What is this product?

Type | Undertaking for Collective Investment in Transferable Securities - Société d'Investissement à Capital Variable (SICAV), incorporated in France.

Term | The life of the product is 99 years. This term may be extended or the Fund can be dissolved early on the initiative of its Board of Directors. The terms and conditions for extension or dissolution are described in more detail in the articles of association of the SICAV.

Objectives | Echiquier Agenor SRI Mid Cap Europe is a stock-picking fund. It invests in European growth small and mid-caps, selected in particular for the quality of their management. The management objective of the UCITS is combined with an extra-financial approach incorporating environmental, social, and governance (ESG) criteria, such as the issuer's environmental policy, employee protection or the competence of the management team.

The MSCI Europe Mid Cap NR index is a representative benchmark of the management of Echiquier Agenor SRI Mid Cap Europe. This index, used for information purposes only, represents the trend of all euro-denominated equities of European mid-cap companies. It is calculated in euros, with dividends reinvested. Investors are advised that the portfolio's composition may differ from that of the benchmark index.

The UCITS implements active and discretionary management based on a rigorous stock-picking process through an in-depth evaluation of the companies included in the portfolio. Echiquier Agenor SRI Mid Cap Europe has a 60% minimum exposure to European equities and a maximum exposure of up to 25% to non-European equities. The UCITS is primarily exposed to European small and mid-cap stocks, i.e., those with a market capitalisation of less than 10 billion euros. In order for the UCITS to be eligible for PEAs, 75% of its assets are invested in PEA-eligible financial instruments. Securities are chosen in two stages:

1. First step: Analysis of the investment universe

The investment universe consists of the securities making up the Stoxx Europe Total Market net dividends reinvested (in euro) having a market capitalisation of between €0 and €17 billion.

It is analysed using socially responsible investment (SRI) criteria, in order to identify the companies with the best practices in terms of sustainable development. This analysis is based on a proprietary tool of the LBP AM group for the extra-financial rating of issuers: GrEAT, and on the other hand on the application of exclusions.

The analysis of the investment universe presented above allows for the elimination from the universe of 25% of the worst-rated issuers and/or the issuers on the exclusion lists applicable to the portfolio. This enables the pivot GrEAT score to be defined. This pivot GrEAT score is the score of the last issuer excluded from the universe after the above-mentioned adjustments. The portfolio can then invest in any issuer having a GrEAT score higher than the pivot GrEAT score of the portfolio.

2. Second step: Selection of securities according to their financial and extra-financial characteristics

Following this first step, the manager carries out a fundamental analysis of each issuer based on the following criteria:

- Analysis of the company's management

- Quality of its financial structure
- Visibility on future earnings
- Analysis of the financial results
- The growth prospects for its business
- The speculative nature of the share

The UCITS reserves the right to invest a maximum of 25% in fixed-income products. At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Échiquier and using the ratings produced by agencies. Eligible securities are deemed investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Financial derivative instruments, both traded on regulated markets or over the counter, can be used on an exceptional basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The UCITS does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

Allocation of distributable amounts | Accumulation

Subscription/redemption procedures | Subscription and redemption orders are centralised daily at 12:00 p.m. and executed at the net asset value calculated on the basis of the day's closing market prices. The net asset value is calculated daily with the exception of French public holidays and/or days on which the French markets are closed (official calendar of Euronext Paris S.A.) Investors with access to the IZNES shared electronic registration system may send their subscription and redemption orders to IZNES.

Targeted retail investors | This product is intended in particular for retail investors who (i) have basic knowledge and limited or no experience of investing in UCIs, (ii) want an investment consistent with the investment objective and the recommended holding period of the product, and (iii) are prepared to assume a medium level of risk on their initial capital. The conditions concerning accessibility of the product to US Persons are defined in the prospectus.

Depositary | BNP Paribas SA

Where and how to obtain information on the product | The prospectus, the annual reports and the most recent interim documents, as well as any other practical information, and in particular where to find the most recent price of the units are available on our website www.lfde.com or upon simple written request, free of charge, at: La Financière de l'Échiquier 53 avenue d'Iéna, 75116 Paris, France.

Where applicable, prospectuses are also available in English and KIDs in local languages depending on the country of sale.

What are the risks and what could I get in return?

Risk indicator

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to other products. It indicates the likelihood that the product will incur losses in the event of market movements or if we are unable to pay you.

We have classified this product in risk class 4 out of 7, which is a medium risk class. In other words, the potential losses related to the product's future results are at a medium level and, if the situation deteriorates on the markets, it is possible that the ability to pay you will be affected.

Performance scenarios I

The figures shown include all costs of the product itself as well as the fees due to your advisor or distributor.

The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product (and the benchmark where applicable) over the past 10 years.

What happens if La Financière de l'Échiquier is unable to pay out?

The product is incorporated as a separate entity to the Management Company. In the event of failure of the Management Company, the assets of the product held by the depositary will not be affected.

In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. They depend on the amount you invest, the time you hold the product, and the product's return.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%);
- that for other holding periods, the product changes as indicated in the moderate scenario;
- that EUR 10,000 is invested in the first year.

The synthetic risk indicator is based on the assumption that you hold the shares for the whole recommended investment period of five years.

The other materially relevant risks not taken into account in the calculation of the product's SRI are as follows:

- Liquidity risk
- Credit risk

For more details regarding risks, please refer to the prospectus.

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	€580	€2,038
Impact of annual costs (*)	5.88%	3.50% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 7.19% before costs and 3.69% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.
