Informe del Consejo de Administración

2023 fue un año aleccionador para los estrategas, pero espectacular para los inversores, pues todas las clases de activos principales obtuvieron rentabilidades positivas debido a que los temores a la inflación, la recesión y el impacto de los tipos de interés más altos no lograron hacer mella en los mercados mundiales. Los bancos centrales continuaron endureciendo su política en 2023, con la Reserva Federal estadounidense a la cabeza, que tras subir los tipos siete veces hasta un total del 4,25% en 2022, siguió apretando con cuatro subidas más entre enero y julio. Esto situó el límite superior del tipo de los fondos federales en el 5,5%, su nivel más alto desde 2000.

Los mercados bursátiles mundiales subieron con fuerza en 2023, desafiando las expectativas bajistas ante la contracción de las condiciones económicas, pues los bancos centrales de todo el mundo siguieron subiendo los tipos de interés para combatir la inflación. El índice MSCI AC World cerró el año con una subida del 22,2% en dólares estadounidenses.

El rápido aumento de los tipos de interés tuvo sus efectos: con pocas semanas de diferencia, entre marzo y abril, asistimos a tres de las cuatro mayores quiebras bancarias de la historia de EE. UU. y el banco suizo Credit Suisse se vio obligado a fusionarse con su archirrival UBS. A pesar de esta inestabilidad y de los beneficios corporativos planos en el índice durante todo el año, los mercados de renta variable subieron como resultado del optimismo de los inversores y de la expansión de los múltiplos.

Normalmente se supondría que unas condiciones monetarias tan restrictivas penalizarían a los valores de crecimiento (*growth*), que suelen tener una mayor duración o a obtener una mayor proporción de sus beneficios en el futuro; sin embargo, los estilos de gestión de crecimiento (*growth*) superaron a los de valor (*value*) durante el año, como demuestra la rentabilidad del 33,2% obtenida por el índice MSCI AC World Growth, frente al aumento del 11,8% del índice MSCI AC World Value en el año.

El factor que más influyó en la rentabilidad del año fue el mejor comportamiento del grupo de las empresas estadounidenses de megacapitalización denominadas los «siete magníficos»: Apple, Alphabet (Google), Microsoft, Amazon.com, Meta Platforms (Facebook), Tesla y Nvidia. El índice Bloomberg Magnificent 7 obtuvo una rentabilidad superior al 107% en 2023, frente a apenas el 15,4% del S&P 500 sin los siete magníficos.

Para expertos en selección de valores activos, esta concentración de la rentabilidad en los mayores componentes del índice dio lugar a un entorno difícil para añadir valor, puesto que fueron muy pocas las empresas que superaron al reducido número de grandes ganadores del año. Resultó alentador que la rentabilidad superior de los siete magníficos se redujera en el *rally* de fin de año que tuvo lugar durante los dos últimos meses, después de que la Reserva Federal de EE. UU. anunciase que esperaba rebajar los tipos de interés en 2024, una medida que podría pronosticar un entorno más sólido para la gestión activa en el próximo año.

El ganador inesperado de 2023 fue el comportamiento del mercado japonés: el índice de referencia Topix (rentabilidad neta) terminó el año con una subida del 27,8% en moneda local, impulsado por las noticias positivas sobre inflación, consumo y una relajación de las políticas de control de la curva de tipos por parte del Banco de Japón. El índice Eurostoxx 50 también generó excelentes rentabilidades, ligeramente superiores al 22% expresadas en divisa local, durante el año, aunque quedó por detrás de sus equivalentes estadounidense y mundial, dada su menor concentración en el sector tecnológico y su exposición a la mayor debilidad de China por el sector del lujo. En contraste con las excelentes rentabilidades registradas en el resto del mundo, las acciones chinas se tambalearon en 2023, después de haber iniciado en el año con expectativas de fuerte crecimiento por la reapertura de la economía tras los cierres relacionados con la covid-19. El índice Hang Seng de Hong Kong cayó un 12,8% en divisa local en 2023, cerrando su primer período de cuatro años de pérdidas desde su lanzamiento en 1969. La desaceleración también afectó a las acciones de China continental, donde el índice de referencia CSI 300 se dejó un 11,4% en divisa local en el año.

El rendimiento del bono del Tesoro estadounidense a 10 años de referencia cerró el año al mismo nivel en el que lo había empezado, en el 3,87%, aunque en condiciones financieras muy diferentes. Pese a no mostrar ninguna variación de principio a fin, los rendimientos se comportaron de forma volátil a lo largo del año, oscilando entre el 3,31% y el 4,99%.

Los diferenciales de crédito (el exceso de prima que reciben los bonos corporativos por encima de los títulos de deuda pública) se redujeron durante el año. A principios de 2023, el Bloomberg US Intermediate Credit Option Adjusted Spread mostraba una prima de 104 puntos básicos (pb) por encima de los bonos del Tesoro estadounidense de duración equivalente. Este diferencial se amplió durante el primer trimestre, marcando máximo de 133 pb a mediados de marzo, cuando quebraron el Silicon Valley Bank y el Signature Bank; sin embargo, no paró de reducirse durante el resto del año hasta cerrar a su nivel más ajustado del año, 81 pb.

En la zona euro, la deuda pública alemana a 10 años también sufrió altibajos, pero consiguió terminar el año casi en el 2%, tras un fuerte *rally* en noviembre y diciembre, frente al rendimiento del 2,6% a fin de 2022. Movido por las presiones inflacionistas de dos dígitos, el Banco Central Europeo mantuvo el fuerte ritmo de endurecimiento en la primera parte de 2023, subiendo los tipos otros 50 pb en febrero y en marzo, pero después moderó el ritmo de subidas de 25 pb por reunión entre mayo y septiembre, hasta situar el tipo de línea de depósito en el 4%.

Cabe destacar que, mientras que las principales clases de activos se movieron en tándem durante el año, la correlación de las clases de activos fue extraordinariamente alta. Si tomamos como referencia el S&P 500, cabría esperar que otros mercados mundiales de renta variable presentaran correlaciones de entre 0,8 y 0,9 en el año, pero lo más notable es que los bonos también exhibieron los mismos altos niveles o correlaciones de entre 0,8 y 0,9.

En este contexto, los futuros gestionados generaron una rentabilidad negativa, ya que varios importantes cambios de tendencia y riesgos a finales del primer trimestre y principios del segundo (la quiebra de SVB y First Republic Bank en EE. UU. y de Credit Suisse en Europa) y en noviembre (el «*rally* de todo») revirtieron rápidamente las tendencias a medio y largo plazo.

Informe de auditoría

A los accionistas de
iMGP

Nuestra opinión

En nuestra opinión, los estados financieros adjuntos ofrecen una imagen fidedigna de la situación financiera de OYSTER (el "Fondo") y de cada uno de sus compartimentos a 31 de diciembre de 2023, así como de los resultados de sus operaciones y de las variaciones en sus activos netos, correspondiente al ejercicio cerrado en dicha fecha, conforme a los requisitos legales y normativos de Luxemburgo relativos a la elaboración y presentación de los estados financieros.

Lo que hemos auditado

Los estados financieros del Fondo comprenden:

- el Estado Combinado de Activos Netos a 31 de diciembre de 2023;
- el estado de la cartera de valores al 31 de diciembre de 2023;
- el Estado de Cambios en los Activos Netos por el año terminado en esa fecha;
- Visión general de la cartera al 31 de diciembre de 2023; Y
- las notas a los estados financieros, incluyendo un resumen de los más importantes Principios de contabilidad.

Fundamento de la opinión

Hemos llevado a cabo la auditoría de conformidad con la Ley de 23 de julio de 2016 sobre la profesión de la auditoría (Ley de 23 de julio de 2016) y con las Normas Internacionales de Auditoría (NIA) adoptadas para Luxemburgo por la Commission de Surveillance du Secteur Financier (CSSF). Nuestras responsabilidades en virtud de la Ley de 23 de julio de 2016 y las NIA adoptadas para Luxemburgo por la CSSF se describen más detalladamente en el apartado "Responsabilidades del auditor autorizado (Réviseur d'entreprises agréé) en relación con la auditoría de los estados financieros" de nuestro informe.

Consideramos que las pruebas de auditoría que hemos obtenido son suficientes y adecuadas para ofrecer una base que nos permita expresar nuestra opinión.

Somos independientes del Fondo, de conformidad con el Código ético para contables profesionales del Consejo de Normas Internacionales de Ética para Contables (Código IESBA) adoptado para Luxemburgo por la CSSF junto con las exigencias éticas relevantes para nuestra auditoría de los estados financieros. De acuerdo con dichas exigencias éticas, hemos cumplido nuestras otras responsabilidades éticas.

Otros datos

El Consejo de Administración del Fondo es responsable del resto de la información. El resto de la información comprende los datos que figuran en el informe anual, aunque no incluyen ni los estados financieros ni nuestro informe de auditoría.

Nuestro dictamen sobre los estados financieros no cubre otros datos y de ninguna forma emitimos una garantía que sirva de conclusión sobre estos.

En relación con nuestra auditoría sobre los estados financieros, nuestra responsabilidad es leer el resto de datos anteriormente indicados y, al hacerlo, estimar si estos datos guardan o no coherencia con los estados financieros o nuestro conocimiento obtenido en la auditoría o si existen indicios de darse una declaración falsa importante. En el supuesto de que, conforme al trabajo que hemos realizado, concluyamos que existe una inexactitud importante en el resto de datos, estaremos obligados a informar al respecto. No tenemos nada que comunicar en este sentido.

Responsabilidades del Consejo de Administración del Fondo sobre los estados financieros

El Consejo de Administración del Fondo se encarga de elaborar y presentar de manera fidedigna los estados financieros, tal y como establecen los requisitos legales y normativos de Luxemburgo relativos a la elaboración y la presentación de los estados financieros. Asimismo, es responsable de llevar a cabo el control interno que se considere necesario para la elaboración de estados financieros libres de inexactitudes importantes, ya sea debido a fraude o error.

Al elaborar los estados financieros, el Consejo de Administración del Fondo es responsable de evaluar la capacidad del Fondo y de cada uno de sus compartimentos para proseguir como empresa en funcionamiento, indicando, según corresponda, las cuestiones relacionadas con la empresa en funcionamiento y siguiendo el método contable de empresa en funcionamiento, a menos que el Consejo de Administración del Fondo prevea liquidar el Fondo o cerrar cualquiera de sus compartimentos o suspender sus operaciones, o bien no tenga otra alternativa que proceder de ese modo.

Responsabilidades del auditor autorizado (Réviseur d'entreprises agréé) en relación con la auditoría de los estados financieros

Los objetivos de nuestra auditoría consisten en tener la certeza razonable de que los estados financieros en su conjunto están libres de inexactitudes importantes, ya sea por fraude o error, y emitir un informe de auditoría que incluya nuestra opinión. Por certeza razonable se entiende un alto grado de certeza, pero no una garantía de que una auditoría realizada de acuerdo con la Ley de 23 de julio de 2016 y las NIA adoptadas para Luxemburgo por la CSSF detectarán siempre una inexactitud importante cuando exista. Las inexactitudes pueden deberse a fraude o error y se consideran importantes si cabe esperar razonablemente que influyan, por sí solas o en conjunto, en las decisiones económicas de los usuarios adoptadas sobre la base de los presentes estados financieros.

En el contexto de una auditoría, de conformidad con la Ley de 23 de julio de 2016 y con las NIA adoptadas para Luxemburgo por la CSSF, aplicamos nuestro criterio profesional y mantenemos el escepticismo profesional durante toda la auditoría. Además:

- detectamos y evaluamos los riesgos de inexactitudes importantes de los estados financieros, ya se deban a fraude o error, diseñamos y llevamos a cabo procedimientos como respuesta a dichos riesgos, y obtenemos evidencias de auditoría suficientes y adecuadas que sirvan de base de nuestra opinión. El riesgo de no detectar una inexactitud importante como resultado de un fraude es mayor que el resultado de un error, ya que el fraude puede implicar colusión, falsificación, omisiones intencionales, tergiversaciones o la anulación del control interno;
- comprendemos el control interno relevante para la auditoría para diseñar procedimientos de auditoría apropiados a las circunstancias, pero no con el fin de expresar una opinión sobre la eficacia del control interno del Fondo;
- evaluamos la idoneidad de los métodos contables utilizados y el carácter razonable de las estimaciones contables y la información relacionada divulgada por el Consejo de Administración del Fondo;

- determinamos la idoneidad del uso del principio contable de empresa en funcionamiento por parte del Consejo de Administración del Fondo y, a partir de la evidencia de auditoría obtenida, si existen dudas importantes en relación con hechos o condiciones que puedan poner en cuestión de forma significativa la capacidad del Fondo o de cualquiera de sus compartimentos para continuar como empresa en funcionamiento. Si determinamos que existen dudas importantes, tenemos la obligación de destacar en nuestro informe de auditoría los enunciados relacionados de los estados financieros o, si dichos enunciados son inadecuados, tenemos la obligación de modificar nuestra opinión. Nuestras conclusiones se basan en la evidencia de auditoría obtenida hasta la fecha de nuestro informe de auditoría. No obstante, el Fondo o cualquiera de sus compartimentos podría dejar de proseguir como empresa en funcionamiento debido a acontecimientos o condiciones que se produzcan en el futuro;
- evaluamos la presentación, la estructura y los contenidos generales de los estados financieros, incluida la información divulgada, y si los estados financieros reflejan las transacciones y los hechos como corresponde a una presentación razonable.

Nos comunicamos con los responsables del gobierno corporativo en relación con, entre otras cosas, el alcance previsto y el calendario de la auditoría, así como las conclusiones significativas de la auditoría, incluida cualquier deficiencia significativa en el control interno que detectemos durante nuestra auditoría.

1 - Información general

iMGP (en adelante, la "SICAV") es una sociedad de inversión de capital variable de derecho luxemburgués, constituida con duración indefinida en Luxemburgo el 2 de agosto de 1996 conforme a las disposiciones de la Parte I de la Ley del 17 de diciembre de 2010 (en adelante, "la Ley") y a la Ley del 10 de agosto de 1915 sobre sociedades mercantiles, con sus respectivas modificaciones.

La SICAV se rige, en particular, por las disposiciones de la parte I de la Ley, título específico sobre los Organismos de Inversión Colectiva en Valores Mobiliarios (en adelante, "OICVM"), según lo establecido en la Directiva del Parlamento y del Consejo del 13 de julio de 2009 (2009/65/CE, en adelante la "Directiva"), con sus respectivas modificaciones.

Dichos estatutos han sido publicados en el "Mémorial", Registro de Sociedades y Asociaciones, inicialmente con fecha de 30 de agosto de 1996. Los estatutos se modificaron el 22 de agosto de 2012 y se publicaron en el "Recueil électronique des sociétés et associations" ("RESA") el 18 de septiembre de 2012.

La SICAV está inscrita en el Registro Mercantil y de Empresas de Luxemburgo con el número B-55740.

La SICAV está constituida como un fondo con múltiples compartimentos y está compuesta por varios compartimentos. Cada uno de estos compartimentos representa una masa de activos y de compromisos específicos y corresponde a una política de inversión diferente.

A 31 de diciembre de 2023, hay veinte subfondos activos:

La clase de acciones I M EUR del subfondo iMGP - Multi-Asset Absolute Return Fund (anteriormente Multi-Asset Absolute Return EUR) se cerró el 25 de octubre de 2023.

Otras notas a los estados financieros

2 - Principales políticas contables

2.1 - Presentación de los estados financieros

Los estados financieros de la SICAV se preparan de conformidad con los requisitos vigentes en Luxemburgo en relación con los organismos de inversión colectiva. A efectos de los estados financieros, se ha calculado para todos los subfondos un NAV técnico a 31 de diciembre de 2023.

2.2 - Valoración de las inversiones

Los valores admitidos a cotización oficial en una bolsa de valores o negociados en otro mercado regulado se valoran sobre la base del último precio conocido en Luxemburgo el día de la valoración. Si estos valores se negocian en varios mercados, se aplicará el último precio conocido del mercado principal. Los valores no admitidos a cotización oficial en una bolsa de valores o no negociados en otro mercado regulado y los valores admitidos a cotización oficial en una bolsa de valores o negociados en otro mercado regulado, pero cuyo último precio conocido no es representativo, se valoran sobre la base del valor probable de realización estimado prudentemente y de buena fe por el Consejo de Administración.

2.3 - Beneficio / (Pérdida) neto(a) realizado(a) sobre las ventas de las inversiones

Las ganancias o pérdidas obtenidas por las ventas de inversiones en cada compartimento se calculan sobre la base del coste medio de las inversiones vendidas.

2.4 - Conversión de divisas

Los ingresos y gastos expresados en monedas distintas de la moneda del subfondo se convierten a esta moneda al tipo de cambio vigente el 31 de diciembre de 2023.

El coste de adquisición de las inversiones de cada compartimento denominadas en monedas distintas a la del compartimento se convierte a esta moneda al tipo de cambio vigente el día de la compra.

Las ganancias y pérdidas cambiarias resultantes se registran en el estado de resultados y cambios en los activos netos.

Los tipos de cambio utilizados para la evaluación del valor liquidativo al 31 de diciembre de 2023 son los siguientes:

1 USD =	1,46553	AUD	1 USD =	1,31861	CAD	1 USD =	0,84162	CHF
1 USD =	6,74834	DKK	1 USD =	0,90526	EUR	1 USD =	0,78446	GBP
1 USD =	140,97999	JPY	1 USD =	10,15571	NOK	1 USD =	10,07785	SEK
1 USD =	18,28751	ZAR						

2.5 - Estados financieros consolidados

El estado de activos consolidado y el estado de operaciones y variaciones de los activos netos de la SICAV, expresados en USD, corresponden a la suma de los estados de activos netos y los estados de operaciones y variaciones de los activos netos de cada compartimento convertido en el divisa de la SICAV utilizando los últimos precios conocidos en la fecha de cierre.

Los activos netos iniciales se mantienen al tipo de cambio vigente al cierre del año anterior. Las diferencias de cambio resultantes se incluyen en el estado consolidado de operaciones y cambios en el activo neto, en el rubro "Revaluación del saldo inicial".

El estado consolidado de activos y el estado consolidado de operaciones y cambios en los activos netos para el período terminado el 31 de diciembre de 2023 no han sido ajustados para excluir el impacto de las inversiones cruzadas anteriores. El Valor Liquidativo consolidado excluyendo el importe de las inversiones en los compartimentos mencionados anteriormente asciende a 1.464.973.157,86 dólares estadounidenses.

2.6 - Valoración de las opciones

Las opciones se valoran al último precio conocido en la fecha de valoración.

Las opciones son un tipo de instrumento financiero derivado. Su precio está intrínsecamente ligado al precio de otra cosa. La compra de una opción da el derecho, pero no la obligación, de comprar o vender un activo subyacente a un precio específico en una fecha determinada o antes.

2.7 - Valoración de los contratos de divisas a plazo

Las ganancias o pérdidas por cambio de divisas derivadas de los contratos de divisas a plazo no vencidos se determinan utilizando los tipos de cambio a plazo aplicables en la fecha de valoración y se registran en la cuenta de resultados consolidada y en las variaciones del patrimonio neto.

Para más detalles, consulte las "Notas a los estados financieros - Estados de los instrumentos derivados".

2.8 - Valoración de los futuros financieros

Las ganancias o pérdidas derivadas de los contratos a plazo no vencidos se determinan sobre la base del último precio contractual conocido en la fecha de valoración y se registran en el estado combinado de cambios en el patrimonio neto.

Para más detalles, véase "Notas a los estados financieros - Estados de los instrumentos derivados".

2.9 - Valoración de los "Contracts for difference" ("CFD")

Los CFD se valoran por su valor razonable, basándose en la última curva de diferencial conocida, la última curva de tipos conocida y el último precio de cierre conocido del activo subyacente.

Un contrato por diferencia (CFD) es un contrato entre dos partes para intercambiar, al cierre del contrato, la diferencia entre el precio de apertura y de cierre de la acción subyacente multiplicada por el número de acciones especificado en el contrato.

Al valorar los CFDs, se realiza un "reset" (registro de los CFDs al precio de apertura) al calcular el Valor Liquidativo al final de cada mes. Las ganancias o pérdidas no realizadas se contabilizan como ganancias o pérdidas netas de los CFD.

2.10 - Valoración de los contratos de swap

Los swaps de incumplimiento crediticio y los swaps de tipos de interés, así como los CFD, se valoran a su valor razonable sobre la base de las últimas curvas conocidas de diferencial, tipo y precio de cierre del valor subyacente, respectivamente.

Los swaps son instrumentos derivados que representan un acuerdo entre dos partes para intercambiar una serie de flujos de efectivo durante un periodo determinado. Un swap de rentabilidad total ofrece al inversor las ventajas de poseer un valor sin poseerlo realmente. Un Credit Default Swap es un seguro en caso de impago por parte de un tercer prestatario.

Otras notas a los estados financieros

2 - Principales políticas contables

2.11 - Dividendos y intereses

Los dividendos se registran como ingresos en la fecha en que las acciones cotizan por primera vez "ex-dividendo". Los intereses se acumulan diariamente.

2.12 - Préstamo de valores

Cada cartera puede prestar valores incluidos en su cartera a un prestatario. Para garantizar esta operación, la Sociedad recibe garantías. Los valores prestados se entregan a un tercero intermediario cuyos activos continúan valorándose como parte de la cartera del subfondo en cuestión. En caso de terminación de un préstamo, el subfondo en cuestión está obligado a devolver la garantía depositada al prestatario. Los préstamos pueden ser rescindidos por el subfondo correspondiente o por el prestatario en cualquier momento.

Los ingresos por préstamos de valores se contabilizan en efectivo y se registran en el estado de operaciones y cambios en los activos netos en "Ingresos por préstamos de valores".

2.13 - Asignación de costes y gastos

Los cargos y gastos atribuibles a una Clase de acciones y/o a un Sub-fondo concreto se asignarán directamente a esa Clase y/o Sub-fondo. Otros costes y gastos que no sean directamente atribuibles a una Clase de acciones y/o a un Sub-fondo determinado se asignarán por igual a las diferentes Clases dentro de los diferentes Sub-fondos y/o a los diferentes Sub-fondos. Si el importe de los costes y gastos así lo requiere, se cargarán a las Clases de acciones y/o Sub-fondos en proporción a sus respectivos activos netos.

2.14 - Costes de transacción

Durante el ejercicio financiero que finalizó el 31 de diciembre de 2023, los subfondos incurrieron en los siguientes costos de transacción (comisiones de corretaje) en relación con la compra o venta de valores mobiliarios, instrumentos del mercado monetario, derivados u otros activos elegibles. Los costos de transacción se reconocen como gastos y se presentan por separado en el estado de resultados y cambios en los activos netos en el rubro "Costos de transacción".

2.15 - Suscripciones tempranas

Los anticipos sobre compras de fondos de inversión que no se hacen efectivos hasta el 31 de diciembre de 2021 figuran como "Anticipo sobre valores adquiridos".

2.16 - Inversiones tempranas

Las suscripciones recibidas que no se hacen efectivas hasta después del cierre del ejercicio figuran como suscripciones por cobrar.

2.17 - Abreviaturas utilizadas en carteras de inversiones

A: Anual
Q: Trimestral
S: Semi-anual
M: Mensual
XX: Bonos perpetuos

3 - Commissioni di gestione e amministrative

a) Commissioni di gestione:

El 17 de noviembre de 2006, el Fondo suscribió un contrato de duración ilimitada con iM Global Partner Asset Management S.A. (el "Gestor") para la gestión de los activos de los Sub-fondos, bajo la supervisión permanente del Consejo de Administración del Fondo.

Como contrapartida a sus servicios, iM Global Partner Asset Management S.A. percibirá una comisión de gestión pagadera por el Fondo al final de cada trimestre, según los porcentajes anuales que se describen a continuación y que se aplican al valor liquidativo medio de cada Clase de acciones. Un porcentaje de esta comisión de gestión se asigna a las distintas subgerencias como remuneración por sus respectivos servicios.

Polen Capital Management, LLC: US Small y Mid Company Growth Fund.

Scharf Investments LLC: US Value Fund y Global Concentrated Equity Fund.

SYZ Capital AG.: BM Alternativos Fund.

WHEB Asset Management LLP: Sustainable Europe Fund.

Richard Bernstein Advisors LLC: Responsible Global Moderate Fund (liquidado el 13/12/23), Global Risk-Balanced Fund y Global Core Equity Fund (lanzado el 18/12/23).

b) Comisión específica por la gestión del riesgo de cambio de las Clases de Acciones HA y HP

Como remuneración por los servicios descritos para estas Clases, las Acciones de las Clases HA y HP podrán pagar, cada una por separado, al final de cada trimestre, una comisión por gestión del riesgo de tipo de cambio a una tasa máxima anual del 0,10% del Valor Neto promedio del inventario por año. Participación de las Clases de Acciones HA y HP. Esta comisión será pagadera a la entidad encargada de la gestión de divisas.

c) Comisión de Sociedad Gestora

La comisión de la Sociedad Gestora podrá ascender hasta el 0,30% anual del Valor Liquidativo de cada compartimento pagadero al final de cada mes.

El encargo de la Sociedad Gestora tiene por objeto:

- Retribuir mensualmente a la Sociedad Gestora por los servicios de administración central prestados a la SICAV, incluidos los servicios de control;
- Retribuir al Banco CACEIS, Sucursal de Luxemburgo, por sus funciones de Administración Central, Agente de Transferencias y Registrador;
- Incurrir en costes de marketing y publicidad.

d) Comisión de gestión del fondo objetivo

Cuando un subfondo adquiere fondos objetivo vinculados, se aplica a estos fondos una comisión de gestión reducida de un máximo del 0,25% (tasa anual).

La siguiente tabla resume los tipos anuales de comisiones de gestión aplicados a otras OIC invertidas por los compartimentos del iMGP al 31 de diciembre de 2023:

4 - Comisiones de rentabilidad

A partir del 31 de diciembre de 2023, ningún subfondo de iMGP está sujeto a la comisión de rentabilidad relativa.

En aplicación de las Directrices de la AEVM sobre comisiones de rentabilidad (AEVM34-39-992) y la Circular de la CSSF 20/764, en la tabla siguiente se muestra el importe efectivo de las comisiones de rentabilidad cobradas por cada Clase de acciones correspondiente y el porcentaje de dichas comisiones según el Valor liquidativo de la Clase de acciones («VL»). Solamente se muestran las Clases de acciones para las que se han cobrado comisiones de rentabilidad.

5 - Comisiones del depositario

La SICAV pagará al Banco Depositario una comisión anual que oscilará entre un 0,005% y un 0,10% del valor de inventario neto de cada compartimento. Estas comisiones son pagaderas mensualmente y no comprenden las comisiones de transacciones o las comisiones de subdepositarios o agentes similares. Asimismo, el Banco Depositario tiene derecho a que se le reembolsen los gastos y desembolsos razonables que no estén incluidos en los gastos mencionados en el presente.

6 - Tasa de suscripción ("Taxe d'abonnement")

La SICAV se rige por las leyes fiscales luxemburguesas.

En virtud de la legislación y de las normativas actualmente en vigor, la SICAV está sujeta, en Luxemburgo, a un impuesto anual del 0,05% pagadero trimestralmente y que se calcula sobre los activos netos de cada uno de los compartimentos de la SICAV al final de cada trimestre.

Este impuesto se limita al 0,01% del valor del activo para las clases de acciones reservadas a inversores institucionales.

No se cobran impuestos adicionales por los activos invertidos en otros Organismos de Inversión Colectiva en Valores Mobiliarios que ya estén sujetos a dicho impuesto en Luxemburgo.

7 - Otros datos fiscales

En varios Estados miembros de la Unión Europea, los Organismos de Inversión Colectiva (OPC) pueden presentar reclamaciones con objeto de recuperar los impuestos que se consideren indebidamente pagados en virtud de la normativa fiscal vigente. La sociedad gestora del Fondo ha decidido presentar reclamaciones ante las autoridades fiscales de estos Estados miembros para recuperar estas cantidades. Estas cuentas por cobrar se encuentran registradas en la sección Otros.

iMGP

Otras notas a los estados financieros

8 - Préstamos de valores

Para el ejercicio financiero finalizado el 31 de diciembre de 2023, los ingresos por préstamo de valores generados por la SICAV son los siguientes:

Subfondos	Divisa	Importe bruto total de los ingresos por préstamo de valores	Costes y comisiones directos-indirectos deducidos de los ingresos brutos por préstamo de valores	Importe neto total de los ingresos por préstamo de valores
iMGP - Absolute Return GBP (liquidado el 03/03/23)	GBP	36.16	7.23	28.93
iMGP - Euro Fixed Income Fund	EUR	312.73	62.55	250.18

10 - Swing pricing

La Sociedad Gestora ha establecido un mecanismo de protección destinado a evitar la dilución del rendimiento, con un umbral de activación, con el fin de proteger los intereses de los accionistas de los Subfondos. Este mecanismo de protección es aplicable a todos los compartimentos del Fondo.

El costo real de comprar o vender activos e inversiones para un Fondo determinado puede desviarse del último precio disponible, si corresponde, al calcular su Valor Liquidativo debido a compromisos de precio de compra y venta de las inversiones subyacentes. Estos costos tienen un efecto negativo en el valor de un Fondo y se denominan "dilución". De hecho, en caso de suscripciones o reembolsos importantes dentro del Subfondo, el Subgestor en cuestión deberá invertir/desinvertir los importes correspondientes, generando así transacciones significativas que pueden dar lugar a transacciones variables, honorarios en función de los tipos de activos de que se trate. Estas tarifas son principalmente impuestos sobre ciertos mercados y tarifas de ejecución cobradas por los corredores. Pueden ser de importe fijo o variable proporcional a los volúmenes negociados y/o tomar la forma de la diferencia entre los precios de compra y de venta de un instrumento financiero, por un lado, y el precio de valoración, por otro.

Para mitigar los efectos de la dilución, el Consejo de Administración podrá, a su discreción, realizar un ajuste al Valor Liquidativo para tener en cuenta la dilución. El objetivo del mecanismo antidilución, también conocido como "swing pricing", es, por tanto, que estos costes sean asumidos por los inversores detrás de las operaciones de suscripción/reembolso en cuestión, y proteger a otros inversores. Generalmente, la necesidad de realizar un ajuste por dilución dependerá del volumen de suscripciones o reembolsos de Acciones en el Fondo correspondiente. El Consejo de Administración podrá realizar un ajuste de dilución si considera que es probable que los Accionistas existentes (en caso de suscripción) o los Accionistas restantes (en caso de reembolsos) se vean afectados negativamente.

El Consejo de Administración ha encomendado a la Sociedad Gestora la implantación y ejecución del mecanismo antidilución. En la práctica, en el día de cálculo del Valor Liquidativo, si el importe neto de las órdenes de suscripción y reembolso procedentes de inversores de todas las Clases de acciones de un Subfondo supera un umbral fijado de antemano por la Sociedad Gestora, expresado como porcentaje de los activos netos del Subfondo (llamado "umbral de activación"), el Valor Liquidativo podrá ajustarse hacia arriba o hacia abajo para tener en cuenta los costos de reajuste atribuibles a las órdenes de suscripción/reembolso neto. Más concretamente, el Valor Liquidativo del Subfondo correspondiente se ajustará (hacia arriba o hacia abajo) para reflejar el diferencial estimado entre el precio de oferta y el precio de venta de los activos en los que invierte el Subfondo, el impuesto estimado cargos y/o costes de transacción a los que el Subfondo pueda estar expuesto.

En el caso de suscripciones netas, puede haber un aumento en el Valor Liquidativo, es decir, un aumento en el precio de compra para todos los inversores que suscriban o reembolsen Acciones en esa Fecha.

En caso de reembolsos netos, puede haber una reducción en el Valor Liquidativo, es decir, una reducción en el precio de venta para todos los inversores que reembolsen o suscriban Acciones en esa Fecha de Negociación.

El Valor Liquidativo de cada Clase de Acciones del Subfondo se calculará por separado. Sin embargo, cualquier ajuste por dilución afectará, en términos porcentuales, al Valor Liquidativo de cada Clase de Acciones por igual. El alcance de esta variación depende de la estimación que haga la Sociedad Gestora de los costes de transacción aplicados a los tipos de activos en cuestión. El Valor Liquidativo Ajustado es el único Valor Liquidativo comunicado a los accionistas de los Subfondos. En el caso de las comisiones de rendimiento, estas comisiones se calculan antes de la aplicación del mecanismo antidilución, lo que las hace insensibles al impacto de la oscilación de precios. De acuerdo con la normativa, la Sociedad Gestora no informa a los accionistas sobre el umbral de activación y garantiza que los canales de información internos estén restringidos para preservar el carácter confidencial de la información.

Otras notas a los estados financieros

10 - Swing pricing

Dado que este ajuste está vinculado al importe neto de las órdenes de suscripción y reembolso del Subfondo, no es posible predecir con precisión si se aplicará el precio de oscilación en un momento dado en el futuro, ni la frecuencia con la que la gestión de la Sociedad hará dichos ajustes. El ajuste de precio no excederá el 2,5% del Valor Liquidativo, excepto en circunstancias excepcionales, por ejemplo en caso de una disminución sustancial de la liquidez. Si se supera este límite del 2,5%, la Sociedad Gestora informará a la CSSF y lo notificará a los accionistas mediante la publicación de la información en el sitio web.

Durante 2023, los siguientes compartimentos experimentaron al menos una activación de precios oscilantes:

El precio de oscilación parcial se implementa en los siguientes compartimentos a partir del 31 de diciembre de 2023.

Sustainable Europe Fund
US Value Fund
Italian Opportunities Fund
Japan Opportunities Fund
Global Concentrated Fund
Global Core Equity Fund
US Small and Mid Company Growth Fund

No se realizaron solicitudes Adhoc Swing en 2023.

11 - Otros gastos

Otros gastos se componen principalmente de costes de investigación, honorarios de gestión de préstamos de valores, honorarios legales, honorarios de auditoría, depósito fiscal, honorarios de IVA y marketing.

12 - Efectivo en el banco con el corredor y garantías

Al 31 de diciembre de 2023, había efectivo en el banco con el corredor y montos de garantía en forma de saldos de efectivo mantenidos con los corredores que se incluyen en el efectivo en el banco que se muestra en el estado de activos netos. Las siguientes tablas presentan la distribución de estos importes de efectivo mantenidos con corredores y garantías por Subfondo, al 31 de diciembre de 2023:

Efectivo en el banco:

Sub-fondos	Divisa	Efectivo en el corredor en la moneda del compartimento
iMGP- DBi Managed Futures Fund	EUR	34,74
	USD	5.826.048,31
iMGP - Balanced Strategy Portfolio USD Fund	EUR	98.786,50
	USD	133.175,72
iMGP - Global Diversified Income Fund	EUR	86.628,64
	JPY	48.716,95
	USD	30.390,12

Remuneración

La Directiva Europea 2014/91/UE que modifica la Directiva 2009/65/CE relativa a los organismos de inversión colectiva en valores mobiliarios, aplicable a iMGP, la SICAV, entró en vigor el 18 de marzo de 2016. Se transpone a la legislación nacional conforme a la legislación de Luxemburgo de 17 de diciembre de 2010, según enmendada. Como resultado de este nuevo reglamento, el OICVM debe publicar información relativa a la remuneración de los empleados identificados en el sentido de la Ley en el informe anual.

Política retributiva de la sociedad gestora

La política retributiva vigente de la Sociedad Gestora puede consultarse en www.imgp.com.

Datos cuantitativos

La siguiente tabla proporciona una descripción general de la remuneración total general para 2022 pagada al personal de la Sociedad Gestora por los servicios prestados y el número de beneficiarios. No es posible proporcionar un desglose más detallado de la remuneración atribuible a la Sociedad Gestora de manera relevante o fiable. Sin embargo, a modo de contexto, la sociedad gestora gestiona un FIA (con 2 compartimentos) y una OICVM (con 20 compartimentos), con activos bajo gestión a 31 de diciembre de 2023 de 1,48 dólares respectivamente.

	Fijado	Variable	Número de beneficiarios	Intereses diferidos pagados
Equipo completo	EUR 1.395.007	EUR 133.700	12	Néant

El "personal identificado" de la sociedad gestora son empleados cuyas acciones tienen un impacto significativo en el perfil de riesgo de la sociedad gestora o del OICVM que ésta gestiona.

A efectos de la información anterior, cuando se hayan delegado formalmente actividades de gestión de carteras, no se ha incluido la remuneración de los empleados correspondientes del delegado.

Gestión de riesgos

En términos de gestión de riesgos, el Consejo de Administración de la SICAV ha adoptado el enfoque de compromiso como método para determinar el riesgo global de los siguientes compartimentos:

iMGP - Balanced Strategy Portfolio USD Fund
iMGP - BM Alternativos Fund
iMGP - Euro Fixed Income Fund
iMGP - European Corporate Bonds Fund
iMGP - European Subordinated Bonds Fund
iMGP - Global Concentrated Equity Fund
iMGP - Global Core Equity Fund (lanzado el 18/12/23)
iMGP - Global Risk Balanced Fund
iMGP - Growth Strategy Portfolio USD Fund
iMGP - Italian Opportunities Fund
iMGP - Japan Opportunities Fund
iMGP - Multi-Asset Absolute Return Fund
(antes Multi-Asset Absolute Return EUR)
iMGP - Sustainable Europe Fund
iMGP - US Core Plus Fund
iMGP - US High Yield Fund
iMGP - US Small and Mid Company Growth Fund
iMGP - US Value Fund

y el método VaR para los siguientes compartimentos:

Fund name	Method. of calculating overall exposure	Method of calculating VaR	Confidence Index	Holding period	Observation period	Floor VaR 01/01/2023 / 31/12/2023	Ceiling VaR 01/01/2023 / 31/12/2023	Average VaR 01/01/2023 / 31/12/2023	Legal limit	Internal limit	Leverage 01/01/2023 / 31/12/2023	Method use

Véase la Nota 1 para eventos corporativos detallados en la SICAV.

Información suplementaria (sin auditar)

Información para inversores suizos

Información legal

Representante

El representante en Suiza es CACEIS (Suiza) S.A. (el "Representante suizo"), Route de Signy 35, CH-1260 Nyon, Suiza.

Servicio de pago

El servicio de pago en Suiza lo proporciona CACEIS Bank, Montrouge, sucursal Nyon/Suiza, con domicilio social, Route de Signy 35, CH-1260 Nyon, Suiza (el "Servicio de Pago Suizo").

Lugar donde se pueden obtener los documentos pertinentes.

El folleto y los KID, los estatutos, la lista de compras y ventas realizadas durante el ejercicio en cuestión, así como los informes anual y semestral de la SICAV pueden obtenerse previa solicitud y de forma gratuita en la Representante en Suiza.

Publicación

Las publicaciones relacionadas con iMGP se realizan en Suiza a través de www.fundinfo.com.

Los precios de emisión y reembolso y/o el valor de los activos, con la mención "sin comisiones", de todas las clases de acciones se publican diariamente para cada emisión y reembolso de acciones en el sitio web www.fundinfo.com.

Lugar de ejecución y tribunal competente

Para las participaciones del fondo ofrecidas en Suiza, el lugar de ejecución es el domicilio social del representante. El fuero legal es el domicilio social del representante, o el domicilio social o domicilio del inversor.

Total Expense Ratio ("TER")

Los TER se calcularon de acuerdo con la "Directiva para el cálculo y la publicación del índice de gastos totales (TER) de las inversiones de capital colectivo del 16 de mayo de 2008 (al 20 de abril de 2015)" promulgada por la "Association de gestion d patrimoine Switzerland (AMAS).

A 31 de diciembre de 2023, el TER calculado para cada Clase de Acciones activa es el siguiente:

ISIN	Subfondos y clases de acciones	TER con rendimiento (en %)	Reporte de desempeño (en %)	TER sintético (en %) (Si es aplicable)

SFDR (Sustainable Finance Disclosure Regulation)

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - EURO FIXED INCOME Legal entity identifier: 549300K3F0F5XCOPFS64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund's investors by mitigating risk and positively influencing long-term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Quality Score, as measured by the Sub-Manager methodology, at least equal to that of the reference index, the Bloomberg Euro Agg Total Return Index. During the period under review, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report, rated 7.5 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

The ESG Quality Score of the Bloomberg Euro Agg Total Return Index was 7.1 out of 10.

● ***...and compared to previous periods?***

In 2022, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report, rated 8.4 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

The ESG Quality Score of the Bloomberg Euro Agg Total Return Index was 6.9 out of 10.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 68.5 T CO₂ Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023 on average, 7.9% of the portfolio’s weight had involvement in fossil fuels. At the end of 2023, two companies in the Utilities sector and two in the Energy sector are generating this exposure. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In 2023, 0% of the Sub-Fund's assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

100% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

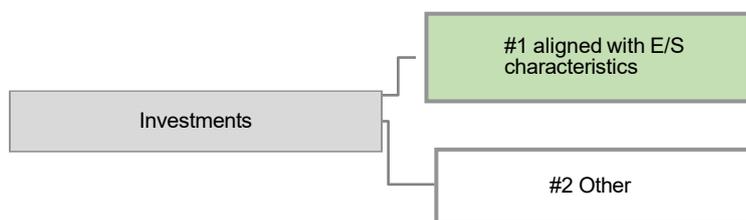

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

0% of the Sub-Fund’s assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Government	65,91%
Financials	32,51%
Utilities	9,26%
Industrials	8,08%
Consumer Staples	4,11%
Consumer Discretionary	3,13%
Health Care	1,4%
Cash & Others	-24,41%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments, units of collective investment schemes as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company's board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager's active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer's management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - EUROPEAN CORPORATE BONDS Legal entity identifier: 549300F1JNLOTH0MCP84

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

Sustainability and the management of any activity according to the best practices of “good governance” are in fact essential factors for the creation of value in the short term but even more so in the medium to long term. A focus on the sustainability of companies

can affect their ability to create long-term value for investors and stakeholders; therefore, the Sub-Manager considers ESG integration an important tool to improve the risk/return profile of investments.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve a weighted ESG average score, as measured by the Sub-Manager methodology equal or higher than 70 on a scale from 0 to 100.

As at 31 December 2023, based on the Sub-Manager methodology, the weighted ESG average score is 72.7.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 30 December 2023, based on the Sub-Manager methodology:

- The Sub-fund had 4.1% exposure to laggard issuers
- The Sub-fund had 0.0% exposure to not rated issuers

● ***...and compared to previous periods?***

As at 31 December 2022, based on the Sub-Manager methodology, the weighted ESG average score is 76.4.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 30 December 2022, based on the Sub-Manager methodology:

- The Sub-fund had 0% exposure to laggard issuers
- The Sub-fund had 8.8% exposure to not rated issuers

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 55.2 TC02 Emission/mIn\$ Sales.

2. Exposure to companies activities in the fossil fuel sector:

In 2023, 11% of the portfolio on average had involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund's assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund's assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

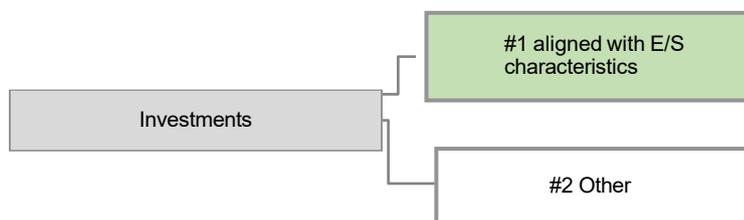

● What was the asset allocation?

As at 31 December 2023:

97% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

Asset allocation describes the share of investments in specific assets.

3% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● ***In which economic sectors were the investments made?***

As at 31 December 2023, the Sub-fund's investments were made in the following economic sectors:

Sectors	Expo %
Financials	45,63%
Industrials	8,91%
Consumer Staples	8,65%
Consumer Discretionary	7,65%
Health Care	7,33%
Energy	6,15%
Utilities	5,49%
Materials	3,72%
Communications	3,41%
Cash & Others	3,05%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include certain securities, as explained below, cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

Securities included in this category present an ESG score below 40/100 (according to the Sub-Manager methodology) or do not have an ESG rating.

For securities included in “Other”, minimum environmental and social safeguards apply. Corporate issuers need to be compliant with the UNGC principles or OECD Guidelines for Multinational Enterprises and not be involved in very severe

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

controversies regarding environmental, social or governance issues or socially controversial activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company's board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager's active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer's management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - EUROPEAN SUBORDINATED BONDS
 Legal entity identifier: 5493009WNONMHMH5OP67

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

Sustainability and the management of any activity according to the best practices of “good governance” are in fact essential factors for the creation of value in the short term

but even more so in the medium to long term. A focus on the sustainability of companies can affect their ability to create long-term value for investors and stakeholders; therefore, the Sub-Manager considers ESG integration an important tool to improve the risk/return profile of investments.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve a weighted ESG average score, as measured by the Sub-Manager methodology equal or higher than 70 on a scale from 0 to 100.

As at 31 December 2023, based on the Sub-Manager methodology, the weighted ESG average score is 75.3.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 31 December 2023, based on the Sub-Manager methodology:

- The Sub-fund had 0.0% exposure to laggard issuers
- The Sub-fund had 4.2% exposure to not rated issuers

● ***...and compared to previous periods?***

As at 31 December 2022, based on the Sub-Manager methodology, the weighted ESG average score is 73.5.

In addition to that, investing in worst-in-class issuers is not allowed and a limit of maximum 10% exposure has been set both for laggard issuers (i.e. with an ESG score below 40/100 according to the Sub-Manager methodology) and not rated issuers.

As at 31 December 2022, based on the Sub-Manager methodology:

- The Sub-fund had 1.8% exposure to laggard issuers
- The Sub-fund had 8.6% exposure to not rated issuers

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 31.7 TC02 Emission/mln\$ Sales.

2. Exposure to companies activities in the fossil fuel sector:

In 2023 on average, 8.8% of the portfolio had involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund's assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund's assets were exposed to UN Global Compact principles risk.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
USIM VAR PERP(5.75%)	Financials	2,33%	ITALY

What was the proportion of sustainability-related investments?

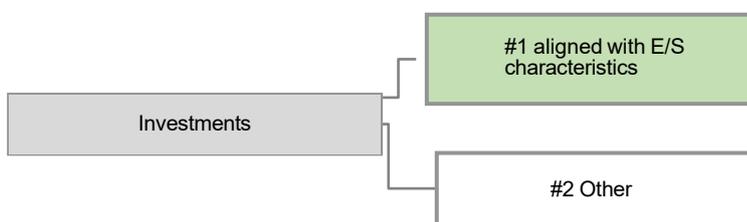

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

96.6% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

3.4% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund's investments were made in the following economic sectors:

Sectors	Expo % PTF
Financials	80,74%
Utilities	5,71%
Energy	3,96%
Communications	2,25%
Industrials	2,06%
Government	1,87%
Cash & Others	3,42%

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

- Yes
 - In fossil gas
 - In nuclear energy
- No

● *What was the share of investments made in transitional and enabling activities?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include certain securities, as explained below, cash,

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

Securities included in this category present an ESG score below 40/100 (according to the Sub-Manager methodology) or do not have an ESG rating.

For securities included in “Other”, minimum environmental and social safeguards apply. Corporate issuers need to be compliant with the UNGC principles or OECD Guidelines for Multinational Enterprises and not be involved in very severe controversies regarding environmental, social or governance issues or socially controversial activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company’s board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager’s active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer’s management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

● ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - GLOBAL CONCENTRATED EQUITY
 Legal entity identifier: 5493000B3NSRTXHRKR38

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in assets with good environmental, social and governance ratings while excluding certain companies because of their involvement in controversial products and services.

The Sub-Manager integrates ESG considerations in their investment process which is focused on quality-specially, sustainable earnings over an economic cycle-and risk

mitigation-modelling downside risk as much as upside returns and demanding a spread between value and price. As a result, the Sub-Manager believes this creates portfolios of sustainable businesses with compelling carbon and ESG risk scores. The Sub-Manager considers that buying high quality companies at compelling valuations is foundational to long-term investment success.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-Manager seeks to achieve a portfolio Carbon Risk Score as measured by the Sub-Manager methodology lower than 10 on a scale from 0 (negligible) to 50 and above (severe).

As at 30 December 2023, the Carbon Risk score was 6.1.

The Carbon Risk rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

● ***...and compared to previous periods?***

As at 30 December 2022, the Carbon Risk score was 6.2.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the average Carbon Footprint was 50.4 T CO₂ Emission/mln\$ Sales.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
SAMSUNG ELECT-GDR	Technology	6,74%	KOREA

FISERV INC	Technology	3,92%	USA
CVS HEALTH CORP	Health Care	3,8%	USA
CANADIAN PACIFIC KANSAS CITY USD	Industrials	3,76%	CANADA

What was the proportion of sustainability-related investments?

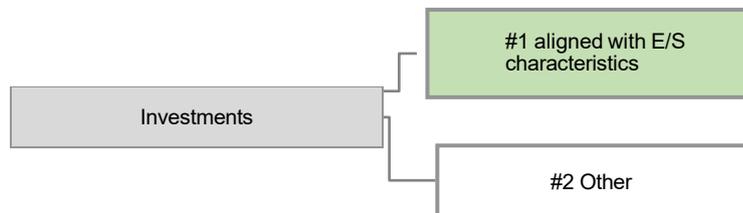

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

98.3% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

1.7% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Technology	20,93%
Health Care	18,36%
Industrials	16,28%
Financials	14,71%
Communications	12,69%
Consumer Staples	8,61%
Consumer Discretionary	3,59%
Real Estate	3,16%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Joint Engagement Initiatives

- Endorsed the UNPRI Spring Initiative, a TNFD-aligned initiative
- UNPRI Railway agreement

Engagement Example: MillerKnoll

On April 19, 2023, a video went viral (over 24 million views within 2 days) of MLKN CEO Andi Owens’ comment to employees to ‘leave Pity City’ after some asked about staying motivated if employees did not receive bonuses this year. The average MLKN employee receives \$45,000 salary. CEO Andi Owen received a \$1.1 million salary with a \$3.9 million in stock awards and other compensation for fiscal year ending May 2022, according to most recent MLKN proxy statement. The compensation received by MLKN CEO in 2022 is in-line with its peer group. After the viral video, CEO Andi Owen sent an email to staff stating, “I feel terrible that my rallying cry seemed insensitive...What I’d hoped would energize the team to meet a challenge we’ve met many times before

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

landed in a way that I did not intend and for that I am sorry.” MLKN has not yet decided on bonus payouts for staff, including its CEO, as its fiscal year ends in May.

Sub-Manager(Scharf Investments) Engagement: In response to remarks MLKN CEO Andi Owen made as a part of an online meeting with workers, Scharf Investments engaged MLKN over the topic of compensation. On April 27, 2023, President and Investment Committee Chairman, Brian Krawez, and Senior Research Associate, Grace Menk, sat down with MLKN CFO, Jeffrey Stutz, and Vice President of Investor Relations, Carola Mengolini, to discuss the circumstances surrounding the CEO’s remarks and underlying compensation plans. We learned that Andi has been doing smaller group fireside chats within the company after the video went viral. Managers within the company are also talking to their employees to gauge morale. Scharf Investments engaged with the company on this issue and felt that outreach within the organization was a positive step in the right direction to reengaging employees.

2023 Company Engagement Summary

Samsung	Individual	Controversy - Governance	10/9/2023	Followed up, no response.
U-Haul	Individual	Carbon Emissions	10/9/2023	

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- **How does the reference benchmark differ from a broad market index?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform compared with the reference benchmark?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- **How did this financial product perform compared with the broad market index?**
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - GLOBAL DIVERSIFIED INCOME Legal entity identifier: 5493000EQZSDQB45FQ35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund's investors by mitigating risk and positively influencing long- term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Quality Score, as measured by the Sub-Manager methodology, in the first tercile of the score range (i.e. at least equal to 6.67 on a range from 0 to 10).

In 2023, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report was 6.9 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***...and compared to previous periods?***

In 2022, the ESG Quality Score of the portfolio based on the Sub-Manager's data provider report was 7.7 out of 10. The portfolio ESG Quality Score score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 40.2 T CO₂ Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023 on average, 2% of the portfolio’s weight had involvement in fossil fuels. At the end of 2022, one company in the Utilities sector and one in the Industrials sector are generating this exposure. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund’s assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

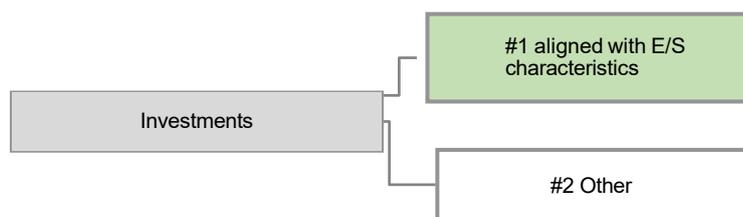

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● What was the asset allocation?

As at 31 December 2023:

100% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

0% of the Sub-Fund's assets were invested in #2 Other.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo% (PTF)
Materials	2,79%
Communications	2,85%
Financials	2,91%
Industrials	3,0%
Consumer Discretionary	3,2%
Consumer Staples	4,98%
Health Care	6,81%
Technology	9,11%
Other	64,35%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
- In fossil gas In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments, units in collective investment schemes as well as derivatives that have been included in the portfolio in order to manage it efficiently, to protect its assets and liabilities and for investment purposes.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of its strategy, the Sub-Manager may engage in dialogue with companies about ESG-related disclosures to better understand how potential ESG risks and opportunities are managed, among issues. While the Sub-manager does not take an activist position, the investment team may engage with company management in conversations about ESG-related disclosures to help the companies further enhance their knowledge of ESG risks and take action to reduce their environmental and social impacts.

In addition, the Sub-Manager actively monitors voting opportunities at its companies for potential governance and other ESG risks and while it has the ability to vote proxy, it hardly does it as it is uncommon within this space.

The Sub-Manager has chosen to delegate its shareholder engagement to ISS Governance, which manages and executes votes. However, the procedure allows the Sub-Manager to modify ISS votes; the final decision rests solely with the Sub-Manager.

In 2023, the Sub-Manager participated in 24 corporate actions for the Fund and another compartment of iMGP. Its votes were in agreement with management recommendations 77% of the time. Nevertheless, on some occasions, the Sub-Manager voted against management. For example, it voted against numerous proposals from Amazon, Alphabet, Microsoft, or Coca-Cola at their respective annual general meetings on issues such as tax transparency reports, climate lobbying, gender/racial pay gaps, climate change strategy, civil rights audits, tax transparency reports, among others.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - JAPAN OPPORTUNITIES Legal entity identifier: 5493000GULN3XEIXOZ68

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that companies which take account of ESG factors in their own strategies and operating models have a greater likelihood of obtaining sustainable profits over time, and thus of increasing their value, both in economic and financial terms.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Score, as measured by the Sub-Manager methodology, higher than that of its investment universe (known as “ESG Score Integration”).

In 2023, the ESG Score of the portfolio was 7.4. The ESG score of the Topix index was 7.0.

The Sub-Manager has integrated procedures to measure the carbon dioxide (CO₂) emissions generated by issuers, in order to build a portfolio with a carbon footprint lower than that of its investment universe. During the period under review, carbon footprint of the Sub-fund was 41.9 TC02 Emission/mln\$ Sales whereas that of the Topix index is 89.3 TC02 Emission/mln\$ Sales.

● ***...and compared to previous periods?***

In 2022, the ESG Score of the portfolio was 6.8. The ESG score of the Topix index was 6.7.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint was on average 41.9 TC02 Emission/mln\$ Sales whereas that of the Topix index was 89.3 TC02 Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 0.1% of the portfolio’s weight had on average involvement in fossil fuels. At the end of 2023, no company in the portfolio had any exposure. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund’s assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Overview of engagement activity

2023

65

Total number of Engagements

44

Issuers "engaged"

The Sub-Manager, Eurizon Capital SGR SpA, defines "engagement" as the dialogue with investee companies deemed "relevant" according to qualitative/quantitative criteria set by internal regulations, in order to involve them in a medium/long-term relationship, with the aim of monitoring and determining commitments by these companies on specific issues, as well as participation in the relevant Shareholders' Meetings. The prerequisites of engagement activities, therefore, are involvement, relationship and commitment. The engagement methods used by Eurizon are:

"One way" - (or unilateral, in which one of the two parties starts communication in order to inform the other about a specific issue);

"Two way" - (or bilateral, in which both parties constructively interact in order to mutually monitor the topics covered by the meeting);

"Collettivo" - (which envisages the coordinated action of several investors towards a specific issuer regarding targeted issues through (i) participation in the activities of the Corporate Governance Committee and the Investment Managers' Committee promoted by Assogestioni; (ii) initiatives jointly promoted with other investors (i.e. IIGCC and PRI)).

Engagements can be carried out through conference call, webcast presentation, letters and, when possible, in-person meetings.

As provided by the Engagement Policy, Eurizon Capital SGR has a fiduciary duty aimed at safeguarding and creating value for its Clients and Investors, which require to effectively address issues related to companies in which invests on behalf of Clients. Eurizon believes that those issuers that implement high environmental, social and corporate governance standards are able to generate sustainable performance over the long term; for this reason, ESG issues are given special attention by Eurizon.

In this context, "critical" issuers are defined as those companies characterized by a higher exposure to environmental, social and corporate governance risks i.e., having a lower ESG sustainability rating level (equal to "CCC" assigned by the specialized info-provider "MSCI ESG Research") in the equity and bond investment universe. For "critical" issuers, Eurizon has defined a specific escalation process, as detailed in its Sustainability Policy.

In addition, it is specified that the engagement can be activated as follows:

- Upon Eurizon's portfolio managers initiative;
- Upon the ESG & Strategic Activism initiative;
- Through Assogestioni collective initiative;
- In collaboration with international association.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - MULTI ASSET ABSOLUTE RETURN Legal entity identifier: 549300TZ2K4ZLL8RCQ52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: ___%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund's investors by mitigating risk and positively influencing long- term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve an ESG Quality Score, as measured by the Sub-Manager methodology, in the first tercile of the score range (i.e. at least equal to 6.67 on a range from 0 to 10).

In 2023, the ESG Quality Score based on the Sub-Manager's data provider report was 7.7 out of 10. The ESG Quality Score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***...and compared to previous periods?***

In 2022, the ESG Quality Score based on the Sub-Manager's data provider report was 7.4 out of 10. The ESG Quality Score is a compounded score adjusted by industry, momentum and overall rating distribution.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint of the Sub-fund was on average 66.8 T CO₂ Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 7.4% of the portfolio’s weight had on average involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services. . If this percentage is positive for a company, the total weight of exposure to this company is taken into account in the measure, even if the percentage of revenue is small.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

In 2023, 0% of the Sub-Fund’s assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

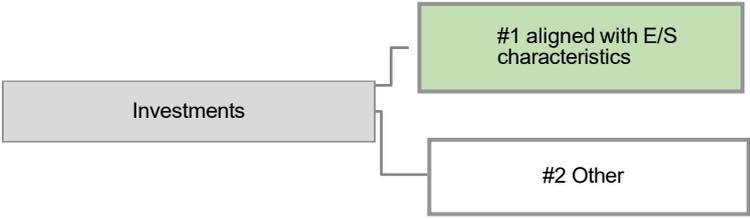

100% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

0% of the Sub-Fund's assets were invested in #2 Other.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo% (PTF)
Communications	1,73%
Materials	1,9%
Consumer Discretionary	2,03%
Consumer Staples	3,41%
Health Care	4,94%
Technology	5,69%
Other	80,3%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments, units of collective investment schemes as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of its strategy, the Sub-Manager may engage in dialogue with companies about ESG-related disclosures to better understand how potential ESG risks and opportunities are managed, among issues. While the Sub-manager does not take an activist position, the investment team may engage with company management in conversations about ESG-related disclosures to help the companies further enhance their knowledge of ESG risks and take action to reduce their environmental and social impacts.

In addition, the Sub-Manager actively monitors voting opportunities at its companies for potential governance and other ESG risks and while it has the ability to vote proxy, it hardly does it as it is uncommon within this space.

The Sub-Manager has chosen to delegate its shareholder engagement to ISS Governance, which manages and executes votes. However, the procedure allows the Sub-Manager to modify ISS votes; the final decision rests solely with the Sub-Manager.

In 2023, the Sub-Manager participated in 24 corporate actions for the Fund and another compartment of iMGP. Its votes were in agreement with management recommendations 77% of the time. Nevertheless, on some occasions, the Sub-Manager voted against management. For example, it voted against numerous proposals from Amazon, Alphabet, Microsoft, or Coca-Cola at their respective annual general meetings on issues such as tax transparency reports, climate lobbying, gender/racial pay gaps, climate change strategy, civil rights audits, tax transparency reports, among others.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - STABLE RETURN
 Legal entity identifier: 222100204TEISV1YH245

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

The Sub-Manager believes that responsible investment practices incorporating an assessment of environmental, social and governance (ESG) factors adds sustainable value

for investors by mitigating risk and positively influencing long-term financial performance, consistent with its fiduciary duty.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

According to the ESG policy, each invested security in the non-derivatives portfolio will be subject to a thorough assessment based on a variety of ESG factors provided by external sources and possibly complemented by the Sub-Manager internal research.

Regarding government issuers, the methodology which is used relies on UN SDGs alignment through a score from 0 to 100. The portfolio securities score (excluding financial derivative instruments) should be higher than the average of the relevant issuers' universe.

In 2023, the score of the portfolio is 75.9 whereas the average score of the universe is 67.5.

● ***...and compared to previous periods?***

In 2022, the score of the portfolio is 74.6 whereas the average score of the universe is 67.2.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Exposure to companies active in the fossil fuel sector:

In 2023, 0% of the portfolio’s weight had involvement in fossil fuels.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
TBIP USA 28/03/24	Government	19,13%	USA
TBIP USA 01/02/24	Government	14,65%	USA
TBIP USA 25/01/24	Government	10,60%	USA
TBIP USA 09/05/24	Government	10,46%	USA

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

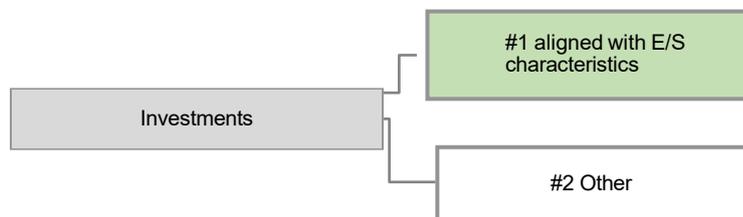

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

78% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

22% of the Sub-Fund's assets were invested in #2 Other.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the non-derivatives securities in the portfolio are entirely invested in the Government Sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, deposits or similar instruments as well as derivatives, including FX derivatives for share class hedging purpose. Positions in

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

derivatives are used to approximate the returns of alternative investments styles such as Equity Hedge and Macro selected by the Sub-Manager.

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As this Sub-fund implements its strategy using financial derivative instruments, an engagement or stewardship policy is not deemed appropriate by the Sub-Manager.

The relevant actions to meet the environmental and/or social characteristics of the Sub-fund will rather rely on the ESG integration process described above.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP – SUSTAINABLE EUROPE

Legal entity identifier: 549300XUHN5CD5XSKQ73

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 61.77%</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 37.65%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent was the sustainable investment objective of this financial product met?

The investment objective of the Sub-fund is to achieve capital growth over 5 years, by investing in the shares of European companies that provide solutions to sustainability challenges and falling within the following sustainable investment themes set by the Sub-Manager: (1) cleaner energy, (2) environmental services, (3) resource efficiency, (4) sustainable transport, (5) water management, (6) education, (7) health, (8) safety and (9) well-being.

The primary focus of the investment objective is sustainable investment (although capital growth is measured alongside). No benchmark has been selected to measure attainment of this objective, due to lack of availability of a suitably aligned benchmark for this strategy.

The investments made by the Sub-fund complied fully with this objective for the duration of the period under review.

● ***How did the sustainability indicators perform?***

The Sub-Manager assessed the Sub-fund's portfolio on four main factors on a continuous basis: avoiding social harm; avoiding environmental harm; achieving social good; delivering environmental good. Against the "achieving social good" and "delivering environmental good" factors, the Sub-Manager measured a set of core indicators that relate directly to the sustainable investment objective of the Sub-fund. These core indicators include: carbon avoided (tonnes), renewable energy generated (MWh) waste recovered or recycled (tonnes), water treated / use avoided (litres), people receiving healthcare treatment (no. of patients). In addition, the Sub-Manager on occasion utilised additional non-core indicators to cover portfolio companies invested in as at the reporting date.

Using the most recently available data (based on the latest data as at 17 April 2024) an investment of €1m in 2023 was associated with:

- 216tCO₂e was avoided. This is equivalent to the electricity use of 121 average European homes for one year and saving €10,724 in avoided carbon costs.
- 417 MWhs of renewable energy was generated. This is equivalent to the annual electricity use of 36 European households.
- 28t of waste was recycled or recovered. This is equivalent to the annual waste produced by 25 European households and saving €2,458 in avoided landfill costs.
- Saving 348,740 litres of water. This is equivalent to the water used by 5,624 showers.
- 116 people receiving healthcare treatment.
- €22,066 spent on products and services supplied by companies in the strategy and used in healthcare R&D.

● ***...and compared to previous periods?***

These reported impact numbers vary year on year for a number of reasons. This includes the increasing impact associated with growing sales of products and services that have a positive impact, changes in portfolio holdings and changes in the position size of companies held in the strategy throughout the period.

In general, environmental performance improved year on year. For example the amount of avoided carbon associated with a €1m investment in the strategy increased from 197tCO₂e to 215tCO₂e. The amount of renewable energy generated also increased from 328MWhs to 417MWhs. The litres of water saved also increased from 287,624 litres of water to 348,740 litres of water.

Equally however, the numbers of patients treated declined from 174 to 116.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

These changes are primarily due to the changing allocations to the different social and environmental themes within the fund and are within the range of impacts that we hope to achieve.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The investment process analysed and assessed potential negative impacts at the product level (significant social and environmental impact). The Sub-Manager also integrated analysis of material ESG issues into its assessment of a company's operations using a Sustainable Accounting Standards Board (SASB) - derived framework and utilised third party screening to ensure portfolio holdings were in compliance with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. SASB standards highlight key sustainability information that is reasonably likely to affect the financial performance of a company within an industry. The Sub-fund's thematic structure means that it was largely absent from heavy footprint sectors which have a material environmental or social impact. The Sub-Manager did not invest in companies that would offend the Do No Significant Harm (DNSH) material criteria for the business as a whole. The DNSH criteria ensures that no portfolio company would significantly harm any of the six environmental objectives within the EU Taxonomy Regulation.

These six objectives are: climate change mitigation; climate change adaptation; sustainable use and protection of water and marine resources; circular economy; pollution prevention and control and; protection and restoration of biodiversity and ecosystems.

The investment process as detailed above was applied for the duration of the period with no exceptions to report.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Each potential investment in the portfolio was subject to analysis of adverse impact indicators. The investment process analysed adverse impact indicators both at the product level as well as from company operations in order to assess each company against the DNSH criteria. The Sub-fund's strategy focuses on companies that sell products and services that provide solutions to sustainability challenges which means that the Sub-Manager considered adverse impacts from products as part of its overall assessment of the positive impact intensity of the products and services being supplied. For operational impacts, the Sub-Manager considered the range of environmental and social issues that are considered to be material to that particular business.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes. The investment process applied uses third party screening to ensure that portfolio holdings were in compliance with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Sub-Manager confirms that the sustainable investments were aligned with both the Guidelines and Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts were considered in the application of the Sub-Manager's investment process; the Sub-fund's thematic structure means that it was largely absent from sectors with major social and environmental impacts. Nonetheless, the Sub-Manager systematically integrated analysis of material ESG issues into its fundamental stock level analysis.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

Largest investment	Sector	% Assets	Country
SWECO AB	Industrials	4.85%	SWEDEN

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

What was the proportion of sustainability-related investments?

The asset allocation is mostly in sustainable listed equities, with the remainder in cash and derivatives, as further described below. At all times the portfolio of listed equities will represent 100% of sustainable investments.

● *What was the asset allocation?*

As at 31 December 2023:

- 99.5% of the Sub-fund's assets were invested in Sustainable listed equities, out of which:

- 61.77% related to securities having an environmental objective
- 37.65% related to securities having a social objective

10.4% of Sustainable investments are considered aligned with the EU Taxonomy, as developed further below.

- 0.5% of the Sub-fund's assets were invested in Not sustainable securities, which includes cash and derivatives.

● *In which economic sectors were the investments made?*

As at 31 December 2023, the Sub-fund's investments were made in the following economic sectors:

Sectors	Expo %
Industrials	33.79%
Health Care	33.54%
Technology	17.72%
Materials	9.65%
Consumer Discretionary	2.16%

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Cash & Others

0.46%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The percentage of Taxonomy aligned investments which contribute to the environmental objectives set out above complied with the Sub-fund's minimum target of at least 5%, calculated using company turnover.

The Sub-Manager expects that this figure will increase significantly over time as more data becomes available, and is calculated through a combination of internal research and verifiable third party sources.

The areas that the Sub-fund invested in that the Sub-Manager considers to be in environmentally sustainable economic activities include: Cleaner Energy such as wind and solar power, Environmental Services such as circular economy activities and the manufacture of sustainable materials, Resource Efficiency as such as energy efficient products, efficient buildings and efficient manufacturing technologies, Sustainable Transport including battery electric vehicles (BEVs) and infrastructure for BEVs, and Water Management such as wastewater treatment products and services.

The Sub-fund also invests in economic activities that the Sub-Manager considers to have a positive social impact. This includes in Education such as education technologies and provision, Health such as medical devices and therapies, Safety including products that keep people safe and that ensure products and services are safe, and Well-being covering activities supporting healthy eating, exercise and products and services supporting hearing, vision and oral health.

Not all these areas are covered by the current Taxonomy which only extends to two of the six environmental objectives. Furthermore, many of the Sub-fund's investments are in companies developing components that enable downstream carbon emission reductions. It is not currently clear whether all of these types of components are taxonomy eligible even though independent sources confirm that real world emission reductions are enabled by them.

The Sub-Manager has selected revenue as the KPI for assessing Taxonomy eligibility because it believes this is the most accurate way of assessing a business's current exposure to taxonomy eligible activities. The Sub-Manager believes that this is relevant to the Sub-fund investors for the same reason. The Sub-fund's investment proposition to investors is that it will invest in companies providing solutions to sustainability challenges. For over 17 years the Sub-Manager has used revenues to measure this and believe that it provides the most legitimate basis on which to judge whether a company is focused on delivering solutions to sustainability challenges.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

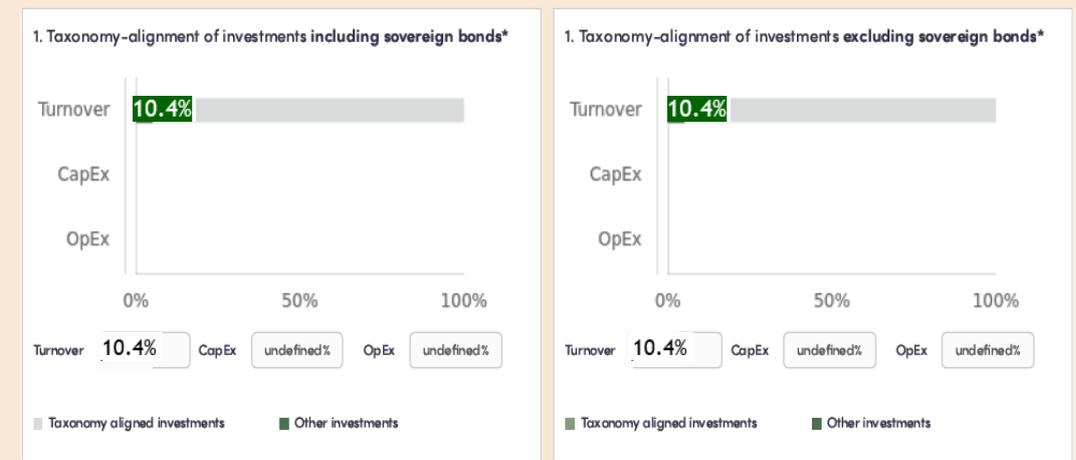

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

100% of Taxonomy aligned investments made would be considered as enabling. Investments made during the year complied with the minimum target of 5%, calculated using company turnover, which is expected to increase significantly over time as more data becomes available.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

In 2023, such percentage increased as at the end of 2022, the percentage of investments aligned with the EU Taxonomy was 5%.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As at 31 December 2023, 89.6% of the Sub-fund's sustainable investments were not aligned with the EU Taxonomy (based on company turnover).

The proportion of taxonomy aligned investments is expected to increase over time as more data becomes available. The EU Taxonomy however, is currently only focused on two of six environmental objectives (as of the date this report refers to, this is, end of December 2023). The investments, for example, in circular economy businesses, and businesses that sell products and services that treat wastewater and protect the aquatic environment are not covered by the current Taxonomy which is focused on climate change mitigation and adaptation. For these companies, while clearly delivering a positive environmental impact, there is no taxonomy that is available to align with. In addition, the strategy of the Sub-fund is invested in businesses that operate outside of the European Union. These businesses do not typically comply with detailed product standards that are specific to the European Union and referenced in the EU Taxonomy. The Sub-Manager does not generally consider these companies to be taxonomy aligned

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

even where the products and services clearly deliver a positive environmental impact. Finally very few companies even in the European Union have yet published detailed accounts of their taxonomy alignment. The Sub-Manager would expect its overall alignment to increase over time once more data is available.

What was the share of socially sustainable investments?

All social themes in the Sub-fund have a social objective, and 37.65% of the Sub-fund's investments were in social themes.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“Not sustainable” includes the remaining investments of the financial product which are not qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives. These investments do not follow minimum environmental and social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Sub-Manager's mission is to advance sustainability and create prosperity through positive impact investments. The Sub-Manager is an active owner of the companies that the Sub-fund invests in and integrates environmental, social and governance (ESG) issues into its ownership policies and practices.

The Sub-Manager engagement activity with companies is driven fundamentally by a desire to understand them better, and to advocate for practices that it believes will help secure the company's long-term success.

In addition, the Sub-Manager's proxy voting policies are intended to promote long-term shareholder value creation and risk mitigation at portfolio firms through support for responsible global corporate governance practices. The Sub-Manager's approach is based on a set of four core principles that apply globally: accountability, stewardship, independence and transparency.

Substantially all the work the Sub-Manager does during the year is focused on attaining the Sub-fund's sustainable investment objective.

In 2023, the Sub-Manager carried out various engagements with investee companies, details of which are available upon request.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable as no specific index has been designated as a reference benchmark to meet the sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US CORE PLUS

Legal entity identifier: 549300ZZ7E14E90HD820

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in assets with good environmental, social and governance (“ESG”) ratings while excluding certain companies because of the extent of their involvement in controversial products and services.

The Sub-Manager believes that responsible investment practices incorporating an assessment of ESG factors adds sustainable value for the Sub-fund’s investors by mitigating risk and positively influencing long- term financial performance.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-fund seeks to achieve a Carbon Risk Score, as measured by the Sub-Manager methodology, lower than 10 on a scale from 0 (negligible) to 50+ (severe).

As at 31 December 2023, the Carbon Risk score of the Sub-fund is 6.7.

The Carbon Risk rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

● ***...and compared to previous periods?***

As at 31 December 2022, the Carbon Risk score of the Sub-fund is 8.2.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the average Carbon Footprint was 52.5 TC02 Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 0% of the portfolio’s weight has involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
QVCN 4.45% 2/25	Consumer Discretionary	2,64%	USA
WTW 4.5% 09/28	Financials	2,51%	USA
AVGO 3.875% 01/27	Technology	2,49%	USA
TAP 3% 7/26	Consumer Staples	2,46%	USA
HRB 3.875% 08/30	Consumer Discretionary	2,44%	USA
TGNA 4.625% 03/28	Communications	2,41%	USA
FLEX 6% 01/28	Technology	2,39%	USA
SIRI 5.5% 07/29 144A	Communications	2,35%	USA
QRVO 4.375% 10/29	Technology	2,29%	USA
DKS 3.15% 01/32	Consumer Discretionary	2,29%	USA
SCI 5.125% 06/29	Consumer Discretionary	2,24%	USA
EXPE 3.8% 02/28	Communications	2,19%	USA
ORCL 6.25% 11/32	Technology	2,16%	USA
TRMB 4.9% 06/28	Industrials	2,14%	USA
DISCA 3.95% 03/28	Communications	2,14%	USA

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● What was the asset allocation?

As at 31 December 2023:

99.6% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

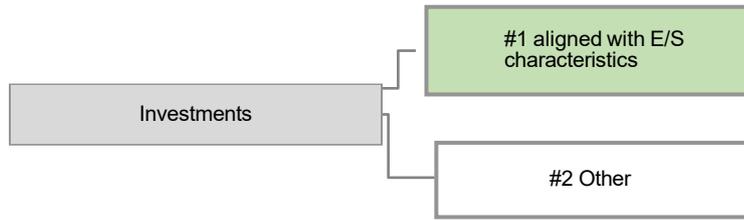

0.4% of the Sub-Fund's assets were invested in #2 Other.

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Consumer Discretionary	18,45%
Technology	17,74%
Communications	13,7%
Industrials	12,58%
Financials	9,21%
Materials	8,36%
Health Care	8,25%
Consumer Staples	8,16%
Government	3,15%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
 - In fossil gas
 - In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

 **What was the share of socially sustainable investments?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently, to protect its assets and liabilities and for investment purposes.

These investments do not follow minimum environmental and social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

As part of its strategy, the Sub-Manager may engage in dialogue with companies about ESG-related disclosures to better understand how potential ESG risks and opportunities are managed, among issues. While the Sub-manager does not take an activist position, the investment team may engage with company management in conversations about ESG-related disclosures to help the companies further enhance their knowledge of ESG risks and take action to reduce their environmental and social impacts.

In addition, the Sub-Manager actively monitors voting opportunities at its companies for potential governance and other ESG risks and while it has the ability to vote proxy, it hardly does it as it is uncommon within this space.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US HIGH YIELD
 Legal entity identifier: 54930030NV1S958BSH35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments 	

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager’s view on sustainable development.

The Sub-Manager views ESG integration as a holistic assessment of the relationships a company has with its key stakeholders and its ability to serve them now, and into the

future. The Sub-Manager believes businesses that thoughtfully balance the interests of key stakeholders, including employees, customers, suppliers and other business partners, communities, and the environment, while uniquely delivering the value they seek are positioned to deliver sustainable outcomes. The consideration of material ESG factors in its investment process is aligned with its fiduciary duty and supports the Sub-Manager’s aim to deliver attractive risk-adjusted returns to the Sub-fund’s shareholders.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, who may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Sub-Manager seeks to achieve a portfolio with a lower carbon intensity than that of the US Non-Financial High Yield market, as measured by the Sub-Manager methodology. The Sub-Manager will also monitor the carbon intensity of individual issuers (where such information is available).

As at 30 December 2023, the Carbon Intensity score is 189 tons/USD millions in sales, while the Carbon Intensity score of the US Non-Financial High Yield market is 278 tons/USD millions in sales.

● **...and compared to previous periods?**

As at 30 December 2022, the Carbon Intensity score is 194 tons/USD millions in sales.

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

As at 31 December 2023:

97.9% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

2.1% of the Sub-Fund's assets were invested in #2 Other.

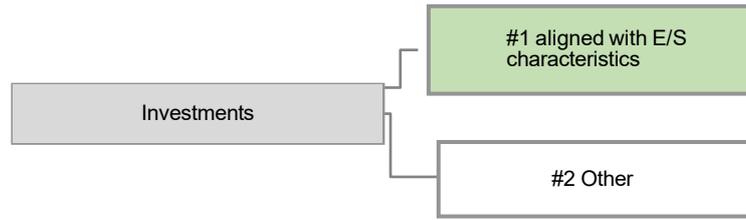

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 31 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Expo % PTF
Consumer Discretionary	18,67%
Communications	17,62%
Energy	14,34%
Industrials	10,31%
Technology	8,88%
Materials	8,63%
Health Care	6,46%
Financials	5,4%
Utilities	3,97%
Consumer Staples	3,6%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments and there are no reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently, to protect its assets and liabilities and for investment purposes.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Manager believes that issuer engagement as a debt holder tends to be more indirect when compared to that of an equity owner. While an equity owner can ultimately vote (and accordingly replace) the members of a portfolio company's board of directors, the opportunities to actively engage as a fixed income investor tend to occur around events such as new debt issuances and corporate restructurings. In such cases, depending on the size of the position held by the Sub-fund relative to the total class of debt, the Sub-Manager may be able to exert some degree of influence over an issuer, particularly with respect to governance and reporting issues but also more broadly environmental and social issues as appropriate. The Sub-Manager's active approach to fixed income investing generally includes frequent interaction with company management, as it seeks to keep an open line of communication with respect to actions that could negatively impact the value of the investment made by the Sub-fund. While the Sub-Manager does not always agree with the policies implemented by an issuer's management, it believes that remaining active and engaged will typically result in more constructive, long-term relationships surrounding topical issues, including ESG concerns.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.
- ***How did this financial product perform compared with the broad market index?***
Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US SMALL AND MID COMPANY GROWTH
 Legal entity identifier: 54930001QZSSY530QY50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in companies that have a reduced or negligible ESG risk and a good ESG Quality Score while excluding certain companies and sectors because they are not compatible with the Sub-Manager's view on sustainable development.

The environmental and/or social characteristics promoted by the Sub-fund are climate change initiatives, initiatives to improve environmental footprints and footprints and

positive agendas of stakeholders that may be involved in, or impacted by, an investee company.

The Sub-Manager views ESG integration as a holistic assessment of the relationships a company has with its key stakeholders and its ability to serve them now, and into the future. The Sub-Manager believes businesses that thoughtfully balance the interests of key stakeholders, including employees, customers, suppliers and other business partners, communities, and the environment, while uniquely delivering the value they seek are positioned to deliver sustainable outcomes. The consideration of material ESG factors in its investment process is aligned with its fiduciary duty and supports the Sub-Manager's aim to deliver attractive risk-adjusted returns to the Sub-fund's shareholders.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

Specific sustainability indicators have not been identified in the SFDR pre-contractual disclosures for the Sub-Fund for the period to which this report relates. Nevertheless, the Sub-Manager considers the below to be an important indicator for assessing the overall environmental and social profile of the Sub-Fund.

As at 31 December 2023, the Carbon Footprint of the Sub-fund was on average 14.1 TC02 Emission/mln\$ Sales.

● ***...and compared to previous periods?***

In 2022, the Carbon Footprint of the Sub-fund was on average 7.5 TC02 Emission/mln\$ Sales.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023, the Carbon Footprint of the Sub-fund was 14.1 TC02 Emission/mln\$ Sales.

2. Exposure to companies active in the fossil fuel sector:

In 2023, 0% of the portfolio’s weight has involvement in fossil fuels. Fossil Fuel Involvement measures the percentage of revenue that companies derive from thermal coal extraction, coal-based power generation, oil & gas production, oil & gas-based power generation, and oil & gas-related products and services.

3. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

4. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In 2023, 0% of the Sub-Fund's assets were exposed to companies which are in violation of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country
GLOBANT SA	Technology	5,95%	USD
DYNATRACE INC	Technology	5,08%	USD
HOULIHAN LOKEY INC	Financials	4,96%	USD
FIVE BELOW	Consumer Staples	4,49%	USD
GOOSEHEAD INSURANCE INC -A	Financials	4,05%	USD
TREX COMPANY INC	Materials	4,04%	USD
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	3,36%	USD
HAMILTON LANE INC-CLASS A	Financials	3,19%	USD
YETI HOLDINGS INC	Consumer Discretionary	3,12%	USD
WINGSTOP INC	Consumer Discretionary	3,01%	USD
MORNINGSTAR INC	Technology	2,98%	USD
ETSY INC	Consumer Discretionary	2,88%	USD

What was the proportion of sustainability-related investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

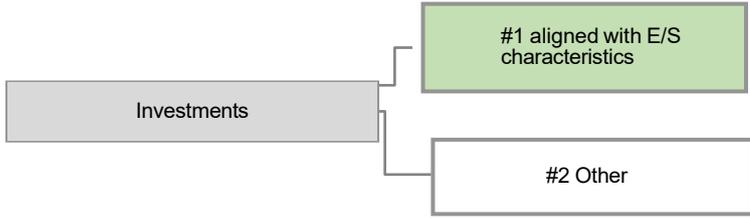

As at 29 December 2023:

98.2% of the Sub-Fund's assets were invested in #1 Aligned with E/S characteristics.

1.8% of the Sub-Fund's assets were invested in #2 Other.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

● **In which economic sectors were the investments made?**

As at 29 December 2023, the Sub-fund’s investments were made in the following economic sectors:

Sectors	Exposure %
Technology	34,78%
Consumer Discretionary	22,41%
Financials	12,2%
Health Care	10,75%
Industrials	7,86%
Consumer Staples	4,49%
Materials	4,04%
Communications	1,67%
Cash & Others	1,79%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
- In fossil gas In nuclear energy
- No

● **What was the share of investments made in transitional and enabling activities?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Engagement Approach

The Sub-Manager (“We”) engages companies throughout the lifecycle of its investment process. We start engaging company representatives at the onset of our research process before we add a company to our portfolios, all the way until we vacate our position in the holding. Our engagement approach, like our investment process, is holistic; we address all the aspects of the business, tackling diverse issues such as financial performance, risk management, corporate governance, competitive advantages, stakeholder issues and day-to-day business operations, to mention but a few. Any given call or meeting with the companies we own are thoughtfully curated to deliver sound understanding of any key questions that we might have on key topics, and more. As long-term quality investors, our proprietary flywheel investment process enables us to own sustainable businesses which we define as businesses that will generate long-term value to all its key stakeholders while delivering robust risk-adjusted returns. We thus engage companies on matters that are essential for them to maintain their market leadership positions and to thrive in dynamic markets and economic environments. As such, we engage our companies to keep updated on the health of the business’ various stakeholder groups, key business initiatives and of any other notable changes. For example, we may have questions about matters affecting customers, a key stakeholder group. As a result, we will ask questions or solicit information from company representatives on key customer issues like innovation and both product impact and quality. Additionally, we may also engage companies to discuss specific proxy issues and controversies we may have encountered in the investment research or monitoring process. Our engagement approach is enabled by the authentic relationships governed by transparency that we have cultivated with the representatives of our companies over time. We believe these engagements coupled with our rigorous and continuous research allow us to continue to make quality investment decisions with great conviction.

Calendar Year 2023 Activity

In 2023, the Small Company Growth team held approximately 49 meetings with company representatives of the businesses we own in the US SMID portfolio. In these meetings, we discussed multiple business issues which are assessed as part of our holistic sustainable investing framework. The following chart shows the business issues and the frequency at which they were discussed in company meetings in 2023:

	Frequency of discussion
Competitive Advantages	>55%
Financial Strength	>50%
Stakeholder and Value Proposition Assessment	>35%
Customer Issues	>30%
Mgmt, Board or Compensation Issues	>5%
Employee Issues	>5%
Other Governance Issues	>5%
Environmental Issues	>1%

Engagement Example - Doximity

Doximity is a productivity and professional network app for medical professionals hosting over 80% of the actively practicing physicians and 90% graduating medical students in the United States, according to the company's annual financial statement. The business generates revenue primarily from biopharmaceutical advertising. We engaged the company to assess the business' stakeholder and value proposition assessments in the highly dynamic Pharmaceutical digital advertising market. The competitive dynamics as well as the changes in that market in the post-pandemic era exposed some of that market's nuances. We discussed and gained a better understanding of the market but more importantly the strategic shifts happening in the industry and within the company. Doximity is pursuing initiatives to better suit its changing clients' needs including bringing a self-serve platform customers log into to see campaigns called the content hub, to the pharmaceutical side of the business. We also discussed the company's decision to reduce its workforce. Though both voluntary and involuntary attrition are normal and expected in business, as stakeholders we wanted to better understand the reasoning behind this reduction in the workforce. We learned that some of the employees were terminated because of their inferior performance. However, the company also admitted to having added too many people in charge of making content for pharma too quickly. The meeting's outcome was that we gained a better understanding of the dynamic Pharmaceutical digital advertising market. Briskly adding new talent into a new initiative in a highly dynamic industry was a mistake that the company learned from. It is through such engagements that we learn and identify areas of the business and aspects of the industry that we need to continue monitoring or learning about.

Engagement example - Fox Factory

Fox Factory designs, manufactures, and markets performance ride dynamics products for bicycles, motorcycles, terrain vehicles, snowmobiles, and other specialty vehicles. We engaged the company following the termination and departure of the CFO, Scott Humphrey. One of the key themes we explored was the significance of the culture of the firm which according to the CEO was the reason for the departure of the CFO. From this meeting we learned that Mr.Humphrey's technical skill was never in question and the company's financials were in great shape. The CFO's departure was important to preserve the culture of the firm because Mr. Humphrey's leadership style was not well aligned with that of the rest of the business. The consequence of that misalignment was that there was a growing gap or demarcation between the finance organization and the rest of the business.

The culture of a business is a great asset, and companies that care about both the technical needs and the cultural needs of the company should excel in the long term.

We believe these leaders of the company play a huge role in building and preserving a good culture. This is one example of a decision that one of our businesses made that shows that the company values its culture and uses the culture as a source of conviction to make the right albeit tough decision for the business. Following this call, we continued to monitor the business as the interim CFO stepped up to the role and then later when the company announced the new CFO, Dennis Schemm. Mr. Schemm has a great track record as a leader spanning more than two decades. Immediately preceding his start at Fox Factory, he was the CFO of Trex Company, Inc. We own Trex in our U.S SMID portfolio and we believe that the company's culture is great, which gives us confidence in Mr. Schemm.

How did this financial product perform compared to the reference benchmark?

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

- ***How did this financial product perform compared with the broad market index?***

Not applicable as a reference benchmark has not been selected by the Sub-fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: iMGP - US Value
 Legal entity identifier: 549300707CXZ8TRYKM19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●○ <input checked="" type="checkbox"/> No
<p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and/or social characteristics by integrating sustainability risk considerations into the investment decision making process as well as by investing in assets with good environmental, social and governance ratings while excluding certain companies because of their involvement in controversial products and services.

The Sub-Manager integrates ESG considerations in their investment process which is focused on quality-specially, sustainable earnings over an economic cycle-and risk

mitigation-modelling downside risk as much as upside returns and demanding a spread between value and price. As a result, the Sub-Manager believes this creates portfolios of sustainable businesses with compelling carbon and ESG risk scores. The Sub-Manager considers that buying high quality companies at compelling valuations is foundational to long-term investment success.

By adopting this approach, the Sub-Manager believes that it will ultimately help promote environmental and social change towards a more sustainable economy. However, it is not currently possible to determine at this stage whether the promotion of environmental and/or social characteristics promoted by the Sub-fund has led to significant results.

Indeed, due to missing well-defined standards and to the existence of different approaches towards sustainable practices, ESG data is intrinsically based on a qualitative and discretionary assessment, which may cause the data to be inaccurate. Elements of subjectivity are part of the collection and interpretation of ESG data and this could contribute to making the comparison between ESG integrated strategies difficult. Investors should be aware of the fact that evaluation they may do on some types of ESG factors may be consistently different from the approach selected by the Sub-Manager.

● ***How did the sustainability indicators perform?***

The Sub-Manager seeks to achieve a portfolio Carbon Risk Score as measured by the Sub-Manager methodology lower than 10 on a scale from 0 (negligible) to 50 and above (severe).

As at 31 December 2023, the Carbon Risk score was 8.3.

The Carbon Risk rating quantifies the company's exposure and management of material carbon issues in its own operations as well as its products and services. At each value chain stage, a company's vulnerability to carbon risks is assessed. This is followed by an assessment of how much of this risk is manageable as opposed to systemic, with a final step of evaluating the degree to which management policies are already in place.

● ***...and compared to previous periods?***

As at 31 December 2022, the Carbon Risk score was 7.1.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

— — How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

— — Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-fund considers the principal adverse impacts (“PAI”) of its investment decisions on the below sustainability indicators:

1. Carbon Footprint:

In 2023 the Carbon Footprint was on average 48.8 T CO₂ Emission/mln\$ Sales.

2. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons):

In 2023, 0% of the Sub-Fund’s assets were exposed to controversial weapons.

Consideration of PAI is embedded in the investment decision making process through the exclusion policy implemented by the Sub-Manager and the analysis of the ESG scores as explained above.

While the ability to currently meaningfully assess these impacts may be limited by an absence or limited availability and quality of information, the Sub-Manager will continue to further develop these processes to gather, when available, information and data on PAI of their investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is as at 31 December 2023

Largest investment	Sector	% Assets	Country

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest in sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“Other” includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments. These include cash, money market instruments or similar instruments as well as derivatives that have been included in the portfolio in order to manage it efficiently and to protect its assets and liabilities.

These investments do not follow minimum environmental and social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Joint Engagement Initiatives

- Endorsed the UNPRI Spring Initiative, a TNFD-aligned initiative
- UNPRI Railway agreement

Engagement Example: MillerKnoll

On April 19, 2023, a video went viral (over 24 million views within 2 days) of MLKN CEO Andi Owens’ comment to employees to ‘leave Pity City’ after some asked about staying motivated if employees did not receive bonuses this year. The average MLKN employee receives \$45,000 salary. CEO Andi Owen received a \$1.1 million salary with a \$3.9 million in stock awards and other compensation for fiscal year ending May 2022, according to most recent MLKN proxy statement. The compensation received by MLKN CEO in 2022 is in-line with its peer group. After the viral video, CEO Andi Owen sent an email to staff stating, “I feel terrible that my rallying cry seemed insensitive...What I’d hoped would energize the team to meet a challenge we’ve met many times before landed in a way that I did not intend and for that I am sorry.” MLKN has not yet decided on bonus payouts for staff, including its CEO, as its fiscal year ends in May.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Sub-Manager (Scharf Investments) Engagement: In response to remarks MLKN CEO Andi Owen made as a part of an online meeting with workers, Scharf Investments engaged MLKN over the topic of compensation. On April 27, 2023, President and Investment Committee Chairman, Brian Krawez, and Senior Research Associate, Grace Menk, sat down with MLKN CFO, Jeffrey Stutz, and Vice President of Investor Relations, Carola Mengolini, to discuss the circumstances surrounding the CEO's remarks and underlying compensation plans. We learned that Andi has been doing smaller group fireside chats within the company after the video went viral. Managers within the company are also talking to their employees to gauge morale. Scharf Investments engaged with the company on this issue and felt that outreach within the organization was a positive step in the right direction to reengaging employees.

2023 Company Engagement Summary

Company Name	Type	Topic	Date of Engagement	Response or follow-up
U.S. Railway Industry	UNPRI Collaboration	Sick Leave	1/20/2023	
MillerKnoll	Individual	Controversy - Social	5/1/2023	Quarterly engagement
