air Conditioning Supply	0.16	0.24	
	Manufacturing	0.45	29.00	
Mining & Quarrying	1.05	0.44		
Real Estate Activities	0.63	0.47		
Transportation & Storage	1.32	2.57		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.70	0.43		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.06	5.29	
	7. Activities negatively affecting biodiversity-sensitive areas	1.41	73.25	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.87	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	4.71	72.24	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	73.25	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	28.81	73.25	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	13.96	1.37	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.90	72.61	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	74.74	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CANADA-GOV'T	Sovereign	5.25%	Canada

CAN IMPL BK COMM	Financials	0.94%	Canada

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

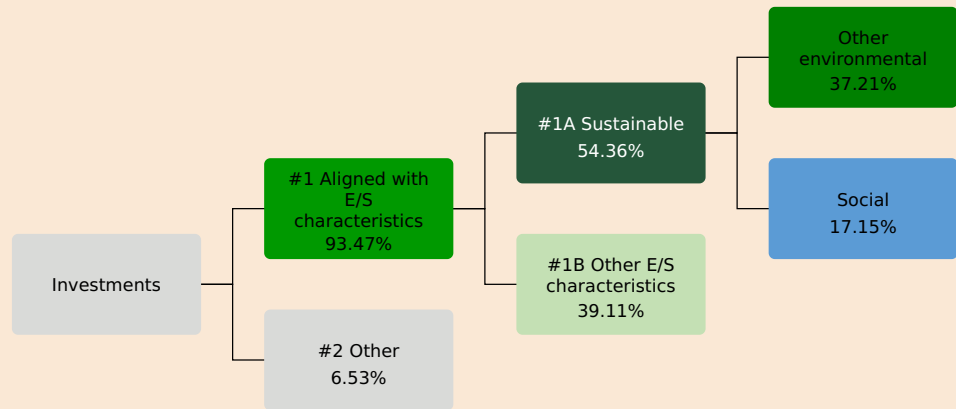

The Fund made investments aligned with its environmental and social characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other).

● What was the asset allocation?

93.47% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

6.53% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

54.36% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.09
10102050	Coal & Consumable Fuels	0.00
Total		0.09

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

37.21% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

17.15% of the fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Sustainable US Structured Equity Fund

Legal entity identifier: 549300DCILTDQFMY8A94

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.30 % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective:** _____ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Sustainable US Structured Equity Fund (the "Fund") aimed to promote environmental characteristics related to climate change mitigation (such as carbon emissions) as well as natural resource utilization and pollution (for example by exclusion of companies involved in fossil fuel, coal, nuclear power or activities generating pollution).

The Fund also promoted social characteristics related to human rights by excluding companies in violation of any UN Global Compact's principles (based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding controversial activities issuers involved in (but not limited to) manufacturing or sale of conventional weapons or production and distribution of tobacco. The Fund aimed to select companies and issuers that display superior sustainable management and sustainable products or processes, fulfilling ecological and social requirements particularly well, ranging from climate efficiency and low water consumption to labour safety and satisfaction. Ecological characteristics were assessed using an energy transition score. Social features were considered by excluding companies with controversial business behaviours.

The Fund achieved its environmental and social characteristics by applying its exclusion and best-in class approach on an on-going basis.

The Fund is managed systematically. In every rebalancing, it is ensured that the Fund meets the environmental and social characteristics.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
Turnover derived from thermal coal mining, excluded if $\geq 5\%$ Turnover derived from burning coal for power generation, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from coal, excluded if $\geq 5\%$ Structural increase of thermal coal activities over 3 years, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues that comes from projects or the extraction of tar sands, excluded if 0% and oil shale, as well as the proportion of reserves in tar sands or oil shale Involvement in fracking activities, excluded if Yes Involvement in arctic drilling activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues are derived from fossil fuel industries, excluded if $\geq 5\%$ Structural increase of fossil activities over 3 year, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Company's commitment to define clear objectives and appropriate measures to ensure management of the environmental impacts of products and services, excluded if insufficient environmental strategy	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of restricted chemicals, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of endangering biodiversity, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of preventing and managing of accidental pollution or soil pollution, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of community involvement (including e.g, impact of operations on the local economy, responsible tax strategy, transfer of technology and skills), excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from nuclear power, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sale of civilian firearms or related products, excluded if $\geq 5\%$ Manufacture of civilian firearms or related products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sales that are related to military sales including key parts or services, for conventional weapons, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons, excluded if $>0\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Fail to pass the global compact screening, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in labour rights including the supply chain, forced or child labour and discrimination, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in pollution or lack of protection of water resources, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in recreational cannabis, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in corruption, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Energy Transition Score	45
% of issuers that are in the Top 75% of universe based	100%

on the energy transition score	
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (S&P 500 Index) GHG Scope 1 and 2 GHG emission intensity	59.8 vs 85.5

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 12-Apr-24
Energy Transition Score	50	45
% of issuers that are in the Top 75% of universe based on the energy transition score	100%	100%
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (S&P 500 Index) GHG Scope 1 and 2 GHG emission intensity	71.5 vs. 105.6	59.8 vs 85.5

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments by contributing to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund sought to achieve those objectives by investing in (i) issuers which contribute positively to selected UN Sustainable Development Goals (SDGs) (generating at least 25% of the issuer's revenue) that relate to the above objectives, or (ii) companies which generate a material part of the revenue from environmental impact themes such as energy transition (by selecting companies in the top 25% based on the energy transition score within its region and sector), healthcare (by selecting companies part of the GICS Sector 35) and food (by selecting companies part of the GICS Industry 302020). The Fund also used a best-in-class approach, utilizing the investment manager's proprietary scoring methodology and selecting companies in the top 75% within the respective peer group for either score eligible. It should be noted that the full weight in the portfolio counted as sustainable investments when meeting the above criteria.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, it could still be held within the Fund but did not count toward the "sustainable investments" within the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company’s performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	606.47	99.56	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		200.80	99.56	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		8,188.95	99.56	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		8,996.22	99.56	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	325.38	99.56	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	607.78	99.56	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.56	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.14	70.91	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	16.94	35.77	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.47	36.26	
	Mining & Quarrying	0.00	0.00	
	Real Estate Activities	0.22	1.11	
Transportation & Storage	1.20	3.42		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.93	1.34		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	8.40	
	7. Activities negatively affecting biodiversity-sensitive areas	1.63	99.56	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.12	91.74	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.56	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	55.88	99.42	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.70	1.41	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.65	99.34	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.56	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Asset Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of March 2024 to the 12th of April 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	4.20%	United States
NVIDIA CORP	Information Technology	2.45%	United States
APPLE INC	Information Technology	2.38%	United States

CISCO SYSTEMS	Information Technology	1.40%	United States

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

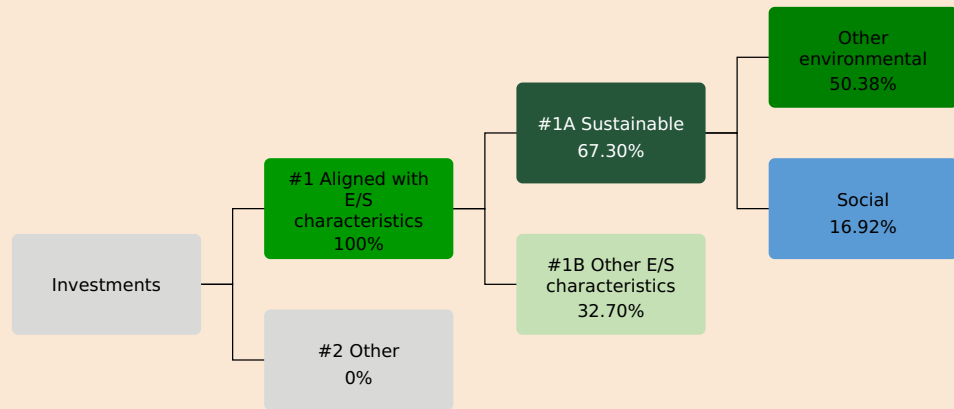

The Fund made investments aligned with the E/S characteristics for a minimum of 90% of its portfolio (#1 Aligned with E/S characteristics) by virtue of binding elements of the Fund's investment strategy. A maximum of 10% was invested in money market instruments or ancillary liquid assets for liquidity management purposes (#2 Other). 10% minimum of the Fund was invested in sustainable investments (#1 Sustainable).

● What was the asset allocation?

100.00% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund was invested in financial derivative instruments for investment and/or hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

67.30% of the Fund was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period

Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

50.38% of the Fund was invested in sustainable investments with an environmental objective not aligned with the EU Taxonomy. The Investment Manager monitored closely the evolution of the dataset and their reliance and increased the portion of sustainable investments aligned with EU Taxonomy as the case may be, which decreased the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

16.92% of the Fund was invested in socially sustainable investments.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes which was not assessed for compliance with the above ESG framework. Due to the neutral nature of the assets, no minimum safeguards were put in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusions and the best-in-class approach, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information.

In addition to the Fund’s sustainability indicators outlined in the answer to the second question of the report, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team supported the investment teams in monitoring the investments against PAI indicators. Research was conducted into certain issuers in the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether a consideration plan should be developed. For flagging companies that were deemed to have not sufficiently addressed their impact relating to a particular PAI, a consideration plan was developed.

How did this financial product perform compared to the reference benchmark?

The Fund was not compared to a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 96.86 %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Invesco Energy Transition Fund (the "Fund") aimed to contribute towards the global transition towards lower-carbon sources of energy. The Fund invested in sustainable investments which contributed to the environmental objective of climate change mitigation within the meaning of EU Taxonomy by investing in companies which contribute to the environmental objectives of usage of renewable energy.

The Fund is managed systematically. In every rebalancing, it is ensured that the Fund meets the sustainable investment objectives.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objectives.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
Turnover derived from thermal coal mining, excluded if $\geq 5\%$ Turnover derived from burning coal for power generation, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from coal, excluded if $\geq 5\%$ Structural increase of thermal coal activities over 3 years, excluded if Yes	During the reference period, there were no breaches of the Fund's exclusion criteria.
Revenues that comes from projects or the extraction of tar sands, excluded if 0% and oil shale, as well as the proportion of reserves in tar sands or oil shale Involvement in fracking activities, excluded if Yes Involvement in arctic drilling activities, excluded if Yes	During the reference period, there were no breaches of the Fund's exclusion criteria.
Revenues are derived from fossil fuel industries, excluded if $\geq 5\%$ Structural increase of fossil activities over 3 year, excluded if Yes	During the reference period, there were no breaches of the Fund's exclusion criteria.
Company's commitment to define clear objectives and appropriate measures to ensure management of the environmental impacts of products and services, excluded if insufficient environmental strategy	During the reference period, there were no breaches of the Fund's exclusion criteria.
Production of restricted chemicals, excluded if 0%	During the reference period, there were no breaches of the Fund's exclusion criteria.
Controversies in the field of endangering biodiversity, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of preventing and managing of accidental pollution or soil pollution, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of protecting water resources , excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of waste management, excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversies in the field of community involvement (including e.g, impact of operations on the local economy, responsible tax strategy, transfer of technology and skills), excluded if yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from nuclear power, excluded if $\geq 5\%$ Proportion in electricity generation fuel mix from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sale of civilian firearms or related products, excluded if $\geq 5\%$ Manufacture of civilian firearms or related products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sales that are related to military sales including key parts or services, for conventional weapons, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons, excluded if $>0\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of alcohol , excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Fail to pass the global compact screening, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Energy Transition Score	50
% of issuers that are in the Top 75% of universe based on the energy transition score	100%

The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (MSCI ACWI) GHG Scope 1 and 2 GHG emission intensity	81.6 vs. 113.1
---	----------------

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
Energy Transition Score	51	50
% of issuers that are in the Top 75% of universe based on the energy transition score	100%	100%
The Fund's Scope 1 and 2 GHG emission intensity vs the market cap weighted (MSCI ACWI) GHG Scope 1 and 2 GHG emission intensity	75.3 vs. 110.2	81.6 vs. 113.1

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, such company was excluded from investment in the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,014.07	96.93	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		571.39	96.93	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		30,776.15	96.93	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		32,361.61	96.93	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	646.82	72.91	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,160.33	96.93	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	97.28	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.54	74.66	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	9.26	44.53	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	2.47	2.00	
	Construction	0.12	1.69	
	Electricity, Gas, Steam & Air Conditioning Supply	1.10	9.64	
	Manufacturing	0.58	42.74	
Mining & Quarrying	1.05	0.21		
Real Estate Activities	0.30	12.70		
Transportation & Storage	0.55	1.86		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.24	1.24		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	4.58	
	7. Activities negatively affecting biodiversity-sensitive areas	0.93	97.28	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.04	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.30	73.10	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.28	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.75	97.28	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	11.69	1.74	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	33.84	96.47	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.28	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

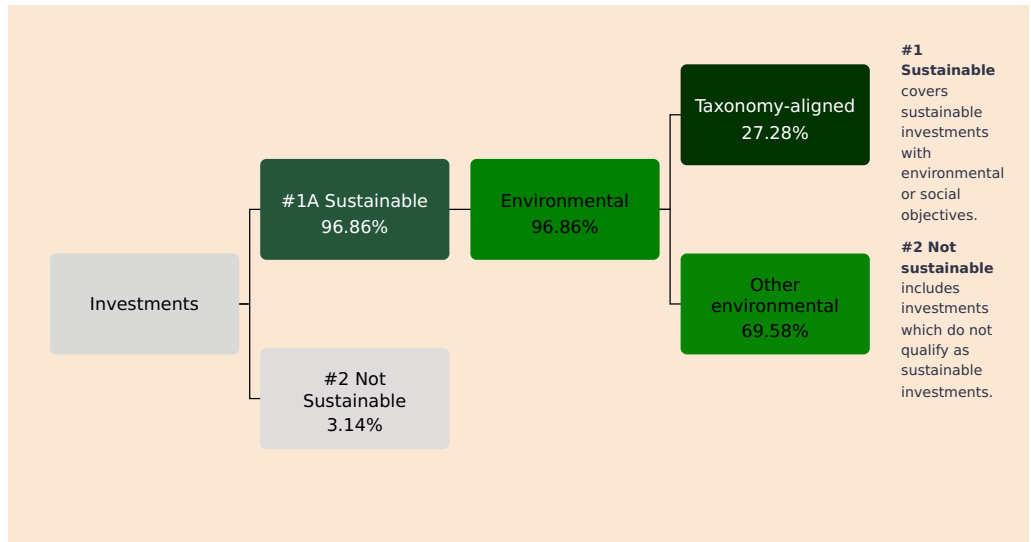

The Fund invested in sustainable investments for at least 90% of its portfolio (#1 Sustainable) contributing to environmental objectives by virtue of binding elements of the Fund's investment strategy. At least 25% of total investments was aligned with the EU Taxonomy.

● What was the asset allocation?

100% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the sustainable investment objective of the Fund.

0% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

96.86% of the Fund was invested in sustainable investments.

● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

27.28% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The data is representative of the reference period.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	12.41%
Transition	0.81%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

69.58% was the share of the sustainable investments with an environmental objective that were not aligned with the EU Taxonomy. The Investment Manager monitored closely the evolution of the dataset and their reliance and The Investment Manager monitors closely the evolution of the dataset and intends to increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The investments included under “Not sustainable” were only ancillary liquid assets as well as investment in some money markets instruments and money market funds for cash/liquidity management purposes. The Investment Manager applied the minimum environmental and social safeguards as follows:

- Where the Fund held ancillary liquid assets at the depositary of the SICAV, we confirmed that such entity was not involved in any severe controversial activities.
- Where the Fund held money market instruments, the counterparty to such instruments was not involved in any severe controversial activities.
- Finally, where the Fund invested in money market funds, they complied with article 8 and minimum safeguards were therefore met.

What actions have been taken to attain the sustainable investment objective during the reference period?

Please refer to the section “How did the sustainability indicators perform” above for further information.

How did this financial product perform compared to the reference sustainable benchmark?

The Fund was not compared to a reference sustainable benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

● **How did the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Product name: Invesco Net Zero Global Investment Grade Corporate Bond Fund Legal entity identifier: 549300BPIT4H69PZW547

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 90.27 %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective**: %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Invesco Net Zero Global Investment Grade Corporate Bond Fund (the "Fund") aimed to contribute to the goal of achieving global net zero greenhouse gas emissions by 2050 or sooner. The Fund seeks to achieve its sustainable objective by investing primarily in investment grade corporate debt securities from global companies which, in the view of the Investment Manager, were in line with the requirements of a Net Zero investment strategy and meet the Fund's environmental, social and governance (ESG) criteria (as further defined below). The Fund invested in sustainable investments which contribute to the environmental objective of climate change mitigation within the meaning of EU Taxonomy.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objectives.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This included:

Sustainability Indicator	Indicator Performance
UN Global Compact Compliance principles, excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Power Generation, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from: 1) Arctic oil & gas exploration extraction, 2) Oil sands extraction, 3) Shale energy extraction, excluded if $> 5\%$ of revenue on each component	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from illegal & controversial weapons (anti-personnel mines, cluster munition, depleted uranium, biological / chemical weapons etc.), excluded if $> 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons related products and services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Civilian customers (Assault Weapons) , excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Military / Law Enforcement, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Key Components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Retail / Distribution, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT), excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco products production, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products Related Products / Services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling operations, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling specialised equipment, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Gambling supporting products and services, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Production, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Adult Entertainment Distribution, excluded if excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in the recreational cannabis industry, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

% of the shares of the portfolio not aligned to the Net Zero framework as of 28 February 2025	0.00%
% of the shares of the portfolio committed to aligning to the Net Zero framework as of 28 February 2025	27.18%
% of the shares of the portfolio aligning to a Net Zero Pathway as of 28 February 2025	45.08%
% of the shares of the portfolio aligned to a Net Zero Pathway as of 28 February 2025	22.98%
% of the shares of the portfolio achieving Net Zero as of 28 February 2025	0%
Weighted revenues to climate solutions in the Fund as of 28 February 2025	6.58%
Temperature alignment of the portfolio vs the global corporate bond market as of 28 February 2025	2.38 vs. 3.00
Portfolio emissions intensity (scope 1 and 2) vs the global corporate bond market as of 28 February 2025	72.25 vs. 250.25

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
% of the shares of the portfolio not aligned to the Net Zero framework	0.00%	0.00%
% of the shares of the portfolio committed to aligning to the Net Zero framework	37.62%	27.18%
% of the shares of the portfolio aligning to a Net Zero Pathway	37.47%	45.08%
% of the shares of the portfolio aligned to a Net Zero Pathway	22.21%	22.98%
% of the shares of the portfolio achieving Net Zero	0.00%	0.00%
Weighted revenues to climate solutions in the Fund	3.93%	6.58%
Temperature alignment of the portfolio vs the global corporate bond market	3.20 vs. 3.27	2.38 vs. 3.00
Portfolio emissions intensity (scope 1 and 2) vs the global corporate bond market	81.38 vs. 194.98	72.25 vs. 250.25

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, such company was excluded from investment in the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI scores for the Fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	527.59	72.60	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		52.06	72.60	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		3,480.90	72.60	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		4,060.55	72.60	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	280.07	54.50	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,038.57	93.75	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	93.76	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	58.23	76.32	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	24.26	35.71	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.07	5.72	
	Manufacturing	0.33	18.33	
Mining & Quarrying	0.93	4.18		
Real Estate Activities	0.11	1.38		
Transportation & Storage	1.50	1.65		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.08	1.59	
	7. Activities negatively affecting biodiversity-sensitive areas	7.78	91.42	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.94	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.33	54.81	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	91.42	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	27.18	90.75	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	20.00	7.10	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.03	86.19	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	93.44	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund makes no minimum commitment regarding investments in sustainable investments with an environmental objective aligned with EU Taxonomy, 5.43% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The data is representative of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

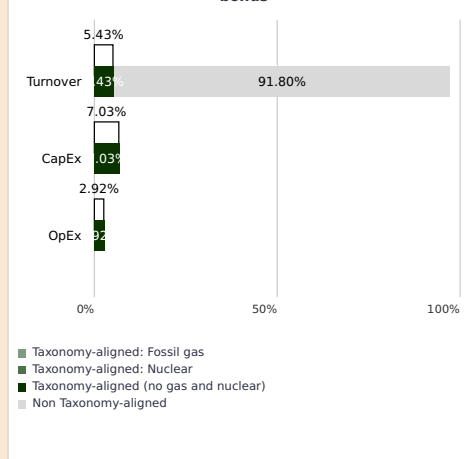

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds^{*}, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	0.98%
Transition	0.03%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

84.84%. The Investment Manager monitored closely the evolution of the dataset and their reliance and made sustainable investments aligned with EU Taxonomy as the case may have been. It is expected that the investee companies in the Fund would report a degree of alignment with the EU Taxonomy over time while those companies executed and progress on their decarbonization plans.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

9.73% of the Fund’s asset allocation were included under "Not Sustainable".

The investments included under “Not sustainable” were only ancillary liquid assets as well as investment in some money markets instruments, money market funds, and debt issued by governments or local authorities used to manage Fund duration and liquidity at the overall Fund level.

The Investment Manager applied the minimum environmental and social safeguards as follows:

-Where the Fund held ancillary liquid assets at the depositary of the SICAV, we confirmed that such entity was not involved in any severe controversial activities.

- Where the Fund held money market instruments, the counterparty to such instruments was not involved in any severe controversial activities.

- Where the Fund held debt issued by governments or local authorities to manage the liquidity or duration of the Fund, the issuers were not subject to international sanctions. At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows designed to ensure compliance with such sanctions. The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market)

- Finally, where the Fund invested in money market funds, they complied with article 8 and minimum safeguards were therefore met.

The Fund could use derivatives for hedging which were not assessed against the sustainable investment objective of the Fund, however the counterparty to such derivatives were not involved in any severe controversies.

What actions have been taken to attain the sustainable investment objective during the reference period?

Please refer to the section “How did the sustainability indicators perform” above for further information.

We may assess and track the net zero alignment of issuers in the fund using quantitative analysis and qualitative assessments, the latter of which may be informed by issuer engagement. The quantitative review incorporates metrics from multiple data vendors and organizations. A qualitative review may be performed to further assess criteria within the framework, such as targets, decarbonization strategy, and capital allocation. In addition, we may also engage with companies to better understand the forward-looking direction of the company. Overall, we employ due diligence and ongoing review of the issuers we deemed eligible for our fund which helps us evaluate how issuers advance along the net zero transition pathway.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

● **How did the reference benchmark differ from a broad market index?**

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable.

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: _____ %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective**: 96.88 %

- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Invesco Social Progress Fund (the "Fund") aimed to invest in economic activities that contribute to social objectives by investing primarily in equity and equity related securities of companies worldwide which contribute positively to selected United Nations Sustainable Development Goals (SDGs) that relate to social issues. The Fund provided investors with exposure to companies that are characterized by strong social characteristics and the goal to strive for positive impact.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used a variety of indicators to attain the sustainable objective of the Fund.

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

This included:

Sustainability Indicator	Indicator Performance
Turnover derived from thermal coal mining, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover derived from burning coal for power generation, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Proportion in electricity generation fuel mix from coal, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Structural increase of thermal coal activities over 3 years, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues that comes from projects or the extraction of tar sands and oil shale, as well as the proportion of reserves in tar sands or oil shale, excluded if 0%	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in fracking activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in arctic drilling activities, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues are derived from fossil fuel industries, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Structural increase of fossil activities over 3 year, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Proportion in electricity generation fuel mix from nuclear power, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of genetically modified organisms, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Research on human embryonic stem cells or on human foetal stem cells, excluded if Yes	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Manufacture or sale of civilian firearms or related products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Sales that are related to military sales including key parts or services for conventional weapons , excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial Weapons: cluster munitions, depleted uranium, and anti-personnel, excluded if $> 0\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of alcohol , excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from production and distribution of tobacco, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from gambling operations and products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Turnover from pornography and adult entertainment services or facilitating access, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
High interest rate lending, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Production of cosmetic products tested on animals, excluded if $\geq 5\%$ Production of non-cosmetic products tested on animals, excluded if $\geq 5\%$ Production or sale of fur products, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Involvement in recreational cannabis, excluded if $\geq 5\%$	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Social Score	45
% of issuers that are in the Top 75% of the universe based on the Social score	100%
% of revenues derived from the provision of Social	49.9% vs. 9.6%

Goods and Services in the portfolio vs. % of revenues derived from the provision of Social Goods and Services in the benchmark (MSCI World)

● **...and compared to previous periods?**

With regards to the exclusions disclosed in the table above, there were no active breaches noted during the previous reference period (from March 2023 to February 2024). For the other sustainability indicators used, please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
Social Score	45	45
% of issuers that are in the Top 75% of the universe based on the Social score	100%	100%
% of revenues derived from the provision of Social Goods and Services in the portfolio vs. % of revenues derived from the provision of Social Goods and Services in the benchmark (MSCI World)	49.7% vs. 9.8%	49.9% vs. 9.6%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, such company was excluded from investment in the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI scores for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	289.26	96.80	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		93.18	96.80	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,783.83	96.80	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		5,166.27	96.80	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	304.13	72.63	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	923.21	96.80	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	96.86	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.52	74.43	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	25.07	39.75	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.07	1.38	
	Electricity, Gas, Steam & Air Conditioning Supply	0.58	2.62	
	Manufacturing	0.25	40.23	
	Mining & Quarrying	0.69	0.11	
	Real Estate Activities	0.21	1.62	
Transportation & Storage	0.37	0.80		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.61	4.63		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.08	4.20	
	7. Activities negatively affecting biodiversity-sensitive areas	5.38	96.86	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.15	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.30	72.04	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.86	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	44.15	96.84	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	16.37	2.09	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.36	96.30	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.86	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
JOHNSON&JOHNSON	Health Care	4.06%	United States
MERCK & CO	Health Care	3.37%	United States
ELI LILLY & CO	Health Care	2.72%	United States
AMGEN INC	Health Care	1.85%	United States
WASTE MANAGEMENT	Industrials	1.81%	United States
MICROSOFT CORP	Information Technology	1.76%	United States
ABBOTT LABS	Health Care	1.73%	United States
INTUITIVE SURGIC	Health Care	1.56%	United States
STRYKER CORP	Health Care	1.39%	United States

MEDTRONIC PLC	Health Care	1.15%	Ireland
REPUBLIC SVCS	Industrials	1.15%	United States
GILEAD SCIENCES	Health Care	1.14%	United States
WALMART INC	Consumer Staples	1.11%	United States
BRISTOL-MYER SQB	Health Care	1.08%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

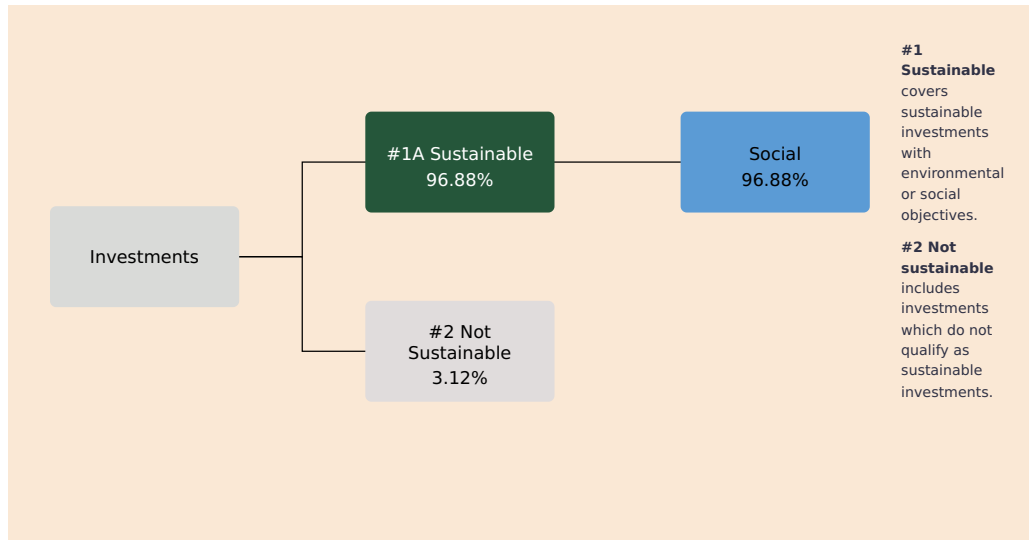

The Fund invested in sustainable investments for at least 97.03% of its portfolio (#1 Sustainable) contributing to social objective by virtue of binding elements of the Fund's investment strategy.

● What was the asset allocation?

96.91% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the sustainable investment objective of the Fund.

3.09% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

96.88% of the Fund's NAV was invested in sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	21.82
Communication Services	3.63
Consumer Discretionary	4.63

10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy. The Fund's portfolio was not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy remained stable compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

96.88% of the Fund was invested in socially sustainable investments. The minimum share of sustainable investments with a social objective pursued for this Fund was 90%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The investments included under “Not sustainable” were only ancillary liquid assets as well as investment in some money markets instruments and money market funds for cash management/liquidity purposes. The Investment Manager applied the minimum environmental and social safeguards as follows:

- Where the Fund held ancillary liquid assets at the depositary of the SICAV, we confirmed that such entity was not involved in any severe controversial activities.
- Where the Fund held money market instruments, the counterparty to such instruments was not involved in any severe controversial activities.
- Finally, where the Fund invested in money market funds, they complied with article 8 and minimum safeguards were therefore met.

The Fund could use derivatives for hedging which were not assessed against the sustainable investment objective of the Fund, however the counterparty to such derivatives were not involved in any severe controversies.

What actions have been taken to attain the sustainable investment objective during the reference period?

Please refer to the section “How did the sustainability indicators perform” above for further information.

How did this financial product perform compared to the reference sustainable benchmark?

The Fund was not compared to a reference sustainable benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

● **How did the reference benchmark differ from a broad market index?**

Not applicable.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable.

● **How did this financial product perform compared with the reference benchmark?**

Not applicable.

● **How did this financial product perform compared with the broad market index?**

Not applicable.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 96.55 %
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

- It made **sustainable investments with a social objective**: %

- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Invesco Sustainable Global Income Fund (the "Fund") aimed to support the transition to a low carbon economy over the medium to long term with a view to achieving the long term goals of the Paris Agreement. The Fund sought to achieve its sustainable objective by investing primarily in corporate and government bonds as well as equity of companies globally, where companies demonstrate stronger climate characteristics compared to their sector peers. The Fund invested in sustainable investments which contribute to the environmental objective of climate change mitigation within the meaning of EU Taxonomy.

In order to demonstrate alignment with the long-term goals of the Paris Agreement, the Fund reported its carbon emissions intensity against the carbon emissions intensity of the composite equivalent Carbon Transition Benchmarks of the above indices i.e. 50% MSCI World ESG Climate Transition (EU CTB) Select Index (USD), (35%) ICE Global Corporate Climate Transition Index and (15%) ICE Global High Yield Climate Transition Index.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

● How did the sustainability indicators perform?

The Fund used various sustainability indicators as described below:

The reference period for data reported in this document is from the 1st of March 2024 to the 28th of February 2025. The data is representative of the reference period unless specified otherwise.

Sustainability Indicator	Indicator Performance
Overall Global Compact Compliance, excluded if assessed as being Not Compliant with any principle	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Extraction, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Thermal Coal Power Generation, excluded if $\geq 10\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues, production capacity or actual production from: 1) Arctic oil & gas exploration extraction, 2) Oil sands extraction, 3) Shale energy extraction, excluded if $> 5\%$ of revenue from any sub-category	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Oil & gas exploration, production, refining transportation and/or storage, excluded if $\geq 25\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenue from illegal & controversial weapons (anti-personnel mines, cluster munition, depleted uranium, biological / chemical weapons etc.), excluded if $> 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Military Contracting Weapons related products and services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Military / Law Enforcement, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco products production, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco Products Related Products / Services excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Revenues from the production of or sales of recreational cannabis products, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Civilian customers (Assault Weapons) , excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Retail / Distribution, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Small Arms Key Components, excluded if $\geq 5\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the Non-Proliferation Treaty (NPT), excluded if $\geq 0\%$ of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
The Fund's climate change score vs. overall climate comparator score	Fund score 2.17 vs Climate Comparator score 2.55
% of Non-scored issuers, qualitative comment from investment team	13.84% - When companies are not covered by the climate comparator, the investment team conducts quantitative and qualitative analysis to determine if these companies meet their definition of sustainable. The majority of unscored issuers are in areas essential to the transition such as low carbon electricity generation or distribution or in quasi government/inter government institutions.
The Fund's carbon emission intensity vs. the carbon emissions intensity of the composite equivalent Carbon Transition Benchmarks of the above indices i.e. 50% MSCI World ESG Climate Transition (EU CTB) Select Index (USD), (35%) ICE Global Corporate Climate Transition Index and (15%) ICE Global High Yield Climate Transition Index	980.92 vs 1101.43 (-13%)

● **...and compared to previous periods?**

The Fund performed broadly in line with previous quarters, with a slight increase in the percentage of unscored names due to increased unscored high-yield exposure. These issuers all have strong climate characteristics. Please refer to the table below for a comparison with the previous period.

Sustainability Indicator	Indicator Performance 29-Feb-24	Indicator Performance 28-Feb-25
The Fund's climate change score vs. overall climate comparator score	Fund score 1.68 vs Climate Comparator score 2.40	Fund score 2.17 vs Climate Comparator score 2.55
% of Non-scored issuers, qualitative comment from investment team	16.60% - When companies are not covered by the climate comparator, the investment team conducts quantitative and qualitative analysis to determine if these companies meet their definition of sustainable. The majority of unscored issuers are in areas essential to the transition such as low carbon electricity generation or distribution or in quasi government/inter government institutions	13.84% - When companies are not covered by the climate comparator, the investment team conducts quantitative and qualitative analysis to determine if these companies meet their definition of sustainable. The majority of unscored issuers are in areas essential to the transition such as low carbon electricity generation or distribution or in quasi government/inter government institutions.
The Fund's carbon emission intensity vs. the carbon emissions intensity of the composite equivalent Carbon Transition Benchmarks of the above indices i.e. 50% MSCI World ESG Climate Transition (EU CTB) Select Index (USD), (35%) ICE Global Corporate Climate Transition Index and (15%) ICE Global High Yield Climate Transition Index	656 vs 1023.08 (-35%)	980.92 vs 1101.43 (-13%)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Fund primarily used the mandatory principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088, combined with qualitative research and/or engagement, to assess whether the sustainable investments of the Fund cause significant harm (DNSH) to a relevant environmental or social investment objective. Where a company was determined to cause such significant harm, such company was excluded from investment in the Fund. For the avoidance of doubt, the assessment was done prior to investment and on the full holding.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded companies, sectors or countries from the investment universe when such companies violate international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they did not meet, UN Global Compact principles, based on third-party data and the Investment Manager's proprietary analysis and research.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of current Invesco holdings

and the relevant PAI data. An absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, research was done to consider the company's performance on the flagged PAIs. Based on the research findings, a plan was proposed for each flagged issuer by the ESG Research team to the investment team. The investment team reviewed the consideration plan and determined the correct steps to take forward. Most consideration plans indicated monitoring or bilateral engagement. In some limited circumstances, actions taken may have also included industry body engagement, underweighting or divestment (exiting the security).

The below table shows the PAI data for the Fund:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,185.79	81.44	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		587.56	81.44	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		46,071.31	81.44	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		47,844.67	81.44	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	47,908.16	81.44	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	990.03	94.36	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	93.91	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	53.95	69.35	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	11.14	28.96	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	0.37	
	Electricity, Gas, Steam & Air Conditioning Supply	0.39	4.43	
	Manufacturing	0.24	26.29	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.33	2.57		
Transportation & Storage	0.98	2.56		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.79	0.77		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	6.84	
	7. Activities negatively affecting biodiversity-sensitive areas	1.23	91.05	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	14.20	80.76	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	91.05	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	42.91	90.83	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.50	7.45	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.14	84.73	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	93.60	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Notes:

Although Scope 3 emissions are included in the above table showing the PAI scores for the Fund, they were not included in the quantitative review process to consider PAIs during the reporting period.

The data presented in the above table is calculated using information provided by a third-party data vendor. The accuracy, completeness, and relevance of the calculated data are contingent upon the accuracy and completeness of the data provided by this third-party vendor. The numbers reported represent our best effort to provide the most accurate calculations in light of the data available. However, there are no warranties or representations, express or implied, regarding the completeness, accuracy, or suitability of this data for any particular purpose.

Invesco Management S.A. does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of March 2024 to 28th of February 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	2.66%	United States
3I GROUP PLC	Financials	1.65%	United Kingdom
APPLE INC	Information Technology	1.49%	United States
RELX PLC	Industrials	1.39%	United Kingdom
MASTERCARD INC-A	Financials	1.27%	United States
THERMO FISHER	Health Care	1.26%	United States
AMERICAN EXPRESS	Financials	1.26%	United States
ACCENTURE PLC-A	Information Technology	1.22%	Ireland
O'REILLY AUTOMOT	Consumer Discretionary	1.14%	United States
UNION PAC CORP	Industrials	1.12%	United States
COPART INC	Industrials	1.08%	United States
ZURICH INSURANCE	Financials	1.06%	Switzerland
CP CN COM	Industrials	1.06%	Canada
UNITEDHEALTH GRP	Health Care	1.05%	United States
LINDE PLC EO	Materials	1.05%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

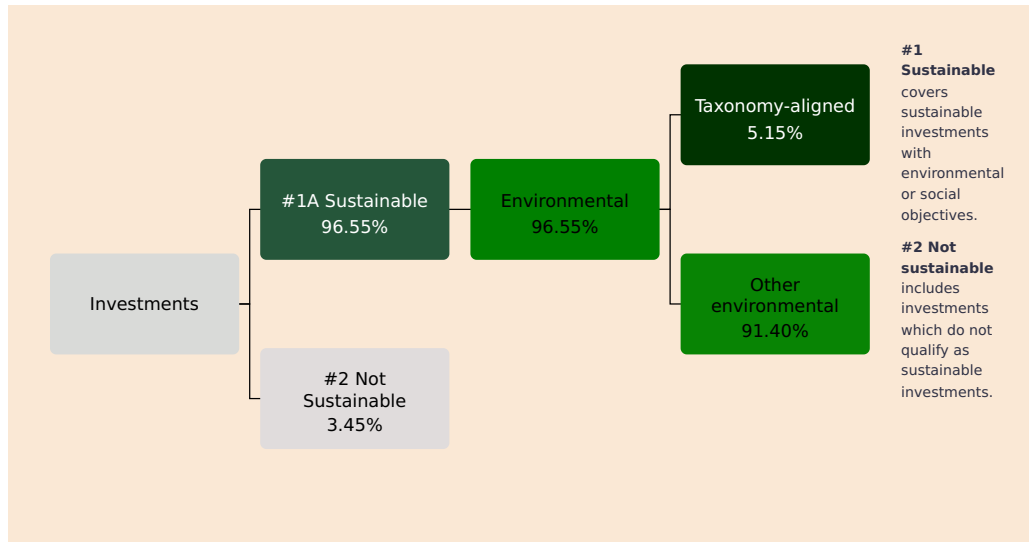

The Fund invested a 90% minimum in sustainable investments (#1 Sustainable) that have an environmental objective not aligned with the EU Taxonomy by virtue of binding elements of the Fund's investment strategy.

● What was the asset allocation?

97.62% of the Fund was selected according to the binding elements of the investment strategy, on the basis that they aligned with the sustainable investment objective of the Fund.

2.38% of the Fund was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, cash that was held for ancillary liquidity purposes, and investments in other funds that were not subject to the same restrictions.

96.55% of the Fund was invested in sustainable investments.

● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	26.42
Communication Services	5.77
Consumer Discretionary	12.94
Information Technology	11.69
Industrials	16.58
Consumer Staples	4.30
Energy	0.00
Real Estate	2.88
Health Care	5.45
Materials	4.08
Utilities	6.84
Sovereign	0.67
Others/Derivatives	2.38
Total	100.00

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		0.00

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

While the Fund makes no minimum commitment regarding investments in sustainable investments with an environmental objective aligned with EU Taxonomy, 5.15% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The data is representative of the reference period.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities, the data is representative of the reference period.

	Aligned
Enabling	1.17%
Transition	0.03%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

91.40% of the Fund was invested in sustainable investments according to the sustainable investment objective of the Fund. The Investment Manager monitors closely the evolution of the dataset and their reliance and may increase the portion of sustainable investments aligned with EU Taxonomy as the case may be, which will decrease the exposure to sustainable investments not aligned with EU Taxonomy in the Fund.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

3.45% of the Fund’s asset allocation were included under "Not Sustainable".

The investments included under “Not sustainable” were only ancillary liquid assets as well as investment in some money markets instruments, money market funds, and debt issued by governments or local authorities used to manage Fund duration and liquidity at the overall Fund level.

The Investment Manager applied the minimum environmental and social safeguards as follows:

-Where the Fund held ancillary liquid assets at the depositary of the SICAV, we confirmed that such entity was not involved in any severe controversial activities.

- Where the Fund held money market instruments, the counterparty to such instruments was not involved in any severe controversial activities.

- Where the Fund held debt issued by governments or local authorities to manage the liquidity or duration of the Fund, the issuers were not subject to international sanctions. At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows designed to ensure compliance with such sanctions. The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market.

- Finally, where the Fund invested in money market funds, they complied with article 8 and minimum safeguards were therefore met.

The Fund could use derivatives for hedging which were not assessed against the sustainable investment objective of the Fund, however the counterparty to such derivatives were not involved in any severe controversies.

What actions have been taken to attain the sustainable investment objective during the reference period?

Please refer to the section “How did the sustainability indicators perform” above for further information.

How did this financial product perform compared to the reference sustainable benchmark?

The Fund was not compared to a reference benchmark.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.
